Commission Chandler brought up for discussion the disposition of the old ferry landing at North Bend, which bisects an industrial site owned by the Weyerhaeuser Timber Company. He advised that the property is not being used for any purpose and is doing no one any good, and it is his considered opinion that the property is more important to the Weyerhaeuser Timber company than it could ever be to the state. The Engineer recalled that previously he had recommended that the property be sold for its reasonable value plus the relinquishment of some rights that the company had regarding railroad tracks underneath the bridge. It was his thought that the company would be willing to relinquish those rights. Commission Chandler stated that he did not believe the company would ever require more than one track beneath the bridge. The Commission instructed the Assistant Counsel and the Engineer to prepare a report on the subject for the next meeting.

At this time the Engineer presented a list of the special minor betterment projects which he recommended for construction. He explained the formula on which the proposed jobs are recommended. The various projects contained in the list were discussed in general with the point in mind that

the discussion was for familiarizing the Commission with the jobs involved and not that any action would be taken at this time. Definite action on the proposed special betterment program was deferred until the January 5 meeting.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action with respect thereto by unanimous vote:

The contract for the Halfway-Carson Section of the Halfway-Cornucopia Secondary Highway in Baker County was awarded to Vernie Jarl, the low bidder.

All bids received for the construction of the Oregon City-New Era Section of the Pacific Highway East in Clackamas County were rejected as being too high.

Upon comparing the bids received for the Silver Lake-Harvey Creek Rock Production Project on the Fremont Highway in Lake County and the Harvey Creek-Chewaucan River Rock Production Project, also on the Fremont Highway in Lake County, it was found that the combination bids as submitted by F. L. Somers of Klamath Falls and Homer G. Johnson of Portland were identical in the total amount of $53,000. The Commission inquired of the Chief Counsel the legal technicalities in such an instance. He informed the Commission that court decisions have ruled that in calling for competitive bids an awarding body is not bound to award to the low bidder and that the statute provides that the award should be made to the lowest and best bidder, taking into consideration the ability of the contractor, his experience, etc. The Engineer stated that he had no serious objection to either of the contractors involved. The Commission then decided to flip a coin to determine the award. If the coin turned up tails the job would be awarded to Somers and if it turned up heads it would be awarded to Johnson. The coin was flipped by Chairman Banfield and turned up tails, whereupon the award was made to Mr. F. L. Somers.

The bids received for construction of the Adrain-Homedale Section of the Nyssa-Adrian Highway in Malheur County were referred to the Engineer with authority to award to the low bidder, J. A. Terteling & Sons, as soon as negotiations had been completed for a required piece of right of way.

The bids received for the Sandy River Bridge on the Columbia River Highway in Multnomah County were referred to the Engineer with authority to award the contract to the low bidder, General Construction Co., as soon as final approval is secured from the Public Roads Administration.

All bids received for the Carlton-Chehalem Creek Section of the Carlton-Chehalem Creek County Road in Yamhill County were referred to the Engineer with authority to award the contract to the low bidder as soon as approval is secured from the Public Roads Administration.

At 3:30 p.m. Chairman Banfield publicly announced the awards as follows:

"The Halfway-Carson Section of the Halfway-Cornucopia Secondary Highway in Baker County. Vernie Jarl of Gresham was the low bidder for this work at $71,538.00. The next low bidder was Homer G. Johnson, Portland, at $74,043.00. There were two higher bidders. The Commission has awarded the contract to the low bidder, Vernie Jarl.

"Oregon City-New Era Section of the Pacific Highway East in Clackamas County. The Commission has received three bids for this project, those of E. C. Hall Co., Portland, at $676,578.50, Warren Northwest, Inc., Portland, at $700,416.50, and Kuckenberg Construction Co., Portland, at $884,665.50. The Commission has rejected all three bids.

"Silver Lake-Harvey Creek Rock Production Project on the Fremont Highway in Lake County. The Commission received eight bids for this work in which F. L. Somers and Homer G. Johnson submitted identical low bids in the amount of $26,500.00. There were six higher bidders. Both of the low bidders have stipulated that they will not accept this project except in combination with the Harvey Creek-Chewaucan River Project, for which the bidding is as follows:

" Harvey Creek-Chewaucan River Rock Production Project on the Fremont Highway in Lake County. The Commission has received seven bids for this job, the low one being M. C. Lininger & Sons, Medford, in the amount of $26,300.00. The low bidder, however, has qualified his bid with the statement that he will not accept this project except in combination with the Silver Lake-Harvey Creek Project on which he bid $27,900.00. In analyzing the combination bids for both projects it has been found that F. L. Somers and Homer G. Johnson have submitted identical low combination bids in the amount of $53,000.00. The next low combination bidder was M. C Lininger & Sons at $54,200. There were four higher combination bids. The Commission has referred these bids to the Engineer with authority to award both contracts to the combination low bidder, F. L. Somers, as previously determined by the flip of a coin.

"Adrian-Homedale Section of the Nyssa-Adrian Highway. J. A. Terteling & Sons, Boise, Idaho, submitted the low bid for this work at $225,471.80. The next low bid was submitted by Babler Bros., Portland, at $238,590. There were six higher bidders. The Commission has referred these bids to the Engineer with authority to award the contract to the low bidder, J. A. Terteling & Sons, when certain conditions have been satisfied.

"The Sandy River Bridge on the Columbia River Highway in Multnomah County. General Construction Co., Seattle, Washington, submitted the low bid for this work at $334,260.00. The next low bid was submitted by Lindstrom Bros., Portland, at $341,000.00. There were four higher bidders. The Commission has referred these bids to the Engineer with

authority to award the contract to the low bidder when certain conditions have been satisfied.

"Carlton-Chehalem Creek Section of the Carlton-Chehalem Creek County Road in Yamhill County. Frank M. Parsons, Forest Grove, submitted the low bid at $110,009.00. The next low bid was submitted by Vernie Jarl, Gresham, at $120,118.00. There were four higher bidders. The Commission has referred these bids to the Engineer with authority to award the contract to the low bidder, Frank M. Parsons, when certain conditions have been satisfied."

The Commission instructed the Acting Secretary to limit the items on the agenda for the January 5, 1948 meeting to those referred from the present meeting and to consideration of the 1948 budget.

Chairman Banfield inquired of the Auditor, Mr. Malcom Hawke, as to how he was getting along in setting up his records so that expenditures could be shown in detail. The Commission desired from now on, he stated, that the books reveal that the amount set up for a project covers everything that goes into the project, construction, right of way, landscaping, etc., so the Commission can tell at a glance how much the job is to cost. He stated also that in the contemplated departmental reorganization the Commission has no intention of increasing expenditures because of the shifts. He requested the Auditor to have the budget in such shape that he could answer any question which might come up at the January 5 meeting.

The Engineer reported receipt of another letter from Mr. Forrest Cooper of Lakeview renewing his request that the state take over the Sprague River County Road, and commenting on the action taken by the Commission on his previous request. He read the letter aloud and pointed out that Mr. Cooper indicates that no progress could be made in the matter until the Highway Commission takes action. Chairman Banfield stated that the Commission had previously taken action on this and that the parties concerned had been told that the Federal Government must act first. The Commission unanimously confirmed the previous action taken.

The Engineer stated that he had been advised by interested parties in Hood River that a court minute entry showed that a former Highway Commission in 1921 indicated that it might participate in constructing a new highway extending southwesterly from The Dalles to a connection with the Mt. Hood Loop Highway. These people, he said, also want to know what the Commission intends to do about constructing a cutoff on the Wapinitia Highway. The Commission instructed the Engineer to inform these parties that no action was taken as these projects are not on the present construction program and that the Commission could not recognize an indefinite commitment made as long ago as 1921.

The Engineer also reported an inquiry from a representative of the Idaho Highway Department as to what the Oregon State Highway Commission intends to do about a proposed cooperative agreement between the states of

Idaho and Oregon concerning four bridges across the Snake River at Weiser, Nyssa, Ontario and Payette. He stated that a truck had badly damaged the bridge at Weiser and that the Idaho authorities want to know if the state of Oregon will pay half of the cost, estimated at about $300,000, to construct a new bridge. Chairman Banfield inquired if the Commission has any immediate obligation on this bridge. In reply thereto the Chief Counsel stated that the Commision has an equal responsibility with the state of Idaho inasmuch as Oregon traffic is being routed over those bridges. The Engineer advised that the best estimate he has now for a new bridge at Weiser is $150,000 each for Idaho and Oregon. He stated that it is not feasible to repair the bridge as it is about thirty years old. The Commission instructed the Engineer and the Counsel to report to the Commission regarding responsibility from a legal standpoint, who built the bridge, and information as to cost. The Engineer was authorized to confer with the Idaho officials regarding the subject.

The Commission considered and signed the following agreements and papers:

Agreement with Jefferson County covering maintenance of old section of The Dalles-California Highway from Madras to Culver as a secondary state highway.

Extension of agreement with City of Portland and Secretary of State covering traffic accident analysis in Portland for period January 1, 1948, to December 31, 1949.

Agreement with Lincoln County covering correction of bad drainage condition on the Oregon Coast Highway in Taft.

Cooperative agreement with Public Roads Administration covering construction of Oregon Federal Lands Highway Project FLH-8 (1) - Rome-Princeton Secondary Highway, Malhour County.

Agreement with California-Oregon Power Company covering removal of approximately 5,800 lineal feet of the company's power line in connection with the construction of the Glendale-Wolf Creek Section of the Pacific Highway.

Agreement with Umatilla County covering abandonment to the county of a section of the Athena-Holdman Secondary Highway.

Agreement with City of Eugene covering re-arrangement of water facilities on Broadway and Franklin Boulevard, Eugene.

Lease from E. W. Miller for quarry site at Mile Post 175-Halfway-Cornucopia Highway, Baker County.

Cancellation of lease with R. W. and Mildred E. Foye for gravel bar on Little Butte Creek in Jackson County.

Extension of lease agreement with O. W. R. & N., Union Pacific Railroad Company for automobile parking space at Oneonta.

Agreement disposing of the claim of C. J. Montag & Sons for additional payment in the amount of $10,022.83 in connection with their contract No. 2736 for construction of the Santiam River Bridge on US99 E near Jefferson.

Agreement disposing of the claim of Stanley & Ehlen, contractor on the Nyssa Section of the Old Oregon Trail, for additional payment in the amount of $191.42.

Bargain and sale deed conveying unto the City of Albany certain parcels of land in Hackleman's Addition to the City of Albany.

Bargain and sale deed conveying unto E. C. Reiman, et al. ten foot strip of land along east side of US99W near Corvallis.

Satisfaction of mortgage from Fred N. Mallory and O. L. Smith for a parcel of property at Canemah.

Release agreement in favor of J. N. and Anna M. Jacobsen releasing 2.3 acres on the Coos Bay-Roseburg Highway between Coquille and Myrtle Point from the terms of a myrtle grove agreement dated October 16, 1945.

Compromise settlement of the state vs. Olson in the amount of $1,100.

There being no further business to come before the Commission at this time the meeting adjourned at 4:15 p.m.

Chairman

State Highway Engineer

Commissioner

Acting Secretary

Commissioner

EXHIBITS "A" THROUGH "O"

Minutes of December 29 and 30, 1947

EXHIBIT "A"

Minutes of December 29 and 30, 1947

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway East (State Highway No. 1E) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of the Pacific Highway East extending from Oregon City to New Era, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS pursuant to the provisions of Section 100-115, O. C. L. A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure

EXHIBIT "B1" (CON'T)

roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Pacific Highway East, as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of the Pacific Highway East known and designated as the Oregon City-New Era Section. *

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, all of which are made part of this resolution. *

3. That all of said real properties are needed and the acquisition of the same is necessary for the specific purposes stated in the description of each ownership.

4. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described on the attached sheets, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the respective parcels of real property described on the attached sheets and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission. *

EXHIBIT "B1" (CON'T)

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

9. The real properties sought to be acquired are described on the attached sheets, consisting of 6 pages, on which sheets are shown the

EXHIBIT "B1" (CON'T)

respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties, said parcels of real property being otherwise identified as Parcels Nos. 1 to 10, inclusive. *

10. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-ninth day of December, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 96, under the heading " Real Property Condemnation Resolution" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "B2"

Minutes of December 29 and 30, 1947

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

DEC 30 1947

EXHIBIT "B2" (CON'T)

Real property owned by Earl J. Morris and Alice C. Morris, which property is located in Lot 4 of Section 6, Township 15 South, Range 16 East, W. M., Crook County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 14285, which property is being acquired for the purpose of securing road-building materials therefrom for use in connection with the Madras-Prineville and Ochoco Highways; *

Real property owned by Arthur Henry Parsons and Leonard Richard Parsons, which property is located in the north half (N½) of Section 12, Township 1 North, Range 39 East, W. M., Union County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 11425, which property is being acquired for right of way purposes in connection with the Wallowa Lake Highway; *

Real property owned by the Estate of John Barry, which property is located in Lot 70, Steele's Addition to Beaverton, in the northeast quarter (NE¼) of Section 18, Township 1 South, Range 1 West, W. M., Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 13693, which property is being acquired for right of way purposes in connection with the Tualatin Valley Highway; *

Real property owned by Umatilla County, et al., which property is located in the southeast quarter (SE¼) of the northwest quarter (NW¼) of Section 10, Township 2 North, Range 32 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 12680, which property is being acquired for right of way purposes in connection with the Old Oregon Trail Highway;* *

Real property owned by Pendleton Ranches, Inc., which property is located in Lot 8 of Section 34, Township 1 North, Range 35 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 14216, which property is being acquired for the purpose of procuring road-building materials therefrom for use in connection with the Old Oregon Trail Highway. *

EXHIBIT "B2" (CON'T)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the

EXHIBIT "B2" (CON'T)

of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-ninth day of December, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 97, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

DEC 29 1947

EXHIBIT "C"

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, under the provisions of Title 100 O. C. L. A. and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Jefferson County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described highway or road in Jefferson County be and the said highway or road hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Culver Secondary State Highway No. 361:

Beginning at a point on The Dalles-California Highway at the intersection of 5th and "D" Streets in Madras; thence southerly via Metolius and Culver to a junction with The Dalles-California Highway southeast of Culver, in the NE¼ of the NE¼ of Section 32, T. 12 S., R. 13 E., W. M., being a distance of approximately 11.54 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said title 100 O. C. L. A., Subsection 36, Section 115.

3. That this resolution be entered in the minutes of the meeting of the Highway Commission of December 29, 1947, and that the Secretary be and he hereby is instructed to deliver to the County Court of Jefferson County and to the County Clerk of Jefferson County duly certified copies thereof.

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Banks	$ 495.39
Dayville	272.76
Gold Beach	1,141.19
Helix	242.68

AND, WHEREAS each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Banks - Wilkes Avenue, Woodman Street, Parmeley Street
Dayville - One street for 900 feet south from the highway
Gold Beach - All city streets
Helix - Solar Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws, 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Cornelius	$ 1,173.07
Richland	381.51

AND, WHEREAS, each of said cities and/or towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities and/or towns:

Cornelius - "Q" Street, "M" Street
Richland - 2nd Street, 3rd Street, Main Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Forms 1 and 2 adopted by the City of Cornelius on October 9, 1946, and approved by the State Highway Commission on March 25, 1947, shall be canceled, in accordance with the request of the City of Cornelius on file in the records of the State Highway Department, and Resolution

EXHIBIT "E" (CON'T)

Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the City together with a copy of the resolution approving the plans submitted by the City.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 29th day of December, 1947.

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, under the provisions of Chapter 371, Oregon Laws, 1943, there will be by this Commission apportioned to the City of Siletz, the City's portion of State Tax Street Funds for use and disbursement during the calendar year 1948, for street purposes as provided in said law; and

WHEREAS, said city being a city of less then 1,000, to wit: a city of 582, has submitted to this Commission for approval, plans for the expenditure of said sum; and

WHEREAS, said plans and projects, having been submitted by this Commission to the State Highway Engineer for examination and approval, have been approved by him;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the following named streets of the City of Siletz, proposed for improvement by said city, as evidenced by a certified copy of a resolution adopted by said city and served on this Commission, be and said streets hereby are approved and thereby qualified for funds to be apportioned to said city by this Commission under the provisions of said law, the streets so approved being as follows:

> The streets locally known as the High School Lane and the Grade School Lane; improvement to consist of cutting roadway to an established curb line, grading the material over the roadway with a proper drainage ditch on each side, installing five culverts, this to be followed by rocking the roadway and properly blading same into place.

2. That the type, plan and character of improvement suggested in said resolution be and said plans, type and character of improvement hereby are approved.

3. That a certified copy of this resolution be delivered to the mayor of said city and a like certified copy delivered to the Secretary of State for such purpose as it may serve in connection with the administration of said act.

4. That this resolution shall be entered in the minutes and records of the Commission as of the 29th day of December, 1947.

14537

EXHIBIT "G"

Minutes of December 29 and 30, 1947

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2780 with Kuckenberg Construction Co. for grading and bituminous macadam surfacing on the Gates-Niagara Section of the North Santiam Secondary Highway in Marion County, completed November 13, 1947.

Contract No. 2806 with McNutt Bros. for grading and paving on the Reese Creek-Antelope Creek Section of the Crater Lake Highway in Jackson County, completed August 29, 1947.

Contract No. 2846 with J. C. Papin for grading and oil mat surfacing on the West Unit, Love Bridge-Black Bridge Section of the Baker-Homestead Highway in Baker County, completed October 15, 1947.

Contract No. 2857 with Sleeper & Keyes for construction of bridges over Cow Creek and Quines Creek on the Johns-Glendale Section of the Pacific Highway in Douglas County, completed November 1, 1947.

Contract No. 2869 with O. C. Yocom for surfacing and oiling on the Scholls-Newberg Section of the Hillsboro-Silverton Secondary Highway in Washington and Yamhill Counties, completed October 30, 1947.

Contract No. 2877 with J. N. & M. J. Conley for furnishing crushed rock in stockpiles on the Mt. Hood Section of Mt. Hood and Wapinitia Highways in Clackamas, Hood River and Wasco Counties, completed August 7, 1947.

Contract No. 2878 with Coos Bay Dredging Company, Inc. for constructing pier fender for the South Slough Bridge on the Cape Arago Highway, in Coos County, completed November 12, 1947.

Contract No. 2909 with Natt McDougall Co. for grading on the North Unit, Washington State Line-Buford Creek Section of the Enterprise-Lewiston Highway in Wallowa County, completed November 13, 1947.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

DEC 29 1947

14538

EXHIBIT "H"

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Crater Lake Highway known as the Reese Creek-Antelope Section in Jackson County, the northerly terminus of which is at Highway Engineer's Station 1532+50 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 1933+58 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as formerly located have been eliminated from the right of way of the relocated line, some of which eliminated sections or areas are no longer needed for highway purposes, but have use and value for other public uses; and

WHEREAS, the State, acting by and through its Highway Commission, and Jackson County, acting by and through its County Court, heretofore, to-wit: On the fourth day of June, 1946, entered into a written agreement relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Crater Lake Highway was completed on August 29, 1947, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition made or to be made of the areas and sections of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively:

1. That the portion of the old right of way of the Crater Lake Highway between Highway Engineer's Station 1858+50 of the reconstructed line and the intersection of the old highway and the Little Butte Secondary Highway is hereby abandoned as a part of the right of way of said state highway, and said right of way is hereby surrendered to the County Court of Jackson County for county road purposes, and all right, title, or interest which the State has or had in the same is hereby vested in Jackson County.

2. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, which portion lies between the intersection of the old highway with the Little Butte Secondary Highway and Highway Engineer's Station

EXHIBIT "H" (CON'T)

1885+00 of the reconstructed highway, is hereby abandoned as any part of the right of way of said state highway. All of said abandoned section of said highway is to remain and be maintained as a public highway and the Commission hereby declares such section of the old Crater Lake Highway to be an extension of the Little Butte Secondary Highway, and said road shall thereafter be maintained by the State as a secondary highway.

3. That there is attached hereto and by this reference is made a part hereof, a print on which is shown, colored in red and designated as Unit "A", the area of the old right of way which is to be taken over and maintained by the County; and there is shown on said print, colored in yellow and designated as Unit "B", the area of the abandoned section of said highway which is to remain and be maintained by the State as an extension of the Little Butte Secondary Highway; that the area shown on said print, colored in green, includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance, and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said print shall be retained and held by the State and shall not be permitted to revert to or become the property of abutting owners. *

4. That this resolution be entered in the minutes and records of the Commission as of the 29th day of December, 1947.

FOOTNOTE:

* The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 175, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

DEC 29 1947

14540

EXHIBIT "I"

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, the Highway Commission found it necessary and desirable to relocate the section of the Pacific Highway East known as the Halsey-Harrisburg Section in Linn County, the northerly terminus of which is at Highway Engineer's Station 906+55 of the reconstructed line, and the southerly terminus of which is at Highway Engineer's Station 1358+88 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as formerly located have been eliminated from the right of way of the relocated line, some of which eliminated sections or areas are no longer needed for highway purposes, but have use and value for other public use; and

WHEREAS, the State, acting by and through its Highway Commission, and Linn County, acting by and through its County Court, and the City of Halsey, acting by and through its municipal authorities, heretofore, to-wit: On the fifth day of November, 1947, entered into a written agreement by the terms of which the eliminated sections or parts of old right of way which must be maintained for the service of persons living thereon or communities served thereby, are to be maintained by the County and City as in said agreement set out; said agreement is now in full force and effect; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition made or to be made of the areas and sections of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively:

1. That the portion of the old right of way of the Pacific Highway East between Engineer's Station 940+90 of the reconstructed line and Engineer's Station 945+10 of the reconstructed line is hereby abandoned as a part of the right of way of said state highway, and said right of way is hereby surrendered to the County Court of Linn County, and all right, title, or interest which the State has or had in the same is hereby vested in Linn County.

2. That the section of said old right of way now abandoned as a part of the Pacific Highway East and lying between Engineer's Station 921+40 and Engineer's Station 940+90 is hereby abandoned as a part of the said state

DEC 29 1947

EXHIBIT "I" (CON'T)

highway, and all right, title, or interest which the State has or may have in said right of way is permitted to revert to and vest in the City of Halsey.

3. That there is attached hereto and by this reference is made a part hereof, a print on which is shown, colored in blue and designated as Unit "B", the area of the old right of way which is to be taken over by the City; and there is shown on said exhibit, colored in red and designated as Unit "A", the area which is to be taken over and maintained by the County; and there is shown, colored in green, new right of way acquired by the State.

4. That this resolution be entered in the minutes and records of the Commission as of the 29th day of December, 1947.

FOOTNOTE:

* The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 176, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "J"

Minutes of December 29 and 30, 1947

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: . . . . . Corvallis - Newport Highway . . . . . .

Highway number: . . . . . 33 . . . . . Route Number US20 . . . . . .

Location of Termini	Established Speed
M. P. 54.37 (West of Corvallis) to M. P. 56.33 (West Limits of Corvallis)	45 miles per hr.

DEC 29 1947

EXHIBIT "J" (CON'T)

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

DEC 29 1947

14544

EXHIBIT "K"

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, the Portland Gas & Coke Company, with headquarters in Portland, Oregon, is a public utility engaged in the manufacture, sale, and distribution of gas to patrons for heating of homes and for other domestic and business uses; and

WHEREAS, the Company has undertaken to serve approximately 120,000 customers whose homes and places of business are equipped with gas facilities and are not equipped so that in case of emergency any other type of fuel can be substituted; and

WHEREAS, through no fault of the Portland Gas & Coke Company, but in spite of diligent effort to avoid conditions which make it impossible for said Company to serve its customers, the Company is now confronted with an emergency; and

WHEREAS, because of said emergency and the attending conditions which are quite beyond the control of the Company, it has become imperative that the Company in order to meet a threatened shortage in gas fuel import from California points liquid petroleum gas; and

WHEREAS, because of the fact that there is no available water transport and there are not sufficient railway tank cars, such commodity must be transported from points in California to the Company's plant in Portland, Oregon, by motor transport; and

WHEREAS, the only available motor transports engaged in the transportation of such commodities are owned and operated in the State of California and are of a size and weight, or load capacity, in excess of weights, length limits, and load capacity prescribed under Oregon law; and

WHEREAS, it appears that the Interstate Commerce Commission and the Public Utilities Commissioner of Oregon have each issued to the operators of said motor trucks temporary licenses, thus making possible their use and operation in the State of Oregon to meet the existing emergency, but it appears that in addition to the temporary permits issued by the Interstate Commerce Commission and the Public Utilities Commissioner of Oregon said trucks cannot operate in Oregon without permits issued by the Oregon State Highway Commission; and it appears further that such permits for such purpose can be issued only by the Oregon State Highway Commission under special conditions and when in the opinion of the Commission the interest of the public will be served by the proposed movement over and use of Oregon State Highways; and

EXHIBIT "K" (CON'T)

WHEREAS, the Portland Gas & Coke Company has applied to the Highway Commission and has requested that a permit be issued to Fortier Transport Company, F. N. Rumbley Company, and Ransome Transportation Company authorizing such permittees to operate a fleet of trucks over the Pacific Highway and the Pacific Highway East from the Oregon-California State Line to Portland, Oregon, for the transportation of petroleum gas; and

WHEREAS, after consideration of all of the facts and circumstances, it is the judgment of the Commission that a real emergency exists which can be relieved only by the use of said vehicles, and it is further the judgment of the Commission that the interest of the public will be served by the movement over said highways for the transportation from points in California to the plant of the Portland Gas & Coke Company in Portland liquefied petroleum gas;

NOW, THEREFORE, subject to the conditions, requirements, and limitations hereinafter set forth, it is ordered that a temporary permit be and such permit hereby is issued to Fortier Transport Company, F. N. Rumbley Company, and Ransome Transportation Company to operate over the Pacific Highway in Oregon from the Oregon-California State Line to Junction City, Oregon, and the Pacific Highway East from Junction City, Oregon, to Portland, Oregon, motor vehicles specifically described and identified in the records of the Commission in Salem, Oregon.

This permit is subject to the following express conditions, requirements and limitations:

a. The permit is temporary as to duration and shall be void thirty days from date thereof, unless upon or immediately prior to the expiration thereof such permit is extended by order of this Commission.

b. The permittees shall provide and keep in effect during the life of this permit or any extension thereof property damage insurance in the amount of $100,000.00 and public liability insurance in the amount of $100,000.00/$250,000.00.

c. Such protection may be by a policy or policies issued specially for this transaction, or may be evidenced by a rider satisfactory in form to the Oregon State Highway Commission, which rider shall be attached to and made a part of a policy or policies now carried by the permittees.

d. The permit issued pursuant to this resolution shall be in accordance with the form attached hereto and by this reference made a part hereof. *

e. Upon the expiration of said thirty-day period, or immediately prior thereto, this permit, upon satisfactory showing that the emergency still exists, may be extended for a like period or for successive like periods,

EXHIBIT "K" (CON'T)

but shall not be extended for any period or periods beyond the thirty-first day of March, 1948.

f. When the provisions and requirements specified herein and in said approved form of permit have been fully complied with by the permittees, a permit in said form signed for the Highway Commission by Ralph B. Sipprell or Paul Davies shall be deemed in full force and effect.

g. Said permit may, before the expiration thereof for violation of any of its terms, or when in the judgment of the Commission public welfare and public interest warrant, be canceled and terminated without liability on the part of the State or its Highway Commission.

h. It is recognized that a permit or permits have heretofore been issued to the said permittees pursuant to oral instruction given by the Highway Commission, therefore, said permit so ordered hereby is ratified.

This resolution shall be entered in the minutes and records of the Commission as of the 30th day of December, 1947.

FOOTNOTE:

* The permit form mentioned in the above resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Item No. 25, under the Heading "Special Matters" and said exhibit by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "L"

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, the Commission, on the 24th day of October, 1944, adopted a resolution and entered the same in the minutes of the Commission, by which the Commission authorized certain individuals named therein, to sign permits authorizing the operation of motor vehicles over public highways when such movements conformed to the regulations and provisions adopted and established by the Commission, and

WHEREAS, since the adoption of said resolution, it has developed that the purpose of said resolution can be furthered and public convenience better served by the selection of certain other Highway employees, and the vesting in them of authority to sign permits issued under the authority of said resolution,

NOW THEREFORE, Be It and It Hereby is Resolved by the Commission, that the following named Highway employee, to-wit: Helen M. Wells, Secretary to Division Engineer, at La Grande, be and she hereby is authorized to issue permits within the meaning, purpose and scope of said resolution, and any permit issued, as provided therein, shall be valid when signed for the Commission by the above named person;

This this resolution be deemed an amendment of said resolution of October 24, 1944, and shall have no force or effect outside or beyond the provisions of said resolution;

This this resolution be entered in the minutes and records of the Commission as of the 30th day of December, 1947.

DEC 30 1947

14548

EXHIBIT "M"

Minutes of December 29 and 30, 1947

RESOLUTION

WHEREAS, the Commission, on July 21, 1947, upon the recommendation of its Engineer, and after careful consideration, adopted a resolution under the authority of Chapter 156, Oregon Laws 1947; and

WHEREAS, under the terms of said resolution, the Commission adopted and approved under Exhibit "A" and Exhibit "B", certain sections of highways under the designation of "Group 1 Highways" and "Group 2 Highways"; and

WHEREAS, based upon the advice and recommendation of its Engineer, the Commission now finds that that section of the Crater Lake Highway known as the Medford-Eagle Point Section is of such a geometric design that it will safely accommodate combinations of vehicles and the weight specified for Group 1 highways; and

WHEREAS, based upon the advice and recommendation of its Engineer, the Commission has found that that section of the Ochoco Highway between Redmond and the Ochoco Ranger Station, Mile Post 43.65 (25 miles east of Prineville), is of such a construction, alignment and design that it will adequately accommodate 60-foot vehicles allowed under the designation of Group 1 highways;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by this Commission, all members being present and voting affirmatively:

1. That the Medford-Eagle Point Section of the Crater Lake Highway be and the same hereby is designated as a Group 1 highway, and its designation and a Group 2 highway, under the terms of the Commission's resolution of July 21, 1947, be and the same hereby is deleted.

2. That the Redmond-Ochoco Ranger Station Section of the Ochoco Highway be and the same hereby is designated as a Group 1 highway, and its designation as a Group 2 highway, under the Commission's resolution of July 21, 1947, be and the same hereby is deleted.

3. In all other respects, the Commission's resolution of July 21,1947, is hereby ratified and confirmed, and the sections of the Crater Lake Highway and the Ochoco Highway not herein specifically referred to, shall be and remain as Group 2 highways, under the terms of the Commission's action of July 21, 1947.

4. That this resolution be entered in the minutes and records of the Commission as of December 30, 1947, and the Secretary is directed to deliver to the Superintendent of State Police, a full, true and complete copy thereof, and to the Public Utilities Commissioner, alike copy.

R E S O L U T I O N

AMENDING RESOLUTION ADOPTED BY

OREGON STATE HIGHWAY COMMISSION

November 25, 1947,

ORDERING REDUCED MAXIMUM LOAD LIMIT

on the

WESTON-ELGIN STATE SECONDARY HIGHWAY

WHEREAS, the State Highway Commission at a meeting held on the 25th day of Novem er, 1947, adopted a resolution ordering a reduction of 50 percen in the maximum weight of loads transported over the Weston-Elgin Secondary State Highway No. 330, effective during the spring months(February 16 to May 1, 1948) when frost is leaving the ground, which said resolution provided that "in no event shall the combined weight in pounds bearing on the surfac of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle"; and

WHEREAS, it is now the judgment of this Commission that the combined weight of load an vehicle bearing on the surface of the highway at contact with the wheels of any one axle other than the front axle of the truck or truck-tractor shall not be more than 50 percent of the maximum weight alloted by law for such axle, in order to preserve the highway surface during the said restricted period;

NOW THEREFORE, the circumstances being as stated, the Commission all members being present and affirmatively voting, hereby approves the follow ing modification of the first paragraph on Page 2 of the original resolution adopted on November 25, 1947:

"The maximum weights which shall apply to the following highway, to-wit:

WESTON-ELGIN STATE SECONDARY HIGHWAY No. 330 from Weston, in Umatilla County, to Elgin, in Union County.

DEC 30 1947

EXHIBIT "N" (CON'T)

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle, and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed fifty (50) percent of the maximum limit set by law for any one axle."

IT IS THE ORDER of this Commission that the original resolution be rewritten including such modification and that a certified copy of the revised resolution and order be furnished to the County Clerk of Umatilla County and a like copy to the County Clerk of Union County, and that a like certified copy of the order be furnished to the Superintendent of the Department of State Police for his information;

AND IT IS FURTHER ORDERED that a notice containing the modified restrictions be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

Dated this 30th day of December, 1947.

DEC 30 1947

EXHIBIT "O"

Minutes of December 29 and 30, 1947

R E S O L U T I O N

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the Gold Beach Section of the Oregon Coast Highway, in Curry County, and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the survey of the Gold Beach Section of the Oregon Coast Highway, in Curry County, together with the map, which for identification purposes bears the map file No. 5B 19-6, field notes and other engineering data submitted by the Engineer, hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed that same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the thirtieth day of December, 1947.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1948	Subject
14552	Jan.5	Salaries and wages. Engineer to submit report on pay increases.
		Real Property. Columbia River Hwy. St. Helens. Offer of $20,000 to Jewell Ice Cream Co. approved. Condemnation approved if offer not accepted. Resolution adopted.
14555		Budget. State Major Betterment Program. Expenditure of $3,000,000 discussed.
		Umatilla County. Helix-Columbia River County Road. Bids to be considered in the future.
		Lake County. Warner Secdy. Hwy. Bids for improvement to be called again.
		Budget. State Major Betterment Program. Engineer to submit list of jobs to be done in 1949.
14558		Authorized preparation of plans and acquisition of R/W.
		Meeting recessed at noon to reconvene at 1:45 p.m.
		Coos County. Enegren Ferry. Counsel to make report of actions in connection with Gunnell settlement.
		Budget, 1948. General budget approved.
14563		Budget, 1948. Capital Outlays. Surveys and R/W acquisition approved. Projects to be approved before work is started.
		Salem Hwy. Office. Someone to be in office Saturday forenoons to take care of emergencies.
14564		Budget, 1948. Chief Accountant to show contingencies as separate items in cost reports.
		Maintenance contingencies and salary increases to be shown separately on cost reports.
		Radio. Engineer to make report on request from State Police.
		Operations costs to be charged to jobs or departments incurring same.
		Parks Budget. Approved in principle. Survey work to be done by present engineering forces.
14565		Approval on major items to be secured as work arises.
		Equipment. Expenditure of $250,000 approved.
		Astoria ferry. Approved calling bids for alterations to docks.
		Personell. Authority to hire if approved in budget.
		Salem Shops. Transportation of employees approved. Purchase
14566		of bus approved.
		Meeting adjourned at 5:00 p.m.
14567	Feb.2	Bids received on the following projects:
		Austin Junction-Forest Boundary and Brogan Hill Sections
		Gunnell Road-Robertson Bridge Section
14568		Troutdale Overcrossing
		Barbour Boulevard-Boones Ferry Road Section
		Wasco-Grass Valley Rock Production

Page	Date 1948	Subject
14569	Feb.2	Kent-Cow Canyon Junction Rock Production
		Minutes of December 29 and 30, 1947, approved.
		Parks Superintendent reports on following matters:
		Silver Creek Falls Recreational Project. Administrative procedure approved. Operation to begin when title has been secured from National Park Service
		Lava Caves Park. Removal of 50 diseased trees approved.
		Oregon Coast Hwy. Yachats. Action deferred on Christensen offer to donate one acre.
14570		Merchandise vendors on state hwys. Oregon City. Request for permit by Grimes denied.
		John B. Yeon Park. Burnworth offer of $500 for cast iron pipe accepted.
14571		Wayside picnic areas. Development of 14 approved. Authority granted to erect signs.
14572		Coos County. Sunset Bay Park. Deed from county declined due to restrictions. Referred to Parks Superintendent.
		Simpson Park. North Bend. Sale of 2.2 acres to Weyerhaeuser. Action deferred.
		Real Property. Acquisition authorized. See EXHIBIT "A".
		Item No. 14281. A.N. Bush property. Highway fund to be reimbursed by Board of Control
14573		State Hwy. Dept. Office Bldg. Tenants on block to vacate in 6 months. See EXHIBIT "B1".
		Item 11902A. Condemnation approved if Kliks does not accept $12,000.
		Tualatin Valley Hwy. West Slope-Beaverton Section. acquisition of R/W deferred. Engineer to report.
		Columbia River Hwy. Bonneville Dam. Acquisition of R/W deferred. Counsel to report before option expires.
		Curry County. Oregon Coast Hwy. Gold Beach. Construction deferred.
14574		Condemnation. Offers approved. See EXHIBITS "B1" and "B2".
14575		Benton County. Albany-Corvallis Hwy. Construction of footpath, Children's Farm Home, deferred. Engineer to report.
		Sale of bldgs. Benton County. Pacific Hwy. W. Offer of Cook to purchase approved.
		Sale of land. Umatilla County. Weston-Elgin Secdy. Hwy. Offer of Thompson to purchase 1.12 acres approved.
		Sale of land. North Santiam Secdy. Hwy. Mill City. Sale of 3 acres to city approved.
		Sale of land. Jefferson County. Sale of 4.32 acres to George Short approved conditionally.
14576		Timber strips. Suggestion to curb gyppo logging operators. State not to take initiative.

Page	Date 1948	Subject
14576	Feb.2	Sale of land. Klamath County. Sale of 20 acres to Mrs. Foegeding approved.
		Oregon Coast Hwy. Otis. Easement to Fred Afalter approved.
		Oregon Coast Hwy. North Bend-Coos Bay. Easement to S.P. Co. approved.
14577		Portland. Approved 3 deeds conveying to city property acquired for shipyard access roads.
		Meeting recessed at 12:00 noon to reconvene at 2:00 p.m.
		Columbia County. Columbia River Hwy. Jewell Ice Cream Company. R/W at St. Helens. Architects to confer. Counsel to report.
14578		Curry County. Oregon Coast Hwy. Port Orford. Engineer and Counsel to report on deadending streets.
		Marion County. Beaverton-Aurora Secdy. Hwy. Aurora. Use of airfield for racing. Counsel to handle and report action.
14579		Airfields. Use of auto to assist plane take off approved. Counsel to handle.
		Sale of land. Nasburg's Addition to Coos Bay. Sale to Karl Nichols approved.
14580		Sale of land. Portland. Huntington Rubber Mills. City to be asked not to sell property.
		Beaches. Yachats smelt sand. Counsel reports Commission's authority. Action deferred.
		Toll bridge. Columbia River. The Dalles. Approved three-way agreement for study of facts.
14581		Longview Bridge. Columbia River. Request of Washington State to waive payment of taxes. No action.
		I.M. Schannep. Expression of sympathy ordered filed.
		Beaches. Oceanlake. Prohibition of bonfires. Action deferred.

14698		Recessed at 12:00 noon to reconvene at 1:30 p.m.
		Salaries and wages. Engineer's recommendation of March 8, 1948, approved. See EXHIBIT "Q". Engineer and Counsel to work for further increases.
		Crooked River Hwy. Re-routing of hwy. around proposed dam. No action.
14699		Willamette River Bridge. Independence. Marion and Polk counties to write letters stating position.
14700		Marion County. Salem-Silverton Road. Delegation request purchase of R/W in Silverton. Engineer to report.
14701		Clatsop County. Elsie Cutoff Hwy. Delegation urges construction. No action.
		Awards. Chairman announces award of contracts.
14703		Columbia County. Columbia River Hwy. St. Helens. Amount of damage to Erickson's plant discussed. No action.
14704		Umatilla County. County proposes exchange of roads. Action deferred.
		Signals. Pacific Hwy. Junction City. Installation approved.
		Crooked River Hwy. Re-routing of hwy. around proposed dam.
14705		Signals. Tualatin Valley Hwy. Aloha. Installation approved. Impractical to relocate hwy.
		Signals. Pacific Hwy. Salem. Installation of three approved.
		Office space. Additional space approved at Roseburg, Coquille and Meacham.
14706		Lane County. McKenzie Hwy. Springfield by-pass route. Request for survey denied.
		Sale of Bldg. Pendleton. Bid rejected. Building to be turned over to Maintenance Dept.
		Sale of Used Equipment. High bids accepted. See EXHIBIT "E".
		Oregon Coast Hwy. Otis. Low bid for Salmon River Bridge rejected. Job to be re-advertised.
14707		Contracts awarded. Engineer's award confirmed.

Page	Date 1948	Subject
14707	March 12	Budget. 1948 Major Betterment. Work on Flinn Bridge substituted for bridge at Noon Station.
		Klamath County. South Poe Valley Road. Action deferred on request that State take over maintenance.
14708		Josephine County. Grants Pass. Cave Man Bridge. Request for chains and signs. Referred to Engineer.
		Linn County. Albany. Maintenance Hdqtrs. Appproved payment of city assessment.
		Lane County. Springfield-Creswell Secdy. Hwy. State to build log road crossing. Booth-Kelley Lumber Company to reimburse State.
14709		Lane County. Richardson-Eugene Secdy. Hwy. Petition for improvement from Globe to Richardson denied.
		Wallowa County. Wallowa Lake Hwy. Underpass at Minam. Request for improvement denied.
		Umatilla County. Umatilla. Aid on concrete curbs along 6th Street. Engineer to report.
14710		Douglas County. Pacific Hwy. Roseburg. Request for improvement north of city denied.
		Coos County. Powers Secdy Hwy. Request for improvement to be included in 1949 Major Betterment Budget.
		Lane County. Springfield-Creswell Secdy. Hwy. Jasper-Pleasant Hill. Request for improvement denied.
		Budget. Capital outlays 1948 projects totaling $33,375 approved.
14711		Budget. 1948. Minor Betterment expenditure of $307,565 approved.
		State Tax Street Funds. See EXHIBIT "F".
14712		Lane County. Mohawk Hwy. Request for improvement denied.
		Umatilla County. Milton. Cooperation with city on drainage problem approved.
		Extensions of time granted as follows: Contract Nos. 2738, 2739, 2790, 2860, 2872, and 2914
14714		Contracts completed and accepted as follows: Nos. 2739, 2790, 2872, 2929, and 2935. See EXHIBIT "G".
14715		Coos County. Enegren Ferry. Resolution adopted naming ferry "Charles Enegren". See EXHIBIT "H".
		Astoria Ferry. Babbidge and Holt contract expires May 31, 1948. Approved advertising for bids for one year.
		Insurance. Astoria Ferry "M.R. Chessman". Full Coverage Plan 1A approved.
14716		Insurance. Astoria Ferry. Excess protection and indemnity coverage. Action deferred.
		Umatilla County. Old Oregon Trail. Umatilla-Hermiston. Abandonment resolution approved. See EXHIBIT "I".
		Marion County. North Santiam Hwy. Gates-Niagara. Abandonment resolution approved. See EXHIBIT "J".

Page	Date 1948	Subject
14716	March 12	Signals. Salem-Dallas Hwy. West Salem. Installation of traffic signal near Salem bridge approved.
		Clackamas County. Oregon City. Cascade Secdy. Hwy. Intersection at 7th and Washington streets designated as 4-way stop. See EXHIBIT "K".
14717		Signals. Portland. Northwest Front Avenue. Request to install denied. If railroad company not install, State pay them $733 and take signal equipment.
		Curry County. Oregon Coast Hwy. Brookings. Lighting discussed. Action deferred.
14718		Curry County. Oregon Coast Hwy. Brookings. Resolution adopted re parking on R/W. See EXHIBIT "L".
		Clackamas County. Pacific Hwy. East. Milwaukie. "No Parking" zone established. See EXHIBIT "M".
		Manley Robison authorized to attend Tourist Conference in Pullman, Washington April 4 to 7, 1948.
		Carl W. Jordan authorized to attend Travel Shows in Oakland and Los Angeles March 26 to April 22, 1948.
		U.S. Marine Corps certificate of appreciation presented and ordered filed.
14719		Advertising in Oregon State Bar Association journal. Referred to Advisory Board on travel matters.
		Columbia River Hwy. Troutdale. Concession privileges at Sandy and Troutdale. Action deferred.
		Personnel. J.F. Waller to be retained one year. Engineer to report employees reaching retirement age.
14720		Load limits. Reduced load limits confirmed. See EXHIBIT "N".
		Load limits. Increased limits confirmed. See EXHIBIT "O".
		Load limits. Placing and removal of reduced limits on Richardson-Eugene Secdy. Hwy. approved.
		Log Hauling. Harold H. McGee. McGee's permit cancelled for 30 days.
14721		Commissioner Chandler excused. Returned later.
		Weighmasters' Operations. Report for January 1948, ordered filed.
		Lane County. Richardson-Eugene Secdy. Hwy. Amazon Creek. Agreement with U.S. War Dept. approved.
		Coos County. McCullough Bridge. Extension of Central Lincoln P.U.D. Permit on bridge approved for 19 months.
		Permits. Emergency transportation. Resolution adopted. See EXHIBIT "P".
14722		Equipment. Approved purchase of three semi trailer tanks.
		Equipment. Purchase of two Buick cars approved.
		Equipment. Approved purchase of new Commission car.
		Jackson County. Pacific Hwy. Tolo Overcrossing. Agreement with S.P. Company and Jackson County approved.
		Coos County. Powers Secdy. Hwy. Timber cut on R/W. Lewis Eiseler to pay $6.00 per thousand FBM.

Page	Date 1948	Subject
14723	March 12	Throughways. Action deferred.
		Beaches. Smelt Sand at Yachats. Editorial from Astorian-Budget ordered filed.
		Meeting date set for April 19 and 20, 1948.
		Real Property. Lane County. McKenzie Hwy. Approved quit-claim deed conveying to John P. Stobie .062 acre.
		Tillamook County. Oregon Coast Hwy. Wi-ne-ma. Purchase of lots from William F. Morse approved.
		Lincoln County. Oregon Coast Hwy. Depoe Bay. Engineer to furnish R/W Dept. with description of property.
14724		Real Property. Excess to be sold only twice a year.
		Klamath County. Bonanza. Improvement to county road to be considered in construction program.
		Baker County. Baker-Homestead Hwy. Richland. Construction of foot path authorized.
		Surveys. Curry County. Oregon Coast Hwy. Gold Beach. Authority granted to make location survey.
		Lake County. Warner Secdy. Hwy. Offer of County to contribute $10,000 denied.
14725		Snake River. Agreement with Idaho re maintenance of four bridges approved.
		Commissioner Chandler returned to the meeting.
		Multnomah County. Columbia River Hwy. Oneonta Borrow Pit. Agreement with Leonard and Slate approved.
		Salem State Hwy. Office Bldg. Service entrance on Chemeketa Street. Engineer confer with Board of Control.
14726		Malheur County. Nyssa-Adrian Hwy. Adrian. Modification of agreement with Union Pacific Railroad Company approved.
		Douglas County. Pacific Hwy. Umpqua River Bridge. Commission to inspect pier failures. Engineer to report.
		Columbia County. St. Helens. Counsel to condemn Erickson property if they not accept $25,000.
		Agreements and other papers signed.
14728		Meeting adjourned at 5:30 p.m.
14729		EXHIBIT "A". Clatsop County. Deed for park.

4552

Portland, Oregon
January 5, 1948

The State Highway Commission met in regular session at 9:00 a.m. in Room 715 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
G. W. Neuner, Assistant Counsel
M. H. Hawke, Auditor
Floyd Query, Acting Secretary

In the matter of pay for holidays for hourly employees and salary increases for employees in the lower pay brackets the Engineer reported that he had not had time, since the meeting of December 29 and 30, 1947, to prepare a report on this matter. He stated that the preparation of such a report requires considerable study and that the report would be sent to the Commission by mail as soon as it is ready.

The Commission had under discussion the matter of acquiring additional right of way in St. Helens on the Columbia River Highway from the Jewell Ice Cream Company. This matter had been considered previously at the meeting of December 29 and 30, 1947. The Engineer reported that the 19 foot jog in the present 80 foot right of way now owned by the Jewell Ice Cream Company should be acquired in the interests of safety for the traveling public. He pointed out that the ice cream company now owns a tract of land which extends 19 feet beyond the adjoining highway right of way and that this leaves a short section where the distance from the centerline of the highway to the edge of the company-owned property is only 21 feet. The Chief Counsel stated that it is very difficult to analyze the actual amount of damages to the ice cream company if the state takes the 19 foot wide section. He stated that the Ericksons, owners of the plant, want a new plant which a state right of way agent estimates will cost approximately $36,000. A representative from the Department of Agriculture had made an estimate of approximately $24,000 based on revising the present plant. He advised that one of the Ericksons had called him recently and they want a decision on the matter. He stated that the Ericksons would probably ask damages of $40,000 or more, but that in his opinion the state should offer only $20,000 and suggested that parking facilities be limited on the adjoining sections where the Highway Department has an 80 foot right of way. He recommended an offer of $20,000 for the property and acquisition by condemnation if it is refused. Chairman Banfield inquired what recourse the state has if the amount awarded in condemnation should be higher than is considered a fair value. The Counsel replied that the state would have to pay the amount set by the court if it takes the property, and, if the Commission decided not to pay such amount and abandoned the proceedings,

then it would have to pay court costs and attorney's fees. Upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler, the Commission unanimously authorized the Counsel to offer the Jewell Ice Cream Company $20,000 for its property, and further authorized him to proceed with condemnation if it is not accepted. Thereupon by unanimous vote the Commission adopted the following resolution relative thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land described on the attached sheet are necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property described on the attached sheet are necessary for right of way purposes in connection with the Columbia River Highway, which real property is owned by Charles D. Erickson, Walter S. Erickson, and Irving T. Erickson, and is identified in the records of the Highway Commission as file R 14094; *

2. That the Commission does hereby find and declare that the said parcels of real property described on the attached sheet are required for the specific purpose hereinabove set forth, and the said

property is being acquired for the express and specific purpose in this resolution set forth; *

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain;

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners of said real property and/or with the tenants or persons in possession, if there be any, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to said parcels of real property;

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners;

6. That this resolution be entered in full in the minutes and records of this Commission as of the fifth day of January, 1948.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 98, under the heading "Real property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Commission then had under consideration the adoption of a $3,000,000 State Major Betterment Program. The Engineer submitted a list of projects that he considered eligible for such a program. The Commission discussed the matter at some length, during which it indicated that the type of project that it had in mind is preferably the smaller project, the construction of which would provide for safe movement of ordinary traffic and would delay for several years the major projects on the sections involved. During the discussion Commissioner Schaupp inquired if the various delegations and requests from Eastern Oregon had been considered. The Engineer replied in the affirmative but stated that most of such requests were for work on county roads in the Federal Secondary Highway System. Chairman Banfield expressed the opinion that the money being spent on Federal Secondary Highways was being concentrated on large jobs in few locations and that the money should be spent on smaller jobs in a greater number of locations to provide a maximum of benefit for the largest number of people. The Engineer stated that the Federal Government would only approve work on the important county roads but that he would make every effort to get approval on smaller jobs in more locations.

The Engineer explained that the proposed $3,000,000 State Major Betterment Program had been prepared on the basis of doing the work in two years, 1948 and 1949, and that it would only be possible to do approximately half of it in 1948. In further discussing the type of work that the Commission desires in this program Commissioner Chandler stated that he thought the section between Reedsport and Scottsburg on the Umpqua Highway is a typical example, that by taking care of three of the worst places on this section, at a cost of approximately $ 150,000 now, the Commission could defer reconstruction costing $1,300,000 for about ten years. Chairman Banfield stated that he concurred in that thought, and gave as his opinion that the work should be limited to improvement of sections that are really hazardous, and that after these hazardous conditions have been taken care of, the sections in which they lie should be removed from consideration for reconstruction for approximately the next ten years.

Chairman Banfield then inquired concerning a request from Umatilla County for improvement of the road between Helix and the Columbia River, which is not included in the program under discussion. He recalled that the request had been made several months ago and that the Commission had advised the County Court to renew its request in the spring of 1948. The Engineer was instructed to keep this project in mind for future consideration. Commissioner Schaupp recalled that to his memory bids had been received some time previously for the improvement of the Warner Secondary Highway No. 431 in Lake County but that all had been rejected. The Engineer advised that this job would be put up for contracting again, as soon as possible.

The Commission then discussed, item by item, the list of projects submitted by the Engineer and by unanimous vote selected the following projects, totaling $1,750,000, for this program, it being understood that 1948 expenditures shall be limited to $1,500,000.

STATE MAJOR BETTERMENT PROGRAM

County	Highway	Section and Description	Approved Allotment
		Division No. 1	
Columbia	Columbia River	Scappoose Section, Pavement Widening	$ 50,000
Washington	Tualatin	Gales Creek Section, Two Bridges	50,000
		Total - Division No. 1	$ 100,000
		Division No. 2	
Benton	Corvallis-Newport	Mary's River Bridge at Noon Station, Bridge	55,000
Lincoln	Salmon River	Milo Post 12, Construct 3rd-lane for trucks	25,000
Lincoln	Oregon Coast	Devil's Lake Outlet at Delake, Bridge	50,000
Lincoln	Alsea	Tidewater-Benton Co. Line, Widen, Resurface and Oil	175,000
Marion	Silver Creek Falls	Mill Creek east of Salem, Bridge	50,000
Tillamook	Little Nestucca	Little Nestucca River, Bridge	30,000
Yamhill	Salmon River	Sheridan Section, Pavement Widening and Resurfacing	60,000
		Total - Division No. 2	$ 445,000
		Division No. 3	
Curry	Oregon Coast	Port Orford-Brookings, Alignment Correction and Resurfacing	$ 150,000
Douglas	Umpqua	Scottsburg-Reedsport, Widen and Resurface	150,000

(Con't)

County	Highway	Section and Description	Approved Allotment
		Division No. 3- Continued	
Lane	Pacific	Coast Fork of Willamette River, Cottage Grove, 2 Bridges	$ 275,000
		Total - Division No. 3	$ 575,000
		Division No. 4	
Hood River	Mt. Hood	Barlow Pass-Hood River Meadows, Widen and Resurface	150,000
Klamath	Dalles-California	Rosedale-Corral Springs, Alignment Correction and Resurfacing	75,000
Sherman	Sherman	Biggs-Wasco, Alignment Correction and Resurfacing	50,000
Wasco	Dalles-California	Cow Canyon Section, Alignment Correction and resurfacing	75,000
		Total - Division No. 4	$ 350,000
		Division No. 5	
Wallowa	Wallowa Lake	Minam-Wallowa, Alignment Correction and Resurfacing	$ 50,000
Wallowa	Enterprise-Lewiston	Flora Junction-State Line, Surface, Oil and Guard Fence	230,000
		Total - Division No. 5	$ 280,000

SUMMARY

Division No. 1	$ 100,000
Division No. 2	445,000
Division No. 3	575,000
Division No. 4	350,000
Division No. 5	280,000
Total	$1,750,000

January 5, 1948

The Commission instructed the Engineer to submit later a report comprising a list of major betterment jobs to take up the balance of $1,250,000 remaining to complete the proposed $3,000,000 State Major Betterment Program for the years 1948 and 1949, now under discussion.

In connection with the State Major Betterment Program of $1,750,000 approved at this meeting the Commission also authorized the preparation of plans and the securing of right of way as may be necessary to undertake the work. The Engineer advised that the 1948 general budget contains an item in the amount of $1,500,000 to cover the first year's cost of this Program.

The meeting recessed at 12:00 noon and reconvened at 1:45 p.m. with the same persons present and participating.

The Chief Counsel brought up for discussion the rough treatment, as he termed it, of the bonding company for Mr. Gunnell in connection with the Enegren ferry contract. He was instructed to submit a report to the Commission giving a resume, step by step, as to actions that were taken in this matter for use by the Commission as a basis for determining further action against the company if such is deemed necessary.

The matter of the general budget for the calendar year 1948 had the attention of the Commission. The Engineer explained briefly the formula on which the estimated receipts for the year 1948 had been computed. He stated that a figure of eight percent increase in receipts had been used as a conservative estimate, although the 1947 receipts had increased fourteen percent over 1946. The Commission considered the budget carefully item by item and the Engineer explained the amounts required. After due consideration the budget was unanimously approved by the Commission as follows: (special instructions given by the Commission on certain items are contained in the footnotes following this budget):

OREGON STATE HIGHWAY COMMISSION

BUDGET - CALENDAR YEAR 1948

As Proposed to the State Highway Commission by the State Highway Engineer

(Calendar year expenditures as shown herein, correspond roughly to work performance from December 1 to November 30.

(The two columns marked * and ** have been deleted from this transcript for lack of space. These columns are headed "1947 Budget, Adopted at Beginning of year" and " With Subsequent Approvals" on the copy of the budget in the Commission's files.)

(Continued on next page)

	1946 (Actual)	* **	1947 Estimated	1948 Proposed Budget
RECEIPTS				
State Funds				
Motor vehicle license fees	$ 3,729,611		$ 4,950,000	$ 3,500,000
Gasoline tax	15,962,002		18,475,000	20,000,000
Diesel fuel tax	279,791		330,000	350,000
Motor transportation fees	2,278,000		2,940,000	5,000,000
Fines for traffic laws violations	137,066		210,000	225,000
Miscellaneous receipts from rentals, discounts, etc.	59,345		80,000	35,000
County cooperation	1,550		16,000	16,000
Miscellaneous cooperative funds	385		32,000	20,000
Gross receipts, State Funds	$22,447,750		$27,033,000	$29,146,000
Less contributions to State Police	338,709		766,000	1,050,000
Less contributions to Counties	2,598,428		5,319,000	5,330,000
Less contributions to Cities	827,525		1,117,000	2,650,000
Net receipts, State Funds	$18,683,088		$19,831,000	$20,116,000

	1946 * ** (Actual)	1947 Estimated	1948 Proposed Budget
EXPENDITURES (Con't)			
Debt Service: (See footnote 5)			
Bond maturities	$ 1,053,000	$ 650,000	$ 500,000
Bond interest and service charges	167,653	128,000	105,000
Estimated total expenditures	$ 17,677,858	$26,387,000	$33,683,000
Unexpended balances	$ 16,810,812	$16,755,000	$10,438,000+

+ Amount to be reserved for contributions to Counties and Cities $4,000,000

December 31, 1947"

FOOTNOTES:

1. In the discussion of the items under the heading "Capital Outlays" the Commission considered that it previously had approved the amounts shown for Federal Aid and State construction projects when it adopted resolutions providing its Three-Year Postwar Construction Programs for Federal and State monies; and that it also approved by such resolutions amounts for surveys and for right of way acquisition as may be required to undertake such construction programs. In view thereof, the Commission approved the amounts contained in the foregoing budget subject to the condition that final approval of construction projects will be given at the time contracts are awarded, and final approval of right of way purchases shall be given when the options covering such purchases have been passed on by the Commission.

All other items under the heading "Capital Outlays" were approved in principle with the understanding that the individual projects, unless they have already been approved by the Commission, shall be submitted to the Commission for approval or rejection before the work is started.

2. In the discussion of the maintenance budget Chairman Banfield requested that someone in authority be in the Salem office on Saturday forenoons during the winter season to answer the telephone and take care of emergencies that arise. He referred particularly to a complaint he had received a few days before regarding a slippery condition on the Mt. Hood Highway during a snow storm. He stated that he was unable to get in touch

FOOTNOTES: (Con't)

with the proper persons in Salem over the weekend, which condition, he said, should be corrected. The condition of the Mt. Hood Highway was discussed and the Engineer advised that signs are in place warning the public to put on chains and that only the cars without chains had trouble at the time mentioned; that the foreman and all of the crew were working butthe foreman happened to be at the other end of the section at the time the traffic congestion occurred; that traffic to Timberline Lodge did not have any trouble, but the Forest Service enforced the use of chains. The Engineer stated further that although it is not common practice, he would, as an experiment, make applications of sanding materials during snow storms. Mr. W. W. Stiffler, Second Assistant State Highway Engineer, stated that the report stating that the road was closed was erroneous; that the information did not emanate from the Highway Department but came from a member of the State Police force.

The Auditor was instructed, in the preparation of his cost reports, to show the amounts for contingencies as separate items.

All items under the heading "Maintenance" totaling $8,080,000 were approved by the Commission with the provision that the amounts set up for contingencies and increases in salaries be shown separately on the auditor's reports.

3. In the discussion of the operations budget the Engineer reported a request from the State Police that about $250,000 be spent on the state radio network but it was received too late to include in the budget. He stated further that the increasing use, by other stations, of wave lengths close to the state's may force the state radio to use some other cycle and if this occurs new radio equipment will be required. The Engineer was instructed to make a complete report to the Commission on this condition.

Chairman Banfield then stated that operations costs, such as the radio communication system used almost exclusively by the Maintenance Department, should be charged back to the work for which the costs were incurred. It was his thought that operations costs such as this should be charged to maintenance, or whatever job incurred the operation cost to avoid an excessive amount of operations being considered as overhead. The Commission instructed the Auditor to charge such operation costs back to the jobs, the manner of charging back to be worked out by the Auditor.

The State Parks Superintendent, Mr. S. H. Boardman, in explanation of the State Park budget, stated that he wanted to secure an engineering crew to survey the boundaries of a number of the parks. After this matter had been discussed at some length the Commission decided that it would approve in principle the parks budget as submitted but that the requested survey work is to be done by present engineering employees during the winter or other slack time. The Parks Department is to get specific approval before hiring any new engineering personnel. Work performed by the engineering personnel for the Parks Department is to be charged to parks prefixes.

BUDGET - CALENDAR YEAR 1948 (Con't)

FOOTNOTES: (Con't)

4. All items under the heading "Service and Clearing Accounts" were approved by the Commission.

The Engineer was authorized to submit rock production jobs for approval from time to time as necessary.

5. The items under the heading "Debt Service" were approved by the Commission.

Chairman Banfield summarized as follows the requirements the Commission has made in connection with the budget; contingencies are to be shown on the cost reports as separate items. The Parks Department, and all other departments, are to secure approval from the Commission for all major items as the work arises and these are to be presented as individual items. The Auditor is to break down the overhead costs and charge back to Maintenance or other departments incurring the overhead. All departments are to obtain specific approval from the Commission on larger jobs before undertaking the work.

The Engineer requested authority from the Commission to submit a list of approximately $250,000 for the most urgently needed equipment consisting of trucks, blue printing equipment, desks, typewriters, etc. This authority was granted by the Commission. The Commission also approved the Engineer's request to call for bids for alterations to the Astoria ferry docks at an estimated cost of $36,000.

The Engineer requested authority to hire additional personnel in the Accounting Division and in the Bridge Department. In connection with this request it was the Commission's view that it would not be necessary to secure approval for new personnel if provision has been made in the budget for this purpose.

The matter of transporting employees to the temporary office building at the Salem Shops, when this building is completed, was discussed.

The Engineer advised that it is about a four-minute drive from the state office building where the employees now work to the shops, and he recommended that a bus be purchased to transport them from the state office building to the shops in the morning and back in the evening. The recommendation was approved by the Commission with the instruction that the Commission is to approve the price of the bus before it is purchased.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:00 p.m.

T. H. Banfield
Chairman

Commissioner

Portland, Oregon
February 2, 1948

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
W. C. Williams, Acting State Highway Engineer
W. W. Stiffler, 2nd. Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Auditor
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

JOHN DAY HIGHWAY IN BAKER, GRANT AND MALHEUR COUNTIES

AUSTIN JUNCTION-FOREST BOUNDARY AND BROGAN HILL-BROGAN SECTIONS

* Bidder will accept award of this project only in combination with Wasco-Grass Valley Project.

The Commission by unanimous vote approved the minutes of the meeting held on December 29 and 30, 1947.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

1. Administrative procedure to be followed in the operation of Silver Creek Falls Recreational Project: The Parks Superintendent requested instructions with respect to this matter. He recommended that the same procedure be followed that has been followed in the past, when the area was under the jurisdiction of the National Parks Service. The Commission approved the recommendation by unanimous vote and authorized the Parks Superintendent to begin operation of the area when the state has secured clear title to the property and it has been officially turned over to the state.

2. Proposal to remove approximately 50 danger trees from Lava Caves State Park: The Parks Superintendent advised that the U. S. Forest Service is now undertaking a project to remove a lot of diseased trees growing along The Dalles-California Highway south of this park and has stated a willingness to remove the similarly-diseased trees located within the park area if the Commission so desires. It was his thought that the Commission should take advantage of this opportunity, and he recommended approval of the project. The Commission approved the recommendation unanimously.

3. Offer of L. M. Christensen to present to the state as a gift certain property fronting on the ocean beach and lying adjacent to the Oregon Coast Highway just south of the Yachats River at Yachats: The Parks Superintendent advised that the property consists of several small fragments, aggregating about one acre of land, between the driveway that the State Highway Department now owns at this location and the ocean

beach, which areas are being used by the people of Yachats more or less as dumping grounds for refuse. He also advised that there is some connection between this transaction and the removal of smelt sands from the ocean beach bordering Mr. Christensen's property north of Yachats. In the event the Commission accepts this gift, he said, it probably would be necessary to make some provision to keep the area clean and free of rubbish. The Commission deferred action on this matter pending clarification of all points involved and until it has a clear picture of all matters pertaining to it.

4. Adoption of a policy relative to permitting merchandisers to conduct business on state highway rights of way: The Commission's Chief Counsel reported on this matter on behalf of the Parks Superintendent. He advised that the instance concerned is the request of a Mr. Donald P. Grimes, Portland, who has been conducting a popcorn business on the widened section of the right of way of the Pacific Highway East on the bluff at Oregon City, for a permit from the Highway Commission to conduct his business at this location. Mr. Grimes, he said, operates only during the weekends under a peddler's license issued by the City of Oregon City. He pointed out that it is contrary to a long-established policy of the Commission to permit businesses to be conducted on highway property, but in this particular instance the operation is not especially hazardous because the popcorn wagon is set quite some distance from the traveled portion of the highway. Following discussion, the Commission voted unanimously to allow Mr. Grimes to continue operating as in the past, under authority of the peddler's license that he received from the city. The Commission decided not to grant Mr. Grimes a permit because it felt that the operation would be more easily controlled if no permit were granted. Then, if a complaint of the operation were filed, it would be a simple matter to stop the operation by referring the matter to the State Police.

5. Sale of approximately 1,100 feet of old cast iron pipe located in John B. Yeon State Park: The Parks Superintendent reported an offer from Mr. A. C. Burnworth, Portland, to pay $500 for several sections of old cast iron pipe ranging from 20 to 24 inches in diameter that have been lying in this park for a long time. He advised that this matter previously had been considered by the Commission which tentatively authorized the sale of the pipe if it were not needed for state highway purposes. Mr. W. C. Williams, Acting State Highway Engineer, advised that as much of the pipe has been removed as could be done economically and that the remaining pipe is of no value; moreover, it could not be removed without considerable expense because it is located on a side hill that is covered with talus rock; further, it would have to be cut into short lengths in order to remove it with safety. He and the State Parks Superintendent recommended acceptance of Mr. Burnworth's offer and that he be allowed to remove the pipe in five-foot lengths provided he properly protects highway traffic from danger during the process of removal. The Commission approved the recommendation and instructed the Engineer to outline a method to be followed by Mr. Burnworth in removing the pipe.

6. Proposed wayside picnic areas: The Parks Superintendent presented for the Commission's consideration a list of 14 proposed picnic wayside areas which he recommended for approval by the Commission in conformity with the decision reached at the December 29 and 30, 1947, meeting, together with the estimated cost to develop each for the purpose intended, as follows:

Crooked Creek	$ 350.00
Simmons Spring	300.00
Wallowa Lake Wayside	100.00
Emigrant Hill	100.00
Boardman Oasis	300.00
Castle Rock Oasis	300.00
Barnum Wayside	500.00
Sunset Spring	500.00
Steiwer Hill	750.00
Douthit Spring	500.00
Willamette Spring	750.00
Summit Station	750.00
Rattle Snake Spring	750.00
Canyon Creek	200.00
	$ 6,150.00
Contingencies	850.00
	$ 7,000.00

The Parks Superintendent also exhibited a map showing the location of each of the areas. He advised that these areas have been selected after very careful consideration, and he recommended approval of them and that he be authorized to improve them at a total estimated cost of $7,000. Following discussion and careful consideration of the matter, the Commission unanimously approved the list and authorized the Parks Superintendent to proceed with development of each tract at the estimated cost.

In this connection the Parks Superintendent exhibited a map showing similar areas developed by the U. S. Forest Service. It was his thought that these areas, as well as the state-owned wayside picnic areas, should be properly signed for easy identification by motorists. He requested authority to erect signs that are necessary at each of these locations. The recommendation was approved by the Commission by unanimous vote.

7. Offer of the County Court of Coos County to present to the state as a gift the park area at Sunset Bay: The Parks Superintendent presented a deed from the Coos County Court conveying this tract of land to the state for park purposes. The Chief Counsel read aloud the conditions of the deed, pointing out, among other things, that the county will require the Highway Department to develop the area for public park purposes but will retain all mineral rights, and has provided that if the Highway Commission does not do all of the things mentioned in the deed the property will revert to the county regardless of the expenditures that may have been made in developing the area. All members of the Commission expressed themselves as being opposed to accepting this property with such restrictions. The Parks Superintendent was instructed to inform the County Court that the restrictions are too severe and that the Commission cannot accept the offer unless they are removed.

8. The Commission discussed the proposed sale of a 2.2-acre tract of land located in Simpson State Park, North Bend, to the Weyerhaeuser Timber Company, being particularly the old ferry landing at this place. The Parks Superintendent advised that the area is situate within Simpson State Park and that heretofore he has objected to disposing of it because it contains a landing dock for pleasure boats; however, he would have no objections to conveying the property to the Weyerhaeuser Timber if a sufficient amount can be secured for it to pay for acquisition and development of another landing place. Commissioner Chandler pointed out that the Weyerhaeuser Timber Company owns the property on both sides of this tract and needs the area in connection with its business. In his estimation, the property is more valuable to this private enterprise than it is to the state. The matter was discussed at some length, but a decision with respect thereto was deferred until a future meeting.

Mr. J. W. DeSouza, Assistant Counsel, presented a list of properties needed for various highway improvements throughout the state for which options have been obtained. Following careful consideration of each item in the list and the amount of the individual option, the Commission approved the options and authorized acquisition of each tract on such basis. The resolution attached hereto, marked EXHIBIT "A", which by this reference is made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote.

The following notes refer to items appearing in the above resolution marked EXHIBIT "A":

* Item No. 14281, Block 85, Salem - A. N. Bush property: The Commission approved this settlement, it being understood that the property is being acquired in behalf of the Board of Control which has agreed to see that the State Highway Fund is reimbursed later on for the full amount of the purchase price.

** Items Nos. 14198, 14200, 14203, 14202 and 14199, representing properties in Block 86, Salem, the proposed site of the State Highway Department Office Building: The Commission authorized closing the options at the stated prices and instructed the Chief Counsel to give immediate notice to the tenants to vacate the premises within six months. The Chief Counsel was authorized to condemn the four remaining properties. (See resolution marked EXHIBIT "B1".)

*** Item No. 11902-A, B. A. Kliks: The Commission approved payment of $12,000 for this property and instructed the Chief Counsel to acquire it by condemnation, as previously authorized, in the event that Mr. Kliks will not accept such sum as payment in full.

In this connection the Commission also discussed the acquisition of additional right of way for the West Slope-Beaverton Section of the Tualatin Valley Highway. In the discussion it was brought out that part of the right of way is needed for sidewalk and footpath construction. The question arose whether or not the Commission previously had authorized the building of such facilities. In view thereof, the Commission deferred, until its next meeting approval of the right of way purchases involved in this project and instructed the Engineer to render a written report on this subject at that time.

Also considered in the discussion of right of way purchases was a proposal to acquire a tract of land containing 0.89 acre on the southerly side of the Columbia River Highway opposite the entrance to Bonneville Dam. The Assistant Counsel advised that this property is owned by S. E. Anderson and Emon Chaloupa, who have given the state a six month's option to purchase this property for the sum of $6,500. The Engineer advised that the property is needed as right of way for the proposed improvement of the highway at this location although construction is not contemplated in the immediate future. The Commission deferred action on this purchase and instructed the Assistant Counsel to bring it to the Commission's attention again one month before the option expires.

The Commission also discussed a report from the Chief Counsel regarding the right of way situation in the town of Gold Beach, Curry County. It appears that the people of this town are unwilling to give the state options for their property unless the options contain a definite date when construction of the highway through this place will be undertaken; moreover, the people are requiring exorbitant sums for moving buildings. In one instance the owner of a service station demands an amount equal to the cost of building a new modern service station, notwithstanding that the one he now has is an old one. The Chief Counsel advised that he cannot recommend to the Commission acceptance of the options under those conditions, nor can he approve the amounts that are being demanded for moving the buildings. He recommended that a study be made to ascertain whether or not the highway could be constructed on a right of way 60 feet wide rather than 80 feet, as is proposed. The Commission appeared favorably inclined in that regard but took no action to that end; however, decided, in view of the circumstances, that construction of this project should be deferred for the time being.

The Assistant Counsel also presented a list of properties that are needed in connection with state highway improvements but concerning which he has been unable to secure satisfactory settlements by negotiation. He presented a list of such properties, together with the offer that he recommended be made for each parcel in the event it is necessary to acquire the property by condemnation, as follows:

		Recommended Offer
CAPITOL SITE, BLOCK 86		
14201	Elizabeth E. Noonan	$ 18,500.00
14204	Sarah Rise and Bernice M. Rise	11,000.00
14197	Floyd C. Crabtree	22,000.00
14197A	Floyd C. Crabtree	15,000.00
DELMAR-CHINA CAMP CREEK SECTION OF THE OREGON COAST HIGHWAY		
14105	William C. Morris and Leona Morris or Ervin Simon and Edna Simon	50.00
DENNY CREEK SECTION OF THE KLAMATH LAKE SECONDARY HIGHWAY		
13302	John Meek	150.00
MONUMENT-HAMILTON SECTION OF THE KIMBERLY-LONG CREEK HIGHWAY		
14260	Jerry T. Vickers	25.00
GUNNELL ROAD-ROBERTSON BRIDGE SECTION OF THE ROGUE RIVER LOOP HIGHWAY		
13991	Frank Hussey	15.00
JOHNS-WOLF CREEK SECTION OF THE PACIFIC HIGHWAY		
14324	J. A Jacques Heirs	800.00
JOHNS-MACKIN GULCH SECTION OF THE PACIFIC HIGHWAY		
14291	Amy Gray	Amount unknown

Following careful consideration of each item the Commission authorized condemnation of the several tracts at the recommended offers and thereupon adopted by unanimous vote the attached resolutions marked EXHIBITS "B1" and "B2" with respect thereto, which resolutions by this reference are made a part hereof with like effect as though extended herein.

February 2, 1948

In this connection the Assistant Counsel also presented a list of properties that are needed as extra right of way to accommodate footpath construction along the Albany-Corvallis Highway between the Children's Farm Home and Garden Road. A question arose in the minds of the Commission whether or not, when it approved construction of this sidewalk project, it also authorized the acquisition of additional right of way. In view of this question the Commission deferred action on the matter until its next meeting. The Engineer was instructed to furnish the Commission with a written report on the subject in the meantime.

The Assistant Counsel presented an offer from Mr. Owen Cook to purchase, for the sum of $250, an old farmhouse and outbuildings located on property acquired by the Commission from the United States of America as a source of materials to be used for the improvement of the Pacific Highway West in Benton County. He advised that these buildings were acquired without cost to the state and that he considered the state would be fortunate if someone would pay $25 to wreck them. He recommended acceptance of Mr. Cook's offer. The Chief Counsel concurred. The Commission approved the recommendation unanimously.

The Assistant Counsel presented a request from Mr. Henry S. Thompson, Weston, Oregon, to purchase a small tract of land containing 1.12 acres adjacent to the Weston-Elgin Secondary Highway, in Umatilla County, which tract is located opposite highway Mile Post 9.3. He explained that Mr. Thompson desires this property in order to obtain access to the highway. He advised that the matter has been discussed with the Engineer and the Chief Counsel, both of whom recommend approval of Mr. Thompson's request. The Commission authorized the sale of this property at a price to be fixed by the Right of Way Department.

The Commission discussed a letter from the City Council of Mill City inquiring if the city could purchase a small parcel of state-owned land about 1 1/2 miles west of the town of Mill City which the city wishes to use as a regulated dumping area. The Engineer advised that this tract is located on the north side of the North Santiam River and is a portion of a 29-acre tract which the Highway Department originally acquired as a gravel pit; however, the portion the city wants contains no gravel materials, hence, is of no value for road purposes. He recommended the sale to the City of Mill City, of three acres in the southeast corner of the state's property for the sum of $200, which is the value set by the Right of Way Department. The Commission approved the recommendation unanimously.

The Commission discussed a request from Mr. George Short, Redmond, to purchase an old state-owned gravel pit, containing 4.32 acres of land, situate in the NW¼ NW¼, Section 21, Township 15 South, Range 13 East, W. M., Jefferson County. The Assistant Counsel advised that the tract has been investigated by the Engineering Department, and it has been determined that all of the gravel available has been removed from the site and that the property is no longer of any value for highway purposes. He recommended sale of the property to Mr. Short for the sum of $225, subject to an easement

for a pipeline which the City of Redmond has been maintaining across the property. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

A letter was presented from Mr. Arthur R. Kirkham, Chairman of the Recreational Resources Committee of the Portland Chamber of Commerce, transmitting a typewritten outline of a policy adopted by the St. Helens Pulp and Paper Company with respect to preservation of timber strips along the highways. According to this policy, the company has inaugurated and is maintaining a sustained-yield program for the orderly harvesting of the mature crop of timber adjacent to the highways in order to retain the younger and immature growth so as to make a suitable and attractive vista or background in all cases, except where the contour of the terrain is such as to necessitate clear cutting, thus leaving a fringe of timber which would enhance the beauty of the country through which the highways pass. Mr. Kirkham suggests that the Highway Commission take action to curb and stop depredations committed by "gyppo" operators who are desecrating highway roadsides by cutting all standing timber they own or control. The Commission decided unanimously not to take the initiative in this matter but to act when cases are brought to its attention by the State Parks Superintendent and the Engineer. The Commission ordered that Mr. Kirkham be thanked for the information submitted and for his interest in these matters.

Consideration was given by the Commission to the application of Anna C. Foegeding, Crescent Lake, Oregon, to repurchase a portion of a tract of land which she sold to the State Highway Commission a few years ago for use as a gravel pit. Mrs. Foegeding offers to pay $500 for this tract, which contains 20 acres of land. The Engineer advised that all of the gravel intended to be used from this site has been obtained and that it is of no further value for highway purposes. He recommended that it be sold to Mrs. Foegeding for the amount of $500, which is the appraised value of the property. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Commission discussed and approved an easement agreement with Fred Afalter, et al., providing for use of a detour road across the property of these people as may be necessary in connection with construction of a new bridge over the Salmon River on the Oregon Coast Highway a short distance north of the town of Otis. The consideration involved is $1. (The agreement was signed by the Commission on the following day.)

The Engineer presented for the Commission's consideration a form of easement, granting to the Southern Pacific Company, its successors and assigns, exclusive right to use for railroad purposes, certain property adjacent to the Oregon Coast Highway between the south city limits of the City of North Bend and the north city limits of the City of Coos Bay. This easement is a grant of certain encroachment privileges to the company and is a continuation of the privileges heretofore given by Coos County. He explained that prior to reconstruction of the highway at this point the railroad occupied by franchise property under the control of Coos County, but upon construction of the new highway the state assumed control of all of the

right of way, including that newly acquired and that formerly occupied by and used as a county road. The easement to the Southern Pacific Company, he said, is merely a transfer of the encroachment privileges heretofore granted the company by the county but which are now under the control of the State Highway Commission. He recommended approval of the conveyance. The Commission approved the recommendation by unanimous vote. (The easement was signed by the Commission on the following day.)

The Commission also had under consideration approval of two bargain and sale deeds and one quitclaim deed, conveying unto the City of Portland title to parcels of property acquired by the Commission during the wartime period for three access-road projects, particularly relating to N. Burghart Street in the suburb of St. Johns, N. Swift, Olympia and Walker Streets, and Going Street in Swan Island, in the City of Portland. It was explained that execution of these three deeds by the Commission would place in the control of the city title to the property on these three access projects. It was further explained that the right of way represented therein was acquired by the State Highway Department on behalf of the Federal Government, which has paid all costs in connection therewith and that the three sections are city streets not on the State Highway System and are maintained by the city, which now requests that title to the right of way be transferred to the city. It was pointed out that the deeds of conveyance contain provision for the city to have jurisdiction over the streets subject to the rights, if any, of the United States and that the City of Portland assumes all liability which the Government may have against the state because of the purchase of this property. The Commission approved the transfer by unanimous vote. (The three deeds referred to were signed by the Commission on the following day.)

The Commission recessed for luncheon at twelve o'clock noon and the meeting reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Mr. Irving T. Erickson, representing the Jewell Ice Cream Company, St. Helens, appeared before the Commission regarding the widening of the Lower Columbia River Highway in front of the creamery establishment owned by himself and his two brothers, Charles D. and Walter S. Erickson, both of whom were also present. Mr. Erickson stated that he has only two questions of importance to ask the Commission, one being whether or not the Commission definitely will take their land at the price set by the court in condemnation proceedings and the other being whether or not the Commission is willing to consider an arrangement that might be effected between his architect and an architect employed by the Commission, or if the Commission is determined to pay no more than $15,000 for the property as previously tendered by the Commission's Chief Counsel. Mr. Erickson advised that their plant is inadequate for the coming season's business, and their problem is will they be required to rebuild their entire plant or will they be allowed to make alterations in their present plant to fit the highway improvement. He requested an early answer because, he said, delay in improving their facilities is going to cost them considerable money. He was informed that reports received by the Commission indicate that the additional right of way is a necessity at this

location, and such being the case, it is the Commission's intention to take the property unless the amount set by the court as the purchase price is entirely out of reason, and the Commission is not in position at the present time to make any more definite statement concerning that feature. He was also informed that the Commission has no desire to take the company's property, or the property of anyone else, for a highway improvement, but sometimes that is necessary, and if a satisfactory agreement cannot be reached as to the price to be paid for the property by negotiation, then the Commission feels it is only fair to the people of the entire state that condemnation be resorted to in order to acquire it.

As to Mr. Erickson's inquiry whether or not the Commission is willing to increase the amount of its offer, Chairman Banfield advised that the Commission is relying on the Chief Counsel for advice in that regard. The Chief Counsel advised that his offer of $15,000 for the property was what he considered fair at the time the offer was made and was based on figures and estimates furnished him; however, with subsequent information that he has received, he can nowconscientiously recommend an offer of $20,000. Mr. Erickson suggested a conference between Mr. Erickson's architect and an architect employed by the Commission in an effort to arrive at an amount that would be satisfactory to both parties. The Chief Counsel stated his willingness to arrange such a conference if the Commission is willing. As the result of further discussion the Commission voted unanimously in favor of such a conference of architects and referred the matter to the Chief Counsel to handle, with instruction to report back to the Commission the results of the conference.

The Chief Counsel reported the status of the acquisition of right of way for the improvement of the Oregon Coast Highway through the town of Port Orford, Curry County, which involves an arrangement with the City Council concerning the deadending of several city streets where they intersect the highway. He advised that he has been unable to reach a satisfactory agreement with the city with respect to the matter of deadending the streets; however, he believed that if the state would agree to leave open several of those streets, the project could go forward. The Engineer advised that the original plan was to deadend these streets in order to control access to the highway and to eliminate traffic hazards. He pointed out that some of the intersections are automatically deadended because of physical reasons and gave as his thought that perhaps it would be possible to modify the plans to accommodate the city in this regard. He was instructed by the Commission to give the matter further study. He and the Chief Counsel were also instructed to report their findings to the Commission at the next meeting.

The Commission had under discussion a report from the Chief Counsel concerning the use of the flight strip adjacent to the Beaverton-Aurora Secondary Highway near the town of Aurora by certain groups as a field to conduct "hot rod" racing meets in which from 75 to 100 cars of a particular type compete. The Chief Counsel advised that when this flight strip is used for such purpose it cannot be used for aircraft emergency landings or for the normal taking off or landing of aircraft of any type for any purpose. This has

resulted in numerous complaints and requests being filed that the Highway Commission assume control of the area so that it can be kept free and safe for the purpose originally intended. He further stated that a question has been raised with respect to where or in what agency the power is vested to police the area and particularly as to the Highway Commission's authority in regard thereto. He recited the history of this field, advising that, pursuant to provisions of the legal authority vested in the Commission, an arrangement was made with the Public Roads Administration whereby the state acquired the real property needed for this flight strip with the understanding that it would be reimbursed by the Federal Government for monies expended for that purpose. Such reimbursement has been made, he said, but the state still holds title to the property; however, in his opinion, such title is held in trust for the United States of America. He gave as his opinion that, in view of the circumstances, the Highway Commission has the authority and is under obligation to close the field to the activity of those who desire to use it for "hot rod" competition. He recommended that the Commission act on its authority and close the field for such purpose. The Commission considered that this matter was entirely a legal matter and referred it back to the Chief Counsel to handle in the manner which he considers right and proper. The Chief Counsel was instructed to report back to the Commission whatever action he takes with respect thereto.

In this connection the Chief Counsel advised that in some instances small airplanes are not equipped to "take off" without the assistance of a motor-powered vehicle, such as an automobile. In such cases, he said, as soon as the plane has started the automobile is driven off the runway and left there until it is needed to start another plane. It was his thought that it would be satisfactory to allow the operation of an automobile on the strip in such cases and that these cases should be reported to the Civil Aeronautics Association for its approval, and he so recommended. The Commission approved the suggestion and referred the matter back to the Chief Counsel to handle.

The Chief Counsel brought up for discussion the matter of the sale of fractional Lots 3 and 4, Block 28, Nasburg's Addition to Coos Bay, bids for which were received by the Commission on December 15, 1947, in Salem. He recalled that all of the bids were rejected by the Commission at that time because they were considerably lower than the appraised value as established by the Right of Way Department. He also said that he personally inspected this property during a recent visit to Coos Bay and is now of the opinion th that the Commission should sell the property for a consideration of $1,000 or $1,200, particularly since the state's investment in the property amounts to only $300; moreover, the state is buying additional property in that vicinity, and if the Commission will not take less than $2,000. which is the appraised value as set by the Right of Way Department, then it will fix the selling price on the property it has to buy, so the state will be the loser in the long run. He advised that the property is not needed for highway purposes and gave as his opinion that the best interests of the state could be served if the property were sold to Mr. Karl Nichols, the high bidder, for the sum of $1,000 or $1,200. The Commission by unanimous vote approved the sale of the property to Mr. Nichols for $1,200.

The Commission discussed a request from the Huntington Rubber Mills, Portland, to purchase two small parcels of property, one of which lies adjacent to S. W. Miles Court and is 5.7' x 42.5'. and the other, 6' x 110', lies within the right of way of S. W. Macadam Street. The Chief Counsel advised that the strip along S. W. Miles Court is owned by the state but that which lies within S. W. Macadam Street is city-owned. The state-owned parcel, he said. is of no value for state highway purposes and could be sold if the Commission so desires; however, the other tract, which is the larger of the two, in his estimation, should not be disposed of by the city because it is needed to control access to the highway at this point. He recommended sale of the strip along S. W. Miles Court and that a letter be directed to the City of Portland requesting that it not make any transfer of the property within S. W. Macadam Street. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously. (Subsequent to this action of the Commission, further investigation reveals that the state no longer owns the strip along S. W. Miles Court, previously having deeded it to the City of Portland, so it is not under the control of the State Highway Commission.)

The Chief Counsel reported matters concerning the "smelt sand" controversy at Yachats and particularly referred to his written report to the members of the State Highway Commission dated January 9, 1948, and a subsequent letter dated January 12, 1948, on the same subject. He stated briefly that the beach was the property of the state when the state was admitted to the Union, but subsequently, fragments aggregating about 23 miles of frontage were sold to private individuals by former state authorities, although in two instances, one at Gearhart and the other at Yachats, areas were recaptured by the state through the Highway Commission. He gave as his thought that the only way the Commission could ultimately dispose of this unfortunate controversy is for the Commission to authorize an investigation of all parts of the beach to determine the areas which could be used for one purpose and those which could be used for other purposes, keeping in mind the interest that the public has in them, and then adopt a policy definitely outlining just what it will or will not do with respect to the several areas. He gave as his opinion that unless the Commission has a complete picture of the entire beach frontage and adopts such a policy it cannot intelligently pass on requests for special privileges on these beaches. The Commission discussed this matter briefly but deferred action thereon pending a conference on the following day with delegations which are interested in the subject. (See ahead for additional paragraph on this subject.)

The Chief Counsel presented for the Commission's consideration a redraft of the preliminary agreement with Wasco County, Oregon, by its County Court, and the State of Washington, by its Toll Bridge Authority, for a cooperative study of facts -- legal, engineering and financial -- with respect to the proposed construction of a toll bridge across the Columbia River in the vicinity of The Dalles, Oregon. According to the agreement, the estimated cost of such study is $24,000, which cost is to be paid $8,000 by Wasco County, $8,000 by the State of Washington, and $8,000 by the State of Oregon. The Chief Counsel pointed out that this agreement has already been approved and signed by the Wasco County Court. Following discussion, the Commission by

unanimous vote approved the agreement as prepared. (Eight copies of this agreement were signed by the Commission on the following day.)

The Chief Counsel brought into the discussion the matter of relieving the State of Washington from paying taxes on property it owns on the Oregon side of the Longview Bridge, which bridge the state of Washington recently purchased. He advised that the Washington legislature some time ago passed a law which relieved The Dalles City from payment of taxes on property it owns in the State of Washington and uses as the city's airport and the state is now inquiring whether or not Oregon will waive the payment of approximately $14,000 annually in taxes on the Oregon approach to the Longview Bridge. He said that about the only thing the State Highway Commission could do in the matter is to recommend to Columbia County that it recognize the state's sovereign rights and relieve the State of Washington from payment of taxes on this property. The Commission took no action on the matter.

There was brought to the attention of the Commission a resolution adopted by the Association of Oregon Counties at its annual meeting on November 21, 1947, paying tribute to the late I. M. Schannep, former county judge of Umatilla County, former member and past president of the Association, and a member of the legal staff of the State Highway Department, and expressing sympathy to the members of his family and the legal staff of the Highway Department. The Commission expressed appreciation for the sentiments expressed therein.

A petition was presented from residents and property owners of Oceanlake and vicinity requesting the promulgation of an order by the State Highway Commission, under authority of Chapter 493, Oregon Laws 1947, prohibiting the building of bonfires on the beach closer than 20 feet to the banks and also prohibiting trespassing by the general public on ocean banks of private property. The Commission deferred action on this matter pending adoption of a policy with respect to the use of ocean beach areas under its control.

The ASsistant Counsel, Mr. De Souza, reported an offer from the Balsiger Motor Company, to sell to the state for the sum of $37,500 property that is desired by the Commission as right of way for the Klamath Falls-Malin Highway north of Sixth Street, Klamath Falls, together with property lying to the east of the right of way. He recalled that Mr. Balsiger originally set a tentative figure of $11,550 for the property and later on raised his price to $17,500, but it now appears that he is not satisfied with such amount. In the discussion of this matter it was brought out that the highway could be routed in another location, in view of which, the Commission unanimously voted not to accept Mr. Balsiger's latest figure. The Engineer was instructed to make a further study of the matter and render a complete report at a future date.

In the discussion of this matter the Chief Counsel advised that all right of way matters, street closures, etc. with respect to the proposed construction of the First Avenue-Esplanade Section of the Klamath Falls-Malin

Highway which have delayed the contracting of this project are now clarified and, insofar as the Legal and Right of Way Departments are concerned this project may be advertised for bids at any meeting the Commission desires. In view of this information the Commission instructed the Engineer to prepare this project for bids to be received at its next regular meeting.

The Chief Counsel also brought up for discussion the matter of charging utility companies for the privilege of attaching their facilities to the Interstate Bridge between Portland and Vancouver. He advised that since 1937 the Pacific Telephone and Telegraph Company has been paying an annual fee for this privilege under agreement with Multnomah County, Oregon, and Clark County, Washington, the original owners of the bridge, notwithstanding that a new agreement was not executed when this bridge was taken over by the two states. The $420 fee for the year 1948 has been tendered. Fifty percent of this fee belongs to the State of Washington. He pointed out that in March 1947 the Commission adopted a general policy that no rental charge should be made to utilities for the use of state highway bridge structures unless the state is caused additional expense for maintenance by reason of the occupancy of the bridge by these facilities. The question arises, he said, whether or not the Commission intended this policy to apply to the Interstate Bridge as well as to the other bridges throughout the state. Chairman Banfield advised that when the Commission discussed this matter at its meeting on March 14, 1947, it had in mind only one bridge structure, that being the bridge over the Willamette River at Albany on which the Portland Gas & Coke Company desired to maintain a pipeline, and it was not the intention of the Commission to relieve any utility company from continuing to pay fees they had paid in the past; however, since the matter has come up again the Commission will give consideration to any recommendation the Engineer and the Chief Counsel may offer for the future, but as to whether or not the utility companies are to be relieved of the charge for maintaining their facilities on the Interstate Bridge will depend on the attitude of the authorities of the State of Washington. The Chief Counsel was thereupon instructed to contact the Washington authorities with regard thereto and to report back to the Commission.

The Engineer reported the results of an investigation authorized by the Commission some time ago to determine the cost to improve a short section of the Oregon Coast Highway in the town of Rockaway, as requested by the City Council. He advised that the desired work consists of paving a section two blocks (450 feet) long, which improvement he estimated would cost about $3,000, including the installation of necessary drainage, 220 feet of curb, excavating and reshaping the roadbed shoulders, and widening the roadbed surface to the curb line. He advised that this is a meritorious project and recommended its approval and that the expense be charged to the Minor Betterment Contingency Fund contained in the 1948 Budget. The Commission approved the recommendation by unanimous vote, subject to the condition, however, that the expense of construction of curbs and sidewalks shall be borne 100 percent by the city.

Pursuant to the Commission's instructions, the Engineer presented a report on the status of the Warm Springs Highway between Wapinitia Junction

near Bear Springs and the junction with The Dalles-California Highway at Madras. He pointed out that all of the grading work has been contracted and all of the surfacing and oiling has been contracted with the exception of the seven-mile section at the north end of the project which is estimated to cost $220,000 and is scheduled for improvement as a Forest Highwat Project in the Third Year Forest Highway Program if the Public Roads Administration and the Forest Service approve the schedule. He pointed out that a meeting with these two governmental agencies cannot be held until funds for the Third Year Forest Highway Program have been appropriated by Congress. He also advised that the bridge over Mill Creek, which is estimated to cost about $378,000 remains to be constructed. The total estimated cost of the entire undertaking, he said, is $2,420,000, of which amount approximately $600,000 has not been contracted. The Commission ordered the report filed.

The Commission discussed the written report of Assistant State Highway Engineer W. C. Williams, dated January 26, 1948, on the subject of interstate bridges across the Snake River between Weiser, Idaho, and Nyssa, Oregon. (See report in general files for details.) Briefly, the Engineer advises that there are four existing structures -- Weiser Bridge, Payette Bridge, Ontario Bridge, and Nyssa Bridge -- that the Weiser and Payette Bridges are being maintained by the State of Idaho and the Ontario and Nyssa Bridges are being maintained by the State of Oregon. It appears that no formal agreement exists between the two states covering these maintenance features, in view of which the Engineer suggests a consummation of such an agreement, in writing, so as to avoid any misunderstandings that otherwise might arise. It was his thought that such maintenance agreement should cover maintenance of existing structures only and not the replacement of any of them, particularly pointing out that damage recently occurred to the Weiser Bridge which necessitated placing a 10,000 pound maximum load limit on this structure. Arrangement between the two states for the construction of any new structure, he said, should be formulated on an entirely different basis than a maintenance agreement. The Chief Counsel advised that he is now preparing a form of agreement covering the maintenance feature and particularly providing therein that it does not cover the replacement of any structure, which matter will be covered by a separate agreement. The Commission took no action on this matter.

The Engineer brought up for discussion a request from the City of Tillamook for the installation of a stop and go signal at the intersection of Second Avenue and Third Street (state highway routes), in Tillamook. The Traffic Engineer, he said, investigated this matter immediately after the request was made and recommended to the city that, in lieu of stop and go lights, the city should designate parallel streets for one-way street routing pending the construction of the Tillamook-Pleasant Valley section of the Oregon Coast Highway, which provides for such one-way routing. The City Council, he said, took the matter under advisement and at its Council meeting on January 5 decided not to install the temporary one-way street plan. The Traffic Engineer's investigation, he added, does not reveal that the installation of stop and go lights at this intersection is particularly needed

now, so, for this reason and for the further reason that it is anticipated that bids will be called early this spring for the construction of the Tillamook-Pleasant Valley Section, he recommended that the city's request be denied as the matter will correct itself when this job is completed. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion an agreement with Mr. Max Rosen, Milwaukie, Oregon, for filling in and landscaping a small area of state highway right of way in front of his establishment known as "Fireside Dinners" on the east side of the Pacific Highway East about one-half mile south of the town of Milwaukie. He recalled that this matter first came before the Commission in March of 1947, and the Commission at that time approved the request on the condition that Mr. Rosen would perform the development work in conformity with the ideas and desires of the State Highway Engineer and the State Parks Superintendent, including the planting of certain shrubbery. A recent inspection by the Highway Department's Landscape Engineer, he said, reveals that Mr. Rosen has completed the grading work as specified but has not carried out instructions with regard to planting the area, and as a result, the area is being used for parking purposes, contrary to the original understanding. He requested instructions. The Commission instructed the Engineer and the Chief Counsel to follow through on this matter and see that the area is blocked off so as to close it entirely to the parking of vehicles if Mr. Rosen will not fulfill his part of the agreement.

The Commission discussed briefly and ordered filed the Engineer's written report dated January 14, 1948, on the status of insurance coverage on the ferry boat "Gunnell Ferry" which the Commission acquired some time ago through trust agreement executed by George F. Gunnell and Genevieve Gunnell, the General Casualty Company of Seattle, and the State Highway Commission.

The Engineer reported the amount of damage which resulted to the State Highway System during the first week in January when severe storms occurred causing floods which adversely affected all major streams west of the Cascade Range. He estimated the cost to repair the damage at $274,835, which amount includes $120,000 to repair the bridge over the South Umpqua River on the Pacific Highway about 12 miles south of Roseburg. He advised that a certain amount of damage to highways by floods was anticipated prior to the adoption of the 1948 Budget, and work orders in the amount of $76,090 had been approved to take care of this expense, which leaves a balance of $198,745 needed to repair the rest of the damage. This amount, he said, would be taken from the contingency fund contained in the 1948 Budget, but it will entirely exhaust that fund, so it very likely will be necessary to provide additional funds for contingency purposes. He said the repair of the damage to the South Umpqua River Bridge is now under way and that approximately $30,000 has been spent in connection with the work. He anticipated that the coffer dam, which is necessary in order to facilitate the repairs, will be completed and the area drained by the first of October. He asked the Highway Commission to approve this project. The Commission indicated its approval, however deferred a definite decision pending completion of the coffer dam

and the draining of the water from the area. The Commission expressed a desire to inspect the project when the work has progressed to that point and instructed the Engineer to notify the Commission well in advance so it can arrange to be present to view it at that time.

The Commission discussed with the Engineer the bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows, the action of the Commission with respect to each project being by unanimous vote.

"Austin Junction-Forest Boundary and Brogan Hill-Brogan Sections of the John Day Highway, in Baker, Grant and Malheur Counties; 20.5 miles of re-oiling. J. C. Compton Co., McMinnville, submitted the low bid for this project at $20,245. The second low bid was submitted by Cunningham & Smiley, of Portland, at $20,901. There were four higher bids. The Commission has awarded this contract to the low bidder, J. C. Compton Co.

"Gunnell Road-Robertson Bridge Section of the Rogue River Loop Secondary Highway, in Josephine County; 4.57 miles of grading, surfacing, and oiling. M. L. O'Neil & Son, Eugene, submitted the low bid for this work in the amount of $132,956. The next low bid was that of Erland & Blickle, Vancouver, Washington, at $139,803. There were nine higher bidders. The Commission has awarded this contract to the low bidder, M. L. O'Neil & Son.

"Troutdale Overcrossing of the Union Pacific Railroad tracks on the Columbia River Highway, in Multnomah County. The bid of Birkemeier & Sarcmal, Portland, at $42,750 was the low bid received for this job. Lindstrom Bros., Portland, submitted the next low bid at $44,100. There were seven higher bidders. The contract has been awarded to the low bidder, Birkemeier & Saremal, at the bid price.

"Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, in Multnomah and Washington Counties; 0.89 mile of grading and 3.76 miles of paving. Parker Schram Co., Portland, submitted the low bid for this work at $239,213, based on the use of asphalt. They submitted no bid based on the use of tar. Warren Northwest, Inc., Portland, submitted the next low bid at $241,681, based on the use of asphalt. They also submitted no bid based on the use of tar. There were two higher bidders. The Commission has deferred the award of this contract pending satisfaction of certain conditions. The bids have been referred to the Engineer with authority to award the contract to the low bidder when these conditions have been satisfied.

"Wasco-Grass Valley Rock Production Project on the Sherman Highway, in Sherman County. Lofts & Son, Hood River, submitted the low bid for this work in the amount of $14,898.30. They qualified their bid by stating that they would not accept this award unless also awarded the contract for construction of the Kent-Cow Canyon Junction Rock Production Project. E. H. Itschner Co., Molalla, submitted the next low bid

in the amount of $16,500. This contractor also stated that he would not accept the award of this project unless also awarded the contract for the Kent-Cow Canyon Project. There were five higher bidders. Inspection of the bids received for the Kent-Cow Canyon Junction Rock Production Project reveals that Lofts & Son are also the low bidders for this work. Their combination bid on both projects was also the low one received. In view thereof, the Commission has awarded the Wasco-Grass Valley Rock Production Project to Lofts & Son at their bid price.

"Kent-Cow Canyon Junction Rock Production Project on the Sherman Highway, in Sherman and Wasco Counties. Lofts & Son, Hood River, submitted the low bid for this work in the amount of $18,704. They qualified their bid by stating that they would not accept the award of this contract unless also awarded the contract for the Wasco-Grass Valley Project. E. H. Itschner Co., Molalla, submitted the next low bid at $19,320. This company also stated its refusal to accept the award of this contract unless also awarded the contract for the Wasco-Grass Valley Project. There were five higher bidders. Due to the fact that the firm of Lofts & Son was low bidder for both projects, individually as well as in combination, the Commission has awarded the contract to Lofts & Son at their bid price."

The Engineer reported the results of preliminary surveys for improvement of the Pacific Highway East (Union Avenue) between Columbia Boulevard and the intersection with the Pacific Highway West (Denver Avenue), Portland. He advised that Union Avenue carries an extremely large volume of traffic, and it is difficult to arrive at a plan which would handle this traffic and at the same time serve the various access roads because of the prohibitive cost, but the plan that has been prepared, he believed, would adequately serve the situation and not be prohibitive in cost, considering the territory through which the improvement must be made, and could be built in stage construction so that immediate benefits could be realized upon completion of each section. He pointed out that Union Avenue is now a three-lane highway carrying 20,000 cars daily and that considerable building development is contemplated along this thoroughfare, particularly in the vicinity of Gertz Road, which will augment the traffic volume. Much of this extra traffic, he said, will enter Union Avenue, and, in order to provide for the proper connections, it is planned to construct traffic separation structures at several points--Gertz Road Junction, Portland Meadows Racetrack, Portland Speedway, Bridgeton Road, and at the intersection of Denver and Union Avenues as requested by the Portland Livestock Association. He estimated the total cost of the project at approximately $1,200,000, of which amount about $107,000 represents the cost of right of way. In addition to the grade separation structures, he said, the contemplated improvement provides for the widening of Union Avenue for four lanes of traffic and the construction of parking lanes on each side. He exhibited a map showing an outline of the proposed plan. In the discussion of this matter Chairman Banfield remarked that the Commission does not have funds available to finance construction of the project at this time; however, he gave as his opinion that right of way for it should be acquired now before further development takes place. Commissioners Schaupp and Chandler

concurred, whereupon the Engineer was instructed to furnish the Right of Way Department with right of way descriptions at once. The Chief Counsel was instrusted to negotiate for the acquisition of the properties and to render a progress report thereon at the next meeting of the Commission.

The Commission had under discussion a written report from the Engineer dated January 23, 1948, on the matter of (1) allowing State Highway Department employees who are paid on an hourly basis certain holidays with pay, (2) authorizing step increases in salary for hourly-paid employees who are eligible under the rules and regulations of the Civil Service Commission, (3) approving increases in salaries and wages of other employees (see letter in general files for details). The report was discussed at considerable length, during which Chairman Banfield expressed the attitude of the Commission by stating that the Commission wants to look at this matter fairly because it realizes that the employees need salary increases, but the Commission is not in favor of automatically raising the salaries of everyone employed in the highway organization. The Commission looks with favor, he said, on granting salary increases to employees who merit them and will approve such increases if properly recommended. Commissioners Schaupp and Chandler indicated their approval of the Chairman's remarks. As a result of discussion the Commission referred the matter back to the Engineer with instructions to again go over the list of employees and submit another containing only the names of those whom he recommends for step increases under the Civil Service ruling. Such list is to be prepared on a merit rating basis, particularly on the capability of the employee to perform the duties of his position. His report is to be submitted at the next meeting of the Commission, when the Commission will take action on all of the subjects covered by the Engineer's report of January 23. It was understood that whatever action the Commission may take in the matter will be retroactive to January 1, 1948.

The Commission also discussed the Engineer's report on his investigation of the substitute route for the Crooked River Highway heretofore proposed by a Crook County delegation headed by Mr. A. R. Bowman, in order to avoid an expenditure of approximately $500,000 to rebuild the present highway around the U. S. Reclamation Bureau's proposed dam in Crooked River near the junction of the Crooked River Highway with the Crooked River-Paulina Secondary Highway. According to this report, the proposed route follows along the Comb's Flat County Road, southeasterly from Prineville, a distance of about 16 miles to a connection with the Crooked River-Paulina Secondary Highway, thence along this secondary highway a distance of about 28 miles to a point near Camp Creek, where it leaves the state highway and extends in a southerly direction up Camp Creek and across flat country to a connection with the Central Oregon Highway at approximately Mile Post 75.0, this latter section being about 42 miles in length. The report reveals that the Crooked River Highway will be inundated for a distance of 4.63 miles south of the dam site and a section of the Crooked River-Paulina Secondary Highway 9.55 miles in length will also be flooded; further, that it will cost about $408,000 to rebuild the Crooked River Highway around the dam site and about $68,000 to recondition the Comb's Flat road for use by secondary highway traffic, a total of $476,000. Compared with this total the estimated cost to recondition and

gravel the connecting road between the Crooked River-Paulina and Central Oregon Highways is $423,000, however, to this amount should be added the cost (estimated at $68,000) to recondition the Combs Flat Road which will have to be used in either case, or a total of $491,000; in other words the estimated cost to provide the new route is only $15,000 more than that to rebuild the Crooked River Highway.

In the discussion of this matter the Engineer pointed out that there is a possibility the Reclamation Bureau will contribute the sum of $100,000 toward the cost of the project, that being the value they place on the roads that will be inundated. He also reported information to the effect that if the Highway Commission will not cooperate in the project the Reclamation Bureau probably will relocate the dam farther upstream where its value for irrigation purposes would be far less than if it were constructed on the presently-proposed location.

In reply to an inquiry from the Commission as to what position the Commission would be in if it assumed this entire obligation as requested, the Chief Counsel advised that, ordinarily, when the Federal Government builds a reclamation project, or any other project which destroys a highway facility, it usually replaces such facility, but it appears in this instance that the Government is reluctant to incur this expense, and the county, in order to secure both the highway and the dam project, is asking the state to assume the government's obligation with respect to the highway. He added that if the Commission should spend state highway funds for this purpose and by so doing would handicap a highway project in some other part of the state, then the Commission would be placing itself in a position where it could be enjoined by some dissatisfied resident. The discussion further brought out that the state already has an investment of $403,000 in the present Crooked River Highway which would be lost if the present road were abandoned for the other; moreover, the Commission would be required to spend about $491,000 in order to make the substitute road usable. It was also brought out that the present Crooked River Highway is a primary highway. The Chief Counsel advised that inasmuch as this is a primary highway the Commission does not have the authority to abandon it as it has in the case of a state secondary highway. The Commission took no action in the matter but deferred it pending conference on the subject with a delegation from Prineville on the following day. (Mr.A. R. Bowman appeared before the Commission on the following day and, among other things, stated it is his understanding that the U. S Reclamation Bureau has $100,000 available to contribute toward the cost of improving the new route. The Commission at that time referred the matter back to the Engineer for further study and report at the next meeting. With respect to the Reclamation Bureau's $100,000, the Commission stated that it must have a letter from the Reclamation Bureau definitely committing such sum to this project.)

Pursuant to instructions of the Commission at the previous meeting, the Engineer reported arrangements that have been made to have a responsible assistant on duty in the office of the Maintenance Engineer, in Salem, each Saturday morning from eight to twelve throughout the winter season to dispense detailed information on road conditions during the weekends. The Commission approved the arrangement by unanimous vote.

The Engineer asked the Commission to confirm the telephonic authority previously given him to enter into an agreement with the County Court of Washington County for the maintenance of Walker County Road, which the State's contractor, Porter W. Yett, needs to use in connection with the transportation of surfacing materials required for his contract for surfacing and paving the North Plains-Barnes Road Section of the Sunset Highway. It appears that the Washington County Court has recently posted reduced load limits on a large number of county roads, including the Walker Road, and unless some such an arrangement for the use of this road is perfected, the contractor will be unable to complete this contract with the Highway Commission during the 1948 season. The cost to main this road for the next four months he said, is estimated at $3,000. The Commission approved the arrangement by unanimous vote. (An agreement with Washington County covering the matter was signed by the Commission on the following day.)

The Commission had under discussion a proposed agreement with the City of Portland covering four cooperative projects, as follows:

(1) Improvement of Columbia Street pursuant to a one-way traffic plan between 19th Avenue and Harbor Drive; estimated cost, $80,000, which is to be divided between the city and the state on an equal basis, pursuant to previous oral understanding;

(2) Installation of traffic signals on Fourth Avenue and Sixth Avenue; estimated cost, $18,000;

(3) Installation of traffic signals on Union Avenue at East Clay Street and at East Stark Street; estimated cost, $10,000;

(4) Installation of traffic signals on Front Avenue at its intersections with Salmon Street and with Morrison Street, estimated cost, $7,500.

The Commission discussed all four projects at some length but deferred action thereon pending a conference with City Commissioner William A Bowes, as suggested by the Chief Counsel.

There were presented to the Commission a number of communications requesting construction of the uncompleted section of the Wilson River Highway between Glenwood and the Sunset Highway Junction at North Plains. The Secretary was instructed to reply to these requests that the Commission does not have funds available at the present time to construct this project and does not know what funds are to be available in the future because Congress has not made an appropriation for federal aid for highway improvements; also that the committee appointed by the 1947 Legislature to make a study of highway matters in this state is now holding hearings on the subject and just what effect the committee's report will have on future highway construction is a matter of conjecture; further, the Commission cannot obligate anticipated funds for future construction but will be glad to consider this project along with others in the formulation of future construction programs and will instruct the Engineer to analyze the project in the meantime.

The Engineer brought up for discussion the petition of Coos County residents for the improvement of the intersection of the Sanford Heights County Road with the Oregon Coast Highway about one-half mile west of the city limits of Coquille. He advised that this is a Minor Betterment Project and is estimated to cost $2,200; moreover, it is one of the projects which he recommended for construction during 1948 and for which provision has been made in the 1948 Minor Betterment Budget. He requested authority to proceed with the improvement. The Commission approved the request by unanimous vote.

The Engineer requested confirmation of the telephonic authority previously given him by the Commission to obligate an expenditure of $20,000 for surfacing and paving necessary to widen the Columbia River Highway adjacent to McNary Dam, Umatilla County, for four lanes of traffic. He explained that the U. S. Army Engineers allege and that he concurs, that the construction of McNary Dam will cause serious traffic congestion on a section of the Columbia River Highway through the McNary Dam townsite and that the widening work is required in order to relieve the situation. The Army Engineers, he said, have offered to do the grading work, which is estimated to cost $7,000, provided the state will later apply the surfacing and pave the widened section. The Commission approved the project by unanimous vote.

The Commission discussed a request from the Aurora Women's Club for sidewalk or footpath construction along the Beaverton-Aurora Secondary Highway between Aurora and the Aurora Grade School. The Engineer advised that this matter has been investigated by the Traffic Engineer who has determined that it will require about 2,000 feet of footpath construction, estimated to cost approximately $2,000, and will require the acquisition of a small amount of right of way, costing about $100. He further stated that it is the recommendation of the Traffic Engineer, in which he concurs, that the request be denied, there being no apparent reason to justify the expense. The Commission approved the recommendation.

The Commission considered and denied a request from the Burlingame-Fulton Park Community Club, Portland, that provision be made for pedestrian traffic on either side of Barbur Boulevard from Terwilliger Boulevard Junction to Miles Street, particularly for the benefit of school children who attend the Fulton Park School. It was the opinion of the Commission that this is strictly a city matter.

The Commission also denied a request from the City Council of the City of Empire, Oregon, for sidewalk and curb construction along the Cape Arago Secondary Highway in the City of Empire and the further request for construction of a guard rail along the highway fronting the Holden property on South Broadway because the Engineer's report on the subject disclosed that the expense is not justified.

The Commission had under discussion a report from the Engineer on the request of the School Board of Lakeview, the Lake County Chamber of Commerce, and Mr. Howard F.Beachler, Lakeview, for footpath construction along the

Klamath Falls-Lakeview Highway near the Lakeview city limits for the protection of school children and other pedestrians. It appears from the report that the highway has a 22-foot paved surface with about seven-foot shoulders, but the shoulders become wet and muddy during inclement weather so that pedestrians are obliged to walk on the pavement. It also reveals that the traffic volume consists of approximately 3,260 vehicles during each 24 hour period and an average of 132 pedestrians during the same period, most of whom are school children. During the period 1940 to date, the report indicated one pedestrian has been killed and four pedestrians injured while walking along this section of highway. The Engineer advised that the proposed footpath would be about 0.55 mile in length and is estimated to cost $1,550. He recommended approval of the project and that the expense be paid from the contingency reserve funds set up in the 1948 Budget. The Commission approved the recommendation unanimously and so ordered.

The Commission discussed a letter from the S. E. Portland Chamber of Commerce requesting that Foster County Road, which extends in a southeasterly direction from the City of Portland, be designated a state highway. The Engineer recalled that this matter had the attention of the Highway Commission several months ago and at that time the Commission denied the request; however, the origin and destination survey conducted in Portland reveals that the Foster Road route is of much more importance now than it was formerly considered. He suggested that the project might be kept in mind and given a priority rating second to the Sullivan Gulch project, notwithstanding that there is no money immediately in sight to finance the improvement were the road placed on the State Highway System. The Commission denied the request.

The Commission discussed a letter from the John Day Junior Chamber of Commerce, requesting the reconstruction of the John Day Highway between the towns of Mt. Vernon and John Day. The Engineer advised that this is a meritorious project and recommended that it be given a high priority rating in preparation of the next construction program. The Commission approved the recommendation.

A letter was presented from the Parkrose Chamber of Commerce expressing appreciation for the improvements being made to Sandy Boulevard (Columbia River Highway) in the Parkrose District and requesting additional improvements to this thoroughfare between 107th and 122nd Streets. The Engineer recalled that the work now under way consists of widening and construction of curbs between 82nd Street and 99th Street, at a cost of $84,000, and advised that to continue the improvement as requested by the Chamber of Commerce would cost an additional $60,000. The Commission decided unanimously not to do the extra work.

The Engineer requested authority to extend Contract No. 2932 awarded to Mr. Tom Lillebo and covering repairs to the Umpqua River Drawbridge fenders which were damaged during the floods of 1945. He advised that this contract was awarded to Mr. Lillebo on August 26, 1947, and was only recently completed; however, payment of the final estimate has not been made. He explained that the dolphins and fenders of this structure were considerably damaged by high water and floods occurring during January 1 to January

7, 1948, necessitating additional repairs which he estimated would cost about $5,600, including engineering and contingencies. It was his thought that the logical thing to do would be to extend Mr. Lillebo's present contract to include this work, and he so recommended. The Commission approved the recommendation unanimously.

A letter was presented from the County Court of Grant County, urging construction this year of an oiled surface on the Dixie Pass Section of the John Day Highway. The Engineer advised that this job is estimated to cost $125,000 and that it is contemplated to do the work as a Forest Highway Project, for which there are no funds at the present time. The Secretary was instructed to inform the County Court of the status of Forest Highway revenues and to state that the project will be done just as soon as Forest Highway Funds are made available.

The Commission discussed a letter from the Washington Toll Bridge Authority, requesting that the Oregon State Highway Commission assume a portion of the expense of maintaining and operating the toll bridge which spans the Columbia River between Longview, Washington, and Rainier, Oregon, which bridge recently was acquired by the State of Washington. Following discussion, motion was made by Commissioner Schaupp that the matter be laid on the table for lack of information. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of the 1946 State Tax Street Funds that they received in 1947 and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory:

Canyon City	Gearhart	Sumpter
Gaston	Sodaville	Wallowa

He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto marked EXHIBIT "C" which resolution by this reference is made a part hereof with like effect as though extended herein.

The Commission had under discussion the matter of apportioning to the cities and towns of the state a certain percentage of state highway revenues as required by Chapter 425, Oregon Laws 1947. The Engineer submitted a list of the cities and towns that are eligible for the funds under discussion showing opposite each city and town the amount which each is legally entitled to receive. Following discussion the Commission approved the apportionment of funds as disclosed by the Engineer and thereupon by unanimous vote, upon motion of Commissioner Chandler which was seconded by Commissioner Schaupp, adopted the attached resolution with regard thereto marked EXHIBIT "D" which resolution by this reference is made a part hereof with like effect as though extended herein.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning.

Portland, Oregon
February 3, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
W. C. Williams, Acting State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
M. H. Hawke, Chief Auditor
G. W. Neuner, Assistant Counsel
H. B. Glaisyer

Bids for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

Mr. Willis West, Attorney, Portland, appeared before the Commission at the head of a delegation consisting of about 50 residents of Yachats who protest the removal of smelt sand from the ocean beach at Yachats. The following persons representing the Oregon Agate and Mineral Society were also present but took no part in the discussion: Rev. Byron Travis, Portland, and A. W. Hancock, Portland

Mr. West urged the Commission to cancel the permit heretofore issued to Mr. L. M. Christensen, permitting him to remove beach sand at this location because of the disastrous effects it will have on the propagation of smelt. He alleged that the sand that was taken for use in connection with construction of the Alsea Bay Bridge had not been replaced as was predicted, and a bare shelf of rock remains; consequently, the smelt now spawn in the location where Mr. Christensen's sand-removal operations are under way. He gave as his opinion that unless the Highway Commission stops removal of the sand, the smelt will leave and this attraction will be lost for all time. He questioned the Commission's legal authority to issue the permit in the first instance because it was granted prior to enactment of the 1947 law covering the use of the ocean beaches. It was his thought that the Highway Commission had no control over the situation but that jurisdiction rested in the State Land Board, also that when the Highway Commission authorizes removal of smelt sand or the interference with the propagation of fish, it also interferes

with the common right of fishery. He pointed out that the permit as issued contains no consideration and gave as his opinion, in view thereof, that the permit would not hold up in the courts. Mr. West presented additional oral arguments in support of his request for the cancellation of Mr. Christensen's permit. He filed with the Commission the following material: Resolution from Yachats Grange No. 809, resolution from Yachats Chamber of Commerce, editorial from the Bend Bulletin, letter from North Lincoln Agate Society, letter from Oregon Agate and Mineral Society, petition signed by 200 residents of Yachats, and pictures showing the beach area where the smeltsand is being removed, all of which supported the protest against removal of sand from this beach area.

Chairman Banfield advised the group that the Commission would take no action whatsoever on Mr. West's request until it had consulted with its Chief Counsel, so they need not expect an answer at this meeting. The Chief Counsel later advised the Commission that if the permit issued by the Commission to Mr. Christensen is invalid, it is not invalid on the grounds stated by Mr. West.

Mr. L. M. Christensen, Yachats, also was present with regard to this subject. He exhibited a permit that was granted him by the State Highway Commission in October 1946, permitting him to remove sand from this beach for five years except during the smelt-spawning season, which lasts for several months in the summer. Mr. Christensen advised that on the strength of this permit he has made an investment of about $9,000 in equipment to carry on his operations, however, did not exercise any rights under the permit for a year after receiving it, in fact, has not sold even one yard of the sand up to date although he has stockpiled 150 cubic yards which he expected to sell to local residents at cost, which would be about $1.50 to $1.75 per cubic yard, compared with $6.70 per cubic yard for sand delivered from Fogarty Creek near Newport. Mr. Christensen pointed out that he owns a 1,125 foot frontage on the ocean at this point and people, in order to reach the smelt sand, must pass over his property. He read aloud a letter from Mr. George Govro, who secured some 40,000 cubic yards of sand from this location several years ago for use in connection with the construction of the Alsea Bay Bridge at Waldport. According to this letter Mr. Govro made certain tests to determine the quantity of sand that might be available at this location and found an inexhaustible supply. Mr. Christensen offered to return his permit to the Commission if it so desired but he wished it understood that he is not being forced to do so because of this controversy. This concluded the conference on this subject.

A delegation from Clatskanie representing the Lower Columbia River Highway Association and consisting of State Representative Manley Wilson, of Warren; State Representative Ed H. Condit, Westport; Judge Guy Boyington, County Judge of Clatsop County, Astoria, and Mr. Arthur Steele, President of the Association, and publisher of the Clatskanie Chief, Clatskanie, appeared before the Commission regarding the further improvement of the Columbia River Highway. Mr. Wilson headed the group and introduced the speakers. Mr. Steele mentioned that several people had been killed on this highway due entirely to the condition of the highway and not because of reckless driving or through any fault of their own. He declared that the highway has not had any major

improvement since 1919 and is obsolete for present traffic. He requested the reconstruction of the 40 mile-section between St. Helens and Bugby Loops. In reply to an inquiry of Commissioner Schaupp as to the cost involved and whether or not the matter had been presented to the Legislative Interim Committee, which is now studying highway matters, Mr. Steele stated that he did not know the cost but that the subject had been discussed with the Interim Committee. Judge Boyington recalled that requests for this project had been made years ago and the people were promised a continuing program but during the last few years nothing has been done and they did not press their requests because they thought it best to wait the completion of the Sunset Highway. He gave as his thought that now is the time to proceed with the improvement and urged fair consideration by the Commission. The Engineer advised that plans are ready for the Little Jack Falls Section and that bids would be called for construction of this section, approximately 3.6 miles in length, between Rainier and Goble as soon as the right of way is acquired. Chairman Banfield advised the delegation that state money has been allocated for this section and that it would be spent there unless the people desire some other project, but that lack of funds prohibits undertaking any additional work at the present time. He assured the delegation that every effort would be made to prepare the Little Jack Falls project for bids to be received at the March meeting of the Commission. Judge Boyington also mentioned that the County Court is now preparing a deed conveying to the state title to County lands on Tillamook Head and that it would be delivered to the Commission shortly without cost.

Mr. A. R. Bowman, Prineville, came before the Commission regarding the rerouting of the Crooked River Highway so as to avoid reconstruction of the present highway around a proposed dam in Crooked River which the U. S. Bureau of Reclamation contemplates building. He repeated arguments for such rerouting as expressed at a previous meeting with the Commission and in addition thereto advised that if the State Highway Commission will not approve the rerouting or assume the expense of reconstructing the present highway, the probability is that the Bureau of Reclamation will build the dam on another site further upstream, on the North Fork of the Crooked River, where it will not serve irrigation purposes as will a dam constructed at the lower site. The route proposed by Mr. Bowman extends southeasterly from Prineville along what is known as the Combs Flat County Road to a place known as the Shorty Davis Ranch on the Crooked River -Paulina State Secondary Highway, thence follows the secondary highway to Camp Creek, which is about ten miles west of Paulina,and then leaves the secondary highway in a southerly direction and extends to a junction with the Central Oregon Highway at a point approximately twelve miles west of Gap Ranch. Mr. Bowman advised that he has received information from the Bureau of Reclamation that the Bureau will contribute $100,000 toward the cost of reconstructing such route.

It was pointed out to Mr. Bowman that, according to the Engineer's investigation, it will cost $450,000, or more, to make the proposed route usable; moreover, the state has approximately $400,000 already invested in the present route which would be lost were it abandoned as a state highway. It was also pointed out that were the Commission to spend gas tax money for this purpose it would be more or less subsidizing construction of the dam, which would not be exactly fair to the other people of the state who pay this tax and who are entitled to have the money spent strictly for road building

purposes. The Chief Counsel advised that inasmuch as the Crooked River Highway is a primary state highway the State Highway Commission does not have authority to abandon it as in the case of a secondary highway, and it could be taken off the State Highway System only by action of the legislature; so in the event the Commission should see fit to build the other road, it would still have to maintain the present road until the legislature acted. Following further discussion, the Commission agreed to give the matter further study and thereupon instructed the Engineer to recheck his estimates of cost to improve the proposed route and report his findings at the next meeting of the Commission. Mr. Bowman was informed that before any action is taken the Commission must have definite assurance, in writing, from the Bureau of Reclamation that it will contribute $100,000 toward the cost of improving the new route.

Mr. Fred Cheatham, City Engineer of Springfield, appeared before the Commission and requested a traffic and engineering study for a proposed bypass route for the McKenzie Highway through the town of Springfield, particularly along South "A" Street between Mill Street and 10th Street. He presented a resolution from the City Council requesting such investigation. He stated that he had had a previous conference with the State Highway Engineer regarding this matter and was informed that he could not make the survey unless authorized to do so by the Commission, hence his appeal at this time. He further stated that although no definite commitments have been made, indications are that the city will acquire the necessary right of way. The Engineer stated that the city had been told by Mr. Baldock that a survey would be necessary but that such a survey, estimated to cost between two and three thousand dollars, would have to be approved by the Commission. The Commission decided that, inasmuch as the previous discusssion of the matter was between city officials and the State Highway Engineer, Mr. R. H. Baldock, who is now absent, the matter would be held up until he returns and the request would be placed on the agenda for the March meeting.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same members present and participating.

Mr. J. L. Franzen, City Manager, Salem, appeared before the Commission and requested the installation of a "stop and go" traffic light at the intersection of Pacific Highway East (N. Capitol St.), Silverton Road and Highland Ave. in North Salem on the same cooperative basis as was approved for the signal installation in the Hollywood District. Chairman Banfield recalled that when the Commission approved the installation in the Hollywood District it was with the understanding that the city would report to the Commission the effect the signal has on traffic congestion but to date this report has not been received. There followed a general discussion of the proposed installation but action on the matter was deferred pending an investigation and report by the Engineer.

Mr. Elmo Smith, Mayor, and Mr. J. Dwyer Bennett, Councilman, representing the City Council of Ontario, appeared before the Commission regarding the improvement of certain industrial streets in their city that are not on the state highway system. Mr. Smith was spokesman. He advised that the city has a program

of improvement of about 100 blocks of city streets which they plan to finance with city funds as far as possible, but their main project is the improvement of East Second Street which now carries a large volume of industrial traffic with much more in prospect due to construction of a new mill adjacent to this street. The city, he said, is not financially able to maintain this particular street, so they are asking the Highway Commission to assist, using the "City Account Funds" made available to the Commission under the provisions of Chapter 425, Oregon Laws 1947. He said that the city is equipped to do a portion of the work such as preparation of the base if the State Highway Commission will provide the oil surfacing; moreover, the city will contribute from $1,500 to $2,000 of city funds toward the costs involved, depending, of course, on the requirements of the Commission in that regard. Chairman Banfield explained that the Commission has $250,000 available under the City Account Fund to distribute among the smaller cities and towns of the state under the provisions of the law referred to, and the Commission wants to aid these cities and towns in the improvement of their street facilities to the best of its ability; however, because of the limited amount of funds available and the necessity to distribute the funds equitably throughout the state, there is a limit to the amount the Commission can allocate to any particular city or town. In the event the Commission should approve this project, he said it would be with the understanding that it is the city's major project and that the city could not return next year and ask for additional funds. Mr. Bennett assured the Commission that the East Second Street improvement is their major project and if the Commission will assist with this project the city will take care of the balance of its streets. He urged an early decision in the matter so, if approved, the work can be done within the next 90 days, before extreme heavy hauling is begun over this street. He was advised by the Commission that the request would be taken under consideration, and, if it is approved, it would be on the condition that the city would contribute to the cost involved.

Further consideration of the matter was given by the Commission following the departure of this group during discussion of projects submitted by the Engineer as eligible for the "City Account Funds". The Engineer presented a list of projects,as follows, involving $194,616 of state funds, $90,028 of city cooperative funds, and $13,750 of funds to be provided by property owners, which list he suggested as a partial program for the total amount of $250,000 state funds available:

City	Type of Project	Remarks Description of Proposed Improvement
Bandon	Cooperative	State to reseal, City to Patch.
Beaverton	Cooperative	State to lay oil mat. City to blade, etc. Property owners to pay for curbs
Brownsville	Cooperative	State to remove bad spot, rebase and lay new asphaltic concrete, and replace part of street with oil mat. City to pay for drainage and base rock.
Central Point	Cooperative	State to remove sheet asphalt, place B-3 bituminous macadam, and patching. City to take care of drainage.
Cornelius	Cooperative	State to patch and reseal. City to provide drainage.
Dufur		State to widen and place oil mat.
Eastside		Recommend no work in 1948.
Estacada		Recommend no work in 1948.
Freewater		State to widen and place oil mat.
Garibaldi	Cooperative	State to place crushed rock and blade streets. City to drain and ditch.
Gearhart		Recommend no work in 1948.
Harrisburg		Recommend no work in 1948.
Independence		State to raise grade on one block, widen and re-oil balance.
Milton	Cooperative	State to cut and fill, install culvert. City to fine grade and surface.
Myrtle Point	Cooperative	State to lay asphaltic concrete. City to pay share.
Oakland		State to patch and reseal.

February 3, 1948

City	Type of Project	Remarks Description of Proposed Improvement
Lakeview	Cooperative	State to reshape, place rock base, and oil mat. City and property owners to place curbs and storm drainage and one-half cost of rock base.
Newport	Cooperative	State to widen and place oil mat. City to construct curbs.
Ontario	Cooperative	State to grade, surface and oil mat. City to install culverts and drainage and pay costs of grading, surfacing.
Oswego		Recommend no work in 1948
Sweet Home	Cooperative	State to place asphaltic concrete. City to provide drainage and base rock.
Tillamook	Cooperative	State to place asphaltic concrete pavement. City to grade, place base rock. Property owners to place storm sewers, curbs, driveways, etc.
West Salem	Cooperative	State to place asphaltic concrete pavement. City to base rock, place curbs and drainage.

The Engineer advised that the projects listed have been carefully checked on the ground by Highway Department engineers, and verbal agreements have been effected with the city authorities pending consideration and approval of the projects by the Commission. He recommended approval of the projects and that authority be granted him to enter into formal agreements with the cities on the basis of the oral arrangements. Following careful consideration of this matter the Commission unanimously approved the projects as recommended. The Engineer and the Chief Counsel were authorized and instructed to proceed at once to secure agreements with the cities and towns concerned, and to expedite the matter as much as possible. The Engineer was authorized to proceed with the contracting of the work as soon as the agreements have been executed.

Chairman Banfield brought up for discussion the construction of the proposed railroad grade separation structure on the Baker-Unity Highway in the City of Baker. The Chief Counsel reported that he is endeavoring to clear up the right of way features of this project and expects to have that taken care of shortly, and that he is trying to get additional cooperation from the railroad company and expects to have that matter settled soon also. The Engineer advised that the plans for the project have been prepared and the project can go forward as soon as right of way and legal matters have been cleared up. The Commission ordered the matter expedited and authorized the contracting of the project as soon as the legal and right of way matters have been clarified.

Chairman Banfield also inquired into the matter of the proposed exchange of roads with Umatilla County as previously requested by the Umatilla County Court. He recalled that when the court appeared before the Commission it was understood that a definite answer would be given this year. The Engineer advised that the information for his report has been assembled and that the report will be submitted in the near future. He and the Chief Counsel were instructed to expedite their reports on this subject.

A letter was presented from the City of Astoria, requesting the widening of Taylor Avenue westerly from Bay Street and also requesting the improvement of the highway in the east end of Astoria in order to relieve traffic congestion caused by the establishment of the Tongue Point Naval Base. The Engineer advised that a preliminary engineering study will have to be made of this matter before he can make an intelligent report on it. He estimated the cost of such study at $500 and suggested that he be authorized to proceed with it at odd times when an engineer can be spared for the purpose. The Commission approved the suggestion by unanimous vote on the condition that it will not be necessary to take personnel away from other jobs to make this investigation. It was the feeling of the Commission that it should help out in matters of this kind if it will not handicap other work.

The Commission by unanimous vote confirmed the oral approval heretofore given for increasing the amount of Postwar Forest Highway Funds programmed for improvement of the Alsea Highway Project No. 6-A1, E8 from $250,000 to $340,000, such transfer being of Federal Funds only, in order to expedite this forest highway improvement.

The Engineer brought up for discussion the matter of improving the Minam Hill-Wallowa Section of the Wallowa Lake Highway with state forces rather than by contract. He advised that this is one of the jobs included in the Special Major Betterment Program for 1948 and because of the nature of the work, which is scattered over several miles of highway, it is difficult to contract and very likely can be done much cheaper with state forces. He requested authority to perform the work on a state-force basis. The Chief Counsel advised that it would be legal for the Highway Commission to do the work in such manner because it is in the nature of minor betterment. Following discussion the Commission approved the Engineer's request by unanimous vote.

In this connection, and for similar reasons, the Engineer also requested authority to undertake with state forces the improvement of the Oregon Coast Highway south of Port Orford, which is also one of the projects included in the Commission's Special Major Betterment Program for 1948. The Commission approved the request by unanimous vote.

The Commission discussed with the Engineer the bids received at the morning session for construction of state highway projects and by unanimous vote took action as publicly announced at 3:00 p.m. by Chairman Banfield, as follows:

"Reconstruction of ferry slips at Astoria and Megler, Clatsop County. The Commission received two bids for this job, the low bid being submitted by General Construction Co., Portland, at $20,858.15. The other bid was submitted by Larson and Palmberg Company, Astoria, at $29,847. The Commission has awarded the contract to the low bidder, General Construction Co.

"Grading, surfacing, and furnishing crushed rock in stockpiles on the Johns-Mackin Gulch Section of the Pacific Highway in Douglas and Josephine Counties. Babler Bros., Portland, submitted the low bid for this work at $292,796. The next low bid was submitted by Edwin C. Gerber, Oregon City at $306,409. Seven higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder, Babler Bros., when certain conditions have been satisfied.

"Construction of a 260-foot reinforced concrete and steel girder viaduct over the Salmon River on the Oregon Coast Highway in Lincoln County. Tower Sales & Erecting Co. and Walder & Kenworthy, Portland, submitted the low bid for this job at $82,505. The next low bid was submitted by Tom Lillebo, Reedsport, at $86,372.50. Two higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder, Tower Sales & Erecting Co. and Walder & Kenworthy, when certain conditions have been satisfied.

"Grading, paving and construction of a reinforced concrete bridge on the Lebanon Section of the Santiam Highway, in Linn County. The Commission received five bids for this work, the low bid being submitted by Warren Northwest, Inc., Portland, at $125,631. The next low bid was submitted by Perkins Bros., Portland, at $130,661. The contract has been awarded to the low bidder, Warren Northwest, Inc., at its bid price.

"Bristol Undercrossing and Troutdale Grade Separation structures on the Columbia River Highway, in Multnomah County. The Commission received six bids for this work. The low bid was submitted by Walder & Kenworthy, Portland, at $47,420.50. Birkemeier & Sarcmal, Portland, submitted the second low bid at $47,740. The contract has been awarded to the low bidder, Walder & Kenworthy.

"Grading the West Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, in Sherman County. The Commission received seven bids for this work, the low bid being submitted by Gerald Miller, Prineville, at $46,012. Vernie Jarl, Gresham, submitted the second low bid at $48,338.00. The contract has been awarded to the low bidder, Gerald Miller.

"Grading and paving on the Pendleton (18th Street-First Street) Section of the Old Oregon Trail, in Umatilla County. The Commission received six bids for this work, the low bid being submitted by Grinstad & Vanderveldt, Astoria, at $118,156.50. The second low bid was submitted by Porter W. Yett, Portland, at $119,800.50. The Commission has rejected all bids for this job.

"Grading, surfacing, and furnishing crushed rock in stockpiles on the Elgin-Boswell Ranch Section of the Wallowa Lake Highway, in Union County. E. C. Hall Co., Portland, was the low bidder for this work at $321,822.50. Babler Bros., Portland, submitted the second low bid at $321,840. Nine higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder, E. C. Hall Co., when certain conditions have been satisfied."

The Commission discussed a telegram from the Bandon Road Committee to Governor John H. Hall requesting immediate action by the State Highway Commission in improving the Seven Devils Road from Coos Bay to Bandon and construction of a bridge across the Coquille River at Bullards. The Commission considered that, inasmuch as this is a county road, it has no obligation in connection with this road or bridge structure and instructed the Secretary to so inform the Bandon Road Committee, sending a copy of the communication to Governor Hall.

The Engineer reported that, pursuant to authority previously given him by the Highway Commission, he has awarded contracts as follows, the conditions of the awards having been satisfied:

Construction of Sandy River Bridge on Columbia River Highway, Multnomah County; contract awarded to low bidder, General Construction Company, on December 31, 1947.

Grading and oil mat surfacing on the Carlton-Chehalem Creek Section of the Carlton-Chehalem Creek County Road, Yamhill County; contract awarded on December 31, 1947, to low bidder, Frank M. Parsons.

Construction of Crooked River Bridge on Ochoco Highway, in Crook County; contract awarded on December 31, 1947, to Perkins Bros., the low bidders.

Grading and oil mat surfacing on the Crooked River Section of the Ochoco Highway, Crook County; contract awarded on December 31, 1947, to the low bidder, Vernie Jarl.

Silver Lake-Harvey Creek and Harvey Creek-Chewaucan River Rock Production Projects on the Fremont Highway, in Lake County; both contracts awarded to the low bidder, F. L. Somers, on January 2, 1948.

Grading and oil mat surfacing, overcrossing structure, and production of crushed gravel for the Adrian-Homedale Section of the Nyssa-Adrain Highway, Malheur County; contract awarded on January 16, 1948, to J. A. Terteling & Sons, low bidders.

Meacham Sanding Materials Project on the Old Oregon Trail, Umatilla and Union Counties; contract awarded on January 23, 1948, to the low bidders, Holmes Bros.

The Commission by unanimous vote confirmed the awards as reported.

The Engineer reported that the relocation survey for the Monument - Hamilton Section of the Kimberly-Long Creek Secondary Highway, in Grant County, has been completed and asked the Commission to approve it as the permanent route of such highway section. After due consideration of the report of the Engineer with respect to the survey under discussion, the Commission approved and adopted the survey, by the adoption, by unanimous vote, of the resolution marked EXHIBIT "E", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission considered the following requests for extensions of time within which to complete highway contracts.

R. A. Heintz Construction Company, Contract No. 2844 for grading and topping the Johns-Glendale Junction Section of the Pacific Highway in Douglas County, requested an extension of time of 152 days, from October 31, 1947, to March 31, 1948, within which to complete this job. They alleged that a two months' delay in awarding the contract due to

right of way troubles, and the extremely wet fall weather prevented completion of the work within the specified time limit. The Engineer advised that the awarding of the contract was delayed fifty days and further delays were caused by right of way disputes and adverse fall weather conditions; however, the state incurred no extra expense by reason thereof except perhaps a small amount for engineering supervision. He recommended that the extension of time be granted as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Struss & McCoy, Contract No. 2859 for furnishing crushed rock in stockpiles for the John Day Rock Production project on the John Day, Beech Creek, Pendleton-John Day, and John Day-Burns Highways, in Grant County, requested an extension of time of 152 days, from December 31, 1947 to June 1, 1948, within which to complete this job. They alleged that breakdown of the crusher equipment had prevented completion of the job within the specified time limit. The Engineer advised that the contract was awarded November 26, 1946, but the contractor did not start setting up his plant until May 2, 1947; also that production output since that time has not been up to expectations. He recommended that the extension of time requested be granted to June 1, 1948, but that the contractor be assessed engineering costs incurred by the state subsequent to December 31, 1947. The Commission approved the extension of time to June 1, with penalty, as recommended by the Engineer.

Kuckenberg Construction Company, Contract No. 2874 for construction of ramps at the west end of the Ross Island Bridge on the Pacific Highway West, in Multnomah County, requested an extension of time of 120 days, from December 31, 1947, to April 30, 1948, within which to complete this job. They stated that, inasmuch as this contract was awarded to them in conjunction with Contract No. 2873, they considered it advisable to synchronize the job schedule for both projects, and as a result construction of the Ross Island Bridge ramps was delayed until the fall and winter months. The Engineer advised that it was logical that the construction of the ramps be delayed as weather and ground conditions more seriously affected the other contract, No. 2873. He recommended, in view thereof, that the extension of time requested be granted without penalty. There was presented from the Public Roads Administration a letter concurring therein. The Commission granted the extension of time to April 30, 1948, without penalty.

Warren Northwest, Inc., Contract No. 2897 for re-grading and paving the Milwaukie-Estacada Section of the Clackamas Secondary Highway, in Clackamas County, requested an extension of time of 242 days, from October 31, 1947 to June 30, 1948, within which to complete this work. They alleged that their failure to complete the job within the specified time limit was due to excessive rains during the month of October which prevented the application of asphaltic and concrete surface. The Engineer advised that the contractor had made every effort to complete

the job within the specified time but was forced to discontinue operations in October because of bad weather conditions. The traveling public, he said, has not been inconvenienced. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the extension of time to June 30, 1948, without penalty.

VaDare Construction Company, Contract No. 2908 for construction of the Stillwell Bridge over Trask River on the Tillamook-Netarts Secondary Highway, in Tillamook County, requested an extension of time of 181 days, from December 31, 1947 to July 1, 1948, within which to complete this job. They alleged that lack of capable skilled labor, extreme difficulties encountered in excavation, and failure to locate critical materials for cofferdams prevented completion of the contract within the specified time limit. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty. The Commission unanimously approved the time extension to July 1, 1948, without penalty.

Johnson-Sterner Corp., Contract No. 2926 for construction of a bridge over Deep Creek on the Milwaukie-Estacada Section of the Clackamas Secondary Highway, in Clackamas County, requested an extension of time of 120 days, from December 31, 1947, to May 1, 1948, within which to complete this job. They alleged that their delay in completing this job on time was due to slow delivery of steel handrail sections; however, they anticipated that the structure will be completed except for painting, and ready for traffic by December 31, 1947. The Engineer advised that as of January 9, 1948, the bridge was completed with the exception of painting the handrail and removal of the detour bridge. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission by unanimous vote approved the extension of time to May 1, 1948, without penalty.

Lindstrom Bros., Contract No. 2942 for construction of a bridge over Rock Creek on the Milwaukie-Estacada Section of the Clackamas Secondary Highway, in Clackamas County, requested an extension of time of 90 days, from December 31, 1947 to March 31, 1948, within which to complete the project. They alleged that delay in awarding the contract and bad weather prevented completion of the job within the specified contract time limit. The Engineer advised that this is one of the Timber Access Road projects for which the awarding of the contract was held up for a considerable length of time pending approval by the Federal authorities; however, after the contract was awarded the contractor made as good time as could be expected. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission granted the extension of time to March 31, 1948, without penalty.

The State Highway Commission, in passing on contractor's requests for extensions of time within which to complete the contracts as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

The Engineer was instructed, hereafter, when submitting his written recommendations to the Commission prior to its regular meetings, to assign a number to each one so it can be identified easily when brought up for discussion at the meetings.

The Engineer reported that contracts Nos. 2772 and 2901 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report, with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported, and by unanimous vote adopted the resolution marked EXHIBIT "K", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Engineer requested authority to construct the following Bridge Minor Betterment jobs:

Extend five 2 x 4 R. C. box culverts	$ 2,000.00
Replace decayed untreated timber cattle passes or small timber bridges with pipe culverts-18 structures involving all five divisions of the state	23,000.00
Extend bridge two additional spans untreated timber, MP 7-217.59	2,000.00
Install steel channel shear rail for the protection of Applegate River Bridge on the Redwood Highway 7 miles west of Grants Pass	3,000.00
Replace 186 lineal feet untreated timber trestle over Skipanon Slough on the Warrenton Secondary Highway with 36" pipe culvert and fill	10,000.00
Widen two bridges on Pacific Highway between Wilbur and Sutherlin	10,000.00
Total	$ 50,000.00

He estimated the cost of the work at $50,000 and advised that funds to pay the expense are provided in the 1948 Minor Betterment Budget. The Commission unanimously approved all of the projects listed; however, instructed the Engineer hereafter to submit requests of this nature to the Commission further in advance of its meeting dates to allow the Commission time to analyze them before the meeting.

The Commission considered a request from the City of Klamath Falls that something be done to relieve the pedestrian traffic hazard on South Sixth Street. Commissioner Schaupp stated that he had discussed this matter with Mr. Tom Edwards, District Maintenance Superintendent at Klamath Falls, and that remedial measures are now being studied. The Secretary was instructed to so inform the City of Klamath Falls.

The Commission considered a suggestion from the Klamath County Chamber of Commerce that informational signs be erected on state highways at designated crosswalks notifying autoists that pedestrians have the right of way at such locations. The Engineer recommended that, inasmuch as the control of traffic at designated crosswalks is a matter of law enforcement by the cities, the suggestion be denied. The Commission approved the Engineer's recommendation and instructed the Chief Counsel to write the Klamath County Chamber of Commerce, stating the action taken and the reasons therefor.

Consideration was given by the Commission to a copy of a letter from Forrest E. Cooper, Attorney, Lakeview, addressed to Mr. Ed Turnbull, Chairman, Highway Committee, Eugene Chamber of Commerce, regarding the Sprague River Road in the Klamath Indian Reservation, in which it was suggested that the State Highway Commission initiate action for the improvement of this road. Commissioner Schaupp stated that he discussed this matter with Mr. Cooper and advised him that the Commission definitely would not take the initiative in the matter. The Engineer advised that he had no new data on funds available for a project of this sort. No action was taken by the Commission.

The Commission considered and ordered filed a letter from the Astoria Chamber of Commerce protesting the Commission's action at the December, 1947, meeting regarding the proposed acquisition of Fort Stevens as a State Park.

The Commission considered adoption of a resolution extending Federal Aid Secondary Highway No. 245, a county road in Douglas County, to include a part of the former route of the Pacific Highway. The Engineer explained that this road consisted of an abandoned section of the Pacific Highway, extending from Glendale Junction northerly a distance of 7.38 miles, to a connection with the relocated Pacific Highway near Azalea. He stated further that Douglas County will maintain the section, but the County Court wants it designated as an extension of Federal Aid Secondary Highway No. 245, and, if the Commission approves, the County Court will request approval of the Public Roads Administration. Action on this resolution was deferred until the next Commission meeting pending a report from the Chief Counsel on legal features involved.

The Commission by unanimous vote approved the payment of 1948 membership dues in the American Association of State Highway Officials, amounting to $450.

The Commission discussed and, upon recommendation of the Engineer, approved a request from the Tillamook County Court that the existing bridge over Three Rivers on the Oregon Coast Highway at Hebo, be given to Tillamook County when it is replaced by a new structure.

The Commission confirmed the oral authority previously given the Engineer to purchase equipment costing $325,000, as follows, being equipment listed in his letter of January 9, 1948, to the Commission:

Maintenance Department

5 Waukesha engines)	$ 9,000.00
2 F. W. D. engines)	
60 Light trucks for paving crews	144,000.00
5 Motor Patrol graders	40,000.00
2 Baughman 7 cu. yd. sanders	2,000.00
10 Front-end tractor loaders - paving crews	40,000.00
10 Asphalt heaters for paving crews	16,000.00
7 light passenger cars	10,500.00
17 Station wagons - survey crews	22,000.00
8 Pickups	9,000.00
	$ 292,500.00
Engineering equipment for construction department	1,200.00
Office equipment and furniture	5,900.00
Testing laboratory equipment	18,000.00
Traffic engineering equipment	2,400.00
Maintenance station equipment	5,000.00
Total	$ 325,000.00

The Commission also authorized the Engineer to purchase additional equipment, estimated to cost $272,000, as follows, being equipment listed in the Engineer's letter of January 27, 1948, to the Commission:

Maintenance Department, for road equipment

20 cars at $1,500	$ 30,000.00
10 Pickups	11,000.00
10 Light Trucks	24,000.00
2 Power Shovels	26,000.00
4 Air Compressors	20,000.00
1 Boiler	1,200.00
2 Dozers	3,000.00
1 Diamond Drill	2,500.00
5 Pull Graders	10,000.00
2 concrete mixers	900.00
17 Power Mowers	25,500.00
1 Paving Plant	20,000.00

Maintenance Department, for road equipment (Con't)

2 Pumps	$ 1,000.00
2 Retorts	15,600.00
2 Tractors	16,000.00
3 Power Saws	2,100.00
2 Snogos	34,000.00
3 Weed Sprayers	1,500.00
Repair Shop Equipment	20,000.00
Radio Equipment	5,000.00
Sign Shop Equipment	2,000.00
Legal Department, office equipment	700.00
	$ 272,000.00

The Commission considered an arrangement with the Myrtle Creek Telephone Company covering disposal of 44.79 miles of telegraph line facilities formerly owned by the Postal Telegraph Cable Company along the Pacific Highway in southern Oregon. The Company offered $1,567.65, payable $250.00 down and the balance by July 1, 1948, for such material. The Engineer advised that if this sale is approved it will dispose of all the remaining pole line facilities acquired from the Postal Telegraph Company. He recommended approval of the sale. The Chief Counsel concurred. The Commission approved the arrangement unanimously. (The contract of sale with the Myrtle Creek Telephone Company was signed later in the day).

A letter was presented from the Sweet Home Chamber of Commerce requesting that the designation of the North Santiam and the Santiam Highways be clarified on the Commission's road condition report, as issued weekly, so as to avoid confusion that exists when these highways are referred to by name.

The Chamber of Commerce suggests that these highways be referred to by their route number, U. S. Route No. 20 and State Route No. 222 rather than by name. The Commission instructed the Engineer to so clarify the road report.

The Commission considered an agreement with the Marion County Court providing for abandonment to the county of two short sections of the Pacific Highway East between Illahee and Stelwer Hill where the Highway has been permanently constructed on other alignment. The Engineer explained that these sections had been reconstructed a few years ago but the presentation of the agreement had been delayed until the section from Stelwer Hill to Albany had been completed. The Commission approved and, later in the day, signed the agreement.

The Commission considered the abandonment of portions of the old route of the Tiller-Trail Secondary Highway which no longer are of value for state highway purposes since the highway has been realigned. After due consideration the Commission by unanimous vote adopted the attached resolution

abandoning such areas, which resolution is marked EXHIBIT "F" and by this reference is made a part hereof with like effect as though extended herein.

The Commission also considered the abandonment of a portion of the Hope-Derry Ranch Section of the Vale-West Secondary Highway which is no longer of value for highway purposes because of construction of the highway on other alignment. The Engineer presented a map showing the old and new locations. After due consideration the Commission by unanimous vote adopted the attached resolution with respect to the disposition of the areas, which resolution is marked EXHIBIT "G" and by this reference is made a part hereof with like effect as though extended herein.

The Commission considered a letter from the Joseph Chamber of Commerce requesting that the Enterprise-Lewiston Highway be renamed as "Chief Joseph Trail," which name, they stated, was chosen as the result of a contest. The Engineer advised that Oregon, Washington, and Idaho all have different names for this highway and various other parties, also, have suggested renaming the highway. The Commission decided unanimously to retain the present name of this highway, "Enterprise-Lewiston Highway."

The Engineer presented a request from the City of Milton for authority to install, at city expense, a yellow and red blinker light at the intersection of South Main and Frazer Streets. The Engineer advised that a previous request for a signal at this point was denied by the Commission because the Traffic Engineer, in his report on the subject, declared it unnecessary in order to control traffic; however, the city still wants it to the extent that it is willing to install it at the city's cost and expense if the Commission will permit the installation. He recommended approval of the request subject to the condition that the signal is installed in conformity with state specifications and that the city will assume the maintenance of the light. The Commission approved the recommendation unanimously.

The Commission discussed a request from the City of Hillsboro for installation of two flashing beacons on the Tualatin Valley Highway at the intersections of Dennis Street and Oak Street with the Tualatin Valley Highway, in Hillsboro. The Engineer advised that three traffic lights previously have been installed in Hillsboro, and, in addition, the intersection at 10th Avenue and Base Line Road has been channellized. He recommended that the request be deferred for a few months in order to determine the effect of the installations that have been completed. The Commission unanimously approved the Engineer's recommendation.

The Engineer presented a request from the Southern Pcific Company for state cooperation in the installation of two flashing signals at the grade crossing of the Southern Pacific Tracks and the Albany-Lyons Secondary Highway at Crabtree, in Linn County. He stated that there have been five accidents at this crossing since 1941, two of which resulted in fatalaties. He recommended approval of the request on the condition that the state's cooperation shall be limited to 50 per cent of the cost of the entire installation, which is estimated at $4,150, and that the Railroad Company shall maintain the signals after they are installed. Action on this matter was deferred

by the Commission pending investigation and report from the Chief Counsel.

The Commission considered a request from "Gladstone Builders" for designation of a 35 mile-per-hour speed limit on U. S. 99E between Gladstone and Portland, and a 25 mile-per-hour speed limit within the City of Gladstone. The Engineer advised that the Pacific Highway East between Portland and Oregon City is constructed on a four-lane standard, designed to accommodate reasonably high speed traffic. He recommended that the petition be denied on the basis that the requested speed limitation would materially reduce vehicular capacity of the highway. The Commission unanimously approved the Engineer's recommendation.

The Engineer reported on a petition received from residents of Planerville, a suburb of Redmond, for the designation of a maximum speed of 25 miles per hour on The Dalles-California Highway through this district. He advised that Planerville is approximately one mile south of Redmond and that there is no improved frontage lying between the towns; further, that an investigation by the Traffic Engineer does not reveal sufficient roadside culture to warrant a 25 mile-per-hour zone. He recommended that the request be denied. The Commission unanimously approved the Engineer's recommendation.

The Engineer reported that numerous requests had been received for a speed-control zone on the Oregon Coast Highway through Wecoma, Ocean Lake, Delake, Nelscott, Taft and Cutler City. He stated that an investigation by the Traffic Engineer shows that the section in question which extends from mile point 125.06 to mile point 130.8, a distance of 5.74 miles, is almost a continuous residential and business area, and that during the past six years there has been a total of 260 accidents on this section which makes it one of the worst sections on this highway. He recommended that the existing 25 mile-per-hour speed limit through Ocean Lake be extended 0.35 mile southerly to include the section past Delake School; that a 25-mile-per-hour speed limit be ordered within the city limits of Taft, a distance of 0.39 mile; and that the balance of the section be zoned for a speed limit of 35 miles per hour. The Commission unanimously approved the speed limits as recommended by the Engineer with the stipulation that signs clearly warning motorists of a reduced speed zone ahead be placed at each end of each zone. The Commission thereupon by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT "H" and is by this reference made a part hereof with like effect as though extended herein.

The Commission confirmed a 50 per cent reduced load limit ordered by the Engineer on the Monmouth Secondary Highway, effective January 8, 1948, which was made necessary by extremely heavy rainfall during the month of December and the fore-part of January, and thereupon by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT "I" and is by this reference made a part hereof with like effect as though extended herein.

The Engineer requested authority to impose a 50 per cent reduced load limit on the entire length of the John Day-Burns Highway beginning on or about February 15, 1948. He advised that this highway is subject to severe

damage when the frost is leaving the ground in the spring if loads are not subjected to control, and that in the past it has been found necessary to impose load restrictions for a short time during the spring months. After due consideration of this matter, the Commission authorized the reduced load limit, as requested, and thereupon adopted the resolution which is attached hereto, marked EXHIBIT "J" and by this reference made a part hereof, with like effect as though extended herein.

The Commission considered rescinding the two percent tolerance allowed haulers of petroleum products during the war-time period. The Chief Counsel advised that the tolerance was allowed by the Commission at the request of the Army Air Corps and the Director of Defense Transportation to facilitate the movement of petroleum products from California to the Army Cantonments at Camp White and at Camp Abbott, but that conditions are now such that it no longer is required. He recommended, in order to keep the record straight, that the Commission now rescind its resolution of January 11, 1944. The Engineer concurred in the recommendation. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked EXHIBIT "L", and which by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from the Bend Chamber of Commerce urging immediate construction of the North Santiam Highway on permanent alignment on the north side of the North Santiam River between Mill City and Mehama, Marion County. The Engineer advised that this project is estimated to cost $750,000 but it will not involve purchase of any right of way because that has been acquired by Marion County. He further stated that the project is not included in any construction program to date. The Commission denied the request for lack of funds.

The Commission discussed briefly and referred to the Engineer for investigation and report a request from the City of Warrenton for the improvement of secondary state highways recently designated by the Commission within this city.

The Engineer presented a request from the Portland Gas and Coke Company for a 30-day extension of a permit, heretofore authorized by the Commission at its December meeting, granting to contract haulers certain special privileges in the transportation of liquid petroleum products from

California to Portland for the Portland Gas and Coke Company. The Engineer advised that the permit referred to granted a special overweight concession for a 30-day period that expired on January 31, 1948; however, the shortage of heating gas in the Portland area still continues, and railroad tank cars are still not available. He recommended that the present permit be extended 30 days as requested. The Commission unanimously granted the extension as recommended.

The Commission considered the cancellation of a log hauling permit issued to Harold H. McGee, Springfield, Oregon. The Engineer recalled that this matter had been considered by the Commission at its meeting on December 29 and 30, 1947, and that the Commission at that time ordered an itemized statement of all violations committed by Mr. McGee. He presented a list of such violations covering the years 1945, 1946 and 1947 together with a tabulation showing that McGee paid fines and court costs totaling $1,381.45, of which amount $1,155.35 had been assessed during the calendar year 1947. He also pointed out that Mr. McGee's permit had been cancelled in September 1945, for overloading and for refusal to allow his loads to be weighed when requested by the weighmasters. This permit, he said, was reinstated in October, 1945, based on Mr. McGee's letter to the State Highway Commission dated October 2, 1945, which stated in part, "in the future I shall, to the best of my ability, keep my loads to within the limits prescribed by law and shall submit to weighing whenever requested to do so". The Engineer recommended that Mr. McGee's permit be again cancelled on the basis of his poor record during 1947. The Commission approved the recommendation by unanimous vote and so ordered.

In this connection the Commission instructed the Engineer, hereafter to submit a complete report of violations in cases where he intends to recommend cancellation of a permit.

The Commission considered a form of permit and the adoption of a policy with respect to issuance locally of single - movement emergency transportation permits. The Engineer recalled that this subject previously had been discussed by the Commission at its December 1947, meeting, and that in November 1947, a group representing the heavy-hauling interests had appeared before the Commission requesting certain changes. Two conferences with officers and officials of the haulers have been held since that time, he said, the last one, in January 1948, resulting in agreement among the haulers as to what they really wanted. The Engineer explained briefly the recommendations which he and the Chief Counsel had determined upon, as outlined in the Engineer's letter of January 30, 1948, addressed to the State Highway Commission. (See letter in general files for details.) Commissioner Schaupp gave as his understanding that the Commission is primarily interested in protection of the highways and the issuance of permits to haulers with the least amount of delay and "red tape". Following discussion the Commission tentatively approved the recommendation and thereupon instructed the Chief Counsel to consult with the Engineer with respect to details and then prepare the regulations in the form of a resolution for adoption by the Commission at its next meeting.

The Commission also considered the adoption of permit forms covering construction of pole lines, telephone cables and conduits, and pipe lines upon state highway rights of way, and the granting of authority to the Director of Permits and his assistant to sign permits of this type. Specimen copies of the several forms were presented for the Commission's inspection. TheChief Counsel and the Engineer recommended adoption of the new forms for use hereafter in granting permits of this type. The Commission by unanimous vote approved the new permit forms but deferred for future consideration the matter of authorizing either the Director of Permits or the Utilities Permit Engineer to sign such permits, which function is handled by the Commission's Secretary under previous authorization from the Commission.(A copy of each of the above-mentioned permits is filed in the office of the State Highway Commission under the heading "Special Matters" as No. 26.)

The Commission also considered the granting of authority to the Director of Permits and the Permit Supervisor to sign Group I and Group II Emergency Transportation Permits. Action on this matter was deferred.

The Commission considered naming the ferry that operates across Coos River at a place known as Enogren Crossing. The Engineer advised that a number of local people have suggested that this vessel be named "Charles Enogren" in honor of a pioneer of that district. He recommended that the ferry be so named. The Commission unanimously approved the recommendation and instructed the Chief Counsel to prepare an appropriate resolution covering the matter.

The Commission discussed and unanimously approved the Engineer's request that authority be granted First Assistant State Highway Engineer W. C. Williams to attend a conference sponsored by the Highway Research Board at Salt Lake City during the first week in March, 1948. Mr. Williams has been asked to give a paper on the subject "Economics of Low Cost Roads in the Rocky Mountain Area and Plains State," and his expenses will be paid by the Research Board.

The Commission considered retaining in state service Mr. Roy V. Hollenberg, Requisition Supervisor, until January 1, 1949. The Engineer advised that Mr. Hollenberg will reach retirement age in March, 1948, and at the present time the Auditor does not have an employee in his organization who is capable of taking over Mr. Hollenberg's duties, particularly those which have to do with freight rates and tariff schedules. He recommended that Mr. Hollenberg be retained on the payroll until January 1, 1949 to allow time to train a replacement employee. The Commission unanimously approved the recommendation.

The Engineer advised that Mr. Paul Van Scoy, Division Engineer at La Grande, has resigned, effective April 15, 1948, so it will be necessary to appoint someone to take his place. He presented for the Commission's consideration a list of engineers selected in order of merit rating to replace Mr. Van Scoy, including Mr. C. H. Armstrong, former District Maintenance Engineer at Pendleton and now Assistant Maintenance Engineer at Salem, and Mr. E. F. Chidsey, Resident Engineer at La Grande,for this appointment. In the discussion the Engineer pointed out that Mr. F. D. Eason, Division Engineer, in

charge of the Salem district, has also reached retirement age and must be replaced on January 1, 1949. He suggested, in view thereof, that it would be logical and advisable to appoint Mr. Chidsey Division Engineer, as replacement for Mr. Van Scoy, and Mr. Armstrong as replacement for Mr. Eason. He recommended approval of such appointments, which, he said, have been made on the basis of merit and as the result of consultation among the members of the staff, due consideration also having been given to age of the employee and his length of service with the State Highway Department.

Chairman Banfield stated as his opinion that inasmuch as the selections have been recommended on the basis of merit, the Commission should not interfere in the selection of individuals for promotion, as that function, in his estimation, is a departmental responsibility. The Commission unanimously approved both appointments as recommended by the Engineer, upon motion by Commissioner Chandler which was seconded by Commissioner Schaupp.

The Commission discussed a date for its next regular meeting and decided to hold such meeting in Portland on Monday and Tuesday, March 22 and 23, 1948. The Secretary was instructed to make the usual arrangements to hold the meeting in the Green Room of the Imperial Hotel. (The meeting date was advanced later to Thursday and Friday, March 11 and 12, 1948.)

Messrs. A. B. Daisley and Frank McCully, representing the Joseph Chamber of Commerce, appeared before the Commission regarding the renaming of the Enterprise-Lewiston Highway. Mr. McCully was spokesman. He advised that the Chamber of Commerce has just completed a contest for a suitable and official name for this highway, in which numerous civic groups from Oregon, Idaho, and Washington participated. The majority, he said, favor the name "Chief Joseph Trail" because it is suitable from a historical standpoint and because it follows closely the old Indian trails across the Grand Ronde River to the Lewiston country in Idaho. He asked the Commission to approve such name for this highway so they can proceed with their plans to dedicate it with appropriate ceremonies next spring. Chairman Banfield advised that it is the established policy of the Commission to refer to the Oregon Historical Society all matters of a historical nature, so if that is the background of the request, such procedure will have to be followed. Commissioner Schaupp suggested no change in the present name of this highway but that the group consider the erection of markers along the route bearing the desired wording, as was done by a group which was behind the movement to rename certain highways in Western Oregon the "Applegate Trail". He offered a motion to that effect which carried by the unanimous vote of the Commission, it being understood, however, that the group would secure the Oregon Historical Society's approval of the wording for the markers.

The Commission considered a letter from the Oregon State Employees Association requesting reconsideration of the matter of authorizing payroll deductions to pay premiums to the West Coast Life Insurance Company for group insurance coverage for employees and their families. Commissioner Schaupp stated that to his knowledge the plan as proposed by the Association provides excellent coverage but is limited to members of the Association. The auditor, Mr. Malcolm Hawke, advised that the group insurance plan offered by the State

Employees Association is a better plan than that offered by the California-Western States Company in that it provides coverage for the employee's wife and children; moreover, the rates for the service rendered are slightly lower than those of the other company. He stated, however, that there is no room left on the accounting machines to insert another deduction in addition to the O. P. S., M. H. A., and C. W. S. deductions now carried. Chairman Benfield stated that if the association contract were made available to all State Highway Department employees rather than to Association members only, it would reduce the Commission's objections. The Commission by unanimous vote again denied the request.

The Engineer brought up for discussion a proposed agreement with the U. S. Army Engineers covering construction of an overpass structure on the Willamette Highway over the Southern Pacific Company's railroad tracks a short distance east of Pleasant Hill, Lane County. He advised that a revision of the Southern Pacific Company's facilities is necessitated by construction of the Lookout flood control dam and because the structure is on a state highway, the Army Engineers prefer that its design and construction be handled by the State Highway Department. The agreement, he said, provides for such procedure and that the Federal Government will reimburse the state for the full amount of its expense in connection therewith. He recommended approval of this arrangement and execution of the agreement so that bids for the structure can be received by the Commission at its next regular meeting in order to expedite construction of the structure so that it will be available for public use in the fall of 1948. The Commission approved the recommendation unanimously and thereupon signed the agreement.

The Commission considered and signed agreements etc. as follows:

Agreement with Mac Wilkins, Cole & Weber, covering services to be rendered in connection with the Highway Commission's Travel Bureau.

Agreement with Wasco County and the State of Washington covering the proposed construction of a toll bridge across the Columbia River near The Dalles.

Agreement with Washington County covering the use of the Beaverton-Cedar Mills Road, the Walker Road, and the Cornell Road by Porter W. Yett in connection with construction of the Sunset Highway.

Agreement with Marion County Court providing for abandonment of two short sections of Pacific Highway East, between Illahee and Steiwer Hill.

Agreement with U. S. Corps of Engineers covering proposed advance of $50,000 of State Highway Funds to finance construction of levees and channel-improvement work in the Walla Walla River.

Agreement with City of Creswell covering installation of a flashing beacon at the intersection of the Pacific Highway and Oregon Street.

Easement agreement with Fred Afalter, et al for a detour road for use during construction of new bridge over Salmon River at Otis, Lincoln County.

Agreement with Federal Government (U.S. Army Engineers) providing for construction of an overpass over the Southern Pacific Company's tracks on the Willamette Highway east of Pleasant Hill, Lane County.

Project Agreement with P. R. A. covering Clear Lake-Forest Boundary Sec., Warm Springs Highway, Wasco County.

Project Agreement with P. R. A. covering East Diamond Lake Junction-Lobert Sec. of The Dalles-California Highway, Klamath County.

Project Agreement wtih P. R. A. covering West Unit, Sheep Creek Hill Sec. of the Little Sheep Creek Highway, Wallowa County.

Project Agreement with P. R. A. covering Crane-Princeton Sec. of the Diamond Valley Highway, Harney County.

Project Agreement with P. R. A. covering Roseburg-Marks Ranch Sec. of the North Umpqua Highway, Douglas County.

Three deeds conveying unto the City of Portland several parcels of right of way acquired during wartime period to permit construction of access road to shipyards.

Deed conveying unto Mrs. Anna C. Foegeding 20 acres of land in Klamath County.

Lease conveying to Southern Pacific Co. certain encroachment privileges heretofore granted to the Company by Coos County between North Bend and Coos Bay.

Construction, Survey and Exploration Permit, U. S. Government, re traffic control on US 730 adjacent to the housing and dam site work area of McNary Dam, Umatilla County.

Contract of Sale with J. U. McGuire, disposing of telegraph line facilities formerly owned by Postal Telegraph Cable Co. on Pacific Highway in Southern Oregon.

There being no further business to come before the Commission at this time the meeting adjourned at 5:00 p.m.

T. H. Banfield

EXHIBIT "B1"

Minutes of February 2 and 3, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission is empowered and authorized under the laws of the State of Oregon to construct and maintain in Salem, Oregon, an office building for the use of the Highway Department, which said building must be located on a site approved by the Oregon State Board of Control; and

WHEREAS, Block 86 of the Original Plat of the City of Salem, Marion County, Oregon, has been selected, with the approval of the Oregon State Board of Control, as the site upon which to construct an office building for the use and accommodation of the State Highway Commission and the State Highway Department; and

WHEREAS, the Highway Commission has acquired by agreement with the owners most of the properties located in said block and needed as a site for the construction of said building, but there are four properties which the Commission has been unable to acquire by agreement; and

WHEREAS, the properties and the respective owners thereof concerning which and with whom agreements have not been reached are as follows:

Property, owned by Elizabeth E. Heenan, described as follows:

Lot Eight (8) of Block Eight-six (86) of the City of Salem, in the County of Marion and State of Oregon, according to the map or plat of the said City of Salem filed in the office of the Recorder of Conveyances for the County of Marion aforesaid;

Property, owned by Sarah Rise and Bernice M. Rise, described as follows:

Beginning at the northeast corner of Lot 10, Block 86 of Salem, Marion County, Oregon, and running thence southerly along the west line of an alley 92 feet; thence westerly and parallel with the northerly line of said block 45 feet; thence northerly and parallel with the west line of said alley 92 feet to the south line of Center Street; thence easterly along the south line of Center Street 45 feet to the place of beginning;

Property, owned by Floyd C. Crabtree, described as follows:

Beginning at the southeast corner of Lot 2, Block 86, Salem, Marion County, Oregon; thence westerly along the southerly line of

EXHIBIT "B1" (Con't)

said lot 165 feet to the southwest corner of said lot; thence northerly along the westerly line of said lot 50 feet; thence easterly and parallel with the southerly line of said lot 165 feet to the easterly line of said lot; thence southerly along the easterly line of said lot 50 feet to the place of beginning;

Property, owned by Floyd C. Crabtree, described as follows:

Beginning at the northwest corner of Lot One (1), Block Eight-six (86), Salem, Oregon, as the same appears upon the duly recorded plat thereof in the office of the County Recorder for Marion County, Oregon; running thence southerly along the east side of the alley 82 feet; thence easterly parallel with Center Street 60 feet; thence northerly parallel with the alley 82 feet to the south line of Center Street; thence westerly along the south line of Center Street 60 feet to the place of beginning, being parts of Lots One (1) and Two (2) in Block Eight-six (86) in Salem, Oregon;

and

WHEREAS, in the judgment of the Commission it is necessary that title to said properties be acquired and taken in the name of the State of Oregon, by and through its State Highway Commission, for use in connection with the construction and maintenance of said proposed office building; and

WHEREAS, the Commission has had said properties appraised by its regular appraisers with respect to their reasonable cash market value, and the Commission after due and deliberate consideration has found it advisable to instruct its Chief Counsel to offer to the owners of said respective properties the amounts of said appraisals;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the real properties above described are needed and necessary and ownership and title thereto must be acquired for use in connection with the construction and maintenance of an office building for the accommodation and use of the Highway Commission and the Highway Department;

2. That J. M. Devers, Assistant Attorney General and Chief Counsel for the Oregon State Highway Commission, is hereby authorized and instructed to negotiate further with the owners of said properties for the acquisition of the same for the purpose herein stated, and in connection with said negotiations said Counsel is authorized to offer to Elizabeth E. Heenan for a warranty deed conveying to the State of Oregon, by and through its State Highway Commission, the real property above described and owned by Elizabeth E.

EXHIBIT "B1" (Con't)

Heenan, free and clear of all encumbrances, including the 1947-1948 taxes, the sum of $18,500.00; and is likewise authorized, in connection with said negotiations, to offer to Sarah Rise and Bernice M. Rise for a warranty deed conveying to the State of Oregon, by and through its State Highway Commission, the real property above described and owned by Sarah Rise and Bernice M. Rise, free and clear of all encumbrances, including the 1947-1948 taxes, the sum of $11,000.00; and is likewise authorized, in connection with said negotiations, to offer to Floyd C. Crabtree for a warranty deed conveying to the State of Oregon, by and through its State Highway Commission, the real property above described and owned by Floyd C. Crabtree, free and clear of all encumbrances, including the 1947-1948 taxes, the sum of $22,000.00 for the parcel of real property first above identified as owned by Floyd C. Crabtree and the sum of $15,000.00 for the parcel of real property second above identified as owned by Floyd C. Crabtree;

3. In the event Counsel is unable to acquire said properties, or any one of the same, by agreement on the basis of the above specified considerations and appraisals, then Counsel is authorized to institute and prosecute condemnation actions for the purpose of acquiring said property or properties for the purpose herein set forth;

4. That if condemnation proceedings are found to be necessary, then such proceedings shall be instituted and prosecuted in the name of the State of Oregon, by and through its State Highway Commission, or in the name of the State of Oregon, by and through its State Board of Control, as may be approved and directed by the Attorney General of the State of Oregon;

5. That in the event said properties, or any of them, must be acquired by the exercise of the power of eminent domain, then J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is authorized and empowered to make such stipulation, agreement, or admission in connection with the trial or court procedure connected with or prosecuted for the acquisition of said properties, or any interest therein, as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners;

6. This resolution shall be entered in full in the minutes and records of this Commission as of the second day of February, 1948.

FEB 2 1948

14641

EXHIBIT "B2"

Minutes of February 2 and 3, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway. and or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by William C. Morris, et al., which property is located in Government Lot 9 ($NW\frac{1}{4}$ of the $SW\frac{1}{4}$) of Section 2, Township 27 South, Range 13 West, W. M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as

FEB 2 1948

EXHIBIT "B2" (Con't)

file R 14105, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway. *

Real property owned by John Meek, which property is located in the northeast quarter (NE¼) and the southeast quarter (SE¼) of Section 25, Township 36 South, Range 6 East, W. M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2 and 3, Parcel No. 2 being acquired for right of way purposes in connection with the Klamath Lake Secondary Highway and Parcel No. 3 being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with said highway, which property is identified in the records of the Highway Commission as file R 13302; *

Real property owned by Jerry T. Vickers, which property is located in the southeast quarter (SE¼) of the northeast quarter (NE¼) of Section 12, Township 9 South, Range 27 East, W. M., Grant County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 14260, which property is being acquired for right of way purposes in connection with the Kimberly-Long Creek Highway; *

Real property owned by Frank Hussey, which property is located in Lot 9 of the southwest quarter (SW¼) of Section 36, Township 35 South, Range 7 West, W. M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 13991, which property is being acquired for right of way purposes in connection with the Rogue River Loop Highway; *

Real property owned by the heirs of J. A. Jacques, which property is located in the southeast quarter (SE¼) of the northeast quarter (NE¼) of Section 35, Township 32 South, Range 6 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 14324, which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the Pacific Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties,

EXHIBIT "B2" (Con't)

and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the second day of February, 1948.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 100 under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

Sumpter	842.36
Wallowa	1,680.71

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Canyon City - Washington Street

Gaston - Church Street, Park Street

Gearhart - 6th Street

Sodaville - Fisher Street, Vine Street, Alder Street

Sumpter - West High Street, East High Street, West North Street, Granite Street, Auburn Street, Austin Street, Mill Street, Cracker Street

Wallowa - Pine Street, Spruce Street, 2nd Street, 3rd Street, 4th Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named

EXHIBIT "C" (Con't)

respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 2nd day of February, 1948.

FEB 2 1948

EXHIBIT "D"

Minutes of February 2 and 3, 1948

RESOLUTION

WHEREAS, by the enactment of Chapter 425, Oregon Laws 1947 the legislature in section 2 of said act provided as follows:

"Section 2. Beginning with the year 1947 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 10 per cent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O.C.L.A.; section 15, chapter 413, Oregon Laws 1945; section 115-528, O.C.L.A., in the event it becomes law; section 29 of house bill No. 175 of the forty-fourth legislative assembly, and from fines and penalties collected for violations of the motor vehicle and transportation laws. Such appropriation shall be distributed among the several cities as provided in this act; but in no event shall payment under this act be made to cities for any year unless more than $11,000,000 is credited to such fund, and allocations hereunder shall be made to cities only from any excess over $11,000,000 credited to such fund in any year.";

AND, WHEREAS, the legislature by section 3 of the said act provided as follows:

"Section 3. Such appropriation shall be allocated to the cities as follows: The sum of $250,000 shall be withdrawn from such appropriation and set up in a separate account to be administered by the state highway commission. Such account shall be spent each year by such commission upon streets not a part of the state highway system within cities which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. Such commission shall determine the distribution of such expenditures after considering applications made to it therefor from the cities. The balance remaining in such appropriation after the withdrawal of said $250,000 shall be distributed to all of the cities. Each city shall receive such share of the balance as its population bears to the total population of the cities.";

AND WHEREAS, the moneys which have been credited to the state highway fund by the State Treasurer covering the period of January first to

FEB 2 1948

EXHIBIT "D" (Con't)

December thirty-first, inclusive, of the year 1947, which funds have accrued from sources designated in said legislative act, amount to $26,633,287.93 and are derived from funds accruing from the following sources:

Section 115-135, O. C. L. A. (motor vehicle license fees)	$ 4,949,150.25
Section 15, Chapter 413, Oregon Laws 1945 (gasoline tax)	18,473,988.99
Section 115-528, O. C. L. A., and Section 29, Chapter 467, Oregon Laws 1947 (motor carrier fees)	2,996,797.52
From fines and penalties collected for violations of the motor vehicle and transportation laws	213,351.17
	$ 26,633,287.93

AND, WHEREAS, the ten percent of the $26,633,287.93, which is available for appropriation to the cities and towns amounts to $2,663,328.79; and

WHEREAS, after withdrawing the sum of $250,000.00 as provided in said act, which sum is to be administered by the State Highway Commission within the meaning of Section 3 of said Chapter 425, Oregon Laws 1947, there remains a balance of $2,413,328.79, which balance is, in response to the command of said statute, to be distributed among the cities of the State; each city being entitled to receive such share of said balance as its population bears to the total population of the cities; and

WHEREAS, by applying the factors of allocation or distribution provided for in said Chapter 425, Oregon Laws 1947, the State Highway Commission has determined upon an apportionment of said funds among the several cities and towns of the State as shown in the tabulation given below;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the funds made available for distribution among the cities of the State pursuant to said law should be and are allocated and apportioned to the cities named below in the amounts set opposite the names of the respective cities:

Minutes of February 2 and 3, 1948

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

Monument-Hamilton Section of the Kimberly-Long Creek Secondary Highway in Grant County.

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above-mentioned section of state highway, together with the maps, which for identification purposes bear the map file No. 6B-25-17 and 18, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the third day of February, 1948.

FEB 3 1948

Minutes of February 2 nd 3, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the Tiller-Trail Secondary Highway, otherwise designated as State Highway No. 230 in Douglas County; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as originally located are eliminated and will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the units or sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section of the Tiller-Trail Secondary Highway known as the Day's Creek-Tiller Section, which begins at Highway Engineer's Station 379+84 on the new route and ends at Highway Engineer's Station 1234+63.8 of the new route, has been completed and has been made available for travel, and, therefore, the section of the old route herein defined and described as Unit "A" is no longer a part of the route of the Tiller-Trail Secondary Highway and is, therefore, eliminated therefrom.

2. That part of the sections of the old route of the Tiller-Trail Secondary Highway lying outside the established right of way of the relocated highway, which for the purpose of this resolution is identified as Unit "A" and is more particularly described as follows:

FEB 3 1948

EXHIBIT "F" (Cont'd.)

Unit "A"

Beginning at State Highway Engineer's Station 521+50 of the new route of the Tiller-Trail Secondary Highway in the Southwest quarter (SW¼) of the Northeast quarter (NE¼) of Section 22, Township 30 South, Range 4 West, W.M.; thence northwesterly via the former route of the Tiller-Trail Secondary Highway to State Highway Engineer's Station 533+50 of the relocated Tiller-Trail Secondary Highway in the Northeast quarter (NE¼) of the Northeast quarter (NE¼) of Section 22, Township 30 South, Range 4 West W.M.

shall be and hereby is abandoned as part of said highway and hereafter shall be under the jurisdiction and control of the County and may be vacated or kept by the County for such public use as the County may determine, or may permit said right of way to revert to the proper abutting owners.

3. There is attached hereto and made a part hereof a white print on which there is shown colored in brown the section of the old route of the Tiller-Trail Secondary Highway herein designated as Unit "A" which unit pursuant to the terms of this resolution is eliminated as a part of the right of way as now located. All other portions of the old highway between the aforesaid Station 379+84 and Station 1234+63.8 are to be retained by the Highway Commission for highway right of way and for other highway or other public purposes and uses.

4. That this resolution be entered in the minutes and records of the Highway Commission and a certified copy thereof delivered to the County Court and to the County Clerk of Douglas County.

FOOTNOTE:

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 175, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

14656

EXHIBIT "G"

Minutes of February 2 and 3, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the Vale-West Secondary Highway, otherwise designated as State Highway No. 451, in Malheur County; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as originally located are eliminated and will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and

WHEREAS, the State Highway Commission and the County of Malheur entered into an agreement dated November 19, 1947, in which there is set forth the disposition which is to be made of certain portions of the right of way of the then location when the highway is completed over the new location and thrown open to travel. The new location or section has been completed and is now open to traffic; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the units or sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION as follows:

1. That the section of the Vale-West Secondary Highway known as the Hope-Derry Ranch Section, which begins at Highway Engineer's Station 87+38 on the new route and ends at Highway Engineer's Station 397+30 of the new route, has been completed and made available for travel, and that the sections of the old route herein defined and described as Units "A", "B", "C","D","E","F", and "G" shall no longer be part of the route of the Vale-West Secondary Highway but shall be eliminated therefrom.

2. Those parts of the sections of the old route of the Vale-West Secondary Highway lying outside the established right of way of the relocated highway which for the purpose of this agreement are identified as Units "E" and "G" and are more particularly described as follows:

FEB 3 1948

14657

EXHIBIT "G" (Cont'd.)

Unit "E"

Beginning at State Highway Engineer's Station 302+00 of the relocated Vale-West Secondary Highway in the Southwest quarter ($SW\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 20, Township 18 South, Range 44 East, W.M.; thence Easterly via the former route of the Vale-West Secondary Highway to State Highway Engineer's Station 307+00 in the Southeast quarter ($SE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 20, Township 18 South, Range 44 East, W.M.

Unit "G"

Beginning at State Highway Engineer's Station 341+40 of the relocated Vale-West Secondary Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 29, Township 18 South, Range 44 East, W.M.; thence Easterly via the former route of the Vale-West Secondary Highway to State Highway Engineer's Station 347+80 of the relocated Vale-West Secondary Highway in the Northwest quarter ($NW\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 28, Township 18 South, Range 44 East, W.M.

shall be and hereby are abandoned as parts of said state highway, but said units shall nevertheless be a public highway and shall be maintained as such under the jurisdiction of said County Court pursuant to said agreement dated November 19, 1947.

3. Those parts or sections of the old route of the Vale-West Secondary Highway lying outside the established right of way of the relocated highway, which for the purpose of this agreement are identified as Units "A", "B", "C", "D", and "F" and are more particularly described as follows:

Unit "A"

Beginning at State Highway Engineer's Station 816+00 of the Central Oregon Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 5, Township 19 South, Range 44 East, W.M.; thence Northwesterly via the former route of the Vale-West Secondary Highway to State Highway Engineer's Station 96+70 of the relocated Vale-West Secondary Highway in the Southwest quarter ($SW\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 5, Township 19 South, Range 44 East, W.M.

Unit "B"

Beginning at State Highway Engineer's Station 126+00 of the relocated Vale-West Secondary Highway on the line between the Southeast quarter ($SE\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 6,

Township 19 South, Range 44 East, W.M., and the Southwest quarter ($SW\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 5, Township 19 South, Range 44 East, W.M.; thence Northerly via the former route of the Vale-West Secondary Highway to State Highway Engineer's Station 132+20 of the relocated Vale-West Secondary Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 6, Township 19 South, Range 44 East, W.M.

Unit "C"

Beginning at State Highway Engineer's Station 180+00 of the relocated Vale-West Secondary Highway in the Southwest quarter ($SW\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 31, Township 18 South, Range 44 East, W.M.; thence Northwesterly via the former route of the Vale-West Secondary Highway to State Highway Engineer's Station 188+50 of the relocated Vale-West Secondary Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 31, Township 18 South, Range 44 East, W.M.

Unit "D"

Beginning at State Highway Engineer's Station 226+50 of the relocated Vale-West Secondary Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 25, Township 18 South, Range 43 East, W.M.; thence Northerly via the former route of the Vale-West Secondary Highway to State Highway Engineer's Station 250+00 of the relocated Vale-West Secondary Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 25, Township 18 South, Range 43 East, W.M.

Unit "F"

Beginning at State Highway Engineer's Station 306+10 of the relocated Vale-West Secondary Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 29, Township 18 South, Range 44 East, W.M.; thence Easterly via the former route of the Vale-West Secondary Highway to State Highway Engineer's Station 311+50 of the relocated Vale-West Secondary Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 29, Township 18 South, Range 44 East, W.M.

shall be and hereby are abandoned as parts of said highway and hereafter shall be under the jurisdiction and control of the County and may be

EXHIBIT "G" (Cont'd.)

vacated or kept by the County for such public use as the County may determine.

4. There is attached hereto and made a part hereof a white print on which there are shown colored in red the sections of the old route of the Vale-West Secondary Highway herein designated as Units "E" and "G", which units pursuant to the terms of this agreement are to be eliminated from the route of the Vale-West Secondary Highway and maintained by the County, and shown colored in brown are the sections of the old route of the Vale-West Secondary Highway herein designated as Units "A", "B", "C", "D", and "F", which units pursuant to the terms of this agreement may be vacated by the County. There are also shown on said map colored in green the rights of way or real properties which are to be retained by the Highway Commission for highway right of way and for other highway or other public purposes and uses. *

5. That this resolution be entered in the minutes and records of the Highway Commission and a certified copy thereof delivered to the County Court and to the County Clerk of Malheur County.

FOOTNOTE:

*The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 176, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Minutes of February 2 and 3, 1948

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of statehighways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320,O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

ORDER REDUCING MAXIMUM LOAD LIMIT

on the

MONMOUTH STATE SECONDARY HIGHWAY

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state Highway, to-wit;

MONMOUTH SECONDARY STATE HIGHWAY NO. 194

AND, WHEREAS, the above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

AND, WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said road was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of the said highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

FEB 3 1948

14663

EXHIBIT "I" (Cont'd.)

The maximum weights which shall apply to the following highway, to-wit:

MONMOUTH STATE SECONDARY HIGHWAY NO. 194 from Monmouth to Kings Valley Secondary Highway No. 191 in Polk County,

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four-hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three-hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed fifty (50) percent of the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394 O.C.L.A., shall be in full force and effect from the 8th day of January, 1948 until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Court of Polk County and a like copy to the County Clerk of Polk County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this third day of February, 1948.

ORDER REDUCING MAXIMUM LOAD LIMIT

on the

JOHN DAY-BURNS STATE PRIMARY HIGHWAY

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

JOHN DAY-BURNS STATE PRIMARY HIGHWAY NO. 48

AND WHEREAS, the above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highway during the spring months when the frost is leaving the ground, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced during such period;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon said road during the spring months shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said road was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highway that the maximum total weight of load and vehicle which shall be permitted upon said road during the spring period commencing February 15, 1948, shall be reduced so as to comform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to-wit:

EXHIBIT "K"

Minutes of February 2 and 3, 1948

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2772 with Sound Construction and Engineering Company for grading on the Berger Ranch-Barnes Road Section of the Sunset Highway in Washington County, completed September 26, 1947.

Contract No. 2901 with Tom Lillebo for Bridge Construction on the Depot Slough on the Corvallis-Newport Highway in Lincoln County completed January 22, 1948.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

FEB 3 1948

EXHIBIT "L"

Minutes of February 2 and 3, 1948

R E S O L U T I O N

WHEREAS, the Commission, on January 11, 1944, passed a resolution providing, for the duration of the war, a two per cent tolerance on the maximum gross load capacity of vehicles carrying petroleum; and

WHEREAS, the war emergency is ended and no good reason appears for the continuance of such tolerance, and Chapter 266, Oregon Laws, 1943, has expired by operation of law,

NOW, THEREFORE, Be It and It Hereby is Resolved by this Commission, all members being present and affirmatively voting as follows:

1. That the action taken by this Commission on January 11, 1944, with reference to the two per cent tolerance in the load limits of vehicles carrying petroleum products, be and the same hereby is rescinded.

2. That a certified copy of this resolution be given to the Superintendent of State Police, and to all weighmasters.

3. That this resolution be entered in the minutes and records of this Commission, as of February 3, 1948.

Portland, Oregon
March 11, 1948

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Malcolm H. Hawke, Chief Auditor
George W. Neuner, Assistant Counsel
H. B. Glaisyer, Secretary

Bids for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

* Bidder will not accept award of projects totaling more than $170,000.00.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

1. Renewal of juniper wayside agreements with the U. S. Department of the Interior, Bureau of Land Management, along the following state highway sections:

Central Oregon Highway between Horse Ridge and Bend
McKenzie Highway between Sisters and Redmond
Ochoco Highway between Redmond and Prineville

The Parks Superintendent advised that the present agreement with respect to the Bend-Horse Ridge Section expires on March 20, 1948, and that the agreement with respect to the other sections expires on July 23, 1948. He recommended approval of a one-year extension of each of these agreements. The Commission approved the recommendation by unanimous vote. (Field agreements covering the matter were executed by the Commission on the following day.)

2. Proposed lease of additional Government lands located in The Cove State Park: The Parks Superintendent recommended the leasing of such lands from the Soil Conservation Service of the Department of the Interior under the provisions of the Recreational Act. He advised that these lands are located within the borders of The Cove State Park and are needed in connection with operation of the park. He also advised that no cost is involved and that the acquisition of the areas will provide additional frontage on the Metolius, Deschutes, and Crooked Rivers. The Commission approved the recommendation unanimously.

3. Renewal of a lease with Mr. J. H. Turner covering the grazing of 40 head of sheep in Cape Sebastian State Park: The Parks Superintendent advised that Mr. Turner has been granted this privilege for

several years, for which he has paid the sum of 50 cents per head per year. He recommended approval of the extension for another year on the same basis. The Commission unanimously approved the recommendation.

4. Acquisition of property from Clatsop County as an addition to Ecola State Park at Tillamook Head: The Parks Superintendent reported receipt of a deed from the county conveying an 80-acre tract of land at this location, pursuant to previous agreement and understanding. He recommended acceptance of the deed by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto marked EXHIBIT "A" and by this reference made a part hereof with like effect as though extended in full herein.

5. Report on the death of Mr. George Geisendorfer, former owner of Cascadia State Park: The State Parks Superintendent reported that Mr. Geisendorfer, from whom the Commission acquired Cascadia State Park, passed away a short time ago. He recalled that as part consideration for the purchase of the area the Commission was required to pay Mr. Geisendorfer $50 monthly during his lifetime, which payments now cease. The Commission took no action on the matter.

6. Request of Mr. King Sweet to maintain binoculars on the seawall at Depoe Bay: The Parks Superintendent recommended that the request be denied because it not only would establish an undesirable precedent but would also have a tendency to attract crowds which very likely would result in the creation of a serious traffic hazard at this popular resort. The Commission approved the recommendation unanimously.

In this connection the Engineer reported a request from Mr. Stanley Allyn for permission to construct a platform on state highway right of way adjacent to the Depoe Bay Bridge for the accommodation of the general public and to provide access facilities to the ticket office of "Tradewinds Trollers", which he owns. He exhibited a drawing showing the plan of the platform and explained details. He gave as his belief that such a platform would not detract from the appearance of the highway or be objectionable in any way, provided it is maintained properly, and he recommended approval of Mr. Allyn's request on the condition that he will construct the platform in accordance with plans and under the supervision of the State Highway Department and will maintain it in accordance with instructions he may receive from this Department, with the understanding that if he fails to do so the state may remove the platform without the assumption of any liability whatsoever. The Chief Counsel advised that the Commission has authority to grant this request if it so desires. He gave as his opinion that if the platform is properly constructed and maintained and if the general public which uses it is properly safeguarded, it will prove to be a facility which will contribute greatly to the enjoyment of tourists who use the coast highway and who enjoy watching the fishing boats enter and leave Depoe Bay. He concurred in the Engineer's recommendation.

In the discussion Chairman Banfield expressed his feeling that it would be satisfactory to grant this permit, if the state does not incur

any liability either now or later on with regard to it. Commissioner Schaupp expressed himself similarly. As the result of this discussion the Commission approved the recommendation by unanimous vote, subject to the conditions mentioned by the Engineer and also subject to the condition that the applicant will furnish public liability insurance in the amount of $50,000 and $100,000 to indemnify and save harmless members of the Highway Commission, its employees and agents, in the event that an accident should occur by reason of the operation of such platform. The Chief Counsel was instructed to prepare an appropriate form of permit covering the matter.

7. Suggestion of the Oregon Coast Association regarding prohibiting overnight camping in state parks: The Parks Superintendent presented a letter from the Association urging "that the law prohibiting overnight camping in state parks and along our highways be enforced by our State Police". He requested instructions, however, pointed out that it has never been the practice of the Commission to allow overnight camping in state parks. As a result of discussion the Commission ordered that the Oregon Coast Association be informed that the Commission has not in the past and is not now permitting overnight camping in its park facilities, neither has the Commission authorized any such use of its wayside tracts, and if the Association knows of cases where such use of the state's property is being made, it should call them to the attention of the State Police, which has power and whose duty it is to act in the premises.

8. Offer of Mrs. H. O. Mansfield, St. Helens, to sell to the state a tract of land in St. Helens for park purposes: The Parks Superintendent advised that the Mansfield tract consists of about 50 acres of land, for which she is asking the sum of $30,000. The tract is located within the city limits, he said, and is a beautiful area; however, it does not fit into the state park picture because of its location. He recommended that the offer be declined. The Commission approved the recommendation unanimously.

9. Acquisition of Sunset Bay Park area from Coos County for state park purposes: The Parks Superintendent advised that, pursuant to instructions from the Commission at the previous meeting, he has discussed with the Coos County Court the restrictions contained in the deed as previously submitted and now has received a new deed which contains only one restriction, which is that the area must be used for state park and recreational purposes; otherwise, it reverts back to the county. The Chief Counsel advised that he has examined this deed carefully and, in his estimation, it now meets the Commission's requirements. Both he and the State Parks Superintendent recommended acceptance of the deed. Motion was made by Commissioner Chandler that the deed be accepted on the basis of the recommendation. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

In this connection the Parks Superintendent advised that a Mr. L. A. Smith, Coos Bay, Oregon, has made application to operate a

concession in this park, including provision for a pony circle, a boat house, and boat rentals. As a consideration for this privilege, he said, Mr. Smith will pay $200 up to $2,000 intake and ten percent for all additional intake in excess of $2,000 per season. The Commission decided unanimously not to grant Mr. Smith's request on the basis of his application, however, instructed the Parks Superintendent to prepare and submit a plan for the operation of this area on a concession basis in the event he wishes to allow use of this park in such manner.

10. Status of acquisition of Rogue River O. & C. Lands by exchange for Jackson County lands: The Parks Superintendent reported that an exchange of these properties involving some 320 acres and the payment of $1,600 to Jackson County has been completed pursuant to authority previously given by the Commission. He explained that the 320 acres consists of four tracts of land located between Trail and Prospect. The Commission approved the report.

11. Offer of Mr. L. M. Christensen to deed to the state one acre of ocean frontage at Yachats: The Parks Superintendent presented Mr. Christensen's offer, which, he said, is in the nature of a gift. He explained that the one acre consists of small fragments of land lying between the existing park road and the ocean beach just south of the Yachats River at Yachats. The question arose in the minds of the Commission whether or not the deed of conveyance would contain provision that would obligate the state to police the area and to do other things that might be required to stop the dumping of rubbish and debris on the beach frontage as is now being done by some people. The Commission decided unanimously not to accept the property unless it is deeded to the state unconditionally.

12. Proposal of Brookings-Harbor Chamber of Commerce that the state acquire a small park area situate on the ocean beach at Brookings: The Parks Superintendent advised that this matter was before the Commission previously and the proposal submitted at that time was turned down because the area is small and because it would cost a considerable amount of money to construct a roadway into the property; moreover, the state now owns a park of 141 acres about one mile north of Brookings which has a 3/4 mile frontage on the ocean and is available and accessible to the general public. He recommended that the offer be declined. The Commission approved the recommendation unanimously. (A delegation from Brookings which was scheduled to appear before the Commission on the following day concerning this subject was not present because of the illness of one of its members.)

13. Request of the State Forester for permission to construct a forestry headquarters in Wallowa Lake State Park: The Parks Superintendent recommended approval of this request on the condition that the building be erected in the park in a location acceptable to him. The Commission approved the recommendation.

14. Proposed sale of burned timber along the Wilson River Highway near McNamar's Camp: The Parks Superintendent advised that the State

Forester is now selling some timber along this highway and has offered to include in the sale burned timber belonging to the State Highway Department if the Highway Commission so desires. He advised that there are about 285 M-FBM of this timber which the State Forester believes he can sell for at least $2 per thousand; in fact, he will not sell it at a lesser rate. The Parks Superintendent recommended acceptance of the offer. The Commission by unanimous vote authorized the Parks Superintendent to negotiate the sale of this timber.

15. Employment of State Park Supervisors: The Parks Superintendent requested authority to employ two division supervisors to act as field superintendents in state park matters. He advised that provision has been made in the 1948 Budget for the employment of five such supervisors, but he is asking for authority to employ only two of them at the present time. The Commission by unanimous vote approved the employment of two supervisors as a temporary expedient, it being understood that employment of three additional supervisors will be considered at a future time.

16. Report on cost to survey boundaries of certain state parks: The Parks Superintendent submitted a list of state parks which he wishes to have surveyed in order to determine the boundary lines, as follows:

STATE PARKS DEPARTMENT
LIST OF PROPOSED SURVEYS AND
ESTIMATED COST OF EACH

			Miles

(R & Br. - Rough and heavy brush $ 150.00)

He estimated the total mileage of boundary line to be established at 128.5 miles and the cost to conduct the surveys at $14,625. He requested authority to arrange with the Engineer to have the surveys made. The Commission instructed him to present to the Engineer a list of the proposed surveys arranged in the order of their importance. The Engineer was instructed to check the cost estimates and report back to the Commission when final instructions will be given.

Messrs. Evan E. Peterson, City Manager, and H. Oscar Gulovsen, City Recorder, representing the City of Coos Bay, appeared before the Commission regarding an exchange of properties along the water front in the City of Coos Bay. Mr. Peterson was spokesman. He gave as his understanding that it would be necessary for the State Highway Commission to acquire additional right of way for the proposed improvement of the Oregon Coast Highway southerly from the improvement that is now under way by contractor Porter W. Yett in their city, including land owned by the city and property which lies between the highway location and the water front. He advised that the city is willing to deed a right of way to the state across the city-owned land, but in exchange therefor would like the state to deed to the city some of the water front property so the city can develop it as dockage sites for small boats and otherwise beautify the premises. He exhibited a map showing the areas under discussion and pointed out that the section the city is particularly interested in extends from Central Avenue to Ferry Street. He requested favorable consideration by the Commission in the matter of exchanging those properties and suggested that someone be given authority to act for the Commission to effect the exchange.

Commissioner Chandler explained that the right of way mentioned by Mr. Peterson is that required in connection with construction of the proposed northbound traffic lane, all of which is within the city limits, and is just south of the Porter Yett contract. He pointed out that the construction of this project has not been authorized by the Commission and

advised that the city's primary motive in proposing the exchange of properties is to protect the city's interests and to provide for beautification of the water front. The Commission expressed a desire to cooperate with the city insofar as is possible, however, not to the extent that it would authorize someone to approve exchanges on behalf of the Commission. The Engineer was thereupon instructed to furnish the Right of Way Department with descriptions of the properties needed by the state for right of way and other purposes, and the Chief Counsel was authorized to negotiate exchanges and report the results thereof to the Commission, when final action will be taken.

The Assistant Counsel, Mr. J. W. DeSouza, presented for the Commission's consideration a list containing recommended offers of settlement for properties that are needed as right of way for various highway improvements throughout the state and for other purposes, together with options obtained for each tract. This matter was discussed thoroughly by the Commission, each individual settlement being given careful consideration. As a result thereof the Commission approved the acquisition of the properties at the amounts stated in the options and by unanimous vote adopted the attached resolution with regard thereto marked EXHIBIT "B" which by this reference is made a part hereof with like effect as though extended in full herein.

The following notes refer to the above-mentioned resolution titled EXHIBIT "B":

* The Commission approved the amounts of the options secured for the acquisition of right of way for the cooperative project on the Pacific Highway in the City of Eugene on the condition that the City of Eugene approves, in writing, the settlements as listed and will also approve, in writing, the settlements previously negotiated and the purchases previously made for right of way required for this project.

** Item No. 14074, acquisition of right of way and easement from George and Gladys I. Klemsen for the Oregon City-New Era Section of the Pacific Highway East: This settlement was approved by the Commission upon assurance from the Chief Counsel that the Commission has authority to prohibit southbound traffic from crossing the northbound traffic lanes in order to enter the Klemsen property.

In this connection the Chief Counsel reported on a proposed settlement with Mr. Durwood Criteser for right of way needed for the Oregon City-New Era improvement. It appears that the Criteser property is situate near the summit of the New Era Hill and that improvement of the highway will involve the construction of a retaining wall which will cost about $12,000. Mr. Criteser does not want to sell his property, and the state cannot condemn it because it is not all needed for the highway improvement. The Chief Counsel advised that an option in the amount of $10,000 was obtained from Mrs. Criteser covering the entire tract; however, Mr. Criteser was not present at the time the negotiations were carried on and upon his return he advised that he previously refused an offer of $11,000 for his holdings, but he is willing to sell for $10,000 if the Highway Commission will let him retain possession of his house, which he proposes to move to another location; moreover, he is willing to pay $300 for this house. The Chief Counsel

recommended, in view of the circumstances, that the Commission could afford to let Mr. Criteser have the house without charge, particularly in view of the saving of $12,000 that would accrue because it would not be necessary to build the retaining wall. The Commission approved the recommendation unanimously.

+Right of way needed in connection with sidewalk construction on the West Slope-Beaverton Section of the Tualatin Valley Highway: The Commission approved the settlements listed on advice from the Engineer that the sidewalks are being constructed only as replacements of existing sidewalks.

The Assistant Counsel was instructed hereafter to include in his reports on the status of right of way acquisition full information with respect to right of way required for each project. The Engineer was instructed hereafter to include in his estimates of cost to construct any particular project every conceivable item of expense including construction, right of way, landscaping, etcetera, so that when the Commission allocates a certain sum for the project it will know that every item of expense is provided for and it will not be necessary to increase the allocation later on. The Engineer pointed out that in order to comply with this instruction it will be necessary to make surveys in advance. He requested authority to proceed with making such surveys. He was instructed by the Commission to report to it a list of the proposed surveys in this category. The Commission will then give definite instructions whether or not to proceed with the surveys.

*** Items Nos. 14338, 14339, 14340, and 14341, acquisition of right of way needed for widening the Oswego-Oregon City Section of the Oswego Highway: The settlements as listed were approved by the Commission by unanimous vote on assurance from the Engineer that this will complete acquisition of extra right of way insofar as it concerns the portion of highway already reconstructed. The Engineer advised that if and when this highway is further improved it will be necessary to acquire additional right of way.

++ Items Nos. 14318 and 14319, acquisition of right of way needed for sidewalk construction along the Children's Home-Garden Road Section of the Albany-Corvallis Highway: The Commission approved the settlements as listed on assurance from the Engineer that no further right of way acquisitions are needed for this purpose.

**** Item No. 11208, acquisition of house and lot in the City of Arlington: The Commission approved this purchase, it being the understanding from the report of the Engineer that the house is needed as a headquarters for State Police officers and radio, and that the Department of State Police will pay rental for the use of the premises.

***** Item No. 4380, Agate Beach Inn property: The Commission approved payment of $7,000 for right of way and easement as disclosed in the resolution; however, the Chief Counsel reported later in the session

that complications had arisen because the property is encumbered by two mortgages, a first mortgage being held by the original owners of the property and the second by a resident of Albany. It appears that the second mortgage is being foreclosed, and there is a possibility that the state will have to pay out an additional sum in order to satisfy this mortage unless the holders of the first mortgage will satisfy the account. It also appears that the holders of the first mortgage are two olderly women, who reside in the State of California and who are not in the best of health, so it probably will be necessary to send someone to California to discuss the matter with them personally. The Chief Counsel requested authority for Mr. Ray Landon of the Right of Way Department to go to California at state expense for this purpose, if necessary, and also to negotiate a settlement with the second mortgagee. The Commission approved the requests by unanimous vote. The Chief Counsel was instructed to report back the results of these renegotiations.

In the discussion of the properties listed in the above-mentioned right of way resolution the Commission also considered the following matters:

(1) Acquisition of right of way needed for improvement of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway in Tillamook County: The Assistant Counsel presented options for properties that are needed for this improvement, and explained that the settlements do not include right of access. The Commission considered that this section of highway is of such importance that access thereto should be limited. In view thereof, the settlements were referred back to the Right of Way Department to renegotiate acquisition of right of access.

The discussion of this matter revealed an uncertainty whether or not the Commission previously had authorized securing of right of access in connection with other projects of this nature. Chairman Banfield gave as his opinion that the Commission had previously ordered acquisition of limited access on any new highway project, such action, as he recalled, having been taken about two years ago. In any event, hereafter such limited access should be acquired in connection with any new highway improvements. The Secretary was instructed to search the records to ascertain whether or not the Commission previously had made an order in this regard.

(2) Acquisition of right of way needed in connection with the construction of the Front Street Project in the City of Portland, particularly that required of Vernon B. Barnes, for which an option in the amount of $41,500 has been obtained, and that required from Margaret M. Spencer for which a right of way option in the amount of $105,000 has been acquired. The Commission deferred action on these two purchases pending a complete check up of the finances in cooperation with the City of Portland for right of way for the entire Front Street Project and a report as to how much more right of way is needed and the estimated cost thereof.

(3) Question of acquiring right of way for improvement of the Pacific Highway East at its intersection with Chemawa County Road about five miles north of Salem: The Engineer advised that the property in question is located in a wye connection at this intersection and that the owner has been offered the sum of $2,500 for the property, which consists of 0.071 acre of land, but because of its particular location, the owner wants the State Highway Department to have the first refusal of it. He pointed out that the amount asked by the owner is at the rate of approximately $35,000 per acre; however, he advised that undoubtedly, if the state does not acquire it, someone else will and will use it for commercial purposes, and if a building were constructed thereon, it would create an extremely hazardous condition. The Commission decided unanimously not to purchase property for such figure.

(4) Acquisition of right of way from Ben D. Larkin for use in connection with construction of the proposed underpass in the City of Baker: The Commission deferred action on this purchase pending the execution of waivers of claims for damages and until a complete report is rendered on all right of way matters concerning this project.

(5) Acquisition of a gravel pit from Neil Searles and C. H. Booth on the West Ranch-Summerville Section of the Island City-Summerville Highway, Union County: In the discussion of this matter it was pointed out that the owners want to retain grazing rights on the property and that the option has been based on such a surmise. The Commission was disinclined to acquire the property on such basis because of the possibility of future complications arising out of it and referred the matter back to the Right of Way Department to renegotiate on a "no-restriction" basis.

The meeting recessed at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action thereon by unanimous vote:

North Powder River Bridge Section of the Baker-Unity Highway, in Baker and Union Counties. The Commission received only one bid for this job which proved satisfactory, but the award of the contract was held up pending approval by the Public Roads Administration. The bid was referred to the Engineer with authority to award the contract to the bidder if and when the Public Roads Administration approval has been obtained.

Grading and paving the Oregon City-New Era Section of the Pacific Highway East, Clackamas County. The Commission deferred the award of this contract pending an agreement with the Western Union Telegraph Company with respect to the re-establishment of its facilities along this highway. Bids received were referred to the Engineer with authority to award the

contract to the low bidder when a satisfactory arrangement has been made with the telegraph company and it has the approval of the Highway Commission.

The Commission awarded to Jed Wilson, Seaside, the contract for the Elsie Rock Production Project on the Sunset and Fishhawk Falls Highways, in Clatsop County, and the contract for the Klaskanine Summit-Jewell Rock Production Project on the Nehalem Secondary Highway, in Clatsop County.

The bid of Antonsen Painting Company, Tacoma, Washington, for cleaning and painting four bridges on the Oregon Coast Highway, in Curry County, was accepted by the Commission and the contract awarded to this company.

Yellow Creek-Calapooya Creek Section of the Elkton-Sutherlin Secondary Highway, in Douglas County--grading, surfacing, and oiling. The Commission deferred the award of this contract pending approval by the Public Roads Administration of the low bid received therefor. The bids were referred to the Engineer with authority to award the contract to the low bidder when this condition has been satisfied.

Remodeling the Beardsley Building, Klamath Falls. The Commission received one bid for this project, which appeared to be satisfactory; however, the award of the contract was deferred pending approval by Mr. Beardsley, owner of the building. The matter was referred to the Engineer and the Chief Counsel to discuss with Mr. Beardsley.

Grading, surfacing, and oiling the Campbell Ranch-Gerking School Section of the Athena-Holdman Secondary Highway, Umatilla County. The Commission awarded this contract to the low bidder, T. W. Thomas.

Grading and roadbed topping on the Meadowbrook-Red Bridge Section of the Starkey Secondary Highway, in Union County. The Commission awarded this contract to the low bidder, Roy Norquist, Sweet Home, at his bid price.

Surfacing and oiling the Washington State Line-Flora Section of the Enterprise-Lewiston Highway, in Wallowa County. The Commission awarded this contract to the low bidder, E. H. Itschner Co., Molalla, at its bid price.

At 3:00 p.m. Chairman Banfield announced the Commission's action with respect to these awards, as follows:

"North Powder River Bridge Section of the Baker-Unity Highway, in Baker and Union Counties. Construction of a reinforced concrete viaduct and 0.25 mile highway roadbed. The Commission received only one bid for this job, being that of Snook Bros., Corvallis, at $31,480. The award of the contract has been deferred, and the bid has been referred to the Engineer with authority to award the contract to Snook Bros. when approved by the Public Roads Administration.

"Grading and paving the Oregon City-New Era Section of the Pacific Highway East, in Clackamas County. Warren Northwest, Inc., Portland, submitted the low bid for this work at $657,071.50, based on the use of asphalt. Goodfellow Bros., Inc., Wenatchee, Washington, submitted the only other bid, in the amount of $704,630.50, based on the use of asphalt. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Warren Northwest, Inc., when a satisfactory agreement has been reached with the Western Union Telegraph Company with respect to the re-establishment of its facilities.

"Elsie Rock Production Project on the Sunset and Fishhawk Falls Highways, in Clatsop County. Jed Wilson, Seaside, submitted the low bid for this work in the amount of $25,297. E. H. Itschner Co., Molalla submitted the next low bid in the amount of $26,925. This company stated it would not accept the award of this contract unless also awarded the contract for the Klaskanine Summit-Jewell Rock Production Project; moreover, it would not accept at this meeting projects totaling more than $170,000. There were four higher bidders. A study of the bids received for the Klaskanine Summit-Jewell Rock Production Project revealed that of Jed Wilson to be low on such project also, in view of which, the Commission has awarded the contract for the Elsie Rock Production Project to Mr. Wilson at his bid price.

"Klaskanine-Summit-Jewell Rock Production Project on the Nehalem Secondary Highway, in Clatsop County. Jed Wilson, Seaside, was the low bidder for this project at $29,200. Natal Logging Co., Clatskanie, was the second low bidder at $30,300. They stated their refusal to accept the award of this contract unless also awarded the contract for the Elsie Rock Production Project. There were four higher bidders. The Commission has awarded this contract to the low bidder, Jed Wilson, at his bid price.

"Cleaning and painting four bridges over Winchuck River, Chetco River Floras Creek, and Sixes River on the Oregon Coast Highway, in Curry County. Antonsen Painting Co., Tacoma, Washington, submitted the low bid for this work in the amount of $11,900. E. L. Watson, Tacoma, Washington, submitted the next low bid for this work in the amount of $15,968. There were two higher bids. The Commission has awarded the contract to the low bidder, Antonsen Painting Co., at its bid price.

"Grading, surfacing, and oiling the Yellow Creek-Calapooya Creek Section of the Elkton-Sutherlin Secondary Highway, in Douglas County. C. J. Eldon, Portland, submitted the low bid for this work in the amount of $355,492, based on the use of asphalt. K. F. Jacobsen & Co., Portland submitted the next low bid in the amount of $368,891, based on the use of asphalt. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, C. J. Eldon, when approved by the Public Roads Administration.

"Remodeling the Beardsley Building in Klamath Falls. The Commission received only one bid for this job, being that of Angelo Doveri, Klamath Falls, in the amount of $18,375. This bid has been referred by the Commission to the Engineer with authority to award the contract to Mr. Doveri if and when Mr. Beardsley, the owner of the building, approves. The matter has been referred to the Engineer and the Chief Counsel to discuss with Mr. Beardsley.

"Grading, surfacing, and oiling the Campbell Ranch-Gerking School Section of the Athena-Holdman Secondary Highway, in Umatilla County. The low bid for this work was submitted by T. W. Thomas, Portland, at $185,051.50. A. H. Saxton & Sons, Corvallis, submitted the next low bid in the amount of $188,175. There were 12 higher bidders. The Commission has awarded the contract to the low bidder, T. W. Thomas, at his bid price.

"Grading and roadbed topping on the Meadowbrook-Red Bridge Section of the Starkey Secondary Highway, in Union County. Roy Norquist, Sweet Home, submitted the low bid for this work in the amount of $39,869. La Grande Concrete Pipe Co., La Grande, submitted the next low bid in the amount of $43,000. There were 11 higher bidders. The Commission has awarded the contract to the low bidder, Roy Norquist, at his bid price.

"Surfacing and oiling the Washington State Line-Flora Section of the Enterprise-Lewiston Highway, in Wallowa County. The low bid for this work was submitted by E. H. Itschner Co., Molalla, at $164,679. Mr. Itschner qualified his bid by stating that he would not accept the award at this meeting of projects totaling more than $170,000. A. H. Saxton & Sons. Corvallis, submitted the next low bid in the amount of $173,082.25. There were eight higher bidders. The Commission has awarded the contract to the low bidder, E. H. Itschner Co., at its bid price."

The following persons representing the Morrison-Knudsen Co., contractors for the construction of the Arthur Street Grade Separation Structure on S. W. Front Street in Portland, Multnomah County, State Highway Contract No. 2767, were present in regard to the contractor's claim for additional compensation in connection with this project: Senator Irving Rand, attorney; Mr. Louis A. Peacock, Vice President of the company; and Mr. Wallace B. Curtis, engineer for the company. Mr. Rand advised that the company has received a letter from the State Highway Engineer dated February 24, 1948, with respect to the company's claim, but information contained therein is not entirely clear, and they want an opportunity to discuss the claim with the Highway Commission. He advised that this is a serious matter and the company is going to press its claim to the limit, however, stated that the company is willing to negotiate the matter or arbitrate it, or will do anything within reason which the Commission might suggest. Mr. Curtis advised that the Engineer's reply to their claim is not satisfactory. He also stated that the company was required to do work beyond

the limits of the specifications and was handicapped in its operations because numerous things which were to have been done by the state when the contract was awarded, such as moving public utilities and buildings, and back filling work, were not done until later; in fact, some of the work has not even been accomplished to date, which threw their whole program of operation out of "kilter". He also expressed willingness to arbitrate the matter and suggested the appointment of a board for this purpose, one member of which should be an engineer.

Chairman Banfield advised that the Commission has received the Engineer's report on this subject but has not had an opportunity to discuss it, however, may do so at this meeting. Mr. Rand reiterated that the claim is a meritorious one and that they do not feel it should be given a "brush off" by the Commission. He was assured by Chairman Banfield that it would not be handled in that manner, but that the Commission would be obliged to act on the reports and recommendations of the Engineer and the Chief Counsel. (The matter was discussed further on the following day, at which time the Commission decided unanimously not to allow the claim as presented except that it would approve payment of items recommended by the Engineer and the Chief Counsel. The Commission also decided it would not arbitrate the matter. The Chief Counsel was instructed to prepare a letter notifying the company of the action taken, which letter is to be signed by the Secretary in behalf of the Commission.)

The Engineer reported developments in connection with the proposed bridge construction on McNary Dam which is to be constructed by the Army Engineers across the Columbia River near the town of Umatilla. He advised that the latest information is that the Army Engineers are recommending against the construction of a bridge on the dam because of the cost involved. It appears that the bridge was originally estimated to cost about $3,400,000 and that the Army Engineers now allege that it cannot be constructed for less than $5,400,000; moreover, they further allege that the state can build a bridge for $3,400,000 at a location downstream near the town of Paterson. The Engineer advised that a bridge could be constructed at the alternate location, but in that case it would have to be paid for with state funds, whereas the bridge constructed on the dam would be paid for by the Federal Government from funds appropriated for such specific purposes. If the state is obligated to finance the bridge, he said, it will be many years before it can be constructed because there are no funds available to allocate to it. He suggested the Commission send a telegram to Mr. W. H. Lynch, Division Engineer, Public Roads Administration, re-affirming its previous decision that a bridge on the dam is economically feasible and is needed to connect the highway systems of the States of Oregon and Washington. It was the thought of the Commission that everything possible should be done to secure the Federal funds for this project. The Commission thereupon by unanimous vote approved transmitting the following telegram to Mr. Lynch:

"W. H. Lynch, Division Engineer
U. S. Public Roads Administration
Broadway-Oak Building
Portland, Oregon

Portland, Oregon
March 11, 1948

The Oregon State Highway Commission reaffirms its decision of two years ago that a bridge across the McNary Dam is economically feasible and needed to connect Oregon and Washington Road Network, believes that failure to build this structure will cause public criticism and therefore insists that this bridge be built to carry out the intent of the Congress to utilize such dams as foundations for highway bridges.

R. H. Baldock,
Oregon State Highway Commission"

The Assistant Counsel presented a list of properties that are needed in connection with state highway improvements but concerning which he has been unable to secure satisfactory settlements by negotiation, together with the offer that he recommended be made for each parcel in the event it is necessary to acquire the property by condemnation, as follows:

		Recommended Offer
YELLOW CREEK-HAMILTON RANCH SECTION OF THE [illegible]-SUTHERLIN HIGHWAY		
13789A	A. O. Kobbe, et al.	$ 908.00
13789	A. O. Kobbe, et al.	2119.10
14218	A. O. Kobbe, et al.	323.00
MYRTLE CREEK-CANYONVILLE SECTION OF THE PACIFIC HIGHWAY		
14307	Glen W. Dodge	650.00
WEST RANCH-DRY CREEK SECTION OF THE ISLAND CITY-SUMMERVILLE HIGHWAY		
14335	Robert L. Berry and Helen A. Berry	250.00

Following careful consideration of each item, the Commission authorized condemnation of the several tracts at the recommended offers and thereupon adopted by unanimous vote the attached resolutions marked EXHIBITS "C1" and "C2"; with respect thereto, which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Assistant Counsel, Mr. DeSouza, presented the offer of Mr. W. W. Harris to purchase state-owned property on the Salmon River Highway between Ft. Hill and Valley Junction. He advised that the tract consists of property previously purchased from Mr. Harris and property acquired from Mr. Turnidge and that Mr. Harris has offered to pay $350 for it. The Engineer advised that the property is needed for highway purposes and recommended that it not be sold. The Commission approved the recommendation.

The Commission also discussed the matter of sale to Mr. John Sumich of a parcel of land containing 0.32 acre adjacent to the Rain Rock-Blachly Section of the Siuslaw Highway, in Lane County. In the discussion of this matter it was pointed out that the tract originally purchased by the Commission contained 0.44 acre and that Mr. Sumich is offering to pay $300 for the portion he wants. The Engineer advised that the property is not needed for state highway purposes and recommended acceptance of the offer and that the balance of the area, amounting to 0.12 acre, be conveyed to Lane County for right of way for a connecting road between the state highway and a county road lying north of the property. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The matter of sale to the Weyerhaeuser Timber Company of a 2.2-acre tract of land situate in Simpson Park, North Bend, was brought up for discussion, but action thereon was held pending personal inspection of the premises by the members of the Commission.

The Commission had under discussion the matter of deeding to the Mountain States Power Company a small tract of land situate on the Santiam Highway in the City of Lebanon. It appeared from the discussion that because of the proposed highway improvement in Lebanon, a canal owned by the company at this place has to be changed, and the company is willing to make the change if the state will furnish the land for it. It also appears that there is no further consideration involved except that of maintaining the canal where it lies within the highway right of way. The Commission approved the deeding of this property to the Mountain States Power Company. (The deed of conveyance was executed by the Commission on the following day.)

The Commission discussed the proposed sale of a portion of some state-owned property in the town of Freewater which the state obtained by reason of a street vacation. The Engineer advised that the property in question is cut off from the highway by a high fill and is of no value for highway purposes; in fact, it is of value only to the adjacent property owner. He pointed out that in 1945 the Commission deeded a portion of the street to the Seventh Day Adventist Church, and, insofar as he can see, there is no particular reason for not deeding the balance of the street to the owner of the adjoining property, a Mr. A. T. Little, and he so recommended. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Commission also discussed the matter of disposing of some state-owned property adjacent to the Steiwer Hill-Santiam River Section of the revised location of the Pacific Highway East, being a portion of farm property acquired from Hudson D. Reeves. The Engineer advised that the area contains about 42.48 acres, all of which lies west of the highway right of way, and that he has received a number of inquiries from prospective purchasers. The property is of no particular value to the State Highway Department, he said, and he recommended that it be sold as the result of competitive bidding. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of sale to the City of Bandon of a small tract of state-owned land situate adjacent to the Oregon Coast Highway where it crosses through Block 10 of Woodland Addition to Bandon. He advised that there have been several inquiries concerning this property, the most recent of which has been from the City of Bandon which wishes to acquire this property to make it available for business development. He pointed out that the highway north from this property has already been widened to a total width of 60 feet between curbs, but southerly thereof the existing highway consists of only two 11-foot traffic lanes. At some future time, he said, it undoubtedly will be necessary to widen the southerly section to conform with the section on the north and such being the case, in his estimation, it would be inadvisable to dispose of the property now. He recommended that the state retain title to the property, at least until the ultimate improvement of the highway through Bandon has been completed. The Commission approved the recommendation unanimously.

A request was presented from Mr. Carl Trued, Glide, Oregon, that the Highway Commission purchase from him right of way that is needed for a proposed revision of the Little River-Lonerock Section of the North Umpqua County Road, particularly where it crosses his land between Highway Engineer's Stations 858+67 and 886+64. It appears that Mr. Trued desires to subdivide his property but does not wish to interfere with the proposed reconstruction of the highway. The Engineer recalled that the Commission some time ago authorized the purchase of a small parcel of right of way from another owner in this vicinity, and he pointed out that while the improvement of this particular section is not included in any existing construction program it will have to be improved in the not too distant future, so, in his estimation, now is an opportune time to purchase the additional right of way before subdivisions are made which will increase the cost materially. He recommended that the Right of Way Department be authorized to negotiate purchase of the right of way from Mr. Trued, and beyond, to a connection with the right of way previously acquired at Highway Engineer's Station 905+0. Following discussion, the Commission authorized negotiations to obtain options for the right of way between the points mentioned. The Engineer was instructed to furnish the Chief Counsel with right of way descriptions.

A letter was presented from Mr. Harvey W.Wells, President of the Hayden Island Amusement Company, Portland, inquiring as to purchase from the Highway Commission of about four square feet of space at each of two locations near the entrance to Jantzen Beach Park on which to maintain neon signs featuring the famous Jantzen swimming girl and directing traffic to Jantzen Beach, and also requesting permission to maintain two bus stop shelter buildings on the highway right of way at two additional locations in this vicinity for the accommodation of people who live on Hayden Island and use the busses twice daily. Mr. Wells advises that when the original right of way was negotiated at this point he was instructed by his board of directors to secure an easement for the use of the property by the company before deeding the land to the state; however, that feature was overlooked.

The Engineer recalled that the company deeded to the state, without cost, the areas lying within the various traffic interchanges adjacent to the highway improvement. The property was acquired, he said, in order to forestall industrial developments within the areas which would interfere with sight distance and create traffic hazards. He pointed out that the points at which the company wishes to erect the sign are outside the normal width right of way, so any signs erected thereon would not create a hazardous condition. He recommended that the Commission quitclaim to the company two small parcels, each about ten feet square, to allow the company to erect and maintain its signs as in the past, it being his belief that it would be preferable to deed the property back to the company rather than to grant the company permission to maintain signs on state-owned property, which is contrary to the law.

As to the shelter huts, the Engineer expressed the opinion that if they were constructed to proper standards and were located in a manner that would not prove detrimental to traffic, they would not be objectionable but would be a general public convenience. He recommended that the company be given permission to maintain these bus shelters on the property under those conditions. The Commission deferred action on the matter pending a detailed report by the Engineer on the entire transaction with the amusement company. Such report is to include information as to how much property was donated to the state by the company, how much the state has spent in the company's interests at this location, and what work has been done.

The Commission had under discussion a proposed agreement with the Weyerhaeuser Timber Company relating to relocating the Southern Pacific Company's railroad tracks, relinquishing access to the Oregon Coast Highway and deeding certain property to the company abutting this highway between North Bend and Coos Bay. The agreement recites that the state is in the process of relocating the Oregon Coast Highway between the cities of Coos Bay and North Bend, whereby it is planned to construct a modern highway facility to adequately serve transportation needs on the highway as well as the immediate territory, also, that the corporation which owns a manufacturing plant in proximity to the highway facility is concerned with the problem of off-street parking of motor vehicles of its employees and customers; further, that the corporation has agreed to cooperate with the state in planning a means of ingress to and egress from its plant so the capacity of the highway will not be impaired, that the state has made designs for a highway facility which provides a safe means of ingress to and egress from the plant to minimize hazards to the highway traffic, and that the state and the corporation have agreed to cooperate in the design of the highway facility so that the best interests of both can be served. In the discussion of this matter it was explained that in order to effect the plan it will be necessary for the state to deed to the company three small parcels of land, and for the company to grant a waiver of access to the highway at all points except at Oregon Avenue and Lewis Street. It was also explained that the company has agreed to pay the sum of $3,517.79 for the three parcels of land which conveyance is to act as consideration by the company in waiving its access rights. Further details of the transaction were explained by the Engineer and the Chief Counsel, both of whom recommended approval of the agreement as prepared. The Commission approved the recommendation unanimously.

(For full particulars with respect to this matter, see Miscellaneous Contract and Agreement No. 1021 on file in the office of the State Highway Commission, Salem. The agreement and the deed referred to therein were both signed by the Commission on the following day.)

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. on the following day in the same room.

Portland, Oregon
March 12, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, State Highway Commissioner
Ben R. Chandler, State Highway Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Auditor
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

OREGON COAST HIGHWAY IN COOS COUNTY

CLEAN AND PAINT McCULLOCH BRIDGE OVER COOS BAY

J. S. Morris Co., Berkeley, Calif.	$ 41,840.00
Tri-State Painting Co., Portland	47,800.00
Hall & Wols, Portland	62,500.00
A. H. Barbour & Son, Portland	71,000.00

KIMBERLY-LONG CREEK SECONDARY HIGHWAY IN GRANT COUNTY
MONUMENT-HAMILTON SECTION

A. H. Saxton & Sons, Corvallis		$ 156,286.25
Inter City Sand & Gravel Co., Eugene	(1)	168,959.30
Vernie Jarl, Gresham		186,263.00
D. F. McKenzie, Salem		187,074.25
Goodfellow Bros. Inc., Wenatchee, Wn.		187,540.00
Heavy Hauling Co., Astoria	(2)	189,740.75
J.N. & M.J. Conley, Portland		191,961.00
Babler Bros., Portland		196,378.00
Peter Kiewit Sons' Co., Longview, Wn.		200,413.50
Grimstad & Vanderveldt, Astoria		208,213.50

(1) Bidder will not accept projects totaling more than $350,000.
(2) Bidder will not accept projects totaling more than $380,000.

MAINTENANCE BUILDING AT HOOD RIVER IN HOOD RIVER COUNTY
CONSTRUCT BUILDING

	Alternate "A" (Frame Constr.)	Alternate "B" (Masonry Blocks)
R. H. Jones, Hillsboro	$ 12,619.00	$ 15,269.00
Eric Enquist, Troutdale	15,956.00	- - -
Lorentz Bruun Constr. Co., Portland	16,843.00	18,230.60
Rushlight Automatic Sprinkler Co., Portland	18,087.00	17,917.00

KLAMATH FALLS-MALIN HIGHWAY IN KLAMATH COUNTY
KLAMATH FALLS (1st Ave.-Esplanade St.) SECTION

Rogers Constr. Co., Portland	$ 361,108.00
M. P. Butler, Seattle, Wn.	422,698.80

WILLAMETTE HIGHWAY IN KLAMATH AND LANE COUNTIES
McCREDIE SPRINGS-LITTLE DESCHUTES RIVER ROCK PRODUCTION PROJECT

N. A. Toole Constr. Co., Ontario		$ 49,875.00
Rogers Constr. Co., Portland		50,400.00
F. H. McEwen, Eugene		51,169.00
A. H. Saxton & Sons, Corvallis	(2)	53,900.00
F. L. Somers, Klamath Falls	(1)	54,600.00
P. B. Doherty & Son, Portland		65,800.00

(1) Bidder will not accept projects totaling over $340,000.00
(2) Bidder is a subcontractor on two other projects and is bidding on two additional projects. If he is awarded the Monument-Hamilton project and is to be subcontractor on two projects he will not accept award of this project.

March 12, 1948

14691

WARNER SECONDARY HIGHWAY IN LAKE COUNTY
FREMONT JUNCTION-MUD CREEK SECTION

M. L. & C. R. O'Neil, Cresvell	(1)		$ 135,210.00
Inter City Sand & Gravel Co., Eugene	(2)		138,657.00
Rogers Constr. Co., Portland	(1)		139,524.50
F. L. Somers, Klamath Falls	(1)	(3)	154,442.00
Peter Kiewit Sons' Co., Longview, Wn.			159,103.00
Heavy Hauling Co., Astoria	(4)		160,269.50

(1) Bidder will accept this project only in combination with Mud Creek-Drake Creek Project.
(2) Bidder will not accept projects totaling more than $350,000.
(3) Bidder will not accept projects totaling more than $340,000.
(4) Bidder will not accept projects totaling more than $380,000.

WARNER SECONDARY HIGHWAY IN LAKE COUNTY
MUD CREEK-DRAKE CREEK SECTION

Inter City Sand & Gravel Co., Eugene	(4)	(2)	$ 163,597.80
M. L. & C. R. O'Neil, Cresvell	(1)		179,243.00
F. L. Somers, Klamath Falls	(1)	(5)	180,660.20
Heavy Hauling Co., Astoria	(6)	(3)	187,215.00
Peter Kiewit Sons' Co., Longview, Wn.	(1)		197,130.00
Rogers Constr. Co., Portland	(1)		201,243.00

(1) Bidder will accept this project only in combination with the Fremont Junction-Mud Creek Project.
(2) Lump Sum reduction of $4000 if also awarded Fremont Junction-Mud Creek Project.
(3) Lump Sum reduction of $5000 if also awarded Fremont Junction-Mud-Creek Project.
(4) Bidder will not accept projects totaling more than $350,000.
(5) Bidder will not accept projects totaling more than $340,000.
(6) Bidder will not accept projects totaling more than $380,000.

COMBINATION BIDS FOR ABOVE TWO PROJECTS

(1) Fremont Junction-Mud Creek Section of the Warner Secondary Highway.
(2) Mud Creek-Drake Creek Section of the Warner Secondary Highway.

	(1)	(2)	Reduc.	Comb.bid.
Inter City Sand & Gravel Co.	$138,657.00	$163,597.80	$4,000.00	$298,254.80
M. L. & C. R. O'Neil	135,210.00	179,243.00	- - - -	314,453.00
F. L. Somers	154,442.00	180,660.20	- - - -	335,102.20
Rogers Constr. Co.	139,524.50	201,243.00	- - - -	340,767.50
Heavy Hauling Co.	160,269.50	187,215.00	5,000.00	342,484.50
Peter Kiewit Sons' Co.	159,103.00	197,130.00	- - - -	356,233.00

March 12, 1948

WILLAMETTE HIGHWAY IN LANE COUNTY
PLEASANT HILL OVERCROSSING

R & M. Constr. Co., Central Point	$ 72,110.00
R. H. Jones, Hillsboro	75,700.00
McNutt Bros., Eugene	78,450.00
Lindstrom Bros., Inc., Portland	80,850.00
Eric Enquist, Troutdale	85,651.00
Archie R. Averill, Portland	90,475.00
Alan Yonker, Portland	90,860.00
Lockyear & White, Inc., Seattle, Wn.	92,355.00

OREGON COAST AND THREE RIVERS HIGHWAYS IN TILLAMOOK COUNTY
HEBO ROCK PRODUCTION PROJECT

A. H. Saxton & Sons, Corvallis	$ 27,500.00
O. C. Yocom Co., McMinnville	34,500.00

OLD OREGON TRAIL IN UMATILLA COUNTY
PENDLETON (18th St.– 1st St.) SECTION

Grimstad & Vanderveldt, Astoria	$ 118,981.50
T. W. Thomas, Portland	122,768.50

SUNNYSIDE-UMAPINE SECONDARY HIGHWAY IN UMATILLA COUNTY
UMAPINE-SUNNYSIDE SECTION

Pendleton Sand & Gravel Co., Pendleton	$ 4,920.25
J. C. Compton Co., McMinnville	5,575.00
Morrison & Fisher, Walla Walla, Wn.	6,423.00
Babler Bros., Portland	6,850.00

The Commission again discussed the claim of Morrison-Knudsen Company, Inc. in connection with its contract for the construction of the Arthur Street Overcrossing on S. W. Front Avenue, Portland. The Commission unanimously decided neither to approve the claim as presented nor to submit the claim for arbitration as suggested by the contractor's representatives; however, the Commission indicated that it would approve allowances as may be recommended by the Engineer and the Chief Counsel. The Chief Counsel was instructed to prepare a letter for the Secretary to sign, notifying the contractor of the action taken.

Mr. James Frankland, Acting Regional Forester, appeared before the Commission regarding the installation of permanent steel rail type cattle guards at three locations on state highways in Grant County with particular

reference to such an installation at the south boundary of the Malheur National Forest on the Pendleton-John Day Highway north of Burns. He asked the Commission to grant a permit for such permanent type of guard which would be less costly than fence construction and would prevent range cattle from roaming the highways and becoming a hazard to highway travel. The Engineer stated that he did not favor the steel rail type as frost and ice on the rails would create a hazard to motorists. It was his thought that a painted type of cattle guard would be just as effective in controlling cattle and suggested that Mr. Frankland try out this type of guard. Mr. Frankland was agreeable to experimenting with the painted type guard and stated that if it does not prove successful he probably will renew his request for the other type.

Mr. Wm. J. Baer, Chairman of the Highway Committee, Bend Chamber of Commerce appeared before the Commission in the interests of the Century Drive Secondary State Highway and of The Dalles-California Highway north of the Willamette Highway junction. He inquired first as to what had become of the $55,000 heretofore allocated for improvement of the Century Drive Highway. He gave as his understanding that this money was transferred to the Columbia River Highway and urged that it be replaced. He was informed by the Engineer that the funds of which he spoke are forest road funds which have not yet been released by Congress and that no transfer has been made. Mr. W. H. Lynch, Division Engineer of the Public Roads Administration, who was present, confirmed the statement.

Mr. Baer then requested the improvement of The Dalles-California Highway north of the Willamette Highway junction. He declared that the present connection between these two highways is very unsatisfactory and and relegates The Dalles-California Highway to a secondary highway status. He urged the improvement of the intersection so as to place both highways on a comparable basis, and he also urged the general improvement of The Dalles-California Highway north from the junction to Bend, alleging that the section between the junction and Crescent is in extremely bad condition, the road surface being badly broken up and the shoulders narrow and rough. The Commission took no action on the matter.

Mr. Baer also urged the completion this year of the Warm Springs Highway. He demanded immediate action to that end. He was informed by Chairman Banfield that every effort is being made to expedite work on the Warm Springs Highway, even to the extent of borrowing funds from the Ochoco Highway to finance the work, which is all that the Commission can do under the circumstances.

County Judge C. L. Allen, Deschutes County, and County Commissioners A. E. Stevens and E. E. Varco appeared before the Commission regarding the improvement of several roads in Deschutes County. Judge Allen acted as spokesman. He presented a statement and maps showing the amount and

kind of work Deschutes County has performed during the last two years, and a petition signed by numerous residents in the Bend area requesting the surfacing of a section of the Powell Butte State Secondary Highway northerly from its junction with the Alfalfa County Road a distance of 2.1 miles, to the junction with the Butler Market Road near the Bend airport. This section, Judge Allen stated, is not surfaced at the present time although it serves a populous area. He advised that the county would reshape, grade, and place a pit run gravel surfacing to a depth of eight inches on this section, at a total estimated cost of $25,600, and is asking the state to construct an oil mat surface thereon, which he estimated would cost about $5,510. In exchange for this county improvement Judge Allen suggested that the state improve 3.8 miles on the Terrebonne-Smithrock-Pine Creek road, a Federal Aid Secondary county road, which he estimated would cost about $30,000. Judge Allen stated that the county preferred that the state assume responsibility for the Smithrock road improvement because of the nature of the work which should be done by state contract rather than by county crews. The delegation was requested to submit their requests in writing outlining these oral proposals in detail. The Engineer was instructed to render a report on the subject when such written request has been received.

Judge Allen also urged the improvement of the Cascade Lakes Highway (Century Drive Secondary State Highway). He advised that this road presently is only partially improved, 8 miles being surfaced on the easterly end and 8 miles graded at the other end, but the section in between is in very bad condition. He urged the surfacing of this section this year, it being a section of the highway leading to the popular Elk Lake recreational area.

W. H. Lynch, Division Engineer, Public Roads Administration, who was present, pointed out that this improvement was proposed as a Forest Highway project, but Congress did not make a sufficient appropriation, so it and other similar projects could not go forward as planned; however, the project is still in the program and will be constructed when funds are made available to finance it.

Chairman Banfield again requested that the County Court present its requests in writing as soon as possible so the Engineer can prepare a report for consideration by the Commission at its next meeting.

Mr. Jack Maris, member of the Canyonville City Council, appeared before the Commission with three requests. (1) Widen the pavement full width between curbs on the Pacific Highway in Canyonville. He advised that the city has constructed curbs, gutters, and sewers along this highway for a distance of 1,514 feet, the distance between curbs being approximately 60 feet, and now wants the state to pave the unsurfaced area between the curbs and the existing pavement. (2) Change the present connection of the Tiller-Trail Secondary Highway with the Pacific Highway. He stated that the present connection is dangerous, being on a 90° angle, and inadequate for the traffic it bears and suggested a new connection on Third Street which would remedy this condition. (3) Request for footpath construction in the north part of Canyonville for the benefit of pupils attending their public

schools and Canyonville Bible Academy. He stated that the school children are forced to go onto the highway surface at some points and advised that all they are asking is permission to install a footpath at the city's expense. Mr. Maris was requested by the Commission to submit his requests in writing. The Engineer was instructed to prepare reports for the Commission's consideration.

Mr. J. A. Plebuch, Aberdeen, Washington, appeared before the Commission regarding the retention on the State Highway System of the old Columbia River Highway route near Little Jack Falls, when the highway has been reconstructed at this location. He advised that he owns the land abutting on the highway at this point, which he said is a very scenic spot, and asked the Commission to retain the old highway for its scenic value. Chairman Banfield advised that present plans are to contract the Little Jack Falls improvement next month and that the Engineer and the Parks Superintendent have recommended abandonment of the old highway route. The request was denied.

The Chief Counsel presented for the Commission's consideration a resolution designating US99 East and West between Portland and Junction City as the "Blue Star Drive" in honor of World War II service men and women. The Commission by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT "D" and by this reference made a part hereof with like effect as though extended herein.

The Chief Counsel presented for the Commission's consideration a request from Mr. Roy Cannon, Multnomah County Superintendent of Schools, that his cabin, situate on the Alsea Highway near Tidewater, be raised about three feet so it will be above high water level. He explained that the cabin was moved to its present location to accommodate a highway improvement but was reestablished at too low an elevation and, as a consequence, now is endangered by high water and logs drifting in with the tide. He recommended that the state go back and raise the house, as requested, which would solve the problem. The recommendation was unanimously approved by the Commission, and it was so ordered.

The Commission considered a request from a Mr. Horn, Florence, Oregon, for permission to salvage logs left by the tide on the beach. The Chief Counsel explained that the logs in which Mr. Horn is interested, are short ones, probably suitable only for tie mills, and there is no way to determine who owns them. He recommended that the request be denied, because in his estimation, a permit of this sort should not be granted to one particular individual. The recommendation was unanimously approved by the Commission.

The matter of pay roll deductions for payment of premiums for group insurance furnished by the West Coast Life Insurance Company covering State Highway Department employees, as previously was requested by the Oregon State Employees Association, had the attention of the Commission. The Chief Counsel advised that the statute authorizes the Commission to make deductions for one company, but leaves it to the Commission's discretion whether or not deductions shall be allowed for more than one company.

In a brief discussion of this matter the Engineer and the Chief Counsel pointed out that the Association has an agreement with the life insurance company which provides that only members of the Association may secure the insurance; they advised, however, that the plan offered by the West Coast Life Insurance Company has some benefits which are better than the company for which deductions are now allowed. Chairman Banfield expressed himself in favor of allowing this extra deduction if the insurance were made available to all state employees, rather than to members of the Association only. Commissioner Schaupp and Commissioner Chandler expressed themselves similarly, whereupon motion was made by Commissioner Chandler, seconded by Commissioner Schaupp, that the Commission reaffirm its previous action in this matter denying the request for insurance pay roll deductions unless the benefits accrue to all employees. The motion carried by the unanimous vote of the Commission.

The matter of collecting an annual fee from the utility companies that maintain facilities on the Interstate Bridge between Portland and Vancouver was considered by the Commission. The Chief Counsel explained that in most instances where utilities use state highway bridges no fee is collected, and that the establishment of the payment of a fee on the Interstate Bridge was an outgrowth of the time when the bridge was controlled by the two counties in Washington and Oregon, but no formal agreement has been executed since the bridge was taken over by the two states. He further stated that he had consulted with Washington State officials concerning the matter as previously instructed by the Commission, and as a result received a letter from Smith Troy, Assistant Attorney General of the State of Washington, saying that it is their highway department's desire to continue collecting the fee from the telephone company, which it appears now is the only company that occupies the structure, and suggesting that he continue his efforts to secure an adequate agreement between the two state departments and the company. The Commission decided to continue to charge the fee and instructed the Chief Counsel to prepare such an agreement with the telephone company.

The Commission considered a request from the State of Washington that the State of Oregon assist in the maintenance of the Oregon approach to the Longview Bridge across the Columbia River. The matter was laid on the table for future consideration .

The Chief Counsel reported an inquiry from tenants of the "Barnes" property, Salem, as to when they have to vacate the premises. He advised that this property is located in Block 86 where it is planned to build the proposed Highway Department Office Building, although it was purchased by the Board of Control. Chairman Banfield recalled that at a previous meeting the Commission decided to give the tenants six-months notice to move, which means that they would have to vacate the premises about four months from now. The Chief Counsel suggested that the tenants might be placed on a 30-day notice plan. The suggestion was unanimously approved by the Commission.

The matter of renewing the lease agreement with Mr. Ralph S. Wohlgren for concession privileges in Silver Creek Falls State Park had the attention of the Commission. The Chief Counsel recommended that the present

agreement be extended for another year at the same rate. The Parks Superintendent concurred in this recommendation. The Commission approved the recommendation unanimously; however, the Parks Superintendent was instructed to render a complete report on the past year of operation.

A delegation from Newberg, headed by Senator Eugene Marsh of McMinnville, appeared before the Commission in opposition to the plan to reroute the Hillsboro-Silverton Secondary Highway along College Street and Fourth Street through the City of Newberg. Appearing with Senator Marsh were C. A. Hodson; Levi Pennington, ex-Officio President, Pacific College; Emmett Gulley; Dr. Ralph W. Van Vanlin, dentist; Ted Francis; and W. S. Allen, former County Commissioner, all of Newberg. Senator Marsh exhibited a map showing the present and proposed routings of this highway and advised that if the plan as proposed is carried out it will mean that highway traffic will be routed along the best residential street in this town, the destruction of many fine shade trees, and the creation of additional hazards to school children and others who have to cross College Street daily in going to and from school, and to the business district; moreover, it will devaluate a good residential district. He advised that the members of the delegation are property owners along the College Street route who are strongly opposed to the proposed plan and who suggest as an alternate proposition that the highway be routed along Meridian Street, two blocks east of College Street, which is now paved to a width of 36 feet and, in their estimation, will serve the purpose equally well or even better than the College Street route. Dr. Levi Pennington stated that aside from the destruction of residential values he is concerned with the preservation of human life, for the safety of the many children who walk along College Street daily going to and from school. He pointed out also that on College Street there are four large churches that draw large gatherings on Sundays with resultant increase in pedestrian traffic on those days. If the route is moved to Meridian Street, he said, these situations could be avoided. He asked to Commission to say to the Newberg City Council, who initiated the College Street route, that such routing is wrong.

Chairman Banfield advised that the State Highway Commission did not initiate the proposed change but approved it at the request of the Newberg City Council, so it is a matter for the City Council to decide if the project should go forward as planned or some other street improved. He pointed out that the Commission has appropriated a certain amount to finance the improvement along College Street, so if eventually the routing is changed to Meridian Street, the improvement of which is more costly, it will be up to the city to provide funds to pay the increased costs. In reply to Mr. Pennington's suggestion that the Commission tell the City Council that the College Street routing is wrong, Chairman Banfield stated the Commission could not do that because the city initiated the project and the Commission has simply been carrying out the wishes of the City Council. It is the responsibility of the Citizens of Newberg to contact the City Council in that regard, and if the Council will advise the Commission that it has changed its mind about the project, the Commission will eliminate it from the program and spend its funds elsewhere. He concluded the conference by stating that the Commission would discuss the matter further among themselves.

The Commission recessed for luncheon at 12:00 o'clock noon and reconvened at 1:30 p.m. with the same persons present and participating.

The Commission had under discussion the matter of increasing salaries and wages of State Highway Department employees, particularly the Engineer's letter on the subject, dated March 8, 1948, which contains six recommendations to take care of the immediate employment emergency. The Engineer reviewed the situation orally, advising that he had discussed the matter with the Civil Service Board and the Budget Director, by whom the recommendations have been approved. He asked the Commission to approve all of the recommendations, notwithstanding that the salary increases shown therein are insufficient, as a temporary expedient, until a further adjustment can be effected. The Chief Counsel gave as his opinion that the Commission can disregard the finding of the Civil Service Board if the Board's rulings impair the Commission's ability to function properly, and in that case the Commission can establish its own salary and wage rates. He advised that the Attorney General concurs in that opinion. In a lengthy discussion of this matter, which followed, it was pointed out that the salaries and wages now being paid to Highway Department employees are much lower than those being paid for like services in adjoining states, which are offering special inducements to attract men from Oregon, so salaries will have to be increased if the Commission expects to carry out its construction program properly and satisfactorily. It is a case, not only of being unable to attract new employees but also of retaining the services of present employees. The question also arose whether or not the Commission should adopt the Engineer's recommendations, as presented, as a temporary expedient, and attempt to secure the approval of the Civil Service Board for more adequate salary increases, or should the attempt to secure more satisfactory rates be made without the adoption of the temporary plan. As the result of considerable discussion the Commission decided unanimously in favor of the adoption of the Engineer's recommendations as appear in his letter of March 8, 1948, a copy of which is attached hereto, marked EXHIBIT "Q" and by this reference made a part hereof with like effect as though extended in full herein, it being understood that the new rates will be retroactive to January 1, 1948. The Commission also decided unanimously to make a further attempt to secure the approval of the Civil Service Board and the Budget Director to further increases in the salary and wage rates, because definitely those now set up are wholly inadequate. The Engineer and the Chief Counsel were instructed to follow the matter through with the Civil Service Board and the Budget Director. In the event a satisfactory agreement cannot be reached then the Commission will discuss the matter with the Governor and the Board of Control.

The Commission discussed a brief submitted by Mr. A. R. Bowman, Prineville, in support of his previous request for rerouting the Crooked River Highway around the proposed dam in Crooked River. Commissioner Schaupp gave as his understanding that $100,000 of Reclamation Bureau money is all the cooperation that has been offered in connection with this project and advised, if such is the case, that he could not see how the state could approve the project when there are no state funds available to pay the entire balance. The Engineer advised that he recently inspected the proposed new route from Prineville to a junction with the Central Oregon Highway, and found portions

of the route uttorly impassable. He also said that his previous estimate of $450,000 as the cost to rock surface the road for all weather travel is absolutely the minimum and the probability is that it would cost more than such sum The Chief Counsel suggested, if the Commission saw fit, that the Crooked River Highway might be left on the State Highway System, then. if the dam is built, and the highway blocked, that the Legislature be requested to remove it as a primary highway. The Engineer suggested that Crook County might assume half of the estimated $450,000 inasmuch as $100,000 is already available from the Bureau of Reclamation. No action was taken by the Commission on this matter pending a response from the county on the suggestion contained in Chairman Banfield's acknowledgement of Mr. Bowman's brief.

Mr. Bowman appeared before the Commission later in the day, accompanied by Mr. Kenneth Sawyer, Chairman of the Committee on Agriculture of the Portland Chamber of Commerce, and Mr. W. D. B. Dodson, also of the Portland Chamber of Commerce, regarding this subject. Mr. Bowman repeated statements previously expressed in behalf of the project, particularly mentioning that all they are asking is a road as good as the existing one - a road that can be furnished for $100,000. Mr. Sawyer read aloud and presented a statement endorsing the project from a state-wide standpoint. He suggested, if the Commission cannot see its way clear to approve the project at this time, that final action be deferred pending further study, looking for a compromise proposition.

Mr. Dodson stated that he had spent 30 years trying to get this dam located which he felt is essential to the welfare of the people of central Oregon to utilize the waste lands for which the proposed dam would provide irrigation. (See additional paragraphs ahead.)

A delegation from Marion and Polk Counties, consisting of:

Grant Murphy, Marion County Judge, Salem
Herman Van Well, Polk County Judge, Dallas
W. E. Knower, Polk County,Commissioner, Salem
H. H. Brant, Polk County Commissioner, Independence
E. L. Rogers, Marion County Commissioner, Salem
Roy J. Rice, Marion County Commissioner, Salem,
T. J. Permus, hardware and International Harvester dealer, Independence
Dr. M J. Butler, dentist, Independence
Dr. Geo C. Knott, M.D., Independence
Jas. Hart, Ford Motor Co., Independence
Sen. Dean Walker, Hop grower, Independence

appeared before the Commission regarding construction of a proposed bridge across the Willamette River at Independence. Grant Murphy, Marion County Court Judge, and Herman Van Well, Polk County Judge, acted as spokesmen. Judge Murphy pointed out that at the time the agreement between the state and the two counties was executed, the estimated cost of the bridge was $600,000.

but now, according to the State Highway Engineer, it is going to cost $900,000. Marion County, he said, still wants the bridge built and is willing to pay its share of the additional expense but suggests, in view of the possibility that costs will lower, that the taking of bids be deferred until about the first of next year if that can be done without sacrificing present proposals or commitments. Judge Van Well stated that his county agrees with the statement as presented by Judge Murphy, provided the counties will not lose priority on materials by deferring construction, if not, then Polk County would like the project deferred until January, 1949. However, if the Highway Commission feels that construction of the bridge should proceed at once then Polk County will agree. Chairman Banfield advised that this matter could be decided now if the county attitudes are known. The state, he stated, has the money set aside and the Commission is ready and willing to proceed on the basis of the original agreement at any time. He further stated that the Commission has no objections to delaying construction if that is the desire of the counties, but the time of building is to be determined by the wishes of the counties and the Engineer's judgment. Commissioner Chandler suggested that the project be advertised for bids to be received at the April 1948 meeting of the Commission to determine just how much the bridge is going to cost; the counties could then decide whether or not they wanted to accept them or defer construction to a later date. Following further discussion Chairman Banfield advised that the Commission wants to comply with the wishes of the two counties and if both county courts will direct letters to the Commission stating definitely and clearly when they want the Commission to advertise the project for bids, the Commission then can take action. Both county courts agreed to send such letters and it was understood that bids would be received at the April meeting, if the counties so desired. No further action was taken by the Commission pending receipt of letters from the counties advising the action they wished taken in the matter.

Dr. P. A. Loer, Chamber of Commerce representative; Gus Herr, President of the Chamber of Commerce; Robert Borland, and Gid Smith, Jr., businessmen; all of Silverton, comprised a delegation representing the City Planning Commission, which appeared before the Commission regarding the location of the Salem-Silverton county road in Silverton. Dr. Loer exhibited a map and explained that the proposed new construction on the Silverton road extends only as far as McLain Street. He asked the Commission to acquire right of way for a proposed extension from that point to a connection with the Hillsboro-Silverton Secondary Highway because the property is about to be developed and it will be much more difficult and costly to acquire later on. The Engineer advised that the proposed new construction ends about a mile west of Silverton and that from there on into Silverton only a reconnaisance survey has been made. He stated further that it would be necessary for the Commission to grant authority for a survey of the new route before the right of way could be secured. Dr. Loer was informed that the Commission is not in position to take action now, but his request will be given due consideration when additional information is forthcoming. The Engineer was thereupon authorized and instructed to investigate the matter and report back to the Commission at its next meeting.

A delegation representing the North Tillamook County Chamber of Commerce appeared before the Commission and urged the construction of a "Cut-Off" Highway extending from Elsie on the Wolf Creek Highway southwesterly to a junction with the Necanicum Highway, approximately three miles north of the Tillamook County line. Mr. Jim Kelly, Secretary of the North Tillamook County Chamber of Commerce, headed the group which included John Aschim, Secretary, Tillamook Chamber of Commerce; John Shibel, Neahkanie; Leo Mead, Nehalem; Ed Winkle, Neahkanie; Al Thompson, County Commissioner; Irving Savin; President, Tillamook Chamber of Commerce, Tillamook; Charles Ross, President, Oregon Coast Association; Franklin E. Knight, President, N. Tillamook Chamber of Commerce.

Mr. Kelly read aloud and presented to the Commission a brief containing a petition signed by 455 residents and property owners of the district, and other information in support of their oral request. Others speaking in behalf of the project were Messrs. Aschim, Schibel, Mead and Thompson. They pointed out that residents on the Necanicum Highway are handicapped by the very crooked condition of the road and that it would be a great aid in the development of the area if the proposed "cut off" is adopted. They pointed out that there are two logging roads already built one at each end of the proposed "cut off", which could be used for a distance of six miles and the use of which would eliminate about six miles of new construction. Mr. Aschim advised that North Tillamook County has developed rapidly during the last few years and the road is worthy of the Commission's serious consideration. Mr. Schibel read aloud and presented a written endorsement from the Neah-kah-nie Community Club. Mr. Mead reviewed past history of the Sunset Highway and this "cut off" road. He alleged that they were led to believe by a former Highway Commission that this short cut would be built; in fact, were given that promise. They requested a location survey, an estimate of cost and construction at the earliest possible time. Chairman Banfield advised that the estimated cost of this project is about $1,600,000 according to a check made several years ago. He also stated the minutes of the Commission meetings had been checked and nothing can be found therein to indicate that a previous Highway Commission had made any definite commitment or promise with respect to this road. The present Highway Commission, he said, is in no position to finance the project, because it is only one of many projects in the same category, and there is not enough money to go around. He added that this is the first time this project has been before this commission and that the Commission would discuss it.

The Commission discussed with the Engineer the bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows, the action of the Commission with respect to each project being by unanimous vote:

"Clean and paint all structural steel below roadway on the McCullough Bridge over Coos Bay on the Oregon Coast Highway, in Coos County. J. S. Morris Co., Berkeley, California, submitted the low bid for this project at $41,840. The second low bid was submitted by Tri-State Painting Company, Portland, at $47,800. There were two higher bidders.

The Commission has awarded this contract to the low bidder, J. S. Morris Co., at its bid price.

"Monument-Hamilton Section of the Kimberly-Long Creek Secondary Highway, in Grant County. 8.27 miles of grading, surfacing, and oiling. A. H. Sexton & Sons, Corvallis, submitted the low bid for this work, in the amount of $156,286.25. The next low bid was submitted by Inter City Sand & Gravel Co., Eugene, at $168,959.30. There were eight higher bidders. The Commission has awarded this contract to the low bidder, A. H. Sexton & Sons, at their bid price.

"Construct maintenance building at Hood River, in Hood River County. R. H. Jones, Hillsboro, submitted the low bid on this job at $12,619, using Alternate "A", frame construction. Eric Enquist, Troutdale, submitted the next low bid, using Alternate "A", at $15,956. There were two higher bidders. The contract has been awarded to R. H. Jones, the low bidder, at his bid price, using Alternate "A", frame construction.

"Klamath Falls (1st Ave.-Esplanade St.) Section of the Klamath Falls-Malin Highway, in Klamath County. 1.8 miles of grading and bituminous macadam surfacing, two reinforced concrete bridges, and 0.1 mile of Portland cement concrete pavement. Rogers Const. Co., Portland, submitted the low bid for this work at $361,108. The second, and only other, bid was submitted by M. P. Butler, Seattle, Wn., at $422,698.80. The contract has been awarded to Rogers Construction Company, the low bidder, at its bid price.

"McCredie Springs-Little Deschutes River Rock Production Project on the Willamette Highway, in Klamath and Lake Counties. Furnish approximately 17,500 cu. yds. of crushed rock in stockpiles. N. A. Toole Const. Co., Ontario, submitted the low bid for this job at $49,875. Rogers Const. Co., Portland, submitted the second low bid at $50,400. Four higher bids were received. This contract has been awarded to the low bidder, N. A. Toole Const. Co., at its bid price.

"Fremont Junction-Mud Creek Section of the Warner Secondary Highway, in Lake County. 4.92 miles of grading and 12.7 miles of rock or gravel surfacing. The low bid for this work was submitted by M. L. & C. R. O'Neil, Creswell, at $135,210. The bidder, however, has qualified his bid by stating that he will accept this project only in combination with the Mud Creek-Drake Creek project. The second low bid was submitted by the Inter City Sand & Gravel Co., Eugene, at $138,657. This bid has been qualified by a statement that the bidder will not accept projects at this meeting totaling more than $350,000. There were four higher bids received. (See next job for award)

"Mud Creek-Drake Creek Section of the Warner Secondary Highway, in Lake County. 8.46 miles of grading and rock surfacing. Inter City Sand & Gravel Co., Eugene, submitted the low bid for this work at $163,597.80. Its bid has been qualified by a statement that they will not accept projects at this letting totaling more than $350,000; however, they will

allow a lump sum reduction of $4,000 if also awarded the Fremont Junction-Mud Creek project. The second low bid was submitted by by M. L. & C. R. O'Neil, Creswell, at $179,243. Four higher bids were received. Considering the combination bids submitted for both jobs and the qualifying statements of the bidders, Inter City Sand & Gravel Co. is the low combination bidder at $298,254.80. The second low combination bid was submitted by M. L. & C. R. O'Neil at $314,453. There were four higher combination bids. The contracts for the Fremont Junction-Mud Creek Section, and the Mud Creek-Drake Creek Section of the Warner Secondary Highway have been awarded to the low combination bidder, Inter City Sand & Gravel Co., at their combination bid price.

"Pleasant Hill Overcrossing on the Willamette Highway, in Lane County. R. & M. Construction Co., Central Point, submitted the low bid at $72,110. The second low bid was submitted by R. H. Jones, Hillsboro, at $75,700. There were six higher bidders. All bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Hobo Rock Production Project on the Oregon Coast and Three Rivers Highways, in Tillamook County. A. H. Saxton and Sons, Corvallis, submitted the low bid for this job at $27,500. The second low, and only other, bid was submitted by O. C. Yocom Co., McMinnville, at $34,500. The contract has been awarded to the low bidder, A. H. Saxton & Sons, at their bid price.

"Pendleton (18th St.-1st St.) Section of the Old Oregon Trail, in Umatilla County. 1.13 miles of grading and paving. Grimstad & Vandervoldt, Astoria, submitted the low bid for this job at $118,981.50. The second low, and only other bid was submitted by T. W. Thomas, Portland, at $122,768.50. The contract has been awarded to the low bidder, Grimstad & Vandervoldt, at their bid price.

"Umapine-Sunnyside Section of the Sunnyside-Umapine Secondary Highway, in Umatilla County. 5.45 miles of resiling. Pendleton Sand & Gravel Co., Pendleton, submitted the low bid for this work at $4,920.25. The second low bid was submitted by J. C. Compton Co., McMinnville, at $5,575. Two higher bids were received. The contract has been awarded to the low bidder, Pendleton Sand & Gravel Co., at its bid price."

Mr. W. A. Dickson, representing Erickson Bros., of St. Helens, appeared before the Commission regarding the amount to be paid for a small strip of the Erickson's property that is needed for widening the Columbia River Highway in St. Helens. He stated that the cost of remodeling the creamery plant, if the state acquires the additional right of way, will be approximately $44,000, and in addition they lose 900 square feet of area, while the cost of the remodeling work they now have under way is between $6,000 and $8,000. He contended that the Ericksons will have as good a plant with the expenditure of $6,000 to $8,000 as they would have if they spent $44,000 on the basis of not using the right of way in question. The

difference between the two amounts represents their damages, so they are asking for $35,000. The Chief Counsel stated he had offered to settle with the Ericksens for $25,000, which, in his judgment, is adequate, as the Ericksens will have a better plant. He pointed out that if the Ericksens had built as first planned they would have had to use the highway right of way in connection with their business, which not only is contrary to law but is an infringement on the rights of the general public and would create a dangerous situation for highway traffic, which very likely would have forced the Commission to take restrictive action on the use of state right of way for parking, etc. The Commission deferred action on the matter pending discussion among themselves.

Mr. William R. Meiners, Umatilla County Commissioner, appeared before the Commission regarding a proposed exchange of certain county roads in Umatilla County. He advised that the county has spent approximately $60,000 for improvement of the Thorn Hollow Road, a Federal Aid Secondary Highway, and would like to have that road eliminated from the Federal Aid Secondary System and the Helix-Holdman road designated in its place. He offered county cooperation in the amount of $13,000 and agreed to furnish needed right of way and to remove fences at county expense. The Engineer exhibited a map showing the roads under discussion and advised that neither road is included in the present three year construction program, so if the Commission decides to approve the county's request and improve the Helix-Holdman Road, the work would have to be done as a major betterment project. He estimated the cost to improve the road to a satisfactory standard at $150,000. The Commission took the matter under advisement.

The Engineer reported on the installation of a traffic signal at the intersection of the Pacific Highway and Sixth Street in Junction City heretofore requested by Senator Angus Gibson. He estimated the cost of the signal at $4,000 and advised that the Traffic Engineer has investigated the request and recommends that the signal be installed, provided the City of Junction City will pay the customary one-half of the cost and furnish the electrical energy to operate it. The Commission unanimously approved the recommendation.

Mr. A. R. Bowman, Prineville, appeared before the Commission at this time relative to his previous request for a revision in the Crooked River Highway to by-pass a dam site proposed by the U.S. Bureau of Reclamation. Appearing with Mr. Bowman were Mr. Kenneth Sawyer, Chairman of the Committee on Agriculture of the Portland Chamber of Commerce, and Mr. W. D. B. Dodson, also of the Portland Chamber of Commerce. Mr. Bowman reiterated arguments presented previously in support of his request and particularly advised that all they want is as good a road as the one they now have -- as serviceable a road as they can get for $100,000.

Mr. Sawyer read aloud and filed with the Commission a letter expressing the attitude of the Portland Chamber of Commerce with respect to this matter The Portland Chamber of Commerce, he said, is interested in the project from the standpoint of developing the state as a whole. He suggested, if the Commission cannot see its way clear now to approve the project, that final action be deferred pending further studies with the view of reaching an agreement later on that would be satisfactory to all concerned.

Chairman Banfield pointed out that an engineering investigation reveals that a $100,000 expenditure will only start the required improvement

and will only invite trouble. He further advised that if the dam is built and the present highway inundated the Highway Commission will ask replacement of the road, and while he has not yet discussed the matter with the other Commissioners, it is his feeling that the Commission will not permit the establishment of the dam at the point desired without an understanding with respect to the highway problem. He suggested that Mr. Bowman arrange for cooperation in the amount of $250,000 toward the highway expense, then, he said, the Highway Commission will reconsider the matter. He pointed out that, in addition to the expense involved, it will be necessary to remove the present road from the State Highway System, which will require action by the Legislature.

Mr. Dodson stated that the Portland Chamber of Commerce has been trying for 20 years to get this dam; also, that it feels it is the duty of the State of Oregon to assist in getting additional acreage under irrigation so it can be utilized.

This matter was discussed further, but no agreement was reached, Chairman Banfield concluding the conference by stating that, in his estimation, if the people want this improvement it will be up to them to contribute half of the expense to reestablish the highway; however, the Commission will discuss it among themselves.

The Engineer reported on a previous request for the installation of a flasing red signal at the intersection of the Tualatin Valley Highway and Wheeler Avenue in the town of Aloha. He advised that, pursuant to the Commissions' instructions, another investigation has been made of the conditions at this point, including the possibility of relocating the highway around the town and of removing the "kinks" in the present alignment, and it has been found economically impractical to change the location. The investigation also reveals, he said, that conditions have changed since his last report, and there now appears full justification for a traffic-actuated signal. He estimated the cost of the installation at $3,500 and recommended approval of the project which, he said, would have to be paid 100% by the state because Aloha is an unincorporated town. The Commission unanimously approved the Engineer's recommendation.

The Commission discussed a request from the City of Salem for additional traffic signals on the Pacific Highway in Salem, particularly at its intersection with "D" St; Market St; and Fairgrounds Road. The Engineer advised that investigation reveals that signals at these points are a necessity, and he recommended approval of all three installations, which he estimated would cost a total of $11,000, provided the city will pay fifty percent of the initial expense, will maintain the signals, and will furnish the electrical energy needed to operate them. The Commission approved the recommendation unanimously.

The matter of providing additional office space at highway headquarters in Roseburg, Coquille, and Meachan was considered by the Commission. The Engineer recalled that during 1947 tentative plans had been

made to enlarge the Roseburg Division office headquarters and the Coquille District Maintenance headquarters, and since that time the housing facilities at Meacham have become inadequate. He recommended that four additional rooms be added to the Roseburg office building and that an additional heating plant be installed at this place to take care of additional maintenance and engineering employees who have been assigned to the Roseburg area. He estimated the cost to provide such facilities at $12,000. He also recommended the addition of two rooms to the existing building at Coquille to provide room for expanded operations, at an estimated total cost of $5,000. He further recommended the purchase of a two story, seven room cottage and six 50'x 100' lots for the sum of $2,000 to provide additional housing facilities at Meacham. In regard to the Meacham situation, he explained that the acute shortage of personnel at that location is due primarily to the lack of housing facilities. The Commission unanimously approved the three projects as recommended by the Engineer at a total estimated cost of $19,000.

The Engineer reported that he had been contacted by officials of the City of Springfield regarding the adoption of a by-pass route on the McKenzie Highway through Springfield. He recalled that this matter was presented to the Commission at the February 1948 meeting by the City Engineer, but action was deferred at that time pending his return from Washington, D.C. He advised that it is not possible to make an adequate recommendation unless the Commission wishes to spend about $1,500 for a survey. Commissioner Schaupp remarked that numerous similar requests have been received and gave as his opinion that surveys of this nature should not be undertaken unless absolutely necessary because of the shortage of engineering personnel. The request was denied due to increased construction and a lack of personnel.

The Engineer reported the results of bids received in Salem on March 1 for the sale of a building in Pendleton and on March 8 for sale of used equipment at Salem, Coquille, Klamath Falls and La Grande. Bids received for sale of the building in Pendleton were as follows:

J. G. Denny, Pendleton $202.00

This was the only bid received. The Engineer recommended that the bid be rejected as too low and that the building be turned over to the Maintenance Department for portable use at Ukiah. The Commission unanimously approved this recommendation.

In the matter of the sale of used equipment at Salem, Coquille, Klamath Falls, and La Grande, the Engineer recommended that the equipment be sold to the high bidder, in each instance, as shown in EXHIBIT "E" attached hereto and by this reference made a part hereof with like effect as though extended herein. The Commission approved the Engineer's recommendation unanimously and so ordered.

The Engineer brought up for discussion the matter of contracting construction of the Salmon River Bridge on the Oregon Coast Highway at Otis, bids for which were received by the Commission at the previous meeting. He advised that a satisfactory bid was submitted by Tower Sales & Erecting Company and Walder & Kenworthy, jointly, but because of a request from the Public

Roads Administration that certain changes be made in the design of the structure, the Commission deferred the award of the contract and referred the bids to him with authority to make the award if the bidder would accept the contract under revised plans. The low bidder, he said, was contacted, and it appears now that they will not accept the job on the revised plan at the unit prices quoted in their proposal. In view thereof, he recommended rejection of the bid and that the project be re-advertised for new bids. The Commission approved the recommendation unanimously.

The Engineer reported that, pursuant to authority heretofore granted him by the Commission, he has awarded contracts, bids for which were received at the meeting on February 2 and 3, 1948, the conditions of the awards having been satisfied. He requested the Commission's confirmation of the awards as follows:

> Grading and paving the Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, Multnomah and Washington Counties; bids received February 2, contract awarded February 10 to Parker-Schram Co., low bidder.
>
> Grading and bituminous macadam surfacing and stock-piling rock on the Johns-Mackin Gulch Section of Pacific Highway, in Douglas and Josephine Counties; bids received February 3, contract awarded February 9 to Babler Bros., low bidder.
>
> Grading, oil-mat surfacing and stockpiling rock on the Elgin-Boswell Ranch Section of the Wallowa Lake Highway, Union County; bids received February 3, contract awarded February 16 to E. C. Hall Co., low bidder.

The Commission approved the awards as reported by unanimous vote.

The Engineer brought up for discussion the matter of revising the major betterment program adopted by the Commission at its meeting on January 5, 1948, by substituting improvement of the "Flinn Bridge" over Mary's River on the Alsea Highway for the reconstruction of the Mary's River Bridge at Noon Station on the Corvallis-Newport Highway. He advised that a recent inspection reveals that the "Flinn Bridge" is in far worse condition than the other, and if the substitution of the project is not approved it will be necessary to spend approximately $7,700 this year for replacement of untreated timber approach spans. He estimated the cost of reconstructing "Flinn Bridge" at $55,000, which is the same amount that has been set up for reconstruction of the bridge at Noon Station. He recommended the substitution of the project, which would eliminate the need to spend $7,700 this year for repairing the "Flinn Bridge". The Commission approved such substitution of the project by unanimous vote.

A letter was presented from the County Court of Klamath County requesting that the state take over and assume maintenance of the South Poe Valley Road, approximately 10 miles in length, from the town of Olene to a

connection with the Malin-Poe Valley Road which is now being improved. Because of lack of time, the Commission deferred discussion of this matter until its next meeting.

A letter was presented from the Safety Committee of the Grants Pass Lions Club requesting construction of either chains or a fence, preferably a fence, along both sidewalks on what is known as the "Cave Man Bridge" across the Rogue River in Grants Pass as a safeguard to pedestrians, and also requesting installation of a sign at each end of the bridge requiring bicyclists to dismount and walk across the bridge in the pedestrian lanes. The Committee advises that a young man was killed recently on this structure; that the bridge is very narrow for the amount of traffic using it, much of which is children crossing to and from the city park, and that pedestrians are prone to step down onto the highway into vehicular traffic while crossing this structure. It was their thought that a fence constructed along the walk is needed as pedestrian protection. The Engineer advised that this matter has been investigated, and the cost to construct a suitable steel handrail is estimated at approximately $9,000 based on 1,100 feet of handrail at $8.00 per foot. The investigation also reveals, he said, that the fatality referred to by the Committee is the first one that has occurred since the bridge was constructed in 1931, and that in this particular instance the person killed was a bicyclist who rode his bicycle into the side of a truck. The records do not indicate, he said, that there is any more hazard on this bridge than on hundreds of others throughout the state, in view of which, he recommended that the request be denied. In the discussion of this matter the Chief Counsel advised that he has received numerous complaints concerning the hazards on this bridge structure, particularly that children climb on the trestles. In view of this information, the Commission deferred action and referred the matter back to the Engineer to make further investigations covering the features mentioned by the Chief Counsel and to report his findings.

The Commission had under discussion the matter of paying assessments for the improvement of certain streets in Albany bordering on the State Highway Department's Maintenance Headquarters at this place. The Engineer advised that the city has made an assessment against the state's property in the total amount of $1,628.33 for improvements consisting of construction of curbs and gutters and gravel surfacing on Sixth Street and on Burkhart Street which streets lie on two sides of the state's premises. He declared that the Sixth Street improvement affords no benefit to the state highway property because there is no gate or entrance to the property from that street; however there is an entrance to the state's tract from Burkhart Street and the state derives sufficient benefit from the improvement to justify the payment of the assessment for the improvement of that street, which amounts to $620.73. He recommended payment of the assessment for the improvement on Burkhart Street but that the assessment on Sixth Street be denied. The Commission approved the recommendation unanimously.

A letter was presented from The Booth-Kelly Lumber Company, Eugene advising that on February 8, 1948, the Public Utilities Commissioner made an order permitting the company to construct a private logging road across the

Springfield-Creswell Secondary Highway No. 222 near Springfield, Lane County, and inquiring whether or not it would be possible for State Highway Department forces to install this crossing for the company if the company will pay all of the expense incident thereto. The Engineer advised that he has had this matter investigated, and it appears necessary to raise the grade of the highway for about 240 feet. The cost to do the work, he said, including grading, construction of an asphaltic concrete pavement, contingencies, etc., is estimated at $1,500. He further stated that there is sufficient equipment in the vicinity of Springfield to assign to the work and recommended that the company's request be granted on the condition that the work is done at a time when it will not interfere with state work. The Commission approved the recommendation unanimously.

A petition was presented from citizens of Lane County residing in the vicinity of Globe and Richardson, requesting that the resurfacing project now under way on the Richardson-Eugene Secondary Highway between Elmira and Globe be extended to Richardson. The petitioners allege that the present road is in very bad condition and cannot be maintained properly without improvement and does not adequately serve the large volume of traffic which uses it, much of which is log-hauling traffic. The Engineer estimated that a satisfactory improvement would cost about $120,000. He advised that the project is not included in any approved program and there are no funds immediately available to finance the work. The Commission denied the request.

Communications were presented from Mayor M. J. Rutherford, Enterprise, Byron W. Henry, Secretary of the Enterprise Chamber of Commerce; and Fred W. Mastrude, Chairman of the Roads and Highway Committee of the Wallowa County Farm Bureau, urging improvements to the railroad underpass structure n on the Wallowa Lake Highway at Minman where the highway passes under the Union Pacific Railroad tracks. The petitioners represent that the roadway through this underpass is too narrow for the safe passing of trucks and busses, that the vertical clearance is too low, and that the visibility is limited in both directions at the underpass because it is located in the middle of a curve. The Engineer advised that a hazardous condition does exist at this place and the need for the improvement has long been recognized. He estimated that to replace the structure and at the same time improve the alignment would necessitate an expenditure of from $45,000 to $50,000. He pointed out that the project is not in any approved program and suggested that it be given consideration in the preparation of the next construction program. The Commission denied the request for immediate undertaking, however, indicated that it would consider the project in the formulation of its next program.

The Commission discussed a letter from the City of Umatilla, requesting state aid in the construction of concrete curbs along 6th Street in Umatilla, route of the Columbia River Highway. The Commission was advised that because of the McNary Dam Project it has been necessary for the city to improve its water system and make other improvements, which are taking all the funds the City has available and as a result, the city cannot finance many other civic improvements which should be undertaken, including

construction of curbs and sidewalks. In view of the circumstances, the Highway Commission is requested to aid the city by constructing curbs along 6th Street. Action on this matter was deferred by the Commission. The Engineer was instructed to investigate the request and render a detailed report on how much it will cost to do what the city asks.

There was presented for the Commission's consideration a letter from the Roseburg Chamber of Commerce, requesting reconsideration by the Commission of its action on the city's previous request for improvement of the Pacific Highway north of the Roseburg city limits. The Engineer recalled that the city previously requested an investigation to determine what is necessary to relieve the traffic condition existing at this place, that the Commission approved the request, and that an investigation was made and a report rendered at the previous meeting. This report, he said, revealed that a four-lane highway, costing about $250,000, would be required to remedy the situation and the city was so informed; however, it now appears that they are not satisfied with the report and are asking the Commission to approve an inferior improvement. He gave as his thought that if the improvement is needed it should be done properly rather than as a partial project, as the city requests, and he so recommended. The Commission approved the recommendation unanimously and instructed the Engineer to so inform the Chamber of Commerce.

A letter was presented from the Powers Lions Club requesting improvements to the Powers Secondary Highway, including the raising of the grade along certain sections so it will not be flooded during each high water period. The Engineer advised that this matter has been investigated, and it has been found that the sections involved aggregate a total of about 1,400 feet of highway and that it would cost about $8,000 to raise the grade above the ordinary high water level, including construction of an oil mat surface. He further advised that this is a meritorious project and recommended that it be given favorable consideration in programming the balance of $1,250,000 of funds budgeted for special state major betterment projects, the work to be done in 1949. The Commission approved the recommendation.

The Commission discussed a petition from residents and taxpayers of the Jasper-Pleasant Hill area, Lane County, requesting the improvement and oiling of the Springfield-Creswell State Secondary Highway No. 222 between the towns of Jasper and Pleasant Hill. The Engineer advised that an investigation reveals that to reconstruct this section of highway to permanent status, including bituminous macadam surfacing and base, so that it will withstand heavy log-hauling traffic will cost about $120,000 or about $40,000 per mile for the three-mile section involved. This particular section of highway, he said, carries an average daily traffic of about 300 vehicles, about 20 percent of which are logging trucks. He pointed out that the project is not included in any approved construction program. The Commission denied the petition because of lack of funds to finance the work.

The Engineer requested the Commission's specific approval of the following projects, funds for which were authorized by the Commission in the 1948 Budget under the heading "Expenditures for Capital Outlays" and the subheading "Construction of Buildings and Improvements":

Stockpile sites	
Fencing and construction of 2 sand storage bunkers	$ 5,975.00
Maintenance stations	
Miscellaneous improvements such as gas pumps, water supply, gates, fencing, etc. at 13 locations	3,800.00
Truck scales	
Improvement of approaches to scales at 3 locations	1,000.00
Park roads	
Twelve projects, the largest of which is included at the request of the State Parks Superintendent, totaling	22,600.00
GRAND TOTAL	$ 33,375.00

The Engineer presented betterment work orders covering each of the projects in detail and recommended approval of the expenditures. The Commission approved the recommendation by unanimous vote. (For details of the expenditures authorized in each of the above-mentioned work orders, see copies of the work orders on file in the office of the State Highway Commission in Salem, being State Highway Department Budgets File No. 2c.)

The Engineer also presented a list of Minor Betterment Projects, totaling $307,565, for performance during the 1948 season. He explained details in connection therewith and advised that funds to finance them have been provided in the Minor Betterment Budget for 1948. He requested approval of the projects and authority to proceed with the improvements. Following discussion the Commission approved the request by unanimous vote. (For details of this work see copies of the work orders on file in the office of the State Highway Commission, Salem, being State Highway Commission Budgets File No. 2b.)

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1946 State Tax Street Funds which they received in 1947 and that the plans of the projects proposed to be financed with such funds have been examined and found satisfactory:

Athena	Coburg	Pilot Rock	Sherwood
Chiloquin	Falls City	Prairie City	

He recommended approval of the plans by the Commission. The Commission

approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto marked EXHIBIT "F" which by this reference is made a part hereof with like effect as though extended in full herein.

A request was presented from Mr. E. C. Hart, Mohawk, Oregon, for improvement of the "Mohawk Highway" in Lane County. The Engineer advised that the highway referred to is a county road under the jurisdiction of the Lane County Court; that it is on the Federal Aid Secondary Highway System, but no money has been provided for its improvement. He further stated that the road is rough and the alignment very poor, but the Lane County Court has never requested that it be reconstructed in the immediate future. The Commission ordered that Mr. Hart be informed of the status of the road and that there are no monies available to finance the improvement that he requests.

The Commission discussed a request from the City of Milton for state cooperation in solving a drainage problem at the south end of Main Street in Milton City, involving drainage waters from the state highway and adjoining land south of Milton. The Engineer advised that the Oregon-Washington Highway enters Milton in the southern part of the town on a descending five percent grade, following a gulch which drains approximately 1,500 acres of low rolling hill country. This gulch, he said, carries considerable water from water spouts in the summer months and from melting snow during the winter season. Along with the water is considerable silt and debris which enters the highway drainage system at the south end of Main Street. Correction of the condition, he said, is partly the obligation of the city, although it is primarily a problem for the State Highway Department to solve, inasmuch as the entire run-up from the gulch is taken into the highway drainage system before being disposed of. This condition, he said, has been thoroughly investigated and corrective measures are estimated to cost approximately $17,400, divided as follows: $4,000 for construction of check dams by state forces; $13,400 for interception of flood waters at the intersection of Main and Frazier Streets and the carrying of such waters along Frazier Street in a 36-inch concrete pipe to a slough which carries the discharge from a hydro-electric plant into the Walla Walla River. This latter work, he said, will be performed by the City of Milton if the state will contribute $8,600 toward the expense. He recommended approval of the project, the state's portion of which totals $12,600, as a Minor Betterment Project. Following discussion the Commission approved the recommendation unanimously and ordered that the matter be covered by appropriate agreement between the city and the state.

The Commission discussed the following requests for extensions of time within which to complete highway contracts:

Warren Northwest, Inc., Contract No. 2738 for grading and paving the South Unit of the Steiwer Hill-Albany Section of the Pacific Highway East, in Linn County, requested an additional extension of time of 243 days, from September 30, 1947, to May 31, 1948, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to inability to secure

dry lumber for guardrail, which delayed construction of that facility and the painting of it. The Engineer advised that the Contractor was delayed in completing the guardrail due to unsuitable weather for curing and painting the rails. The traveling public, he said, has not been inconvenienced by the delay because the highway has been in continuous use. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Warren Northwest, Inc., Contract No. 2739 for grading and paving the North Unit of the Steiwer Hill-Albany Section of the Pacific Highway East, in Marion County, requested an additional extension of time of one day, from September 30 to October 1, 1947, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to delay caused by a cement shortage and difficulty in securing box cars for cement deliveries. The Engineer advised that the overrun in the time limit could be attributed entirely to delays in cement shipments. He recommended, in view of the circumstances, that the additional extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Berke Bros., Contract No. 2790 for grading the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County, requested an additional extension of time of 67 days from October 1 to December 6, 1947, within which to complete this job. The Engineer advised that the surfacing of the Spencer Creek-Agate Beach Section, including a small amount of grading at the north end of the job, was being done under a separate contract by Mr. Lloyd Calkins, and since the work was closely tied in with Berke Bros.' grading job, it seemed desirable for Berke Bros. to do the small amount of grading work that came under the Calkins contract, and arrangements were effected to take care of it in that manner. Such arrangement, he said, necessarily deferred Berke Bros.' work on their own contract so that it extended into the early fall rainy season making it impossible to complete the project within the specified time. The arrangement for the grading work, he said, was to the state's best interests, and in view thereof, he recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

M. C. Lininger & Sons, Contract No. 2860 for furnishing crushed rock in stockpiles for the Siskiyou Junction-Long Prairie Creek Section of the Green Springs Highway, in Jackson and Klamath Counties, requested an extension of time of 80 days, from August 31, to November 19, 1947, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that they were prevented from starting the work as soon as they expected because of unanticipated overruns on the rock

crushing contract which they had with the U. S. Forest Service. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He further stated that when the contractor started on his state job he completed it expeditiously so that the state did not incur any extra expense for engineering supervision. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Archie R. Averill, Contract No. 2872 for construction of a concrete viaduct over Spencer Creek on the Oregon Coast Highway near Newport, Lincoln County, requested an additional extension of time of 34 days, from November 15 to December 19, 1947, within which to complete this job. He alleged that the overrun in time limit was caused by his being required to do extra work that was not in the contract. The Engineer advised that the Commission, at its meeting on October 21, 1947, granted Mr. Averill an extension of time from September 30 to November 15, 1947 without penalty within which to complete this job, with the understanding, however, that if the project was not completed by November 15 the contractor would be required, as a penalty, to reimburse the state for all engineering costs incurred in connection with the job subsequent to November 15. He recommended, in view of this condition, that the extension of time now requested be granted but that Mr. Averill be charged with the engineering expense incurred subsequent to November 15, 1947. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

L. R. Kauffman, Contract No. 2914 for rock production on the Alsea Highway and the Alsea-Deadwood Secondary Highway, in Benton and Lincoln Counties, requested an additional extension of time of 70 days, from January 31 to April 10, 1948, within which to complete this job. He attributed his failure to complete the project within the previously-extended time limit to inclement weather and breakdown of his equipment. The Engineer advised that Mr. Kauffman experienced serious mechanical trouble with his rock-crushing equipment and had it not been for this trouble he would have completed his contract within the specified time. The traveling public, he said, has not been inconvenienced by the delay because the materials Mr. Kauffman is manufacturing will not be needed until next summer's oiling and paving season. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The State Highway Commission, in passing on contractor's requests for extensions of time within which to complete the contracts as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

The Engineer reported that contracts Nos. 2739, 2790, 2872, 2929, and 2935 have been completed according to the requirements of the contracts or

modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the contracts as reported and authorized final payment in connection with each. The Commission by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "G" and by this reference made a part hereof with like effect as though extended herein.

The Chief Counsel presented a form of resolution with respect to naming the Coos River Ferry "Charles Enegren" Ferry in honor of Mr. Charles Enegren, a pioneer of the district, pursuant to action taken by the Commission at the previous meeting. The Commission approved and adopted the resolution as prepared, by unanimous vote, which resolution is attached hereto, marked EXHIBIT "H", and by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that the Commission's contract with Babbidge & Holt covering the operation of the Astoria-Megler Ferry expires on May 31, 1948. He requested authority to advertise for bids for continuation of this service after May 31. The Commission approved the request by unanimous vote.

In this connection the Engineer inquired as to the length of time the new contract should run. The Commission ordered that the specifications provide for one year's operation with the privilege of extending the time if the Commission so desires.

The Commission discussed the Engineer's written report dated March 8, 1948, on the purchase of hull and machinery and protection and indemnity insurance for the ferry "M. R. Chessman". This report gives quotations for insurance purchased in the American market and also in the London market and points out that a comparison of the rates shows them to be identical, the only difference being in the various combinations of plans as to the amount of the franchise or deductible amounts against claims. (For details of this report see Engineer's report dated March 8, 1948, in general files.) It appears from the report that Plan 1-A carries the highest premium rate --$13,938; also that under this plan the P. & I. coverage carries only a $250 deductible clause for all claims, which is the same as is presently in force on ferry boats "Tourist No. II" and "Tourist No. III". It also appears that the premium for the hull and machinery coverage is based on a $1,000 particular average franchise for all claims, but not deductible, for which an additional premium of $920 is charged over and above the cost of Plan 2-A, which is based on a $1,000 deductible charge. Plan 2-A was also discussed, and it appears that the only difference between these two plans is the extra charge for the non-deductible provision. It was the thought of the Commission that full coverage should be purchased, and accordingly, the Commission voted unanimously to purchase the insurance under Plan 1-A, totaling $13,938. The Commission also decided unanimously that the insurance should be purchased in the American market through the Oregon Association of Insurance Agents, represented by Jewett, Barton, Leavy & Korn, who have been designated by the Association as its servicing agent.

The question whether or not to purchase excess protection and indemnity coverage on this vessel, as is now carried on "Tourist No. II" and "Tourist No. III", making a total coverage of $500,000 on each vessel, was also discussed. The Engineer advised that he has received no direct quotation for furnishing such coverage, but he estimated that it would cost approximately $800 annually. The Commission deferred a decision in this matter until later.

Consideration was given by the Commission to the abandonment of a portion of the Umatilla-Hermiston Section of the Old Oregon Trail, in Umatilla County, where this highway has been reconstructed on other alignment. The Engineer advised that the new highway has been completed and is now used by traffic and that the old highway no longer is of value for state highway purposes. He recommended abandonment of the old route. The Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "I", which by this reference is made a part hereof with like effect as though extended in full herein.

The Commission also discussed abandonment of a portion of the old route of the North Santiam Highway between Gates and Niagara, Marion County. The Engineer advised that since the completion of the new highway between these points the old route no longer is of value for state highway purposes. He recommended abandonment of the old route by the Commission in favor of Marion County. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with regard thereto marked EXHIBIT "J", which by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion and recommended a change in the signal installation on the Salem-Dallas Highway at its intersection with the Salem-Dayton Secondary Highway, in West Salem. He advised that the signal presently installed at this intersection consists of a flashing beacon, which, while it somewhat improves traffic conditions, does not permit adequate access to the Salem-Dallas Highway from the secondary highway; moreover, the existing speed-control signal is conducive to rear-end collisions on the Salem-Dallas Highway and causes unnecessary delay to traffic. He pointed out that an average of 15,537 vehicles enter this intersection daily, of which 13,286 are on the Salem-Dallas Highway and 2,252 are from the secondary highway. He recommended that a semi-actuated traffic signal be installed as a substitute for the existing one, including a push-button attachment for the convenience of pedestrians. He estimated the cost of such an installation at about $2,500, which, he said, would have to be paid for entirely with state funds because the intersection is of two state highways outside the city limits of West Salem; further that the cost would have to be charged to the Minor Betterment Contingency Fund. The Commission approved the recommendation unanimously.

A resolution was presented from the City of Oregon City designating the intersection of 7th Street and Washington Street as a stop street at all four entrances and requesting concurrence by the Commission in order to meet the legal requirements. The Engineer advised that 7th Street is the route of

the Cascade State Secondary Highway, so in order to legalize the proposed signal installation it will be necessary for the State Highway Commission to adopt a companion resolution. An investigation of the conditions obtaining at this intersection, he said, has been made by the Traffic Engineer who recommends, in the interests of traffic, that this intersection be designated as a four-way stop, on the condition that the city will erect and maintain the necessary signs. The Engineer advised that he concurs in the recommendation. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "K" which by this reference is made a part hereof with like effect as though extended herein.

The Engineer rendered a status report on the matter of installing a grade crossing signal on N. W. Front Avenue, Portland, at a point where the spur track of the Northern Pacific Terminal Company crosses this thoroughfare. He recalled that on February 28, 1941, the Commission authorized installation of this signal, which was estimated to cost $733, at the expense of the state, using Federal funds; however, it was not installed because of the war work-stoppage order and in the meantime all of the Federal funds were absorbed in other grade-crossing jobs. At its meeting on October 21, 1947, he said, the Commission again authorized this installation, with the understanding that the cost to the state would not exceed the original $733 commitment. Such information was conveyed to the Northern Pacific Terminal Company which has asked reconsideration by the Commission because the present estimate to install the signal is $1,219, and the company is asking the state to assume the entire expense. He recommended denial of the request on the basis that the signal will be of material benefit to the company which, in view thereof, should assume the cost over and above the $733 that the Commission has agreed to pay. He further recommended that if the railroad company will not accept such proposition the state pay to the company $733 and take possession of the materials which the company has purchased for the purpose and which can be used at some other point on the State Highway System. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion a letter from the Brookings-Harbor Chamber of Commerce concerning the formulation of a highway lighting district along US101 through the town of Brookings. Accompanying the letter was a copy of a petition directed to the Curry County Court requesting approval of this district, a copy of the district's by-laws, and a picture illustrating the type of luminaire proposed for the installation. The Chief Counsel advised that, according to the statutes, the petition must first have the approval of the county court because the county court is the tribunal which has to do with the creation of the district, but after the district has been formed it must then submit its plans and specifications to the Highway Commission for its approval before beginning construction of the project on the state highway. He advised that insofar as he knew the county court has not acted on the petition, so there appears to be nothing for the State Highway Commission to do at the present time. He mentioned, however, that he had discussed this matter with the Engineer and that they

are both of the opinion that the project has merit. The Commission decided unanimously, in view of this report, to defer action on the matter pending the order of the county court with respect to the petition.

Pursuant to instructions from the Commission at the previous meeting the Chief Counsel presented a form of resolution covering the subject of parking of vehicles on state highway right of way in the town of Brookings. Following discussion the Commission unanimously approved the resolution as prepared, a copy of which is attached hereto, marked EXHIBIT "L", and by this reference made a part hereof with like effect as though extended in full herein.

The Engineer reported a hazardous condition existing on the Pacific Highway East (US99E) in front of the Piggly Wiggly Store at Courtney Road one mile south of the town of Milwaukie due to the congestion of traffic at this point and the volume of fast-moving highway traffic. This matter, he said, has been called to his attention by the Oregon State Police who suggest, in the interests of safety, the establishment of a "no parking" zone for a distance of about 300 feet at this location. The matter has been investigated by the Traffic Engineer, he said, who recommends the establishment of such a zone on both sides of the highway between Highway Engineer's Stations 240+45 and 243+55, which will eliminate a hazard which now exists to the many cars entering and leaving the Piggly Wiggly parking lot and to the pedestrians who park their cars on the opposite side of the highway and must cross it to gain access to the store. He advised that he concurs in the recommendation that a "no parking" zone be established between these stations. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "M" which by this reference is made a part hereof with like effect as though extended herein.

The Engineer requested authority for Mr. Manley Robison, Director of the Travel Information Department, to attend, at state expense, a tourist conference which is to be held in Pullman, Washington, during April 4 to 7, 1948. He estimated that Mr. Robison's expense would not exceed $56.50. He also requested authority for Mr. Carl W. Jordan, Assistant Director of the Travel Information Department, to attend, at state expense, travel shows in Oakland and Los Angeles, California, during the period March 26 to April 22, 1948, where he will maintain exhibits on behalf of the State of Oregon. He estimated Mr. Jordan's expense would amount to about $409.70. The Engineer pointed out that the Advisory Board on travel matters has approved the expenditure in both instances. The Commission unanimously approved both requests subject to further approval by Governor Hall.

The Secretary presented a certificate from the U. S. Marine Corps, expressing appreciation for contributions made by the State Highway Commission toward national defense in granting leaves of absence to State Highway Department employees to attend active duty training with the U. S. Marine Corps Reserve. The Commission accepted the certificate with thanks and ordered it properly filed in the Department records.

Letters were presented from Mr. W. W. Balderree, President, and Mr. F. M. Sercombe, Secretary, of the Oregon State Bar Association, requesting that the State Highway Commission place some of its advertising in the American Bar Association Journal between now and the Association's annual meeting in Seattle in September, it being their thought that such advertising would create a desire in its members to attend the convention. The Commission ordered these communications referred to the Advisory Board on travel matters for its recommendation.

The Chief Counsel reported receipt of an application from Mr. William R. Blake, Portland, for permission to operate a popcorn wagon on state park property at Sandy, Oregon, during the time that smelt are running in the Sandy River. He advised that Mr. Blake has offered to pay $100 rental fee for this privilege. He also reported receipt of an application from Mr. Paul Mumpower, through his attorney, Mr. John R. Latouretto, Portland, for permission to erect a structure at the east end of the Troutdale Bridge for the purpose of renting dip nets and selling smelt during the progress of the smelt run in the Sandy River. The Chief Counsel recommended against granting these privileges, however, suggested that if such facilities are needed for public convenience the Commission might erect its own shelters and sell concessions as the result of competitive bidding. Mr. W. C. Williams, 1st Assistant State Highway Engineer, gave as his opinion that if Mr. Blake and Mr. Mumpower are granted these privileges it will create unfair competition unless the Commission would also grant similar privileges to others who request them. The State Highway Engineer recommended the denial of all applications for such privileges.

In the discussion that followed Chairman Banfield raised the question as to whom these people interfere with. He gave as his thought that perhaps it would be satisfactory to grant a permit to the first person who requested one, but that the Commission is not obligated to grant a permit to everyone. He also gave as his belief that it would be a "real policing job" to try to keep everyone off the state's property. As the result of this discussion the Commission referred the matter back to the Engineer, the Chief Counsel and the Parks Superintendent to confer and work out a solution, with the understanding that if these people are allowed the use of the state's property and it develops that a hazard is created, they should be ordered off the premises, with police assistance if necessary.

The Engineer reported that Mr. J. F. Waller, Chief Reconnaissance Engineer for the State Highway Department, will reach retirement age in May of this year. He advised that Mr. Waller has been with this Department for 18 years and is an exceptionally well qualified engineer, particularly in the type of work he is doing; further, that there is no one connected with the Highway Department available to replace Mr. Waller at this time. He recommended approval of the retention of Mr. Waller in the state's service for another year's time. The Commission approved the recommendation unanimously with the understanding that the Engineer will start immediately to train someone to take Mr. Waller's place at the expiration of this one-year period.

In this connection the Commission instructed the Engineer to submit to the Commission, at once, a report on how many employees will reach retirement age between now and the first of January 1949.

The Engineer asked the Commission to confirm for the record the telephonic authority given him to post the following highways for 50-percent reduced load limits: McKenzie Highway between the Forest Boundary and Belknap Springs, East Diamond Lake Secondary Highway from its junction with the Crater Lake North Secondary Highway to the junction with The Dalles-California Highway, Crater Lake North Secondary Highway from its junction with the East Diamond Lake Secondary Highway to Diamond Lake. The Commission approved such postings and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "N" which by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also asked the Commission to confirm for the record the telephonic authority given him to increase the weight allowed on the Nashville-Blodgett Section of theEddyville-Blodgett Secondary Highway, in Lincoln County. The Commission approved such increased weight allowance and thereupon by unanimous vote adopted the attached resolution relative thereto naked EXHIBIT "O" which by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that, in conformity with telephonic authority given him by the Commission, he posted the Walton-Cedar Creek Section of the Richardson-Eugene Secondary Highway for a maximum gross weight of 20,000 pounds, effective February 20, 1948; also, that on March 1, 1948, because of improved conditions the signs were removed and legal loading was restored. He asked the Commission to confirm for the record the authority given for posting reduced load limits on this highway. The Commission approved the request by unanimous vote. The Commission also approved action of the Engineer in restoring the legal weight limit on this highway as of March 1, 1948.

The Commission had under discussion the log-hauling violations committed by Mr. Harold H. McGee, Springfield, Oregon, in operating this service over state highways in the vicinity of Eugene, particularly the Engineer's letter to the Commission dated March 10, 1948, outlining the violations in detail and including a record of such violations for the years 1945, 1946, and through 1947 to date. The Engineer recalled that the Commission at its meeting on February 2 and 3, 1948, had this matter under discussion and at that time canceled Mr. McGee's permit on a permanent basis, and the Public Utilities Commissioner was requested to take up Mr. McGee's P.U.C. plates; however, subsequent thereto, because of certain circumstances, the request was temporarily withdrawn pending a further review of Mr. McGee's record. He submitted for the Commission's consideration Mr. McGee's petition, prepared by his attorney, Mr. Hale G. Thompson, Eugene, for the restoration of his permit so as to permit him to continue log-hauling operations without interruption. In this petition Mr. McGee agrees to cooperate with the State Highway Department to the fullest extent and to make every effort to avoid the violation of any rule, regulation, or statute pertaining to his operation. The Engineer pointed out that Mr.

McGee's statement that hereafter he will cooperate with the Highway Department and will haul legal loads is identical with the statement made in his letter to the Commission dated October 2, 1945, which was the basis on which the Commission restored Mr. McGee's permit which was canceled at that time. He recommended that the Commission confirm the action taken at its meeting on February 2 and 3 canceling the permit, with this exception -- that instead of canceling it on a permanent basis, Mr. McGee be ruled off the road for a period of 30 days. Following considerable discussion the Commission approved the recommendation by unanimous vote and so ordered. (For further details on this matter see Engineer's letter to the Commission dated March 10, 1948, and other exhibits in the general files, Salem.)

Due to another engagement, Commissioner Chandler excused himself from the meeting at this time but returned later in the session.

The Commission discussed briefly and ordered filed the Engineer's report on Weighmaster operations for the month of January, 1948.

The Engineer brought up for discussion a request from the U. S. War Department that it be allowed to improve the channel of Amazon Creek beneath Bridge No. 2050 on the Richardson-Eugene Secondary Highway No. 220 in the City of Eugene. He advised that this matter has been given careful study and, in his estimation, the contemplated improvement not only will be of advantage to the Army as a flood-control feature, but will also be beneficial to the state in draining the highway. He presented a form of agreement prepared by the War Department covering the matter and pointed out that all costs, including future maintenance expense, will be paid by the Federal Government. He recommended approval of the request and execution of the agreement. The Commission approved the recommendation unanimously. The agreement was signed later in the session.

A letter was presented from the Central Lincoln People's Utility District, Newport, Oregon, requesting an extension of time on the temporary permit heretofore issued by the State Highway Commission authorizing the district to maintain a power line on the Coos Bay Bridge (McCullough Bridge) pending construction of a cable crossing under the structure. The District points out that this permit expires on April 7, 1948, and that it has changed its plans with respect to the construction of the cable crossing in that it now plans to secure Bonneville power from its Reedsport-Glasgow line. Because this new arrangement will not be completed until October 1949 the District requests an extension of its present permit for a period of 19 months, allowing its facilities to remain on the bridge structure for that length of time. The Engineer recommended, in view of the circumstances, approval of this request. The Commission approved the recommendation.

The Commission had under discussion matters pertaining to the issuance of emergency transportation permits, particularly a form of resolution with respect thereto which was prepared by the Chief Counsel in collaboration with the Engineer. The Commission was assured by the Engineer and the Counsel that the provisions of the resolution conform with the

Engineer's letter to the Commission concerning the subject dated January 30, 1948. With this assurance the Commission approved and adopted the resolution which is attached hereto and marked EXHIBIT "P" and which by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested authority to purchase three 3,000 gallon semi-trailer tanks for assignment to Eastern Oregon oiling crews. He estimated the total cost involved at $12,000. The Commission approved the request.

The Engineer also requested authority to purchase two Buick automobiles, one for assignment to Mr. W. W. Stiffler, 2nd Asst. State Highway Engineer, and the other to the Division Engineer located at La Grande. He estimated the total cost involved at $4,500. The Commission approved the request.

In this connection the Engineer pointed out that a new seven-passenger automobile is needed for the Commission's use in making inspection trips throughout the state, the Buick that is now being used for this purpose being old and not satisfactory for the purpose. He requested authority to purchase a new car. The Commission approved the request by unanimous vote with the understanding that cars of different makes are to be considered and that the color of the car shall not be black.

The Engineer brought up for discussion a proposed agreement with the Southern Pacific Company and Jackson County with respect to remodeling the Tolo Overcrossing on the Pacific Highway south of Ashland. He advised that this overcrossing was constructed by Jackson County years ago and now is too narrow to satisfactorily care for the traffic which passes under it; in fact, a dangerous condition exists. He recommended approval of this agreement and construction of the project which would be paid for jointly by the railroad company, the county, and the state. The Commission approved the recommendation unanimously. The agreement was signed later in the session.

The Commission discussed a written report from the Engineer dated March 8, 1948, concerning the cutting of timber by a Mr. Louis Eisele, Gaylord, Oregon, on state highway property adjacent to the Powers Secondary Highway about 15 miles south of the Coos Bay-Roseburg Highway. It appears that Mr. Eisele purchased property adjacent to a state-owned stockpile site at this location and understood at the time that he was also purchasing the state's property and accordingly, cut the timber standing thereon, consisting of 29,640 board feet of second growth Douglas fir and 5,800 board feet of white fir, for a total of 35,264 feet of timber, log scale. The Engineer advised that this matter was discussed with Mr. N. S. Rogers, State Forester, who estimates the value of this timber at $6 per thousand FBM and who gave as his thought that the Highway Commission should secure such amount from Mr. Eisele. The Engineer also stated that Mr. Eisele is willing to pay $5 per thousand board feet for the timber and has deposited with the Commission checks totaling $176.30. He further stated that investigation reveals that Mr. Eisele has a good reputation in his vicinity and apparently the error was not deliberate. He recommended, in view thereof, that no penalty be imposed upon him but that he be charged $6 per thousand for the timber taken and that he be required to furnish a $500 bond to insure clean up of the premises and restoration of the hauling

road after the timber has been hauled out. The Commission approved the recommendation unanimously.

There was brought up for discussion by the Commission the matter of adopting a state-wide system of throughway highways. Action on this matter was deferred until Commissioner Chandler is present.

There was also presented a newspaper editorial from the Astorian-Budget with respect to removal of smelt sands from the ocean beach at Yachats. The Commission, without comment, ordered this filed in the Department records.

The Commission had under discussion the setting of a date for its next regular meeting for receiving bids and by unanimous vote decided to hold such meeting in Portland on Monday and Tuesday, April 19 and 20, 1948. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

The Commission, upon recommendation of the Engineer and the Chief Counsel approved and later signed a quitclaim deed conveying unto John P. Stobie and wife 0.062 acre of land situate adjacent to the McKenzie Highway in Lane County.

The Commission considered an offer from Rev. William F. Morse, Seaside, to sell to the state some lots which he owns in Wi-ne-ma Subdivision adjacent to the Oregon Coast Highway about one mile south of Oretown, in Tillamook County. It appears that Rev. Morse has an option to purchase this property but cannot finance the deal unless the state will purchase the portion thereof that will be needed as right of way when the highway alignment is revised at this point. The Engineer exhibited a map showing the location of the property and the proposed highway revision. He advised that Rev. Morse's option expires on April 1, 1948, and that he offers to sell the right of way to the state at the rate of $150 per lot in order to prevent the property getting into the hands of someone who will use it for purposes adverse to those of his church, which maintains a boys camp on adjoining property. The Engineer advised further that the lots are so located that they can be used to advantage in the revised location of the highway, and he recommended that they be purchased for the sum quoted. The Commission approved the purchase by unanimous vote.

The Engineer brought up for discussion the matter of widening the right of way of the Oregon Coast Highway for a short distance in the northern part of Depoe Bay where Mr. Vere H. Loucks plans to make improvements to his property. He advised that Mr. Loucks has about a 150-foot frontage on the east side of the highway and that it would be necessary to purchase from him a strip about ten feet wide in order to provide a uniform width right of way along this section. Mr. Loucks, he said, is going to do considerable building and remodeling work and has asked that an agreement be reached with respect to this right of way matter so he can make his plans accordingly. It was the Engineer's thought that this right of way should be purchased now before Mr. Loucks starts his improvements, and he requested authority to furnish the Right of Way Department with descriptions and authority for the Right of Way Department to negotiate the purchase of the property. The Commission approved the requests unanimously.

The Chief Counsel brought up for discussion the matter of sale of excess real properties owned by the State Highway Department. He advised that the present practice is to bring those matters to the attention of the Commission as they arise; however, because of the mass of detail work connected with each transaction, it sometimes works a hardship on the Department. He suggested that it would be helpful if the Commission would order the sale of real property only twice a year, once in the spring and once in the fall. The Commission approved the suggestion by unanimous vote.

A letter was presented from the City Council of Bonanza, Oregon, requesting the improvement of a county road which extends northerly from Bonanza to a junction with the Klamath Falls-Lakeview Highway over Maxwell Hill. The Engineer advised that this is a Federal Aid Secondary Highway; but no funds have been appropriated to improve it. He suggested that the City Council be informed that no provision has been made in the Commission's construction program to improve the road but that the Commission will consider it, along with others submitted by the Klamath County Court, when future construction programs are planned. The Commission approved the suggestion and so ordered.

The Commission discussed a request from the City Council of Richland for construction of an oiled footpath along the Baker-Homestead Highway from Richland to Eagle Valley Union High School. The Engineer advised that an investigation has been made of this request, and it has been found that approximately 1,100 feet of footpath will have to be constructed. The investigation also reveals, he said, that approximately 130 pedestrians and 755 vehicles pass along this section daily, and because the width of the oil surface of the highway is only 18 feet wide, there is a considerable hazard to students of the school. He recommended, in view of existing conditions that the Commission authorize the construction of a footpath, which he estimated would cost about $800, and that the expense be charged to the Minor Betterment Contingency Fund. The Commission approved the recommendation.

The Engineer requested authority to make a location survey of the section of the Oregon Coast Highway extending southerly from the Rogue River Bridge to the north end of the location heretofore adopted by the Commission in the northerly part of the town of Gold Beach. He advised that Mr. Collier Buffington, Gold Beach, who owns property at this place, plans to sell portions of it, and if he does, it is quite certain that building development will follow which raises the question whether or not such development will interfere with the state's ultimate plans for rerouting the highway at this point. He estimated the cost of a complete survey at approximately $1,000. The Commission approved the request by unanimous vote.

The Commission had under discussion a resolution passed by the Lake County Court on March 4, 1948, offering to contribute county funds in the amount of $10,000 toward the cost of construction of a portion of the Warner Secondary Highway between the Fremont Highway junction and Drake Creek, bids for which construction work were received by the Commission at this meeting, if the amount of the low bid received by the Commission for this work exceeds the amount of funds the Commission has allocated for this project. The Secretary was instructed to thank the County Court for its offer and to advise the Court

that the Commission does not need the county funds because a satisfactory bid was received for the work and the contract has been awarded.

The Commission had under discussion a proposed agreement with the State of Idaho covering the maintenance of four interstate bridges across the Snake River at Weiser, Payette, Ontario, and Nyssa. Following careful consideration of the provisions thereof the Commission approved and signed the agreement as prepared.

Commissioner Ben R. Chandler returned to the meeting at this time.

The Commission also had under discussion a proposed agreement with contractors Leonard & Slate, Oreg. Ltd. for the removal of slide materials which have accumulated on the floor of the Oneonta Borrow Pit on the Upper Columbia River Highway, Multnomah County. The Engineer advised that this work is necessary in order to provide proper drainage of the facilities that have been installed by the Highway Department at this location. He estimated that there are 15,000 cubic yards of materials to be removed and that the cost would amount to about $1 per cubic yard, or about $15,000. These materials, he said, would be placed in stockpile for use by the Public Roads Administration for riprapping and embankment slopes in connection with their contract for the construction of the Wahkeena Creek-Dodson Section of this highway. Leonard & Slate, Oreg. Ltd., he said have equipment available at this time to perform the work, as they have a subcontract on the government project, and he gave as his thought that the state could save considerable money in arranging with this contractor to do the work while the equipment is available nearby. The Commission approved the arrangement by unanimous vote and thereupon signed the agreement.

The Engineer discussed with the Commission the provision that has been made by the architects for the new State Office Building for a service driveway into this building. He exhibited a sketch showing the driveway as planned which enters the building from Capitol Street, route of the Pacific Highway East, and which, if constructed at such location, will create a hazardous condition for traffic along this heavily-traveled thoroughfare. The same kind of entrance, he said, has been planned by the architects for the Highway Department Office Building which would increase the hazard. It was his thought that this should be called to the attention of the architects and some other provision made for driveway entrances and exits on Chemeketa and Court Streets. He advised that he is bringing this matter to the attention of the Commission at the request of the Board of Control because the driveway entrances to both buildings must be identical in order to provide for harmony. Chairman Banfield suggested that it would be more attractive if the service driveway for each building were constructed so that traffic enters and leaves the buildings on Chemeketa Street. Commissioners Schaupp and Chandler expressed their approval of this suggestion whereupon the Engineer was instructed to take up the matter with the Board of Control and explain the reasons why the Highway Commission feels that the entrances should be from Chemeketa Street rather than from Capitol Street.

The Chief Counsel brought up for discussion an agreement with the Union Pacific Railroad Company providing for encroachment on railroad property adjacent to the Nyssa-Adrian Highway in Malheur County south of the town of Adrian. He said that the railroad company wishes to eliminate from the second line in Section 1 of the agreement the words "donate, convey and confirm," which will not adversely affect the state's interests. He recommended that the request be granted and suggested that, since the agreements have already been executed by the Commission, it would be quite satisfactory for the Commissioners to place their initials in the margin opposite this section from which the three words have been deleted. The Commission approved the recommendation and thereupon initialed the agreements at the place indicated by the Chief Counsel.

The Commission discussed briefly matters pertaining to the South Umpqua River Bridge on the Pacific Highway near Dillard, Douglas County, which was severely damaged by high water in the early part of January 1948. The Commission expressed a desire to inspect the damaged pier fender personnally as soon as the work has progressed to the point where conditions are right for such inspection. The Engineer was instructed to keep the members of the Commission advised relative thereto. He was also instructed to render a written report on the failure of the structure.

The settlement with Ericksen Brothers for right of way needed in front of their creamery in St. Helens was again discussed briefly by the Commission. The Chief Counsel was authorized and instructed to proceed with the condemnation proceedings to acquire the extra right of way if the owners refuse to accept the sum of $25,000 heretofore offered them by the Commission for the property.

The Commission considered, approved, and signed agreements, etc. as follows:

Agreement with W. O. Condray covering lease for road materials on the Johns-Glendale Section of the Pacific Highway, Douglas County.

Agreement with Martin Peterson, Florence, Oregon, extending a previous agreement authorizing Mr. Peterson to remove discard or reject materials at Cape Quarry on the Oregon Cost Highway near Cape Creek, Lane County. (See Miscellaneous Agreement No. 847)

Bargain and sale deed conveying unto Sherman Woodruff and wife property situate in the City of Eugene.

Lease and permit agreement with Herman and Fleta A. Hoflich covering parcel of land on the Tidewater Section of the Alsea Highway, Lincoln County, needed for quarry purposes.

Ground lease and permit agreement with Maurice and Esther Anderson covering lease of quarry site on the Alsea Highway, in Lincoln County, needed for the improvement of the Tidewater Section of this highway.

14727

Quitclaim deed conveying unto Rae S. Evans 0.6 acre of land adjacent to the Alsea Highway in Lot 5, Section 32, T. 13 S., Range 10 W. W. M., Lincoln County.

Bargain and sale deed conveying unto Lora E. and Robert S. Baughman right of access to and from the Willamette Highway from their abutting land in Lane County.

Quitclaim deed conveying unto Will[illegible]. Colvard three parcels of land situate on the Love Bridge-Black Fr[illegible] Section of the Baker-Homestead Highway, in Baker County.

Bargain and sale deed conveying unto Twin Oaks Company a small parcel of land, being fractional Block 18 of the original plat of Eugene.

Agreement with Weyerhaeuser Timber Co., providing for the removal of road materials from a parcel of company-owned land in the SW¼ SW¼ of Sec. 1, T. 38 S., Range 7 E., W.M., Klamath County.

Quitclaim deed conveying unto John P. Stobie a small parcel of land formerly used as a stockpile site in connection with the improvement of the McKenzie Highway in the SW¼ of Sec. 13, T. 16 S., Range 5 E., W. M., Lane County.

Bargain and sale deed conveying unto the Mountain States Power Company a small parcel of land situate on the Santiam Highway in the City of Lebanon to be used as a canal channel change.

Bargain and sale deed conveying unto Henry S. Thompson property situate in the SW¼ SE¼ of Sec. 26, T. 4 N., Range 36 E., W.M., Umatilla County.

Agreement with Leonard & Slate, Oreg. Ltd., contractors, covering the removal of loose slide materials accumulated on the floor of Oneonta Borrow Pit on the Upper Columbia River Highway, Multnomah County.

Agreement with the State of Idaho covering the maintenance of four interstate bridges across the Snake River.

Supplemental agreement with the Southern Pacific Company and Jackson County relative to widening the Tolo Overcrossing on the Pacific Highway, in Jackson County.

Agreement with Weyerhaeuser Timber Co. relative to the relocation of the Southern Pacific Company's tracks, the relinquishment of access, and the deeding of certain property to the company abutting the Oregon Coast Highway between North Bend and Coos Bay, Coos County.

Bargain and sale deed conveying unto Weyerhaeuser Timber Co., property situate in Coos County pursuant to the above-mentioned agreement.

March 12, 1948

Permit granting to the U. S. War Department authority to improve the channel of Amazon Creek beneath State Highway Bridge No. 2050 on the Richardson-Eugene Secondary Highway, in Eugene, Lane County.

Field agreements with the U. S. Dept. of Interior providing for the protection of juniper wayside along the Central Oregon Highway between Bend and Horse Ridge, along the Ochoco Highway between Redmond and Prineville, and along the McKenzie Highway between Sisters and Redmond.

The meeting adjourned at 5:30 p.m.

Minutes of March 11 and 12, 1948

EXHIBIT "A"

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, Clatsop County, acting by its County Court, the members of which are Honorable Guy Boyington as County Judge, and Honorable A. Zundel and Honorable Myron E. Jones as County Commissioners, have by bargain and sale deed conveyed to the State of Oregon, by and through its State Highway Commission, approximately 112 acres of land and has hereby made the same available without cost to the general public for park and recreational purposes; and

WHEREAS, the members of the Oregon State Highway Commission, speaking for the citizenry of the State, acknowledge with appreciation the contribution thus made by the members of the County Court of Clatsop County to the people of the State of Oregon;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, all members being present and affirmatively voting:

1. That the deed now delivered by Honorable Guy Boyington to the Highway Commission by which the grantors have conveyed to the State of Oregon, by and through its State Highway Commission, approximately 112 acres of land for park and recreational uses, be and said deed hereby is gratefully accepted for and on behalf of the people of the State of Oregon.

2. That said deed which has already been recorded in the Deed Records of Clatsop County be filed in the permanent records of the State.

3. That the Superintendent of State Parks hereby is instructed to add said acreage to the other properties which constitute and are designated State park and recreational areas, and that said property be developed and used for park and recreational purposes as are other like park properties owned by the State.

4. That the Highway Commission hereby expresses for the people of Oregon a sincere thanks and appreciation for the generous gift made by Clatsop County through its County Court.

5. That this resolution be entered in the minutes and records of the Highway Commission as of the 11th day of March, 1948, and a correct copy mailed by the Secretary to Honorable Guy Boyington, and a like copy to the Chamber of Commerce in the City of Astoria.

EXHIBIT "B"

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of March 11 and 12, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes herinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by A. O. Kobbe, et al., which property is located in the northeast quarter (NE¼) of Section 29, Township 24 South, Range 6 West, W. M., Douglas County, Oregon, and is more

14756

EXHIBIT "C1 (Con't)

particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 14218, which property is being acquired for maintenance, storage, and stockpile site purposes in connection with the Elkton-Sutherlin Highway; (*)

Real property owned by A. O. Kobbe, et al., which property is located in the south half ($S\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 29, Township 24 South, Range 6 West, W. M. Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 13789A, which property is being acquired for right of way purposes in connection with the Elkton-Sutherlin Highway; (*)

Real property owned by A. O. Kobbe, et al., which property is located in the south half ($S\frac{1}{2}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 19, the northeast quarter ($NE\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$)of Section 30, and the north half ($N\frac{1}{2}$) of Section 29, Township 24 South, Range 6 West, W. M. Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 13789, which property is being acquired for right of way purposes in connection with the Elkton-Sutherlin Highway. (*)

Real property owned by Glen W. Dodge, which property is located in the William Colvig D. L. C. No. 50 in Section 21, Township 30 South, Range 5 West, W M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4. and is further identified in the records of the Highway Commission as file R14307, which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the Pacific Highway, (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed

EXHIBIT "C1" (Con't)

or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the eleventh day of March, 1948.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 102, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Island City-Summerville Road in Union County, State of Oregon, is a county road which has been designated and classified as a federal aid secondary highway and as such is qualified for improvement with state, federal, and county funds; and

WHEREAS it is the purpose and plan to improve said highway pursuant to a cooperative agreement or arrangement between the United States Government, the State of Oregon and Union County; and

WHEREAS, the real property hereinafter described is necessary for the purpose of procuring roadbuilding materials therefrom for use in connections with the contemplated and proposed improvement of said highway;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

EXHIBIT "C2" (Con't)

1. That the Commission does hereby find and declare that the parce of real property hereinafter described is necessary for the improvement of th Island City-Summerville Road in Union County, State of Oregon, to wit:

A parcel of land lying in the northwest quarter ($NW\frac{1}{4}$) of the north east quarter ($NE\frac{1}{4}$) of Section 9, Township 1 South, Range 38 East, W. M., Union County, Oregon, the said parcel being described as follows:

Beginning at a point 33 feet South 0°12' East from the northeast corner of said northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 9; thence South 0° 12' East a distance of 500 feet; thence South 89° 10' West a distance of 200 feet; thence North 0° 12' West a distance of 500 feet; thence North 89° 10' East a distance of 200 feet to the point of beginning.

The parcel of land to which this description applies contains 2.3 acres.

(Title to said parcel of real property is in Robert L. Berry and Helen A. Berry.)

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of siad property, whether said property be acquired by purchase, donation, agreement or by the exercise of the power of eminent domain.

3. That J M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution or any action instututed for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the eleventh day of March, 1948.

EXHIBIT "D"

Minutes of March 11 and 12, 1948

R E S O L U T I O N

WHEREAS, the legislative assembly of the State of Oregon when in regular session in 1947 passed and adopted, in recognition of services, sacrifices and achievements made by sons, daughters, husbands and fathers during World War II, House Joint Resolution No. 18 in and by which resolution the legislature, speaking for the people of the State of Oregon, said and declared as follows:

> "That the state highway route number 99, east and west, shall be designated as the blue star drive as a memorial in commemoration of the services of the men and women of Oregon who served in the armed forces of the United States in world war II; and
>
> "Be It Further Resolved, That the state highway commission shall file with the secretary of state a description of the particular section of state highway route number 99 so designated as blue star drive and shall cause to be erected along said highway suitable tablets and ornamentations to perpetuate this resolution."

AND WHEREAS, the Oregon State Highway Commission in recognition of the services and sacrifices made by our own people and in response to the expressed will of the legislature and after appropriate consideration is of the opinion that the sections of the Pacific Highway East and West between Portland and Junction City should be designated as the Blue Star Drive;

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the Pacific Highway known as the Pacific Highway West and the Pacific Highway East hereby are designated and hereafter shall be known as the Blue Star Drive.

2. That said Blue Star Drive shall, in recognition of those who did so much for the home land and for the world, be appropriately marked with suitable tablets and ornamentations to give life and perpetuity to this resolution and its purpose.

3. That the Engineer be and he hereby is instructed to prepare and bring to this Commission for consideration designs of tablets and ornamentations, and upon selection and approval of the type, design, number and location of tablets and ornamentations, then said Engineer is hereby instructed to erect and thereafter maintain the same.

4. That this resolution shall be entered in the minutes and records of the Commission as of the 12th day of March, 1948, and a true copy thereof filed with the Secretary of State.

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 12th day of March, 1948.

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2739, with Warren Northwest, Inc., for grading and paving on the North Unit, Steiwer Hill-Albany Section of the Pacific Highway East in Marion County; completed October 1, 1947.

Contract No. 2790, with Berke Bros., for grading on the Spencer Creek-Agate Beach Section of the Oregon Coast Highway in Lincoln County; completed December 6, 1947.

Contract No. 2872, with Archie R. Averill, for construction of the Spencer Creek Bridge on the Oregon Coast Highway in Lincoln County; completed December 19, 1947.

Contract No. 2929, with Perkins Bros. for widening Millers Gulch Bridge on the Pacific Highway in Jackson County, completed December 31, 1947 .

Contract No. 2935, with George E. Berry, for construction of the North Unit, Main Canal Bridge on The Dalles-California Highway in Jefferson County; completed February 27, 1948

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, for some time past the Highway Commission has and is now operating a ferry across the Coos River in Coos County as a link in the Coos River Secondary Highway; and

WHEREAS, it is the opinion of the Commission that said ferry should, because of its importance and its history, be given a name appropriate to its past record, and related to those who have been a part of its origination and service in the community; and

WHEREAS, Charles Enegren has been a citizen of Coos County for many years, during which time he has contributed much to the development of his community, his county, and his state, and because of such service, it is the opinion of the Commission that in his honor the said ferry should be named the "Charles Enegren" ferry;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, all members being present and voting affirmatively:

1. That the ferry which is now owned and operated by the State Highway Commission over the Coos River in Coos County as a connecting link in the Coos River Secondary Highway, be and the same hereby is, in honor of Charles Enegren, named the "Charles Enegren" ferry.

2. That the Chief Engineer be and he hereby is authorized and instructed to cause to be prepared appropriate plaques bearing the name "Charles Enegren" and affix one of said plaques on one side of said ferry, and the other on the opposite side, both of which shall be at an appropriate place and fittingly attached to said boat.

3. That the Chief Engineer be and he hereby is instructed to confer with the United States Bureau of Customs for the purpose of getting the approval and authority to change the name of said ferry from the "Gunnell" ferry to the "Charles Enegren" ferry.

4. That a certified copy of this resolution be mailed by the Secretary to Mr. Charles Enegren and a copy delivered to the Coos Bay Times; that this resolution be entered in the minutes and records of the Commission as of the twelfth day of March, 1948.

MAR 12 1948

EXHIBIT "I"

Minutes of March 11 and 12, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Old Oregon Trail Highway known as the Umatilla-Hermiston Section in Umatilla County, the northerly terminus of which is at Highway Engineer's Station 4+59.59 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 291+20 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, a portion or unit of the right of way of the highway as formerly located has been eliminated from the boundaries of the new location, which eliminated section or area is no longer needed for highway purposes, but is needed and must be retained for public use; and

WHEREAS, Umatilla County and the State Highway Commission heretofore entered into an agreement dated the 30th day of August, 1946, by which agreement the County has under conditions stated therein accepted jurisdiction over said abandoned part of said state highway route; and

WHEREAS, the contract for the construction of the relocated section of the Old Oregon Trail Highway was completed on September 22, 1947, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation, which action is in accord with the terms of said County-State agreement.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the new section of the Old Oregon Trail, State Highway No. 6, which section begins at State Highway Engineer's Station 4+59.59 on the new route and Station 64+19.7 of the Columbia River Highway, and ends at State Highway Engineer's Station 291+20 of the new route, which equals Station 601+03 of the old route, is now completed and highway traffic is now routed thereover, and therefore the section of the old route herein defined and described as Unit "A" will no longer be recognized as a part of the route of the Old Oregon Trail, State Highway No. 6, but shall be under the jurisdiction of the County pursuant to the terms of said County-State agreement.

2. The following section of the Old Oregon Trail, State Highway No. 6, as said highway is now located, to-wit:

EXHIBIT "J"

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, the Highway Commission found it necessary and desirable to relocate the section of the North Santiam Secondary Highway known as the Gates-Niagara Section in Marion County, the westerly terminus of which is at Highway Engineer's Station 211+00 of the reconstructed line and the easterly terminus of which is at Highway Engineer's Station 397+23 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the Highway as formerly located have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes but are needed and must be retained for public use; and

WHEREAS, Marion County and the State Highway Commission have heretofore, to-wit: On the fourteenth day of December, 1945, entered into an agreement relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of the relocated section of the North Santiam Secondary Highway was completed on November 13, 1947, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section of the North Santiam Secondary Highway known as the Gates-Niagara Section, which begins at Highway Engineer's Station 211+00 on the new route and ends at Highway Engineer's Station 397+23 of the new route, has been completed and made available for travel, and the sections of the old route herein defined and described as Units "A", "B", "C", "D", and "E" shall no longer be part of the route of the North Santiam Secondary Highway but shall be eliminated therefrom.

2. The following sections of the old route of the North Santiam Secondary Highway No. 162, which for the purpose of this resolution are identified as Units "A", "B", "C", "D", and "E", and which are otherwise described as follows, to-wit:

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, within the City of Oregon City the Commission has designated as a part of the route of the Cascade Secondary Highway, Oregon 215, a portion of Seventh Street, and

WHEREAS, the City Commission of the City of Oregon City has adopted a resolution providing that the intersection of said Seventh Street and Washington Street in the City of Oregon City should be a four-way stop street, which resolution is in words and figures as follows:

"WHEREAS Oregon City has adopted Ordinance No. 1349 which provides by Section 13 thereof that the City Manager, subject to the approval of the City Commission by resolution, may designate stop streets in Oregon City, Oregon,

"NOW THEREFORE BE IT RESOLVED That the City Manager be and he is hereby authorized and directed to designate the intersection of Seventh Street and Washington Street, in Oregon City, Oregon as a stop street at all four entrances thereto and to install proper stop signs and markers at all four entrances thereto, and said signs and markers shall be installed as nearly as practicable and the stop shall be made at the place where the prolongation of the property lines crosses said streets at all four entrances to said intersection.

"Dated January 7, 1948.

and

WHEREAS the Commission, based upon the report of its engineer, is of the opinion that in the interest of safety to traffic said intersection should be designated as a four-way stop,

NOW, THEREFORE, all members of the Commission being present and voting affirmatively, the Commission does hereby order:

1. That the resolution and ordinance of the City of Oregon City, dated January 7, 1948, and providing for a four-way stop at the intersection of Seventh Street and Washington Street in the City of Oregon City be and the same hereby is approved.

2. This resolution shall be entered in the records of the Commission this 12th day of March, 1948, and the Secretary be and he hereby is instructed to send a certified copy of this resolution to the City Manager of the City of Oregon City.

MAR 12 1948

14778

EXHIBIT "L"

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, Highway No. 9, otherwise known as the Oregon Coast Highway, is a part of the state highway system and is, therefore, a highway under the jurisdiction of the Highway Commission;

WHEREAS, said highway, in addition to being a state highway, is also one of the Federal highways in the State of Oregon;

WHEREAS, said highway as now located, constructed, and maintained is routed through the Town of Brookings and because of its scenic character and location carries a large volume of motor vehicle traffic, much of which is out-of-state traffic; and

WHEREAS, complaints have been made to the Commission charging that numerous trucks of varying types and lengths are often parked on the shoulders of said highway within the boundaries of the Town of Brookings in such manner and in such numbers as to create a traffic hazard and create a traffic inconvenience to the users of said highway; and

WHEREAS, the parking of trucks in the traveled portion of the highway, or on the shoulders of the same, results in the surface of the highway being covered with oil and grease, which are the drippings from containers on said vehicles, thereby causing damage to the highway surface and a hazard to traffic; and

WHEREAS, it appears that some of said trucks are parked for purposes of repair, and in some instances for sale; and

WHEREAS, the use of the shoulders of said highway, or any part of the surface of the highway at said point for the parking of trucks while being repaired or while being offered for sale, not only interferes with the normal and proper use of the highway, but results in the discharge of oils and grease into the State's drainage system, thereby impairing highway drainage and creating a hazardous condition; and

WHEREAS, it is the opinion of the Commission that the use of any part of the surface of said highway or the shoulders thereof within the Town of Brookings, or elsewhere, by trucks or other motor vehicles for the purposes hereinabove set forth is injurious to the highway, detrimental to motor traffic in general, and against public welfare;

THEREFORE, BE IT RESOLVED BY THE COMMISSION, all members being present and affirmatively voting:

MAR 12 1948 (Con't)

EXHIBIT "L" (Con't)

1. That the use of any part of the surface of the Oregon Coast Highway or the shoulders thereof within the borders of the Town of Brookings or at any other place for the parking of vehicles for sale, for repair, or for any other use, or for any other purpose other than emergency, is destructive of the highway, creates a hazard to the motoring public, and denies to the public generally the normal and intended use for which said highway and shoulders have been constructed and are being maintained.

2. That for the reasons herein stated and for other reasons not stated, any and all use of the improved portion of said highway or the shoulders bordering said highway by trucks, either for sale, for repair, for overnight parking, or other extended periods, is hereby prohibited.

3. That the Engineer be and he hereby is instructed to erect and maintain along the right of way lines of said highway at said place appropriate signs warning the public that the use of the improved part of said highway or the shoulders thereof for parking of vehicles for extended periods of time for repair, for sale, or other purposes other than in emergency is prohibited.

4. That this resolution be entered in the minutes and records of the Commission as of the 12th day of March, 1948, and a correct copy thereof delivered to the Superintendent of State Police and a like copy to the Sheriff of Curry County, Oregon.

14780

EXHIBIT "M"

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, the Pacific Highway East, extending from Oregon City to Portland, is a state highway and as such is under the jurisdiction and control of the State Highway Commission; said highway is identified in the Highway Commission's records as Highway No. 1E, and being a part of the Federal Highway System is identified as U. S. Route No. 99E; and

WHEREAS, said highway serves a daily average traffic of thirteen thousand cars; and

WHEREAS, the promiscuous parking of cars along and on the shoulders of said highway in the vicinity of Courtney Road by persons who patronize the Piggly Wiggly store, and other commercial activities along said highway, creates a traffic hazard which in the opinion of the Highway Commission should be restrained; and

WHEREAS, the State Police, having occasion to observe over a long period of time the conditions which prevail within said area, and having knowledge of accidents and near-accidents which have occurred by reason of cars leaving the highway for the purpose of parking on the highway shoulders and then returning to the highway again, have recommended that parking within said area on the shoulders of said highway be prohibited; and

WHEREAS, the State Highway Engineer and the Traffic Engineer have as a result of a study of said conditions called to the attention of the Commission the prevailing hazards, and have recommended that parking on the shoulders of said highway within the area herein specified, be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION all members being present and voting affirmatively as follows:

1. That based upon the facts and recommendations placed before this Commission, the Commission does hereby find and declare that the parking of motor vehicles on the shoulders of said highway between State Highway Engineer's Station 240+45 and State Highway Engineer's Station 243+55, and the returning of said vehicles to said highway, creates a hazard to traffic on said highway, which hazard in the opinion of the Commission should be removed.

(Con't)

MAR 12 1948

EXHIBIT "M" (Con't)

2. That based upon reports, information, and data placed before this Commission, the Commission does hereby find and declare the promiscuous passing of persons from said parked cars across said traveled highway is dangerous, not only to the pedestrians, but to the motoring public, and such practice should, in the opinion of the Commission, be prohibited.

3. That for the purpose of protecting the general public, and especially the motoring public using said state highway in said vicinity, it is hereby ordered that parking on the shoulders of said highway between State Highway Engineer's Station 240+45 and State Highway Engineer's Station 243+55 be and the same hereby is prohibited, except for emergency purposes.

4. That the Engineer be and he hereby is instructed and directed to erect and thereafter maintain at the most strategic points within said area "No Parking" signs which shall read: "Parking on Shoulders of Highway Prohibited".

5. That a copy of this resolution be delivered to the Superintendent of State Police.

6. That this resolution be entered in the minutes and records of the Highway Commission as of the twelfth day of March, 1948.

MAR 12 1948

EXHIBIT "N"

Minutes of March 11 and 12, 1948

ORDER REDUCING MAXIMUM LOAD LIMITS ON CERTAIN STATE HIGHWAYS

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

McKENZIE HIGHWAY NO. 15

EAST DIAMOND LAKE STATE SECONDARY HIGHWAY NO. 425

CRATER LAKE NORTH STATE SECONDARY HIGHWAY NO. 232

and

WHEREAS, the said above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways during the spring months when the frost is leaving the ground, and in order to protect said highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced; and

WHEREAS, the State Highway Commission has, after due investigation, determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon the said roads shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said roads were not built to sufficient standards to withstand adverse action by the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of the said state highways that the maximum total weight of load and vehicle which shall be permitted upon said roads during the spring break-up period shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

(Con't)

EXHIBIT "N" (Con't)

The maximum weights which shall apply to the following highways, to-wit:

McKENZIE HIGHWAY NO. 15 from Mile Post 34.5 (Forest Boundary) to Mile Post 55.0 (Junction with Belknap Springs Road).

EAST DIAMOND LAKE SECONDARY HIGHWAY NO. 425 from Mile Post 0.0 (Junction with Crater Lake North Secondary Highway No. 232) to Mile Post 14.72 (Junction with The Dalles-California Highway, US 97).

CRATER LAKE NORTH SECONDARY STATE HIGHWAY NO. 232 from Mile Post 3.81 (Junction with East Diamond Lake Secondary Highway No. 425) to Mile Post 0.0 at Diamond Lake.

shall be as follows: The combined gross weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any single axle of a truck or truck-tractor shall not exceed eight thousand (8,000) pounds; and the combined gross weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of all of the axles of a vehicle or combination of vehicles shall not exceed twenty-thousand (20,000) pounds.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O.C.L.A., shall be in full force and effect on the McKenzie Highway from February 8, 1948, and on the East Diamond Lake and Crater Lake North Secondary Highways from March 10, 1948, and shall remain in full force and effect until modified, annulled or voided by order of the State Highway Commission; and

IT IS FURTHER ORDERED, that a notice be posted, in a conspicuous manner and place, at each end of each of the above-named highways and at important cross-roads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed; and

BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any of said highways are situate, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this twelfth day of March, 1948.

MAR 12 1948

14781

EXHIBIT "O"

Minutes of March 11 and 12, 1948

R E S O L U T I O N

MODIFYING REDUCED LOAD LIMIT ON THE EDDYVILLE-BLODGETT STATE SECONDARY HIGHWAY

WHEREAS, on the twenty-fifth day of November, 1947, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway;

> EDDYVILLE-BLODGETT STATE SECONDARY HIGHWAY NO. 180 from Mile Post 11.7 at Nashville to Mile Post 19.29 at Blodgett, in Lincoln County; and

WHEREAS, the Commission is uncertain at this time as to whether or not existing conditions warrant the imposition and enforcement of the limitations fixed in the said resolution which order and load limit, if enforced, will, the Commission is advised, necessitate the closing down of log hauling and logging operations to the extent served by said highway, and thereby cause numerous men to be out of employment; and

WHEREAS, because of said conditions and because of the desire of the Commission to impose only such order and restrictions as the interests of the general public require and as the safety and permanency of the road demands, it is the judgment of the Commission at this time that said order be modified as a temporary expedient, and, if subsequent conditions disclose that the original order and limit should be reinstated by subsequent action of this Commission.

NOW, THEREFORE, BE IT RESOLVED that the resolution and order made and entered into by the Commission on the twenty-fifth day of November, 1947, with respect to the Eddyville-Blodgett Secondary Highway, be and the same is hereby modified to read as follows:

The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any single axle of a vehicle or combination of vehicles shall not exceed fifteen thousand (15,000) pounds; the combined weight in pounds bearing on the surface of the highway at contact with the wheels of any set of tandem axles shall not exceed thirty thousand (30,000) pounds; and the combined weight in pounds bearing on the surface of the highway at contact with the wheels of all of the axles of a vehicle or combination of vehicles shall not exceed fifty thousand (50,000) pounds.

(Con't)

MAR 12 1948

EXHIBIT "C" (Con"t)

BE IT RESOLVED FURTHER, that the said resolution and order made and entered into by the Commission on November 25, 1947, shall remain in full force and effect except as hereby modified or changed by this order of the Commission.

BE IT FURTHER RESOLVED that this resolution and order shall be in full force and effect from February 19, 1948 until changed, modified, or rescinded by the Commission

Dated this twelfth day of March, 1948.

14786

"EXHIBIT "P"

Minutes of March 11 and 12, 1948

RESOLUTION

WHEREAS, the Commission is given authority under Section 115-393 O.C.L.A., to grant written permits for the movement of vehicles, articles, property or things having a combined weight in excess of statutory restrictions of a size not permitted under existing statutory restrictions, and

WHEREAS, modern industry has produced, and is continuing to produce, and industries are already using equipment, commodities, property and articles of a weight, type and size which can not be transported over the highways of this State under existing statutory limitations, and

WHEREAS, a limited number of sections of Oregon highways are so designed and constructed that loads in excess of statutory limitations, both as to weight and dimensions, may, under certain conditions, be transported without damaging such sections of highways and with a minimum of hazard to the motoring public, and

WHEREAS, frequent requests are made to the Commission for permission to move equipment, commodities and articles having a weight and dimension in excess of that permitted under existing statutory limitations, and it is desirable, and in the best public interest, to facilitate the movement of such equipment, commodities and articles in cases where the movement is proposed on sections of highways which will permit such movements, and where the hazard to the motoring public is at a minimum, and

WHEREAS, the Commission is of the opinion that it is feasible and practical to delegate to the State Highway Engineer, the Second Assistant Highway Engineer, and the Director of Permits, authority to issue permits under Section 115-393, upon certain terms and conditions, and when certain facts are found to exist, and

WHEREAS, the Commission is of the opinion that it is practical and feasible to delegate to certain personnel of the Commission, hereinafter named, the authority to issue permits under Section 115-393, under certain conditions and when certain facts are found to exist, and

WHEREAS, the Commission believes that the best public interest will be served in making a delegation of authority under terms and conditions hereinafter stated,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, acting pursuant to the authority of Section 115-393, O.C.L.A., and not otherwise, as follows:

MAR 12 1948

(Con't)

EXHIBIT "P" (Con't)

1. That no permit shall be issued under the provisions of Section 115-393, unless and until there is delivered to the Highway Department a written application for a permit upon the form attached hereto, marked Exhibit "A" and by this reference made a part hereof. (*)

2. That any permit issued pursuant to the provisions of Section 115-393, shall be in the form attached hereto, marked Exhibit "B" and by this reference made a part hereof; that said Exhibit "B" is hereby adopted as the form of a permit to be issued under the provisions of Section 115-393, and no permit shall be issued on any other form, nor shall the printed form, as attached be changed in any manner except upon the express direction of the Commission. (*)

3. That but one permit shall be issued to a given permittee for the purpose of facilitating the movement of a given vehicle, article, property or thing, regardless of whether such movement would be in excess of statutory limitations as to width, length, height or gross weight, or any combination.

4. That when the State Highway Engineer, Second Assistant State Highway Engineer, the Director of Permits, or the personnel hereinafter named in paragraphs 10 and 11, find that the proposed movement is to be made over a highway classified as either a Group 1 or Group 2 highway, as set forth under the resolution of the Commission, dated July 21, 1947, and the amendment of of said resolution dated December 29, 1947, they are authorized to issue a permit for a movement, subject to the limitations hereinafter stated, having weights not in excess of the following, to-wit:

80,000 pounds maximum gross weight,
19,000 pounds on any single axle,
37,000 pounds on any set of tandem axles.

W = 100 x (L+40) for any group of axles spaced more than 18 feet apart.

W = 850 x (L+40) for any group of axles spaced 18 feet or less apart.

5. The granting of a permit shall be conditioned upon a finding by the State Highway Engineer that the specific section of highway, the specific bridges, or other structures are in a structural condition and of a design which will permit such movements. In the event the State Highway Engineer shall find that a specific section of highway, a specific bridge or other structure has developed a weakness, or for some other reason, such section, bridge or structure will not safely permit such weights, he is hereby directed to reduce the maximum weights provided in any permit, accordingly.

(Con't)

EXHIBIT "P" (Con't)

6. On all highways, other than those set forth as Group 1 and Group 2 highways, under the Commission's resolutions above referred to, the maximum weights to be provided in any permit shall, subject to the maximum hereinabove stated in paragraph 4, be based upon the recommendation of the State Highway Engineer. When the State Highway Engineer finds that the weight of any given movement is not more than the maximum stated in paragraph 4, and can be moved with safety upon highways other than Group 1 and Group 2 highways, then the State Highway Engineer, the Second Assistant Highway Engineer and the Director of Permits, and only these officials, are permitted to issue a permit under Section 115-393.

7. No permit shall be issued unless and until the permittee shall have furnished to the Department satisfactory evidence that he has procured and has in full force and effect, a policy, or policies, of liability insurance, including property damage, in an insurance company duly qualified and licensed to do business in the State of Oregon, in amounts not less than those hereinafter set forth. Each of said policies shall name as assureds, the State of Oregon, by and through its State Highway Commission, and its officers, agents and employees, jointly and severally. The amounts of said insurance shall be not less than the following:

(a) In case the permitte is a contract (for hire) hauler, the liability insurance shall be in the amount of $50,000 property damage and $50,000 - $150,000 public liability.

(b) In the case of private haulers (hauling for themselves) other than ranchers and farmers, the liability insurance shall be in the amount of $50,000 property damage and $50,000 - $150,000 public liability.

(c) For ranchers or farmers transporting their own equipment, $10,000 property damage and $10,000 - $20,000 public liability.

(d) Log and lumber carriers, and moving vans, $50,000 property damage and $50,000 - $100,000 public liability.

8. No permit shall be issued unless and until the permittee shall furnish to the Commission an indemnity bond, as provided for in Section 115-393, or in lieu of such bond, a certified check or cash in amount equal to the penal sum of the bond, as follows:

(a) Contract haulers, - $10,000

(b) Private haulers, other than ranchers or farmers - $10,000

(c) Ranchers or farmers, - $1,000

(d) Log and lumber carriers, and also moving vans, - $10,000

(Con't)

EXHIBIT "P" (Con't)

The bond shall be in the form attached hereto, marked Exhibit "C" and by this reference made a part hereof. (*)

9. Each and all the permits issued shall contain the provision that the permit shall be null and void for non-compliance with any of the descriptions, terms or conditions printed or written in the form of permit.

10. Under the direction of the State Highway Engineer and subject to the conditions hereinabove set forth, and also as hereinafter set forth in paragraph 12, maintenance Superintendents of the following Districts, and in their absence, District Maintenance Officemen therein, shall have authority to issue permits for movements within the limits of their respective Districts and not otherwise:

2-A	Astoria	4-B	Redmond
2-C	Corvallis	4-C	Klamath Falls
3-A	Eugene	5-A	John Day
3-B	Coquille	5-B	Pendleton
3-C	Grants Pass	5-C	Baker
4-A	The Dalles	5-D	Burns

11. Under the direction of the State Highway Engineer, Division Engineers, Acting Divisionn Engineers, and in their absence, Assistant Division Engineers, and in their absence, the Division Office Engineers in the following Divisions: shall have authority to issue permits, subject to the foregoing conditions, and subject also to the conditions of paragraph 12, and for movements within their respective Divisions, and not otherwise:

Division 3, Roseburg, Oregon
Division 4, Bend, Oregon
Division 5, LaGrande, Oregon

12. District Maintenance and Division Personnel, as set forth in paragraphs 10 and 11 above, shall have authority to issue permits on Group 1 and Group 2 highways only; provided, however, that they shall not have authority to issue permits upon the section of the Columbia River Highway between the City of Portland and the City of The Dalles. The maximum weight and dimensions which may be permitted in permits issued by District and Division personnel, shall be as follows:

(a) Weight. Maximum weights shall be subject to the limitations set forth in paragraph 4 of this resolution.

(b) Overheight. No permit shall be issued in excess of the clearance limits allowable for all structure as shown on "vertical clearance map" of the State Highway system; provided, however, that no permit shall be issued for a height in excess of six inches less than the minimum vertical clearance on the route over which a movement is to be made.

(Con't)

MAR 12 1948

EXHIBIT "P"(Con't)

(c) Overwidth. No permit shall be issued permitting a width in excess of ten feet six inches.

(d) Overlength. No permit shall be issued permitting a movement having an overall length of more than fifty-five feet on Group 1 highways, or not more than fifty feet on Group 2 highways.

13. All permits providing for overall height, width or length in excess of those set forth in paragraph 12 above, shall only be issued by the State Highway Engineer, Second Assistant State Highway Engineer, or the Director of Permits.

14. That each and all of the terms and conditions set forth in the form of permit attached hereto as Exhibit "B", shall be and are hereby adopted as regulations and requirements of the Commission. (*)

15. If at any time, or under any conditions, the State Highway Engineer, the Second Assistant State Highway Engineer, the Director of Permits, any Division Engineer, Acting Division Engineer, Assistant Division Engineer, District Maintenance Superintendent or Staff Engineer of the Department shall be of the opinion that a given movement is unduly hazardous to the motoring public, or is not being made according to the terms and conditions of any permit issued, or can not be made with safety to highway facilities and structures, they are hereby directed and authorized to forthwith stop such movements and take all necessary, proper and reasonable steps to correct the condition and minimize and alleviate the hazard to the motoring public, and to State highway facilities and structures.

This resolution shall be entered in full in the records and minutes of the Commission, as of March 12, 1948.

FOOTNOTE (*) The exhibits mentioned in the above resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Item No. 6, under the heading "Special Matters" and said exhibits by this reference are made a part of this Resolution to the same extent as if copied in full herein.

EXHIBIT "Q"

Minutes of March 11 and 12, 1948

"OREGON

STATE HIGHWAY COMMISSION

March 8, 1948

Oregon State Highway Commission

Gentlemen:

"Permit me to refer you to my two letter to you of February 25, 1948, both with reference to wages and salaries, which letters are hereto attached for your convenience. (##)

"On February 26 a conference was held in the office of Chairman T. H. Banfield of Portland, at which conference were present T. H. Banfield, Chairman of the Oregon State Highway Commission, A. C. Cammack, Portland member of the Civil Service Commission, Robert R. Johnson, Executive Director of the Civil Service Commission, R. H. Baldock, State Highway Engineer, W. W. Stifler, Assistant State Highway Engineer, and Malcolm H. Hawke, Chief Accountant, State Highway Department.

"At this conference salaries and wages paid State Highway Department employees were discussed in general, as were the specific recommendations contained in the two letters above referred to. At that time Mr. Cammack and Mr. Johnson indicated approval of all step increases in the Civil Service pay plan as approved by the State Highway Commission. They also indicated approval of the retroactive application of the step increases in the Civil Service pay plan to employees eligible for such increases on January 1, 1948, as finally determined by the Commission and approved by the Civil Service Commission and the Budget Director, to be effective January 1,1948.

"On March 1, the Civil Service Commission met and Mr. Johnson, Director, advised me of their action which was concurred in by George K. Aiken, Budget Director, as follows:

"1. The Civil Service Commission approves granting all holidays, retroactive to February 1, 1948, with pay to full-time hourly employees and denies increases in present hourly rates at this time.

"2. Recommends that all section foreman helpers be placed at a starting rate of $200 in comparison with the present rate of $190, and that section foremen be placed at a starting rate of $232 rather than $220, with out any change in the salary range, this increase to be effective March 1, 1948.

(Con't)

EXHIBIT "Q" (Con't)

"3. Will approve engineering salary increases in accordance with the table listed below, also comparable increases in mechanical engineers, chemists, radio engineers and landscape engineers, effective March 1, 1948:

Engineering Aide I	Present	165	173	181	189	197	205
	Proposed	180	189	198	207	216	225
Engineering Aide II	Present	190	200	210	220	230	240
	Proposed	210	222	234	246	258	270
Civil Engineer I	Present	230	242	254	266	278	290
	Proposed	250	264	278	292	306	320
Civil Engineer II	Present	280	294	308	322	336	350
	Proposed	300	316	332	348	364	380

"The cost of Item No. 1, giving all holidays with pay to full-time hourly employees, will amount to $93,500 annually. The cost of Item No. 2, increasing starting range for section foreman helpers and section foremen will cost $12,200 annually, or about $100,000 for the balance of this calendar year. The cost of adopting the new engineering schedules will be $125,000 annually, or about $100,000 for the balance of this calendar year.

"Since writing the letter of February 25 to you, I find that the California Division of Highways has contacted Oregon State College and is preparing to give an examination for graduate engineers in Klamath Falls late this spring; also that the various governmental agencies, including the Army Engineers, have contacted prospective graduates and, from such investigations as we made, we anticipate that we will be able to get but one of the Oregon State College graduates in our department. This particular man is an ex-GI whose course of study was interrupted during the war and who has worked for us quite some time and is willing to come back.

"I have given a lot of thought to this problem and believe that, even with the increased schedule the Civil Service Commission will approve, it will not be possible to hire engineers to carry on our work. Permit me to suggest that the Commission consider contacting the Governor and advising him of the fact that, unless we are able to secure engineers, we cannot carry on the construction program now budgeted or be in any position to start the work of new surveys for a new program provided the Congress extends federal aid.

"Permit me to summarize the following recommendations:

"1. Confirm understanding that the employees hired at minimum rate be granted step increases after serving a probationary period of six months, if they are found to be satisfactory. On account of the turnover of

(Con't)

EXHIBIT "Q" (Con't)

employees and the number quitting the higher brackets, no increase in the budget for salaries is required for this item.

"2. Approval of the step increases for the 309 employees eligible on January 1, 1948, which employees were found to have earned a merit rating of 160 or above, corresponding to average or above. It is recommended that this increase be made retroactive to January 1 and it is estimated to cost $40,000 for the year 1948.

"3. Approval of the Civil Service Commission's plan to pay all full-time hourly employees for all holidays with no additional increases in hourly rate at this time. Such action, effective January 1, 1948, is to increase the payroll an estimated $93,500 in 1948.

"4. Approval of the raising of the minimum rate of foreman helpers from $190 to $200 a month and of foremen from $220 to $232 per month, without increase in salary range. The effect of this action, effective March 1, 1948, would be to increase the pay roll for this calendar year an estimated amount of $10,000.

"5. The approval of the salary increases for Engineering Aide I, Engineering Aide II, Civil Engineer I and Civil Engineer II, and conformable increases in Mechanical Engineer, Chemist, Radio Engineer and Landscape Engineer, as indicated will be approved by the Civil Service Commission. This will increase the pay roll for 1948 an estimated amount of $102,000. The Civil Service Director admits that the increase proposed is probably too low to secure additional personnel, but he will advertise in the Middle West where there seem to be more technical men available. He stated that the Civil Service Commission could not approve any higher salary increase in these brackets without upsetting the pay plan for the entire state. It is believed, however, the adoption of this scale immediately may decrease the number of present employees leaving the service. I recommend adoption of this scale, effective March 1, 1948.

"6. That the entire problem be discussed with the Governor, who appoints the Civil Service Commission, the State Highway Commission, and the Budget Director, so as to inform him of the impossibility of carrying on the extensive highway program for which funds are available and which is so vitally needed to aid the State's economy, without the requisite engineering personnel and, if possible, to secure authority to meet the present salary scales paid for such technical help by private industry and by federal and other state agencies. Attached hereto is a suggested pay plan for engineering personnel which may make possible the hiring of competent employees. I submit it for your consideration.(*)

"The increases in the pay roll for maintenance and betterment forces, plus step increases, plus increases in engineering salaries, if these recommendations are adopted, would total approximately $246,000. The amount now

(Con't)

EXHIBIT "Q" (Con't)

reserved for increases in salaries and wages in the 1948 budget is $251,418. An increase of $187,500 to cover additional engineering personnel required to meet the proposed construction program is partially covered in the engineering budget which is a part of the estimated construction costs in the budget. A net increase to the budget of $7,000 for salaries for 1948 would be required to meet the above recommendations.

Very truly yours,

/s/ R. H. Baldock

R. H. Baldock
State Highway Engineer

RHB:hi
Encl."

LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1948	Subject
14796	Apr.19	Minutes of January 5, February 2 and 3, and March 11 and 12, 1948, approved.
		Parks Superintendent reports on following:
		Sunset Hwy. Waysides. Offer of Caldwell Lumber Company to purchase down timber approved.
		Sunset Hwy. Burned timber. Request of R.C. Moulton to revise agreement approved.
14797		Champoeg. Construction of memorial bldg. approved.
		Collier, Saddle Mountain, and Armitage State Parks. Construction of three caretaker's houses approved.
		Mack's Arch and Whale's Cove. Curry County. Counsel authorized to negotiate options for acquisition of ocean waysides on a park basis.
14798		Cape Arago Lighthouse. Acquisition of 25 acres. Authority granted to file application with Dept. of Interior. Status of road to be investigated.
		Real Property. Acquisition authorized. See EXHIBIT "A" and footnotes.
14799		Real Property. Portland. Front Avenue financial statement.
14800		Clatsop County. Youngs Bay Bridge-Lewis and Clark River Section. Oregon Coast Hwy. Action deferred on option for R/W.
		Condemnation. Offers approved. See EXHIBITS "B-1", "B-2", and
14801		"B-3".
		Sale of buildings. Lane County. Eugene. Houses to be advertised for sale on alternate basis.
14802		Sale of buildings. Lane County. Eugene. Referred to Engineer and Counsel for study and recommendation.
		Sale of 42 acres of land. Marion County. Pacific Hwy. East. All bids rejected.
14803		Claims. James H. Imbrie. Sunset Hwy. Gardner Ranch-Berger Ranch Section. Commission approved settlement of $3,000.
14804		Douglas County. Pacific Hwy. Request of City of Myrtle Creek that state quitclaim R/W to city approved.
		Gilliam County. Columbia River Hwy. John Day River-Blalock. Agreement with Union Pacific approved.
		Eugene. University of Oregon. Pacific Hwy. Amended agreement approved conditionally.
		Douglas County. Florence. Two logs for maintenance station. Authority to bid $200 or to condemn granted.
		Sale of houses. Marion County. Salem. Deferred advertising until all property acquired.
		Marion County. Salem. Proposed office bldg. site. Counsel to condemn properties if owners not settle.
14805		Marion County. Salem. Exchange of properties with Board of Control approved.

Page	Date 1948	Subject
14805	Apr.19	Lane County. Pacific Hwy. Eugene. Proposed change in zones. Action deferred until following day.
		Deschutes County. Santiam Hwy. Brooks-Scanlon logging road crossing. Action deferred.
		Multnomah County. Pacific Hwy. East. Request of Hayden Amusement Company to erect signs, two bus-stop shelters. Shelters approved. Signs denied.
		Multnomah County. Troutdale. Request of vendors of smelt fishing supplies to use property. Matter to be studied.
14806		~~Smelt~~ Sand. Lincoln County. Yachats. Letter to L.M. Christensen accepting surrender of his permit approved.
		Astoria Ferry. Approved payment to Albina Engine and Machine Works for changing fire fighting equipment. Approved expenditure for added facilities. Deferred revising schedule of fares. Approved agreement with Babbidge & Holt until May 31, 1948.
		Columbia River. Proposed dam near John Day River. Letter to be sent to Public Roads Administration and Army Engineers outlining requirements.
14807		Clatsop County. Secdy. State Hwy. 105. Request of City of Warrenton for improvement. Action deferred.
		Salem. State Hwy. Dept. Office Bldg. Deferred discussion until bids received for State Office Bldg.
		Multnomah County. St. Johns. Hwy. to Germantown road discussed. Copy of report to St. Johns Businessmens Club.
		Forest Highways. Approved and ordered filed a report containing four current forest hwy. programs.
		Umatilla County. Columbia River Hwy. City of Umatilla. Widening of bridge and sidewalk. Engineer to report.
14808		Umatilla County. Freewater. Request to construct "Lincoln Mountain Hwy." denied.
		Yamhill County. City of Sheridan. Improvement of Main Street. Agreement approved.
		State Tax Street Funds, 1947. See EXHIBIT "D".
		State Tax Street Funds, 1946. See EXHIBIT "E".
14809		Awards. Engineer's award of contracts confirmed.
		Marion County. Silver Creek Falls Secdy. Hwy. Request for improvement of hwy. at Salem end denied.
		Multnomah County. North Portland. Request to eliminate a traffic hazard at junction of Denver and Union Avenues. Study is now being made.
		Douglas County. South Dillard Bridge over Umpqua River. Agreement with Joseph Holt approved.
		Benton County. Pacific Hwy. West. Corvallis. Request to construct guard rail approved.
14810		Signals. Union County. Intersection of Hwy. 82 with "Cove Hwy." Installation of flashing beacon approved.

Page	Date 1948	Subject
14810	Apr.19	Signals. Multnomah County. S.W. Canyon Road-Canyon Lane intersections. Approved push button for pedestrians.
		Meeting recessed at noon to reconvene at 2:00 p.m.
		Signals. Jackson County. Ashland. Installation denied.
14811		Signals. Lake County. Lakeview. "F" Street, First Street North, Center Street. Installation denied.
		Budget. 17 minor betterment projects. Approved projects totaling $26,570.
14812		Malheur County. Brogan. Pomona Grange No. 33 request for rerouting of US95 denied.
		Lincoln County. Yaquina Bay Bridge. Newport. Confirmed authority to advertise for bids for repainting. Transfer of funds approved.
14813		Surveys. Engineer to give complete report of surveys required for Three Year Postwar Program.
		Extensions of time granted as follows: Contract Nos. 2956,
14814		2931, 2912, 2946, 2942, 2814, 2802 and 2932.
14816		Contracts completed and accepted as follows: Nos. 2860, 2932, and 2956.
14817		Equipment. Approved purchase of equipment, $134,400.
		Signals. Upper Columbia River Hwy. Mosier Tunnel. Approved contract with Pacific Power & Light Company to furnish electrical energy to operate signals.
14818		Malheur County. Nyssa. Payment of assessment approved.
		Linn County. Albany. Request to use Waverly Lake and Waverly State Park. Engineer to report.
		Douglas County. Pacific Hwy. Cattlepass agreement with Victor Phipps and Roseburg Lumber Company approved.
		Coos County. Oregon Coast Hwy. Cattlepass agreement with Bessie E. Jenkins approved.
		"No Parking" zone. Tillamook County. Cloverdale. Request of Postmaster to establish zone approved. See EXHIBIT "G".
14819		"No Parking" zone. Marion County. Pacific Hwy. East. Woodburn. Establishment of zone approved. See EXHIBIT "H".
		Speed Zones. Wasco County. Columbia River Hwy. Reduced speed zone near The Dalles approved. See EXHIBIT "L".
		Speed Zones. Linn County. Santiam Hwy. near Lebanon. Reduced speed zone approved. See EXHIBIT "M".
14820		Al Head. Approved per diem allowance of $9 for time spent in Washington, D.C.
		Personnel. Retirement. Approved retention of Paul G. Deuber and E.M. Nash.
		Traffic Engineer Conference. Corvallis. Commission to act as co-sponsor.
		Log Hauling. Marion County. North Santiam Hwy. Floyd R. Person's application to haul denied.

Page	Date 1948	Subject
14821	Apr.19	Load Limit. Jackson and Josephine Counties. Little Butte Secdy. Hwy. and Rogue River Loop Secdy. Hwy. Approved 50 percent reduced load limit. See EXHIBIT "I".
		Load Limit. Lane County. McKenzie Hwy. Lifting of reduced load limit approved. See EXHIBIT "J".
		Equipment. Baker County. Baker. Confirmed authority to sell road grader to Mount Moore.
		Tillamook County Court and Tillamook Drainage District. Trestle bridge agreement approved.
		Klamath County. Klamath Falls. Petition to vacate portions of Sunnyside and Eldorado additions approved.
14822		Enegren Ferry. Request of Morrison-Knudsen Company that ferry be operated 24 hours daily denied.
		Yaquina Bay Bridge. Engineer to negotiate agreement with Gilpin Construction Company for dolphin repair.
		Yaquina Bay Bridge. Port of Newport to be held responsible for damage.
		Douglas County. Umpqua River Bridge. Engineer to negotiate agreement with contractor to replace pier.
14823		Clackamas County. Pacific Hwy. Oregon City-New Era. Agreement with Western Union and award of contract approved.
		Multnomah County. Columbia River Hwy. Multnomah Falls. Game Commission to install culvert screen.
14824		Agreements and other papers signed.
14825		Meeting adjourned at 4:15 p.m.
14826	Apr.20	Bids received on following projects:
		Sandy-Rhododendron Rock Production
		Rainier-Goble Section
		Salmon River Bridge near Otis
14827		Paint Yaquina Bay Bridge
		Little Pudding River Bridge
		Bridge over Willamette River at Independence
		Bridge over Three Rivers at Hebo
		Traffic Signal System at Pendleton
14828		East Sheridan Section
		Astoria-Megler Ferry Service
		Douglas County. Pacific Hwy. Canyonville. Request of School Board that State purchase property denied.
		Clatsop County. Oregon Coast Hwy. Cannon Beach section. Request of Commercial Club for improvement. No commitment.
14829		Center line stripes. Crews to do as soon as possible.
		Malheur County. Vale. Request to oil Washington Street. Engineer to investigate.
		Portland. Union Avenue Delegation protests proposed traffic
14830		separator. No action.
		Lincoln County. Depoe Bay Lighting District. State participation approved. Agreement to be prepared.

Page	Date 1948	Subject
14830	Apr.20	Tillamook County. Oregon Coast Hwy. Delegation requests new route Tillamook to Woods. No action.
14831		Harney County. Rome-Princeton Secdy. Hwy. Judge Higgs urges completion. No action.
		Frenchglen Secdy. Hwy. Maintenance to be checked.
		Warm Springs Hwy. Mill Creek Bridge. Baer criticizes rejection of bids and requests shoulder oiling on The Dalles-California Hwy. near Chemult. No action.

Portland, Oregon
April 19, 1948

The State Highway Commission convened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben H. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
George Rouner, Assistant Counsel
Malcolm H. Hawke, Chief Auditor
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp was excused; however was present on the following day.

The minutes of the meetings of the Commission held on January 5, February 2 and 3, and March 11 and 12, 1948, were approved by Chairman Banfield and Commissioner Chandler. Commissioner Schaupp approved them on the following day.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

(1) Request of Caldwell Lumber Company, Seaside, to purchase burned timber and down timber located on Sunset Highway waysides: The Parks Superintendent advised that the company is willing to pay for this timber at the rate of 25 cents M-FBM, mill production. He recommended acceptance of the offer in order to get this area cleaned up and the fire hazard removed. The Commission approved the recommendation unanimously.

(2) Request of Mr. R. C. Moulton for revision of his agreement with the Commission for the removal of burned timber along the Sunset Highway: The Parks Superintendent advised that, according to the Commission's agreement with Mr. Moulton, he was to cut the burned timber on a 20-acre tract some of which it was thought would be merchantable as lumber and the balance could be used for fire wood purposes; moreover, Mr. Moulton was to pile the debris after he had taken out the merchantable timber. Mr. Moulton now complains, he said, that he cannot comply with the provisions of the agreement without losing money and is asking that he be permitted to fell only the standing burned timber. The Parks Superintendent pointed out that Mr. Moulton deposited with the Commission his check for $500 to guarantee satisfactory fulfillment of the agreement on his part. He recommended approval of the request in order to eliminate

possible fire hazard. The Commission approved the recommendation with the understanding that Mr. Moulton is to do a good job; otherwise, his $500 deposit is not to be returned to him.

(3) Construction of a memorial historical building in Champoeg State Park: The Parks Superintendent advised that an amount of $125,000 was set up by the Commission in the 1948 budget for construction of this building and he requested authority to advertise the project for bids. The Commission approved the request on the condition that the plans for the structure meet with the approval of the Oregon Historical Society and that they are checked by a competent architect. When these two features have been taken care of, the Engineer is to report the results to the Commission which will then issue definite instructions whether or not to proceed with the taking of bids. There was some question in the minds of the Commission whether a suitable building could be constructed for $125,000. The Commission indicated that it would authorize construction of the building if the bids are not too high.

(4) Construction of three caretakers' houses: The Parks Superintendent requested authority to construct three houses for the use of caretakers in the following state parks: Collier State Park in Klamath County, Saddle Mountain State Park in Clatsop County, and Armitage State Park north of Eugene in Lane County. He estimated the cost at $10,000 each and advised that they are needed in order to carry on developments and to properly maintain these parks. He further stated that provision has been made in the 1948 budget to finance them. The Commission approved the request unanimously and ordered that the houses be advertised for competitive bids.

(5) Acquisition of ocean waysides between Mack's Arch and Whale's Cove, in Curry County: The Parks Superintendent requested authority for the Right of Way Department to negotiate options for the acquisition of acreage that will compose the shoreline at this location. The Chief Counsel advised that Mr. C. L. Gardiner, Right of Way Buyer, has already conducted some negotiations with the property owners, who have indicated that they are willing to deal with the Commission only if the Oregon Coast Highway is rerouted along this ocean frontage, but not otherwise, and that Mr. Gardiner estimates the cost of the property at about $40,000. In the discussion of this matter, Chairman Banfield pointed out that it would be many years before the highway is built down this coastline, in view of which the present Commission should not commit future Commissions in that regard; however, he gave as his opinion, that it would be advisable to ascertain just what can be done with respect to acquiring waysides without creating any obligations in any way. Commissioner Chandler concurred in Chairman Banfield's statement, whereupon the Chief Counsel was authorized to negotiate options to acquire the properties involved on strictly a park basis and report back to the Commission.

(6) Proposed acquisition for state park purposes of 25 acres of land situate in Cape Arago Lighthouse Reservation: The Parks Superintendent requested authority to file an application with the Department of the Interior for the acquisition of this property under the Federal Recreational Act. He advised that this is a timber tract which is not used by the U. S. Coast Guard but will make a fine addition to the State Park System. The Commission approved the request.

In the discussion of this matter, Commissioner Chandler suggested that the road into the property should be investigated in order to avoid possible complications, inasmuch as there is a possibility that it is privately owned. The Parks Superintendent was instructed to look into this feature.

The Assistant Counsel, Mr. J. W. DeSouza, presented for the Commission's consideration a list of properties that are needed for highway improvements throughout the state, together with the option prices that have been agreed upon with the owners. Following careful consideration of each indivvidual tract, the Commission approved the offers disclosed in the options and authorized acquisition of the several parcels. The Commission by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "A" which by this reference is made a part hereof with like effect as though extended in full herein.

The following notes refer to the right of way resolution attached hereto and marked EXHIBIT "A":

+ Pacific Highway, City of Eugene, East Broadway, and Pacific Highway, City of Eugene, Cooperative Project: The Commission approved all of the settlements listed under these two headings upon assurance from the Chief Counsel that the City of Eugene has approved the amounts of the options and has also approved settlements heretofore made for right of way for this project.

* Front Street Project, City of Portland -- Item No. 11014, Verna D. Barnes, amount - $41,500; and Item No. 10861, Margaret F. Spencer, amount - $105,000. These two acquisitions were approved by the Commission on the second day of the meeting, when all Commissioners were present, following a detailed report by Mr. Mark D. McCallister, Right of Way Agent, who negotiated the purchases. Mr. McCallister advised that both parcels were included in the original report submitted by the Engineer covering the Front Street Project, the Barnes property being located at the east end of the Broadway Bridge and the Spencer property being located at the east end of the Steel Bridge. Mr. McCallister's report was presented at the request of the Commission and included the original arrangement as approved by the Commission and subsequent changes and additions. The Assistant Counsel, Mr. DeSouza, presented the following financial statement dated April 16, 1948, regarding this project as it appears in the record of this job:

14799

STATEMENT ON FRONT AVENUE PROJECT
PORTLAND, OREGON

April 16, 1948

Total cost of rights of way purchased to March 15, 1948		$2,228,226.00
Estimated cost of right of way unacquired on West Side		22,220.00
Estimated cost of right of way unacquired on East Side		258,750.00
Total acquired and unacquired right of way costs		2,509,196.00
Portland's share of above costs	$1,505,518.00	
State's share of above costs	$1,003,678.00	
Total	$2,509,196.00	
City funds available (Bond money)		$1,200,000.00
State funds available (Original allocation)		800,000.00
Rental collected (City's share)		263,040.26
Rental collected (State's share)		175,360.17
Rental anticipated (City's share)		33,360.00
Rental anticipated (State's share)		22,240.00
Total		$2,494,160.13
Estimated Deficit		
City funds		$ 9,021.52
State funds		6,014.35
Total		$15,035.87
Unexpended funds to March 15, 1948		
City funds		$159,464.48
State funds		112,388.20
Total		271,852.68

** Baker-Dewey Avenue Underpass Section, Baker-Unity Highway. The Commission approved the four settlements listed under this heading. In the discussion it developed that the City of Baker has not done certain things that it is required to do in connection with the project; moreover, the city has not indicated its intentions in writing with respect thereto. The Commission ordered that the city be informed

that the Commission has tried for many months to place this project under contract and is now waiting for the city to act, and if the Commission does not hear from the city authoritatively within a reasonable length of time the Commission will defer construction of the project.

*** Town of Moro Section, Sherman Highway, Item No. 14532 - purchase of maintenance headquarters from the Sherman Motor and Equipment Company for $15,000. The Commission approved this purchase and ordered that it be charged to the maintenance building account.

**** Eddyville Section, Corvallis-Newport Highway, Item No. 14093- purchase of maintenance site from T. E. Weltin, for $1,000. The Commission approved this purchase but ordered that hereafter more detail be given with respect to conditions involved. The Engineer was instructed hereafter to make a written report to the Commission in advance of the meeting when such matters are to be discussed.

In connection with the above real property matters, the Assistant Counsel presented an option from Victoria A. Larson and P. A. Larson for right of way that will be needed for improvement of the Youngs Bay Bridge-Lewis and Clark River Section of the Oregon Coast Highway, Clatsop County, involving a settlement totaling $1,458. The Commission deferred action on this matter pending a report as to the obligation that the Commission would assume were it to purchase this property at the present time. In the discussion of this item, it was pointed out that the Commission previously adopted the survey for the new highway location but no money has been set up to finance construction; also, that the reason that this item is brought up now is because the district is developing fast and it was thought perhaps the Commission would consider it advisable to acquire right of way before prices increase.

The Assistant Counsel, Mr. DeSouza, presented an additional list of properties that are needed for various highway improvements but which cannot be acquired by negotiation, together with the offers that he recommended in condemnation, as follows:

	Recommended Offer
RAINIER-GOBLE SECTION OF THE COLUMBIA RIVER HIGHWAY	
10851 Darleen Stevens	$ 100.00
10848 F. C. Marshall and Addie M. Marshall	100.00
JOSEPH-MONUMENT SECTION OF THE JOSEPH-WALLOWA LAKE HIGHWAY	
14417 John B. Smith and Ruth E. Smith	200.00

	Recommended Offer
FERRY STREET-WALNUT STREET SECTION OF THE PACIFIC HIGHWAY IN EUGENE	
12008 Waldemar Christensen and Dorothy K. Christensen	$ 100.00
TREHARNE-SUNSET CAMP SECTION OF THE VERNONIA-SUNSET CAMP ROAD	
14270 Estate of L. H. Bjornson	50.00

Following careful consideration of each item the Commission unanimously approved the offers as recommended and adopted the attached resolutions marked EXHIBITS "B-1", "B-2", and "B-3" which by this reference are made a part hereof with like effect as though extended in full herein.

The Engineer and the Chief Counsel brought up for discussion the matter of disposal of state-owned buildings situate on highway right of way newly acquired in the City of Eugene, there being a question whether the buildings should be sold or re-established on other state property in the vicinity for use by certain State Highway Department employees who find it difficult to secure residence accommodations in this city. The Engineer advised that an investigation as to moving the buildings has been made and it is estimated that to move them would cost approximately $45,000. The Chief Counsel advised that the only reason this matter is being brought to the Commission's attention is because of the question of furnishing some place for the employees to live. As a result of considerable discussion the Commission ordered that the houses be advertised for sale under two alternate plans, one of which involves the purchase of the houses alone and the other, the purchase of the houses and state-owned land on which they may be moved on the condition that the land is not needed for state highway purposes.

The Commission discussed a report from the Engineer on the results of receiving bids in Salem on April 12, 1948, for the purchase of additional buildings in Eugene. The Engineer submitted a list of the high bidders, together with the appraised value of each building, as follows:

SALE OF BUILDINGS AT EUGENE

Building No.	High Bidder	High Bid	Appraised Value
9953-A	(Walter M. Smith, Eugene (Kenneth Dodd, Newport	$ 150.00 (1) 150.00	$125.00

(Cont.)

SALE OF BUILDINGS AT EUGENE (Cont.)

Building No.	High Bidder	High Bid	Appraised Value
9953-B	L. E. Tucker, Eugene	$ 560.00	$ 125.00
11994 (2)	Joel D. Trapp, Eugene	2000.00	2500.00
11996	Lloyd Denslow, Eugene Kenneth Dodd, Newport	100.00 (1) 100.00	250.00
11997	Joel D. Trapp, Eugene	750.00 (3)	750.00
9266	Kenneth Dodd, Newport	105.00	50.00
10961	Merle E. Meyer, Eugene	255.00	75.00
9138	Lloyd Denslow, Eugene	100.00	50.00
9136	Lloyd Denslow, Eugene	100.00	100.00

(1) Tie Bids

(2) Bid amount and Engineer's estimate are for building and lot

(3) Building may be moved by state

He recommended acceptance of the high bid in each instance, except that should the Commission decide to move the houses to other state highway property, then the bids for Building No. 11997 should be rejected. The Chief Counsel concurred in the recommendation. In this connection a letter was presented from Mr. Kenneth Dodd, one of the high bidders, who offers an alternate proposition whereby the state would receive an additional sum for two of the properties in which he is interested. In view of this letter, the Commission deferred a decision with respect to the bids and referred the entire matter back to the Engineer and the Chief Counsel for study. They were instructed to telephone their recommendation to the members of the Commission for final decision.

The Engineer also reported on the results of taking bids in Salem on April 12 for the purchase of 42 acres of land situate adjacent to the Pacific Highway East near Steiwer Hill south of Salem. He submitted a list of the bids received as follows, and recommended rejection of all of them because they are considerably less than $4,200, which is the appraised value of the property:

SALE OF 42-ACRE TRACT OF LAND SOUTH OF SALEM

Bidder	Bid (Cash Basis)	Bid (Terms Basis)	Down Payment	Monthly Payment
Edwin J. Swart, Jefferson	$ ---	$ 2810.00	$ 710.00	$ (Bal. on Nov. 1, 1948)
Bert Picha, Salem	---	2124.00	531.13	30.00
Fred Teifke, Jefferson	---	2000.00	200.00	30.00
Luchia M. Fenley, Salem	1600.00	---	---	---
G. R. Murkers, Salem	1050.00	---	---	---

The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. George Neuner, brought up for discussion a proposed settlement of the claim of Mr. James H. Imbrie arising out of construction of the Gardner Ranch-Berger Ranch Section of the Sunset Highway. He advised that the Commission acquired right of way from Mr. Imbrie, and, in addition thereto, acquired an easement for the construction of a ditch for draining the Merle Grade Separation structure, involving the Oregon Electric Railroad and a county road. Mr. Imbrie, he said, was paid the sum of $400 for the easement, which provided for a ditch right of way ten feet wide about 2,100 feet long across Mr. Imbrie's cultivated fields; however, during the construction of the drainage facilities it developed that a portion of the pipeline that was to be installed in connection therewith had to be laid at a depth of 36 feet, which necessitated the excavation of a trench 37 feet wide, and during the progress of the work considerable material was deposited on and machinery was operated over a strip of Mr. Imbrie's land about 100 feet in width. Mr. Imbrie, he said, has submitted a claim for damages in the amount of $4,378.75, but as a result of negotiations has agreed to a compromise settlement of $3,000. He recommended payment of such sum to Mr. Imbrie as settlement in full for his claim. The Commission approved the recommendation unanimously. (For further details in connection with this matter see copy of letter of Mr. J. M. Devers to the members of the State Highway Commission dated April 9, 1948, in general files.)

The Commission discussed a report from the Engineer and the Chief Counsel regarding a request from the City of Myrtle Creek that the Highway

Commission quitclaim to the city a portion of the old highway right of way of the Pacific Highway in Myrtle Creek. The Engineer advised that the old right of way is of no value for highway purposes and recommended that it be conveyed to the city without cost. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Commission discussed and approved an agreement with the Union Pacific Railroad Company covering additional encroachments of the Columbia River Highway on railroad property between the John Day River and Blalock, in Gilliam County.

The Commission also discussed and approved an agreement with the University of Oregon amending a previous agreement dated December 18, 1941, concerning the reconstruction of the Pacific Highway in front of the University grounds in Eugene, such approval being given on the condition that the arrangement for a proposed traffic signal that is involved meets with the approval of the Public Roads Administration.

The Commission discussed the matter of acquiring two lots in the City of Florence as an enlargement of the maintenance station at that place. The Chief Counsel advised that the two lots are being sold by the county for delinquent taxes, but the county court is of the opinion that it cannot deal directly with the Commission, for which reason he is now requesting authority to submit a bid not exceeding $200 for this property. He further requested authority to condemn the property in the event someone else should submit a higher bid for it. The Commission approved both requests unanimously.

The Chief Counsel requested instructions regarding the sale of houses on property which the Commission is purchasing as a site for the State Highway Department Office Building, in Salem. He advised that he has had a number of inquiries concerning these houses from local people who wish to submit bids for them and who are temporarily deferring construction of new residences until they know definitely that they are not the successful bidders for the state's buildings. The Commission decided unanimously to defer the advertising of these houses for sale until all of the properties have been acquired in this block and until the Board of Control has received bids for the construction of the State Office Building on the adjoining block.

The Chief Counsel requested instructions regarding the acquisition of property owned by Floyd C. Crabtree, Elizabeth E. Heenan, and Sarah and Bernice M. Rise located on the site of the proposed State Highway Department Office Building, Salem. He advised that he has been unable to reach satisfactory settlements with these people by negotiation and it may be necessary to condemn the properties. He recommended the following offers as compromise settlements:

Floyd C. Crabtree, Parcel No. 1, File R 14197 - -	$ 26,500
Floyd C. Crabtree, Parcel No. 2, File R 14197-A -	18,025
Elizabeth E. Heenan, File R 14201 - - - - - - - -	21,500
Sarah and Bernice M. Rise, File R 14204 - - - - -	to be set later

The Commission by unanimous vote approved the recommendation and authorized the Chief Counsel to condemn the several properties in the event the owners will not settle for the approved amounts.

The Chief Counsel requested instructions regarding the exchange of properties with the Board of Control involving the site of the proposed State Highway Department Office Building in Block 86 and properties in Block 82 on which the State Office Building is to be constructed. He explained that the Board of Control some time ago acquired three properties in Block 86 while the market prices were quite below what they are now, and he is in receipt of information from the Secretary of the Board of Control that the Board members feel that the properties should be exchanged on present market value basis. The Commission unanimously approved exchange of the properties on such basis and instructed the Chief Counsel to negotiate with the Board of Control accordingly.

The Chief Counsel reported on a proposed change in zones by the City of Eugene of property situate adjacent to the Pacific Highway at that place which will affect the proposed highway improvement. The matter was discussed at some length, but action thereon was deferred until the following day when Commissioner Schaupp was present.

The Chief Counsel also reported briefly on the request of the Brooks-Scanlon Lumber Company, Bend, to operate a private logging road crossing of the Santiam Highway at Mile Post 90.65 between Suttle Lake and the Town of Sisters. Action on this matter was also deferred until the following day when Commissioner Schaupp was present.

The Commission discussed a report from the Chief Counsel on the request of the Hayden Island Amusement Company to erect certain signs on the right of way of the Pacific Highway East directing people to Jantzen Beach, and also on the company's request to maintain two bus-stop shelters on highway right of way opposite Jantzen Beach Park. He gave as his thought that the company should not be permitted to maintain the signs on the right of way, because the type of sign proposed is illegal. The Engineer expressed himself similarly; however, he recommended approval of the company's request with respect to maintaining the bus-stop shelters because they will be a public convenience, on the condition that they are properly located. The Commission approved the recommendation unanimously on the condition that the shelters are erected to the Engineer's satisfaction. The Commission denied the request concerning the signs.

The Commission discussed a report from the Chief Counsel on the use of state-owned property along the Sandy River near Troutdale by vendors of smelt fishing supplies, etc., particularly the activities of Paul Mumpower, W. R. Blake, and W. R. Whiffin. He recommended that a study be made of this matter and, if it is found that the general public needs the service that is being rendered by these gentlemen, that the state erect its own shelters and advertise for bids for the operation of concessions. Chairman Banfield advised

that he has discussed this matter with the State Parks Superintendent who has been requested to give the matter study and report his findings.

The Commission approved a letter prepared by the Chief Counsel and directed to Mr. L. M. Christensen accepting surrender by Mr. Christensen of the permit heretofore granted him authorizing removal of sand from the ocean beach at Yachats.

The Commission by unanimous vote confirmed telephonic approval given the Engineer to reimburse the Albina Engine and Machine Works in the amount of $5,961, for expenses the company incurred in connection with changing the fire fighting equipment on the ferry "M. R. Chessman" in order to comply with the requirements of the U. S. Coast Guard.

In this connection the Commission also approved an expenditure of $450 for the installation of a communication system on this ferry boat, $572 for construction of a railing on the life boat deck, and $250 for additional stowage for life preservers, it having developed during the trial trip of the ferry that the added facilities are a necessity and the railing on the life boat deck having been recommended by the insurance underwriters.

The Commission also discussed briefly the matter of revising the schedule of fares for the ferry by increasing the fares now charged trucks and automobiles so that the ferry operation will not show a loss as it does at the present time. It was the thought of the Commission that the fares should be increased; however, action on the matter was deferred until the following day when Commissioner Schaupp is present.

The Commission discussed and approved an agreement with Babbidge & Holt, Inc., present operators of the ferries "Tourist No. II" and "Tourist No. III", covering the operation of the ferry "M. R. Chessman" during the unexpired portion of the company's present contract with the Commission, or until May 31, 1948.

The Engineer reported receipt of a letter from the Public Roads Administration requesting the attitude of the State Highway Commission concerning use of a dam which the Army Engineers propose to construct across the Columbia River near the mouth of the John Day River, as a foundation for a highway bridge connecting the highway systems of Oregon and Washington. He suggested a reply to the effect that the Highway Commission will interpose no objection to the construction of the dam provided the Dam Authority will rebuild the inundated sections of the Old Oregon Trail with facilities adequate in alignment, gradient, width, foundations, and pavement that will meet the traffic requirements of this transcontinental highway and, provided further, that a masonry wall will be constructed to protect slopes if the highway is placed in slide areas, that guard fences of a permanent type will be erected along high fills for traffic protection, and that the Oregon State Highway Department has an opportunity to approve the plans for the construction of the replaced highway facilities before the contracts for them are awarded. The

Commission approved the letter and authorized the Engineer to forward it to the District Engineer, U. S. War Department, with a copy to the Public Roads Administration.

The Engineer reported the results of investigations made for the improvement of Secondary State Highway No. 105 in the City of Warrenton as requested by the City Council. He advised that the highway as presently aligned follows along city streets and includes three right angle turns, whereas investigation reveals that these three turns could be eliminated if the highway were re-aligned for about two blocks, particularly between Everett Avenue and Wheeler Street. This highway, he said, carries a large volume of traffic and should be improved. He estimated the cost of improvements requested, which includes construction of the new section between Everett Avenue and Wheeler Street, the widening of the pavement to 22 feet along Chapman Street, and the construction of four-foot shoulders on either side of the pavement, at approximately $30,000. He recommended approval of the project as a special major betterment project for 1949 construction and that the work be done by contract. The Commission indicated approval of the recommendation but deferred a definite decision until the following day when all Commissioners are present.

The Engineer reported that the floor plan for the new State Highway Department Office Building has been revised to reduce cost of construction, as outlined in his written report to the Commission dated April 1, 1948. The Commission deferred discussion of this matter until the State Board of Control has received bids for construction of the new State Office Building on the adjoining block.

The Commission discussed the Engineer's report dated April 5, 1948, on the feasibility of a highway extending from the west end of the St. Johns Bridge, Portland, to a connection with the Germantown Road west of Skyline Summit, as previously suggested by the St. Johns Businessmens Club. The report points out conclusively that such a road is not feasible or practicable and that the only way the traffic would secure benefits would be by construction of a tunnel about two miles long which is estimated to cost about $8,000,000. The Secretary was instructed to send a copy of this report to the St. Johns Businessmens Club.

The Commission approved and ordered filed a report from the Engineer containing a statement showing each of the four current forest highway programs and revisions agreed upon subsequent to adoption of the original program.

The Engineer reported on the request of the City of Umatilla for construction of a sidewalk on the bridge crossing the Umatilla River on the Columbia River Highway in this city. He advised that the Three Year Postwar Construction Program contains an item of $32,000 for widening this bridge; however, because of the rise in costs, such sum no longer is adequate, and a recent price check indicates that to widen the bridge from its existing 20-foot width to a 24-foot width, with a sidewalk on each side, would cost $52,500, and to widen the bridge for a standard 30-foot width with standard 5-foot sidewalks would cost about $140,000. He pointed out that a timber

sidewalk three feet six inches wide could be constructed on one side of the existing bridge outside the present handrail at a cost of about $9,000. He gave as his thought that such type of construction would serve the purpose for some little time to come. Chairman Banfield expressed the thought that if the present bridge is not wide enough, perhaps the Commission should rebuild it. The Engineer was thereupon instructed to render a full and complete report on this project.

A letter was presented from Mr. H. O. Mansfield, Manager, Tum-A-Lum Lumber Company, Freewater, Oregon, urging construction of a road, known locally as the "Lincoln Mountain Highway", which extends southeasterly from Milton-Freewater to a connection with the Weston-Elgin Secondary Highway in the vicinity of Tollgate. The Engineer advised that this is a county road under the jurisdiction of the Umatilla County Court, that it is about 16 miles long and it would benefit mostly the people of Walla Walla, Washington, who patronize the Tollgate Recreational Area. He estimated the cost to construct it at about $2,000,000 and recommended that the request be denied. The Commission approved the recommendation and order that Mr. Mansfield be so informed.

The Commission discussed and approved an agreement with the City of Sheridan covering the improvement of Main Street, route of the Salmon River Highway, in this town, bids for which are to be received by the Commission on the following day.

The Engineer reported that the following cities and towns have fulfilled the requirements with respect to the expenditure of 1947 State Tax Street Funds which they received in 1948:

Athena	Lafayette	Powers
Fairview	Lonerock	Rockaway

He further reported that the plans of the projects proposed for construction with such funds have been examined and found satisfactory, and recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "D" and which by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have fulfilled the requirements with respect to the expenditure of 1946 State Tax Street Funds which they received in 1947:

Bonanza	Clatskanie	Culver	Malin	Tualatin
Canyonville	Cove	Dayton	Richland	Waldport

He also said that the plans for the projects which it is proposed to finance with these funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "E" and by this reference made a part hereof with like effect as though copied in full herein.

The Commission unanimously confirmed the Engineer's award of the following contracts, bids for which were received by the Commission at its meeting on March 11 and 12, 1948, the Engineer having reported that the conditions of the awards have been satisfied:

Grading, surfacing, and oiling the Yellow Creek-Calapooya Creek Section of the Elkton-Sutherlin Secondary Highway, Douglas County; bids received March 11, contract awarded March 17 to low bidder, C. J. Eldon

Construction of North Powder River Bridge Section of North Powder River County Road, Baker and Union Counties; bids received March 11, contract awarded March 17 to the low bidder, Snook Bros.

Pleasant Hill Overcrossing structure on the Willamette Highway, Lane County; bids received March 12, contract awarded March 16 to the low bidder, R & M Construction Co.

A petition was presented from taxpayers and residents of Marion County served by Silver Creek Falls State Secondary Highway requesting the widening and otherwise improvement of this highway from its connection with State Street, in Salem, to its junction with Lancaster Drive, a distance of approximately one mile. The Engineer advised that the project requested extends from Salem to a place commonly known as Four Corners, which is developing rapidly, and that the improvement is a desirable one. He estimated the cost involved at $60,000. The Commission denied the request for immediate undertaking because of lack of funds, however, stated its intention to look the project over on one of its inspection trips this summer.

A petition was also presented from owners and employees of business enterprises located in North Portland requesting the elimination of an alleged traffic hazard at the junction of Denver Avenue and Union Avenue, Portland. The Secretary was instructed to inform the petitioners that a study is now being made of the situation to which they refer.

The Commission discussed briefly and approved an agreement with Mr. Joseph Holt, Seattle, covering the repairs to certain steel members of the South Dillard Bridge over the Umpqua River, in Douglas County, which were damaged during the high water period in January, thus confirming the arrangement previously authorized over the telephone.

The Engineer reported on the request from the Lincoln School Parent Teachers Association, Corvallis, for construction of a guard rail along the Pacific Highway West for a short distance south of the City of Corvallis, where the highway closely parallels Mary's River Millrace. It appears that there now exists a footpath five feet wide along the Millrace side of the highway, with a steep bank extending from the sidewalk down to the Millrace, creating a poten-

tial hazard for children going to and from school. The Engineer recommended construction of a guard rail along this section for about 300 feet, which he estimated would cost about $800. The Commission approved the recommendation unanimously and ordered that the work be done as a minor betterment project.

The Commission discussed a request from the City of Island City for the installation of a four-way flashing traffic light at the intersection of Highway 82 with the "Cove Highway", which is at the intersection of Main and First Streets in this town. The Engineer recommended approval of this request and estimated the cost of the project at about $229. He also recommended that the expense be paid entirely with state funds, inasmuch as Island City is not an incorporated city and because the intersection is of two state highways. The Commission approved the recommendation with the understanding that the city will maintain the signal after it is installed and will furnish the electrical energy to operate it at city expense.

Consideration was also given by the Commission to a petition from residents of Portland for a revision in the traffic signal heretofore erected on S. W. Canyon Road at its intersection with Canyon Lane near Sylvan. The petitioners allege that pedestrians, particularly small children, are subjected to an extremely hazardous condition when they alight from the bus that stops at this intersection and cross the highway, and they urge that corrective measures be taken immediately by installation of a signal of the automatic type or one that can be operated by an individual who desires to cross the highway. The Engineer advised that a hazard still exists at this intersection although it is not as severe as it was before the present traffic light was installed. He gave as his thought that the Commission is probably under some obligation to recognize the potential hazard and suggested that a push button arrangement be installed on the present signal so the light can be actuated manually when someone wishes to cross the highway, notwithstanding that it would result in some restriction to the flow of traffic on this heavily-traveled thoroughfare. The Commission approved the recommendation as a trial proposition.

The meeting adjourned for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Engineer reported on a request from the City Council of the City of Ashland for a survey to determine the need for traffic signals at certain street intersections within that city. He advised that the Traffic Engineering Department has contacted the city attorney to determine just what the city has in mind, and from the information obtained he finds that the maximum hourly traffic entering the intersections where the traffic lights are desired is considerably below the accepted standard of 750 vehicles and 250 pedestrians per hour, which is considered the minimum for justification of the expense of the installations. It is the recommendation of the Traffic Engineer, he said, in which he concurs, that the request for the installations be denied inasmuch as the signals are not warranted from an engineering standpoint. The Commission approved the recommendation.

A report was also submitted by the Engineer on a request from the City of Lakeview for the installation of two traffic signals on "F" Street, route of State Highway No. 395, at its intersections with First Street North and Center Street. He advised that this matter has been investigated by the Traffic Engineer who recommends against these installations because a study of the situation reveals that the maximum hourly traffic entering the intersections is far below standard, and who suggests that a more rigid enforcement of the law would correct the situation. The Commission approved the recommendation.

The Engineer presented a list of 17 minor betterment projects scattered throughout the state totaling an estimated cost of $26,570 and asked the Commission to approve them for construction during the 1948 season. He pointed out that the Commission heretofore approved in its 1948 budget the sum of $972,715 for work of this nature, exclusive of reserves and contingencies, and that upon approval by the Commission of the projects now requested there will remain an unallocated balance of $276,480 for additional work. He presented copies of minor betterment work orders (*) showing in detail the work proposed under the requested allocation. Following discussion the Commission approved all of the projects making up the total of $26,570 as disclosed in the following summary:

PROPOSED MINOR BETTERMENT PROJECTS

OILING SHOULDERS:		
Crater Lake-Medford-Reese Creek Sec., oil shoulders 1' wide	$10,830	
Beaverton-Aurora Secondary-oil shoulders along 16' blacktop pavement	900	
McMinnville Secondary-oil shoulders to eliminate hazardous traffic ruts	400	
Crater Lake-Medford-Reese Creek Sec., oil road approaches	1,920	
TOTAL		$14,050
WIDENING SHOULDERS:		
Pacific - M.P. 284-286 - widen hazardous shoulders	2,000	
Territorial Secondary - remove slide and widen roadbed	1,500	
TOTAL		3,500
BUS STOPS		
Columbia River Highway thru Portland - improve 4 trackless trolley stops on Burnside and Sandy by placing cement concrete pavement	4,800	
TOTAL		4,800
SIGHT POSTS AND GUARD FENCE:		
Gales Creek Road - Place 30 sight posts	120	
Ochoco Highway - Set 50 sight posts, M.P. 6 - 7	200	
Santiam Highway - Place 200 sight posts	600	
The Dalles-California Highway - Extend guard fence 100 feet	300	
Central Oregon Highway-100 ft. of guard fence, foot of Pilot Butte	300	
North Santiam Secondary - Place 200 sight posts	600	
TOTAL		2,120

(Cont.)

PROPOSED MINOR BETTERMENT PROJECTS (Cont.)

MISCELLANEOUS:

Vancouver Avenue Secondary - Place traffic separator bars - Columbia Slough Bridge to Schmeer Road	$ 150	
Ochoco Highway - Daylight small cuts in water spout area	1,200	
Three Rivers Highway - Reshape slopes to improve drainage and facilitate maintenance	500	
Salem-Dallas Highway - Reshape slopes to facilitate maintenance	250	
TOTAL		2,100
TOTAL PROPOSED MINOR BETTERMENT		$26,570

FOOTNOTE:

Copies of the Minor Betterment Work Orders referred to are attached to the above summary in the Highway Commissions's records and files in Salem, Oregon, being Highway Commission Budgets File No. 2-B

The Commission discussed a resolution from Malheur County Pomona Grange No. 33, Brogan, Oregon, favoring the rerouting of US95 from Weiser, Idaho, via Ontario, Nyssa, Adrian and Jordan Valley, Oregon, to Winnemucca, Nevada. The Engineer advised that this highway is now routed from Weiser to Winnemucca via Payette and Parma, Idaho, and Jordan Valley, Oregon, being entirely in the State of Idaho until it crosses the Oregon-Idaho state line about 20 miles north of Jordan Valley. He pointed out that in order to change the designation as requested it would be necessary to secure the approval of the American Association of State Highway Officials, which would not act until it had a recommendation from the State of Idaho. He also pointed out that if the highway were re-designated, it would require the construction of the old Sucker Creek Section south of Adrian at an expense of approximately $2,000,000. He recommended that the present designation be retained. The Commission approved the recommendation and so ordered.

The Commission unanimously confirmed the oral authority previously given the Engineer to advertise for bids for repainting a portion of the Yaquina Bay Bridge at Newport at an estimated cost of $44,000. In this connection the Commission also confirmed the transfer of funds in the 1948 budget to pay this expense, particularly by substituting the above-mentioned painting project for items one and three on page two of the Special Maintenance Budget. The work contemplated under items one and three of the Special Maintenance Budget will be performed by state maintenance forces and will be paid for as an item under the general maintenance budget.

Chairman Banfield brought up for discussion the matter of surveys for highway improvements. He inquired whether or not the status of surveys is such that there is a possibility that construction work will be handicapped because necessary surveys are not completed. The Engineer was instructed to submit a complete report on the subject showing all surveys that have been completed, classification with respect to the first Three Year Postwar Program, and the status of surveys that have yet to be made in connection with the Postwar Program projects; in other words, the report is to be complete as to the surveys required for the Three Year Postwar Program that is now under way and as to surveys that may be required for projects in the next program.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Carl M. Halvorsen, Inc., Contract No. 2956 for construction of a temporary office building in Salem, requested an extension of time of 19 days, from February 25 to March 15, 1948, within which to complete this job. They attributed the overrun in time limit to change orders calling for installation of steam heat in the building and the sanding and finishing of floors. The Engineer advised that it was originally intended to construct this building on Waverly Street next to the present State Office Building, but because of complications, it was necessary to change the location to the State Highway Shops, which required an alteration in the plans for heating the structure. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Lindstrom Bros., Contract No. 2931 for widening the Dairy Creek Bridge on the Tualatin Valley Highway, in Washington County, requested an extension of time of 60 days, from March 31 to May 31, 1948, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: Unusually heavy rains and resulting high water in Dairy Creek which forced the closing down of operations on several occasions, aggregating four weeks of working time; extra work required in splicing and extending piling; and delays occasioned in constructing a dirt fill and channel work which cannot be done until high waters recede. The Engineer advised that the contractor made every effort to expedite the work on this project but has been delayed by unusually high water in Dairy Creek. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Albina Engine & Machine Works, Inc., Contract No. 2912 for construction of the ferry "M. R. Chessman", requested an additional extension of time of 25 days, from March 26 to April 20, 1948, within which to complete this project. They alleged that additional time is required to complete extra items requested by the State Highway Department during the progress of the trial run of this vessel. The Engineer

advised that the contractor would have completed construction of this boat within the previously-extended time limit had it not been for certain changes which were found necessary or advisable during the progress of the trial trip, including an entirely different fire extinguishing system, ordered by the U. S. Coast Guard, than was originally approved by that authority. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Erick Enquist, Contract No. 2946 for construction of a bridge over Oneonta Creek on the Columbia River Highway, in Multnomah County, requested an extension of time of 30 days, from March 31 to April 30, 1948, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to adverse weather conditions and delays in completing certain negotiations with the railroad company before the contract was signed. The Engineer advised that the weather was particularly bad in the Columbia Gorge during the past winter and the contractor's operations were handicapped thereby. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Lindstrom Bros., Contract No. 2942, for construction of a bridge over Rock Creek on the Clackamas Secondary Highway, in Clackamas County, requested an additional extension of time of 90 days, from March 31 to June 30, 1948, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the fact that the old bridge which is being replaced cannot be closed to traffic and removed until the approaches to the new structure, which are being done under separate contract, have been completed. They alleged that the work required under their contract is complete except for the removal of the old structure. The Engineer advised that this bridge is on a section of highway that is now under contract for grading and surfacing, also, that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Angelo A. Doveri, Contract No. 2814 for construction of two concrete bridges on The Dalles-California Highway near Chiloquin, Klamath County, requested an additional extension of time of 81 days, from September 30 to December 20, 1947, within which to complete this job. The contractor advised that this contract was awarded to him in June 1946, but he was prevented from beginning work because of inability to reach the project over the new highway grade; in fact, he could not get onto the job until August 1, 1946. Weather conditions, he said, delayed the progress of the work considerably, and in addition thereto, it was found that instead of rock being available for bridge pier foundations the material consisted of sand, which necessitated a change in the specifications, which had

to be approved by the Public Roads Administration as well as by the State Highway Department. Mr. Doveri also attributed further delays to difficulties in securing labor. The Engineer advised that this contract was scheduled for completion November 30, 1946, but due to the fact that it was not done at that time the Commission authorized an extension of time to July 31, 1947; however, the work was not done even then so an additional extension of time was granted to September 30, 1947, with the proviso that Mr. Doveri would be charged for the engineering expense incurred by the state on this job subsequent to July 31. It now is necessary he said, to further extend the time limit to December 20, 1947. He gave as his opinion that the contractor's failure to complete the project within the specified time limit was due to improperly organized work, and in view thereof, he recommended that the additional extension of time requested be granted on the condition that the contractor is charged the customary engineering penalty, which should date back to July 31, 1947, in conformity with the penalty charged on the previous time extension. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Angelo A. Doveri, Contract No. 2802 for widening the bridge over Altamont Canal on The Dalles-California Highway, in Klamath Falls, requested an additional extension of time of 45 days, from November 30, 1947, to January 14, 1948, within which to complete this job. He attributed his failure to complete the project within the previously-extended time limit to inability to secure the services of cement finishers. The Engineer advised that this contract was awarded on April 23, 1946, and according to the provisions thereof, the job was to be completed by April 30, 1947. The structure was completed in the spring of 1947 except for removal of forms underneath the span, but this part of the work could not be done until the water was turned out of the canal, and accordingly, the Commission granted an extension of time to and including November 30, 1947. He further stated that there was ample time for the contractor to have removed the false work after the water was turned out and before expiration of the extended time limit; however, that was not done, so the job was not completed until January 14, 1948. He declared that the delay was entirely for the contractor's own convenience and in view thereof, in his estimation, the contractor should be penalized. He recommended, therefore, that the additional extension of time now requested be granted but that the contractor be charged with the engineering expense incurred by the state in connection with this job subsequent to November 30, 1947. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously

In the discussion of the two requests of contractor Angelo A. Doveri mentioned above, the Engineer advised receipt of a communication from Commissioner A. W. Schaupp questioning the advisability of penalizing Mr. Doveri for failure to complete the projects on time. He advised that the amount of the penalty in either instance would be nominal, and

should the Commission waive it in behalf of Mr. Doveri, it would deviate from established policy with regard to such matters. The Commission decided not to waive the penalty in either case.

Tom Lillebo, Contract No. 2932 for construction of a bridge over the Umpqua River on the Oregon Coast Highway, in Douglas County, requested an extension of time of 87 days, from December 31, 1947, to March 27, 1948 within which to complete this job. He attributed his failure to complete the project within the specified time limit to high water conditions in the Umpqua River which destroyed considerable of the fenders on the old structure and a portion of the completed new work, and required the securing of additional piling and other material and additional time within which to complete the job. The Engineer advised that the statements given by the contractor are correct, that the additional time requested was required to repair the damage done by the floods. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendatio .

The State Highway Commission, in passing on contractor's requests for extensions of time within which to complete the contracts as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

The Engineer reported that contracts Nos. 2860, 2932, and 2956 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2860 with M. C. Lininger & Sons for furnishing crushed rock in stockpiles on the Siskiyou Junction-Long Prairie Creek Section of the Green Springs Highway, in Jackson and Klamath Counties; completed November 19, 1947.

Contract No. 2932 with Tom Lillebo for repairs to the Umpqua River Bridge pier fenders, in Douglas County; completed March 27, 1948.

Contract No. 2956 with Carl M. Halvorsen, Inc. for construction of a temporary office building at Salem Shops; completed March 15, 1948.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

The Engineer requested authority to purchase additional equipment, as follows, totaling $134,400:

Equipment on Rental

3	Sedan delivery	$ 4,200	
10	Pickups	12,000	
4	Power graders	40,000	
2	Compressors	4,600	
4	Mush Coat Kettles	3,200	
7	Front end loaders	22,400	
3	Pumps, 2"	900	
1	Drying drum	2,500	
	Engineering equipment	5,000	
			$ 94,800

Equipment not on Rental

Office equipment and furniture	20,000	
Radio equipment	5,000	
Maintenance station equipment	8,600	
Blueprint equipment	6,000	
1 "Ozalid" continuous printer-developing machine, for printing and developing white print copies of maps, plans, and other drawings	———	$ 39,600
Total		$134,400

The Engineer pointed out that the 1948 budget contains an item of $962,650 for the purchase of equipment, excluding contingencies and reserve, of which amount the Commission has approved purchases totaling $618,220, which amount, together with the authorization now requested, will bring the total requested authorization to $752,620 and leaves a balance of $210,030. The total amount unobligated, including the contingencies and reserve in the amount of $137,350, he said, amounts to $347,380. Following discussion the Commission unanimously approved the request for the additional expenditure of $134,400.

The Commission discussed and approved a standard form of "Line Extension and Service Contract" prepared by the Pacific Power & Light Company and covering the furnishing of electrical energy to operate traffic signals at Mosier Tunnel on the Upper Columbia River Highway and for illumination of the tunnel. The Secretary was authorized to execute the contract on behalf of the Commission.

Consideration was given by the Commission to an assessment notice submitted by the City of Nyssa by which the State Highway Department is

charged a portion of the expense of improving two city streets in front of state-owned property in Nyssa, as follows: Improvement of Park Avenue between 7th Street and 8th Street; assessment, $998.84; improvement of 1st Street North north of Main Street; assessment, $311.65. Total assessment, $1,309.89. The Engineer advised that the improvement on Park Avenue is in front of a 2.90-acre tract that was acquired by the State Highway Department as a stockpile site and on which there is now stored a considerable quantity of material which will not be consumed in normal operation for about three years. This street, he said, is to be graded, surfaced, and oiled and will be to the state's advantage. The improvement on 1st Street North, he said, fronts property that the Commission purchased from the Fletcher Oil Company as right of way in connection with the Nyssa Underpass project and is now being utilized as an equipment storage headquarters. The assessment on this street, he said, is for grading, surfacing, and oiling, which will also be an advantage to the state. He recommended payment of both assessments in the full amount of $1,309.89. The Commission approved the recommendation.

A letter was presented from Mr. Oscar L. Swensen, President, Albany Timber Carnival Association, requesting permission to use Waverly Lake and Waverly State Park in Albany in connection with their annual Timber Carnival which is to be held on July 3 and 4, 1948, as has been done for several years in the past. The Engineer suggested that the Commission should be very careful in passing on this subject because past use of the property for the purpose intended has resulted in creation of considerable traffic congestion and serious hazards; moreover, the premises have not been cleaned up by the Association pursuant to agreement. He pointed out, however, that the Association would be very much disappointed if it could not have the use of the property as it has in the past. The Engineer was instructed by the Commission to submit a complete written report on the subject, including suggestions for policing the area and handling of traffic, etc., for consideration by the Commission at its next meeting.

The Commission discussed and approved an agreement with Victor Phipps and wife and the Roseburg Lumber Company covering release of their rights to a certain timber cattle pass located on the Pacific Highway at Mile Post 209.81 in Douglas County. The agreement provides that these people will release their rights for a consideration of $1.

The Commission also discussed and approved an agreement with Bessie E. Jenkins and son for relinquishment of their rights to a certain timber cattle pass located on the Oregon Coast Highway at Mile Post 288.85, in Coos County, for a consideration of $50.

The Commission discussed and approved a request from Mr. Clifford O. Dougherty, Postmaster, Cloverdale, Oregon, for the establishment of a "no parking" zone in front of the Post Office at this place. The attached resolution marked EXHIBIT "G" referring thereto and by this reference made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote.

The Commission also approved the establishment of a "no parking" zone along the Pacific Highway for a distance of one-half mile immediately south of the City of Woodburn, being particularly between Mile Post 34.95 and Mile Post 35.21, as recommended by the Engineer who advised that a hazardous condition exists at this point at certain times of the week, particularly on Tuesday, because of an auction mart which conducts sales at this location. Many of those attending the sales park on both sides of the highway for a distance of about 600 feet both north and south of the entrance to the mart. The attached resolution relative thereto, marked EXHIBIT "H" and by this reference made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote on the condition that the establishment of the zone will control the situation.

The Engineer reported on the request from the County Court of Wasco County for the establishment of a reduced speed zone on the Columbia River Highway westerly from the west city limits of The Dalles to Chenowith Creek Bridge. He advised that this matter has been investigated by the Traffic Engineer who reports an average traffic volume of 3,900 vehicles daily along this section, where the pavement is only 20 feet wide with five-foot shoulders. The investigation also reveals that there is considerable roadside culture along the section, consisting of farm machinery retailers, oil tanks, residences, etc; moreover, several side roads join the highway between these points, traffic from which introduces a considerable hazard to highway travel. During the period 1941 through 1947, he said, there were 41 accidents on this section involving one fatality and injury to ten persons. He recommended, in view of these findings, that a 45-miles-per-hour speed zone be established between the city limits and Chenowith Creek Bridge. The Commission deferred a decision in the matter until the following day when Commissioner Schaupp is present, however, at that time approved the recommendation unanimously by the adoption of the attached resolution relative thereto marked EXHIBIT "L" and by this reference made a part hereof with like effect as though extended in full herein.

The Engineer also reported a request from the Cascade Plywood Company of Lebanon for the establishment of a reduced speed zone along the Santiam Highway south of Lebanon near the Cascade Plywood plant. He advised that this matter has been investigated by the Traffic Engineer who reports that the entire section of this highway between Sweet Home and Lebanon has a high accident record, a total of 91 accidents having occurred during the two-year period 1946-47 between the south city limits of Lebanon and a point about one mile south thereof. The traffic volume at this point, he said, amounts to 4,700 vehicles for every 24-hour period, and during changes in shifts at the plywood plant, considerable congestion and numerous accidents occur. He strongly recommended the establishment of a 35-miles-per-hour speed zone between the south city limits of Lebanon, at Mile Post 14.06, and the Cascade Plywood Company's plant, at Mile Post 14.92. The Commission took the matter under advisement until the following day when Commissioner Schaupp is present. At that time the Commission voted unanimously approving the recommendation and thereupon adopted the attached resolution relative thereto marked EXHIBIT "M" and which by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested approval of a per diem allowance of $9 for Mr. J. Al Head, Assistant Traffic Engineer, for three days' time that he expects to spend in Washington, D.C., in the near future to discuss details pertaining to traffic origin and destination surveys with planning officials of the Public Roads Administration. He advised that Mr. Head is leaving this week for the East in connection with private business, at his own expense, but has stated a willingness and desire to take the opportunity to spend three days' time in behalf of the state to discuss the survey matters with the Federal officials. The Engineer recommended that Mr. Head be allowed $9 per day for the three days that he will spend in the state's interests on this trip. The Commission approved the recommendation.

The Engineer submitted a list of employees who will reach the retirement age of 65 during the calendar year 1948, including Mr. Paul G. Deuber, Civil Engineer Grade I, employed at the Highway Department Laboratory, and Mr. Earl M. Nash, who is employed in a dual capacity -- six months of the year as a Section Foreman and six months as an Oiling Crew Foreman during the summer season. He requested authority to continue Mr. Deuber on the payroll for one year, from the date that he reaches retirement age on December 1, 1948, because of the shortage of engineering help, and he requested authority to retain Mr. Nash on the payroll until January 1, 1949, when the season's oiling operations have been completed, which would also give time to train an understudy to replace him. The Commission approved both requests by unanimous vote.

The Commission had under discussion the question of being one of the co-sponsors for an Oregon traffic engineering conference to be held at Oregon State College some time this summer, the other co-sponsors being Oregon State College and the League of Oregon Cities in cooperation with the American Institute of Traffic Engineers and the Yale Bureau of Highway Traffic. The Engineer recalled that the Commission acted as one of the co-sponsors two years ago and recommended that the Commission again act as a co-sponsor this year. He said that there would be no cost to the State Highway Commission by so doing except payment of expenses of the few employees who would attend the conference. The Commission approved the recommendation.

The Commission had under discussion the application of Mr. Floyd R. Persons to truck haul logs over a short section of the North Santiam Highway from a private roadway which enters this highway at Sardine Creek, about five miles east of the settlement known as Niagara, to Lakewood Siding, about 0.8 mile westerly thereof, a considerable portion of which distance is over the detour that is being used during construction of the highway. The Chief Counsel advised that the detour which Mr. Persons would have to use in his operations is on railroad property over which the Highway Commission has no control; moreover, the highway contractor objects to the use of this detour for purposes such as Mr. Persons desires and has threatened to discontinue his highway construction if Mr. Persons is allowed the use of the detour. He suggested, in view of the fact that the Commission has no control over the detour, that the Commission refuse to grant Mr. Persons the privilege he requests. The Commission approved the suggestion and so ordered.

The Engineer reported that on March 25, 1948, he posted the Little Butte State Secondary Highway, in Jackson County, and the Rogue River Loop State Secondary Highway, in Josephine County, for a 50-percent reduced load limit in order to preserve the surface of these highways during the spring months when the frost is leaving the ground. He asked the Commission to confirm the posting. The Commission approved the request and by unanimous vote adopted a resolution with respect thereto which is attached and marked EXHIBIT "I" and which by this reference is made a part hereof with like effect as though extended in full herein.

In this connection the Engineer also reported that he has ordered the lifting of the reduced load limit heretofore in effect on the McKenzie Highway between the Forest Boundary and Belknap Springs Road, the conditions having changed so that the reduced load limit no longer is necessary on this section. He asked the Commission to formally approve the restoration of the legal weight limits on this section of highway. The Commission approved the request and by unanimous vote adopted a resolution relative thereto which is attached and marked EXHIBIT "J" and which by this reference is made a part hereof with like effect as though extended in full herein.

The Commission confirmed the oral authority previously given the Engineer to sell to Mr. Mount Moore, Baker, Oregon, for the sum of $150, an old pull-type road grader, Department No. 25-566, which is 23 years old and has been out of service for four or five years, and repairs to which would cost much more than the equipment is worth.

The Commission discussed an agreement with the Tillamook County Court and the Tillamook Drainage District covering reconstruction of an untreated timber trestle bridge on the Oregon Coast Highway about two miles south of the City of Tillamook. The Engineer advised that this bridge is located on a section of the highway which will be abandoned when the highway has been realigned; also, that the Drainage District has agreed to pay for an 84-inch pipe to replace a three-span timber bridge, including a tide gate, and that Tillamook County has agreed to maintain the old road and the drainage pipe when the highway has been reconstructed. He estimated the cost of the state's cooperation at about $2,000. The Chief Counsel advised that the arrangement is satisfactory from a legal standpoint. The Commission approved the agreement by unanimous vote.

The Commission had under discussion the petition of Donald L. Sloan, Klamath Falls, before the City Council of the City of Klamath Falls, for the vacation of a portion of Sunnyside Addition and a portion of Eldorado Heights Addition to the City of Klamath Falls, particularly the portion that lies between Van Ness Avenue and Eldorado Boulevard. The Chief Counsel explained that Mr. Sloan desires to replat the area, and in order to do so, needs the consent of the adjoining property owners, and the Highway Commission is concerned because it owns the property which lies on the westerly side of Dahlia Street, one of the streets to be vacated. The Engineer exhibited a map showing the area proposed to be replatted and advised that Dahlia Street is now open for public use but in the replat of the area Mr. Sloan proposes to substitute for this street a narrow service road from which there will be no access to the highway, and that the replat will

provide for a standard-width street farther removed from the highway. The Engineer and the Chief Counsel both recommended approval of the vacation proceedings. Following careful consideration of this matter the Commission approved the plan in principle and referred it back to the Engineer and the Chief Counsel for further handling. The Commission later in the session gave its consent in writing to the vacation of this property.

The Engineer reported a request from Morrison-Knudsen Company, Inc., contractors, that the "Charles Enegren" Ferry be operated 24 hours daily starting May 1, 1948, as an accommodation to the company in connection with contract work it is doing for the Weyerhaeuser Timber Company near Allegany, in Coos County. It appears that on May 1 the company will start working three shifts on its project, which will necessitate use of the ferry at all times of the day and night as long as the weather will permit the working of the three shifts. The Engineer pointed out that the Commission is now providing 20-hour service at a cost of $2,100 per month and advised that the extra service would cost an additional $420 per month. The Commission decided unanimously not to approve the additional service since, from the information available, there appears to be no necessity for it.

The Engineer also reported that the dolphins and fender piling on the Yaquina Bay Bridge were recently damaged by a concrete boat belonging to the Port of Newport which broke from its moorings and smashed into the fender piling, necessitating repairs which he estimated would cost about $7,500. He pointed out that the Gilpin Construction Company has about completed its contract with the Commission for certain repairs to this structure and gave as his thought that it would be advisable to arrange with this company to do the additional work rather than to advertise the project for bids, it being his belief that considerable expense would be saved thereby. He requested authority to negotiate an agreement with the Gilpin Construction Company to cover this additional work. The Commission approved the request unanimously with the understanding that the matter will be handled through the State Board of Control, if necessary, in order to legalize the transaction.

In this connection the question arose whether or not to press a claim for the damage against the Port of Newport inasmuch as the damage was caused by one of the boats owned by the Port. The Commission ordered that the Port of Newport be informed immediately that the Commission is holding the Port responsible for the damage.

The matter of replacing a pier on the Umpqua River Bridge south of Dillard which was undermined by the January freshet in this river was brought up for discussion by the Engineer. He explained that he originally intended to have this work done by one of the Highway Department Bridge Maintenance Crews, but two of the crews have quit and there are no longer enough properly skilled men available in the Department to do it. He recommended, in view of the circumstances, because of the fact that it is not practicable to contract the work, and because the job does not lend itself to unit-price or lump-sum contracting, that an agreement be negotiated with one of the reliable bridge contractors to do the work on a cost-plus-fixed-fee basis. He pointed out that there are two

contractors who have headquarters in that part of the state and who are now working fairly close to Roseburg -- Harry I. Hamilton and Tom Lillobo -- both of whom have done considerable work for the state and have been found very cooperative. He roughly estimated the cost of the job at $40,000. The Chief Counsel advised that the arrangement suggested by the Engineer is satisfactoy from the legal standpoint. Following discussion the Commission unanimously approved the recommendation.

The Engineer reported on the status of negotiations with the Western Union Telegraph Company for an agreement protecting the company's telegraph lines along the Oregon City-New Era widening project, on the Pacific Highway, in Clackamas County. He stated that the matter has been gone over very carefully with the officials of the company from San Francisco and with engineers of the Southern Pacific Company, which is involved, and the best arrangement that can be worked out with the Western Union Company would cost the state approximately $11,000 compared with the company's original demands which would have resulted in a cost of $32,000. As a result of these negotiations, he said, the company has agreed to a modification of its original demand and has now shortened the sections where they had first required their wires to be placed in conduits, and the contractor who submitted the low bid has agreed to furnish all of the conduit pipe and to place the conduits in the pipe. The state's obligation would consist of paying for labor and materials and further revision of the company's facilities. The major portion of the $11,000 expense, he said, is for moving the Western Union Company's lines over approximately a one-half mile section where the state is acquiring a portion of the Southern Pacific Company's abandoned right of way. This would amount to about $7,000, and the remaining charge of approximately $4,000 consists of labor costs of the Western Union Company for connecting the disconnected lines to the cable conduits to be installed by the contractor. He recommended approval of the arrangement which he thought would not require an additional allocation to the project, and he requested authority from the Commission to award the contract to the low bidder, Warren Northwest, Inc., when agreements with the Western Union Company and the Southern Pacific Company have been formally reduced to writing and the legal and engineering features approved. Following discussion the Commission approved the recommendation by unanimous vote on the condition that the cost of the project will not be increased over the amount that has been set up for it.

The Commission had under discussion the matter of allowing the State Game Commission to install a screen in front of one of the culverts under the new Columbia River Highway at Multnomah Falls which culvert will drain an artificial lake that will result from highway construction at this place. The Engineer explained that the State Game Commission proposes to stock this lake with a good species of fish, and, in order to keep it free of carp and other undesirable fish, has requested the privilege of maintaining a screen in front of the outlet culvert. He pointed out that at certain times of the year, particularly during freshets, the streams which supply the lake carry considerable leaves, brush, and other debris which would clog the screen and stop the flow of water through the culvert and cause the

water to back up and cover the Union Pacific Railroad tracks nearby. It was his thought, however, that it would be satisfactory to permit the screen to be maintained in front of the culvert at other times of the year. He recommended that the Game Commission be allowed to maintain this screen at the proposed point on the condition that Highway Department employees could remove it if necessary during the periods of freshet and on the further condition that the Game Commission will furnish the screens and maintain them. It was the thought of the Commission that it will be satisfactory to allow the Game Commission to maintain the screens as desired provided that can be done without jeopardy to the highway or to the railroad. Accordingly, the Commission approved the Engineer's recommendation on such basis.

The Commission considered, approved, and signed agreements, etc., as follows:

Quitclaim deed conveying unto the Town of Myrtle Creek portions of the abandoned right of way of the Pacific Highway in Myrtle Creek.

"Consent to Vacate" that portion of the Sunnyside Addition to Klamath Falls and Eldorado Heights Addition to Klamath Falls lying north of Van Ness Avenue and south of Eldorado Boulevard.

Easement agreement with the O. W. R. & N. Company and the Union Pacific Railroad Company covering easement for additional encroachments on the John Day River-Blalock Section of the Columbia River Highway, in Gillian County.

Agreement with the University of Oregon amending previous agreement dated December 18, 1941, regarding reconstruction of the Pacific Highway in front of the University grounds in Eugene.

Agreement with Babbidge & Holt, Inc. covering operation of the ferry "M. R. Chessman" during the unexpired portion of the company's contract, from April 15 to May 31, 1948.

Agreement with Joseph Holt covering straightening of damaged steel at the South Dillard Bridge over the Umpqua River, in Douglas County.

Agreement with Victor Phipps and wife and the Roseburg Lumber Company covering release of their rights to a timber cattle pass on the Pacific Highway at Mile Post 209.81 in Douglas County.

Agreement with Bessie E. Jenkins and son providing for relinquishment of their rights to a timber cattle pass located at Mile Post 288.85 on the Oregon Coast Highway, in Coos County.

Agreement with the Tillamook Drainage District and Tillamook County covering reconstruction of an untreated timber trestle bridge on the Oregon Coast Highway two miles south of Tillamook.

Agreement with J. H. Turner covering the grazing of sheep in Cape Sebastian State Park for the calendar year ending December 31, 1948.

Two rewritten bargain and sale deeds and one rewritten quitclaim deed conveying unto the City of Portland right of way previously acquired for the North Portland Shipyard and Swan Island Access Roads in the City of Portland.

Second Modification of a Cooperative Agreement with the Public Roads Administration covering construction and maintenance of the Columbia River Highway in the vicinity of Multnomah Falls, Multnomah County.

Lease agreement providing for lease of an oil storage site from Wallace R. Telford covering a parcel of land lying in Tract 24, Boring Junction, Clackamas County.

The meeting adjourned at 4:15 p.m. to reconvene at 9:00 a.m. on the following day.

T. H. Banfield
Chairman

State Highway Engineer

Ben R. Chandler
Commissioner

H. B. Glaisyer
Secretary

Portland, Oregon
April 20, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
M. H. Hawke, Chief Accountant
G. W. Neuner, Assistant Counsel
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformance with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

MT. HOOD HIGHWAY IN CLACKAMAS COUNTY

SANDY-RHODODENDRON ROCK PRODUCTION PROJECT

A. H. Saxton & Sons, Corvallis	$ 39,920.00
Vernie Jarl, Gresham	40,650.00
Homer G. Johnson, Portland	43,200.00
Peter Kiewit Sons' Co., Longview, Wn.	65,600.00

COLUMBIA RIVER HIGHWAY IN COLUMBIA COUNTY

RAINIER-GOBLE SECTION

	Using Asphalt	Using Tar
Leonard & Slate Oreg. Ltd., Portland	$ 673,458.00	$ - - - -
Kern & Kibbe, Portland	682,736.50	682,374.50
McNutt Bros., Eugene	725,805.50	- - - -

OREGON COAST HIGHWAY IN CURRY COUNTY

HUNTER CREEK-CALIFORNIA STATE LINE ROCK PRODUCTION PROJECT

Homer G. Johnson, Portland (1)	$ 64,408.00

(1) Reduction of $5000.00 if also awarded the Sandy-Rhododendron Project.

OREGON COAST HIGHWAY IN LINCOLN COUNTY

SALMON RIVER BRIDGE NEAR OTIS

Tom Lillebo, Reedsport	$ 95,537.00
Archie R. Averill, Portland (2)	97,035.00
Lindstrom Bros., Portland	97,990.00
J. P. Brittan & Co., Portland	102,104.00
Burgess Constr. Co., Astoria (1)	102,610.00
Birkenoier & Sarenal, Portland	111,380.00
VaDaro Constr. Co., Portland (1)	116,005.00

(1) Bidder will accept only one project

(2) Total projects awarded to be not over $100,000.00

April 20, 1948

OREGON COAST HIGHWAY IN LINCOLN COUNTY

PAINT YAQUINA BAY BRIDGE

H. P. Fisher & Sons, Seattle, Wn.	$ 20,000.00
Antonsen Painting Co., Tacoma, Wn.	21,000.00
J. S. Morris Co., Berkeley, Calif.	34,850.00
Hall & Wols, Portland	41,450.00

SALEM-SILVERTON FEDERAL AID SECONDARY HIGHWAY IN MARION COUNTY

LITTLE PUDDING RIVER BRIDGE

Geo. E. Berry, Beaverton	$ 14,925.00
Archie R. Averill, Portland (2)	16,570.00
Lindstrom Bros., Portland	18,738.00
Walder & Kenworthy, Portland (1)	18,930.00
Birkemeier & Saremal, Portland	20,160.00
VaDare Constr. Co., Portland (1)	21,870.00

(1) Bidder will accept award of only one project.
(2) Bidder will not accept award of projects totaling more than $100,000.00.

BRIDGE CONSTRUCTION OVER WILLAMETTE RIVER AT INDEPENDENCE, OREGON

MARION AND POLK COUNTIES

Macco Corporation, Clearwater, Calif.	$ 845,900.00
Guy F. Atkinson Co., Portland	912,940.00
Gilpin Constr. Co., Portland	961,508.33
Kuckenberg Constr. Co., Portland	1,149,900.00

OREGON COAST HIGHWAY IN TILLAMOOK COUNTY

BRIDGE CONSTRUCTION OVER THREE RIVERS AT HEBO

Tom Lillebo, Reedsport	$ 33,008.00
Burgess Constr. Co., Astoria (1)	33,939.00
Lindstrom Bros., Portland	34,740.00
Erick Enquist, Troutdale	35,701.00

J. F. LaRouche, Portland	215,380.90

Mr. I. N. Gray, Chairman of the School Board, District No. 8, Canyonville, appeared before the Commission regarding an exchange of property in Canyonville. He explained that the school district has to rebuild its facilities by fall in order to meet standardization regulations, but, according to their understanding, the Pacific Highway is to be relocated across the land that they own and on which they propose to build, so the school board has secured an option on an adjacent piece of property of approximate equal value which will serve their purposes and will acquire it at once if the Highway Commission will purchase their present property. The Engineer advised that the new location of the Pacific Highway would probably go through the present school property but that at this time the exact location had not been set and that the project and its location had not been approved, and construction is not on any existing program. Chairman Banfield advised that the Commission has had no previous knowledge of this matter and suggested that Mr. Gray discuss it with the Counsel and Assistant Engineer, with the thought of arriving at some conclusion later in the day. Later the Counsel advised that if the state does not purchase the property, the school district will go ahead and build the school on the property in the proposed right of way, but the school will buy and build on the other property if the state will buy their present property. The matter was reported on later in the day at which time the Commission unanimously decided not to purchase the school land, it being the thought of the Commission that it should not obligate future Commissions in the location or construction of the highway by the purchase of right of way at this time.

Mr. Bud Campbell, President of the Cannon Beach Commercial Club, appeared before the Commission regarding present and future construction on the Oregon Coast Highway between Cannon Beach junction and Cannon Beach. He stated that the people he represented are interested in getting the crooked

section of this highway west of the summit reconstructed. The two mile section now under contract, he stated, will greatly help the situation, but he requested the Commission to undertake the construction of the remaining portion at an early date and suggested the use of state funds to do the job with reimbursement later with Federal funds in 1949. Chairman Banfield advised that the present three-year construction program is now being completed except for Forest Highway Projects which are to be financed with Federal Forest Highway monies if and when Congress appropriates them, but if such funds do not become available then the Commission may have to advance state funds to pay for work in Eastern Oregon, so no allocation of funds can be made for the Cannon Beach work at the present time. He further stated that the Commission expects to make several inspection trips this summer and will look over this section on one of the proposed trips but cannot make any promise or commitment now.

Mr. Campbell also inquired if there was any feasible method of immediately replacing the yellow center line stripe after patching had been placed over it. He was advised that the highway department has three crews who do this type of work and it is standard practice for these crews to follow up the patching and oiling operations as rapidly as conditions permit.

Mr. Frank L. Calise, City Recorder, Vale, Oregon, appeared before the Commission and requested state aid in oiling Washington Street in Vale as an alternate state route for trucks. He read aloud and presented a letter outlining the heavy agricultural tonnage which is carried on this street. The city, he said, has entered into a contract for installation of concrete curbs which it is expected will be completed by May 1, 1948. He asked the Commission to place a bituminous macadam wearing surface on this street and suggested that the work be financed with State Tax Street Funds. Commissioner Schaupp inquired if this project could be done under the Bancroft Act. Mr. Calise replied that the city wanted to get the work done under the $250,000 allocation of funds to cities. The Engineer was instructed to investigate the matter and report back to the Commission.

A delegation consisting of Arthur Prag, Henry Seifert, Mrs. Mary G. Killam, Ken Gustin, Ronald Grout, F. J. Crowley, Hugo H. Paul, Ton Donneca, and F. J. Kernan, property owners adjacent to Union Avenue north of Columbia Boulevard in Portland, appeared before the Commission protesting the use of a concrete traffic separator island in the proposed plan for improving Union Avenue at this location. Mr. Arthur Prag, Attorney, who acted as spokesman, stated that if the proposed concrete strip is installed as the plans indicate, it will prevent access to and from private property on each side of the highway except by an extra one and one-half miles of traveling for people who wish to get to adjacent business establishments and to auto courts. He urged elimination of such barrier, as did also Mr. Seifert, who who further advised that the tenants of adjacent properties have spent hundreds of thousands of dollars in developing their holdings which will be lost entirely if the Commission carries through its plan as they understand it. Chairman Banfield advised that the Commission has not yet approved any

plans for the construction of this section but is waiting for reports from the Engineer and the Chief Counsel who are studying the situation. Until the reports are submitted, he said, the Commission will have nothing on which to base action. He pointed out that it is the duty of the Commission to see that traffic flows smoothly and safely along state highways, development of adjacent ground being considered of secondary importance. He stated further that it might be ten years before this work is done and that at present no funds have been allocated to the project, except that the Commission probably will acquire right of way for future use. The Engineer advised that several plans have been considered for this improvement and that he would be glad to discuss them with the group at any convenient time.

A delegation from Depoe Bay and Newport consisting of M. D. McDade, R. McDougall, Ole Erickson, and J. E. Schriver, representing the Depoe Bay Highway Lighting District, appeared before the Commission regarding the installation of a highway lighting project on the Oregon Coast Highway at Depoe Bay. Mr. McDade was spokesman. He advised that the people in Depoe Bay want the highway lighted, that a district has been created in conformity with the legal requirements, and that they are now requesting the approval of the district by the State Highway Commission. He said that their project consists of two sections -- one north of the bridge and the other, south of the bridge, but their problem is complicated because the state owns the area between the highway and the ocean north of the bridge. The district, he said, is going to install lights on the east side of the highway and is asking the Highway Commission to install them on the west side along the section north of the bridge in order to make the installation complete. The Engineer advised that the proposed lighting plan has been investigated and meets his approval. He estimated the cost to the state at $2,645 for the installation of lights in the park area north of the bridge. The district, he stated, is to install the other lights at district expense and has agreed to maintain the lights and to furnish energy to operate them. The Commission approved an expenditure of $2600. for this purpose and referred the matter back to the Engineer and Chief Counsel to work up details and to prepare a form of agreement with the district.

A delegation of residents of Cloverdale and Tillamook composed of the following people appeared before the Commission: Robert W. Leufquist, Fred Perrine, Wm. Frail, Jack Munstedt, J. C. Ross, Jack Aschim, and J. E. Savin. Mr. Leufquist acted as spokesman. He requested that the Oregon Coast Highway, US101, be rerouted southwesterly from Tillamook City, through Sand Lake and Woods, to an intersection with US101 just north of Nestucca Bay. He alleged that the proposed route would be eight miles shorter to Tillamook for residents of the Pacific City area and advocated such route as an added tourist attraction for this area. Others speaking in behalf of the proposed route were Messrs. Frail, Savin, and Aschim. Chairman Banfield advised that this is an entirely new project to this Commission which has given it no thought. He pointed out that the Commission is now starting the improvement of the present highway south of Tillamook, hence is in no position to consider a new project. The Engineer stated that the proposed route was thoroughly

studied several years ago and was disregarded due to the fact that it involved construction of the highway over a high summit. He pointed out that the present highway would have to be kept up, regardless of whether or not the proposed highway were built, because of the large number of residents living thereon. Chairman Banfield advised that the Commission is now obligated to improve the present highway and that the proposed one is so far in the future that the Commission would not like to encourage it, so no promise or commitment can be given now. This concluded the conference except that Mr. Leufquist stated that they would continue their efforts to secure this road and would file with the Commission a brief in behalf thereof, supported by a petition signed by the people of their district who want it.

Judge Nelson B. Higgs of Harney County, and Mr. A. A. Bardwell, of the Burns Chamber of Commerce, appeared before the Commission regarding improvements to the Rome-Princeton Secondary Highway. Judge Higgs urged the Commission to make provisions to complete this road by construction of the Harney County section, about 30 miles in length. He was informed by Chairman Banfield that the Commission is doing the best that it can with monies available and because of lack of funds cannot make any new commitments or promises now; however, the Commission expects to make several inspection trips this summer, during the progress of which it will inspect the road under discussion.

Judge Higgs then asked if it would be possible, through force account, to fix up the worst mud holes on the Burns-Frenchglen section of the Frenchglen Secondary Highway No. 440. The request was referred to the Engineer for investigation.

Mr. Wm. Baer, Bend, appeared before the Commission in behalf of the Bend Chamber of Commerce, and urged early construction of the Mill Creek Bridge on the Warm Springs Highway. He read aloud an editorial from the Bend Bulletin on this subject which cited that bids had been opened on this bridge three times and in each case rejected, and which alleged that the rejection of the bids was not due to their being more than ten percent over the Engineer's estimate, because other bridge jobs in the state had been contracted which were more in excess of the estimates than the Mill Creek Bridge. This allegation was denied by Chairman Banfield who stated that in every instance the bids for the Mill Creek Bridge had been more than ten percent above the Engineer's estimate, and who pointed out that the Commission did not have final authority in the award of the contract but had to secure the approval of the Public Roads Administration, which, because of Federal requirements could not approve it. The Commission, he said, plans to again call for bids for the Mill Creek Bridge in June 1948, and is expediting the completion of this highway as much as it possibly can.

Mr. Baer then requested the oiling of the shoulders on The Dalles-California Highway near Chemult, where, he said, conditions are bad and conducive to accidents. No action was taken by the Commission on such matter.

The Commission recessed for luncheon at 12:00 o'clock noon and reconvened at 2:00 p.m. with the same persons present.

The Deschutes County Court, including C. L. Allen, County Judge, and E. E. Varco and A. E. Stevens, County Commissioners, appeared before the Commission regarding the Courts' proposal, submitted at the previous meeting for an exchange of road projects in Deschutes County. Judge Allen acted as spokesman. He requested that the state construct a section of the Terrebonne-Smithrock-Pine Creek road easterly from Terrebonne to the Crook County line, a distance of approximately three and seven-tenths miles. He estimated the cost of this work at $30,000. In exchange for state work on this road, he stated, the county proposes to spend approximately $28,000 in the application of an 8-inch rock surface on a section of the Powell Butte Secondary Highway from the intersection of Federal Aid Secondary Highway No. 398 to a point approximately 2.1 miles north, the state to place an oil mat on top of the surface as constructed by the county. The Engineer advised that the total expenditure by the state on the county road and the oiling of the secondary highway would be approximately $36,000. He recommended that the work be done as outlined by the county and that funds for the project be taken from the unallocated portion of the special major betterment fund. Chairman Banfield stated that he wanted to be certain that the Bend airport road was not tied into this deal. Judge Allen replied that the airport road is not included and that it is a responsibility of the City of Bend. The delegation was advised that the Commission would like time to study the matter and that they would try to reach a decision this afternoon.

Later in the day the matter was again discussed and the Commission unanimously approved the Engineer's recommendation to do the work at an estimated cost of $36,000, on the condition that the county will spend $28,000 on the Powell Butte Secondary Highway.

Mr. Robert S. Miller, attorney, Portland, appeared before the Commission in behalf of the Brooks-Scanlon Lumber Company, Bend, regarding the operation of a private logging road crossing of the Santiam Highway at Milo Point 90.65 between Sisters and Suttle Lake. Mr. Miller contended that from a strictly legal point of view the company is not obligated to file an application with the Public Utilities Commissioner because the private log road was constructed prior to July 5, 1947, the effective date of Chapter 472, Oregon laws 1947, and that the application should be filed by the Highway Commission under the provisions of Section 8 of that Act. He also stated that the company had operated the crossing without a permit from either the Highway Commission or the P. U. C. from some time in June 1947, until November 11, 1947, and that they expect to resume operations sometime in June 1948. The Chief Counsel advised that the point of contention is whether the Highway Commission should request the issuance of a permit from the Public Utilities Commissioner or should the Brooks-Scanlon Company make the request. He gave as his opinion that the lumber company should make their appeal directly to the Public Utilities Commissioner, as he knew of no statute which expressly covers the matter so far as the Highway Commission is concerned. He stated further that if the Public Utilities Commissioner would not or could not act, then the Highway Commission would be obliged to stop the logging operation if it proved to be a hazard to the traveling public. The Engineer advised that he had suggested to the lumber company the installation of a traffic signal. After further discussion the Commission referred

the matter back to the Chief Counsel to iron out details. Mr. Miller was advised that his company would have to abide by the decision finally reached by the Commission's Chief Counsel.

A delegation from Springfield including the following persons appeared before the Commission regarding a proposed by-pass for McKenzie Highway traffic through Springfield: Claude Gerlach, Mayor; Fred O. Kenschot, J. M. Larson, and Paul Basford, City Councilmen; Frank Bouck, President, and Guy Wright, representing the Roads and Streets Committee, of the Springfield Chamber of Commerce; Fred Cheatham, City Engineer; and Howard Buford, Planning Consultant, of Eugene. Mr. Cheatham was spokesman for the group. He renewed their request, submitted at a previous meeting, for approval of a by-pass route for the McKenzie Highway using South "A" Street in Springfield. He urged the Commission to authorize an engineering study for such by-pass route, which is through a section where there has not been much building development to date, so the city can arrange its plans accordingly. Chairman Banfield recalled that this request had been made previously and had been denied due to the lack of engineering personnel to conduct the survey. The Engineer advised that the survey as requested would cost about $1500, that the traffic through the city is increasing rapidly, and that the present condition is bad. Mr. Cheatham then pointed out that the highway construction which is contemplated just east of the city should be tied in with the by-pass plans. The Commission took the matter under advisement and informed the group that it would try to have an answer for them in the afternoon.

Later in the day the subject was again discussed. The Engineer then recommended approval of the study which, he said, would be conducted when someone can be spared for the purpose, but not at any specific time. The Commission thereupon unanimously approved an expenditure of $1500 for a study of the proposed by-pass route.

The Coos County Court represented by L. D. Felshein, County Judge; Fred A. Kruse and F. C. True, County Commissioners; and F. A. Robb, County Road Engineer, appeared before the Commission concerning the substitution of a bridge project for an oiling project in the Federal Secondary Highway program and the construction of a bridge over the Coquille River at a place known as Bullards. Judge Felshein was spokesman. He presented a letter which was read aloud by the Secretary, requesting that funds heretofore allotted under the Federal Secondary Aid Program for oiling on the Coquille-Myrtle Point County Road be reallocated to the construction of a bridge across the Coquille River on this road in Myrtle Point. At Chairman Banfield's request the Secretary at this time read aloud a telegram, just received from residents in this vicinity, who object to such substitution of projects. Judge Felshein remarked that these people live on a section of the road where there is very little use for the bridge. It is the County Court's best judgment, he said, that the replacement of the narrow, one-way bridge be completed in advance of the oiling work. Chairman Banfield pointed out that the money with which the project is to be financed is

Federal money, so the requested change could not be made without first consulting the Public Roads Administration and securing its approval. He explained that the Public Roads Administration has approved the present oiling program and that the State Highway Commission does not have complete control over the allocation of Federal funds. The Engineer questioned that the $130,000 allotted for the oiling project would finance the bridge and stated that it would require approximately $500 for an engineering survey to determine this question. Further discussion followed during which Chairman Banfield advised that the Commission is not particular which of the two jobs is constructed, but before a decision is reached the Commission must have additional information. The Engineer was thereupon authorized and instructed to make a study of the situation and report his findings.

Judge Felshein then presented a letter, which was read aloud by the Secretary, in which the county requests state cooperation in the construction of a bridge over the Coquille River at Bullards to replace the present ferry at this place. He estimated the cost of the structure at $600,000 and asked the state to pay 50% of this expense. Judge Felshein advised that this bridge is on a county road and is the county's number two project; further, that it is badly needed because this district is developing rapidly and the county will have to furnish 24-hour ferry service soon. Chairman Banfield remarked that the Commission is being asked to do two things -- construct a bridge and at some future time designate a new highway. The Commission, he said, is reluctant to enter into an agreement of such nature that would obligate a future Highway Commission. He suggested the rewording of the Court's letter without any reference whatsoever to the later designation of the state highway. Judge Felshein agreed to do so. Following further discussion Chairman Banfield advised that the Commission will take the request under advisement and will try to give the court an answer in the near future.

The Commission discussed with the Engineer bids received at the morning session and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows, the action of the Commission with respect to each project being by unanimous vote:

"Sandy-Rhododendron Rock Production Project on the Mt. Hood Highway in Clackamas County. 13,700 cu. yds of crushed rock in stockpiles. A. H. Sexton and Sons, Corvallis, submitted the low bid for this job at $39,920. The second low bid was submitted by Vernie Jarl, Gresham, at $40,650. There were two higher bidders. The Commission has awarded this contract to the low bidder, A. H. Sexton and Sons.

"Rainier-Goble Section of the Columbia River Highway in Columbia County. 3.69 miles of grading and paving. Leonard & Slate Oreg., Ltd., Portland, submitted the low bid on this job, using asphalt, at $673,458. The second low bid was submitted by Korn and Kibbe, Portland, at $682,374.50, using tar. There were seven higher bids received. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when it has been approved by the Public Roads Administration.

"Hunter Creek-California State Line Rock Production Project on the Oregon Coast Highway in Curry County. The Commission received only one bid on this job, that being from Homer G. Johnson, Portland, at $64,408. The Commission has rejected this bid because of the qualifications made by the bidder.

"Construct bridge over Salmon River on the Oregon Coast Highway in Lincoln County. Tom Lillebo, Reedsport, submitted the low bid for this job at $95,537. The second low bid was submitted by Archie R. Averill, Portland, at $97,035. There were five higher bidders. The Commission has referred all of the bids to the Engineer with authority to award the contract to the low bidder when approved by the Public Roads Administratin.

"Paint all structural steel in two 350-ft. steel deck arch spans of the Yaquina Bay Bridge on the Oregon Coast Highway at Newport, in Lincoln County. H. P. Fisher and Sons, Seattle, Washington, submitted the low bid for this job at $20,000. The second low bid was submitted by the Antonsen Painting Company, Tacoma, Washington, at $21,000. Two higher bids were received. The Commission has awarded this job to the low bidder, H. P. Fisher and Sons.

"Widen Little Pudding River Bridge on the Salem-Silverton Federal Aid Secondary Highway in Marion County. George E. Berry, Beaverton, submitted the low bid on this job at $14,925. The second low bid was submitted by Archie R. Averill, Portland, at $16,570. Four higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder if approved by the Public Roads Administration.

"Construct bridge over the Willamette River at Independence. The low bid was submitted by Macco Corporation, Clearwater, California, at $845,900. The second low bid was submitted by Guy F. Atkinson Company, Portland, at $912,940. Two higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder when approval has been received from Marion and Polk Counties.

"Construct bridge over Three Rivers on the Oregon Coast Highway at Hebo in Tillamook County. Tom Lillebo, Reedsport, submitted the low bid for this job at $33,008. The second low bid was submitted by Burgess Construction Company, Astoria, at $33,939. Seven higher bids were received. The Commission has awarded this contract to the low bidder, Tom Lillebo.

"Install traffic signal system at three intersections on Main Street in the City of Pendleton, Umatilla County. W. R. Grasle Company, Portland, submitted the low bid for this job at $9,550. The second low bid was submitted by Vaughan's Electric Company, Pendleton, at $9,789. Four higher bids were received. The Commission has awarded this contract to the low bidder, W. R. Grasle Co.

"East Sheridan Section of the Salmon River Highway in Yamhill County. 0.54 mile of grading and paving. The low bid for this job was submitted by J. C. Compton Company, McMinnville, at $61,842.50. The second low and only other bid was submitted by the United Contracting Company, Portland, at $67,616.50. The Commission has awarded this contract to the low bidder, J. C. Compton Company.

"Furnishing ferry service at the Astoria-Megler Crossing of the Columbia River in Clatsop County. Babbidge and Holt, Inc., Portland submitted the low bid for this service at $147,205.20. The second low bid was submitted by C. J. Eldon, Portland, at $165,032.97. Four higher bids were received. The Commission has awarded this contract to the low bidder, Babbidge and Holt, Inc. "

A delegation from Parkrose consisting of Robert A. Freeman, H. H. Pearce, Lester Eaton, Harry Veit, and Mr. and Mrs. Bowerman, all of the Parkrose Chamber of Commerce; Erick Enquist, Mayor of Troutdale; Ernie Radeon, member, Lions Club, a Mr. Curry and a Mr. Moore, members, Kiwanis Club; and a Mr. Howell, member, American Legion, appeared before the Commission in the interests of the Columbia River Highway between Portland and Troutdale. Mr. Pearce headed the group. He asked the Commission to expedite completion of the present widening project on this highway east of 82nd Avenue so the work will be done before the next tourist season begins, and to extend the widening work to 122nd Avenue, pursuant to their previous request. The Engineer advised that the contractor on this job is making as rapid progress as is possible under prevailing weather conditions and that he anticipates the work will be completed some time this summer. He also advised that because of increases in construction costs, many of the contract jobs had to be reduced in size in order to stay within the amounts budgeted for them, and such was the case in this instance. Chairman Banfield advised that the Highway Commission feels that the work that is now under way in the Parkrose District is the only obligation that it has at this place. The Commission, he said, is doing the best that it can with monies available and considers that the Parkrose people are being given very fair treatment. He further explained that because of a lack of funds the Commission cannot very well build all of the four-lane highways that are requested, while so many sections of the state are badly in need of serviceable two-lane roads. He pointed out that the proposed Sullivan Gulch Highway between Portland and Troutdale is planned to be a four-lane highway when it is built, and because of that fact, the Commission is not in position to make this highway and the present one along Sandy Boulevard, which it closely parallels, four-lane highways. There followed a lengthy discussion of the subject, during which the following persons spoke in behalf of the improvement: Messrs. Pearce, Freeman, Mayor Enquist, Bowerman, Veit, Radeon, and Curry. Chairman Banfield concluded the discussion by stating that the Commission has only a certain amount of money at its disposal, that the Commission must be very careful to allocate this money to the several districts of the state on an equitable basis, and that there are many places in the state where highway improvements must be made before a four-lane highway is constructed between Portland and Troutdale; however, the Commission will give further thought to the matter when it considers the programming of future funds.

Mr. Freeman then brought up the subject of maintenance of the present highway, declaring that a poor job is being done by the maintenance crew. The Engineer was instructed to investigate the condition.

Mr. Curry urged the installation of an additional traffic signal at Sandy Boulevard and 102nd Avenue. The Commission took no action on the request.

The Commission again considered the matter of increasing the schedule of fares on the Astoria-Megler Ferry in order to avoid losses such as occur under the present rate schedule. Following careful consideration of this matter, motion was made by Commissioner Chandler that the rate for passenger cars and trucks, with drivers, be increased by an amount of 25 cents each, effective June 1, 1948, and that in other respects the present schedule of rates remain unchanged. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission. (A copy of the complete schedule of fares, as revised by this action follows)

Type of fare	Rate
Child passenger	$ .15
Adult passenger	.25
Advance sales - adults	.25
Passenger cars -with driver	1.25
Advance sales - car with driver	1.25
Passenger car with trailer and driver	
Up to 25'	1.50
Up to 35'	2.00
Up to 50'	2.50
Motorcycle - Single	.50
Sidecar	.75
Truck, light weight: with driver	
Under 20' special	1.25
Under 20'	1.75
Over 20' and under 30'	2.50
Over 30' and under 40'	3.00
Over 40' and under 50'	3.50
Over 50' and under 56'	4.25
Truck load - tons	.25
Livestock	.50
Package freight	--
Stages - with driver	2.25

The Engineer again reported on a request from the City of Warrenton for the improvement of State Secondary Highway No. 105 within the Warrenton city limits, first reported on the previous day, and again recommended approval of the project as outlined by him at that time. Details were explained for the benefit of Commissioner Schaupp. As a result of discussion, the Commission unanimously approved the project as recommended, on the condition that

needed right of way will be furnished by the county and city free of cost to the state. The work is to be done by contract in 1949 as a special major betterment project.

The Chief Counsel reported on a proposal by the Eugene City Council to change the zone classification of certain property in Eugene that will adversely affect the highway improvement that is planned for this place. He read aloud two letters concerning the subject and recommended adoption by the Commission of a state-wide policy covering such situations. He presented a form of resolution prepared in conformity with his understanding of the attitude of the Commission with respect to the subject. After careful consideration of the provisions thereof, the Commission approved the recommendation and by unanimous vote adopted the attached resolution marked EXHIBIT "C" which by this reference is made a part hereof with like effect as though extended in full herein. The Secretary was thereupon instructed to forward a copy of the resolution to the city council of each city and a copy to each county court. The Chief Counsel was instructed to send a copy to the City Council of Eugene for its information.

Pursuant to previous instructions from the Commission, the Engineer reported on the several requests made by the City of Canyonville for improvements along the Pacific Highway in this town, as follows:

Construct pavement full width between curbs through the main business district.

Request for permission to construct a sidewalk on highway right of way in the northern part of Canyonville.

Construction of a new connection for the Tiller-Trail Secondary Highway in Canyonville.

He advised that the pavement-widening work would cost about $2,000 and recommended approval of the expenditure as a minor betterment project. He also recommended approval of the city's request for permission to construct a sidewalk on the highway right of way in the northern part of town, provided it is built in the proper location and to approved standards, inasmuch as the city will pay the entire cost with city funds. Regarding changing the route of the Tiller-Trail Secondary Highway, he advised that this would involve construction of a new bridge across Canyon Creek, which is estimated to cost $30,000. Because of the scarcity of funds with which to finance such improvement, he recommended that the request be denied, however, that it be given consideration in formulation of the next construction program because it is a meritorious change. The Commission approved the recommendations by unanimous vote.

The Commission considered requests from the Coos County Court on the following matters: 1) That the Highway Commission take over the maintenance of two approach bridges on the Oregon Coast Highway between Coquille and Bandon, which bridges serve private property, 2) a resolution whereby Coos

County would take over and maintain certain abandoned portions of the Cape Arago Secondary Highway, 3) that the state sell to the county certain state-owned land in Bandon so that it can be used for commercial purposes, and 4) a proposal of the American Legion in Coquille to permit widening of Willard and Front Streets, which is the intersection of the Oregon Coast Highway with the Coos Bay-Roseburg Highway.

The Engineer advised that the bridges referred to by the court were built by the county in or about 1923 as a right of way consideration and since then have been maintained by the county but are now in a bad state of repair. He estimated the cost to put them in good condition at not less than $4,300. In return for the state taking over these bridges, he said, the county agrees to maintain an abandoned section of the Cape Arago Secondary Highway, being a section 1,100 feet in length which is now costing the state about $100 annually to maintain. The Chief Counsel advised that this is the only county in the state where such a condition is encountered; that the bridges are over a borrow pit on state highway right of way and in his opinion the request is merited. The Engineer suggested an agreement with the farmers whom the bridges serve. The Commission instructed the Engineer and the Counsel to work up details for such an agreement and report back to the Commission for further instructions.

The Engineer advised that no investigation had been made regarding the American Legion request for widening at the intersection of Willard and Front Streets in Coquille but that he would prepare a report for the Commission's consideration later.

Regarding the sale to the county of a tract of land in Bandon for resale purposes, the Engineer recommended that the property not be sold until the route of the Oregon Coast Highway is brought to its ultimate state of completion through this city. The Commission approved the Engineer's recommendation.

The Commission considered a request from the Klamath County Court that the state assume maintenance of the South Poe Valley County Road from Olene to a connection with the Malin-Poe Valley road now under construction, a distance of 9.73 miles. Action on this matter was deferred until the next meeting.

The Engineer presented an inquiry from C. G. Reiter, City Manager of Bend, whether or not the state will cooperate with the city in relocating a portion of the Powell Butte Secondary Highway around a proposed expansion of the Bend Municipal Airport. He recalled that permission for a temporary rerouting of a portion of the highway, 1,900 feet in length, was granted in 1942 as a war measure, whereas the rerouting now requested is approximately 1.25 miles in length. He stated that the proposed relocation is not in the interests of road users, that the travel distance would be increased by 1,000 feet, and that the change would increase curvature; however, he recommended approval of the request on the condition that the Civil Aeronautics Administration will reimburse the Highway Department for the full cost of a

survey, estimated at $600, and that the state be furnished a new road, without cost, comparable to the existing road. The Commission unanimously approved the Engineer's recommendation.

The Engineer requested instructions regarding the construction of the Shoeley Bridge-Sunset Camp project on Federal Aid Secondary Highway No. 12 in Columbia and Washington Counties. He advised that this is a Federal Aid County Road project consisting of surfacing and oiling, for which the sum of $119,000 was budgeted in the Postwar Program, although the current estimate of cost is $136,000, exclusive of two bridges on the Washington County end that are in bad condition, and must either be replaced or extensively repaired. He estimated the cost to replace these two structures at $45,000, which would make the total cost of the project $181,000. The Public Roads Administration, he said, will not approve the project unless provision is made for the repair and maintenance of the bridges, and the Washington County Court has advised that it will maintain the two bridges only when more county funds are available. He declared this is an unsatisfactory arrangement, as the bridges must be taken care of now; moreover, it is not acceptable to the Public Roads Administration. He suggested three solutions -- that Washington County definitely agree to take care of the bridges now; that the Commission increase the authorization for the project to $181,000; that the project either be deferred or the funds transferred to some other project. Following discussion the Commission unanimously deferred its decision until consideration is given to the formulation of the next construction program.

A petition was presented from residents of Lane County requesting the oiling of a 1.5 mile section of the Richardson-Eugene Secondary Highway approximately seven miles west of Eugene in order to alleviate the dust nuisance which obtains during dry weather. The Engineer advised that provision has been made in the present three year postwar program for the construction of the Oak Hill Railroad grade separation structure, and for the grading, surfacing and oiling of the Fisher Road-Oak Hill Section, and that when these projects are completed, the 1.42-mile section referred to will not be on the highway route and will revert to the county. The job is ready for contracting, he said, when a final decision has been reached with respect to the railroad company's participation in the cost of the grade separation project. He estimated the cost to oil the 1.5-mile section at not less then $15,000 and recommended that the request be denied. The Commission approved the recommendation unanimously.

In this connection the Engineer brought up for discussion a petition from the Elmira Union High School Parent-Teachers Association for the straightening of curves on the Badger Mountain section of the Richardson-Eugene Secondary Highway. They allege that the highway in its present condition is unsafe and a hazard to school children who travel it twice daily in their school bus.

The Engineer advised that investigation reveals the allegations to be well founded and that the narrow curves can be widened at an estimated cost of $4500. He recommended the expenditure. He also advised that a delegation had appeared in his office requesting additional rock surfacing on this highway

between Richardson and Globe. An investigation, he said, reveals that this section also needs improvement and should be stabilized by shaping the roadway and by adding surfacing rock, which would cost about $9,000. He recommended approval of this work as a minor betterment fund contingency project, which would make a total expenditure of about $13,500 on this highway. The Commission approved both projects by unanimous vote.

The Commission considered the adoption of a system of controlled access highways, otherwise known as "throughways". The Engineer presented a map showing the highways that, in his opinion, should be so designated, and advised that a physical examination has been made of only about 60% of the total mileage involved. The Chief Counsel explained legal features. After discussion the Commission decided to defer the adoption of a "controlled access" or "throughway" highway system until the physical examination of the entire highway system is completed.

The Commission also discussed the adoption of a general policy with respect to the acquisition of "right of access" to state highways, as a guide in connection with right of way purchases. The Commission by unanimous vote approved and adopted the attached resolution with regard thereto, marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from Clyde H. Williams, Secretary-Treasurer of the Klamath Falls Suburban Rural Fire Protection District requesting financial aid from the State Highway Department in the operation of a fire protection district in suburban Klamath Falls. The Engineer advised that the Highway Department shop property at Klamath Falls lies within the fire protection district boundaries but is now well protected with fire fighting facilities so the added protection is not needed. He recommended that the request be denied. The Commission approved the recommendation unanimously.

The Commission discussed and approved an agreement with Columbia County providing for the abandonment of old portions of the Columbia River Highway between Rainier and Goble when the highway has been reconstructed between these points, bids for which work were received earlier in the session. The agreement was thereupon signed by the Commission.

The Commission had under discussion the abandonment as a state highway of the old route of the Pacific Highway between Azalea and the Douglas - Josephine County line where the highway has been rebuilt on other alignment. The Engineer advised that the old route no longer is of value for state highway purposes and recommended that it be abandoned as such and allowed to revert to Douglas County, as a county road, pursuant to agreement heretofore executed by the County Court and the Commission. He pointed out that Douglas County intends to allow the southerly section between the county line and Glendale Junction to revert to the abutting property owners, because of some bridges that the county does not want to maintain, and when that is accomplished Federal Aid Secondary Highway No. 245 will have no southern terminus, whereas the Federal Government requires that all Federal Aid Secondary Highways must have a connection with either a State Primary or Secondary Highway, a Federal Aid Highway or a Federal Aid Secondary Highway. In order to satisfy this requirement, he

recommended the extension of the present Federal Secondary Highway No. 245 to a county road junction in Glendale, a distance of about two miles, which extension, he said, has been approved by the county court. The Chief Counsel advised that the changes recommended by the Engineer are in order so far as legal features are involved. With this assurance the Commission approved both recommendations and thereupon by unanimous vote adopted the attached resolution relating thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Consideration was given by the Commission to the Engineer's report on a request from the county court of Wasco County for the establishment of a reduced speed zone along the Columbia River Highway westerly from The Dalles city limits to Chenowith Creek, a distance of about two miles, as presented on the previous day. The Engineer again recommended adoption of a 45-miles-per hour speed limit for this section. The Commission approved the recommendation and by unanimous vote adopted the attached resolution, marked EXHIBIT "L" relating thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission also discussed the Engineer's report, submitted on the previous day, on a request from the Cascade Plywood Company, Lebanon, for the designation of a reduced speed limit on the Santiam Highway from the south (east) city limits of Lebanon to a point about one mile south thereof, past the Company's plywood plant. Following discussion, the Commission approved the Engineer's recommendation that a 35-miles-per-hour speed zone be established at this place. The attached resolution marked EXHIBIT "M", relative thereto, was adopted by the Commission by unanimous vote and by this reference is made a part hereof with like effect as though extended in full herein.

Mark D. McCallister, right of way buyer, was present and explained details in connection with options secured from Verna D. Barnes for acquisition of right of way needed at the east end of the Broadway Bridge, Portland, for the Front Avenue project at that place, and from Margaret F. Spencer for acquisition of right of way needed at the east end of the Steel Bridge, Portland, for the same project. As a result of Mr. McCallister's presentation the Commission unanimously approved the purchase of the Barnes property (Item No. 11014) for the sum of $41,500 and the purchase of the Spencer property (Item No. 10861) for the sum of $105,000.

The Commission discussed a date for its next regular meeting and decided to hold such meeting in Portland on Monday and Tuesday, May 24 and 25, 1948. The Secretary was instructed to make the usual arrangements to hold the meeting in the Imperial Hotel.

There being no further business to come before the Commission at this time the meeting adjourned at 5:30 p.m.

EXHIBIT "A"

Minutes of April 19 and 20, 1948

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of April 19 and 20, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Darleen Stevens, which property is located in the northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 35, Township 7 North, Range 2 West, W.M., Columbia County, Oregon, and is more particularly described on the attached sheets and designated as parcel No. 1, and is further identified in the records of the Highway Commission as file R 10851, which property is being acquired for right of way purposes in connection with the Columbia River Highway.*

APP · APR 19 1948

(Cont.)

EXHIBIT "B-1" (Cont.)

Real property owned by F. C. Marshall and Addie M. Marshall, which property is located in the north half ($N\frac{1}{2}$) of the north half ($N\frac{1}{2}$) of the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 35, Township 7 North, Range 2 West, W.M., Columbia County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 10848, which property is being acquired for right of way purposes in connection with the Columbia River Highway.*

Real property owned by John B. Smith and Ruth E. Smith, which property is located in Lot 1, Block 3, Knight's Addition to the Town of Joseph, situated in Section 32, Township 2 South, Range 45 East, W.M., Wallowa County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 14417, which property is being acquired for right of way purposes in connection with the Joseph-Wallowa Lake Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there by any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the nineteenth day of April, 1948.

FOOTNOTE:

* The names of the property owners and the detailed descriptionsof the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 103, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

APR 19 1948

EXHIBIT "B-2"

Minutes of April 19 and 20, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Vernonia-Sunset Camp Road in Washington County, State of Oregon, is a county road which has been designated and classified as a federal aid secondary highway and as such is qualified for improvement with state, federal, and county funds; and

WHEREAS, it is the purpose and plan to reconstruct and improve said highway pursuant to a cooperative agreement or arrangement between the United States Government, the State of Oregon, and Washington County; and

WHEREAS, the real property hereinafter described is necessary for right of way purposes in connection with the contemplated and proposed reconstruction and improvement of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described, which property is owned by the estate

EXHIBIT "B-2" (Cont.)

of L. H. Bjornson, is necessary for the reconstruction and improvement of the Vernonia-Sunset Camp Road in Washington County, State of Oregon, to-wit:

A parcel of land lying in the northeast quarter (NE¼) of Section 10, Township 3 North, Range 5 West, W.M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to L. H. Bjornson recorded in Book 275, Page 627, of Washington County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 120 feet in width, 60 feet on each side of the center line of the Vernonia-Sunset Camp Road as said road has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 489+93.8 to Station 491+59.8, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 489+93.8, at which point the said center line intersects the northerly extension of the easterly line of said property; said point being 1525.8 feet south and 1612.5 feet west of the northeast corner of Section 10, Township 3 North, Range 5 West, W.M.; thence on a 1,911.11 foot radius curve right (the long chord of which bears South 78° 16' West 165.47 feet) a distance of 166 feet to the extended westerly line of said property at Station 491+59.8.

The parcel of land to which this description applies contains 0.18 acre, of which 0.065 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 0.115 acre lies outside of the existing right of way.

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a

(Cont.)

EXHIBIT "B-2" (Cont.)

final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the nineteenth day of April, 1948.

APR 19 1948

11971

EXHIBIT "B-3"

Minutes of April 19 and 20, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for right of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Highway Commission is authorized by law, when acquiring real property for right of way purposes, to acquire fee title to the real property sought to be acquired, or any interest therein, and the Commission is also authorized, when acquiring real property for such purpose, to acquire all right of access from the abutting property to the highway proposed to be constructed; and

WHEREAS, the State is now engaged in the reconstruction of a highway known as the Pacific Highway, on which highway the Commission has heretofore, by resolution duly and regularly adopted and made a part of its official records, authorized the acquisition of all right of access from abutting lands to said highway and the right of way thereof; and

WHEREAS, the Commission has heretofore acquired from Southern Pacific Company a parcel of land abutting upon Lot 1, Block 3, Fairmount Addition to the City of Eugene, in Lane County, Oregon; and

WHEREAS, the property acquired from Southern Pacific Company was, prior to its acquisition by the Commission, owned by the Southern Pacific Company and used by it as and for a right of way for a common carrier railroad; and

WHEREAS, the Commission is of the opinion that the owners of Lot 1, Block 3, Fairmount Addition to the City of Eugene, have no right of ingress or egress to or from the property abutting said lot to the north and formerly used

EXHIBIT "B-3" (Cont.)

as railroad right of way, but that the owners of said property appear to claim and purport to claim some right of ingress and egress to and from said property and have refused to waive and relinquish such right or rights as they may have or claim to have; and

WHEREAS, Waldemar Christensen and Dorothy K. Christensen are the owners of said Lot 1, Block 3, Fairmount Addition to the City of Eugene; and

WHEREAS, it is the judgment of the Commission that the rights, if any, of said parties to access to and from the property heretofore acquired from Southern Pacific Company and abutting their property to the north and upon which the Commission proposes to construct a modern highway facility to adequately serve the transportation needs upon the Pacific Highway should be acquired;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, a majority of the members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that all right of access to the Pacific Highway from the real property abutting said highway and described as Lot 1, Block 3, Fairmount Addition to the City of Eugene, if in fact any such right of access exists, should be acquired and all access to and from the said property and the Pacific Highway should be prohibited.

2. That if a relinquishment and waiver of the right of access, if in fact any such right exists, cannot be acquired by agreement, then J. M. Devers as Chief Counsel for the Commission, is authorized to institute and prosecute to final determination such action or proceeding as may be necessary to acquire and vest in the public the said access rights, or claimed access rights.

3. That, in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said access rights, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said access rights as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

4. That this resolution be entered in full in the minutes and records of this Commission as of the nineteenth day of April, 1948.

EXHIBIT "C"

Minutes of April 19 and 20, 1948

RESOLUTION DECLARING POLICY OF THE STATE HIGHWAY COMMISSION WITH RESPECT TO HIGHWAYS THROUGH INCORPORATED CITIES

WHEREAS, the legislature by the enactment of Section 100-122, O.C.L.A. said: "The commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this state, to select and designate the street or streets of such incorporated city or town over which the said state highway shall be routed* * *"; and

WHEREAS, by the enactment of Section 100-124, O.C.L.A., the Oregon legislature has said: "Complete jurisdiction and control of streets taken over by the highway commission as provided in this act shall be vested in the highway commission and shall extend from curb to curb, or, if there be no regular established curb, then such control shall extend over such portion of the right of way as may be utilized by the highway commission for highway purposes. Responsibility for and jurisdiction over all other portions of such street or road shall remain in the city or town"; and

WHEREAS, the Commission is by law authorized to acquire, in addition to fee title to the real property over which a street or highway is constructed, all right of access from abutting property to the highway to be constructed, relocated, or widened; and

WHEREAS, the Oregon legislature in recognition of the problems and responsibilities which arise in connection with the construction, maintenance, and operation of public highways, whether they be state highways, county roads, or city streets, said: "The kind, character and volume of traffic now moving over public highways, the speed at which such traffic moves, the prime and essential factors such as speed, safety and convenience to which transportation of persons and property over public highways is entitled, the relation which such transportation bears to the transportation systems of other states and of the nation as a whole, and the ever-increasing toll of injury to and death of persons, and the destruction of and damage to property caused by and resulting from accidents on public highways constitute and are conditions and elements which demand of highway officials a program of highway designing, highway regulations, highway use and operation, highway controls and highway safeguards which will make possible and will insure a degree of safety and convenience and a type and class of service not possible under existing law"; and

WHEREAS, the citizenry of the State of Oregon, speaking through the legislative assembly, made this solemn pronouncement: "To the end that human lives may be saved, property damage minimized, transportation by motor vehicle promoted, and highway travel in general safeguarded, the legislature hereby does find, determine and declare that this act is necessary for the preservation of public safety, the improvement and development of transportation facilities

(Cont.)

APR 19 1948

EXHIBIT "C" (Cont.)

in the state, the protection of highway traffic from the hazards of unrestricted and unregulated entry from adjacent property, the elimination of hazards due to highway grade intersections and in general the promotion of public welfare"; and

WHEREAS, highway authorities throughout the nation have by experience found that the capacity of a highway to accommodate large volumes of traffic depends not only on the width of highway surface, the number of traffic lanes, and the use of traffic control signals, but depends with equal significance on the extent to which a thoroughfare is opened and subjected to access from such thoroughfare to abutting properties and intersecting streets, and on the extent to which access from abutting properties and intersecting streets to such thoroughfare is allowed by constituted authority; and

WHEREAS, the use by the Highway Commission of funds made available to the State of Oregon by the Federal Government is conditioned in a large measure on approval by the Public Roads Administration of the type and design of highway, for the construction of which such Federal funds are to be used and allocated, and in this connection the Public Roads Administration when considering the plan and design of a highway gives due and searching consideration to the capacity of such highway, including the factors of safety which will attend and surround the highway when thrown open to traffic; and

WHEREAS, it is deemed by the Highway Commission appropriate and advisable that the policy of the State, in so far as such policy may be defined and expressed by the Commission, be fixed, determined, and made a matter of public record;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That this Commission does hereby recognize and confirm the principles announced by the legislature in the enactment of said throughway law.

2. The Commission does hereby discourage and denounce the interruption of the orderly movement of traffic, the unnecessary hazards which are created by the establishment of points of access from abutting lands to main arteries, and corresponding points of access from major traffic arteries to abutting property, and the impairment of the capacity of a highway which results from unrestrained and promiscuous access from abutting property to highway and from highway to abutting property.

3. Fully recognizing the extent to which main thoroughfares are impaired, the capacity of the highway diminished, unnecessary traffic hazards introduced and other destructive factors and agencies imposed on the general public by the introduction of uncontrolled and imperfectly regulated access

14878

EXHIBIT "C" (Cont.)

points, the establishment of commercial zones, together with other practices which serve primarily local and individual interests, the Commission does hereby find and declare that public welfare warrants and demands complete, wholesome, and constructive cooperation between the State, represented by its Highway Commission, and the cities of the State, represented by their municipal authorities, "to the end that human lives may be saved, property damage minimized, transportation by motor vehicle promoted, and highway travel in general safeguarded".

4. That this pronouncement and declaration of policy be given wide publicity, and State-wide cooperation is requested to the end that the best interests of the State may be served, the road users' money wisely invested, and the common good of all made the objective of highway officers -- State County, and City.

5. That this resolution be entered in the minutes and records of the Highway Commission as of the 20th day of April, 1948, and the Secretary instructed to prepare a sufficient number of copies of the same so that a correct copy may be made available to the Public Roads Administration and to the mayor of each city of the State, to the several county courts, to the Superintendent of State Police, to the Public Utilities Commissioner, and to other public officials.

Minutes of April 19 and 20, 1948

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Athena	$3,224.17
Fairview	1,304.21
Lafayette	2,394.61
Lonerock	196.70
Powers	3,258.38
Rockaway	4,070.83

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Athena - Lincoln Street, Washington Street, College Street, High Street, Adams Street, Jefferson Street, Currant Street, Darwin Street, Grandview Avenue, Hunt Avenue, 2nd Street, 3rd Street, 4th Street, 5th Street, 6th Street

Fairview - All city streets (maintenance)

Lafayette - All city streets

Lonerock - 3rd Street, 4th Street, 5th Street, "B" Street, "D" Street

Powers - Hemlock Street, Poplar Street, Spruce Street, 2nd Avenue, 3rd Avenue, Date Street, Cedar Street, Avenue "F", Birch Street, Alder Street, Avenue "H", Avenue "A", Avenue "B", Avenue "C", Avenue "D". Avenue "E", Avenue "G"

(Cont.)

EXHIBIT "D", (Cont.)

Rockaway - Ocean Boulevard, Owen Avenue, Nehalem Avenue, Park Street, Myrtle Avenue

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission shall be, and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the th day of April, 1948.

APR 19 1948

EXHIBIT "F"

Minutes of April 19 and 20, 1948

R E S O L U T I O N

WHEREAS, the Commission heretofore with the approval of the Public Roads Administration, selected for designation as a Federal Secondary Highway a county road in Douglas County, which had for one of its termini a point near Glendale, and the other termini a junction point with the Pacific Highway; and

WHEREAS, the Highway Commission found it necessary and advisable to relocate the section of the Pacific Highway in Douglas County beginning at a point near Azalea and terminating at a point near Glendale Junction; and

WHEREAS, by reason of the relocation of said section of the Pacific Highway, all connection between Federal Aid Secondary Highway No. 245 was destroyed; and

WHEREAS, it is a rule and a requirement of the Public Roads Administration that all Federal Aid Secondary Highways must have connection with either a State Secondary Highway, a State Primary Highway, a Federal Aid Highway, or a Federal Aid Secondary Highway; and

WHEREAS, by reason of the relocation of the Pacific Highway between said two points, there will be eliminated as a part of said highway the section of the old route which begins at a point at or near Azalea and terminates at a point south of the Azalea Junction; and

WHEREAS, by agreement heretofore entered into between the County Court of Douglas County and the State Highway Commission, it is provided that the County Court shall and will take over the abandoned section of the Pacific Highway Route and maintain the same as a county road; and

WHEREAS, the section of the old route of the Pacific Highway which begins at or near the Glendale Junction and extends southerly for a distance of approximately one half mile, involves a bridge across Cow Creek, and it is the purpose and plan of the County Court and the Highway Commission to abandon entirely as a highway said section or part of the old route of the Pacific Highway for the reason that the maintenance of the same for public purposes will not longer be necessary; and

WHEREAS, it is the purpose of these parties to extend said Federal Aid Secondary Highway No. 245 from its junction with the old route of the Pacific Highway at or near Glendale Junction to a connection with the new location of the Pacific Highway at or near Azalea.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, all members being present and affirmatively voting as follows:

APR 19 1948

(Cont.)

14884

EXHIBIT "F" (Cont.)

1. That the following section of the old route of the Pacific Highway hereby is eliminated and shall no longer be a part of the route or right of way of said Pacific Highway; said section being described as follows:

Beginning at the Douglas-Josephine County line at Highway Engineer's Station 33+22, thence northerly to a junction with the Glendale Federal Aid Secondary Highway No. 245, a distance of 1.84 miles; thence northeasterly via the former route of the Pacific Highway to a junction with the relocated Pacific Highway northerly from Azalea, at Highway Engineer's Station 12+50, being a distance of 7.38 miles, or a total distance of 9.22 miles.

2. That the route of the Pacific Highway between a point at or near Azalea and a point at or near Glendale Junction, shall be and the same hereby is described as follows:

Beginning at the Douglas-Josephine County line at Highway Engineer's Station 474+45.4; thence northerly and northeasterly to a junction with the old route of the Pacific Highway northeasterly of Azalea, at Highway Engineer's Station 585+70, being a distance of 7.86 miles.

3. That a road generally described as following the following route, to-wit: Beginning at a point on Federal Aid Highway, Route No. 3, which point is approximately eleven miles northeast of Glendale; thence southwesterly following the old route of the Pacific Highway to a county road intersection in Glendale, the total length of which is 11.25 miles shall be and the same hereby is designated as Federal Aid Secondary Highway No. 245.

4. That a copy of this resolution be presented to the Public Roads Administration, and that said Administration be requested to approve said route or road as a Federal Aid Secondary Highway.

5. That there is attached hereto and by this reference made a part hereof, a map on which is shown the old or abandoned route of the Pacific Highway between a point at or near Azalea or Glendale Junction, and there is shown, also, the existing and proposed extension of said Federal Aid Secondary Highway No. 245, and there is likewise shown the relocated line of the Pacific Highway. (*)

6. That this resolution be entered in the minutes and records of the Commission as of the twentieth day of April, 1948.

FOOTNOTE:

(*)The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 183, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

APR 20 1948

EXHIBIT "G"

Minutes of April 19 and 20, 1948

R E S O L U T I O N

WHEREAS, the Oregon Coast Highway, otherwise designated as U. S. Highway 101 as routed through the town of Cloverdale, Tillamook County, passes in front of the U. S. Post Office and,

WHEREAS, it has been reported to the Highway Commission by Clifford O. Dougherty, Postmaster, Cloverdale, Oregon, that the parking of motor vehicles in front of said Post Office seriously interferes with the movement of U. S. Mails and the Commission has therefore been requested to designate and establish the highway frontage in front of said Post Office as a "No Parking" area; and,

WHEREAS, it is the judgment of the Commission that every reasonable and legitimate action should be taken having for its object the speeding of the movement of U. S. Mails, and

WHEREAS, it appears that Cloverdale is an unincorporated town,

NOW, THEREFORE, be it and it hereby is resolved by the Commission, a majority of the members being present and voting affirmatively as follows:

1. That the highway area in front of the Post Office at Cloverdale, Oregon, particularly between Highway Engineer's Stations 551+07 and 551+37, as set forth on the Highway Commission Drawing attached hereto and by this reference made a part hereof, be and the same hereby is declared to be a "No Parking" area and the parking of motor vehicles within said area is prohibited provided that this prohibition shall not apply to motor vehicles operated by the United States or its contractors and engaged in the carrying of U.S.Mails.*

2. That the engineer hereby is instructed to erect and thereafter maintain in said area "No Parking" signs. He is further instructed to paint, in a conventional manner and color, the curb lines within the limits of the "No Parking" area.

3. That this resolution be entered in the minutes and records of the Commission as of the 19th day of April, 1948, and correct copies thereof mailed to the Superintendent of State Police and to Clifford O. Dougherty, Postmaster, Cloverdale, Oregon.

FOOTNOTE:

The drawing mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 27, under the heading "No Parking Resolutions" and said drawing by this reference is made a part of this minute entry to the same extent as if copied in full herein.

APR 20 1948

14856

EXHIBIT "H"

Minutes of April 19 and 20, 1948

RESOLUTION

WHEREAS, the Pacific Highway East is one of the major state highways and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that a short distance outside the corporate limits of the City of Woodburn there is maintained an auction mart on real property abutting on said highway, which establishment on certain days of the week is patronized by a large number of people, many of whom park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Commission a hazard not only to through traffic but to the owners and occupants of the parked cars is created; and

WHEREAS, in the opinion of the Commission public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations by members of its staff, that the parking of motor vehicles along the Pacific Highway East between Mile Post 34.95 (Engineer's Station 767+50) and Mile Post 35.213 (Engineer's Station 753+50) south of the City of Woodburn, in Marion County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked cars.

2. That in the opinion of the Commission the right of way of said highway at said location is not of sufficient width to permit parking

APR 20 1948

(Cont.)

EXHIBIT "H" (Cont.)

facilities for large numbers of cars and at the same time provide the degree of safety and convenience which in the opinion of the Commission should be provided the motoring public.

3. That the parking of motor vehicles on the right of way of said highway within said termini be and the same hereby is prohibited.

4. That the Engineer be and he hereby is instructed to erect at the said termini, and at such points between such termini as in the judgment of the Engineer are necessary to accomplish the purpose of this resolution and the action of the Commission as here declared, "No parking on highway shoulders" signs.

5. That a copy of this resolution be sent to the owners and operators of the said auction mart, and that a like copy be mailed to the Superintendent of State Police.

6. That this resolution be entered in the minutes and records of the Commission as of the nineteenth day of April, 1948.

APR 20 1948

EXHIBIT "I"

Minutes of April 19 and 20, 1948

ORDER REDUCING MAXIMUM LOAD LIMITS ON CERTAIN STATE HIGHWAYS

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

LITTLE BUTTE STATE SECONDARY HIGHWAY NO. 270

ROGUE RIVER LOOP STATE SECONDARY HIGHWAY NO. 260

AND WHEREAS, the above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways during the spring months when the frost is leaving the ground, and in order to protect said highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced during such period;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon said roads during the spring months shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said roads were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways that the maximum total weight of load and vehicle which shall be permitted upon said road during the spring period commencing March 25, 1948, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the entire length of each of the following highways, to-wit:

LITTLE BUTTE STATE SECONDARY HIGHWAY No. 270

ROGUE RIVER LOOP STATE SECONDARY HIGHWAY No. 260

APR 19 1948

(Cont.)

EXHIBIT "I" (Cont.)

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highways at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the said highways at contact with the tread of the wheels of any one axle of a vehicle exceed fifty (50) percent of the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O.C.L.A., shall be in full force and effect from the 25th day of March, 1948, until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highways and at important crossroads on said highways, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Jackson County and a like copy to the county clerk of Josephine County and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this nineteenth day of April, 1948.

EXHIBIT "J"

Minutes of April 19 and 20, 1948

RESOLUTION LIFTING REDUCED LOAD LIMIT

on the

McKENZIE HIGHWAY NO. 15

WHEREAS, on the 12th day of March, 1948, at a meeting of the Oregon State Highway Commission, all members being present and participating, the said Commission passed and adopted a resolution reducing the maximum load limit on certain state highways, including the following highway, to-wit:

McKENZIE HIGHWAY NO. 15 from Mile Post 34.5 (Forest Boundary) to Mile Post 55.0 (Junction with Belknap Springs Road);

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

McKENZIE HIGHWAY NO. 15 from Mile Post 34.5 (Forest Boundary) to Mile Post 55.0 (Junction with Belknap Springs Road);

be and the same hereby is rescinded and cancelled as of the 16th day of March, 1948, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerk of Lane County, in which county said section of said highway is located, and the Superintendent of the Department of State Police for his information,

Dated this nineteenth day of April, 1948.

APR 19 1948

EXHIBIT "K"

Minutes of April 19 and 20, 1948

RESOLUTION

WHEREAS, the transportation of persons and property over public highways by private and for-hire motor vehicles has developed to a point where such means of transportation has become an integral and essential part of the transportation systems and agencies of the State and of the Nation;and

WHEREAS, the volume and type of motor vehicles now using the public highways of the State and the Nation have become such that highway standards and highway designs of yesterday are inadequate with respect to factors of safety, time element, weight of load, dimensions of vehicle, and all other factors entering into the problem of transportation over public highways;and

WHEREAS, highway construction, maintenance, and improvement are now and have been for some time financed in large measure by taxes and other charg imposed upon and paid by the road user, and, therefore, the convenience, safety, and economy of time and cost of operation are of prime significance to the road user; and

WHEREAS, highways which in design possess a minimum curvature, easy grade, two or more same-direction lanes, freedom from access or intersecting roads, streets, or lanes, and into,to, or from which abutting property owners have no, or at least a limited, right of access, constitute and are thoroughfares which, in the opinion of the Commission, afford and offer to the highway user economy of time and cost and safety of operation, to public officials charged with upkeep economy of maintenance costs, and for all interested parties a reduction in the toll of life and health and a reduction in property damage; and

WHEREAS, the state highways heretofore located and constructed, while adequate at that time to meet the needs and requirements of the type and volume of traffic then using the public highways, are now inadequate and in some instances unsafe for the type, volume, and character of traffic now imposed upon public highways; and

WHEREAS, it is deemed by the Commission advisable and for the public welfare that certain policies be defined and declared by the Commission to serve as patterns and guides in connection with future highway location and construction as applied to major highways; and

WHEREAS, the Commission heretofore, to-wit: On the thirtieth day of October, 1945, adopted a resolution intended to declare and establish the Commission's policy with respect to the acquisition of access from abutting property to a state highway, and from such state highway to the abutting property, but in said resolution the Commission confined the application of

EXHIBIT "K" (Cont.)

the policy then declared to certain specific highways, and

WHEREAS, it is now deemed advisable by the Commission that said policy should be general and should apply to all primary state highways, and, therefore, it is the purpose of the Commission to renew its declaration of policy as stated in said resolution, and to make said policy apply to all primary state highways;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That hereafter, unless otherwise expressly ordered by the Commission, whenever any segment, section, or major part of any primary state highway is relocated or the alignment of the same is changed, thereby necessitating the acquisition of new or additional right of way, there shall be acquired at the same time, in addition to the real property fee title to which is being acquired for right of way purposes, all right of access from the owner of land abutting upon said right of way and the highway to be constructed thereover and all right of access from said highway to the real property abutting thereon except at such points, in such manner, and for such purpose as may be agreed upon by the Commission and the abutting owner, or as may in the absence of agreement be designated by the Highway Commission.

2. That when it becomes necessary to acquire any real property for the realignment of any of the primary state highways, or any segment, section or major part of any of said highways by the power of eminent domain, the resolution authorizing such proceeding shall contain necessary findings and declarations with respect to the acquisition of all rights of access within the meaning of this resolution.

3. That the Engineer be and he hereby is instructed, when preparing and writing descriptions for the acquisition of real property for rights of way for highway construction as contemplated in this resolution, to provide for and include therein a call for a waiver of all right of access as provided herein, and the Chief Counsel hereby is instructed to conform with the purpose and provisions of this resolution when acquiring real property for the purposes covered by this resolution, whether such real property and right of access be acquired by agreement or by the exercise of the power of eminent domain.

4. That this resolution be entered in the minutes and records of the Commission as of the twentieth day of April, 1948.

Minutes of April 19 and 20, 1948

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941 has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter; and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

Name of Highway: Columbia River
Highway Number: 2 Route Number: US30

Location of termini	Established speed
M.P. 88.03 (at Chenowith Creek) to M.P. 90.08 (at west city limits of The Dalles)	45 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highway specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "M"

Minutes of April 19 and 20, 1948

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth, hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: South Santiam
Highway number: 16 Route number US20

Location of termini	Established speed
M.P. 14.06 (S. Limits Lebanon to M.P. 14.92 (West of Traffic Scales)	35 miles per hour

BE IT FURTHER ORDERED, that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

APR 20 1948

Portland, Oregon
May 24, 1948

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel with the following persons present:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
George Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids for highway construction work as follows were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

OREGON COAST HIGHWAY IN COOS COUNTY

DELMAR-COALEDO SECTION

McNutt Bros., Eugene	$ 657,681.00
Porter W. Yett, Portland	658,938.00
J. C. Compton Co., McMinnville	669,424.00
J. N. & M.J. Conley, Portland	728,574.50

OREGON COAST HIGHWAY IN CURRY COUNTY

BRUSH CREEK-HUNTER CREEK ROCK PRODUCTION PROJECT

Shoreline Constr. Co., Salem	$ 41,600.00
F. O. Laws, Myrtle Point	44,240.00
Homer G. Johnson, Portland *	49,050.00
McNutt Bros., Eugene	71,870.00

*Lump sum reduction of $3000.00 if also awarded the Hunter Creek-Calif. State Line Rock Production Project

OREGON COAST HIGHWAY IN CURRY COUNTY

HUNTER CREEK-CALIF. STATE LINE ROCK PRODUCTION PROJECT

Shoreline Constr. Co., Salem	$ 54,715.00
Homer G. Johnson, Portland	64,700.00
McNutt Bros., Eugene	97,995.00

PACIFIC HIGHWAY IN JACKSON COUNTY

TOLO OVERCROSSING

Snook Bros., Corvallis	$ 52,212.00

SILVER CREEK FALLS SECONDARY STATE HIGHWAY IN MARION COUNTY

MILL CREEK BRIDGE SECTION

Archie R. Averill, Portland	$ 58,845.50
Walder & Kenworthy, Portland	60,055.50
Vadare Construction Co., Portland	61,815.50

FRONT AVENUE AT HOOKER STREET, IN PORTLAND, MULTNOMAH COUNTY

FAILING SCHOOL PEDESTRIAN OVERCROSSING

C. M. Corkum Co., Portland	$ 17,310.95
J. P. Brittan & Co., Portland	17,972.00
Archie R. Averill, Portland	18,409.00
Lindstrom Bros., Portland	19,180.00
Kuckenberg Constr. Co., Portland	19,293.00
E. C. Hall Co., Portland	19,332.50
Birkemeier & Saremal, Portland	21,810.00
Don L. Cooney, Inc., Seattle, Wn.	23,357.25

JOSEPH-WALLOWA LAKE SECONDARY HIGHWAY IN WALLOWA COUNTY

NORTH UNIT, JOSEPH-WALLOWA LAKE SECTION

J. C. Papin, Baker	$ 55,907.00
Roy Norquist, Sweet Home	56,713.00

The Commission by unanimous vote approved the minutes of the meeting of the Commission held on April 19 and 20, 1948.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

1. Gift of Mr. E. T. Hoffman, Myrtle Point, Oregon, of an eight-acre myrtle wayside grove located on ORE42 near Powers Junction: The Parks Superintendent advised that Mr. Hoffman wishes to present this tract to the state as a memorial to his mother. He recommended acceptance of it because it contains some very old myrtle trees, of which there are only a few remaining in the state and because it is a very nice place in other respects; moreover, it would cost the state nothing. Commissioner Chandler concurred in the recommendation. Commissioner Schaupp moved acceptance of the gift as a wayside tract. The motion was seconded and carried by the unanimous vote of the Commission.

2. Request of Eslinger and Kirk Lumber Company for the privilege of maintaining a lumber mill on a 12-acre wayside tract adjacent to the Wilson River Highway about one mile west of McNamar's Camp: The Parks Superintendent advised that the company has a five-year operation at this location. He recommended that the request be denied. The Commission approved the recommendation unanimously.

3. Proposal of R. C. Moulton to assign to Mr. Ole Nygaard, Astoria, his interests in an agreement with the Highway Commission covering the cutting of standing burned timber on state-owned property adjacent to the Sunset Highway: The Commission's Chief Counsel reported on this matter on behalf of the Parks Superintendent. He advised that all that Mr. Moulton wants is to assign his interests to Mr. Nygaard who is an experienced operator and who will carry out the provisions of the agreement in the same manner as if he were the original party to it. He presented a form of assignment covering the matter and pointed out that one of the provisions thereof is that the state will retain the $500 that was deposited by Mr. Moulton as a guarantee until Mr. Nygaard has completed the operation to the satisfaction of the Commission. The Parks Superintendent recommended approval of the assignment. The Commission approved the recommendation unanimously.

4. Champoeg State Park Memorial Building: The Parks Superintendent advised that he and the Engineer contacted members of the committee representing the Oregon Historical Society with respect to the site and the general plan of the building and that the committee indicated its approval of both with one slight change in the building plans which is satisfactory from the state's standpoint. He suggested that it would now seem appropriate for the Commission to select an architect to approve the plans. Chairman Banfield advised that the American Institute of Architects is interested in the matter and that the local branch of this association, which is headed by Mr. B. Frank Roehr, has offered to assist in any way it can, its particular interest being in the exterior of the building which they feel should be of proper type in harmony with its surroundings. It was his thought that it would be advisable to accept this offer, for which there might be a slight charge. Commissioners Schaupp and Chandler concurred, whereupon the suggestion was adopted by the Commission unanimously. The Parks Superintendent was instructed to ask Mr. Roehr to come before the Commission on the following day to discuss further details. (Mr. Roehr was present on the following day and at that time advised that the plan of the building in general, as prepared, is very satisfactory and that the site is a beautiful one; however, he suggested that the exterior of the building should include specimens of different Oregon woods. He offered the services of his association, free of cost to the state, to assist in preparation of the design of the building. The Commission unanimously accepted Mr. Roehr's generous offer with thanks and thereupon instructed the Parks Superintendent to keep in close touch with Mr. Roehr in the further interests of this project.)

Chairman Banfield brought up for discussion matters pertaining to the proposed Sullivan's Gulch Highway. He suggested that, because of the importance of the matter and the fact that the people of the City of Portland voted down the proposition to pay 60 percent of the right of way costs, the Commission should inspect the route with the view in mind of adopting it as a throughway highway and of acquiring necessary right of way without financial assistance from the city. He pointed out that the estimated cost to the city is $1,750,000, which the city probably will be willing to contribute by the time the Commission is ready to build the highway, whereas any other route would cost the state at least $5,000,000 more for construction; moreover, any other route would have the disadvantage and inconvenience of stop streets. If the state is forced to finance both right of way and construction, he said, it will mean a delay in completion of the project of two to three years. The Chief Counsel advised that there are two laws whereby the Commission could adopt the route as a throughway---Highway Code of 1939 and Chap. 226, Oregon Laws, 1947, otherwise known as the "Throughway Law". He suggested that it should be done under the provisions of the latter-mentioned law, which would permit the city and the county to contribute funds. He read aloud excerpts from this law. Following discussion Commissioners Schaupp and Chandler approved Chairman Banfield's suggestion for inspection of the route and it was thereupon decided to make such inspection at 10:30 a.m.

The Assistant Counsel, Mr. J. W. DeSouza, presented a list of options which had been acquired with respect to the purchase of real property needed for right of way and other purposes throughout the state. The Commission discussed and approved a number of the items listed but because of lack of time before the inspection trip deferred final decision until the afternoon session.

The meeting adjourned at 10:30 a.m. to permit the Commission to inspect the route of the proposed Sullivan's Gulch Highway and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission resumed discussion of the options presented by the Assistant Counsel for the purchase of real property needed for various highway improvements throughout the state. After careful consideration of each item, the Commission approved the amounts of the options and authorized acquisition of the several tracts. The Commission by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The following notes refer to the right of way resolution attached hereto and marked EXHIBIT "A":

*Items Nos. 14529, 14530, 14577, and 14528, with reference to the Front Avenue project in the City of Portland, were approved by the Commission following discussion of a report by the Assistant Counsel later in the session on the entire Front Avenue Project. (See additional minute entry ahead on page 14904.)

** Item No. 14436, settlement with Haven F. Potterf for right of way for the East Springfield Section of the McKenzie Highway, Lane County. This settlement was approved by the Commission notwithstanding that the right of way is not needed for any approved project. It appears that the owner of the property plans to construct a service station and wants to be certain it is constructed in the proper location. The Engineer advised that the highway would have to be widened at this point and if the property is not acquired now it will cost considerably more later on if the service station has to be moved. In view thereof, the Commission authorized the purchase.

*** Items Nos. 14365, 14366 - Hostetler, and 14366 - Calkins, covering right of way needed for improvement of the Oregon Coast Highway at Devils Lake Outlet. These settlements were approved by the Commission on May 25 upon report from the Engineer and the Assistant Counsel that the right of way is needed to provide a standard highway right of way with a minimum 80 foot width plus slope easements on the east side of the highway. A bridge is to be constructed across the outlet and the right of way now being purchased will enable it to be placed in the proper location.

+ Item No. 9498 covering right of way purchased from H. J. Beardsley for the Owens Street-Midland Road Section of the Klamath Falls-Lakeview Highway, Klamath County. In the discussion of this item it was pointed out that settlement could not be reached with Mr. Beardsley until the Highway Commission reached an agreement with him for remodeling the front of his building which is involved. It was recalled that the Commission took bids on behalf of Mr. Beardsley at its meeting on March 11, 1948, for such remodeling work. The bids were referred to the Engineer and the Chief Counsel to contact Mr. Beardsley to ascertain his attitude with respect thereto. The Chief Counsel advised that Mr. Beardsley was contacted and that he is satisfied with the bid of Angelo Doveri in the amount of $18,375, which was the only bid received, and that he has entered into a contract with Mr. Doveri to do the work. The Commission approved the right of way settlement with Mr. Beardsley on the strength of this report.

++ Items Nos. 9846 and 14443, right of way needed in connection with the Baker Underpass Section of the Baker-Unity Highway in Baker County. The Commission approved both of these settlements but reiterated its previous decision not to construct the project until the City of Baker has fulfilled its obligation with respect to it.

In the discussion of right of way matters, the Commission also discussed briefly settlements presented by the Assistant Counsel for right of way for the Tillamook-Pleasant Valley Section of the Oregon Coast Highway. It appears that there are a number of properties for which settlements have not been reached with the owners, in view of which the Commission decided not to consider any of the settlements until all of the options possible have been secured.

The Commission also discussed acquisition of right of way needed for the proposed improvement of the Newberg-Dundee Section of the Pacific Highway West and for the Fir Grove Section of the Albany-Buena Vista Federal Aid Secondary Highway but deferred action on all of the options presented pending adoption of the survey for each of these projects.

In this connection the Commission ordered that hereafter no right of way settlements shall be presented to the Commission for approval unless and until the survey of the section for which the right of way is being acquired has been formally approved by the Commission.

The Assistant Counsel reported difficulties in reaching settlements with property owners for the acquisition of additional right of way that is needed for various highway improvements. He presented a list of the several parcels together with offers that he recommended in condemnation, as follows:

		Recommended Offer
Delmar-China Camp Creek Section of the Oregon Coast Highway		
14247	L. R. Siglin	$ 180.00
14103	L. R. Siglin - Paul Trolard, et ux contract purchasers	2800.00
Tolo Overcrossing Section of the Pacific Highway		
14515	Gold Ray Realty Co.	350.00
14518	Wright Lumber Co.	600.00
Euchre Creek-Gold Beach Section of the Oregon Coast Highway		
14004	Lloyd Corporation, Ltd.	1600.00
Ferry Street-Walnut Street Section of the Pacific Highway		
12010	J. J. Chisholm and Mae Chisholm and Nellie Chisholm	300.00
Agate Beach-Newport Section of the Oregon Coast Highway		
4427	H. W. and W. W. Gauntlett	9000.00
Lost Creek-Lowell Section of the Willamette Highway		
12069	Harry H. Wade and Rose Wade	1900.00

Following careful consideration of this matter, the Commission approved the offers in condemnation as recommended by the Assistant Counsel and thereupon, by unanimous vote, adopted the attached resolutions marked EXHIBITS "B1", "B2", "B3", "B4", and "B5", authorizing condemnation of the several tracts, which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Assistant Counsel, Mr. DeSouza, brought up for discussion the request of Mr. W. H. Gillinwater, Crescent, Oregon, that the Highway Commission allow him $600 for removing a building on right of way purchased from him for improvement of The Dalles-California Highway at Crescent, Klamath County. He advised that the right of way has already been acquired, and as part consideration the state agreed to allow Mr. Gillinwater $600 for moving the building. The highway improvement, he said, is not ready to go forward, but Mr. Gillinwater wants to develop his holdings and would like to complete his deal with the Commission at this time. Mr. Gillinwater, he said, will not only move the building but will also clean up the premises and will construct the approaches to the building in the new location at his own expense. He recommended approval of the request. The Commission by unanimous vote approved the payment of $600 to Mr. Gillinwater on the basis of this report.

The Assistant Counsel also brought up for discussion the matter of installing a water-softening system on property of Mr. J. N. Hopper at Wolf Creek on the Pacific Highway, in Josephine County. It appears that during the improvement of the highway at this point it was necessary to destroy Mr. Hopper's well, so the state drilled him another one; however, the water is very hard and needs softening, which can be accomplished through special treatment. It also appears that Mr. Hopper is unwilling to release the state from further obligation even though the water-softening apparatus is installed. The Commission decided unanimously, in view of Mr. Hopper's attitude, to do nothing further with the matter until he is willing to cooperate.

The Commission discussed the matter of selling privately a building located on property acquired from Ray C. Fish, et ux. as right of way for improvement of the Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway, in Clackamas County. The Assistant Counsel advised that when the highway improvement was contracted it was thought that the building would be needed by the engineers in charge of the work; however, it developed later on that it was not needed for such purpose. He said that the building is not of much value and recommended acceptance of an offer of $150 which he has received for it. The Commission approved the recommendation.

The Assistant Counsel, Mr. Neuner, reported on the claim of Elmer and Edith Sohrweid arising out of damage to their property as the result of prospecting for road materials. He advised that the Highway Department negotiated with these people for the acquisition of a portion of their property, and as a result a tentative agreement was reached by which the state would have a 25-year ground lease; however, before the lease was executed it was discovered that the property did not contain the desired quantity or type of rock. In the course of the exploratory operations, he said, considerable work was done with a bulldozer, and a number of trenches were dug as wide as the bulldozer blade and from three to six or eight feet in depth. The aggregate length of the ditches, he said, was approximately 1,000 feet. He further stated that shortly after the exploratory work was completed the Sohrweids claimed an impairment of their well which might have been caused by the state's activities on their property. The Sohrweids, he said, feel that they have been damaged to the extent of $500 and have asked the state to pay them such sum. He recommended that the claim be allowed. The Commission approved the recommendation unanimously.

The Commission considered a compromise settlement recommended by the Chief Counsel of the condemnation case of the state versus Carl G. Bechen, et al. for right of way needed for the Gardner Ranch-Berger Ranch Section of the Sunset Highway. The Chief Counsel advised that the Bechen property is highly improved farm land which is being cut up very badly by reason of the highway construction; moreover, the state is taking about 19 acres of this property for its purposes and is also securing an easement from the Bechens for a drainage pipe in connection with the undercrossing of the railroad which crosses the property in a north and south direction. The Chief Counsel also stated that he has had the property appraised by outside appraisers whose appraisals run from approximately $11,000 to approximately $19,000. He recommended a compromise settlement for $16,000 plus an item of $60 for replacing some fencing that was destroyed during the highway construction. He pointed out that in this settlement a certain cattle pass which was originally requested has been eliminated and that access is being restricted to two farm crossings and one private access to a five-acre tract on the south side of the highway which is otherwise completely isolated from a public road. Following discussion the Commission approved the recommendation unanimously.

The Engineer brought up for discussion a request from the U. S. War Department that the state purchase a 200-foot strip of property along the west side of the North Santiam Highway near Detroit Ranger Station in order to prohibit any occupancy of the strip except by special permission from the Regional Forester. It appears that the War Department has been requested by the Forest Service to acquire the property, but the War Department feels it is the obligation of the state inasmuch as the state has been acquiring the rights of way for the other portions of the highway with a similar protective strip adjacent thereto. The Engineer recommended approval of the request, which, he said, would extend the protective wayside for a distance of about 240 feet and would involve the purchase of only 6.4 acres of land which is appraised at $960. In the discussion it was pointed out that the state now owns right of way 150 feet wide and that right of access to the highway along the section also has been acquired. A map was presented showing the area under discussion. The Commission deferred action on the matter until its next meeting.

At 3:00 p.m. Chairman Banfield announced publicly the awards of contract, bids for which were received at the morning session, the awards previously having been discussed and unanimously approved by the Commission:

"Delmar-Coalodo Section of the Oregon Coast Highway, in Coos County; 2.89 miles of grading and paving. The low bidder for this work was McNutt Bros., Eugene, at $657,681. Porter W. Yett, Portland, submitted the next low bid in the amount of $658,938. There were two higher bidders. The Commission has rejected all bids for this project.

"Brush-Creek-Hunter Creek Rock Production Project on the Oregon Coast Highway, in Curry County; furnishing crushed gravel in stockpiles. Shoreline Construction Company, Salem, was the low bidder for this work in the amount of $41,600. F. O. Laws, Myrtle Point, submitted the next low bid in the amount of $44,240. There were two higher bids. The contract has been awarded to the low bidder, Shoreline Construction Company.

"Hunter Creek-California State Line Rock Production Project on the Oregon Coast Highway, in Curry County. The Commission received three bids for this work, the low one being that of Shoreline Construction Company, Salem, at $54,715. The next low bid was submitted by Homer G. Johnson, Portland, in the amount of $64,700. The contract has been awarded to the low bidder, Shoreline Construction Company.

"Tolo Overcrossing on the Pacific Highway, in Jackson County; widening existing concrete viaduct and replacing existing frame trestle approach with fill, etc. Snook Bros., Corvallis, submitted the only bid for this work in the amount of $52,212. This bid is satisfactory and the Commission has awarded the contract to Snook Bros. at their bid price.

"Mill Creek Bridge Section on the Silver Creek Falls Secondary State Highway, in Marion County; involves construction of reinforced concrete viaduct over Mill Creek and 0.4 mile of highway roadbed and surfacing. Archie R. Averill, Portland, submitted the low bid at $58,845.50. Walder and Kenworthy, Portland submitted the next low bid at $60,055.50. There was one higher bid. The Commission has awarded the contract to the low bidder, Archie R. Averill.

"Failing School Pedestrian Overcrossing over Front Avenue at Hooker Street, Portland, Multnomah County. The low bid for this work was submitted by C. M. Corkum Co., Portland, at $17,310.95. J. P. Brittan & Co. Portland, submitted the next low bid at $17,972. There were six higher bidders. The Commission has awarded the contract to the low bidder, C. M. Corkum Co., at its bid price.

"Grading, surfacing and oiling, and construction of two concrete bridges on the North Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Secondary Highway, in Wallowa County. J. C. Papin, Baker, submitted the low bid for this work in the amount of $55,907. The only other bid received was that of Roy Norquist, Sweet Home, at $56,713. The Commission has referred these bids to the Engineer with authority to award the contract to the low bidder, J. C. Papin, at his bid price upon approval by the Public Roads Administration."

The Assistant Counsel, Mr. DeSouza, reported to the Commission on the status of right of way acquisitions on the Front Street Project in Portland. He exhibited a map on which there was shown the right of way as it originally was contemplated in 1940, upon which the Portland bond issue was based. The map also indicated separately the additional areas which have been added to the project since that time. From a financial standpoint it appears that the original appraisal on both sides of the river, as made in 1940, was $1,808,936.00, which in 1942, based on more definite information as to the requirements on the east side of the river, was revised to $2,051,107.00. The present net estimated cost of the right of way is $2,435,739.96. This is an extra amount over the 1942 appraisal of $384,632.96. The difference was accounted for by additional properties which have been added to the project and by increases in real property values since the time the appraisals were made. It was also reported

that expenditures made, plus the estimated cost of right of way not yet acquired, amounted to $2,509,196.00, which is $73,456.04 more than the net estimated cost of the right of way. This discrepancy was accounted for by the fact that in addition to land costs, the City of Portland has paid taxes, title insurance costs, repairs to structures, appraisals, etc., for the Front Street project, which expenditures were not included in the estimated costs of property.

In this connection Chairman Banfield brought up for discussion the matter of constructing a railroad underpass at the west end of the Steel Bridge which is estimated to cost about $500,000 and which was not included in the original plan for the Front Avenue improvement. He gave as his thought that this expense is not justified because of the bottleneck condition that exists along Front Avenue north of this point. The Engineer said that the underpass was added to the plan because of the grade crossing hazard at this point, however, he added that it is not imperative that the underpass be constructed now, as it can be installed later on if it is found necessary. He was instructed by the Commission to bring to the next Commission meeting a plaster model of the proposed project to enable the members of the Commission to visualize the conditions. It was also decided to inspect the premises some time during the next meeting.

The Commission reconsidered approval of four settlements for right of way on this highway as presented by the Assistant Counsel earlier in the session, which properties are located on the east side of the Willamette River. It was explained at the time that approval of these purchases would clean up all right of way matters on the east side of the river other than those that are being condemned by the City of Portland. The Commission, by unanimous vote, approved the settlements as recommended. (See items 14529, 14530, 14577, and 14528 listed in the right of way resolution marked EXHIBIT "A" and referred to on page 14898.)

Chairman Banfield also brought up for discussion matters pertaining to the proposed Sullivan's Gulch Highway. Following a brief discussion, the Chief Counsel was requested to prepare and present to the Commission on the following day a draft of a resolution adopting this route as a state highway and declaring it a throughway under the provisions of the "Throughway Law" enacted by the 1947 Legislature. (As requested, the Chief Counsel presented such resolution on the following day when it was adopted by the Commission by unanimous vote. See resolution attached hereto and marked EXHIBIT "N".)

The Commission discussed a report from the Engineer on the request of citizens of Nashville, in Lincoln County, for the designation of a county road. which extends from Nashville to Orton, as either a State Secondary or a Federal Aid Secondary Highway. The Commission indicated that it would not approve this project due to lack of funds with which to finance construction but deferred a definite decision until the following day when a delegation from Nashville is to be present. (See ahead for discussion of this matter with the delegation.)

The Engineer reported the results of investigations of alternate routes proposed for the Hillsboro-Silverton Secondary Highway through the town of Newberg. He estimated the cost of constructing the College Street route, which is the one preferred by the Newberg City Council, at $72,300 and the cost of right of way at $23,500, for a total of $95,800, compared with a total cost of $88,600 for the Meridian Street route, which is advocated by a group of citizens which appeared before the Commission at its meeting in April. He explained that the right of way cost on the College Street route includes an amount of $12,000 for removing the Union Oil Company's plant from its present location at the north end of this street, it being assumed that the plant would have to be re-established immediately. If the improvement of College Street at this particular point were deferred until a later date, he said, a saving of $7,000 can be effected because the Union Oil Company has plans to build a new plant in the not too distant future. It was his belief that the state could purchase additional property for the company's use and that the oil company would turn back to the state a right of way required for the highway improvement. If this saving can be effected, he said, it would reduce the total cost of the College Street route to $88,800 which is practically the same as the estimated cost of the Meridian Street route. He indicated a preference for the Meridian Street route. (For further details see Engineer's letter of May 18, 1948, directed to Mr. T. H. Banfield, in general files.) The Commission deferred action on this matter pending consultation with Mr. Frank C. Colcord, Mayor of the City of Newberg, who is scheduled to appear on the following day. (Mr. Colcord was unable to be present on the following day, so the matter was not discussed further.)

The Engineer reported results of investigations of complaints from residents on the Hillsboro-Silverton Secondary Highway about four miles south of Hillsboro that this highway is inadequately drained and as a result is flooded to a depth of about two feet each winter. He advised that this is one of the roads the Commission took over from Washington County, and the records disclose that for a period of several years it has been flooded because of inadequate capacity of two 36-inch pipe culverts. He recommended replacement of these two culverts with an 8' x 5' reinforced concrete box culvert which, he said, would correct the situation. He estimated the cost of the concrete box at about $4,000 and recommended approval of the work as a 1948 Minor Betterment project. The Commission approved the recommendation.

Pursuant to instructions from the Commission at the previous meeting the Engineer reported results of an investigation of the request of the City of Vale for the improvement of Washington Street, in Vale, as a by-pass route for Central Oregon Highway truck traffic through this town. He advised that the city is asking for the oiling of this street for a width of only 30 feet, which would cost about $5,000; however, he questioned that this would satisfy the people who sooner or later would want the street oiled the full width of 60 feet, placement of curbs and a heavier type pavement, which would cost about $25,000. He recommended that the request be denied for the reason that he can see no necessity for disbursal of the truck traffic at this time. The Commission approved the recommendation.

As requested by the Commission at the previous meeting, the Engineer reported on the status of field survey work necessary for projects designated in the first Three Year Postwar Program and on the surveys that will be needed for projects in future construction programs. He presented a list of projects and advised that many of them are possibilities for the next construction program the Commission will adopt. (See Engineer's letter dated May 19, 1948, directed to the Oregon State Highway Commission for the list referred to.) He suggested, in order that the best available use of the Department's limited engineer personnel can be made, that he be authorized to proceed with the completion of these surveys so they will be available when needed by the Right of Way Department in making appraisals and securing options for right-of-way. Chairman Banfield expressed himself in favor of granting this authority insofar as it concerns projects that the Engineer can recommend for inclusion in the next construction program, particularly that for 1949. Commissioners Schaupp and Chandler expressed themselves similarly and it was so ordered.

The matter of contributing state highway funds to assist in financing bank protection work along the Santiam River north of the new bridge on the Pacific Highway East, near Jefferson, was brought up for discussion by the Engineer. He advised that the Army Engineers have made a study of erosion conditions along the Santiam River at this point and report the need of protection facilities for about 3,200 feet on the north bank of the river a short distance above the bridge, and on the south side of the river about a half mile above this point. To correct the situation, they propose construction of about 1,100 feet of drift barrage which would cost a total of about $100,000, fifty percent of which they are asking the state to assume because of uncertainty that more than $50,000 of Federal monies will be available for the purpose. He recommended that the Commission approve an expenditure of $50,000 for this work because the bank erosion is serious and unless it is stopped may result in a major shift in the river channel, which would involve large expenditures on the part of the state and might necessitate construction of another bridge. The Assistant Counsel, Mr. Neuner, mentioned that the state might assume some liability if it joined in this undertaking. He suggested the possibility of the Federal Government contributing the entire amount under the Flood Control Act, which authorizes the Army Engineers to do anything necessary in connection with projects of this kind without assumption of any liability whatsoever. In view of this information the Commission deferred action on the project and referred the matter back to the Engineer and the Chief Counsel for a joint report and recommendation.

The Engineer reported on the request of the City of Astoria for two improvement projects in this city - widening of Taylor Avenue (Oregon Coast Highway) westerly from Bay Street to Hamburg Street, a distance of about 2,800 feet, and improvement of Leif Erickson Drive (Columbia River Highway) from 36th Street to 52nd Street. He advised that those projects have been investigated pursuant to authority from the Commission, and it has been found that the Taylor Avenue project consists of widening of a two-lane pavement to a standard four-lane facility and that such project would cost about $70,000. Additional right of way, he said, would not be required because the existing street is 100 feet wide. He also advised that the City of Astoria has agreed to require the removal of some buildings which encroach

upon the street area at such time as the improvement is made. The daily traffic volume on this street, he said, is 6,000 vehicles, and he recommended that this project be considered by the Commission for inclusion in the unallocated Major Betterment Program for the year 1949. The Leif Erickson project, he said, is not so important. He estimated the cost to construct this project, at $380,000 and the cost of right of way at $100,000 for a total of $480,000. He pointed out that the traffic volume on this street is only 2,700 vehicles per day, which feature, together with the high cost of the work, does not qualify this section for priority construction at the present time. He recommended that this project be denied. The Commission deferred definite action on both projects pending inspection on one of its trips this summer.

The Commission discussed a request from Mr. E. K. Willer, owner of Willer's Motor Hotel and Apartments, Newport, for permission to use a portion of state highway right of way in Newport for automobile parking purposes. The Engineer advised that the area that Mr. Willer wishes to use is a portion of a large area which the Commission plans to landscape at the north end of the Yaquina Bay Bridge; in fact, part of it has already been partially landscaped and is now covered with green grass; moreover, plans are being made to do additional landscaping work at this point. He pointed out that other requests have been made for the same privilege and if the Commission grants Mr. Willer's request it would establish an undesirable and probably an embarrassing precedent. He recommended that the request be denied. The Commission approved the recommendation.

The Engineer reported on the request of the Albany Timber Carnival Association for the privilege of using Waverly Lake and Waverly State Park in connection with its annual carnival which is to be held on July 3 and 4, 1948. He said that he has had this matter investigated by the Traffic Engineer who recommends, if the Commission sees fit to grant this privilege, that the following conditions should apply: (1) That the Association be required to post a cash bond in the amount of $1,000 to guarantee adequate clean-up of the premises, (2) that sufficient parking attendants be provided by the Association to keep the highway clear of parked vehicles, (3) that the section of the Pacific Highway adjacent to the carnival activities be posted with "no parking" signs at the Association's expense, (4) that a minimum number of adequately marked and police patrolled pedestrian crossings be maintained at Association expense, and (5) that there be installed and maintained by the State Highway Department during the progress of the carnival standard Highway Department "Slow -- Congested Zone" signs. He advised that he concurs in the recommendation. As the result of discussion the Commission authorized the granting of a permit to the Carnival Association for the use of the state's property this year only on the conditions recommended by the Engineer. The Secretary was instructed to notify the Carnival Association of the action taken and to advise further that hereafter the Commission would expect the Association to make other arrangements for a place to hold its carnival.

The Engineer brought up for discussion the disposal of buildings in Eugene which were previously authorized for sale by the Commission, the bids having been referred back to the Engineer and the Chief Counsel for recommendation. The Engineer advised that the offer of $3,000 subsequently made by Mr

Kenneth Dodd for Buildings Nos. 11994 and 11997 has been investigated and that Mr. Joel D. Trapp, who submitted the high bid of $2,750 for these two buildings in the regular bidding procedure, was also contacted. Mr. Trapp, he said, has made a counter offer of $3,150 for the two buildings and in addition thereto agrees to rent the buildings to Highway Department employees at the rate of $25 per month for a six-months period. He further stated that he has discussed the entire matter with the Chief Counsel and it is their recommendation that Mr. Trapp's offer should be accepted, that the bids received for Building No. 10961 be rejected and that the Commission accept the high bid for each of the remaining buildings; otherwise, that all bids be rejected and sale of the buildings be re-advertised. The Chief Counsel verified the statement. The Commission unanimously approved the sale of the buildings as recommended.

The question then arose concerning the sale of additional buildings at this location. The Commission authorized the advertising for sale of these buildings subject to the condition that the successful bidder is not to be allowed to move the buildings over any highway or street under the jurisdiction of the State Highway Commission.

The Commission discussed briefly a Wasco-Heppner Secondary Highway improvement that has been requested by residents of Morrow, Gilliam, Wheeler, and Sherman Counties concerning which a delegation is to appear on the following day. The Engineer presented a straight line chart showing the status of improvement of this road. The Commission deferred action on the matter pending appearance of the delegation. (As the result of discussion with the delegation, the Commission agreed to inspect the project on one of its inspection trips this summer. See ahead for additional paragraph.)

A letter was presented from the Joseph Chamber of Commerce requesting the oiling of the main street in their town. The Engineer advised that this request has been investigated and it has been ascertained that what the Chamber of Commerce desires is the oiling of five blocks on the Wallowa Lake Highway. He said that this street is 100 feet wide with a ten-foot sidewalk on each side and an oiled roadway 36 feet wide along the center, so there remains 22 feet on each side to be oiled. He estimated the cost of the improvement at $4,785; however, pointed out that it would be only a temporary improvement, whereas a permanent job would cost about $25,000. He recommended, if the Commission approves the project, that it be done on a permanent-type basis. The Engineer pointed out that bids were received today for grading, surfacing, and oiling the North Unit of the Joseph-Wallowa Lake Section of this highway, 1.31 miles in length, the low bid being in the amount of $55,907; also, that there is insufficient money available to finance the improvement now requested. In view of this report the Commission by unanimous vote denied the request, however, agreed to inspect the project on one of its trips this summer.

There was presented to the Commission a request from the County Court of Klamath County that the State Highway Department take over and assume maintenance of the South Poe Valley County Road from Olene to a connection with the Malin-Poe Valley Road which is now being improved under state highway contract. The Engineer advised that this is a county road but that

it has been designated a Federal Aid Secondary Highway, and its maintenance is an obligation of the county. Were the state to assume the maintenance, he said it would be necessary to place the road on the State Secondary Highway System. He advised that the road was graded in 1944, surfaced in 1945 and 1946, and was oiled in 1947 and, whereas the wearing surface is now fairly good, it will probably need resealing some time during the next five years. He pointed out that the road is ten miles in length and that it contains a bridge with two 75-foot steel spans across Lost River, with a roadway width of only 15' 2" and badly in need of paint. Concerning the right of way width, he said, that a 60-foot right of way was acquired by resolution of the county court, but there are some sections where right of way fences are only 40 feet apart, so it probably will be necessary to spend some money to provide a uniform 60-foot right of way. He estimated the annual cost of maintenance for the next five-year period, if the state took over this road, at $9,832.

Commissioner Sharp gave as his understanding that the court is not asking the state to designate this road as a secondary highway but is asking the state only to enter into an agreement with the county to maintain it for the next five years. He gave as his thought that such an arrangement on a state-wide basis would encourage counties to construct more good county roads. Mr. George Neuner, Assistant Counsel, advised that the Commission has the legal authority to enter into such type of agreements with the counties if it so desires. As the result of discussion the Commission instructed the Engineer to report at the next meeting whether or not the state is in position financially and otherwise to assume such an obligation on a state-wide basis.

The Commission discussed a request from the City of Wheeler for the widening of the Oregon Coast Highway between Gamble Street and Hemlock Street, a distance of approximately 2,000 feet. The Engineer advised that this is a meritorious project that is estimated to cost about $6,000. He said that it is too small a project for contracting and probably should be performed by state forces. He recommended consideration of the project by the Commission in the formulation of its 1949 Minor Betterment Program, it being too late in the season to do it this year. The Commission approved the recommendation and also expressed a desire to inspect the project during the progress of one of its inspection trips.

A letter was presented from Mrs. John E. Fredrickson, Mapleton, Oregon, urging improvement of the "Route F" Highway between Eugene and Mapleton. The Commission denied the request for immediate undertaking, however, ordered that Mrs. Fredrickson be informed that the Commission is attempting to improve this route as fast as funds are available and will consider it along with other projects when the next construction program is formulated, although such consideration does not contain any promises to include it in the program.

The Commission discussed briefly four requests presented by the Coos County Court at the previous meeting of the Commission, as follows:

(1) State cooperation in construction of a bridge across the Coquille River at Bullards

(2) Matter of substituting a bridge project for an oiling project on the Myrtle Point County Road, Federal Aid Secondary Highway

(3) Request that the state take over the obligation of maintaining two approach bridges on the Oregon Coast Highway between Coquille and Bandon and as consideration therefor the County agrees to take over and maintain certain abandoned sections of the Cape Arago Secondary Highway

(4) Proposal of the American Legion, Coquille, with regard to widening the intersection of Willard and Front Streets, in Coquille

The Commission deferred a decision with respect to the first of the above-mentioned items until later in the session. (See ahead for additional paragraph where the Commission approved state cooperation conditionally.) As to substituting the bridge project for an oiling project on the Myrtle Point County Road, the Engineer advised that he has not yet received word from the Public Roads Administration whether or not it will approve such substitution of projects. In view thereof, the Commission deferred its decision until such information is forthcoming. The Commission approved the assumption of the obligation of Coos County with respect to maintaining the two approach bridges on the Oregon Coast Highway between Coquille and Bandon, in view of the opinion of the Chief Counsel that the obligation rightfully belongs to the state. The Engineer and the Chief Counsel were instructed to prepare a form of agreement with Coos County covering the matter and providing for the County to take over and maintain the abandoned sections of the Cape Arago Secondary Highway. The Commission deferred a decision with respect to the proposal of the American Legion, Coquille, pending a report from the Engineer.

The Engineer recommended and the Commission unanimously approved three Special State Tax Street Fund projects to be financed with a portion of the $250,000 fund which the 1947 Legislature withheld from the general apportionment of State Tax Street Funds to the counties and cities for expenditure by the State Highway Commission, as follows:

Cooperative project with the City of Florence

Placement of rock base and oil mat surfacing and otherwise stabilizing portions of Lincoln Street and Hamlin Street in order to carry heavy lumber hauling - Total estimated cost ---- $ 9,600.00
City's share ---------- 1,000.00

Cooperative project with the City of Newport

Re-aligning, grading, surfacing, and construction of curbs and sidewalks along Hurbert Street and Canyon Road between the Oregon Coast Highway and the water front ---------- Total estimated cost ---- $16,412.00
Surfacing work by the state ---------- 9,412.00
Balance to be paid by city and property owners 7,100.00

Project in City of Oakridge

Stabilizing and oiling Commercial Street from Cherry Street to Alder Street - Total estimated cost -$15,000.00

Regarding the project in Oakridge, the Engineer advised that this street carries especially heavy log and lumber traffic and will have to be improved entirely at state expense because the city is without funds.

The Commission discussed a request from the Clatskanie Kiwanis Club for construction of a footpath along the Lower Columbia River Highway between the Clatskanie city limits and the S. P. & S. Depot. The Engineer recalled that this matter had the attention of the Commission about a year ago and that Chairman Banfield and he inspected the project on April 30, 1947, when it was concluded that the cost of the footpath was more than would justify its construction. He pointed out that there is insufficient right of way on which to construct an adequate path, and estimated the cost to construct a narrow footpath within the present right of way width at $4,000. He recommended that the request be denied. Chairman Banfield gave as his opinion that the project is merited. He suggested that the right of way feature be further investigated before a final decision is made by the Commission. The suggestion was approved by Commissioners Schaupp and Chandler, whereupon the Engineer was instructed to make such investigation and to report his findings at the next meeting of the Commission.

The Engineer reported that several requests have been made by delegations from Oakridge for the improvement of the Willamette Highway, as follows:

(1) Channelization and illumination of the intersection of Crestview Drive with the Willamette Highway at Oakridge, estimated cost-$1,200;

(2) Widening of the present 18-foot oil surface to 20 feet and construction of four-foot shoulders along this highway between Willamette City and Oakridge, a distance of about one mile, estimated cost - $7,000;

(3) Widening of the Willamette Highway through the town of Oakridge, particularly between Highway Engineer's Stations 25+95 and 26+10 to provide for a standard street section with four lanes of traffic , estimated cost - $37,000.

The Engineer advised that investigation of the channelization project reveals considerable traffic congestion at this intersection, and it is his considered opinion that the project is needed. He recommended approval of an expenditure of $1200 for this purpose from the Minor Betterment Contingency Fund. The Commission approved the recommendation.

The Engineer also advised that the highway between Willamette City and Oakridge carries a large volume of traffic, particularly log and lumber traffic and in his estimation there is full justification for widening the present narr-

road. He said it is too late in the season to do the work this year because the oil crews have a full schedule; however, he recommended approval of the project as a minor betterment item for 1949 construction. The Commission approved the recommendation.

As to the third project, widening the Willamette Highway through Oakridge for four lanes of traffic, the Engineer recommended that the request be denied. The Commission approved the recommendation.

In connection with this discussion the Engineer reported on the condition of the Willamette Highway in general east of the town of Oakridge. He recited briefly the history of the original construction, advising that a contract was awarded prior to World War II for construction of the section, including an oiled surface, but the oiling work was never completed because of war time conditions and the freezing of Forest Highway Funds. Since that time, he said, the road has been maintained by the state in the best manner possible under existing conditions, but it is now in bad shape, and must be improved. He pointed out that Forest Highway Funds in the amount of $630,000 were previously allocated in the First Year Forest Highway Program for surfacing and bituminous macadam construction between Oakridge and Salt Creek Tunnel and $70,000 was approved in this program for similar work on a section about seven miles long east of the tunnel, but such funds no longer are available; likewise, an amount of $130,000 of prewar Forest Highway Funds, with which it was proposed to finance the Odell Lake Section, no longer is available. He suggested, since the highway east of the tunnel is in bad condition, that he be authorized to work up plans for resurfacing the section between the tunnel and a point about 15 miles easterly thereof, which work he estimated would cost about $700,000, and then discuss the project with the Public Roads Administration and the U. S. Forest Service, which are concerned. Chairman Banfield pointed out that the highway is already constructed and is being maintained by the state and that people who travel it consider it to be a state highway, and if the state uses state money to improve it so that it will carry traffic properly, then the Commission should have an agreement with the Public Roads Administration and the Forest Service covering reimbursement for the expenditure later on with Forest Highway Funds. It was his thought, in that case, that the State Highway Commission should have the privilege of stating where the money should be spent. Members of the Commission, he said, are agreed that the road must be improved. As the result of further discussion of the matter the Commission unanimously authorized the Engineer to work up the plans for the project between Salt Creek Tunnel and a point 15 miles easterly thereof and to arrange with representatives of the Public Roads Administration and the U. S. Forest Service for a joint meeting with the Commission to discuss the possibility of including this project in the next Forest Highway Program.

The matter of extending the proposed improvement of the Oregon Coast Highway along the Delmar-Coaledo Section between Coquille and the City of Coos Bay was also discussed by the Commission at this time. It was pointed out that bids were received this day for grading and paving a 2.89-mile section, which is 1½ miles shorter than the section originally proposed, it having been necessary to reduce the length of the section to fit the monies available; but the bids

were rejected as being too high. It was the thought of the Commission that the project should be constructed as originally planned in order to provide a satisfactory improvement, if funds can be found to finance the work, and if there are funds available the additional 1½-mile section should be included in the project when it is re-advertised for bids. The Engineer was instructed to review the financial setup and to report later in the session. (The Engineer submitted such report on the following day and at that time requested authority to re-advertise the project on the basis of including the extra 1½-mile section. The Commission approved the request unanimously.)

The Commission discussed a request from the County Court of Lane County for the improvement of two sections of the Territorial State Secondary Highway No. 200, one section being between the Siuslaw Highway Junction at Franklin, a distance of 1.8 miles, and the other being a section between Crow and Gillespie Corners, 8.1 miles in length. The Engineer advised that both improvements are desirable were funds available to finance them. He estimated the cost of the first project at $100,000 and the second at $350,000. The Commission denied the request for both improvements, however, instructed the Engineer to bring these projects to the Commission's attention when the next construction program is being discussed.

The Commission considered, approved, and signed a modification of its project agreement with the Public Roads Administration concerning the Front Avenue Project in Portland. Such agreement increases the Federal aid apportionment for this project from $667,210 to $703,210. The Engineer advised that it is possible to secure this increase because of unprogrammed urban funds which have to be programmed before June 30, 1948, in order not to lose them.

The Commission also considered and unanimously approved a form of agreement prepared by the Chief Counsel and the Engineer with Harry I. Hamilton Company covering the rebuilding of the center pier on the South Dillard Bridge in Douglas County, which was badly damaged by high water during the flood period in January 1948. The agreement was signed later in the session.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1947 State Tax Street Funds which they received in 1948 and that the plans for the projects they propose to finance with such funds have been examined and found satisfactory:

Aumsville	Falls City	Moro
Aurora	Garibaldi	Nehalem
Barlow	Gervais	Paisley
Bay City	Island City	Philomath
Donald	Madras	Talent
Echo		Willamina

The Engineer recommended that the plans be approved by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "C" which resolution by this reference is made a part hereof to the same effect as though entered in full herein.

The Engineer also advised that the following cities and towns have met the legal requirements with respect to the expenditure of 1946 State Tax Street Funds which they received in 1947 and that the plans of the projects which they propose to finance with such funds have been examined and found satisfactory:

Amity	Imbler	Maupin	Sandy
Glendale	Island City	Oakland	Scappoose
Halsey			

He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "D" which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed briefly matters pertaining to the proposed inter-county bridge over the Willamette River between Salem and West Salem but took no action thereon nor made any statements relative thereto pending presentation of the matter by a delegation which is scheduled to appear before the Commission on the following day. (See ahead for the delegation's presentation.)

The Engineer reported that, pursuant to authority heretofore granted him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meetings on March 11 and April 20, 1948, the conditions of the awards having been satisfied:

Willamette River Bridge at Independence; bids received April 20, contract awarded April 30 to Macco Corporation, Clearwater, California, the low bidder

Little Pudding River Bridge on Salem-Silverton Federal Aid Secondary Highway, Marion County; bids received April 20, contract awarded April 26 to low bidder, Geo. E. Berry, Beaverton

Construction of bridge over Salmon River on Oregon Coast Highway, Lincoln County; bids received April 20, contract awarded April 26 to Tom Lillebo, low bidder

Grading and paving Rainier-Goble Section, Columbia River Highway, Columbia County; bids received April 20, contract awarded April 26 to Leonard & Slate, Oreg. Ltd., low bidder

Grading, paving, etc. on Oregon City-New Era Section, Pacific Highway East, Clackamas County; bids received March 11, contract awarded May 5 to Warren Northwest, Inc., low bidder

The Commission by unanimous vote approved the contract awards as reported by the Engineer.

In this connection the matter of the award of the contract for remodeling the Beardsley Building in Klamath Falls was again brought up for discussion. The Commission by unanimous vote approved the award of this contract by Mr. H. J. Beardsley to Angelo Doveri, contractor, Klamath Falls, who submitted the only bid for this work, in the amount of $18,375, at the meeting of the Commission held on March 12, 1948. The Commission also confirmed its previous action approving payment of the sum of $18,375 to Mr. Beardsley as consideration for right of way required for improvement of the South Sixth Street Project across Mr. Beardsley's premises in Klamath Falls.

The Engineer requested authority to construct 18 small buildings and make improvements to certain existing buildings located at maintenance stations situate at the following locations, involving a total expenditure of $28,780:

Maint. Sta. Location	Description	Amount
Alkali Lake	Storage building for inflammable materials, 8'x12'	$ 400.00
Paisley	Storage building for inflammable materials, 8'x12'	400.00
Suntex	Storage building for inflammable materials, 8'x12'	400.00
Brothers	Storage building for inflammable materials, 8'x12'	400.00
Bend	Storage building for inflammable materials, 12'x16'	700.00
John Day	Storage building for inflammable materials, 12'x16'	700.00
Lakeview	Storage building for inflammable materials, 12'x16'	700.00
Drain	Storage building for inflammable materials, 8'x12'	400.00
Grants Pass	Construct equipment storage shed, 20'x60'	800.00
Eagle Point	Construct equipment storage shed, 20'x32'	500.00
Post	Construct equipment storage shed, 28'x48'	4,000.00
Drain	Construct woodshed, 12'x14'	200.00
Reedsport	Construct woodshed, 12'x14', construct fence, install kerosene tank	580.00
The Dalles	Construct storage shed 20'x40' using salvaged material for frame	600.00
Basque	Construct employee cabin, to be prefabricated at Burns	3,000.00
Ukiah	Construct equipment storage building 32'x60' using salvaged building material from Pendleton right of way purchase	5,000.00
Klamath Falls Shops	Construct 36'x36' addition to blacksmith shop at Klamath Falls Shops	5,000.00
Meacham	Convert recently purchased residence into a duplex for employee housing	5,000.00
	Total Additional Building Minor Betterment Projects for 1948	$28,780.00

He also requested authority to construct a standard maintenance headquarters building at Maupin which he estimated would cost $15,000. He said that the Highway Department now has rented quarters at this place which are very unsatisfactory and that it would be highly desirable if the Department could construct its own building on property it owns at this location. He pointed out that there was set up in the 1948 budget for construction of buildings and improvement of maintenance stations the sum of $194,785, of which amount $160,785 remained unallocated as of May 1, 1948. The total of the projects now requested, he said, is $43,780 which, if approved by the Commission, will leave a balance unallocated of $117,005 and a reserve of $5,215. The Commission approved both requests by unanimous vote.

The Engineer reported that the surveys for the following sections of state highways have been completed and asked the Commission to approve them as the permanent routes of such highway sections:

McMinnville-Newberg Section of the Pacific Highway West, in Yamhill County;

Great Northern Railway Crossing-Merrill Section of the Klamath Falls-Malin Highway, in Klamath County;

Odell Secondary Highway, in Hood River County;

Fir Grove School-Benton County Line Section of the Albany-Independence County Road, in Polk and Benton Counties.

After due consideration of the report of the Engineer with respect to each of the surveys under discussion, the Commission approved and adopted the surveys by the adoption by unanimous vote, of the resolution marked EXHIBIT "E" attached hereto and by this reference made a part hereof with like effect as though extended in full herein.

The meeting adjourned at 5:00 p.m. to reconvene on the following day in the same room at 9:00 a.m.

Portland, Oregon
May 25, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, First Asst. State Highway Engineer
W. W. Stiffler, Second Asst. State Highway Engineer
M. H. Hawke, Chief Accountant
G. W. Neuner, Assistant Counsel
H. B. Glaisyer, Secretary

Mr. J. M. Devers, Chief Counsel, was excused. He returned to the meeting at 2:00 p.m.

Bids as follows for highway construction work were opened and read aloud by the Secretary in conformity with previously-published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room:

COQUILLE SERVICE BUILDING IN COOS COUNTY

EXTENSION ON BUILDING

A. T. Fox, North Bend	$10,362.00

ODELL SECONDARY HIGHWAY IN HOOD RIVER COUNTY

HOOD RIVER JUNCTION-ODELL CREEK SECTION

Shoreline Constr. Co., Salem	$79,750.00
J. N. and M. J. Conley, Portland	80,304.00
Allen E. Satchett and Francis Gatchel, Hood River	81,848.80
Vernie Jarl, Gresham	87,654.50

SPRAGUE RIVER HIGHWAY IN KLAMATH COUNTY

THREE BRIDGES OVER SPRAGUE RIVER

Perkins Bros., Portland	$141,110.00
R. H. Jones, Hillsboro	156,830.00
McHutt Bros., Eugene	177,910.00

ISLAND CITY-SUMMERVILLE COUNTY ROAD IN UNION COUNTY

DRY CREEK-WEST RANCH SECTION

E. C. Hall Co., Portland	$73,090.00
Vernie Jarl, Gresham	75,490.00
D. F. McKenzie, Salem	76,119.00
J. N. & M. J. Conley, Portland	76,755.00
Newport Constr. Co., Portland	79,767.00
Edwin C. Gerber, Oregon City	87,579.00

The Commission considered the following requests for extensions of time within which to complete highway contracts:

The General Construction Company, Contract No. 2972 for the reconstruction of ferry slips for the Astoria-Megler ferry on the Oregon Coast Highway in Clatsop County, requested an extension of time of 21 days, from April 15 to May 6, 1948, within which to complete this job. They stated additions to the original contract required more and longer piling, thereby necessitating extra work. The Engineer advised that a greater penetration was obtained in driving the piling for the ferry slips than was anticipated and that the contractor encountered delays in obtaining the longer piling and was further delayed on account of strikes. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

J. P. Brittan and Company, Contract No. 2880 for construction of the Buck Hollow Bridge on Sherars Bridge Secondary Highway No. 290, in Sherman County, requested an additional extension of time of 30 days, from December 31, 1947, to January 30, 1948, within which to complete this job. They alleged that difficulty in obtaining sufficient skilled labor, damage caused by a flash flood, and the abnormal winter weather prevented the completion of the job within the specified time. The Engineer advised that the structure was completed, except for minor clean up and finishing operations, within the previously extended time limit and that the reasons given by the contractor are generally true. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Tom Lillebo, Contract No. 2774 for the construction of the Fuller and Ojalla Bridges over the Siletz River on the Siletz Secondary Highway, in Lincoln County, requested an additional extension of time of 148 days, from September 1, 1947, to January 26, 1948, within which to complete this job. He alleged that difficulty in getting a steel crew to replace a defective angle brace and rainy weather which delayed painting operations, prevented him from completing the job within the limits of the previous time extension. The Engineer advised that the reasons given by the contractor are generally true and that no inconvenience to the public or extra cost to the state was occasioned by the delay. He recommended that the extension of time requested be granted without penalty.

A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Struss and McCoy, Contract No. 2859 for furnishing crushed rock in stockpiles for the John Day Rock Production Project on the John Day Highway, in Grant County, requested an additional extension of time of 122 days, from June 1, 1948, to September 30, 1948, within which to complete this job. They alleged that bad winter weather conditions prevented completion of the project within the previously-extended time limit. The Engineer advised that the contractor has not shown evidence of being able to conduct a project of this type in a satisfactory manner and that his failure to complete the project within the period of the first extension of time will increase the cost to the state by reason of engineering expense. He recommended that the additional extension of time now requested be granted on the condition that the contractor be required to reimburse the state for engineering costs which accrue to the state after December 31, 1947. The Commission approved the recommendation unanimously.

John A. Logan, Contract No. 2856 for grading, bituminous macadam surfacing, and construction of a bridge on the Tutuilla Creek Section of the Pendleton-John Day Highway, in Umatilla County, requested an additional extension of time of 61 days, from May 1, 1948, to July 1, 1948, within which to complete this job. He alleged that the job is completed except for a small amount of oiling on the bridge approaches, which could not be done sooner because of unsuitable weather. The Engineer advised that because of a shortage of bridge materials the contractor was unable to complete the bridge work early enough in the fall to permit oiling the approaches before the rainy season set in and that the late spring prevented completion of the job within the previously-extended time limit. He recommended for these reasons that the additional extension of time now requested be granted without penalty. The Commission approved the recommendation unanimously.

R. A. Heintz-Construction, Contract No. 2844 for grading and topping on the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County, requested an additional extension of time of 13 days, from March 31 to April 13, 1948, within which to completethis job. They alleged that extremely wet weather and additional work ordered by the Engineer because of flood damage prevented the completion of the job within the previously-extended time limit. The Engineer advised that the reasons given by the contractor are correct and accordingly recommended that the additional extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Kuckenberg Construction Company, Contract No. 2874 for the construction of ramps at the west end of the Ross Island Bridge, Portland, on the Front Avenue Section of the Pacific Highway West, in Multnomah County, requested an additional extension of time of 30 days, from April 30, 1948,

to May 30, 1948, in which to complete this job. They alleged that delay in securing additional light fixtures, caused by a strike, prevented completion of the job within the limits of the previous time extension. The Engineer advised that the job is complete except for the installation of the light fixtures and poles in the hand rail and that such work would have been completed had it not been for a strike in the foundry plant which was to furnish the bases for the fixtures. He recommended, for this reason, that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Erick Enquist, Contract No. 2946 for construction of a bridge over Oneonta Creek on the Columbia River Highway, in Multnomah County, requested an additional extension of time of 31 days, from April 30, 1948, to May 31, 1948, within which to complete this job. He alleged that his failure to complete the project within the previously-extended time limit was due to certain experimental work that the Highway Department conducted on this structure regarding distributing of loads. The Engineer advised that the reason given by the contractor for overrunning the previously-extended time limit is substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

McNutt Brothers, Contract No. 2845 for grading the Glendale Junction-Wolf Creek Section of the Pacific Highway, in Douglas and Josephine Counties, requested an extension of time of 228 days, from October 31, 1947 to June 15, 1948, within which to complete this job. They alleged that a delay in the award of the project and the starting of work, a considerable overrun on excavation and other items, and an unusually wet fall had prevented completion within the time limits as specified in the contract. The Engineer advised that bids for this job were received by the Commission on August 6, 1946, but the award of the contract was not made until September 24, 1946, because of right of way difficulties. He further stated that the contractor's operations were handicapped by an unusual amount of rainfall during the fall and spring months. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

McNutt Brothers, Contract No. 2933 for surfacing the Globe-Elmira Section of the Richardson-Eugene Secondary Highway, in Lane County, requested an extension of time of 40 days, from May 31, 1948, to July 10, 1948, within which to complete this job. They asserted that the furnishing of 5000 cubic yards of excess material ordered by the state prevented completion of the job within the limits specified in the contract. The Engineer advised that the reason given by the contractor is correct, the Commission at its April meeting having authorized the purchase of the extra material from this contractor. Work contemplated under the

original contract, he said, was completed by May 17, 1948. He recommended that the extension of time now requested be granted without penalty. The Commission approved the recommendation unanimously.

The State Highway Commission, in passing on contractor's requests for extensions of time within which to complete the contracts as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

In this connection the Commission discussed the penalties assessed at its April meeting against Angelo Doveri with respect to Contracts Nos. 2814 and 2802 for bridge work on The Dalles-California and Klamath Falls-Lakeview Highways in Klamath County. It was the sentiment of the Commission that the penalties previously assessed are not entirely justified in view of the fact that the traveling public had not been inconvenienced; that the contractor's operations were handicapped by inclement weather, shortage of steel, and by a change in plans for the bridge footings. After due consideration of these facts, the Commission by unanimous vote ordered the cancellation of the penalty heretofore assessed against each of these jobs.

The Engineer reported that Contracts Nos. 2880, 2802, 2844, 2912 and 2774 for state highway construction have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion the Commission approved and accepted the contracts as reported and by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended herein.

The Commission considered a request of Mr. James McGilchrist of Salem for permission to use a narrow strip of highway right of way approximately 125 feet long and 6½ feet wide along the westerly side of South Commercial Street (US 99E), in Salem. The Assistant Counsel advised that an agreement has been prepared in the form of a revocable permit granting Mr. McGilchrist this privilege, in which the state is fully protected. He recommended that the permit be granted. The Engineer concurred. The Commission unanimously approved the recommendation. The agreement was signed later in the session.

The Engineer presented for the Commission's consideration an agreement with the State of Washington providing for the relocation and maintenance of a water pipe line on US 101 in Pacific County, Washington, to serve the Megler ferry terminal. He stated that the Washington Highway Department plans to reconstruct the Washington Coast Highway northerly from Megler this year and that in the process of construction it will be necessary to relocate the existing pipe line. He recommended approval of the agreement

as the water pipe line is necessary to serve the ferry terminal. The Commission unanimously approved the Engineer's recommendation and signed the "Acceptance of Permit" later.

The Engineer brought up for discussion the matter of reimbursing the U. S. Reclamation Service for 50 percent of the cost of constructing certain irrigation structures on The Dalles-California Highway north of Madras, pursuant to a previous written agreement dated September 18, 1947.

He advised that by a strict interpretation of the federal law covering matters of this kind, the Bureau of Reclamation could require the state to pay the entire cost; however, it is billing the state for only one-half of the total expense, which amounts to $5550. He recommended payment of such amount. The Commission unanimously approved the Engineer's recommendation.

The Commission considered a request from Lela J. Lambert, Legislative Chairman of the Oregon Federation of Garden Clubs, that the Highway Commission's previous designation of US 99E and US 99W, between Portland and Junction City, as "Blue Star Memorial Drive" be extended to the California state line. The Engineer advised that the State of California has already designated the Pacific Highway throughout its entire length in that state as "Blue Star Memorial Drive" and that the State of Washington has plans to take similar action. He recommended a modification of the Commission's previous action so as to include the entire length of this highway in Oregon. The Chief Counsel concurred, advising that, in his estimation, that is within the intent of the Oregon Legislature when it adopted House Joint Resolution No. 18 at its 1947 session. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution marked EXHIBIT "G" which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that the condition of the Weston-Elgin Secondary Highway is such that it has been necessary to extend the effective period of the reduced load limit heretofore ordered by the Commission for this road. He advised that the present order expired on May 15 and that because of the late spring and damage that has occurred from severe frost boils he has renewed the posting for reduced loads. He requested approval of his action and recommended that the effective period of the order be extended indefinitely. The Commission approved the Engineer's recommendation and thereupon be unanimous vote adopted the attached resolution relating thereto, marked EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested confirmation of the placing of a 50 percent reduced load limit on the John Day Highway between Austin Junction, Mile Point 191.06, and Unity Junction, Mile Point 213.76, in Grant County, which he ordered on May 17. He explained that the spring thaw, in combination with the heavy loads being hauled over this section, made it necessary to reduce the load limit. The Commission confirmed the Engineer's action in this matter and thereupon by unanimous vote adopted the attached resolution

relative thereto marked EXHIBIT "I" which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer recommended that the reduced load limit heretofore in effect on the Little Butte Secondary Highway No. 270 in Jackson County be rescinded as of May 11, 1948, as the condition of the road is now such that full legal loads may be hauled over it. The Commission approved the Engineer's recommendation and thereupon adopted the attached resolution, marked EXHIBIT "J", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that a conference had been held in Salem with various representatives of the heavy hauling industry concerning the new rules and regulations adopted by the Commission on March 12, 1948, governing the transportation over state highways of overweight and over-dimension loads. He stated that as a result of the conference he wishes now to recommend two changes in the policy of the Commission as outlined in its resolution of March 12, 1948 -- 1) Lower the insurance requirements for private and contract haulers so that the limit would now be $50,000/$100,000 and $25,000 for public liability and property damage coverage, and 2) Allow Division Engineers and District Maintenance Superintendents of those divisions named in the March resolution to issue permits for widths up to 12 feet on highways or sections of highways found by the Engineer, based upon a survey, to be of a design and construction capable of accommodating such widths with safety to the traveling public.

The Engineer recommended that several other suggestions and requests of heavy haulers as set forth in his written report to the Commission dated May 20, 1948, be denied. The Commission, after discussion, approved the Engineer's recommendations and thereupon unanimously adopted the attached resolution marked EXHIBIT "K", rescinding its action of March 12, 1948, and incorporating all matters pertaining to truck movements pursuant to Section 115-393 O. C. L. A., which resolution is by this reference made a part hereof with like effect as though extended in full herein.

The Engineer presented a request from the Board of County Commissioners, Pacific County, Washington, for five passes allowing use of the Astoria-Megler ferry by the members of the Board and its clerk without payment of fee. The Commission approved the request unanimously, subject to the condition that the passes shall be issued to the members individually and shall not be transferrable. It was understood that this action is not to be considered the establishment of a precedent with respect to the issuance of passes for use of this ferry service, but is simply a courtesy extended to these public officials who are directly interested in this ferry operation,

The Engineer presented a request from Blue Gray Stages, Inc., of Aberdeen, Washington, for exemption from payment of the extra fee ordered by the Commission at its April meeting for vehicles using the Astoria-

Megler ferry service. The Commission considered that it could not grant this concession without establishing an undesirable precendent and showing favoritism and accordingly denied the request unanimously.

The Engineer presented for the Commission's consideration the advisability of sending a representative of the State Highway Department through the middle western states to interview applicants for engineering positions in Oregon, there being a shortage of engineers in this state. He advised that recently 190 inquiries and 44 applications for employment have been received from engineers of this district and gave as the feeling of the Civil Service Commission that it can not approve employment of people on the basis of their applications alone. In view thereof, and for the reason that there is no feasible way that applicants can be brought to Oregon for interview unless they are assured of employment, he recommended that a qualified person representing the Department be authorized to interview applicants at their places of residence, including Dallas, Texas; Chicago, Illinois; Denver, Colorado; Indianapolis, Indiana; St. Louis, Missouri; and Kansas City, Kansas. He suggested that Mr. Hollis W. Libby, Chief Locating Engineer, be given this assignment, which would take about two weeks' time and would cost the state about $500. Following discussion the Commission approved the recommendation unanimously.

The Commission by unanimous vote confirmed the oral authority previously given the Engineer to sell to Thomas C. O'Connor, Long Beach, Washington, for the sum of $16, a life boat salvaged from the old ferryboat "North Beach" and for which the Highway Department has no use.

The Commission considered the matter of prohibiting car parking on the shoulders of the Pacific Highway East in front of a new dance hall and an open-air theater about five miles north of Salem. The Engineer advised that this matter was called to his attention by the Deputy Superintendent of State Police who states that a dangerous condition is created by such parking. An investigation by the Traffic Engineer, he said, reveals that considerable hazard does exist which can be corrected if "no parking" signs are installed. He recommended the installation of "no parking on highway shoulder" signs between M.P. 45.47 and M.P. 45.83. The Commission approved the Engineer's recommendation and thereupon unanimously adopted the resolution which is attached hereto marked EXHIBIT "L" which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered the following requests for traffic signal installations:

1. A petition from Portland residents for a two-way "stop and go" traffic signal at the intersection of S.E. 21st Street and Powell Boulevard (Mt. Hood Highway). The Engineer advised that this is a hazardous intersection but there are many others where conditions are more acute that are not protected by traffic signals. He recommended that the petition be denied for the present but that it be given

further consideration when the more hazardous intersections have been signalized. He recalled that there had been a stop and go signal at this intersection at one time but that it had been removed or taken out of operation early in the war. He was instructed by the Commission to investigate the matter further and report the actual status of the existing signal.

2. Request of Ell M. Rostin of Tigard for the installation of a flashing red signal at the junction of the Beaverton-Aurora and Scholls Secondary Highways in the town of Progress. The Engineer advised that an investigation reveals a basic need for a signal at this location and recommended the installation of a four-way flashing red beacon at an estimated cost of $330, the funds to be taken from the 1948 Minor Betterment Budget. The Commission approved the Engineer's recommendation.

3. Request of the City Council of St. Helens and a petition of 594 citizens of this town for installation of an automatic traffic signal at the intersection of Columbia Boulevard with U. S. Highway 30 in St. Helens. The Engineer advised that an investigation reveals that this signal is not justified because the traffic is not heavy and the accident record is not bad. The proximity of a railroad crossing, he said, presents complications which would prevent satisfactory operation of the signal unless it were tied in with train movements. He pointed out that there is at the present time a flashing beacon at this intersection and that the highway at this place is now zoned for a 35-mile-per-hour speed. He recommended that the request be denied. The Commission approved the recommendation.

4. Request of the Corvallis Womens Club for a "stop and go" signal at the intersection of Third and Madison Streets, Corvallis, on the Pacific Highway West. The Engineer advised that the amount of traffic at this point does warrant a signal installation; however, there is a project pending in Corvallis which, when completed, will provide for a one-way street plan involving Third and Fourth Streets. He recommended that the signal not be installed at this time in order to give the one-way street plan a trial, it being his thought that the volume of traffic at the intersection when the one-way street plan is in operation may not justify the expense of the signal. The Commission approved the recommendation.

5. A petition from residents and business interests on Powell Boulevard in Portland for a flashing beacon installation at the intersection of 122nd Avenue and the Mt. Hood Highway. The Engineer advised that an investigation discloses that a flashing beacon should be installed at this point because of increased building activity, a school crossing, heavy traffic volume, and because of the poor accident record. He recommended the installation of a beacon flashing red on both approaches from 122nd Avenue and flashing amber on the main highway, the entire cost of which, estimated at $220, would

have to be paid by the state because it is outside the Portland city limits. The Commission approved the recommendation

6. Request made at a previous meeting by a Parkrose delegation for the installation of a traffic signal at the intersection of Sandy Boulevard and 102nd Avenue in Portland. The Engineer advised that this matter has been investigated, and it is his belief that the condition complained of will be corrected automatically upon completion of the signal installation project that is now underway between 82nd Avenue and 112th Avenue. The synchronization of these signals, he said, very likely will eliminate the basis of complaint at 102nd Avenue. He recommended that the request be denied. The Commission unanimously approved the recommendation.

The Engineer reported the need to establish a reduced speed limit on the Oregon City South End County Road which is being used as a detour for highway traffic during construction of the Oregon City-New Era Section of the Pacific Highway East. He advised that the road is quite narrow and has several sharp curves, and observations reveal that traffic is moving over it at a much greater speed than is safe. He recommended a maximum speed limit of 35 miles per hour for this section. The Commission approved the recommendation by unanimous vote and instructed the Engineer to take up the matter through the proper authorities, since this is a county road under the jurisdiction of the Clackamas County Court, which, according to the legal requirement, must make application to the State Speed Control Board for such speed restriction.

The Commission considered the adoption of a policy with respect to the sale of rock to private individuals from state-owned quarries. The Engineer advised that numerous requests for this privilege have been received from private individuals and in the past he has been very reluctant to accommodate them under the general belief that the quarries are obtained for state use only. He pointed out that when a quarry has been obtained by condemnation, the state could not, in compliance with existing laws, permit the use of materials for any purpose but road construction. He requested the adoption of a definite policy for future guidance. This matter was discussed at considerable length and as a result thereof, the Commission decided unanimously that it would be satisfactory to let anyone obtain material from its quarries or stock piles to the extent that the state's activities are not handicapped thereby, and provided material is not available from any other nearby source, and provided further that it does not place the state in the position of competing with a commercial concern. The Commission left it with the Engineer to pass on all requests for this privilege with instruction to act in accordance with his best judgment and to the state's best interests.

The Commission discussed a date for its next regular meeting and decided to hold such meeting on Monday and Tuesday, June 28 and 29, 1948, in Portland. The Secretary was instructed to make the usual arrangements for use of the Green Room in the Imperial Hotel.

A delegation from Lincoln County consisting of E. J. Calkins, County Commissioner; D. B. Ambler, County Engineer; T. S. Stansbie, Mayor or the City of Toledo; Vance Taylor, Corvallis; and John C. Kendall, attorney, Portland, representing the C. D. Johnson Lumber Corporation of Toledo, was present and urged the Commission to designate the Nashville-Orton-Siletz County Road as a state secondary highway and to improve the road to modern standards. Mayor Stansbie headed the group. He pointed out that the road is a connecting highway between the Eddyville-Blodgett and the Siletz State Secondary Highways and that its improvement is badly needed because of the heavy amount of traffic which uses it, particularly logging trucks. He advised that the present road has only a graveled surface and that its increased use by logging trucks has increased the cost of maintenance to a point beyond the financial ability of Lincoln County to keep it in proper condition. His statement was confirmed by Mr. Ambler, who added that the road now carries ten times as much traffic as it did five years ago and, notwithstanding the fact that the county is spending about half of its road funds to keep the road in condition, it is going to pieces faster than they can repair it.

Mr. Kendall stated that he represents the C. D. Johnson Lumber Corporation of Toledo which operates over this road and which is asking that a survey of this road be made and a report submitted indicating its present condition and the cost to improve it with a view in mind that the Commission will at some later date take it over as a state road. The C. D. Johnson Lumber Corporation, he said, is now building a unit of 36 houses in the area up the Siletz River and will be operating in that vicinity continuously on a sustained-yield basis, and this road is necessary to the company's operations.

Chairman Banfield advised that the Highway Commission realizes that traffic is heavy on county roads, but to establish a policy of taking over each road when the traffic becomes heavy or when counties feel that the cost to maintain their roads is beyond their financial ability to pay, is a policy that the Commission at the present time cannot adopt; anyway, the Commission is not in position today to act on the matter. He pointed out that every county in the state has similar problems, especially where there has been heavy hauling of timber, and that the Commission is not in position financially to assume these obligations because there are so many roads now on the State Highway System throughout the state which are badly in need of reconstruction and maintenance. In the further discussion of this matter, Mr. Ambler advised that insofar as the Lincoln County Court is concerned, it is asking the state to assume the obligation for improvement of the westerly end of the road between Siletz and Orton, which is now a designated Federal Aid Secondary Highway. The conference was concluded with a statement by Chairman Banfield that the Commission is not favorable to assuming jurisdiction over this road and does not wish to lead the members of the delegation to believe that it is in a position to do so; however, the Commission will instruct its Engineer to investigate that portion on the Federal Aid Secondary Highway System and report his findings, although that does not necessarily mean that the Commission intends to improve it in its next construction program. The Engineer was thereupon instructed to make such investigation.

Mrs. John Raeish, Portland, was present and discussed with the Commission her claim for royalties for the use of a relief map of Oregon constructed by her former husband, John Shaw, and herself for the State Highway Department, which map is now in the office of the State Highway Engineer. She alleged that under the terms of their contract (Miscellaneous C & A #515 in the Commission's files) they were to own exclusive rights and privileges to the mould, photographs, etc., for commercial sale for a period of ten years, after which time the rights were to be owned jointly with the state. She demanded the sum of $15,000 for her rights in the contract. The Commission referred the matter to the Legal Counsel with instructions to analyze the terms of the contract and report back to the Commission at its next meeting if the state is obligated to Mrs. Raeish in any way.

County Judge L. D. Felsheim, Coos County, and Mr. Wayne N. Woodward, Coquille, appeared before the Commission regarding Coos County's requests, made at the previous meeting, for state cooperation on the following projects:

1. Construction of a bridge across the Coquille River on a county road at Bullards. They were informed by Chairman Banfield that the Commission has not yet discussed this matter but will try to act on it before adjournment. (The Commission discussed the matter later in the day and at that time decided to cooperate with Coos County in the construction of this bridge on a 50-50 basis provided the total cost does not exceed $600,000 and provided further that the state will be obligated in no way to designate or build a highway leading to the bridge. See ahead for additional paragraph.)

2. Transfer of Federal Aid Secondary Highway funds from an approved oiling project to a proposed bridge project on the Myrtle Point County Road. The Engineer advised that the Public Roads Administration has not yet approved the transfer. Chairman Banfield indicated that the Commission would have no objection to such transfer of projects if it were approved by the Public Roads Administration.

3. Assumption by the state of the maintenance of two private approach bridges on the Oregon Coast Highway between Coquille and Bandon in consideration for which the county agrees to take over and maintain certain portions of the abandoned sections of the Cape Arago Secondary Highway. The Commission accepted the County Court's proposition by unanimous vote and instructed the Engineer and the Chief Counsel to prepare an appropriate form of agreement with the county covering the matter.

4. Proposal of American Legion Post, Coquille, regarding the widening of the intersection of Willard and Front Streets in Coquille. The Engineer advised that he is not ready to make a recommendation with respect thereto.

5. Judge Felsheim brought up for discussion the improvement of the road along the north side of Coos River, westerly from the present Enegren Ferry crossing to a place known as Graveyard Point.

He advised that the owners of property abutting on this road have petitioned the County Court to abandon it, but the Court would like to know the attitude of the Highway Commission with respect thereto before doing so, in view of the possibility that it might be needed by the state if it selects the Graveyard Point location as the site for a bridge to replace Enegren Ferry.

The Engineer advised that an investigation is being conducted for the proposed bridge to replace the Enegren Ferry and that three different locations had been considered, one of which is known as the "Graveyard" location. He suggested that it would be advisable for the county to keep the road until the Commission has taken action on the site for the proposed bridge. The Commission deferred action on the matter pending receipt of the Engineer's report.

Judge Felsheim also inquired as to the Commission's intentions regarding the improvement of the Oregon Coast Highway between Coos Bay and Coquille, which, he said, is the county's No. 1 project. He was informed by Chairman Banfield that the bids received by the Commission at this meeting for construction of the Delmar-Coaledo Section were rejected because they were too high, but the project will be re-advertised for bids as soon as possible and will include an additional one and one-half miles as originally planned. Judge Felsheim advised that Coos County will take over and assume jurisdiction of the portions of the present highway that are abandoned by the state as a result of this improvement.

A delegation composed of County Judge J. D. Burns, Gilliam County; County Judge J. M. Wilson, Sherman County; H. L. Kirkpatrick, farmer, and F. B. Mercer, businessman, both of Condon, appeared before the Commission and urged further improvements to the Wasco Secondary State Highway No. 300 between Wasco and Condon. Mr. Kirkpatrick headed the group. He pointed out that this highway westerly from Condon for a distance of about five and one-half miles is now under contract for surfacing but from that point to the top of Cottonwood Grade, the road is unsurfaced and for the most part is impassable during the winter months. He urged the Commission to authorize the surfacing of this twelve-mile section. Judge Burns also urged this improvement which he alleged was one time promised by a former Highway Commission. The Commission agreed to inspect the road on one of its trips this summer.

Judge Wilson asked the Commission to consider the re-routing of this highway so that people wanting to go to DeMoss Springs will not have to travel several miles in a round about way, through Klondike, to get there. He suggested a direct connection extending east from the town of DeMoss Springs. The Commission agreed to inspect the project on one of its trips this summer.

The Engineer reported that Mayor Frank C. Colcord, Newberg, who was to have been present at this meeting to discuss with the Commission the proposed re-routing of the Hillsboro-Silverton Secondary Highway through Newberg, cannot keep his appointment. This project was discussed briefly by the Commission but no action was taken. The Commission decided to inspect the alternate routes proposed, on one of its field trips this summer.

The Engineer brought up for discussion a request from the Oregon Motor Transport Association that Salem-Dayton Secondary Highway No. 150, throughout its entire length and that portion of Three-Mile Lane Secondary Highway No. 152 from Dayton to its junction with the Pacific Highway West, be designated as a detour route for trucks during construction of the Oregon City-New Era Section of the Pacific Highway East which is now under way. The Association considers, he said, that the detour via Oregon 215 and Oregon 211 is unsafe for heavy truck traffic because of excessive grades. He pointed out that the route suggested is now classified as a Group II Highway, however, advised that a recent investigation and trial run reveals that it is of such construction, alignment and design that it will safely accommodate vehicles of a length and weight permitted on Group I highways. He therefore recommended that it be reclassified as a Group I Highway. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution marked EXHIBIT "M", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer presented for the Commission's approval additional Minor Betterment work orders for 1948 performance, totaling $34,190, as follows:

Oil Bus Stops:

Beaverton-Hillsdale Highway in Multnomah County, oil 8 bus stops	$ 600.00
Tualatin Valley Hwy., Sunset Hwy., to Hillsboro, oil 24 bus stops	1,800.00
Tualatin Valley Hwy., Hillsboro-Forest Grove, oil 12 bus stops	900.00
Pacific Highway West in Washington County, oil 2 bus stops Avalon Park	140.00
Beaverton-Hillsdale Hwy. in Washington County, oil 8 bus stops	600.00
Total	$ 4,040.00

Shoulder Rock:

Tualatin Valley Hwy., Place 3' shoulder rock Washington County line to widened pavement at Yamhill, 7.84 miles	$ 7,000.00
Tualatin Valley Hwy., Grade, widen and place 3' shoulder rock, Yamhill to St. Joe Jct., 7 1/2 miles	13,000.00
Total	$20,000.00

(Cont.)

Grade Revision:

Revise, grade and resurface M.P. 10.77 where railroad grade crossing has been abandoned on Scholls Secondary	$ 2,150.00
Revise, grade and surface M.P. 32.40, Sunset Highway, where deep drain and tunnel have been built to correct slide	8,000.00
Total	$10,150.00

Total Additional Minor Betterment Projects for 1948	$34,190.00

He advised that all of the projects are highly desirable and are included in the 1948 budget as approved in principal by the Commission at its meeting on January 5, 1948. The Commission approved the projects and by unanimous vote authorized the Engineer to proceed with the improvements as outlined in the work orders.

NOTE:- Copies of the work orders mentioned above are on file in the office of the State Highway Commission, Salem, being "Highway Department Budget" File #2b.

The Commission had under discussion the offer of "Save the Myrtle Woods, Inc.", Portland, to present to the state as a gift, for park purposes, a forty-acre tract of land on Brummet Creek, Coos County, which contains a fine stand of virgin myrtle trees. The State Parks Superintendent, who was present, advised that the tract is a nice one but it is 25 miles from the Coos Bay-Roseburg Highway, so he could not recommend its acceptance. The Commission thereupon unanimously decided not to accept the gift and instructed the Secretary to so inform the Association by appropriate letter of thanks.

The Engineer brought up for discussion the matter of re-advertising for bids for the construction of the Coaledo-Delmar Section of the Oregon Coast Highway for which bids had been rejected on the previous day. He recommended the calling for bids on the basis of the original plan which includes an additional one and one-half miles of work and a bridge. The Commission approved the recommendation unanimously. The Engineer was also authorized to prepare plans and specifications for the improvement of a fifteen-mile section of the Willamette Highway east of Salt Creek tunnel so this project can go forward without delay when final approval by Federal officials has been given.

The Engineer reported an offer from the Dictograph Products Co., Inc., to revise and put in first-class condition the inter-office communication system now installed in the Highway Department offices. He advised that the recent moves in the State Office Building have made necessary numerous changes in the system and recommended acceptance of the company's offer to do the work for $1446.00. The Commission approved the Engineer's recommendation unanimously.

Mr. B. Frank Roehr, President, Portland Chapter, American Institute of Architects, appeared before the Commission regarding the plans for the proposed Champoeg Park memorial building. He stated that his group has inspected the site which they consider a very beautiful one, and that they have examined the plans which, in general, are satisfactory. He suggested, however, that it would be advisable to incorporate in the structure specimens of different Oregon woods to the end that it would harmonize more with the natural surroundings and would be in keeping with a building such as the pioneers might have erected in their time. Mr. Roehr further advised that his group is very much interested in this project and will contribute its services to the state, gratuitously, if it can be of any help in any way, particularly in the matter of coordination of design, suggestions as to materials, type of construction, etc. To facilitate the architects in studying the design, he said, the group would like to have a few months to investigate the various phases involved. The Commission accepted Mr. Roehr's generous offer with thanks, and instructed the State Parks Superintendent to keep in close contact with the architects' group in the further interests of this project.

The Commission had under discussion the Engineer's report dated May 20, 1948, concerning the $20 per month salary increase for state employees which was approved by the State Emergency Board on May 12, 1948, upon the joint recommendation of the State Civil Service Commission and the State Budget Director. (See copy of Engineer's report in general files for details.) He pointed out that the increase was approved as a "cost of living" increase for all employees in state service, whether classified or unclassified, excepting those employees whose salaries are established by the legislature, and that such increase becomes effective on June 1, 1948, and expires on January 1, 1949. Monthly-paid employees, he said, will receive a $20 per month increase whether they work on a 40-hour week basis or on a 48-hour week basis, and hourly paid employees will receive an increase of 11 cents per hour, which will average $20.90 per month for those employed on a 44-hour week basis and $22.88 per month for those who work a 48-hour week. The Engineer advised that approval of this increase by the Highway Commission will mean an added cost to the Highway Department of $389,191.27 for the seven-month period from June 1, 1948, to January 1, 1949. He recommended approval of the plan by the Commission as an inducement to prospective employees and to retain the services of present employees, which is difficult to do under the present salary arrangements. He also recommended that about 320 employees who, under the rules and regulations of the Civil Service Commission, are eligible for "step" increases in salary on the basis of merit, be allowed such increases as they become due in addition to the "cost of living" increase.

This matter was discussed by the Commission at considerable length during which Chairman Banfield stated that the members of the Commission want a clear understanding of the entire matter before taking action. The Engineer was thereupon instructed to render a written report on the subject which shall include, among other things, a statement as to salary increases that have been allowed employees of the State Highway Department since December, 1947, the base rate of employees in each classification as of 1940, and particularly what the "end" result is going to be and how the State Highway Department will be affected.

The meeting recessed for luncheon at 11:45 a.m. and reconvened at 2:00 p.m. in the same room with the same persons present. Mr. J. M. Devers, Chief Counsel, was also present.

A delegation from Marion and Polk Counties representing the Greater Oregon Bridge Association and the Salem Long Range Planning Commission appeared before the Commission regarding the construction of a new bridge across the Willamette River between Salem and West Salem. The group was headed by Mr. Charles A. Sprague, Salem, and included C. A. McClure, engineer for the Salem Long Range Planning Commission; Hedda Swart, Marion County Engineer; Walter Musgrave, Mayor of West Salem; Paul Wallace, Salem businessman; Earl Burk, West Salem Councilman; and Ben Maxwell, Secretary of the Greater Oregon Bridge Association. Mr. Sprague recited briefly the history of the several bridges that have been built at this location, pointing out that the first one was erected in 1886 at a cost of $50,000, the second in 1890 at a cost of $71,000, followed by the construction of the third and present bridge in 1918 at a cost of $250,000. These bridges, he stated, were paid for jointly by Marion and Polk Counties. He stated that a new four-lane bridge is badly needed and that widening of the present bridge would not suffice as it would not eliminate the bottlenecks that now exist on the approaches to the present structure. He cited the great increase in population in Salem and West Salem, the development of industry in these two areas and the fact that the bridge serves as a link between the North Santiam Highway and the coast. He presented pictures showing the congestion on the present bridge, a petition signed by approximately 1,550 residents of the vicinity, and data on traffic volume. A one-hour traffic count on May 24, 1948, he said, showed 1,500 vehicles crossing the bridge and a one-day count in February 1948 showed a traffic volume in excess of 11,000 vehicles. He suggested retention of the present bridge and construction of a second four-lane bridge, at a new location, in the Commission's three-year construction program. He estimated the cost of the new bridge between $2,000,000 and $2,800,000, depending on the location, and advised that it is not a question of location but how soon the state will build the bridge.

Chairman Banfield advised that the Commission must act on its own traffic studies and it might happen that in the final analysis the findings of the Engineer would not be to the liking of the people. The Commission, he said, has discussed the matter only in an informal manner so is not prepared to act now, but will give it serious consideration when the Engineer submits his report. He inquired if Marion and Polk Counties would participate

financially in the construction of this bridge. Mr. Sprague replied that this matter had not been discussed with the counties or with Salem or West Salem but that it was his thought that the bridge, as it is a link in a primary highway, should be the responsibility of the State Highway Commission. He stated that when negotiations had reached the point of financial cooperation they would make the necessary contacts with the cities and counties involved. The Engineer thereupon was instructed to continue his studies of the project and report his findings, which are to include information concerning the desirability and feasibility of the project and costs involved.

The Commission authorized the Engineer to attend a meeting of the President's Highway Safety Conference and a meeting of the Executive Committee of the American Association of State Highway Officials which are to be held in Chicago during the week June 13 to 20, 1948; estimated cost, $292.30. He also was authorized to attend a meeting in Washington, D. C., if necessary.

The Commission discussed dates for field inspection trips to be made during this summer and fall, and tentatively set the week beginning July 12 for the first of such trips. The Engineer was instructed to prepare an itinerary for three trips and to furnish a list of projects for inspection on each trip, including those which have been requested by the public and those which he considers are preference projects.

The Assistant Counsel, Mr. DeSouza, presented a map showing additional right of way that is needed in connection with construction of the bridge over the outlet to Devils Lake on the Oregon Coast Highway, in Lincoln County, which matter had been deferred from the previous day. The Engineer pointed out that in order to secure good alignment at this location, it is necessary to acquire small strips of property on both ends of the bridge and that the moving of a service station is the largest single item of expense. He stated that the property is needed to provide a standard width right of way, 80 feet wide, and recommended that it be purchased at the estimated cost of $14,365. The Commission approved the recommendation unanimously.

Reconsideration was given by the Commission to the request of Coos County for state cooperation in the construction of a bridge over the Coquille River at a place known as Bullards, near Bandon. Following discussion, the Commission voted unanimously to pay 50 percent of the total cost of the project provided that such total cost does not exceed $600,000 and that Coos County will reimburse the state for advancing its share of the expense at the rate of $30,000 annually until the county's share has been paid in full; and provided further, that the state's constribution shall be limited to cooperation in the bridge construction only, and that the state shall not be asked to contribute toward the cost of constructing any approach road leading to the bridge, nor shall the Commission's action, in agreeing to cooperate in the bridge construction, be considered in any way a commitment or an obligation on the part of the Commission to designate or construct a state highway leading to the bridge. The Engineer was instructed to make further studies with respect to the costs involved and report back to the Commission whether or not the bridge can be constructed for $600,000, the amount of his preliminary estimate.

The Commission discussed with the Engineer bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows, such awards having had the unanimous approval of the Commission:

"Construction of a 20' x 34' extension to a Coquille service building in Coos County. A. T. Fox, North Bend, submitted the only bid for this job at $10,362. The Commission has rejected this bid as being too high.

"Hood River Junction-Odell Creek Section of the Odell Secondary Highway in Hood River County; 1.87 miles of grading, surfacing, and oiling. Shoreline Construction Company, Salem, submitted the low bid for this work at $79,750. The second low bid was submitted by J. N. & M. J. Conley, Portland, at $80,304. Two higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when approved by the Public Roads Administration.

"Construct three bridges over Sprague River on the Sprague River Highway in Klamath County. State Project. Perkins Bros., Portland, submitted the low bid for these structures at $141,110. The second low bid was submitted by R. H. Jones, Hillsboro, at $156,830. One higher bid was received. The Commission has awarded this contract to the low bidder, Perkins Bros.

"Dry Creek-West Ranch Section of the Island City-Summerville County Road in Union County; 6.96 miles of surfacing and oiling. E. C. Hall Company, Portland, submitted the low bid for this project at $73,090. Vernie Jarl, Gresham, submitted the second low bid at $75,490. Four higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder, E. C. Hall Co., when the award has been approved by the Public Roads Administration."

The Chief Counsel presented and read aloud for the Commission's consideration, a resolution which he had prepared outlining the Commission's position in regard to the designation of Sullivan's Gulch, Portland, as the route of entrance of the Columbia River Highway into Portland from the east, and declaring such route a "Throughway". The members of the Commission expressed general approval of the provisions of the resolution with one addition to show that the Commission has no intention either to withdraw or to "withhold" funds rightfully allocated and regularly belonging to any other city or county to aid in financing the Sullivan's Gulch route. Adoption of the resolution was deferred pending a conference with a group of interested people who were present.

Mr. John M. Richardson, Manager, Portland Development Company, headed this group which included F. M. Hathaway, property owner; Wilgus Smith, realtor; Ralph W. Rasmussen, representing General Paint Corp.; Earl Nelson,

Attorney; Gordon S. Yerby, representing Howard-Cooper Corp.; and a Mr. Johnson, also of the Howard-Cooper Corp.

Mr. Richardson stated that the Portland Developement Company took an active interest in defeating, at the last election, the plan submitted at that time for financing the share of the City of Portland in the Sullivan's Gulch project and that all of the people with whom he discussed the matter declared that it was not a matter of providing funds that induced them to vote against the tax levy measure, but that they did not want the highway built in Sullivan's Gulch.

Mr. Hathaway stated that he represents residents and business firms along upper Sandy Boulevard from 52nd Street to Parkrose, all of whom definitely are opposed to the Sullivan's Gulch Highway and who contributed funds to defeat it.

Mr. Rasmussen pointed out that the highway as proposed goes through the middle of the General Paint Company's plant and will force the company to find another location, either in Portland or some other city. He advised that the company has 100,000 square feet of floor space in its building and to replace it, at $10 per square foot, would cost $1,000,000, which the company would demand for its property, and in addition thereto, the company would demand an additional amount, estimated at $500,000, to pay the cost to move machinery, etc.

Mr. Nelson stated that the amount of taxes involved to pay Portland's share of the cost of the highway is small and that the major thing which concerns them is the disruption of business. Portland, he said, is in serious competition with the state of Washington for the location of new business and, in his estimation, it would be better if the city were to protect the business it now has rather than to discourage it by taking away the business sites in Sullivan's Gulch.

Mr. Yerby declared that the project will force industry away from the railroad sidings located in Sullivan's Gulch and inquired where industry would go if forced to move.

In reply to the statements of the group, Chairman Banfield explained that the Highway Commission, in constructing highways throughout the state, finds it necessary at times to discommode individuals whether it be on farms, in homes, or in industry, and that it is the Commission's responsibility to the people of the state to provide an overall benefit to the greatest number. The State Highway Department, he said, realizes that in the near future east and west traffic in Portland must be taken care of, and the Commission feels that a highway through Sullivan's Gulch is the natural solution of the problem. To reconstruct either Sandy Boulevard or Halsey Street to fit the conditions, he said, would disrupt a far greater number of businesses than would the construction of the highway in Sullivan's Gulch; moreover, the cost to construct either of such routes would be at least $5,000,000 more than that to construct the Sullivan's Gulch route. He cited also that if either of these two alternate

routes are used, a very serious cross traffic problem will result requiring the installation of numerous stop and go traffic signals, thereby delaying traffic. In contrast with these problems, he cited the natural advantages of Sullivan's Gulch, which would have few crossings at grade, and would require but very few signal installations. For these reasons, he said, the Commission must proceed carefully and plan ahead so as to make certain that it selects the route that will provide for the most free and easy flow of traffic. Mr. Yerby inquired if the Fremont route had been considered and was informed by Chairman Banfield that such route had not been considered seriously because of its excessive cost, estimated at $40,000,000.

At the request of the Commission, the Secretary at this point read aloud a number of telegrams and letters received from the following, in which the Commission is urged to proceed with its tentative plan to construct a highway in Sullivan's Gulch:

Telegram from D. D. Koeninger, Pendleton
Telegram from William M. Oliver, President, Association of Building Owners and Managers, Portland
Telegram from Pendleton Grain Growers, Inc., Pendleton
Telegram from Igleheart Bros., Inc. Pendleton
Telegram from Smith Canning Company of Oregon, Pendleton
Telegram from Smith Frozen Foods of Oregon, Pendleton
Telegram from Apple Growers Association, Hood River
Letter from Dairy Cooperative Association, Portland
Letter from City Planning Commission, Portland
Card from P. E. Leveque, Portland

Mr. Rasmussen inquired if the Commission had considered the use of by-pass routes, particularly north of Portland via St. Johns bridge with a branch leading south of the city via McLaughlin Boulevard, thus avoiding the most heavily built up area. Chairman Banfield replied that the by-pass routes will cause as great a traffic problem as the other more direct routes. He further stated that the Sullivan's Gulch highway is not a "rush" project and that probably it would be two or three years before any business would have to move from the Gulch, which should give industry and residents affected plenty of time to adjust themselves. The immediate plan, he said, is to acquire the right of way and if satisfactory settlements cannot be reached by negotiation, then the state would condemn the needed property.

Commissioner Chandler identified his position by making the following statement:

"Mr. Chairman, I would like to have what I have to say set out fully in the minutes so that my position on this will always be in black and white. When I came on the Commission I felt it was my duty to look at highways from a state-wide policy, build those highways throughout the state that would take care of present traffic and provide highway facilities that would be adequate for future travel in the state. When this Sullivan's Gulch measure was first presented,

I spent quite a little time with our engineers going over their location and their survey and estimates of costs of the five different sections and asked their candid opinion as to what their best recommendation was to get the traffic through Portland and out to the water-level highway that is now under construction up the Columbia and I suppose will be continued until it is finally finished. Ten days ago, in company with Mr. Baldock and Mr. Williams and Mr. Boardman, we left The Dalles early in the morning and leisurely inspected the entire route of the Columbia River Highway from The Dalles right into Portland. We inspected the parks and waysides at the same time. We came in over Sandy Boulevard through Parkrose and inspected the work that is being carried on out there at the moment. Then we personally inspected the route from the east end of Burnside Bridge on up through the Sullivan's Gulch, and, taking all factors into consideration, which, I can assure you, have had a great deal of study and thought, not only for present needs but for future needs and from a standpoint of the entire State of Oregon, ignoring the primary benefits to Portland and Multnomah County, it is my considered opinion that this Commission would be lax in its duty as a Commission if it did not preserve for the people the route up Sullivan's Gulch to tie into the Columbia River Highway at Troutdale, and with that I make a motion that the resolution be adopted."

Commissioner Schaupp made known his attitude with the following statement:

"Mr. Chairman, I had occasion to be in New York last fall and I was surprised to know what made New York a real city. They have spent millions of dollars on their throughways, in preserving their rights of way, roads into the city. I had occasion to go over all those routes, and I have come to the conclusion that from a question of transportation we must look far into the future. Now, one gentleman here stated that the people on Sandy Boulevard were almost unanimously against the Sullivan Gulch road. I don't know if the question was whether or not they wanted traffic to come down Sandy Boulevard and that Sandy Boulevard would be the main entrance, but from all of the reports made by the engineers, it is not only not feasible, but very expensive to construct or reconstruct Sandy Boulevard for an entrance into Portland. In going over the various projects for the past two years, and in studying the various entrances, I am struck very much with the entrance afforded by Sullivan Gulch. It is an entrance that looks to me to be a natural entrance. I just can't get away from the proposition that Sullivan Gulch affords a speedy entrance. I had occasion to talk to some people last night who were opposed to the Sullivan Gulch route and they said they understood in this election that there would be no entrances into or exits from Sullivan Gulch, that it was to be a throughway and nobody could get off or on, and if they had known they could get off and on that highway in so many places, they would have voted for it. I made a statement yesterday with respect to the allocation of funds for this road. I would like to incorporate into my statement with respect to use of funds that I am impressed also in this manner: This doesn't mean that you are going to disrupt business

out there immediately. It is giving the people who are in the manufacturing business along that route probably two or three years to get ready for it. I think that proposition should be appreciated by those people. It doesn't mean that this highway is going to be constructed immediately. It means it is going to be constructed as the funds are available. It seems to me that to preserve this entrance into Portland for the people of the state is a duty that falls on the Highway Commission, and I would be very loathe to shirk that duty because I think it is a duty and so far as I am concerned, I believe it is the duty of the Highway Commission to preserve Sullivan Gulch as an entrance into Portland, and I vote for the adoption of the resolution."

Chairman Banfield then stated, "Gentlemen, I declare the resolution passed unanimously."

(Note: The resolution referred to in the above discussion is attached hereto, marked EXHIBIT "N," and by this reference is made a part hereof to the same effect as though copied in full herein.)

Mr. Ralph D. Lloyd, a large property holder in Sullivan's Gulch, was also present in the interests of this project. He informed the Commission that, while he did not wish to see Sullivan's Gulch destroyed, as it has been developed at considerable expense, nevertheless, he recognizes that progress must come and hopes that the plans can be worked out so that the commercial value of the Gulch will not be entirely destroyed. He further stated that he realizes that an adequate highway route into Portland is the key to the handling of traffic in the Columbia River valley and that Portland is the gravity center of the whole set up, wherefore, he is in favor of the Sullivan's Gulch route. Chairman Banfield assured Mr. Lloyd that the Commission is very appreciative of his attitude.

The matter of constructing a Highway Department office building in Salem was brought up for discussion. The Engineer was instructed by the Commission to submit a complete detailed written report on this subject for consideration by the Commission at its next meeting.

The Commission considered, approved and signed agreements, etc., as follows:

Agreement with C. J. Wojohn permitting him to use park property in Short Sand Beach State Park, Tillamook County, for road purposes.

Supplemental agreement with Green Mountain Lumber Company covering extension of the privilege heretofore granted to company to maintain a logging road across Van Dazer Forest Corridor, Lincoln County.

Permit agreement with the State Board of Forestry providing for construction and maintenance of a road through state highway property on Sexton Mountain, Josephine County.

1110

Agreement with the Southern Pacific Company covering installation of a traffic signal at the crossing of the Southern Pacific Company tracks and the Crater Lake Highway near Eagle Point, Jackson County.

Modification of project agreement covering increased apportionment of Federal funds in connection with the Front Avenue Project, Portland.

Agreement with Harry I. Hamilton Company for reconstruction of the center pier on the South Dillard Bridge across the Umpqua River on the Pacific Highway, in Douglas County.

Permit authorizing James McGilchrist to use narrow strip of highway right of way along South Commercial Street (Pacific Highway East) in Salem Heights Addition to the City of Salem, Marion County.

"Acceptance of Franchise" whereby the Commission accepts from the Washington Highway Department a permit to construct, operate, and maintain a water pipe line on a portion of Washington Primary State Highway No. 12, in Pacific County, Washington, to serve the Kegler Ferry Terminal.

Assignment by R. C. Moulton of his interests in his agreement with the State Highway Commission for removal of burned down timber along the Sunset Highway, in Clatsop County, to Ole Nygaard.

Agreement with State Game Commission providing for the installation of a fish screen on the south end of a culvert north of Multnomah Falls on the Columbia River Highway, Multnomah County.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:45 p.m.

Chairman

State Highway Engineer

EXHIBITS "A" through "H"

Minutes of May 24 and 25, 1948

EXHIBIT "A"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

EXHIBIT "B-1"

Minutes of May 24 and 25, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Oregon Coast Highway (State Highway No. 9) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of the Oregon Coast Highway extending from Delmar to China Camp Creek, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for right of way and other purposes; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor; and

(Cont.)

EXHIBIT "B-1"(Cont.)

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Oregon Coast Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of the Oregon Coast Highway known and designated as the Delmar-China Camp Creek Section. (*)

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, which are made part of this resolution. (*)

3. That both of said real properties are needed and the acquisition of the same is necessary for the specific purpose stated in the description of each ownership.

4. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described on the attached sheets, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the respective parcels of real property described on the attached sheets and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission. (*)

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and

(Cont.)

EXHIBIT "B-1" (Cont.)

said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same, and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

9. The real properties sought to be acquired are described on the attached sheets, consisting of two pages, on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties, said parcels of real property being otherwise identified as Parcels Nos. 1 and 2. (*)

10. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of May, 1948.

FOOTNOTE:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 106, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway (State Highway No. 1) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, part of the federal highway system; and

WHEREAS, for the purpose of widening the right of way so that a better alignment may be made possible for the construction of a more adequate crossing to serve the traveling public at the Tolo Overcrossing in Jackson County it is necessary that real properties be acquired for right of way purposes; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor; and

WHEREAS pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

(Cont.)

EXHIBIT "B-2" (Cont.)

WHEREAS, the Pacific Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheets are needed and required for use in connection with the widening and improvement of the section of the Pacific Highway known and designated as the Tolo Overcrossing Section. (*)

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, which are made part of this resolution. (*)

3. That both of said real properties are needed and the acquisition of the same is necessary for the specific purpose stated in the description of each ownership.

4. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described on the attached sheets, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the respective parcels of real property described on the attached sheets and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission. (*)

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase donation, agreement, or by the exercise of the power of eminent domain.

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and

(Cont.)

directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

9. The real properties sought to be acquired are described on the attached sheets, consisting of two pages, on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties, said parcels of real property being otherwise identified as Parcels Nos. 1 and 2. (*)

10.. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of May, 1948.

FOOTNOTE:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 107, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part hereof with like effect as though extended in full herein.

EXHIBIT "B-3"

Minutes of May 24 and 25, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Oregon Coast Highway (State Highway No. 9) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of maintaining said highway and reconstructing portions thereof in order to adequately serve the traveling public, it is necessary that real properties be acquired for the purpose of providing a location and facility for the appropriation, acquisition, and manufacture of roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to acquire property for such purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

(Cont.)

EXHIBIT "B-3" (Cont.)

1. That the Commission does hereby find and declare that the following described property is needed and required as a storage site and for a plant set-up in connectionn with the appropriation, acquisition, and manufacture of roadbuilding materials required and needed for the maintenance and reconstruction of the Euchre Creek-Gold Beach Section of the Oregon Coast Highway, which said property is described as follows, to-wit:

A parcel of land lying in the northwest quarter (NW¼) of Section 16, Township 36 South, Range 14 West, W.M., Curry County, Oregon, the said parcel being described as follows:

Beginning at a point on the south line of the county road, said point being North 89° 36' East 1325.8 feet and South 0°40' West 79.4 feet from the northwest corner of Section 16; thence south 0° 40' West 563.5 feet to the north bank of Rogue River; thence South 76°43' West along the north bank of said river 226.6 feet; thence North 0° 40' East 650.1 feet to the south line of the county road; thence along said south line of the county road South 84° 52' East 107.5 feet and South 77°29' East 115.4 feet to the point of beginning.

The parcel of land to which this description applies contains 3.08 acres.

Together with all the tide lands of the Rogue River fronting and abutting thereon.

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

5. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of May, 1948.

EXHIBIT "B-4"

Minutes of May 24 and 25, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Highway Commission is authorized by law, when acquiring real property for right of way purposes, to acquire fee title to the real property sought to be acquired, or any interest therein, and the Commission is also authorized, when acquiring real property for such purpose, to acquire all right of access from the abutting property to the highway proposed to be constructed; and

WHEREAS, the State is now engaged in the reconstruction of a highway known as the Pacific Highway, on which highway the Commission has heretofore, by resolution duly and regularly adopted and made a part of its official records, authorized the acquisition of all right of access from abutting lands to said highway and the right of way thereof; and

WHEREAS, the Commission has heretofore acquired from Southern Pacific Company a parcel of land abutting upon Lot 3 and the east 15 feet of Lot 4, Block 2, Fairmount Addition to the City of Eugene, in Lane County, Oregon; and

WHEREAS, the property acquired from Southern Pacific Company was, prior to its acquisition by the Commission, owned by the Southern Pacific Company and used by it as and for a right of way for a common carrier railroad; and

(Cont.)

EXHIBIT "B-4" (Cont.)

WHEREAS, the Commission is of the opinion that the owners of Lot 3 and the east 15 feet of Lot 4, Block 2, Fairmount Addition to the City of Eugene, have no right of ingress and egress to or from the property abutting said lot to the north and formerly used as railroad right of way, but that the owners of said property appear to claim and purport to claim some right of ingress and egress to and from said property and have refused to waive and relinquish such right or rights as they may have or claim to have; and

WHEREAS, J. J. Chisholm and Mae Chisholm, husband and wife, and Nellie Chisholm are the owners of said Lot 3 and the east 15 feet of Lot 4, Block 2, Fairmount Addition to the City of Eugene; and

WHEREAS, it is the judgment of the Commission that the rights, if any, of said parties to access to and from the property heretofore acquired from Southern Pacific Company and abutting their property to the north and upon which the Commission proposes to construct a modern highway facility to adequately serve the transportation needs upon the Pacific Highway should be acquired;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that all right of access to the Pacific Highway from the real property abutting said highway and described as Lot 3 and the east 15 feet of Lot 4, Block 2, Fairmount Addition to the City of Eugene, if in fact any such right of access exists, should be acquired and all access to and from the said property and the Pacific Highway should be prohibited.

2. That if a relinquishment and waiver of the right of access, if in fact any such right exists, cannot be acquired by agreement, then J. M. Devers, as Chief Counsel for the Commission, is authorized to institute and prosecute to a final determination such action or proceeding as may be necessary to acquire and vest in the public the said access rights, or claimed access rights.

3. That, in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said access rights, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said access rights as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

4. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fourth day of May, 1948.

EXHIBIT "B-5"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Willamette Highway (State Highway No. 18) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of the Willamette Highway extending from Lost Creek to Lowell, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for right of way and other purposes; and

(Cont.)

11928

EXHIBIT "B-5" (Cont.)

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways, and is authorized to acquire the necessary rights of way therefor; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes all right of access from abutting property to the highway; and

WHEREAS, the Willamette Highway, as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the property described on the attached sheet, which description is made a part of this resolution, is needed and required for right of way purposes in connection with the reconstruction and maintenance of the Lost Creek-Lowell Section of the Willamette Highway, which property is owned by Harry H. Wade and Rose Wade. (*)

2. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

3. The Commission does hereby further find and declare that, in addition to the acquisition of the real property described on the attached

(Cont.)

EXHIBIT "B-5" (Cont.)

sheet, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting property to the parcel of real property described on the attached sheet and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission. (*)

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcel of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement can be reached, then it is hereby further ordered that the said J. M, Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

6. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein, as in his judgment may be for the best interests

of the State, the State Highway Commission, and/or the defendant property owners.

7. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of May, 1948.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 110, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

14971

EXHIBIT "C"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws, 1943 as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Aumsville	$1,043.37
Aurora	1,039.09
Barlow	222.36
Bay City	2,300.53
Donald	795.35
Echo	1,941.34
Falls City	3,057.40
Garibaldi	3,844.20
Corvais	1,419.66
Island City	756.87
Madras	3,399.49
Monroe	1,329.86
Nohalem	1,056.19
Paisley	1,013.43
Philomath	3,745.85
Talent	1,629.19
Willamina	3,788.61

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Aumsville - All city streets

Aurora - Liberty Street, Bobs Avenue, 2nd Street, 3rd Street, 4th Street

Barlow - Main Street, Maple Street, First Street, Second Street

(Cont.)

1 19772

EXHIBIT "C" (Cont.)

Bay City - First Street, Second Street, Fourth Street, Fifth Street, Sixth Street, Seventh Street, Ninth Street, Thirteenth Street, Fifteenth Street, Hare Street, Warren Street, Hendricks Street, High Street, Ocean Street, Pacific Street, Main Street, Trade Street, "A" Street, "C" Street, "D" Street, "E" Street, Portland Avenue, Seattle Avenue, Union Avenue, Tillamook Avenue, McCoy Avenue, Williams Avenue, Spruce Street, Salmon Street, "B" Street

Donald-Crissell Street, Feller Street, Williams Street, Ehlen Street, Mathieus Road, Oak Street, Cone Street, Rees Street

Echo - Garden Street, Bonanza Street, Buckley Street, DuPont Street

Falls City - North Main Street, First Street, Pine Street, Mill Street Fairoaks Road, Wood Street, Alan Street, 5th Street, 6th Street, South Side East Avenue, Chamberlain Street, West Boulevard, Terrace Street, Fairview Avenue, Alley off Parry Road

Garibaldi - Garibaldi Avenue

Gervais - 5th Street

Island City - "C" Street

Madras - 4th Street, 7th Street

Monroe - Railroad Street, Main Street, Howard Street

Nohalem - 9th Street, Tohls Avenue, "I" Street

Paisley - Main Street

Philomath - All City streets

Talent - Gibson Street, "I" Street, Wagner Avenue, Old Pacific Highway

Willamina - James Street, Cherry Street, "B" Street, "D" Street, Churchman Street, 1st Street, Baker Street, Brown Street, Franklin Street, "C" Street, 4th Street, Gentry Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of 24th day of May, 1948.

1 1973

EXHIBIT "B"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws, 1943 there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Amity	$1,093.06
Glendale	1,117.13
Halsey	611.71
Imbler	365.02
Island City	354.99
Maupin	535.50
Oakland	1,189.33
Sandy	1,323.71
Scappoose	1,006.82

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Amity - Oak Street, Woodson Street, Gotchell Street, Sherman Street

Glendale -Pacific Avenue, Molly Street

Halsey - 5th Street West, 4th Street West, 3rd Street West, 1st Street West, 1st Street East, "C" Street West, "D" Street West, "F" Street West, "G" Street West, "H" Street West, "I" Street West, "G" Street East, "O" Street, "D" Street East

Imbler - 2nd Street, 3rd Street, Main Street, 5th Street, 6th Street 7th Street, Esther Street

Island City - "C" Street

Maupin - Grant Street, Dufur Street, 4th Street, 5th Street, 6th Street

Oakland - Oak Street, 3rd Avenue

(Cont.)

1-1971

EXHIBIT "E" (Cont.)

Sandy - Hood Avenue, Pleasant Avenue, Strauss Avenue, Cherry Avenue.

Scappoose - West Street and six un-named side streets, Casey Avenue, Williams Avenue, 3rd Street, 2nd Street, Maple Avenue

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Maupin on March 12, 1947 and approved by the Highway Commission on April 23, 1947, shall be canceled, in accordance with the request of the City of Maupin on file in the records of the State Highway Department, and Resolution Forms 1 and 2 adopted by the City Council on April 14, 1948 be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 24th day of May, 1948.

EXHIBIT "E"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of state highways, to-wit:

McMinnville-Newberg Section of the Pacific Highway West, in Yamhill County

Great Northern Railway Crossing-Merrill Section of the Klamath Falls-Malin Highway, in Klamath County

Odell Secondary Highway in Hood River County

Fir Grove School-Benton County Line Section of the Albany-Independence County Road, in Polk and Benton Counties

and in connection therewith to prepare maps showing the route and location of said sections of highways and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map file Nos. 3B-24-22; 5B-8-23; 6B-15-1; 6B-27-9; 6B-26-20; and 6B-24-19; respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of May, 1948.

1 1077.

EXHIBIT "F"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2774 with Tom Lillebo for construction of the Fuller and Ojalla Bridges over the Siletz River on the Siletz Secondary Highway, in Lincoln County; completed January 26, 1948

Contract No. 2802 with Angelo Doveri for widening the Altamont Canal Bridge on The Dalles-California Highway, in Klamath County; completed January 14, 1948

Contract No. 2844 with R. A. Heintz-Construction for grading and topping on the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County; completed April 13, 1948

Contract No. 2880 with J. P. Britton & Co. for construction of the Buck Hollow Bridge on the Sherars Bridge Secondary Highway, in Sherman County; completed January 30, 1948

Contract No. 2912 with Albina Engine & Machine Works, Inc. for construction of the ferryboat "M. R. Chessman"; completed April 21, 1948 (*)

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

FOOTNOTE: (*)

This acceptance does not waive any rights which the state might have under the 90-day guarantee period called for in the specifications in Article 1.8.10 on Page 25.

EXHIBIT "G"

Minutes of May 24 and 25, 1948

R E S O L U T I O N

WHEREAS, in recognition of the service and sacrifice made by the service men and women in World War II and in response to a resolution enacted by the legislative assembly of the State of Oregon when in regular session in 1947, the Commission adopted a resolution by which there are designated as Blue Star Drive the Pacific Highway East and the Pacific Highway West from the Oregon-Washington line to the junction of said highways at Junction City, Oregon; and

WHEREAS, the members of the Oregon Federation of Garden Clubs have urged that the resolution adopted by the Oregon Legislature be given an interpretation which will authorize the designation of the Pacific Highway from the Oregon-Washington state line to the Oregon-California state line as the Blue Star Drive in Oregon; and

WHEREAS, it is the opinion of the Commission that the resolution adopted by the legislature permits of a dual interpretation or construction, one of which authorized the designation of the units of the Pacific Highway defined as Pacific Highway East and Pacific Highway West, and the other of which constructions authorized the designation of the Pacific Highway from the Oregon-Washington state line to the Oregon-California state line as the Blue Star Drive; and

WHEREAS, it is the purpose and decision of the Commission to give the greatest possible public recognition and show all possible public appreciation of the service performed and the sacrifices made by those who served in World War II;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the Pacific Highway East and the Pacific Highway West from the Oregon-Washington state line to the junction of said highways at Junction City, and the Pacific Highway from said Junction City to the Oregon-California state line be and said entire highways shall be and the same hereby are designated and hereafter shall be known as the Blue Star Drive.

2. That said Blue Star Drive shall, in recognition of those who did so much for the homeland and for the world, be appropriately marked with suitable tablets and ornamentations to give life and perpetuity to this resolution and its purpose.

3. That the Engineer be and he hereby is instructed to prepare and bring to this Commission for consideration designs of tablets and ornamentations and upon selection and approval of the type, design, number and location of tablets and ornamentations, then said Engineer is hereby instructed to erect and thereafter maintain the same.

4. This resolution shall be deemed to amend, supplement and where inconsistent, rescind the provisions of the resolution adopted by this Commission on the twelfth day of March, 1948.

5. That this resolution shall be entered in the minutes and records of the Commission as of the twenty-fifth day of May, 1948, and a true copy thereof filed with the Secretary of State.

1 1078

EXHIBIT "H"

Minutes of May 24 and 25, 1948

R E S O L U T I O N

WHEREAS, the State Highway Commission at a meeting held on the twenty-fifth day of November, 1947, adopted a resolution and entered an order reducing the maximum weight of loads transported over the Weston-Elgin Secondary State Highway No. 330, which resolution and order was to be in effect during the spring months or during the period from February sixteenth to May 1, 1948; and

WHEREAS, subsequent to the adoption of said resolution; to wit: on the thirtieth day of December, 1947, the Commission adopted an amendatory resolution by which the period of said original resolution was extended; and

WHEREAS, the Engineer has reported that present conditions which prevail with respect to the Weston-Elgin Highway, and which conditions are due to the late spring and the damage which has resulted from severe frost action, necessitate the continuance of said load limit beyond the date fixed in said original and said amendatory resolution; and

WHEREAS, it is the judgment of the Commission that public interests warrant and will be served by a continuance of said load limit restriction for an indefinite period;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That it is hereby ordered that the order of this Commission made on November 25, 1947, as amended, by which the maximum weight of loads transported over the Weston-Elgin Secondary State Highway No. 330 was fixed at fifty percent of the maximum allowed by law, shall continue and be in effect until otherwise modified or rescinded by order of this Commission.

2. That a certified copy of this resolution and order be given to the County Clerk of Umatilla County, a like copy to the County Clerk of Union County, and a like copy to the Superintendent of State Police.

3. That it is further ordered that the Engineer be and he hereby is instructed to post or cause to be posted a notice in a conspicuous manner and place at each end of the above named highway and at important or strategic crossroads entering said highway advising the limitations, prohibitions and regulations of traffic as fixed and determined in this order.

4. Dated this 25th day of May, 1948.

EXHIBIT "I"

Minutes of May 24 and 25, 1948

ORDER REDUCING MAXIMUM LOAD LIMIT ON THE JOHN DAY HIGHWAY NO. 5

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

JOHN DAY HIGHWAY NO. 5, between Austin Junction (M.P.191.06) and Unity Junction (M.P.213.76), in Grant County.

AND WHEREAS, the above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highway during the spring months when the frost is leaving the ground, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced during such period;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon said road during the spring months shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said road was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highway that the maximum total weight of load and vehicle which shall be permitted upon said road during the spring period commencing May 17, 1948, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the entire length of the following highway, to wit:

JOHN DAY HIGHWAY NO. 5, between Austin Junction (M.P.191.06) and Unity Junction (M.P.213.76), in Grant County.

(Cont.)

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the said highway at contact with the tread of the wheels of any one axle of a vehicle exceed fifty (50) percent of the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O.C.L.A., shall be in full force and effect from the 25th day of March, 1948, until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highways, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Grant County and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this twenty-fifth day of May, 1948.

EXHIBIT "J"

Minutes of May 24 and 24, 1948

RESOLUTION LIFTING REDUCED LOAD LIMIT ON

THE LITTLE BUTTE SECONDARY HIGHWAY No. 270

WHEREAS, on the 19th day of April, 1948, at a meeting of the Oregon State Highway Commission, a majority of members being present and participating, the said Commission passed and adopted a resolution reducing the maximum load limit on certain state highways, including the following highway, to wit:

LITTLE BUTTE SECONDARY HIGHWAY No. 270, in Jackson County

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

LITTLE BUTTE SECONDARY HIGHWAY NO. 270, in Jackson County

be and the same hereby is rescinded and cancelled as of the 11th day of May, 1948, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerk of Jackson County, in which county said highway is located, and the Superintendent of the Department of State Police for his information.

Dated this twenty-fifth day of May, 1948.

1198?

EXHIBIT "K"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, the Commission is given authority under Section 115-393, O.C.L.A., to grant written permits for the movement of vehicles, articles, property or things having a combined weight in excess of statutory restrictions of a size not permitted under existing statutory restrictions, and

WHEREAS, modern industry has produced, and is continuing to produce, and industries are already using equipment, commodities, property and articles of a weight, type and size which can not be transported over the highways of this State under existing statutory limitations, and

WHEREAS, a limited number of sections of Oregon highways are so designed and constructed that loads in excess of statutory limitations, both as to weight and dimensions, may, under certain conditions, be transported without damaging such sections of highways and with a minimum of hazard to the motoring public, and

WHEREAS, frequent requests are made to the Commission for permission to move equipment, commodities and articles having a weight and dimension in excess of that permitted under existing statutory limitations, and it is desirable, and in the best public interest, to facilitate the movement of such equipment, commodities and articles in cases where the movement is proposed on sections of highways which will permit such movements, and where the hazard to the motoring public is at a minimum, and

WHEREAS, the Commission is of the opinion that it is feasible and practical to delegate to the State Highway Engineer, the Second Assistant Highway Engineer, and the Director of Permits, authority to issue permits under Section 115-393, upon certain terms and conditions, and when certain facts are found to exist, and

WHEREAS, the Commission is of the opinion that it is practical and feasible to delegate to certain personnel of the Commission, hereinafter named, the authority to issue permits under Section 115-393, under certain conditions and when certain facts are found to exist, and

WHEREAS, the Commission believes that the best public interest will be served in making a delegation of authority under terms and conditions hereinafter stated,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, acting pursuant

(Cont.)

EXHIBIT "K" (Cont.)

to the authority of Section 115-393, O.C.L.A., and not otherwise as follows:

1. That no permit shall be issued under the provisions of Section 115-393, unless and until there is delivered to the Highway Department a written application for a permit upon the form attached hereto, marked Exhibit "A" and by this reference made a part hereof. (*)

2. That any permit issued pursuant to the provisions of Section 115-393, shall be in the form attached hereto, marked Exhibit "B" and by this reference made a part hereof; that said Exhibit "B" is hereby adopted as the form of a permit to be issued under the provisions of Section 115-393, and no permit shall be issued on any other form, nor shall the printed form, as attached, be changed in any manner except upon the express direction of the Commission. (*)

3. That but one permit shall be issued to a given permittee for the purpose of facilitating the movement of a given vehicle, article, property or thing, regardless of whether such movement would be in excess of statutory limitations as to width, length, height or gross weight, or any combination.

4. That when the State Highway Engineer, Second Assistant State Highway Engineer, the Director of Permits, or the personnel hereinafter named in paragraphs 10 and 11, find that the proposed movement is to be made over a highway classified as either a Group 1 or Group 2 highway, as set forth under the resolution of the Commission, dated July 21, 1947, the amendmentof said resolution dated December 29, 1947, and any further action of the Commission, they are authorized to issue a permit for a movement, subject to the limitations hereinafter stated, having weights not in excess of the following, to-wit:

80,000 pounds maximum gross weight,
19,000 pounds on any single axle,
37,000 pounds on any set of tandem axles.

$W = 1000 \times (L+40)$ for any group of axles spaced more than 18 feet apart.

$W = 850 \times (L+40)$ for any group of axles spaced 18 feet or less apart.

5. The granting of a permit shall be conditioned upon a finding by the State Highway Engineer that the specific section of highway, the specific bridges, or other structures are in a structural condition and of a design which will permit such movements. In the

(Cont.)

EXHIBIT "K" (Cont)

event the State Highway Engineer shall find that a specific section of highway, a specific bridge or other structure has developed a weakness, or for some other reason, such section, bridge or structure will not safely permit such weights, he is hereby directed to reduce the maximum weights provided in any permit, accordingly.

6. On all highways, other than those set forth as Group 1 and Group 2 highways, under the Commission's resolutions above referred to, the maximum weights to be provided in any permit shall, subject to the maximum hereinabove stated in paragraph 4, be based upon the recommendation of the State Highway Engineer. When the State Highway Engineer finds that the weight of any given movement is not more than the maximum stated in paragraph 4, and can be moved with safety upon highways other than Group 1 and Group 2 highways, then the State Highway Engineer, the Second Assistant Highway Engineer and the Director of Permits, and only these officials, are permitted to issue a permit under Section 115-393.

7. No permit shall be issued unless and until the permittee shall have furnished to the Department satisfactory evidence that he has procured and has in full force and effect, a policy, or policies, of liability insurance, including property damage, in an insurance company duly qualified and and licensed to do business in the State of Oregon, in amounts not less than those hereinafter set forth. Each of said policies shall name as assureds, the the State of Oregon, by and through its State Highway Commission, and its officers, agents and employees, jointly and severally. The amounts of said insurance shall be not less than the following:

(a) In case the permittee is a contract (for hire) hauler, the liability insurance shall be in the amount of $25,000 property damage and $50,000 - $100,000 public liability.

(b) In the case of private haulers (hauling for themselves) other than ranchers and farmers, the liability insurance shall be in the amount of $25,000 property damage and $50,000 - $100,000 public liability.

(c) For ranchers or farmers transporting their own equipment, $10,000 property damage and $10,000 - $20,000 public liability.

(d) Log and lumber carriers, and moving vans, $25,000 property damage and $50,000 - $100,000 public liability.

8. No permit shall be issued unless and until the permittee shall furnish to the Commission an indemnity bond, as provided for in Section 115-393, or in lieu of such bond, a certified check or cash in amount equal to the penal sum of the bond, as follows:

(Cont.)

EXHIBIT "K" (Cont.)

(a) Contract haulers, - $10,000
(b) Private haulers, other than ranchers or farmers - $10,000
(c) Ranchers or farmers, - $1,000
(d) Log and lumber carriers, and also moving vans, - $10,000

The bond shall be in the form attached hereto, marked Exhibit "C" and by this reference made a part hereof. (*)

9. Each and all the permits issued shall contain the provision that the permit shall be null and void for non-compliance with any of the descriptions, terms or conditions printed or written in the form of permit.

10. Under the direction of the State Highway Engineer and subject to the conditions hereinabove set forth, and also as hereinafter set forth in paragraph 12, Maintenance Superintendents of the following Districts, and in their absence, District Maintenance Officemen therein, shall have authority to issue permits for movements within the limits of their respective Districts, and not otherwise:

2-A Astoria	4-B Redmond
2-C Corvallis	4-C Klamath Falls
3-A Eugene	5-A John Day
3-B Coquille	5-B Pendleton
3-C Grants Pass	5-C Baker
4-A The Dalles	5-D Burns

11. Under the direction of the State Highway Engineer, Division Engineers, Acting Division Engineers, and in their absence, Assistant Division Engineers, and in their absence, the Division Office Engineers in the following Divisions shall have authority to issue permits, subject to the foregoing conditions, and subject also to the conditions of paragraph 12, and for movements within their respective Divisions, and not otherwise:

Division 3, Roseburg, Oregon
Division 4, Bend, Oregon
Division 5, LaGrande, Oregon

12. District Maintenance and Division personnel, as set forth in paragraphs 10 and 11 above, shall have authority to issue permits on Group 1 and Group 2 highways, only, provided, however, that they shall not have authority to issue permits upon the section of the Columbia River Highway between the City of Portland and the City of The Dalles. The maximum weight and dimensions which may be permitted in permits issued by District and Division personnel, shall be as follows:

(a) Weight. Maximum weights shall be subject to the limitations set forth in paragraph 4 of this resolution.

(b) Overheight. No permit shall be issued in excess of the clearance limits allowable for all structure as shown on "vertical clearance map" of the State highway system; provided, however, that no permit shall be issued for a height in excess of six inches less than the minimum vertical clearance on the route over which a movement is to be made.

(Cont.)

EXHIBIT "K" (Cont.)

(c) Overwidth. No permit shall be issued permitting a width in excess of ten feet six inches; provided, however, that upon highways or sections of highways found by the Engineer, based upon surveys, to be of a design and construction which will accommodate with reasonable safety to the traveling public, movements having widths in excess of ten feet six inches, permits may be issued for movements having widths up to the maximum found by the Engineer, but in no event, in excess of twelve feet.

(d) Overlength. No permit shall be issued permitting a movement having an overall length of more than fifty-five feet on Group 1 highways, or not more than fifty feet on Group 2 highways.

13. All permits providing for overall height, width or length in excess of those set forth in paragraph 12 above, shall only be issued by the State Highway Engineer, Second Assistant State Highway Engineer or the Director of Permits.

14. That each and all of the terms and conditions set forth in the form of permit attached hereto as Exhibit "B", shall be and are hereby adopted as regulations and requirements of the Commission (*)

15. If at any time, or under any condition, the State Highway Engineer, the Second Assistant State Highway Engineer, the Director of Permits, any Division Engineer, Acting Division Engineer, Assistant Division Engineer, District Maintenance Supterintendent or Staff Engineer of the Department shall be of the opinion that a given movement is unduly hazardous to the motoring public, or is not being made according to the terms and conditions of any permit issued, or can not be made with safety to highway facilities and structures, they are hereby directed and authorized to forthwith stop such movements and take all necessary, proper and reasonable steps to correct the condition and minimize and alleviate the hazard to the motoring public, and to State highway facilities and structures.

16. The resolution of the Commission, dated March 12, 1948, and appearing as Exhibit "P" on pages 14786 to 14790 of the Minutes of the March, 1948, meeting of the Commission, be and the same hereby is rescinded; provided, however, that said resolution shall continue in full force and effect so far as existing permits, insurance and claims are concerned, it being the intention of the Commission to merge said resolution into the instant resolution.

This resolution shall be entered in full in the records and minutes of the Commission, as of May 25, 1948 .

FOOTNOTE: (*)

The exhibits mentioned in the above resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Item No. 6, under the heading "Special Matters" and said exhibits by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "L"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, the Pacific Highway East is one of the major state highways and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that at a point approximately five miles north of the corporate limits of the City of Salem there is maintained a dance hall on real property abutting on said highway, which establishment on certain nights of the week is patronized by a large number of people, many of whom park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, there also has been constructed on real property adjacent to the said highway near the aforementioned dance hall an outdoor theater which in the opinion of the Commission will likewise invite our cause indiscriminate and extended parking of motor vehicles on the highway right of way; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Commission a hazard not only to through traffic but to the owners and occupants of the parked cars is created; and

WHEREAS, in the opinion of the Commission public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations by members of its staff, that the parking of motor vehicles along Pacific Highway East between Mile Post 45.47 (Engineer's Station 213468) and Mile Post 45.83 (Engineer's Station 194468) north of the City of Salem, in Marion County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked cars.

2. That in the opinion of the Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of cars and at the same time pro-

(Cont.)

EXHIBIT "L" (Cont.)

vide the degree of safety and convenience which in the opinion of the Commission should be provided the motoring public.

3. That the parking of motor vehicles on the right of way of said highway within said termini be and the same hereby is prohibited.

4. That the Engineer be and he hereby is instructed to erect at the said termini, and at such points between said termini as in the judgment of the Engineer are necessary to accomplish the purpose of this resolution and the action of the Commission as here declared, "no parking on highway shoulders" signs.

5. That a copy of this resolution be sent to the owners and operators of the said dance hall and a copy to the owners and operators of said outdoor theater, and that a like copy be mailed to the Superintendent of State Police for his information.

6. That this resolution be entered in the minutes and records of the Commission as of the twenty-fifth day of May, 1948.

EXHIBIT "M"

Minutes of May 24 and 25, 1948

RESOLUTION

WHEREAS, the Commission on July 21, 1947, upon the recommendation of its Engineer and after careful study and consideration, adopted a resolution under the authority and within the meaning of Chapter 156, Oregon Laws, 1947; and

WHEREAS, by the terms of said resolution, the Commission adopted and approved Exhibit "A" and Exhibit "B", by which action on the part of the Commission certain highways and certain sections of highways are designated and classified as Group I Highways, and other highways and sections of highways are designated and classified as Group II Highways; and

WHEREAS, among the highways designated and classified in said resolution are Oregon Route No. 221, otherwise known as the Salem-Dayton Highway, and a part of the highway known as Three-Mile Lane Highway, which begins at Dayton and ends at the junction with 99W, and which were classified and designated as Group II Highways; and

WHEREAS, based upon the advice and recommendation of its Engineer, the Commission now finds that said Oregon Route No. 221 and the section of the Three-Mile Lane Highway, which section begins at Dayton and ends at the junction of said highway with 99W, may be reclassified and may be designated and classified as Group I Highways;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by this Commission, all members being present and voting affirmatively:

1. That Oregon Route No. 221 (Salem-Dayton Highway), and the section of Three-Mile Lane Highway, which begins at Dayton and ends at the junction of said highway with 99W, be and the same hereby are designated and classified as Group I Highways and the former classification and designation hereby are rescinded.

2. That this resolution be entered in the minutes and records of the Commission as of the 25th day of May, 1948, and the Secretary hereby is directed to deliver to the Superintendent of State Police a full, true, and complete copy thereof, and deliver a like true copy to the Public Utilities Commissioner.

EXHIBIT "H"

Minutes of May 24 and 25, 1948

R E S O L U T I O N

WHEREAS, the Oregon State Highway Commission recognizes the significance and the purport of its obligation to locate, lay out, construct, and maintain public highways adequate in all respects to meet the needs of the motoring public and prevent, as far as possible, personal injury, loss of life, and destruction of property; and

WHEREAS, the Commission for some time has recognized the possibilities and the natural advantages of a proposed highway route, commonly known as the Sullivan Gulch route; and

WHEREAS, for the purpose of preserving for the people of Portland, Multnomah County, and the people of the State generally, the advantages and highway possibilities of said route, the Highway Commission and the municipal authorities of the City of Portland, after due and careful consideration, reached an understanding and agreement that the area known as Sullivan Gulch, both that part within and that part without the corporate limits of the City of Portland, should be employed and used as the location for a major traffic artery to serve the motoring public entering the City of Portland from the east, over the Columbia River Highway and its connecting streets and roads, and the volume of motor traffic, local and state, having a destination or destinations in the eastern section of the City and points beyond, and to that end and for such purpose the Highway Commission and the municipal authorities of said City pledged their joint and cooperative effort to accomplish the construction of an access-controlled highway through and beyond said Sullivan Gulch; and

WHEREAS, notwithstanding the fact that the voters of Portland refused to make available necessary funds for the acquisition of real properties required for and in connection with said project, it is still the conviction and solemn belief of this Commission that appropriate action, steps, and procedure should be taken to preserve for the public, including the people of Portland, the Sullivan Gulch route so that in due time there may be constructed a highway possessed of volume traffic capacity, traffic controls, and modern safety factors; and

WHEREAS, the State Highway Engineer in response to instructions given by the Commission has surveyed the route known as the Sullivan Gulch route, and has surveyed other available and competing routes, and has filed with the Commission his report which contains the estimated cost to construct a highway over the Sullivan Gulch route, and the estimated cost to construct a highway over each of the other competing routes; and

(Cont.)

EXHIBIT "N" (Cont.)

WHEREAS, as a result of said study and exploration work on the part of the Engineer, it appears that the Engineer has found and has so reported that using Sandy Boulevard as an alternate or competing route, the improvement of which would consist in widening operations, would cost $5,000,000.00 in excess of the cost of the Sullivan Gulch route, and that the use of such highway would not make possible the elimination at reasonable cost of cross traffic; and

WHEREAS, said Engineer in his report and exploration gave study to the use of Halsey Street as an alternate or competing route, and found in connection with such study that the construction of an arterial artery employing said Halsey Street would cost in excess of $7,000,000.00 over and above the cost to construct an arterial along Sullivan Gulch, and found also that the use of Halsey Street as an alternate route would not make possible the elimination of cross-street traffic; and

WHEREAS, said Engineer has reported that as a result of his study and exploration, he has found and determined that there is no other feasible or practicable route which affords and offers the same privileges, advantages, and opportunities for an access-controlled highway as does the Sullivan Gulch route; and

WHEREAS, the Highway Commission has given due and careful consideration to all of the engineering data and facts presented by the Engineer, and the Commission has, in addition, made personal inspection of the Sullivan Gulch route and of the other proposed routes, and is of the opinion, and it is the deliberate conclusion and judgment of the Commission that the route known as the Sullivan Gulch route is more feasible, more practicable, and affords and offers more natural advantages and natural barricades to intersecting traffic arteries, and it is, therefore, the judgment of the Commission that said route should be protected and that official action should be taken to the end that said route may be preserved for the use and benefit of the general public; and

WHEREAS, the Oregon Legislature, when in session in 1947, gave due and considerate study to the problems of motor traffic as such problems are related to state highways and city streets, and as a result of such study and deliberation, the Legislature enacted Chapter 226, Oregon Laws, 1947, known as the throughway law; and

WHEREAS, by the enactment of said law, the Legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate, and maintain highways to be known as throughways; and

WHEREAS, "to the end that human lives may be saved, property damage minimized, transportation by motor vehicle promoted, and highway

(Cont.)

EXHIBIT "N" (Cont.)

travel in general safeguarded", it is the purpose and declared policy of this Commission to exercise the authority and power vested by the Legislature in the Commission in so far as it is feasible, practicable, and advisable so to do;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members thereof being present and voting affirmatively:

1. That the Commission does hereby recognize an urgent need for highways so located, so designed, and so constructed and maintained as to afford traffic arteries possessing traffic capacity, safety factors, and highway controls within the meaning and the purpose of the throughway law.

2. That the Commission does hereby and now announces its purpose and policy to exercise, in so far as possible and appropriate, the power and authority vested in it by the enactment of the throughway law; namely, Chapter 226, Oregon Laws, 1947.

3. That a route defined as beginning at the Harbor Line, which is at the east end of the Burnside Bridge, extending thence easterly for a distance of 5.34 miles to a junction with 92nd Avenue at the easterly boundary of the Portland city limits; thence along a location immediately south of and parallel to the Union Pacific Railroad tracks to a point approximately 2,000 feet east of Rockwood Road; thence across the railroad and continuing parallel to the railroad on the north side to a point near Arrata Road; thence in a northeast direction to a connection with the Upper Columbia River Water Level Highway near the proposed Sundial Underpass, Engineer's Station 740+80, said highway being 14.03 miles in length and being more particularly shown on the attached map marked Exhibit "A" and by this reference made a part hereof, together with suitable on and off connections or traffic interchanges at or near N. E. 12th Street, N. E. 33rd Street, N. E. 37th Street, N. E. 42nd Street, N. E. 60th Street, N. E. 82nd Street, N. E. 92nd Street, Rockwood Road, Birdsdale Road, and Arrata Road shown on the attached Exhibit "A" by the symbol X, hereby is designated as the route of a state highway, and the Commission does hereby order and declare that a highway shall be constructed along and over said route under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in said throughway law. (*)

4. That the survey of said route made by the Engineer pursuant to the instructions of this Commission, which said survey has been filed in the records and files of the Commission in Salem, Oregon, hereby is approved and adopted as the survey of a highway to be known as the Sullivan Gulch Highway, and it hereby is further ordered that when a highway is constructed along and over said route, such highway shall be located and constructed in harmony with and pursuant to

(Cont.

EXHIBIT "N" (Cont)

the lines of said survey.

5. That the Engineer is hereby authorized and directed to prepare at once all necessary maps and real property descriptions needed and necessary for use in the acquisition of real properties for rights of way and other highway purposes, and furnish said data to the Legal Department at the earliest possible date.

6. That upon receipt of said descriptions and other data, the Legal Department shall promptly proceed, pursuant to the regular and approved method, to procure options from the owners of the real properties over which said highway route is located, and bring said options to the Commission for consideration and approval.

7. That when all of the real properties needed in connection with and for the construction of said highway have been acquired and title thereto has been vested in the State, by and through its State Highway Commission, construction of said highway shall be commenced and shall be carried forward in units or sections, the size of which said units and the order of their accomplishment or construction shall be wholly within the discretion of the Commission.

8. It is the declared purpose of this Commission that funds employed for the acquisition of real properties and for the construction of said highway shall be drawn solely and only from highway funds rightfully belonging and regularly allocated to the City of Portland and Multnomah County as a part of District 1. It is further the declared purpose and fixed policy of this Commission that in no event and under no circumstances shall funds rightfully allocated and regularly belonging to any other county or city, and the district in which said county or city may be located, be withdrawn or withheld from any such county or city, or in any way employed for or to aid in the accomplishment of said Sullivan Gulch Highway or any part thereof.

9. That since the said route involves the location of the tracks and property of the Union Pacific Railroad Company, the Engineer and the Commission's Chief Counsel are hereby instructed and directed to confer with the officers of said Railroad for the purpose of reaching an agreement as is called for under Section 17 of said throughway law.

10. That this resolution be entered in the minutes and records of the Commission as of the twenty-fifth day of May, 1948.

FOOTNOTE:

(*) The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 37, under the heading "Resolutions Adopting Surveys" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Portland, Oregon
June 28, 1948

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
M. E. Hawks, Chief Accountant
E. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfie announced that the awards of contracts would be made at 3:00 p.m. in the same room:

CITY OF MYRTLE POINT, COOS COUNTY

MYRTLE POINT PAVING PROJECT

D. F. McKenzie, Salem	$ 13,746.00
Porter W. Yett, Portland	14,732.00

CITY OF POWERS, COOS COUNTY

POWERS OILING PROJECT

Baker and Wilson, Coos Bay	$ 3,133.34

COQUILLE SERVICE BUILDING IN COOS COUNTY

EXTENSION OF BUILDING

VaDare Construction Co., Portland*	$ 10,300.00

*Bidder will accept only one project.

CITY OF CENTRAL POINT, JACKSON COUNTY

CENTRAL POINT BITUMINOUS MACADAM SURFACING PROJECT

Babler Bros., Portland	$ 17,265.00

OREGON COAST HIGHWAY IN LINCOLN COUNTY

AGATE BEACH-NEWPORT SECTION

J. N. & M. J. Conley, Portland	$ 324,007.50
E. C. Hall Co., Portland	329,083.50

SILVERTON COUNTY ROAD IN MARION COUNTY

MIDDLE GROVE-PUDDING RIVER SECTION

	Using Asphalt	Using Tar
Warren Northwest Inc., Portland	$ 237,993.00	--
E. C. Hall Co., Portland	245,816.00	--
J. N. & M. J. Conley, Portland	251,185.00	--

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY

TROUTDALE SECTION

Vernie Jarl, Gresham	$ 182,415.00
Kuckenberg Construction Co., Portland	204,470.00
E. C. Hall Co., Portland	205,495.00
Roy L. Houck, Jr., Salem	210,957.00
J. N. & M. J. Conley, Portland	216,194.00
Babler Bros., Portland	218,880.00
McMutt Bros., Eugene	220,850.00
Leonard & Slate, Oreg. Ltd., Portland	266,790.00
Guy F. Atkinson Co., Portland	274,515.00

BUILDING AT MAUPIN, WASCO COUNTY

MAINTENANCE BUILDING

	Alternate "A" (Frame Const.)	Alternate "B" (Masonry Block Const.)
Archie R. Averill, Portland	$ 13,030.00	$ 13,060.00
VaDare Constr. Co., Portland*	14,300.00	14,790.00
R. H. Jones, Hillsboro	14,919.00	18,123.00
Lorenz Bruun Co., Portland	18,490.00	20,296.00

*Bidder will acept only one project

The Commission unanimously approved the minutes of the meeting held on May 24 and 25, 1948.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

(1) Additional expenditure of $4,000 for construction of Round Top Road in Cove State Park: The Parks Superintendent advised that in 1943 cinders had been sold to a contractor for $4,000 with the understanding that the money was to be used later in development of the park. He recommended that the money be used now for improvement of the road. The Commission unanimously approved the Superintendent's recommendation.

(2) Request of Pioneer Bible Clubs, Bend, to purchase 30 acres of land on the Deschutes River about three miles north of Bend: The Parks Superintendent advised that this land had been obtained from the U. S. Government for recreational purposes and recommended that it be retained by the state for such purpose. The Commission approved the recommendation.

(3) Length of lease for State Forester's occupancy of a tract of land in Wallowa State Park as a site for a fire warden's residence: The Chief Counsel advised that the State Forester has requested a 25-year lease. He questioned the advisability of granting a lease for such duration because it would commit future Commissions. After discussion the Chief Counsel was instructed to prepare a lease on a 15-year basis with provision for cancellation of the lease sooner, if necessary, by paying for the building on a depreciated-value basis.

(4) Improvement of road leading to Saddle Mountain State Park: The Parks Superintendent advised that the exisiting road to this park was built in 1941 by C.C.C. forces, but no work had been done on it since then, and the road now is almost impassable. He estimated the cost to improve the road at $7,500 and recommended approval of the expenditure, provision for which is contained in the 1948 Park Budget. The Commission approved the recommendation unanimously, subject to the condition that the work shall be done by state forces under the direction of the State Highway Engineer.

(5) Appointment of a Supervisor for state parks located in Columbia River Gorge: The Parks Superintendent stated that provision was made in the 1948 Park Budget for employment of five park supervisors, but only two appointments have been approved by the Commission to date. He explained that the great amount of brush cutting and trimming to be done along the upper Columbia River Highway necessitated the employment of a supervisor in this area, and he requested authority to secure the services of a competent man at this time. Motion was made by Commissioner Schaupp that the request be approved. The motion was seconded by Commissioner Chandler and carried unanimously.

(6) Sale of myrtle wood stored at Humbug Mountain State Park: The Parks Superintendent requested authority to sell approximately one truck load of dry myrtle wood, in blocks of various sizes, which is stored at thi park, being a portion of the wood that was prepared by C.C.C. forces for manufacture into furniture for the Silver Creek Falls Park Lodge. He recommended that it be sold on a competitive-bids basis. The Commission unanimously approved the recommendation on motion of Commissioner Schaupp which was seconded by Commissioner Chandler.

(7) Offer of W. R. Kurtz, Madras, to deed to the state for park purposes eight acres of land situated on the Warm Springs Highway near the bridge at the entrance to Warm Springs Agency: The Parks Superintendent presented a map showing the location of the property and recommended acceptance of the gift because, he said, it is the only place on the river which could be used as a wayside. He pointed out that there are no restrictions attached to the gift; however, he suggested that when right of way is acquired for the proposed improvement of the highway at this location, additional property between the highway and the river be included so as to control the river frontage. The Engineer concurred in the recommendation and suggestion. The Commission unanimously accepted Mr. Kurtz's offer with thanks and authorized acquisition of the additional acreage as suggested.

(8) Offer of H. H. Wilman, Coos Bay, to pay $75 for hay in Shore Acres State Park: The State Parks Superintendent recommended acceptance of the offer. The Commission approved the recommendation unanimously. (An offer of $120 was received later from Nels S. Peterson and was accepted in lieu of Mr. Wilman's offer upon assurance by the Chief Counsel that the transaction is legal.)

(9) Bids received in Salem June 21, 1948, for the sale of boat concession privilege in Sunset Bay State Park: The Engineer reported bids received as follows:

BOAT CONCESSION PRIVILEGE IN SUNSET BAY STATE PARK

	Percentage of Gross Receipts
L. A. Smith, Coos Bay	16%
Sportsman Dock, Coos Bay	* 8%

*eight percent of gross receipts, less Federal Transportation Tax

He advised that the Chief Counsel, the State Parks Superintendent and he concur in recommending acceptance of the offer of Mr. L. A. Smith, which provides for payment to the state of 16 percent of the gross receipts. The Parks Superintendent pointed out that the sale of this concession does not prevent privately owned boats from operating in the park. The Commission approved the recommendation unanimously.

Mr. J. W. DeSouza, Assistant Counsel, presented a list of properties needed for various highway improvements throughout the state for which options have been obtained. Following careful consideration of each item in the list and the amount of the individual options, the Commission approved the options and authorized acquisition of each tract on such basis. The resolution attached hereto marked EXHIBIT "A", which by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The following notes refer to items appearing in the above-mentioned resolution marked EXHIBIT "A":

* In connection with Item No. 14654 the Engineer reported that the Rasmussen Paint Company, whose business is established in Sullivan's Gulch, wishes to know how long they will be permitted to remain in their present location. He was instructed to advise the Company that it will not be disturbed for at least two years, which should give ample time for re-establishment of the company business. The Commission decided unanimously to continue with the acquisition of necessary right of way as rapidly as is possible. The Chief Counsel was instructed to keep the Commission advised as to the amount of money that is being committed for right of way so the amount allocated for this purpose will not overrun.

** In the discussion of right of way acquisitions in Gold Beach (Item No. 9036), the Chief Counsel reported difficulties in securing a satisfactory settlement with a Mr. Crooks who owns property that the state needs south of Second Street. He suggested, if the Commission so desired, that the proposed project could go forward as originally planned except that it be terminated at Second Street rather than at Fourth Street, and that it be extended northerly from its present terminus at Sunset Inn to the Rogue River Bridge. The Engineer pointed out that it will cost about $127,000 more than is available to construct the section between Sunset Inn and the bridge, notwithstanding that the present project is terminated at Second Street; moreover, the survey of that section has not been made. As a result of discussion of this matter, the Commission decided to terminate the present project at Second Street if a satisfactory settlement cannot be arranged with Mr. Crooks for right of way across his property. The Engineer was authorized to advertise the project for bids to be received as soon as plans and specifications can be prepared. He was also authorized to complete the survey for the section between Sunset Inn and the Rogue River Bridge. The Chief Counsel was authorized to negotiate options for right of way that is needed for such section.

*** Settlements for right of way, gravel bars, hauling roads, etc., in connection with the Judkins Point-Goshen Section of the Pacific Highway, in Lane County. The settlements listed in the aforementioned resolution, marked Exhibit "A", were all approved by the Commission following discussion and approval of the location survey of this section of highway. In this connection the Engineer reported that the survey has been completed and is ready for adoption by the Commission. After due consideration the Commission approved and adopted the survey as the permanent route of this section of highway. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of state highway, to wit:

Judkins Point-Goshen Section of the Pacific Highway, in Lane County;

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the survey of the Judkins Point-Goshen Section of the Pacific Highway, together with the map, which for identification purposes bears the map file No. 5B-32-9, field notes and other engineering data submitted by the Engineer hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-eighth day of June, 1948.

+ All of the settlements for right of way listed under the heading, "Central Howell-Silverton Section, Salem-Silverton Highway" were approved by the Commission, notwithstanding that this highway is a county road under jurisdiction of the Marion County Court. The Commission questioned the advisability and justification of acquiring right of way for county roads at state expense in view of the fact that the counties now receive 19 percent of state highway revenues and could well afford to use such funds for purposes of this kind. The Engineer and the Chief Counsel were instructed to submit a report on the situation as it now exists showing the mechanics of what is now being done with respect to purchase of right of way for county road improvements.

++ Item No. 14647, purchase of right of way from Wilkes School District No. 7, Multnomah County, for the Sullivan Gulch Section. The Assistant Attorney reported details of this transaction, pointing out that the district plans to remodel its present building and to construct an addition thereto this summer, so is particularly anxious to receive a settlement with the Highway Commission for right of way that it needs, also pointing out that if the Commission does not settle with the district now, the district will proceed with its plans to increase its facilities on the present site, which will result in additional cost to the state later on. The Engineer advised that the adopted highway location passes

through the school property and cannot be changed because of the proximity of the Union Pacific Railroad. In view of these disclosures, the Commission decided unanimously to close the transaction with the district on the basis of the settlement disclosed in the aforementioned resolution, marked Exhibit "A".

During the discussion of right of way matters the Commission also considered the following:

1. Settlement with Armour Field Spaulding for right of way needed for the Vista Avenue-Multnomah County Line Section of the Sunset Highway; File No. 14026. A decision in this matter was deferred pending receipt of information concerning property along this section that is owned by Multnomah County and the City of Portland. The Chief Counsel was instructed to contact the city and county officials with regard thereto and report back to the Commission.

2. Settlements for right of way needed for the proposed improvement of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway, in Tillamook County. The Assistant Attorney presented a list of settlements agreed upon to date. The Commission deferred action pending a full report when appraisals on the unsettled properties have been received.

3. Settlement with property owners in the City of Coos Bay for right of way needed for the Coos Bay Section of the Oregon Coast Highway. Action on this matter was deferred by the Commission pending further developments regarding cooperation by the city in acquiring excess properties.

4. The Assistant Attorney reported the status of the agreement with Gates & Son, moving contractors, for re-establishing the Clemsen tavern building on the Oregon City-New Era Section of the Pacific Highway East. He advised that the offer of Gates & Son to move the building for $9,066 was accepted, the next low bid being that of Mr. Guy Johnson at $10,378, but Gates & Son now wish to withdraw from the agreement. He requested instructions. The Chief Counsel suggested that Gates & Son be held to their proposition and if they refuse, that they be required to pay to the state the difference between their bid price and that of the next bidder, an amount of $1,312. It was the Commission's decision that Gates & Son be held to their contract, and it was ordered that they be so informed.

The Assistant Counsel presented a list of properties needed in connection with state highway improvements but concerning which he has been unable to secure satisfactory settlements by negotiation. He presented a list of such properties together with the offer that he recommended be made for each parcel in the event that it becomes necessary to acquire the property by condemnation, as follows:

Baker Undercrossing Section of the Baker-Unity Highway	Recommended Offer
9850 Louise D. Cowan	$100.00

Central Howell-Silverton Section of the Salem-Silverton Highway		Recommended Offer
14643	Ellen Steffen (Rosina Steffen, life interest)	$450.00
14643B	Oliver Steffen, et al.	125.00
13628	D. A. Steffen, et al.	300.00
		Plus low bid for moving

Following careful consideration of each item the Commission authorized condemnation of the several tracts at the recommended offers and thereupon adopted by unanimous vote the attached resolutions marked EXHIBITS "B1" and "B2", with respect thereto, which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Assistant Attorney presented for the Commission's consideration the continuation of a lease with Richfield Oil Company on state-owned property at Bonneville. He stated that the present lease agreement is on a gallonage basis with a minimum payment of $20 per month and that during 1947 the payments averaged approximately $30 per month. The Commission decided unanimously to continue the lease on the present basis until the property is needed for highway purposes.

The Chief Counsel presented for the Commission's consideration a form of certificate from the National Parks Service establishing acceptance by the state of Silver Creek Falls Recreational Area. He recommended acceptance of the certificate which, he said, is a routine requirement of the Federal Agency. The Commission approved the recommendation. The certificate was signed by the Commission on the following day.

The Commission considered a report by the Engineer on the acquisition of right of way needed for relocating the Lewis and Clark River-Youngs Bay Bridge Section of the Oregon Coast Highway, near Astoria. The Engineer recalled that the Commission on February 4, 1947, formally adopted the survey of this section but did not authorize acquisition of the right of way which, in his estimation, should be purchased now because the area is rapidly being developed and the right of way will cost much more later on. He pointed out that when the highway is realigned at this point, it must be built on the adopted location because there is no satisfactory alternate. He estimated the cost of the right of way at about $40,000. The Commission deferred its decision until the following day. (This matter was again discussed on the following day at which time the Commission authorized the Chief Counsel to proceed with the securing of options for the right of way.)

The Commission discussed a report from the Engineer on a request from the U. S. Forest Service and U. S. War Department that the state purchase a 200-foot strip of property along the west side of the North Santiam Highway near the relocated Detroit Ranger Station in order to preserve the roadside scenery. The

Engineer advised that the area consists of approximately 6.4 acres which had been appraised at $960, and that while the property is of no particular value for highway usage its acquisition by the state will prevent unsightly building development. He recommended that it be purchased as a matter of cooperation with the federal departments and to protect the scenic value of the highway. The Commission approved the Engineer's recommendation on condition that the property can be purchased at a reasonable figure.

There was presented for the Commission's consideration a request from the City of Reedsport for an easement permitting installation of an 18-inch concrete pipe line across the Oregon Coast Highway under the south span of the Umpqua River Bridge and construction of a levee embankment on highway property. The Engineer advised that the easement is in connection with a flood control project that is being constructed under Army Engineers' supervision. He further stated that the project had been investigated and that it is his recommendation that the easement be approved. The Commission approved the Engineer's recommendation unanimously. (The easement was signed by the Commission on the following day.)

The Commission also considered a request from the U. S. War Department for permission to use certain state-owned property on the North Santiam Highway for relocation of a State Salmon Hatchery necessitated by construction of the Detroit Dam. The Engineer advised that the proposed site is on a wide section of right of way which was given to the state by the U. S. Forest Service under a special useage permit for the protection of scenic values, and that the portion to be used for hatchery purposes is outside the normal right of way width where it will not interfere with highway operations nor in any way detract from the scenic value of the roadway. He recommended that the request be granted provided the buildings and other facilities to be constructed are not unsightly and that concurrence is granted by the U. S. Forest Service. The Commission approved the recommendation unanimously.

A request was considered from the City of Reedsport for use of state-owned property in Reedsport on which to construct a war memorial building to be used as a youth center. The Engineer pointed out that the Highway Department now maintains a building on this property which would have to be re-established, and there is a quantity of stockpiled surfacing material which would have to be removed; moreover, a new site would have to be acquired. He estimated the cost to acquire a new site at $5,000 and to re-establish the building at $15,000. Following discussion, the Commission approved the city's request on the condition that the city will furnish the state another satisfactory site and will re-establish the building and stockpiles on the new site at no cost to the state.

A letter was presented from the City of Astoria pointing out the necessity for the state to acquire right of way for the further improvement of the Columbia River Highway in the eastern part of Astoria. The Engineer recalled his report to the Commission at its February meeting on a request from the City of Astoria for two improvement projects in Astoria, one being the widening of Taylor Avenue on the Oregon Coast Highway and the other being the improvement of the Columbia River Highway in the eastern part of town from 36th

Street to 52nd Street, the estimated costs of which are $70,000 and $480,000, respectively. He also recalled the action taken by the Commission at that time. As the result of discussion the Secretary was instructed to inform the city that the Commission cannot see its way clear to spend state money at this time for right of way in Astoria in view of the large expenditures that are now being made in this vicinity, which will not permit the additional expense.

Consideration was given by the Commission to the offer of McNutt Bros., contractors, to sell to the state for the sum of $1,500 a service garage building which they constructed on state property in connection with their contract on the Pacific Highway near Glendale, Douglas County. The Engineer advised that the building could not be duplicated for less than $4,000 and that it can be used to good advantage for equipment storage. He recommended acceptance of the offer. The Commission approved the recommendation unanimously.

The Engineer reported that, pursuant to previous agreement and understanding, the Sumpter Valley Railroad Company has delivered deeds conveying to the state portions of the old railroad right of way along the Baker-Unity Highway and the Sumpter Valley Secondary Highway between Baker and Sumpter, that are serviceable for highway purposes. He recommended acceptance of the deeds and that the company be thanked for its cooperation. The Commission approved the recommendation.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Engineer exhibited a model of the improvement that is proposed for Harbor Drive at the West and East approaches to the "Steel Bridge", Portland. This was inspected by the Commission but no action was taken thereon.

The responsibility of the Commission in connection with work to be performed under the $250,000 Special State Tax Street Fund set up by the 1947 Legislature was discussed. The Chief Counsel gave as his opinion that the Commission has satisfied the requirements under the law when it allocates the funds to projects regardless of whether or not the work contemplated is performed in the year in which the allocation is made. He further stated that by such allocations the cities have claims against the fund which could not be released except by the cities themselves. As a result of this discussion, the Commission by unanimous vote approved "cooperative construction projects" for the following cities and towns covering improvements to be financed with Special State Tax Street Funds, made available in 1948:

Myrtle Point	Riddle	Dallas
Powers	Brownsville	Independence
Central Point	Sweet Home	West Salem

The establishment of zones on the ocean beaches and the use of such zones by motor vehicles and aircraft was discussed by the Commission. The Chief Counsel advised that no permits had been issued by the Commission for such use of the beach areas. He read aloud the law on the subject and advised that the

Attorney General in a recent opinion indicates that the Commission has supervision and control over the beaches and that it is within the authority of the Commission to grant permission for the landing of aircraft upon the beach if it so desires, and to prescribe rules and regulations therefor. He advised further that the law prescribes that any action on the part of the Commission must be based on a petition by a county court or a city. The Chief Counsel was instructed to write the county courts of those counties bordering the Pacific Ocean, advising them of their responsibility under the law with respect to such matters, and stating facts and that complaints have been filed. The Commission will then act on the replies received. (For further details see copy of the Chief Counsel's report in the general files.)

Chairman Banfield brought up for discussion the matter of regulating the speed and spacing between trucks operating on state highways, particularly trucks to which trailers are attached. It was his thought that some of the trucks travel too close together to facilitate passing by ordinary traffic and that the speed that they maintain on curves prevents them from staying on their own side of the road. (The Engineer advised that one trucking company, Consolidated, has already instructed their drivers to maintain a 500-foot space between vehicles of this sort. In addition, he stated that on trial runs in securing special permits, they were required to stay on their own side at 35 miles per hour.) The Chief Counsel advised that the present law requires a minimum distance of 300 feet between such vehicles except when passing; however, the Commission has legal authority to specify a greater distance between them and to regulate the speed of the vehicles if it considers that advisable, in so far as movements are controlled by permit. The enforcement of the provisions of the permits, he said, is a police function. It was the thought of the Commission that the rights of truckers should be subordinated to those of other traffic, that the distance between trucks should be not less than 500 feet and the speed of trucks should not exceed 30 miles per hour on curves and not more than 50 miles per hour at any point if they cannot stay on their own side of the highway at greater speeds. The Engineer and the Chief Counsel were instructed to give the matter consideration and report their recommendation to the Commission on the following day. (The Engineer and the Chief Counsel presented their joint recommendation on the next day. The Commission approved the recommendation and at that time adopted a resolution relative thereto outlining the Commission's stand, which resolution is contained herein marked EXHIBIT "N".)

The Chief Counsel reported on the claim of Mrs. John Raeish arising out of an agreement between her former husband, Mr. John Shaw, and the Highway Commission for constructing a relief map of Oregon now in the office of the State Highway Engineer. He advised that he had investigated the matter thoroughly and, in his estimation, the Commission has no obligation to Mrs. Raeish. Action on this matter was deferred by the Commission pending discussion with Mrs. Raeish on the following day. (Mrs. Raeish appeared before the Commission the following day, and her claim was denied. See additional entry ahead. The Chief Counsel was instructed to provide her with a copy of his written report. See also copy of report in general files.)

The Chief Counsel presented a number of communications, consisting of historical facts, received from J. Neilson Berry concerning Champoeg State Park. He advised that no action was necessary and the Commission ordered the communications filed.

The Commission ratified the action of the Chief Counsel terminating the trust agreement involving George F. Gunnell which arose out of a breach of contract No. 2747 for the Enegren Ferry operation. The Assistant Counsel advised that all obligations pertaining to this matter have been fulfilled.

A request was presented from Technocracy, Inc., for permission to erect Technocracy markers on property controlled by the Highway Department adjacent to the Pacific Highway East north of Albany. The Chief Counsel recommended that the request be denied as it would violate the Commission's established policy with respect to the maintenance of signs in that area. The Engineer concurred. The Commission unanimously approved the recommendation upon motion of Commissioner Chandler, which was seconded by Commissioner Schaupp.

The Chief Counsel requested instructions as to disposition of buildings on block 86 in Salem which has been acquired by the Commission as a site for the proposed State Highway Office Building. He reported receipt of a number of inquiries concerning several of the houses and suggested that it would be advisable to call for bids for the purchase of those buildings and if a satisfactory bid is not received, that they be rented until it is necessary to remove them in order to accommodate the Highway Department Office Building.

As the result of considerable discussion the Commission decided, in view of uncertainties that exist with respect to construction of an office building for Highway Department use, to rent the houses for a period of one year, commencing August 1, 1948, and ending July 31, 1949, with the understanding that either the state or the lessee may terminate the lease at any time by giving the other party sixty days' written notice, and that the lease may be extended from month to month after July 31, 1949, on the basis of the original lease agreement. Motion to that effect was offered by Commissioner Schaupp, seconded by Commissioner Chandler, and carried by the unanimous vote of the Commission. The Chief Counsel was authorized and instructed to proceed in conformity therewith.

In this connection the Commission also discussed the advisability of constructing a Highway Department Office Building on property already acquired for such purpose in the Capitol group area, Salem, and the Engineer's written report on this subject, in which he suggests two general plans for such building, including charts and tables showing the department's space requirements for about 20 years, and an estimate of cost under each plan. (See copy of Engineer's report in general files for details.)

It was the thought of Chairman Banfield that before the Commission takes any definite action with respect to a new building, the matter should be discussed again with the Board of Control to ascertain whether or not any office space will be available to the Highway Department when the State Office Building,

now under construction, is completed, it being his thought that public reaction might be unfavorable were the Commission to spend a lot of money for construction of a building to the detriment of highway construction. Commissioner Schaupp stated his concurrence with the remarks of the Chairman. Commissioner Chandler inquired if the working efficiency of employees is adversely affected under present working conditions and was informed by the Engineer that conditions are somewhat improved by transfer of the auditing department to the new building at the shops, but there still exists an overcrowded situation in the present office building; moreover, the placement of the auditing department at the shops is an inconvenience; also the designing of highway projects could be expedited if additional working space were provided. As a result of this discussion, the Commission decided unanimously that it would be proper to confer again with the members of the State Board of Control before proceeding further in this undertaking. The Engineer was instructed to arrange a meeting with the Board within the next two weeks.

The Commission discussed with the Engineer bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows, the action of the Commission with respect to each project, as stated, being by unanimous vote:

"Myrtle Point Paving Project on Maple Street in the City of Myrtle Point, Coos County; 0.28 mile of paving. D. F. McKenzie, Salem, submitted the low bid for this job at $13,746. The only other bid received was submitted by Porter W. Yett, Portland, at $14,732. The Commission has awarded this contract to the low bidder, D. F. McKenzie.

"Powers Oiling Project on Poplar Street and Fourth Avenue in the City of Powers, Coos County; 0.44 miles of surfacing and oiling. The Commission received only one bid for this project, being that of Baker & Wilson, Coos Bay, at $3,133.34. The contract has been awarded to Baker & Wilson.

"Addition to Service Building at Coquille, Coos County; Construct 20' x 34' extension to frame building. The Commission received only one bid for this job, being that of VaDare Construction Company, Portland, at $10,300. This bid has been rejected as being too high. (See Note (1) following announcement.)

"Central Point Bituminous Macadam Surfacing Project on Pine Street in the City of Central Point, Jackson County; 0.53 mile of Type B-3 wearing surface. Babler Bros., Portland, submitted the only bid for this project at $17,265. This bid has been rejected as too high.

"Agate Beach-Newport Section of the Oregon Coast Highway, Lincoln County; 2.24 miles of grading, surfacing and oiling. J. N. & M. J. Conley, Portland, submitted the low bid for this job at $324,007.50. The only other bid received was of E. C. Hall Company, Portland, at $329,083.50. Both bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Middle Grove-Pudding River Section of the Silverton County Road, Marion County; 5.49 miles of grading and paving. Warren Northwest, Inc., Portland, submitted the low bid for this job, using asphalt, at $237,993. The second low bid was submitted by E. C. Hall Company, Portland, at $245,816. One higher bid was received. All bids have been referred to the Engineer with authority to award the contract to the low bidder when approved by the Public Roads Administration.

"Troutdale Section of the Columbia River Highway, Multnomah County; 0.69 mile of grading. Vernie Jarl, Gresham, submitted the low bid for this job at $182,415. The second low bid was submitted by Kuckenberg Construction Co., Portland, at $204,470. Seven other higher bids were received. All bids have been referred to the Engineer with authority to award the contract to the low bidder when approved by the Public Roads Administration.

"Contruct Maintenance Building at Maupin, Wasco County; 32' x 76' masonry block or frame maintenance building and other miscellaneous work. Archie R. Averill, Portland, submitted the low bid for this project at $13,030 on Alternate 'A', frame construction, and $13,060 on Alternate 'B', masonry block construction. The second low bid was submitted by VaDare Construction Company, Portland, at $14,300 for Alternate 'A' and $14,790 for Alternate 'B'. Two higher bids were received. The contract has been awarded to the low bidder, Archie R. Averill, using Alternate 'B'."

(1) The Engineer requested authority to construct the Coquille Service Building Extension with state forces in view of the fact that the bids received on two occasions have been too high. The request was approved by the Commission unanimously.

The Chief Counsel brought up for discussion a compromise settlement with Mr. M. Chase for right of way needed for the Troutdale Section of the Columbia River Highway, in Multnomah County. He advised that the Commission had previously approved an offer of $850 for this property in condemnation; however, Mr. Chase would not settle out of court for that sum but stated a willingness to settle if paid an additional amount of $650. He recommended acceptance of the compromise offer. The Commission approved the recommendation unanimously.

The Chief Counsel presented a request from the Rogue River Valley Irrigation District for a lease permitting construction of an irrigation canal on a strip of state-owned property about ten feet wide and 759 feet long adjacent to the Crater Lake Highway near Medford. He presented a map showing the proposed location of the ditch. The Engineer recommended sale of the property to the district rather than leasing it to the district because the property would be of no value for highway purposes with the ditch on it, and it would be very difficult to secure the removal of the ditch later on. Action on this matter was deferred by the Commission until the following day pending receipt of additional information. (The Engineer and the Chief Counsel recommended later in the session that the property be sold rather than leased to the district if the district is willing to pay a reasonable amount for it. The Commission approved the recommendation.)

The Chief Counsel read aloud a letter from Mr. Ed Turnbull, Eugene, regarding the cutting of the concrete curb along the newly constructed highway in Eugene to accommodate a Mr. Byers who has purchased and is developing property at this location. It appears that there is a local controversy over the zoning in this area, and that the City Council has passed an ordinance with respect to the zoning feature which is being referred to the people, and that it would be up for vote soon. He pointed out that the cutting of the curb in this instance would be contrary to the policy and principle of the Commission to do everything in its power to preserve and maintain safety on the highways and recommended that it not be allowed regardless of the outcome of the referended measure. The Commission instructed the Chief Counsel to notify the parties concerned that the Commission still feels the same as in the past about such matters and will not permit the curb to be cut if it can prevent it.

The Engineer reported on the request of the Safety Committee of the Grants Pass Lions Club for installation of a guard fence on the Rogue River Bridge in Grants Pass. He recalled that this matter had been considered by the Commission in February, 1948, and that action had been deferred pending further investigation. This investigation has been made, he said, and it has been found that there is no specific hazard that can be attributed to lack of chains or guard fence, and that the conditions here are no different than they are at any other bridge except as to illumination. He recommended against installation of chains or fence but suggested that it would be helpful to install appropriate lights. As the result of discussion, the Commission decided unanimously not to install either guard rail or lights, and instructed the Chief Counsel to so inform the Lions Club.

A report was submitted by the Engineer on the request of the City of Umatilla for widening the Umatilla River Bridge on the Columbia River Highway. He estimated the cost to widen the structure to carry present-day traffic, including two five-foot sidewalks, at $148,000, and gave as his opinion that the improvement is warranted. Action on the matter was deferred pending inspection of the bridge by the Commission on its trip in July.

The Commission considered a request from the Superintendent of State Police for Highway Department cooperation in a plan to improve the police and highway department radio network. The Engineer advised that the present setup is a pioneer installation which should be modernized because of the increased use that is being made of it. The Commission deferred action pending a meeting with the Superintendent of State Police which the Engineer was instructed to arrange.

A request was presented from the Neahkahnie Community Club for the removal of sharp curves on the Oregon Coast Highway at the west limits of Nehalem. The Engineer advised that the section of roadway they wish improved is a county road now being used as a temporary route for the Oregon Coast Highway and probably will be used as such for at least ten years. In view of this information

the Commission considered that it might be advisable to improve it somewhat and accordingly instructed the Engineer to investigate and report the cost involved.

A request from the Ashland Chamber of Commerce for improvement of the Pacific Highway between Medford and Ashland was considered by the Commission. The Engineer advised that the existing pavement, which varies in width from 20 to 22 feet, was reconstructed between 1931 and 1938; also, that the average daily traffic between the two cities is 5,600 vehicles per day with a traffic volume of 9,000 vehicles daily at the south limits of Medford. The ultimate plan for this section, he said, is a four-lane roadway which is estimated to cost approximately $2,200,000, exclusive of the improvement of the highway through the urban area of Medford. He gave as his opinion that the construction of a four-lane facility between Medford and Ashland is warranted. The Commission considered, in view of the money that it has spent in this district during the past few years, that it could not approve this project in the near future. (A delegation appeared before the Commission on the following day concerning this project; see entry ahead.)

Pursuant to instructions from the Commission at the previous meeting, the Engineer reported the results of a re-check of the cost estimate to construct a bridge over the Coquille River at Bullards Ferry, Coos County. He advised that the re-check discloses that the bridge and the approaches thereto can be built well within $600,000, the amount of his previous estimate, provided there are no further increases in the cost of material and labor. The structure, he said, is estimated to cost $526,000 and the approaches, $56,000. The Commission questioned the advisability of proceeding with this project in view of the additional burden that has been placed on highway funds by reason of the Columbia River flood and the reconstruction of the Oregon Coast Highway between Coquille and Coos Bay, and the probability that it will be necessary to replace the Enggren Ferry with a bridge in the not too distant future and in connection therewith to construct a one and one-half mile section of highway as has been requested, and the additional expense incident to construction of a bridge in the City of Myrtle Point in lieu of the improvement of the Coquille-Arago-Myrtle Point County Road as a Federal Aid Secondary Highway project, all of which add to a heavy financial obligation. As the result of discussion the Commission voted unanimously to withdraw its offer to the Coos County Court for the immediate construction of the Bullards Ferry Bridge.

The Engineer then submitted his report on the substitution of a bridge project for an oiling project on the Coquille-Arago-Myrtle Point County Road in Coos County. He recalled that at the May meeting the Coos County Court had requested that funds programmed for surfacing and oiling this county road be transferred to the construction of a bridge over the Coquille River at Myrtle Point. The amount of money set up in the Federal Aid Program for surfacing and oiling, he stated, is $130,000, whereas investigations reveal that the bridge and approaches will cost approximately $250,000. Mr. Tom Davis, District Engineer, Public Roads Administration, who was present, stated that the Public Roads Administration would approve the transfer of the funds from the oiling project to the bridge project but he could make no promises that Federal cooperation would be granted on the additional $120,000 required for the bridge. The

Commission indicated approval of the bridge project but deferred a definite decision pending further study of its finances and discussion with a delegation on the following day; however, the Engineer was authorized to complete the design of the bridge. (See additional minute entry ahead.)

The Commission considered and ordered filed a report from the Engineer covering weighmasters' operations for the month of April, 1948. The report reveals that violations have increased approximately one percent during the last two or three years, principally in sections where platform scales are not available.

The Commission considered a request from the Public Roads Administration for the submission of plans for urban highways in all cities in the state having a population of 5,000 or more. The Engineer exhibited maps prepared from origin and destination surveys conducted by the Traffic Department indicating both an interim and an ultimate Federal Aid System including all cities of 5,000 population or more, except Salem where studies are not yet complete. He explained details in connection with each and pointed out that very few changes have been made in the list he submitted for the Commission's approval two years ago. Following careful consideration of the plans the Commission approved them unanimously as recommended by the Engineer, and authorized him to forward them to the Public Roads Administration. (For further details see copy of Engineer's written report and maps filed in the Commission's records and files under the heading "Special Matters", being File No. 31, in Salem.)

In this connection the Commission discussed particularly a proposed US97 By-pass in the City of Klamath Falls, which passes through property owned by the City of Klamath Falls and by Klamath County. The Engineer was instructed to prepare a map showing the proposed alignment for use in discussing the matter with the delegation which was to appear before the Commission on the following day.

The Engineer presented a report on the results of bids received in Salem on June 21 for the sale of buildings in Eugene. He submitted a list of the high bidder for each building together with the appraised value of each, as follows:

Sale of Buildings and Tract of Land in Eugene

Item No.	Item	High Bidder		High Bid
1	Bldg. No. 13384	M. S. Barker	Eugene	$ 200
1A	Tr. of Land, 364E 7th Ave.	M. S. Barker	"	2,200
2	Bldg. No. 9953-B	C & D Wrecking Co.	"	200
3	" " 11995	Merle E. Meyer	"	55
4	" " 11996	C & D Wrecking Co.	"	150
5	" " 11469	C & D Wrecking Co.	"	250
6	" " 9140	C & D Wrecking Co.	"	125
7	" " 9141	C & D Wrecking Co.	"	200
8	" " 9142	C & D Wrecking Co.	"	250
9	" " 9143	C & D Wrecking Co.	"	200

The Engineer recommended acceptance of the high bid in each instance. The Chief Counsel concurred. The recommendation was approved unanimously by the Commission.

The Engineer also reported the result of taking bids in Salem on June 10 for the purchase of timber in "Van Duzer Forest Corridor" on the Salmon River Highway and presented a tabulation of the bids received as follows:

Sale of Approximately 550M-FBM Timber on Salmon River Highway

		Murphy Timber Co.		Coastal Timber Co.		Gerrabrant Lumber & Investment Co.	
		Unit		Unit		Unit	
Fir	per M	21.00		10.00		8.00	
Hemlock	per M	4.00				5.00	
All other species	per M			4.00			
	Totals		$11,817.00		$7,000.00		$4,800.00

The Engineer advised that since these bids were received, the Parks Superintendent decided to preserve 39 additional trees containing about 114M-FBM, and representing approximately 20% of the timber on which the bids were based. Because of this change, he said, the Murphy Timber Company withdrew its offer, alleging that the 39 trees, in general, are of better quality than the trees to be cut and that the decrease in the number of trees to be removed would increase their cost of operations; however, the company agreed later on to pay $7,080 for the timber, which offer was accepted following telephonic approval by Commissioners Ben R. Chandler and A. W. Schaupp. The Engineer requested confirmation of the transaction at this time for the record. The Commission by unanimous vote approved the sale of the timber to Murphy Timber Company at its revised offer. (An agreement covering the matter was signed on the following day.)

The Commission considered a proposal to allow a $20 per month cost-of-living wage increase to Highway Department employees as authorized by the State Emergency Board on May 12, 1948, upon the joint recommendation of the Civil Service Commission and the State Budget Director. The Engineer presented a written report on the subject, dated June 11, 1948, as previously instructed by the Commission, giving an overall wage picture of the Highway Department situation since the first of the year and containing his recommendations which are summarized, as follows: (1) that all employees be given a $20 cost-of-living wage adjustment as of June 1, 1948; (2) that those employees found to merit a classification of average or above on their merit rating status be given the regular merit rating increase on July 1, 1948, in addition to the cost-of-living adjustment; and (3) that approval be given to increase the salary of certain classifications in the Accounting Department subject to approval by the Civil Service Commission in order to correct apparent inequities in the rates of pay for these classifications, as explained in his separate report on June 11, 1948. (See copy of both reports in general files for details.) The Commission unanimously approved the Engineer's recommendations upon motion by

Commissioner Schaupp, which was seconded by Commissioner Chandler, with the understanding that the $20 cost-of-living increase shall be effective from June 1, 1948, to December 31, 1948, and that whether or not the increase continues after December 31, 1948, will depend on action by the legislature. It was also understood that the wage adjustments as recommended for the Accounting Division shall be considered as a change in the basic pay structure and that the $20 cost-of-living adjustment is to apply in addition to whatever increases are granted in the basic plan. Chairman Benfield gave as his thought that these increases will place the Highway Department employees on a fair level of compensation with industry as a whole so no one should feel that favorable consideration for further increases would be granted in a few months.

The Commission discussed a request from the Silverton Planning Commission for an extension of the improvement of the Salem-Silverton County Road from Pudding River to and through the town of Silverton. The Engineer recalled that bids were opened today for construction of a section of this road from Middle Grove to Pudding River. He estimated the cost to extend the improvement from Pudding River to McClaine Street in Silverton at $250,000, the cost to continue the improvement to 2nd Street at $215,600, and to construct the section from 2nd Street to a connection with the Cascade Secondary Highway north of Silverton at $150,000. He pointed out that no part of the improvement is contained in any construction program and suggested that no commitment of any kind be made concerning the project until an accurate survey is made. The Commissio deferred action on the matter pending the appearance of a delegation from Silverton on the following day. (See additional entry ahead.)

The Commission considered a request from the Clarno Grange, Wheeler County, for permanent improvement of the Shaniko-Fossil Secondary Highway No. 29 The Engineer advised that this highway is 43.65 miles in length and that only a short section south and west of Fossil has been improved by grading and gravelin and that to reconstruct the balance, including oiling, would cost approximately $2,000,000. He suggested that if the road is reconstructed, it be built over a period of time and that an expenditure of $100,000 to $150,000 be considered in arranging the next construction program. Following discussion the Commission unanimously denied the request.

A request from the Yamhill County Court for replacement of an existing bridge across the North Yamhill River on the Federal Aid Secondary County Road just west of the City of Carlton was considered by the Commission. The Engineer advised that the bridge was built by the county in 1914 on a State Highway Department design and should be safe under 20-ton loads; however, it is a narrow bridge structure and the trestle approach is badly decayed and should be rebuilt within the next few years in order to keep the bridge serviceable. He estimated the cost to replace the bridge, including approaches, at $125,000. The Commission deferred action on the request pending inspection of the structure. The matter is to be considered in formulating the next construction program.

The Commission considered and approved an agreement with the City of Milton, Umatilla County, covering a cooperative drainage project adjacent to the Oregon-Washington Highway in Milton, as previously authorized at its meeting on March 12, 1948.

The Engineer reported that the City of Arlington has satisfied the legal requirements with respect to the expenditure of 1945 State Tax Street Funds received by the city in 1946 and that the plans for the project which they expect to finance with such funds have been examined and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the cities of Haines and Arlington have satisfied the legal requirements with respect to the expenditure of 1946 State Tax Street Funds received by them in 1947 and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory. He recommended approval of the plans of both cities. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto, marked EXHIBIT "D", which by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer further reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of the 1947 State Tax Street Funds received by them in 1948 and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory: Amity, Arlington, Brownsville, Cascade Locks, Condon, Eagle Point, Estacada, Gold Hill, Ione, John Day, Lakeview, Lostine, North Powder, Oceanlake, Pilot Rock, Scappoose, Sisters, and Sublimity. He recommended that the plans of each city be approved. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with respect thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed briefly a request from the State Fish Commission for the designation and improvement as a state secondary highway of the county road which extends from Nashville to Siletz in Benton and Lincoln Counties. The Engineer advised that the eight-mile section between Siletz and Logsdon (Orton) is a Federal Aid Secondary Highway and that it will cost about $200,000 to improve it between these points. The Commission deferred action on the matter pending the appearance of a delegation the following day. (The delegation that appeared later was told that the Commission is not in position to approve this project in the immediate future.)

A petition was presented from residents of Coos Bay and vicinity requesting (1) the construction of a bridge across Coos River replacing Enegren Ferry on the Coos River Secondary Highway in Coos County; (2) construction of a road along the right bank of Coos River between Enegren Ferry and Graveyard Point as an approach to said bridge; and (3) operation of the Enegren Ferry 24 hours daily until completion of the bridge or until the road along the right bank of Coos River to a connection with the county road at Cooston is constructed. The Engineer quoted from his written report to the Commission on the subject, dated June 22, 1948, in which he advises that four bridge sites have been investigated

and concludes that of the four sites the one at Catching Slough will afford the greatest benefit to the traveling public and the State Highway Commission; further, that a bridge should be constructed across Coos River as soon as there are funds to finance it. (See written report in general files for details.) The Commission took no definite action on the matter except that Commissioner Chandler suggested that the Bullards Bridge should be given priority consideration over the other project.

The Commission also discussed briefly a request from the Weyerhaeuser Timber Co. and its logging road contractor, Morrison-Knudsen Co., for 24-hour operation of the Empgren Ferry as an accommodation to secure full advantage of daylight hours. The Engineer advised that the present ferry operates 20 hours daily and that the additional four hours of operation would not handle any more traffic but would be a matter of convenience only. He recommended against the 24-hour operation as he did not consider the extra expense, estimated at $5,000 annually, justified. Commissioner Chandler advised that the Morrison-Knudsen Co. is now operating two shifts daily but will soon increase them to three. He suggested that the state might add one more hour to the present ferry schedule for the benefit of the Weyerhaeuser Timber Co. The Engineer was instructed to investigate the feasibility of starting operations of the ferry an hour earlier in the morning and quitting an hour earlier; also, the feasibility of operating the ferry on a 21-hour basis. His findings are to be transmitted to the members of the Commission by telephone when final instructions will be given. The request for 24-hour operation was denied.

The meeting adjourned at 5:00 p.m. to reconvene on the following day at 9:00 a.m. in the same room.

Portland, Oregon
June 29, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Sitffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Wenner, Assistant Counsel
M. E. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read in conformance with previously published notice, following which Chairman Benfield announced that awards of contracts would be made at 3:00 p.m. in the same room:

INDEPENDENCE-ALBANY COUNTY ROAD IN BENTON COUNTY

FIR GROVE SECTION

	Using Asphalt	Using Tar
Stevenson Construction Co., Salem	$ 45,362.00	$ --

The Commission again discussed the report of the Engineer and Chief Counsel on the question of purchasing right of way for the proposed re-alignment of the Youngs Bay-Lewis and Clark River Section of the Oregon Coast Highway in Astoria. As a result thereof the Chief Counsel was authorized to negotiate such right of way and the Engineer was instructed to prepare necessary descriptions for it.

The Commission also discussed a request from the City Planning Commission of Klamath Falls that right of way for the proposed west side by-pass for The Dalles-California Highway at Klamath Falls be secured now, but deferred action pending the appearance of a delegation on this subject. (See minute entry ahead.)

Reconsideration was given by the Commission to the request of the Rogue River Valley Irrigation District for permission to construct its irrigation canal on state highway property adjacent to the Crater Lake Highway, in Jackson County. Pursuant to instructions received on the previous day, the Engineer and the Chief Counsel reported additional facts and recommended sale of the strip of land to the district rather than leasing it, if the district will pay a reasonable sum for it. The Commission approved the recommendation unanimously.

A delegation from Silverton and vicinity consisting of M. G. Gunderson, O. Bailey, Earl Adams, Robert Duncan, and Oscar Edlund, businessmen; Henry Alm, Postmaster; Gus Herr, President of the Chamber of Commerce; Henry Pritzlaff, Secretary of the Chamber of Commerce; Michael Cosovich, representing Mayor Dickerson; and Dr. P. A. Loar, Chairman of the Planning Commission, appeared before the Commission regarding the Salem-Silverton County Road. Dr. Loar was spokesman for the group. He asked the Commission to extend the present improvement of this road from its present terminus at Pudding River into Silverton including a new bridge across Silver Creek. He also asked the Commission to acquire the right of way needed for a proposed extension of this road to a connection with the Hillsboro-Silverton Secondary State Highway. The Commission pointed out that the road referred to is a county road under the jurisdiction of the Marion County Court, whose obligation it is to acquire any right of way that

is needed; also, that the Commission is in no position now to make a commitment as to construction of the extra section but will consider it, along with the many other projects that have been requested, in the formulation of its next construction program which will be arranged after the Commission has completed its inspection trips this summer.

A delegation representing the Ashland and Jackson County Chambers of Commerce appeared before the Commission and requested the further improvement of the Pacific Highway between Central Point and Ashland. Present were Franklyn J. Van Dyke, State Representative; Ed Singmaster; Paul Rynning, County Engineer; and Don Lane, Manager, Jackson County Chamber of Commerce. Mr. Van Dyke was spokesman for the group. He requested construction of a four-lane highway between Central Point and Ashland as the project of primary importance to the people of the Ashland district, and gave statistics as to population, resources, etc., in support thereof. It was his thought that the increase in population, the large volume of traffic that uses the highway between these points, together with the traffic congestion that occurs near the cities of Ashland and Medford, and the traffic accident record are justification for such improvement. Messrs. Singmaster, Rynning, and Lane also spoke for this improvement. Mr. Rynning spoke in behalf of the Jackson County Court which, he said, is very desirous of this improvement. Chairman Banfield inquired if the delegation considers this improvement of more importance than the reconstruction of the crooked section south of Canyonville and was answered in the affirmative, whereupon he advised that the Commission would give the matter consideration. In conclusion Mr. Van Dyke advised that their district is developing rapidly industrially and urged acquisition of right of way now for a four-lane highway while it can be purchased at reasonable expense.

A delegation from Lane County, consisting of Messrs. Gene Washburne, Swisshome, and Lloyd Hyde, Alsea, appeared before the Commission and urged the improvement of the Alsea-Deadwood Secondary Highway No. 201, in Lane County. Mr. Washburne was spokesman. He presented a petition containing the signatures of 450 residents and property owners of the district requesting the improvement, and a letter from Willamette Post No. 293, Veterans of Foreign Wars, Eugene, endorsing the petition. Mr. Washburne recalled that in the fall of 1947 the Commission tentatively promised the improvement, but the work has not been done and as a consequence, during the last winter, the highway at times was impassable. In the discussion that followed Chairman Banfield advised that investigation made at that time revealed that it would cost about $125,000 to provide even a temporary improvement, which sum is far more than the Commission could spare for the purpose in view of the volume and kind of traffic that the road carries, and the fact that there are so many other roads throughout the state of more importance to the general public. Mr. Washburne urged that something be done to maintain travel over the road this winter. The Engineer advised that rock had not been placed on the roadway, as was contemplated, because none had been found available. The Commission instructed the Engineer to make further investigations with respect to suitable rock sources and to report his findings at the next meeting of the Commission.

A delegation from Eastern Oregon, consisting of County Judge Nelson B. Higgs and County Commissioners J. L. McCullough and A. A. Bardwell, Harney County; William Meiners, County Commissioner, Umatilla County; and Lloyd Ogilvie John Day, representing the Three Flags Highway Association, appeared before the Commission and inquired as to the Commission's plans with respect to the following highways: (1) Completion of the Pendleton-John Day and John Day-Burns Highways, in Grant and Harney Counties; (2) Completion of the Dixie Summit Section of the John Day Highway east of Prairie City, Grant County; (3) Reconstruction of the John Day-Mt. Vernon Section of the John Day Highway, Grant County; (4) Reconstruction of the Beech Creek Section of the Pendleton- John Day Highway, Grant County; (5) Improvement of the Willamette Highway over Willamette Pass; (6) Completion of the Warm Springs Highway between Madras and Wapinitia Junction; and (7) Completion of the Rome-Princeton Secondary Highway, in Malheur County. Judge Higgs was spokesman for the group. He stressed the need for further improvement of the John Day-Burns and Pendleton-John Day Highways. Chairman Banfield explained in considerable detail the financial set-up for the improvements requested, including state, Federal aid, and forest highway funds and advised that insofar as the first Three-Year Program is concerned, the Commission has made no changes in its program and expects to carry through that program as originally outlined as funds become available to finance the work. He pointed out that it was impossible to carry through on the program originally arranged for third year postwar forest highway funds because the previous Congress did not appropriate necessary funds, but the prospects are that the present Congress will make such funds available so that work can go forward; however, nothing definite can be stated at this time because official notification has not yet been received from the Federal authorities. The Commission, he said, has not provided a program for Federal funds recently made available but plans to make several inspection trips througout the state this summer and when they are completed, will then be in position to arrange a program and will be pleased to confer with the county courts and others interested as to the projects which should be included therein, as was done when the first Postwar Program was arranged.

The County Court of Crook County, represented by County Judge Asa W. Battles and County Commissioner J. C. Minson, appeared before the Commission regarding the designation as a state secondary highway of the county road which extends southeasterly from Prineville to a connection with the Crooked River-Paulina Secondary Highway No. 380 near the "Shorty" Davis Ranch, locally known as the "Combs Flat Road". Commission Chandler gave as his understanding, from a discussion of the subject that Commissioner Schaupp and he had with the County Court on a recent inspection trip, that Crook County was to contribute $35,000 of county money, to be matched by a like amount of state money, to finance this road improvement, the state then to take over the road on the condition that the county would assume jurisdiction over the present secondary highway from the "Shorty" Davis Ranch to a connection with the Crooked River Highway; also, that the County Court was to make formal written application to the Commission to that end, but to date the application has not been received. Commissioner Schaupp confirmed the statements of Commissioner Chandler. Judge Battles agreed to furnish such written application in the near future. He was informed that the Commission would take "quick" action upon receipt of the court's letter.

The following persons composed a delegation which appeared before the Commission and requested improvements to the Nashville-Siletz County road, in Lincoln County: R. W. Nash, Nashville; Vance Taylor, Lions Club, Corvallis; and J. C. Kendall, Attorney, Portland. Mr. Kendall acted as spokesman. He stated that his group is particularly interested in the improvement of the easterly end of the road, between Nashville and Orton, inasmuch as that section is not on the Federal Secondary System, and inquired if the Commission is in position to give them any definite information concerning it. The Engineer reported that it would cost about $200,000 to reconstruct the section from Siletz to Orton for log truck traffic, and that he had no information as to how much it would cost to reconstruct the section east of Orton. Mr. Nash asked the Commission to designate the entire county road from Nashville to Siletz as a state highway. He alleged that this route, when constructed, will afford a much better route than the present one due to a low 250-foot summit crossing and a water grade the balance of the distance, and in addition, will serve a very fertile valley that is now undeveloped and will make it possible to market approximately one billion feet of timber in the district. Mr. Nash further stated that Lincoln County has $50,000 of county funds which it is willing to contribute as match money toward the financing of the project, and the local people have raised several thousand dollars additional, which they will be pleased to put into the work. Chairman Banfield stated that the Commission is not in position at this time to take on additional state highways due to the big demand for funds to improve the highways on the present system, and the Commission does not want to give any encouragement for the project under discussion. Mr. Kendall then asked for the improvement of the section between Orton and Siletz and was informed that the matter is being studied by the Engineer and the Commission will consider it when the Engineer's report is received.

Messrs. Paul Landry, Ed Bell, and Fred Hoagland, representing the City Council and the City Planning Commission of Klamath Falls, appeared before the Commission regarding the adoption of a proposed west side by-pass route for The Dalles-California Highway in Klamath Falls and the acquisition of right of way therefor. Mr. Landry headed the group. He stated that the City of Klamath Falls and Klamath County own property along the proposed route which they are holding, pending a decision by the Commission whether or not the state needs it as right of way. If the property is not needed as right of way, he said, it will be sold so it can be placed back on the tax rolls. The Engineer advised that the general route for this by-pass has been selected but has not been approved by the Commission, and it now appears necessary to make some changes due to the recent building of an auto court at the south end of the project. He also said that he expects to make a complete report to the Commission at its next meeting. Chairman Banfield advised that the Commission probably would take some action before adjournment with respect to the general location of the by-pass. Following departure of this group, the matter was again discussed and the Engineer was authorized to make a detailed survey of the project and to avoid the auto court development if possible.

Pursuant to instructions from the Commission on the previous day, the Engineer and the Chief Counsel presented their joint recommendation with

respect to the regulations of trucks operating on state highways. The Chief Counsel read aloud a draft of a resolution on the subject which, he said, expressed the wishes of the Commission as he and the Engineer understood them. The Commission approved and by unanimous vote adopted the resolution as read, a copy of which resolution is attached hereto, marked EXHIBIT "B", and by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered a request from Mr. Russell Hubbard, Reedsport, for a survey of proposed new alignment of the Oregon Coast Highway between Reedsport and North Bend as a convenience to him in laying out a subdivision south of Reedsport. The Engineer advised that he does not have data on this subject and that it would be necessary to make a survey in order to get necessary information. The Commission declared its reluctance to divulge advance plans for any highway improvement that is still in embryonic stage and accordingly ordered that Mr. Hubbard be informed that the Commission has no new road or alignment projected here at the present time.

The Engineer brought up for discussion the need to expedite the [illegible] improvement of the Willamette Highway east of Meridian Dam which, for the most part, has only a temporary roadway surface. He briefly recited the history of this project pointing out that an amount of $700,000 was set up for it in the First Year Forest Highway Program and an amount of $450,000 was tentatively approved for the Third Year Forest Highway Program, but neither amount was made available, so the proposed work could not be done. He estimated the present-day cost to complete the 15-mile section east of Salt Creek Tunnel (M.P. 56.52 to M.P. 71.52) at $700,000 and suggested, because present indications are that there will be a deficiency of Forest Highway Funds, that the Commission allocate state funds in such amount to finance the work which is urgently needed. The Commission unanimously approved the project as outlined by the Engineer and an allocation of $700,000 of state funds therefor, pursuant to his suggestion, thus confirming action taken previously at its May 24th meeting. (See Engineer's report on this subject, dated June 24, 1948, in general files for details.)

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

A delegation composed of the following persons from Central Oregon, representing the John Day-Ochoco Highway Association, appeared before the Commission in the interests of the Ochoco Highway:

A. R. Bowman, insurance, Prineville
John Hudspeth, representing Hudspeth Pine, Inc. and Hudspeth Sawmill Co., Prineville
W. Lester Houk, Central Oregon Chamber of Commerce
H. L. Munkru, Chamber of Commerce, Prineville
C. C. McGlenn, Manager, City of Prineville Railway, Prineville
R. P. McRae, Mayor, Prineville
C. W. Foster, farmer, Prineville
E. E. Gervais, timberman, Prineville

H. S. Mesereau
R. G. Jones, Forest Products Co.
Bruce A. Scott, Dodge-Plymouth Agency, Prineville
L. E. Bertram, Manager, Prineville Machinery and Supply, Prineville
M. E. Owens, Owens Freight Lines, Prineville
Arthur S. Michel, merchant, Prineville
Richard F. Houk, Ford dealer, Prineville
Jack Marks, H. G. Foran Lumber Co., Prineville
R. B. Bachelder, merchant, Prineville
R. A. Thompson, trucking, Prineville
Jake McDaniel, representing Evans Pine, Inc., Prineville
Rep. W. B. Morse, Prineville
Floyd L. Martin, Chamber of Commerce, Portland
A. M. Erickson, Erickson Food Market and Erickson Dept. Store, Prineville
Henry C. Hulett, Ochoco National Forest, Prineville
W. L. MacDonald, U.S. Forest Service, Portland
Frank B. Folsom, U.S. Forest Service, Portland
Dan E. Taylor, Taylor Equipment Co., Prineville
Keith C. Province, Mitchell Pastime, Mitchell
H. H. Hinninger, Pacific Power & Light Co., Prineville
Clarence Hudspeth, Mt. Creek Mill, Mitchell
R. G. Gauntlett, Mitchell Cafe, Mitchell
George M. Henderson, First National Bank, Portland
Earnest R. Brookshire, Brookshire & Son, Mitchell
Ed Krupke, stockman, Mitchell
John Collins, stockman, Mitchell
Bud Spoo, lumberman, Mitchell
L. E. Coles, Manager, Ochoco Irrigation District
Guy F. Wade, Green Spot of Oregon
Howard W. Turner, Madras
C. A. VanWinkle, Mitchell
Lloyd Ogilvie, John Day
Asa W. Battles, Prineville
Wallace Almark, Prineville
Cecil M. Sly, Prineville
Jess C. Minson, Powell Butte

Mr. Bowman was spokesman and introduced the speakers. He presented a brief in support of the oral request containing endorsements from numerous industries which operate in this vicinity, favoring the completion of this highway. Speaking in behalf of the project were Messrs. Mesereau, Ogilvie, Krupke, Spoo, Hudspeth, McGlenn, Rep. Morse, Hulett, and McDonald. Numerous oral arguments were presented in support of their brief.

Chairman Benfield expressed regrets that all of the construction work contemplated in the Three Year Postwar Program could not be completed as anticipated, particularly the Forest Highway Projects which are involved in the completion of the Ochoco Highway. He explained the Forest Highway Fund set-up, advising that a definite program was arranged with the Public Roads

Administration and the U.S. Forest Service for the first two postwar years and a tentative program was arranged for the third postwar year, but because Congress did not appropriate sufficient Forest Highway funds to finance all of the work, construction was limited to projects contained in the first postwar year program. The Commission, he said, now understands that the present Congress has appropriated additional funds for forest highway work and if the funds materialize, the Commission hopes to be able to carry through the forest road projects as already planned and to secure the approval of the program tentatively set up for the third year. Chairman Banfield also explained that because the Ochoco Forest Road Project could not proceed, the Commission considered it advisable to transfer, temporarily, Federal Aid monies set up for an adjoining section in order to finance additional work on the Warm Springs Highway; however, the Commission intends to restore funds to the Ochoco Highway as soon as the new Federal money is made available, which will permit completion of the project as originally arranged. He pointed out that th Commission is doing the best it possibly can under the circumstances and while the Commission's intentions are the best, it cannot promise that it can do everything that the delegation asks because similar requests have been received from other sections, all of which are legitimate, and there may not be sufficient money for all.

In reply to an inquiry from Mr. Mesereau whether or not US28 will benefit by the new monies, Chairman Banfield advised that the district served by US28 is now about two years behind in construction, and it is the intention of the Commission to follow through on the original construction program for this highway if at all possible. This concluded the conference.

A delegation representing the Bend and Central Oregon Chambers of Commerce appeared before the Commission regarding the completion of the Warm Springs Highway. State Representative William Niskanen, Bend, headed the group which included William Baer, Chairman, Highway Committee, Bend Chamber of Commerce, Bend; R. W. Sawyer, Bend; Floyd West, Manager, Bend Chamber of Commerce, Bend; D. W. Poole, Redmond; Max A. Pinney, Redmond; Charles Stark, Manager, Klamath Falls Chamber of Commerce, Klamath Falls; and Judge C. L. Allen, County Judge, Deschutes County. Mr. Niskanen stated that the people of Central Oregon are disappointed in the noncompletion of this highway which, he alleged, has been scheduled for construction for fifteen years, and which, in 1938, they were assured would be completed in the near future. He referred to a diversion of funds from the Warm Springs to the I.O.N. Highway in 1938 and declared that they were definitely assured at that time that every effort would be made to concentrate funds on the Warm Springs Highway when the I.O.N. Highway was completed. He expressed appreciation of the fact that the war held up construction, however, added that the war has been over for a long time but the highway is still in an uncompleted status. Mr. Niskanen stressed the need to complete this highway with particular reference to the Mill Creek Bridge, from the industrial, agricultural, and social standpoints, and requested definite assurance that the Commission will take early action so there will be a reasonable chance that the highway will be open for public use early in the spring of 1949. He inquired as to the plans of the Commission in that regard.

Charlie Stark, Manager, Klamath County Chamber of Commerce, stated that the people of his district are interested in this project but not to the extent that it be a substitute for the Willamette Highway project, which is their first concern. Anything that can be done for the furtherance of the Warm Springs Highway, he said, will be in the best interests of the general traveling public.

Chairman Banfield explained at considerable length the reasons, financial and otherwise, why the Warm Springs project has not been completed, and the plans of the Commission to complete it. He first corrected Mr. Niskanen's statement that the people had been given definite assurance that the highway would be completed by 1948 by stating that the records do not disclose that there has been any set obligation on the part of the Commission to complete the project at any particular time. He also explained the procedure followed by the Commission in programming the funds available, including State, Federal Aid, and Forest funds, with the approval of the Federal agencies concerned. He pointed out that bids have been received on the Mill Creek Bridge construction on three different occasions, but the work was not contracted on the first occasion because the Federal Authorities in Washington, D.C., would not approve the award, and on the second and third occasions the bids were considered too high. The Engineers are now redesigning the structure, he said, for a different type of facility, and it is anticipated that the project will be re-advertised for bids to be received in September, 1948. Chairman Banfield also pointed out that the Commission, in its endeavor to expedite completion of this highway, arranged the temporary transfer of funds from another project that could not go forward because of lack of Forest Highway money, and also advanced state money, to finance work at the north end. In conclusion, Chairman Banfield advised that the Highway Commission has never tried to dodge any responsibility with respect to this project, but, on the other hand, is doing its best to expedite it, regardless of the feeling of the group, and expects to continue to do so.

Mr. Baer also made a few remarks concerning this project.

The Commission discussed with the Engineer the bids received at the morning session and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows, the action of the Commission with respect to each project being by unanimous vote:

"Fir Grove Section of the Independence-Albany County Road in Benton County; 2.14 miles of grading, surfacing and oiling. Stevenson Construction Co. of Salem submitted the low bid for this job at $45,362, using asphalt. The second low bid was submitted by Allen E. Sackett and Gatchel Sand and Gravel Co., Hood River, at $45,699.50, using asphalt. Five higher bids were received. The Commission has awarded this contract to the low bidder, Stevensen Construction Co.

"Riddle Drainage and Bituminous Macadam Surfacing Project on Main and Fourth Streets in the City of Riddle, Douglas County; 0.27 mile of Type B-2 wearing surface. Roseburg Paving Co., Roseburg, submitted the low bid for this job at $12,007.25. The second low bid was submitted by Jack Robinson, Waldport, at $16,412. One other bid was received. The Commission has awarded this job to the Roseburg Paving Co.

"Addition to office building at Roseburg in Douglas County; 24' x 60' extension on frame office building. VaDare Construction Co., Portland, submitted the low basic bid at $15,860 and a basic bid less the alternate of $15,210. Todd Building Co., Roseburg, submitted the second low basic bid at $22,332 and a basic bid less alternate at $21,907. No other bids were received. The Commission has rejected all bids on this job as being too high.

"Eugene (High Street-Walnut Street) Section of the Pacific Highway in Lane County; 1.51 miles of grading and paving. Del R. Beebe Construction Co., Eugene, submitted the low bid for this job, using asphalt, at $378,025.25. The second low bid submitted was the joint bid of E C. Hall Co. and J. C. Compton Co., Portland, using asphalt, at $399,936. One other bid was received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Lost Creek-Lowell Section of the Willamette Highway in Lane County. 4.15 miles of grading, surfacing, and oiling. Roy L. Houck, Jr., Salem, submitted the low bid for this job, using asphalt, at $295,030.50. The second low bid was submitted by E. C. Hall Co., Portland, using asphalt, at $309,062.50. Two higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Brownsville and Sweet Home Grading and Paving Project on two city streets in Brownsville and on two city streets in Sweet Home, Linn County; 0.7 mile of grading and 1.0 mile of paving. Warren Northwest, Inc., Portland, submitted the only bid for this job at $45,351. The Commission has awarded the contract to Warren Northwest, Inc., at its bid price.

"Dallas, Independence, and West Salem grading and paving project on city streets in Dallas, Independence, and West Salem, Polk County; 0.25 mile of oiling, 1.0 mile of paving, and other work. Warren Northwest, Inc Portland, submitted the only bid for this job at $56,219, using asphalt. The Commission has awarded the contract to Warren Northwest, Inc., at its bid price."

Mr. A. J. Beddingfield, Attorney, Coos Bay, representing Coos Bay Lumber Co., and Mr. David L. Davies, representing Evans Products Co., comprised a delegation which appeared before the Commission seeking relief from a charge that is being made by the U.S. Forest Service for the truck-hauling of logs over a forest service road south of the town of Powers. Mr. Beddingfield explained that the Forest Service maintains a forest development road which extends easterly about 20 miles from the county road about five miles south of Powers, which road the Coos Bay Lumber Co. is using in connection with its logging operations in the same vicinity, and that recently the company, as well as other owners of private stands, was given notice that it would have to pay a charge of five cents per mile per M-FBM of timber that it hauled over the road, although this charge since has been reduced to three cents because an arrangement was made with some of the loggers to perform certain maintenance work. Mr. Beddingfield pointed out that the Attorney General heretofore has held that traffic over Forest roads, when these roads are used by the public generally, becomes subject to regulation by the Public Utilities Commissioner and payment of the gasoline tax, which places the company in a position of being taxed twice. He asked the Commission to take action as is necessary to

relieve his company and others from such double taxation and suggested that that might be accomplished by the state taking over and maintaining the road. Mr. Davies endorsed the remarks of Mr. Beddingfield and advised that the double taxation is going to cost the Evans Products Company $30,000 annually. It was his thought, inasmuch as the general public will be benefitted by the road maintenance, that the public should pay the expense involved. Chairman Banfield advised that the Highway Commission is in the position where it cannot tell the Forest Service how to operate its road; neither can the Commission tell the Secretary of State nor the Public Utilities Commissioner the amount of fee to be charged since the road is not on the state highway system, and the Commission does not feel that it should be added to the system because there are more roads on the system now than can be properly cared for. At his request, the Chief Counsel advised from the legal standpoint. He said the only thing the Highway Commission can do about the matter is to notify the state agencies concerned that the Commission will offer no objections to granting the relief requested, inasmuch as those agencies have to comply with the statutory requirements with respect to their responsibilities. He added that the Highway Commission is strictly within its rights in conveying such information to these agencies. Following further discussion the Commission voted unanimously to act pursuant to the advice given by the Chief Counsel and thereupon referred the matter to the Engineer to contact the Secretary of State, the Public Utilities Commissioner, and the Superintendent of State Police with regard thereto.

County Judge L. D. Felsheim, Coos County, appeared before the Commission regarding a previous request by the Coos County Court for the substitution of a bridge project for a resurfacing and oiling project on the Coquille-Arago-Myrtle Point County Road, a Federal Aid Secondary Highway. Chairman Banfield advised that this matter has been investigated by the Engineer who estimates the cost of the bridge at approximately $250,000 whereas the allocation set up for the resurfacing and oiling project is only $130,000. He further advised that due to this difference in cost the Commission would have to give the matter more study and, whereas the Public Roads Administration is agreeable to the substitution, there still is the question of financing the work. He pointed out that if the Commission should approve the change, it might result in the county missing out on some other project. Judge Felsheim then advised that an understanding has been reached with the people who want the oiling job, that the county will spend for such work the amount that it has set up to repair the bridge, so if the Commission can hold in reserve its $130,000 until its next state program is prepared, then add to it a sufficient amount to finance the bridge construction, that will be satisfactory to all. He was informed that the Commission will endeavor to comply with this suggestion.

Judge Felsheim also inquired concerning the decision of the Commission with respect to the construction of a bridge across Coquille River at Bullards Ferry. Chairman Banfield advised that the Commission is being put to such heavy expense for repairs necessitated by the Columbia River flood and for other emergency purposes that it now appears necessary to hold in abeyance, for the time being, further consideration of this bridge; moreover, it is also necessary to defer preparation of the final design and plans for the structure. He added,

however, that the Commission has plans to make several inspection trips this summer and when they are completed, the matter will be brought up for discussion again.

Judge Felsheim also inquired if the Commission has reached a decision with respect to the county's request for construction of a bridge to replace the Enegren Ferry on Coos River. He was informed that the Engineer has reported on the matter but the Commission has not yet acted on it. It was pointed out that four locations were investigated by the Engineer who estimates that it is going to cost about $700,000 to provide a suitable substitute for the ferry, in view of which the Commission may leave it up to the county to decide which project should go forward--this one or the Bullards Bridge. Judge Felsheim expressed a decided preference for Bullards Bridge as the county's No. 1 project.

Mrs. John Raeish, Portland, appeared before the Commission regarding settlement of her claim, previously filed with the Commission, arising out of construction of a relief map of the State of Oregon which is now reposing in the office of the State Highway Engineer. The Chief Counsel advised that he has carefully studied the contract between the Commission and Mrs. Raeish's former husband, John Shaw, for the production of the map, and it appears, under the terms of this contract, that Mr. Shaw's rights attached only to the mold, and anything beyond the right to use the mold or to take reproductions of the map would be by voluntary action of the Commission, because the Commission is not legally obligated under the terms of the contract to grant such privilege. He read aloud his letter to the Commission on the subject. (See copy in general files.) It was the decision of the Commission that it must abide by the opinion of its Chief Counsel, and that unless and until the Engineer and the Chief Counsel report that an injustice has been done, the Commission can take no action other than to deny the claim.

The Engineer brought up for discussion the question of width of right of way to be secured for the Great Northern Crossing-Merrill Section of the Klamath Falls-Malin Highway in Klamath County, in view of irrigation ditches existing adjacent to the adopted highway location. He recommended right of way 100 feet wide which would provide for four lanes of traffic, would leave the irrigation ditches entirely on private property, and would make it possible to secure side borrow for fills, thus decreasing construction costs. Commissioner Schaupp suggested a 60-foot right of way so as to avoid condemnation and the moving of houses to accommodate the irrigation ditches, which would be necessary if a 100-foot right of way were acquired. Following discussion the Commission decided unanimously in favor of a 60-foot right of way provided such width meets the approval of the Public Roads Administration.

The Engineer reported that, pursuant to authority previously given him by the Highway Commission, he has awarded contracts as follows, bids for which were received by the Commission on May 24 and 25, 1948, the conditions of the awards having been satisfied:

Grading, surfacing, and oiling on the Hood River Junction-Odell Creek Section of the Odell Secondary Highway in Hood River County; contract awarded May 28, 1948, to the low bidder, Shoreline Construction Company.

Surfacing and oiling on the Dry Creek-West Ranch Section of the Island City-Summerville County Road in Union County; contract awarded May 28, 1948, to the low bidder, E. C. Hall Company.

Grading, surfacing, and oiling on the North Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Secondary Highway, Wallowa County; contract awarded May 28, 1948, to the low bidder, J. C. Papin.

The Commission by unanimous vote confirmed the awards as reported.

The Engineer asked the Commission to confirm the telephonic authority previously given him to negotiate contracts with Parker-Schram Company, General Construction Company, and Lloyd Calkins for emergency construction necessitated by reason of the Columbia River flood conditions. The Commission unanimously confirmed such authority and the awarding of contracts to the contractors mentioned.

In this connection the Engineer requested authority to negotiate with the General Construction Company for the replacement of a hydraulic fill on Swift Secondary Highway in North Portland near the point where the flood broke through. He estimated that 55,000 cubic yards of fill material would be required and advised that the contractor will do the work at a cost of 55 cents per cubic yard. He also requested authority to negotiate a contract with Parker-Schram for paving the fill at a cost of $7.00 per ton in place. The Commission unanimously approved both requests.

The Engineer reported on damage caused by the recent Columbia River flood. He estimated the cost to restore highway facilities by reason thereof at approximately $500,000, of which amount, he said, the Federal Government probably will contribute $240,000. In addition he mentioned the need to rebuild, at a higher elevation, a three-mile section of the Upper Columbia River Highway in the vicinity of Celilo Canal, between Mile Points 95.4 and 98.4, where flood damage also occurred, and which he estimated would cost $250,000. The state, he said, can expect reimbursement in the amount of $150,000 from Federal emergency flood relief funds for this work. He summarized the expenditures as a total first cost to the state of $750,000 out of which, he said, reimbursement in the amount of $390,000 could be expected from the Federal Government. He recommended approval of the Celilo Canal project, also that the general budget be increased $50,000 and the special maintenance budget be increased $700,000 to take care of the total flood damage expense. The recommendations were approved by the Commission by unanimous vote with instructions to transfer the total amount from the construction fund account.

Further, in this connection, the Engineer requested authority to present to the Federal Government for reimbursement the following flood damage projects: Denver Avenue-Union Avenue project at an estimated cost of $390,000; a project along the new grade of the Upper Columbia River from Troutdale to Dodson at a cost of $25,000; and the Upper Columbia River Project above The Dalles near the Celilo Canal at an estimated cost of $250,000. The Commission approved the request unanimously.

The Engineer requested instructions with respect to the handling of overruns on project authorizations. He presented a written report on the subject (see copy in general files), including a list of Federal Aid Postwar Projects under contract and showing the amount originally authorized, the amount of the contract authorization, and the amount of the latest revised estimate for each project. He pointed out that some of these projects have overrun and some have underrun, but during the past 15 years the average has remained within one percent of the project authorizations. He also said that in the past, the Engineering Office has assumed authority to authorize minor overruns of project authorizations if such overruns were unavoidable or essential to the satisfactory completion of the project, notwithstanding that the present Commission has taken no definite action granting such authority. He suggested, in order to avoid the necessity of referring to the Commission each project overrun or underrun, that he be authorized to approve overruns on project authorizations in amounts not to exceed five percent on projects in excess of $100,000 and to approve ten percent overruns on projects under $100,000, with the provision that the total contract authorization for all projects under contract shall not be exceeded without authority from the Commission. The Commission unanimously approved the Engineer's request

The Engineer reported that the survey for the Bunker Hill-Delmar Section of the Oregon Coast Highway has been completed and asked the Commission to approve this survey as the permanent route of said highway section. After due consideration the Commission approved the survey and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of state highway, to wit:

Bunker Hill-Delmar Section of the Oregon Coast Highway, in Coos County;

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the survey of the Bunker Hill-Delmar Section of the Oregon Coast Highway together with the maps, which for identification purposes bear the map file Nos. 5B-12-2, 5B-23-19, and 5B-23-20, field notes and other engineering data submitted by the Engineer hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-ninth day of June, 1948.

The Commission considered the following requests for extensions of time within which to complete highway contracts:

Porter W. Yett, Contract No. 2892 for grading, paving and structures on the Barnes Road-Multnomah County Line Section of the Sunset Highway in Washington County, requested an extension of time of 303 days from November 30, 1947, to September 30, 1948, within which to complete this job. He stated that unfavorable weather during the grading operations and difficulties in securing labor and materials had prevented completion of the job within the time specified in the contract. The Engineer advised that the reasons given by the contractor for failure to complete the contract within the specified time are correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Vernie Jarl, Contract No. 2919 for grading and surfacing on the Hay Creek-Condon Section of the Wasco-Heppner Highway in Gilliam County, requested an extension of time of 62 days from June 30, 1948, to August 31, 1948, within which to complete this job. He alleged that wet weather, which caused the subbase to be extremely soft and unfit to operate on, prevented completion of the job within the specified time limit. The Engineer advised that the contractor was requested to suspend operations until such time as the subgrade became stabilized. He recommended, in view of the conditions encountered, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

K. F. Jacobsen and Company, Inc., Contract No. 2891 for grading and bituminous macadam surfacing on the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, in Multnomah and Washington Counties, requested an additional extension of time of 75 days from June 1, 1948, to August 15, 1948, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to additional surfacing material which they were ordered to produce and to bad weather conditions. The Engineer advised that weather conditions during March, April, and May were so

unfavorable that it was impossible for the contractor to complete the surfacing and bituminous macadam work on time. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

R. A. Heintz Construction, Contract No. 2887 for grading, surfacing, oiling and structure on the Eagle Creek-Sandy Section of the Woodburn-Sandy Highway in Clackamas County, requested an additional extension of time of 62 days from June 30, 1948, to August 31, 1948, within which to complete this job. They alleged that heavy spring rains prevented completion of the job within the limits of the previously extended time. The Engineer advised that the contractor's statement is substantially true. He added that the contractor also experienced some delay at the start of his operations because of right of way difficulties. He recommended that the additional extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimousl;

Lindstrom Brothers, Contract No. 2931 for bridge construction on the Hillsboro-Forest Grove Section of the Tualatin Valley Highway in Washington County, requested an additional extension of time of 60 days from May 31, 1948, to July 31, 1948, within which to complete this job. They alleged that high water conditions seriously interfered with the progress of their work and as a consequence they were unable to complete their contract within the previously extended time limit. The Engineer advised that the reason given by the contractor for overruning the time limit is substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commissio approved the recommendation unanimously.

Gerald Miller, Contract No. 2948 for grading and topping on the East Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, in Gilliam County, requested an extension of time of 46 days from June 30, 1948, to August 15, 1948, within which to complete this job. He alleged that his failure to complete the job within the specified time limit was due to extremely high water in the John Day River which prevented access to the island from which the selected roadbed topping material was to be secured for this job. The Engineer advised that the reason given by the contractor is substantially correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Porter W. Yett, Contract No. 2853 for paving the North Plains-Barnes Road Section of the Sunset Highway in Washington County, requested an additional extension of time of 107 days from June 15, 1948, to September 15, 1948, within which to complete this job. He alleged that the extremely soft subgrade resulting from extremely unfavorable weather prevented the starting of paving operations before June 15, the date of expiration of the previously extended time. The Engineer advised that due to unusual

and severe weather conditions during the past winter and spring, the subgrade did not dry out sufficiently to permit the placement of any pavement, and very little rock surfacing, so he asked the contractor to postpone such operations until the subgrade was in suitable condition. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Guy F. Atkinson Company, Contract No. 2896 for bridge construction at the Bridal Veil Overcrossing on the Columbia River Highway in Multnomah County, requested an extension of time of 60 days from May 31, 1948, to July 30, 1948, in which to complete this job. The contractor alleged that progress was delayed by the necessity for additional foundation work which prevented completion of the painting work prior to the rainy season and that he was ordered by the Resident Engineer to postpone such work until the dry season arrived. The Engineer advised that all work had been completed, except the painting, well ahead of schedule and that the painting had been delayed for reasons stated by the contractor. He recommeded, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

R. H. Jones, Contract No. 2906 for bridge construction on the Reese Creek-Antelope Creek Section of the Crater Lake Highway, in Jackson County, requested an extension of time of 30 days from May 31, 1948, to June 30, 1948, in which to complete this job. He stated that extremely bad weather and the scarcity of competent labor had prevented completion of the job within the time specified in the contract. The Engineer advised that the structure is open to traffic and that only the painting of handrails and finishing of concrete remains to be done which will not inconvenience traffic. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission granted the extension of time to June 30, 1948, without penalty.

Note: The State Highway Commission, in passing on the contractors' requests for extensions of time within which to complete contracts as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

The Engineer reported that contracts numbers 2819, 2870, 2871, 2875, 2920, 2922, 2926, 2946, 2950, 2951, and 3005, for state highway construction have been completed according to the requirements of the contracts or modifications thereof and that the jobs are now ready for acceptance by the Commission. After due consideration of the Engineer's report with respect to the contracts under discussion the Commission approved and accepted the contracts as reported

and by unanimous vote adopted the attached resolution relative thereto marked Exhibit "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered a letter from the Clatsop County Industrial Committee of Astoria requesting a reduction in toll charges on the Astoria-Megler ferry. The Engineer recommended that the Industrial Committee be advised by letter of the large investment that the state has in the ferry, the fact that it is operated without the cooperation of the State of Washington, and that the present toll rates are necessary to amortize the investment. The Commission approved the recommendation and ordered that a letter to that effect be sent to the committee. The request for a reduction in rates was denied.

The Engineer brought up for discussion a letter from Congressman Lowell Stockman to Malcolm Epley, Herald and News, Klamath Falls, advising that there has been earmarked by the House Appropriations Committee, in the Interior Department appropriation bill now before Congress, $150,000 of Federal Indian Affairs Funds for improvement of the Sprague River County Road in Klamath County provided the state contributes a like amount of state funds for matching purposes pursuant to previous agreement. The Engineer advised that the Commission did have an agreement about three years ago to match $150,000 of Indian Affairs Funds on the Sprague River Road but that this obligation has been fulfilled by the contracting of three bridges on this road at an estimated cost of $150,000. There is no agreement at the present time, he said, for the matching of future funds. The Commission deferred action on this matter pending receipt of additional information from Washington, D.C.

The Engineer requested an additional authorization of $178,300 for the purchase of equipment as follows:

Equipment on Rental

18 light cars	$1,500 ea.	$ 27,000
27 light trucks	2,400 ea.	64,800
3 105 cubic feet compressors	2,200 ea.	6,600
5 jack hammers	250 ea.	1,250
1 sand spreader	1,000 ea.	1,000
4 power saws	500 ea.	2,000
3 tractor dozers	9,000 ea.	27,000
1 trench hoe for Lorain shovel	2,000 ea.	2,000
5 pull graders	2,600 ea.	13,000
Sub-total		$144,650
Office equipment (miscellaneous)		$ 8,400
Radio equipment (change to high frequency - F.M.)		20,950
Traffic engineering equipment		2,400
Engineering equipment (not on rental)		1,500
Photographic Department equipment (camera)		226
Parks Department equipment		174
Total requested		$178,300

The Engineer submitted a written report giving details and showing the status of the equipment budget. (See copy of report in general files.) The Commission unanimously approved the purchase of the equipment as requested.

The Engineer requested authority to purchase two sets of highway loadometers at $550 each, for use where no platform scales are available, and two weightographs at $400 each at a total cost of $1,900. He advised that the weightographs, which will be installed on beam-type scales where considerable weighing is performed, will reduce to a minimum errors made by reason of the personal equation. The Commission approved the request unanimously.

Consideration was given by the Commission to request from the Washington County Court that the existing bridge over Gales Creek on the Tualatin Valley Highway near Forest Grove be given to Washington County when it is replaced by a new structure. The Engineer advised that the bridge referred to is too narrow for re-use on a state highway and recommended approval of the request on the condition that the county will pay the expense of hauling it away. The Commission unanimously approved the Engineer's recommendation.

The Commission considered a proposal from the Bonneville Power Administration to assign to Douglas Electric Cooperative, Inc., and to Lane County Electric, Inc., its interest in certain power line crossings of Primary State Highway No. 1 and Secondary State Highway No. 220, in Lane and Douglas Counties, respectively. The Chief Counsel advised that he could see no objection to the assignments and recommended that they be approved. The Commission approved the recommendation and later in the day signed the assignments.

The Engineer presented for the Commission's consideration a request from Mr. Fred H. Twohy, District Superintendent of the Railroad Mail Service in Portland, for the establishment of a "no parking" zone on US101 in front of the post office in Gardiner, Douglas County, in order to facilitate the receipt and dispatch of mail. He advised that the request has been investigated and recommended that a post office loading zone be designated with "no parking - mail cars excepted" signs installed. The Commission approved the recommendation and thereupon unanimously adopted the attached resolution with regard thereto, marked Exhibit "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A request was presented from the City Council of Cottage Grove for designation of a "no parking" area on South Highway Street (Pacific Highway) for a distance of 70 feet south of 6th Street intersection in Cottage Grove. The Commission approved the request upon the recommendation of the Engineer, who advised that the City Council had passed an ordinance designating the area for no parking. The Commission thereupon adopted the attached resolution relative thereto, marked Exhibit "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered a request from the City of Gold Hill for the removal of existing railroad stop signs on the Sams Valley Secondary Highway at the intersection of 4th Street and the Southern Pacific tracks in Gold

Hill. The Engineer advised that the signs were installed as a wartime measure and were approved by the Highway Commission in July, 1942. Investigation has been made, he said, which reveals that there is about 50 percent observation of the stop signs and that law enforcement is not practical due to the urban nature of the crossing. It was his thought that the signs should be removed. It was the feeling of the Commission that there was good reason for installing the signs in the first place which probably still exists; moreover, the signs would relieve the Commission from responsibility in case of future accidents. Accordingly, the request was denied.

At 4:20 p.m. Commissioner Chandler was excused from the remainder of the meeting.

The Engineer reported on the petition of Portland residents for the installation of a stop and go traffic signal at the intersection of 21st Ave and Powell Boulevard (route of Mt. Hood Highway) in Portland. He recalled that this matter was first considered by the Commission at its May meeting and was referred back to him for further investigation with respect to the existing signal. He advised that the matter was taken up with Mr. Fowler, Traffic Engineer for the City of Portland, who points out that the existing signal is an obsolete type and is not complete in that it has been partially dismantled to provide parts for other more necessary city signals of the same type; also, that the City of Portland is conducting a study for signal needs along Powell Boulevard and plans to submit his recommendations for an eventual signal installation to the Highway Commission when the study is complete. The Engineer recommended that further consideration of this matter be deferred until the traffic engineering studies have been completed. The recommendation was unanimously approved by the Commission.

A request was presented from the City of North Bend for installation of traffic signals at the intersection of Sherman Avenue (Cape Arago Secondary Highway) and Virginia Avenue in North Bend. The Engineer advised that an investigation by the Traffic Engineer reveals a question whether or not signals are needed at this location. When the North Bend-Coos Bay Project on the Oregon Coast Highway is completed, he said, there will be a traffic signal just one block south of this particular intersection, and it is believed that traffic congestion at the Sherman Avenue-Virginia Avenue intersection will be materially relieved when this signal gets into operation. He recommended that the request be denied until a further study can be made after the new highway is open and the other signal put into operation. The recommendation was approved unanimously.

The matter of increasing the amount of the state's cooperation in connection with the installation of flashing signals at the crossing of the Halsey-Sweet Home Secondary Highway No. 212 with the Southern Pacific Company's main line tracks near the town of Halsey in Linn County was discussed by the Commission. The Engineer recalled that the Commission, at its meeting on December 29, 1947, authorized payment with state funds of 50% of the cost of installing a signal at this place, the state's share to be $2,000, but subsequent investigation reveals that, because of the large number of switching

tracks near this crossing, a more expensive type of installation will be necessary to prevent the signal from operating while trains are switching or standing on the adjacent side tracks. The railroad company, he said, is now asking the state to contribute 50% of the cost to install the better type signal which is estimated to cost a total of $6400, which will increase the state's share from $2,000 to $3,200. He recommended approval of the expenditure. The Commission approved the recommendation unanimously.

A request was considered from the Traffic Safety Committee of the City of Klamath Falls regarding the need for traffic control on Alameda Street at Portland Avenue and the Esplanade intersections, and at the crossings on the new highway entering Klamath Falls from the north via Esplanade Street. The Engineer advised that the project now under construction provides a considerable amount of island design and channelization which it is believed will eliminate any acute traffic problems, and whereas it may develop that some sort of signal control will have to be installed, it is his belief that consideration of signalization should be deferred until the new highway facility is completed and there has been an opportunity to observe its operation. He so recommended. The Commission unanimously approved the recommendation.

The Commission considered a request from Henry L. Wiard, Klamath Falls, for the installation of signal lights at street intersections along South 6th Street in Klamath Falls (Green Springs Highway), beyond the limits of the widened section. Mr. Wiard also requested aid in obtaining the removal of mail boxes from the street. The Engineer reported that an investigation of this matter has been made by the Traffic Engineer who recommends against the signal installation because the section is now zoned for a 35 mile-per-hour speed; in addition thereto, the street is posted with standard "look out for pedestrians ahead" signs; moreover, the accident rate is very low. He advised that he concurs in the recommendation. In regard to the mail boxes it was the Engineer's thought that such matter is more or less controlled by the Post Office Department and he recommended that the Commission not intercede in the mail box controversy. The Engineer's recommendations were unanimously approved by the Commission.

The Commission considered a request from the Taft Chamber of Commerce for the installation of a "blinker" caution light at the intersection of the Oregon Coast Highway and Pacific Avenue in Taft. The Engineer advised that investigation disclosed a large volume of traffic at this point, which, in his estimation, warrants the installation of the light. He recommended that a flashing beacon be installed, flashing amber on the main highway and red on the approach streets, at an estimated cost of $250; also, that a pedestrian lane be painted across the Oregon Coast Highway along the northerly side of Pacific Avenue. The Commission approved the Engineer's recommendation.

A petition was presented from the Battin Parent Teachers Association, Milwaukie, requesting (1) designation of a reduced speed limit of 25 miles per hour on 82nd Avenue between King Road and Southeast Clatsop Street, and (2) installation of an automatic "stop and go" signal at the intersection of 82nd Avenue and Battin Road. The Engineer advised that this entire section of highway

is almost completely built up with residences and business establishments; also, that there are a number of heavily traveled cross streets, and the highway is only two lanes wide. The accident record, he stated, is high, being approximately 19 accidents per mile per year. He recommended the establishment of a 35 mile-per-hour speed limit on the Cascade Secondary Highway (82nd Avenue) between the south limits of Portland, Mile Point 6.49, and Mile Point 8.19, near Harmony Road. It was his thought that the requested speed of 25 miles per hour is too low to permit proper enforcement. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked Exhibit "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

As to the request for the installation of a signal at the intersection of 82nd Avenue and Battin Road, the Engineer advised that there is some justification for this light, but as there are many stop and go lights on 82nd Avenue consideration should be given to the synchronization of all these lights before additional installations are made. The Engineer was instructed to make a survey of this situation and to report to the Commission before discussing the matter with city officials. The city is to be contacted later relative to paying 50% of the cost to install and synchronize the lights along the entire street.

The Commission considered agreements with John L. Davidson and Leland L. Dysinger granting to the state permission to enter upon their property along Lick Creek immediately upstream from the crossing by the Little Butte Secondary Highway in Jackson County, in connection with improvement of the creek channel. The Assistant Counsel advised that the change is primarily for the benefit of the highway and recommended that the agreements be approved. The Commission adopted the recommendation and later in the day signed the agreements.

The Commission also considered and approved an agreement with Washington County Court pertaining to a change in grade, alignment, and abandonment of certain sections of county roads affected by the construction of the Sunset Highway. The agreement was signed later in the day.

The Commission discussed an agreement with Coos County providing that the county shall take over and maintain a portion of the abandoned section of the Cape Arago Secondary Highway, and that the state shall take over and maintain two farm approach bridges on the Oregon Coast Highway near Coquille. It was pointed out that this matter had been considered and approved by the Commission at a previous meeting and that the agreement had been prepared pursuant to ideas expressed at that time. The Commission approved and later in the day signed the agreement.

The Commission unanimously adopted the attached resolution, marked Exhibit "J", providing for the abandonment, in favor of the owners of abutting land, certain sections of the old right of way of the Green Springs Highway

between Keen Creek and Jenny Creek, in Jackson County, which right of way no longer is of value for state highway purposes since the highway has been realigned.

The Engineer requested instructions concerning the disposition of a short section of old right of way on the Pacific Highway immediately north of Central Point in Jackson County where the highway has been re-aligned. He advised that the property has value to the state as a storage site and recommended that it be retained for such purpose. The recommendation was unanimously approved by the Commission. (See EXHIBIT "K")

An agreement was considered with Coos County pertaining to the relocation of the Oregon Coast Highway between Delmar and Coaledo and providing that the County shall take over and maintain certain eliminated sections. The Engineer recommended approval. The Commission adopted the recommendation and later in the day signed the agreement.

The Engineer reported that the reduced load limits heretofore in effect on the following highways are no longer required as the condition of the roads is now such that full legal loads may be hauled, and recommended that they be lifted:

1. John Day-Burns Highway from John Day to Burns, limit removed June 4, 1948.

2. Weston-Elgin Secondary Highway from Weston to Elgin, limit removed June 16, 1948.

3. Rogue River Loop Secondary Highway, limit removed June 20, 1948.

4. Eddyville-Blodgett Secondary Highway from Nashville to Blodgett, limit removed June 16, 1948.

5. Monmouth Secondary Highway from Monmouth to the Kings Valley Secondary, limit removed June 16, 1948.

6. John Day Highway from Austin Junction to Unity Junction, limit removed June 1, 1948.

The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution, marked Exhibit "L", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested confirmation on the placing and removal of a five-ton reduced load limit on the Upper Columbia River Highway between Castle Rock and Boardman, Mile Points 166.0 to 172.0. He advised that the highway was posted for restricted loads on June 15, 1948, because of the unstable condition of the highway caused by the Columbia River flood, but the signs

were removed on June 23, 1948, due to improved conditions. The Commission unanimously approved the Engineer's action on this matter.

He also requested confirmation for the placing of a 50 percent reduced load limit June 14, 1948, on the Oregon Coast Highway between Mile Points 376.0 and 394.0, being roughly the section from Brookings to the California State Line, and the removal thereof on June 21, 1948. He advised that conditions had improved so that the restriction was no longer needed after June 21. The Commission unanimously approved the Engineer's action.

Authority was requested by the Engineer for Mr. E. F. Halik, Equipment Superintendent, to attend, at state expense, the Road Equipment Show which is to be held in Chicago during the week of July 16 to 24. He explained that all of the most modern maintenance equipment would be on display at this show and in his estimation an opportunity would be afforded to secure some good ideas on special equipment for maintenance work. The request was approved unanimously.

The Engineer also requested authority for Mr. F. B. Crandall, Traffic Engineer, to attend at state expense a meeting of the Institute of Traffic Engineers in Philadelphia on October 11, 12, and 13, 1948. He explained that Mr. Crandall is a member of the Institute of Traffic Engineers and has been requested to accept the chairmanship of one of the technical sessions. It was his thought that it would be of value to the state for him to attend this session to keep abreast of developments pertaining to traffic safety. The Commission approved the request.

The Engineer requested confirmation of oral authority previously granted to Ernest Rostel, Assistant Director of the Travel Department, to attend, and to maintain an Oregon exhibit at the Chicago Railroad Fair during the period from July 20 to September 6, 1948. He estimated the cost involved at about $650. and advised that the expenditure meets the approval of the Travel Advisory Board. The Commission confirmed the authority.

The Commission discussed a date for its proposed inspection trip through Northeastern Oregon and scheduled such trip for July 12 to 16, 1948. The Engineer and Secretary were instructed to make necessary preparations for the trip.

The Commission also discussed a date for its next regular meeting and decided to hold such meeting on August 9 and 10, 1948, in the Imperial Hotel, Portland.

The Engineer requested authority for the expenditure of approximately $12,000 on the Green Springs Highway for widening at Mile Points 12.26, 12.33, 12.49, and 16.07 so that combination vehicles 60 feet in length can be operated over this highway without encroaching into the opposing lane of travel. He explained that by widening at the locations mentioned, the Green Springs Highway could be reclassified from a Group II to a Group I highway,

which classification would permit the operation of vehicles 60 feet in length. The Commission unanimously approved the widening as a minor betterment project, however, deferred action on the reclassification of the highway pending the actual observation of results obtained.

The Commission approved and later in the day signed a quitclaim deed correcting certain features of a previous deed conveying to the Weyerhaeuser Timber Company a parcel of land situated in Lot 6, Block "A", Porter Hill Addition to North Bend, in Coos County.

The Chief Counsel presented for consideration a resolution abandoning, in favor of the Trojan Powder Company, a portion of the old right of way of the Lower Columbia River Highway. He advised that the land under consideration is not needed for state purposes and that, under ordinary procedure, it would revert to the adjoining property owner, which in this instance is the Trojan Powder Company. He recommended adoption of the resolution. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with respect thereto, marked Exhibit "M", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

An agreement with Lincoln County with respect to construction and maintenance of pedestrian paths connecting motor vehicle parking areas with beach areas near the Oregon Coast Highway at Agate Beach in Lincoln County was discussed by the Commission. The Engineer presented a map showing the proposed paths, explaining that the agreement provides that the state is to construct two footpaths, at an estimated cost of $2,200, which will be maintained by the county, and the county will vacate Harbor Street west of the highway. It was his thought that, inasmuch as it is not desired to encourage motor vehicle traffic on the beach, the vacation of Harbor Street would be of considerable benefit. He recommended that the Commission approve the agreement. The Commission approved the recommendation and later in the day signed the agreement.

The Engineer presented for the Commission's consideration a proposed agreement with O. C. Yocom Company covering emergency repairs to the Amity-Dayton Secondary Highway in Yamhill County in order to permit heavy truck traffic to be detoured over this highway during construction of the Oregon City-New Era Section of the Pacific Highway East. He explained that the road is being severely damaged by heavy traffic and that Mr. Yocum has agreed to resurface the section at a cost of about $7,000. He said that it is the state's responsibility to keep the road in good condition and pointed out that approval of the agreement would not only provide for a good traversable road, but would also facilitate certain construction work that Mr. Yocum has under contract with the state. He recommended approval of the arrangement. The Commission unanimously approved the recommendation.

The Commission considered a request from the Marion County Court that the old Mill Creek Bridge on the Silver Falls Secondary Highway at the

east city limits of Salem be returned to the county when the new bridge now under construction at that place is completed. The Engineer advised that the present bridge, which is a narrow structure, was built by the county years ago and is of no value for state highway purposes. He recommended that it be given to the county on the condition that the county will remove it without cost to the state. The Commission approved the recommendation.

The Commission considered and denied a request from Mr. Robert W. Sawyer, editor of the Bend Bulletin, for a change in the minute entry concerning Mill Creek Bridge on the Warm Springs Highway, as it appears in the Commission minutes of April 20, 1948.

Consideration was given by the Commission to a request from the City of Coos Bay and the Coos Bay Chamber of Commerce for permission to construct a floating dock, 1,040 feet long, on the harbor line south of Central Avenue in North Bend. The Engineer advised that this request was received too late to allow time for an investigation; moreover, the state has not acquired the water-front property at this location. The Commission deferred action on the matter pending investigation and a report by the Engineer.

The Chief Counsel presented for the Commission's consideration the granting of a permit to Elizabeth Ellis Thompson, Herbert Cooper Thompson, et al., for an access roadway to the Pacific Highway in Eugene. He explained that the Thompson property is cut off from access to the highway and an arrangement had been made to give them an exit so that traffic leaving their premises will flow with the highway traffic. He pointed out that right of access is not being acquired at this location and recommended that the permit be granted. The Commission unanimously approved the recommendation.

The Chief Accountant requested authority to employ two additional clerk-typists for the five remaining months in 1948 who, he said, are required to take care of the increase in volume of invoices and tax ledger records. He pointed out that, if approved, it would be necessary to increase his budget in the amount of $1,500. The Commission unanimously approved the request and budget increase.

Mr. R. H. Kellog, Senior Highway Engineer, Public Roads Administration appeared before the Commission regarding suggested changes in the allocation of forest funds for the North Santiam Secondary Highway. He explained that some of the projects for which money had been allocated are costing less than was originally estimated and that this money has been placed in a State Contingency Fund to finance additional construction on bridges on that route; also, that $115,000 has been added to a previously approved project on Timberline road so that construction of this road could proceed. He stated that the proposed shifts will not affect the status of new Federal money which probably will be available soon. The State Highway Engineer advised that the proposed changes have been checked and found satisfactory. He recommended that they be approved. The Commission approved the Engineer's recommendation and thereupon signed the following letter directed to the Chief, Forest Service, and Commissioner of Public Roads, Washington, D.C., recommending approval of the revised program:

June 29, 1948

15041

486 Oregon General June 29, 1948

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

Due to increased construction costs and to the necessary variation from programmed construction because of limited cash appropriations, it is desirable to effect certain modifications in the presently approved Forest Highway programs for the State of Oregon. In accordance with regulations for administering Forest Highways it is therefore recommended that the following revisions of programs be approved:

Project	Present Program Amount	Date Apprd.	Recommended Decr. or Incr.	Revised Program
24-A2, North Santiam Hwy., Grading	50,000	5-22-46	- 50,000	None
24-A2, North Santiam Hwy., Grading	300,000	11-7-45	- 300,000	None
24-B5, North Santiam Hwy., Steel Purchase Breitenbush Bridge	75,000	12-3-47	- 15,000	60,000
24-B6, North Santiam Hwy., Breitenbush & Tumble Creek Bridges	-	-	+ 145,000	145,000
24-B3, Un.2, C4, Un.1 North Santiam Hwy., Grading	225,000	12-3-47	- 60,000	165,000
50-A2, B1, Timberline Hwy., Grading	180,000	10-30-45	+ 115,000	295,000
	830,000		- 165,000	665,000

On May 22, 1946 the Secretary approved a transfer of $350,000 from Oregon Project 10-D1,E to Project 24-A2 and on December 3, 1947 approved the transfer of $300,000 of this amount to finance the two following projects:

24-B3, Unit 2, C4, Unit 1	$225,000
24-B5, Steel Purchase Breitenbush Bridge	75,000

Since Project 24-A2 is now fully financed out of the $300,000 Cooperative State Funds, under agreement with the Corps of Engineers,

(Cont.)

it is recommended that the $50,000 of Forest Highway Funds still remaining as programmed to that project be transferred to the State contingent for allocation to other projects on this route.

Because of the financing of Project 24-A2 out of Cooperative State Funds it is also recommended that the $300,000 as approved for this project on November 7, 1945 be taken down and transferred to the State contingent for allocation to other projects on this and other routes in Oregon.

On December 3, 1947 there was approved $75,000 to finance the purchase of steel for the Breitenbush Bridge. Cost of this purchase is now estimated to be $60,000 and it is recommended that $15,000 be taken down from this project and transferred to the State contingent for allocation to other projects on this route.

Construction of the Breitenbush and Tumble Creek Bridges, exclusive of steel purchased, is estimated to cost $200,000, of which $55,000, cost of the Tumble Creek Bridge, will be financed by War Department funds in accordance with agreement with that Department. It is recommended that $145,000 of Forest Highway funds be programmed from the State contingent to Project 24- B6, construction of Breitenbush and Tumble Creek Bridges.

The present estimated cost of the Public Roads Administration share of Project 24-B3, Unit 2, C4, Unit 1, is $165,000 and it is recommended that the $60,000 remaining of the $225,000 as approved December 3, 1947 be transferred to the State contingent for reallocation to other projects on this and other Oregon routes.

On October 30, 1945 the Secretary approved allocation of $180,000 to the Timberline Forest Highway, Oregon Project 50-A2,B1, grading. Cost of this project is now estimated to be $295,000 and it is recommended that an additional $115,000 be allocated to this project from the State contingent.

The remaining $165,000 in the State contingent will be recommended for allocation under future programs.

Very truly yours,

W. H. LYNCH
Division Engineer

15013

The Commission considered and signed agreements, etcetera, as follows:

Agreement with John L. and Elizabeth T. Davidson granting permission to the State Highway Department to enter upon property adjacent to Lick Creek and immediately upstream from the Little Butte Secondary Highway crossing of this creek at M. P. 6.81, Jackson County, in connection with creek channel improvement.

Agreement with Leland L. Dysinger and Jessie G. Dysinger granting permission to the State Highway Department to enter upon property adjacent to Lick Creek and immediately upstream from the Little Butte Secondary Highway crossing of this creek at M.P. 6.81, Jackson County, in connection with creek channel improvement.

Agreement with the City of Salem covering installation of traffic signals at the intersections of "D" Street, Market Street, and Silverton Road, with Capitol Street (Pacific Highway East), in Salem.

Agreement with Coos County covering abandonment of certain portions of the Delmar-Coaledo Section of the Oregon Coast Highway when the new route is completed and opened for travel.

Agreement with Coos County covering maintenance by the Highway Commission of two approach structures to the Oregon Coast Highway between Coquille and Bandon and maintenance of the abandoned right of way of the Cap Arago Secondary Highway between Engineer's Stations 274+60 and 285+85 by the county.

Agreement with Lincoln County covering construction and maintenance of pedestrian paths connecting motor vehicles parking areas with beach areas in proximity to Oregon Coast Highway. Agate Beach.

Agreement with Murphy Timber Company covering purchase by the company of timber adjacent to the Salmon River Highway, Tillamook County.

Agreement with the City of Milton covering cooperative drainage project on Main Street (Oregon-Washington Highway), in Milton, Umatilla County.

Agreement with Washington County covering change in grade, alignment, and abandonment of certain sections of county roads affected by the construction of the Sunset Highway.

Consent to assignment by the Bonneville Power Administration to Lane County Electric, Inc., all rights and interests in two power line crossings of the Pacific Highway and the Richardson-Eugene Secondary Highway, Lane County.

Consent to assignment by the Bonneville Power Administration to Douglas Electric Cooperative, Inc., all rights and interests in two power line crossings of the Pacific Highway and the Territorial Secondary Highway, Douglas County.

Easement to the City of Reedsport over and across the right of way of the Oregon Coast Highway under the southerly span of the Umpqua River Bridge in Reedsport, Douglas County.

Certificate of acceptance from the U. S. Department of the Interior establishing acceptance, according to Governmental rules, of the Silver Creek Falls Recreational Area, Marion County.

Easement agreement with the Hebo Cheese Association covering use by the state of the Association's property for a detour highway in connection with construction of the bridge across Three Rivers on the Oregon Coast Highway at Hebo, Tillamook County.

Quitclaim deed to Weyerhaeuser Timber Company correcting certain features in the description of the deed conveying to the company certain property adjacent to the Oregon Coast Highway in the Porter Hill Addition to the City of North Bend, Coos County.

Bargain and sale deed conveying unto Hiram J. Chase property on the Rainier-Goble Section of the Columbia River Highway, Columbia County.

Bargain and sale deed conveying unto Charles H. and Annie A. Robinson property on the Rainier-Goble Section of the Columbia River Highway, Columbia County.

Agreement with O. C. Yocom Co. covering repair of damages to Amity-Dayton Secondary Highway, Yamhill County, caused by truck traffic.

Access Road Permit granting to Herbert Cooper Thompson, et al. the right to construct and use an access road across Seventh Street (Pacific Highway) in Eugene, Lane County.

Project Agreement with Public Roads Administration covering Statewide Planning Survey for 1948.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:00 p.m.

Minutes of June 28 and 29, 1948

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of June 28 and 29, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

(Cont.)

JUN 28 1948

EXHIBIT "B-1" (Cont.)

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary and acquisition of the same by the State is required for right of way purposes in connection with the Baker-Unity Highway, which parcel of real property is owned by Louise D. Cowan and is described as follows, to-wit:

A parcel of land lying in Lots 9 and 10, Block 1, J. E. Smith Addition to Baker, situated in Section 20, Township 9 South, Range 40 East, W. M., Baker County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Louise D. Corey recorded in Book 77, Page 45, of Baker County Records of Deeds; the said parcel being described as follows:

Beginning at the northwest corner of said Lot 9; thence South 49° 22' East along the northerly line of said lot a distance of 11.54 feet; thence South 39° 16' West a distance of 50 feet; thence North 49° 22' West along the southerly line of said Lot 10 a distance of 12.71 feet to the west corner of said Lot 10; thence North 40° 36' East along the westerly line of said block a distance of 50 feet to the point of beginning; containing 606 square feet.

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner, and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the

(Cont.)

compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-eighth day of June, 1948.

JUN 28 1948

EXHIBIT "B-2"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Salem-Silverton Highway in Marion County, State of Oregon, is a county highway which has been designated and classified as a federal aid secondary highway and as such is qualified for improvement with state, federal, and county funds; and

WHEREAS, it is the purpose and plan to improve said highway pursuant to a cooperative agreement or arrangement between the United States Government, the State of Oregon, and Marion County; and

WHEREAS, the tracts or parcels of real property hereinafter described are each and all necessary for right of way purposes in connection with the proposed improvement of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

(Cont.)

JUN 2[illegible] 1948

EXHIBIT "B-2" (Cont.)

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for right of way purposes in connection with the improvement of the Salem-Silverton Highway in Marion County, State of Oregon, which said real properties are described as follows, to wit:

Real property owned by Ellen F. Steffen, which property is located in the T. C. Shaw D. L. C. in Section 6, Township 7 South, Range 1 West, W. M., Marion County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 14643; (*)

Real property owned by Oliver E. Steffen, et ux., which property is located in the Wesley Shannon D. L. C. No. 52, also in Section 6, Township 7 South, Range 1 West, W. M., Marion County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 14643 B; (*)

Real property owned by D. A. Steffen, et ux., which property is located in the Wesley Shannon D. L. C. No. 52, also in Section 6, Township 7 South, Range 1 West, W. M., Marion County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 13628. (*)

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence

(Cont.)

EXHIBIT "B-2" (Cont.)

and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

4. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-eighth day of June, 1948.

FOOTNOTE:(*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 111, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "F"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2810, with J. C. Papin, for grade widening on the Mill Gulch-Salisbury Section of the Baker-Unity Highway in Baker County; completed on December 11, 1947.

Contract No. 2870, with La Grande Concrete Pipe Company, for furnishing sanding materials in stockpile on the Meacham-Hilgard Section of the Old Oregon Trail, in Union County; completed on June 1, 1948.

Contract No. 2871, with Leonard & Slate Oregon, Ltd., for grading and bituminous macadam surfacing on the Circle Bridge-Summit Section of the Oregon Coast Highway in Clatsop County; completed on June 21, 1948.

Contract No. 2875, with Heavy Hauling Company, for grading and paving on the Astoria (Bond St.-Commercial St.) Section of the Columbia River Highway in Clatsop County; completed on May 29, 1948.

Contract No. 2920, with Vernie Jarl, for grading and bituminous macadam surfacing on the Crabtree Creek-Scio Section of the Albany-Lyons Secondary Highway in Linn County; completed on June 3, 1948.

Contract No. 2922, with Harry I. Hamilton Co., for construction of the Little River Bridge on the North Umpqua Highway in Douglas County; completed May 31, 1948.

Contract No. 2926, with Johnson and Sterner, for construction of the Deep Creek Bridge on the Clackamas Secondary Highway in Clackamas County; completed April 7, 1948.

Contract No. 2946, with Erick Enquist, for construction of the Oneonta Creek Bridge in Multnomah County; completed May 22, 1948.

(Cont.)

15076

EXHIBIT "F" (Cont.)

Contract No. 2950, with Rogers Construction Co., for furnishing crushed rock in stockpiles on the Union Rock Production Project in Baker and Union Counties; completed on April 5, 1948.

Contract No. 2951, with A. H. Saxton & Sons, for furnishing maintenance materials in stockpiles on the Madras Section of The Dalles-California and Warm Springs Highways in Jefferson and Wasco Counties; completed on January 26, 1948.

Contract No. 3005, with Leonard & Slate Oregon, Ltd., for cleanup work on the Oneonta Borrow Pit Section of the Columbia River Highway in Multnomah County; completed on April 26, 1948.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

JUN 23 1948

EXHIBIT "G"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, the Oregon Coast Highway, otherwise designated as U. S. Highway 101, as routed through the town of Gardiner, Douglas County, passes in front of the U. S. Post Office, and,

WHEREAS, it has been reported to the Highway Commission by Mr. Fred H. Twohy, District Superintendent, Railway Mail Service, Portland, Oregon, that the parking of motor vehicles in front of said Post Office seriously interferes with the movement of U. S. Mails and the Commission has therefore been requested to designate and establish the highway frontage in front of said Post Office as a "No Parking" area, and

WHEREAS, it is the judgment of the Commission that every reasonable and legitimate action should be taken having for its object the speeding of the movement of U. S. Mails, and

WHEREAS, it appears that Gardiner is an unincorporated town,

NOW THEREFORE, be it and it hereby is resolved by this Commission, all members being present and voting affirmatively as follows:

1. That the highway area in front of the Post Office at Gardiner, Oregon, particularly between Highway Engineer's Stations 642+74 and 642+94, a distance of twenty (20) feet, as set forth on the Highway Commission Drawing attached hereto and by this reference made a part hereof, be and the same hereby is declared to be a "No Parking" area and the parking of motor vehicles within said area is prohibited provided that this prohibition shall not apply to motor vehicles operated by the United States or its contractors and engaged in the carrying of U. S. Mails.(*)

2. That the engineer hereby is instructed to erect and thereafter maintain in said area signs bearing the wording "NO PARKING - MAIL CARS EXCEPTED' He is further instructed to paint, in a conventional manner and color, the curb lines within the limits of the "No Parking" area.

3. That this resolution be entered in the minutes and records of the Commission as of the 29th day of June, 1948, and correct copies thereof mailed to the Superintendent of State Police and to Fred H. Twohy, District Superintendent, Railway Mail Service, Portland, Oregon; and a like copy to the Postmaster at Gardiner, Oregon, for his information.

FOOTNOTE: (*) The drawing mentioned in the above resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being File No. 29, under the heading "No Parking Resolutions" and said drawing by this reference is made a part of this minute entry to the same extent as if copied in full herein.

JUN 29 1948

EXHIBIT "H"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, within the City of Cottage Grove, the Commission has designated as a part of the route of the Pacific Highway (US99) what is referred to in the records of the City of Cottage Grove as a street under the name of South Highway, and

WHEREAS, the Common Council of the City of Cottage Grove has adopted a resolution, No. 388, providing that there shall be no parking on the west side of said South Highway from the intersection of Sixth Street to a point seventy feet southerly therefrom, and

WHEREAS, the Commission, based upon the report of its Engineer, is of the opinion that in the interest of safety to traffic, parking should be prohibited within said area,

NOW, THEREFORE, all members of the Commission being present and voting affirmatively, the Commission does hereby order:

1. That the ordinance of the Common Council of the City of Cottage Grove, being numbered 388, passed by the Common Council on May 3, 1948, and providing for no parking on the west side of South Highway from Sixth Street to a point seventy feet southerly therefrom, be and the same hereby is approved.

2. This resolution shall be entered in the records of the Commission this 29th day of June, 1948, and the Secretary be and he hereby is instructed to send a certified copy of this resolution to the City Manager of the City of Cottage Grove.

JUN 28 1948

EXHIBIT "I"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said differen speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sectio of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: . . . . . Cascade Highway . . . . . .
Highway number: . . . . . 160 . . . . . Route number: . ORE 213 .

Location of Termini	Established Speed
M.P. 6.49 (S. Limits Portland) to M.P. 8.19 (0.20 miles south of Harmony Road)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highw

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "J"

Minutes of June 28 and 29, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the Green Springs Highway, otherwise designated as State Highway No. 21, in Jackson County; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as originally located are eliminated and will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the units or sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section of the Green Springs Highway known as the Keene Creek-Jenny Creek Section, which begins at Highway Engineer's Station 54+84 on the new route and ends at Highway Engineer's Station 405+78.7 of the new route, has been completed and made available for travel, and that the sections of the old route herein defined and described as Units "A", "B", "C", "D", "E", "F", "G", "H", "I", "J", "K", "L", "M", "N", "O", "P", "Q", and "R" shall no longer be part of the route of the Green Springs Highway but shall be eliminated therefrom.

2. Those parts of the sections of the old route of the Green Springs Highway lying outside the established right of way of the relocated highway, which for the purpose of this agreement are identified as Units "A", "B", "C", "D", "E", "F", "G", "H", "I", "J", "K", "L", "M", "N", "O", "P", "Q", and "R" and are more particularly described as follows:

Unit "A"

Beginning at State Highway Engineer's Station 72+00 of the relocated Green Springs Highway in the Northwest quarter (NW¼) of the Northeast quarter (NE¼) of Section 4, Township 40 South, Range 3 East, W. M.; thence easterly via the former route of the Green Springs Highway to State Highway Engineer's Station 78+29.5 of the relocated Green Springs Highway in the Northeast quarter (NE¼) of the Northeast quarter (NE¼) of Section 4, Township 40 South, Range 3 East, W. M.

EXHIBIT "K"

Minutes of June 28 and 29, 1948

R E S O L U T I O N

WHEREAS, the Commission for the purpose of providing a highway with better and wider right of way and possessed of other standard requirements, relocated a section of the Pacific Highway in Jackson County, which relocated section is in the vicinity of Highway Engineer's Station 150+00 and is north and near to Central Point; and

WHEREAS, by reason of said relocation there has been eliminated from the right of way proper of said highway a small area of land which, though not a part of the right of way, is nevertheless valuable and needed for other highway purposes; and

WHEREAS, it is the opinion of the Commission that title to said section of old right of way should be retained by the State for public use;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. That the section of the old right of way of the Pacific Highway in Jackson County referred to herein as Unit "A" and described as follows, to-wit:

Unit "A"

Beginning at State Highway Engineer's Station 142+94.2 of the former Pacific Highway, State Highway No. 1, equals Station 143+56.9 of the present Pacific Highway in the Northwest quarter ($NW\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 33, Township 36 South, Range 2 West, W. M., and running thence northerly via the former route of the Pacific Highway to State Highway Engineer's Station 153+14.8 of said Pacific Highway in the Southwest quarter ($SW\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 28, Township 36 South, Range 2 West, W. M., Jackson County, Oregon;

shall be and the same hereby is declared to be needed for public purpose and public use, and title thereto and possession thereof shall be held and retained by the State of Oregon, by and through its State Highway Commission.

(Cont.)

EXHIBIT "L"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, on February 3, 1948, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following state highway, to-wit:

JOHN DAY-BURNS HIGHWAY NO. 48, from John Day, in Grant County, to Burns, in Harney County

and

WHEREAS, on the 25th day of November, 1947, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following state highway and subsequently, on December 30 1947, amended said resolution, and again, on May 25, 1948, adopted a resolution extending indifinitely the operative period of the resolution adopted on November 25, 1947, as amended on December 30, 1947, to-wit:

WESTON-ELGIN SECONDARY HIGHWAY NO. 330, from Weston, in Umatilla County, to Elgin, in Union County

and

WHEREAS, on the 19th day of April, 1948, at a meeting of the State Highway Commission, a majority of members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highways, including the following highway, to-wit:

ROGUE RIVER LOOP SECONDARY HIGHWAY NO. 260, in Josephine County, throughout its entire length.

and

WHEREAS, on the 25th day of November, 1947, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following section of the following state highway, and subsequently, on the 12th day of March, 1948, adopted a resolution modifying said resolution, to-wit:

EDDYVILLE-BLODGETT SECONDARY HIGHWAY NO. 180, from M.P. 11.7 (At Nashville) to M.P. 19.29 (At Blodgett), in Lincoln County

(Cont.)

1948

EXHIBIT "L" (Cont.)

and

WHEREAS, on the 3rd day of February, 1948, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following state highway, to-wit:

MONMOUTH SECONDARY HIGHWAY NO. 194, from Monmouth to Kings Valley Secondary Highway No. 191, in Polk County

and

WHEREAS, on the 25th day of May, 1948, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following section of the following state highway, to-wit:

JOHN DAY HIGHWAY NO. 5, from M.P. 191.06 (Austin Junction) to M.P. 213.76 (Unity Junction), in Grant County

and

WHEREAS, subsequent to the passage of each of said resolutions, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions on the said above-named highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on each of the following sections of state highways be and the same hereby is rescinded and cancelled as of the date hereinafter set forth, and the maximum load limit permissible on each of the said sections of highways shall hereafter be the maximum load limit provided by law:

EXHIBIT "M"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, the Commission, for the purpose of making possible the construction and maintenance of a highway adapted in all particulars to the needs of transportation of persons and property thereover, the Highway Commission has relocated a section of the Columbia River Highway, otherwise designated and known as State Highway No. 2 in Columbia County; and

WHEREAS, the relocated section of said highway has not yet been constructed, but it is the purpose and plan of the Highway Commission to place said section under contract for construction during the season of 1948; and

WHEREAS, it is recognized that by the construction of a highway over said new route, there will be made possible the abandonment of sections or units of the old route as parts of the said Columbia River Highway; and

WHEREAS, it is recognized that sections of said old route, which are defined and identified in records of the Commission as Units "A", "B", and "C", cannot be abandoned as public highways, but must be maintained for the benefit and service of persons living thereon and communities served thereby; and

WHEREAS, the State of Oregon, by and through its State Highway Commission, has entered into a written agreement with Columbia County, by and through its County Court, whereby the County has assumed the obligation to maintain said Units "A", "B", and "C" for the benefit of the public and under the County's obligation as a county road; and

WHEREAS, it has been found by the Commission that the section or unit of the old right of way, which is identified in the Commission's records as Unit "D", and is more particularly hereinafter in this resolution described and defined, will not be needed for public highway purposes after the highway has been constructed over the relocated route, and, therefore, title to said Unit "D" may be permitted, pursuant to law, to revert to the owners of the land abutting thereon;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. That the portion of the old right of way of said Columbia River Highway herein designated as Unit "D" and more particularly described as follows

Unit "D"

Beginning at the intersection of the old route of the Columbia River Highway and the line between the Southwest quarter ($SW\frac{1}{4}$)

(Cont.)

JUN 29 1948

15092

EXHIBIT "M" (Cont.)

of the Northeast quarter (NE¼) and the Northwest quarter (NW¼) of the Southeast quarter (SE¼) of Section 2, Township 6 North, Range 2 West, W. M., and running thence southeasterly via the old route of the Columbia River Highway to State Highway Engineer's Station 367+70 of the relocated Columbia River Highway in the Southwest quarter (SW¼) of the Southwest quarter (SW¼) of Section 1, Township 6 North, Range 2 West, W. M.

shall be and the same is eliminated from the right of way of the Columbia River Highway, and shall no longer be deemed or considered a part of the right of way of said highway, but title thereto shall be vested in the Trojan Powder Company as the owner of the land abutting on said Unit "D" above described.

2. That until the highway has been constructed over said relocated line and made available to public travel, said Unit "D" shall remain a part of the right of way of the Columbia River Highway, and title to said Unit "D" shall vest in the Trojan Powder Company only after the new highway has been constructed.

3. That the Secretary be and he hereby is directed to prepare a certified copy of this resolution so that the same may be made available to the Trojan Powder Company as a part of the transaction involving the acquisition of real property from said Company for use in connection with the construction of said highway over said relocated line.

4. That this resolution be entered in the minutes and records of the Commission as of the 29th day of June, 1948.

EXHIBIT "H"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, complaints have been and are being made to the Highway Commission charging drivers of busses and trucks using the public highways of the State with a violation of the law which requires that a driver of a motor truck or bus when traveling upon a highway outside of a business or residence district shall not follow another motor truck within three hundred feet unless when overtaking or passing such other motor vehicle; and

WHEREAS, it is the opinion of the Highway Commission, based on experience, that such violations cause inconvenience and subject other users of the highway to unnecessary traffic hazards; and

WHEREAS, the Commission's Counsel has advised that Section 115-332, O.C.L.A., is applicable to the drivers of motor trucks and motor busses, whether such drivers operate under permits issued by the Highway Commission, or under the authorization of the Secretary of State or the Public Utilities Commissioner; and

WHEREAS, the Commission's Counsel has further advised that when permits are issued pursuant to the provisions of Chapter 156, Oregon Laws, 1947, the Highway Commission may include, if in its judgment public policy will be advanced, in addition to other provisions and conditions surrounding and controlling such permit, a condition and requirement that a distance or clearance of five hundred feet be maintained between vehicles, except when overtaking or passing another vehicle;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. That with respect to all permits hereafter issued pursuant to the provisions of Chapter 156, Oregon Laws, 1947, there shall be included in and made a part of said permit, in addition to the conditions now set out therein, the following:

a. That the driver of the vehicle, in connection with which the permit is issued, shall at all times maintain a clearance of five hundred feet between his vehicle and another truck or bus, except when overtaking or passing such other truck or bus.

b. That the driver of such vehicle shall at all times keep on his side of the highway center line, except when passing another vehicle.

(Cont.)

JUN 29 1948

EXHIBIT "N" (Cont.)

c. That the driver of said vehicle shall at all times operate his vehicle at a reasonable speed, giving due consideration to existing conditions.

d. That a violation of any of the foregoing conditions shall operate to terminate the permit.

2. That the Secretary of the Commission be and he hereby is instructed to call to the attention of the Superintendent of State Police the fact that complaints are being made to the Commission, charging frequent violations of the provisions of Section 115-332, O.C.L.A.

3. That the Commission's Counsel be and he hereby is instructed to communicate with the head office of the bus association or management, and with the head office of the truck association or management, and call to the attention of such officials the complaints which are being made to the Commission charging violations of the said three hundred-foot clearance requirement, and request of such officials appropriate action to the end that public welfare may be given due consideration.

4. That this resolution be entered in the minutes and records of the Commission as of the twenty-ninth day of June, 1948.

EXHIBIT "O"

Minutes of June 28 and 29, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the highway known and designated as the Oregon Coast Highway, otherwise identified as State Highway No. 9 and U. S. Route No. 101, is a state highway and therefore under the jurisdiction and control of the State Highway Commission; and

WHEREAS, said highway as now located passes through the town of Gold Beach and it is the purpose of the Highway Commission to widen and more permanently improve said section of said highway, for which purpose it is necessary that the real property described on the attached sheet be acquired; (*)

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property described on the attached sheet, which parcel is owned by Jean Minnie Huntley and F. J. Huntley, her husband, is necessary for the proper widening, reconstruction, and other improvement of said highway from Engineer's Station 3+40 on the north through Engineer's Station 0+00 to Engineer's Station 15+90 on the south.(*)

(Cont.)

JUN 29 1948

EXHIBIT "O" (Cont.)

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners, and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel, and G. W. Neuner, as Assistant Counsel for the Oregon State Highway Commission, are and each of them is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in their joint or individual judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-ninth day of June, 1948.

FOOTNOTE:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 113, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

(Authority for entry of the above condemnation resolution in the June 1948 minutes was granted by the State Highway Commission at its meeting on August 9, 1948. See page 15126 of the August 1948 minutes.)

		Cascade Hwy. Portland to Eugene via Silverton and Lebanon. Request for construction denied.
15331		Meeting recessed at 12:00 noon to reconvene at 1:30 p.m.
		Umatilla County. Old Oregon Trail. Pendleton. Request to use R/W for construction of retaining wall denied.
		Travel Dept. 1949 Budget approved.
15332		Pacific Highway. Johns-Canyonville Section. Improvement requested. To be considered when Forest Hwy. Funds become available.
		Ashland-Central Point Section. Improvement requested. No action.
15333		Crater Lake Hwy. and East and West Diamond Lake Secdy. Hwys. Request to keep hwys. open during winter. To be kept open as long as practicable.
		Bids received at morning session discussed.
		Awards. Chairman Banfield announces awards of contracts.
15336		Old Oregon Trail. Improvements between Portland and Ontario to be considered in future construction programs.
15337		Malheur County. Delegation requests hwy. improvements. No action.
		Deschutes County. Redmond. Status of one-way street plan. Decision deferred 2-3 months.
		Umatilla County. Freewater. Delegation asks relief from
15338		Peacock Mill flooding. Investigation to be made.
		Coos County. Oregon Coast Hwy. Coos Bay-Coquille, old section. Contractor's damage to be repaired.
		Coos County. Enegren Ferry-Graveyard Point. R/W. for proposed road. Investigation to be made.
		Coos County. Bullards Bridge. Confirmed withdrawal of funds for cooperative construction.
15339		Portland. Harbor Drive-Front Avenue parking area. Use of section between Steel Bridge and Morrison Bridge. Action deferred.
		Travel Dept. Advisory Committee. Herb Grey appointed to fill vacancy created by resignation of Robert Ruhl.
		Salem. State Highway Dept. Office Bldg. Whitehouse, Church, Newberry and Rohr employed as architects. Agreement to be prepared.
		Sale of scrap. Salem. Bid deposit of American Hardware and Supply Company declared in forfeit.
15340		Sale of equipment. Salem. Bid deposit of A.L. Fletcher declared in forfeit.

Page	Date 1948	Subject
15340	Nov.4	Crook County. Paulina Secdy. Hwy. Crooked River Hwy.-Combs Flat Road. Abandonment approved. See EXHIBIT "O".
		Paulina Secdy. Hwy. Combs Flat Road designated as extension See EXHIBIT "O". Agreement re improvement approved.
		Accounting Dept. Pro-forma statements in monthly reports approved. Chief Accountant to secure similar statements from P.R.A. Action deferred on segregation of engineering and accounting functions.
15341		Budget. 1949. Administration, general maintenance, and minor betterment budgets approved. Action deferred on construction expenditures.
		Agreements approved and signed.
15343		Meeting adjourned at 5:00 p.m. to reconvene following day at 1:30 p.m.
	Nov.5	Construction Program. Major Betterment Program.
		Deadwood Secdy. Hwy. improvement not to be included. Action deferred on other projects.
15344		Federal Aid Construction Programs. Engineer to make location surveys in connection with each project. Action deferred on approval.
		Union County. Old Oregon Trail. Ladd Canyon Section. Grading
15345		only to be included in first year's program. Engineer to provide substitute project for remaining funds formerly allocated to surfacing and oiling project in second year's program.
		Federal Aid Secdy. Hwy. Program. Counties to secure R/W for county road improvements.
		Marion County. Salem. Willamette River Bridge. Engineer to get information from P.R.A. re class of Federal funds to finance structure.
		Postwar Construction Program. Engineer to furnish Commission map showing projects approved previously and projects discussed at this meeting.
		Parks. Public conveniences. Parks Superintendent to give more attention to providing benches, tables, latrines, etc.
		Parks. Silver Creek Falls State Park. Fish and Wild Life Service to trap preditory animals in park area.
15346		Hood River County. Odell Secdy. Hwy. Hood River Junction-Odell Creek. Shoreline Construction Company declared in default and bondsman to complete work.
		Meeting adjourned at 4:30 p.m.
15347	Nov.3 4 & 5	EXHIBIT "A". Right of Way acquisition options
15375		EXHIBIT "B". Condemnation resolution. Wilson River Hwy.
15378		EXHIBIT "C". $1,000,000 for Sullivan Gulch real property
15380		EXHIBIT "D". Designation of throughway hwys.
15385		EXHIBIT "E". Engineer's authority to post reduced load limits.
15386		EXHIBIT "F". State Tax Street Funds.
15388		EXHIBIT "G". Survey Charlotte Creek-Murphy's Camp Section. Umpqua Hwy.

15400		EXHIBIT "M". Reclassification of hwys. from Group II to Group I.
15402		EXHIBIT "N". Reclassification of hwy. from Group II to Group I.
15404		EXHIBIT "O". Elimination of part of Paulina Seody. Hwy. and addition of Combs Flat Road as part of Paulina Seody. Hwy.

Portland, Oregon
August 9, 1948

The State Highway Commission convened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
M. H. Hawks, Chief Accountant
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

SADDLE MOUNTAIN STATE PARK, CLATSOP COUNTY

CARETAKER'S COTTAGE

Burgess Construction Co., Astoria	$ 13,284.00

COLUMBIA RIVER HIGHWAY, COLUMBIA COUNTY

SCAPPOOSE SECTION

Parker-Schram Co., Portland	$ 69,540.50
Porter W. Yett, Portland	82,963.00
D-H Paving Co., Vancouver, Wash.	85,306.00

OREGON COAST HIGHWAY, COOS COUNTY

MANNING SLOUGH BRIDGE

Glenn Snook, Eugene	$ 24,610.00
Tom Lillebo, Reedsport	28,340.00
Del R. Beebe Construction Co., Eugene*	34,270.00

*Lump sum reduction of $10,000 if also awarded the Delmar-Coaledo Project and Coaledo-Chrome Plant Project, for a total of $24,270.00

15098

OREGON COAST HIGHWAY, COOS COUNTY

DELMAR-COALEDO SECTION

Del R. Beebe Construction Co., Eugene[1]	$572,688.50
Rogers Construction Company, Portland[2]	624,303.00
McNutt Bros., Eugene[1] [2]	662,239.50
Guy F. Atkinson, Portland[1]	770,517.00
Morrison-Knudsen Company, Seattle	894,090.00

[1]Bidders will not accept award of this project alone
[2]Bidder will make lump sum reduction of $3,311.00 if also awarded Coaledo-Chrome Plant Project

OREGON COAST HIGHWAY, COOS COUNTY

COALEDO-CHROME PLANT SECTION

McNutt Bros., Eugene[1]	$399,027.00
Rogers Construction Co., Portland[1]	407,405.00
Del R. Beebe Construction Co., Eugene[1]	420,980.00
Coos Bay Dredging Co., Coos Bay	449,650.00
Guy F. Atkinson, Portland[1]	549,705.00
Morrison-Knudsen Co., Seattle, Wash.	649,715.00

[1]Bidder will accept award of this project only in combination with Delmar-Coaledo Project.

OREGON COAST HIGHWAY, COOS COUNTY

COMBINATION BIDS FOR PROJECTS BELOW

(1) Delmar-Coaledo Section
(2) Coaledo-Chrome Plant Section

	(1)	(2)	Reduc.	Comb. Bid
Del R. Beebe Constr. Co., Eugene*	$572,688.50	$420,980.00	--	$993,668.50
Rogers Construction Co., Portland*	624,303.00	407,405.00	--	1,031,708.00
McNutt Bros., Eugene*	662,239.50	399,027.00	3,311.00	1,057,955.50
Guy F. Atkinson, Portland*	770,517.00	549,705.00	--	1,320,222.00
Morrison-Knudsen Co., Seattle, Wash.	894,090.00	649,715.00	--	1,543,805.00

*Bidder will not accept award of either project alone.

ROSEBURG OFFICE BUILDING, DOUGLAS COUNTY

ADDITION TO BUILDING

	Basic Bid	Basic Bid Less Items (a) & (b)
Todd Building Co., Roseburg	$ 21,800.00	$ 21,375.00

August 9, 1948

CITY OF CENTRAL POINT, JACKSON COUNTY

CENTRAL POINT BITUMINOUS MACADAM SURFACING PROJECT

D. F. McKenzie, Salem	$ 13,930.00
Babler Bros., Portland	18,730.00

BRIDGE PAINTING, JOSEPHINE COUNTY

WEST FORK, ILLINOIS RIVER BRIDGE
EAST FORK, ILLINOIS RIVER BRIDGE
ROBERTSON BRIDGE

Antonsen Painting Co., Tacoma, Wash.	$ 7,500.00
J. S. Morris Co., Berkeley, Calif.	12,280.00

COLLIER STATE PARK, KLAMATH COUNTY

CARETAKER'S COTTAGE

Burkhard & Schortgen	Bidder disqualified	Bid not read.

PACIFIC HIGHWAY WEST, MULTNOMAH COUNTY

FRONT AVENUE TOPSOILING AND SEEDING PROJECT

Coast Construction Co., Portland	$ 15,668.00
Kuckenberg Construction Co., Portland	19,250.00
Lindstrom Bros., Portland	19,320.00

SHERMAN HIGHWAY, SHERMAN AND WASCO COUNTIES

KENT-COW CANYON JUNCTION RE-OILING PROJECT

D. F. McKenzie, Salem	$ 30,083.00
Harr & Horton, Portland	30,893.84
J. C. Compton Co., McMinnville	32,766.00
Babler Bros., Portland	34,806.00
R. O. Dail, Portland	36,574.50

CITY OF TILLAMOOK, TILLAMOOK COUNTY

TILLAMOOK GRADING AND PAVING PROJECT

Cressler Construction Co., Tillamook	$ 29,250.00

August 9, 1948

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

(1) Proposed developments in Wallowa Lake State Park: The Parks Superintendent explained details with respect to this proposed development work which includes, among other things, construction of a caretaker's house, a channel at the southwest end of the lake to facilitate the docking of pleasure boats, the construction of a parking area for cars at such point, and improvement of a roadway leading to the parking area. He advised that the present caretaker's house is an old one which was acquired along with the park, that it is unsuitable, being poorly located, and that at the present time it is surrounded by three feet of water. He requested authority to build a new house at an estimated cost of $10,000. The Parks Superintendent further explained that the present boat landing consists of a barge, located in shallow water, that can only be reached by a driveway across the sand, which is inundated during periods of high water, and a floating causeway, whereas the proposed landing is at the edge of deep water and with a small amount of channelization work can be conveniently used by pleasure boats at all times. He estimated the cost to build a wharf at the site of the present landing at $12,859, compared with a cost of $4,500 to provide the substitute landing at the southwest side of the lake. The Parks Superintendent further explained that his general plan calls for restricting to bathers the use of the beach area at the present boat landing, where the water is shallow, and to safeguard these people he proposes to block off this area with log floats so that boats cannot penetrate it. He pointed out that Mrs. Irene Wiggins, who operates Wallowa Lake Lodge, and from whom the State Highway Commission acquired the park, has certain rights that forestall the closing of the present boat landing until her lease expires on March 30, 1952. Following discussion of this entire matter the Commission unanimously approved the general plan of development as explained by the Parks Superintendent. The Commission also approved construction of the caretaker's house and the dredging of the channel at the new landing point at $10,000 and $4,500 respectively. The Parks Superintendent was instructed to repair the "catwalk" that now leads to the present landing and maintain the same in satisfactory condition pending termination of the Commission's agreement with Mrs. Wiggins.

(2) Proposed state park at Owyhee Dam, Malheur County: The Parks Superintendent presented a proposition for the establishment of a state park composed of nine acres along the Owyhee River about one mile below the dam proper, and development of the area to provide sites for 24 trailer houses, a picnic area, a caretaker's house, and other facilities. The land, he said, can be acquired from the U.S. Reclamation Service at no expense, and the Reclamation Service will also donate the roadway, which consists of an abandoned railroad grade running up the Owyhee River canyon, having already offered it to Malheur County for road purposes. Malheur County, he said, has accepted the roadway and indicates that it will take it over as a county road and maintain it until such time as it may be necessary to make it a state secondary highway. The Commission indicated

a favorable attitude with respect to establishing a park at this location were it not for the fact that it would necessitate construction of 24 miles of roadway. As the result of discussion the matter was referred back to the Parks Superintendent to get definite assurance from the county court that the county will provide a substantial roadway leading to the area and will maintain it without cost to the state.

(3) Appointment of a park district supervisor for Eastern Oregon parks and waysides with headquarters at La Grande: The Parks Superintendent advised that provision is included in the 1948 park budget for the employment of five supervisors, three of whom have been authorized by the Commission to date. He urged approval of the supervisor for Eastern Oregon who, he said, is badly needed, as the area is too distant from Salem to be supervised efficiently from the Salem office. The Commission unanimously approved the appointment.

(4) Purchase of 55 acres of land on Floras Lake in Curry County from James L. White of Langlois for the sum of $200 per acre: The State Parks Superintendent recommended against the purchase of this tract as the price is too high and there is another park nearby. The Commission approved the recommendation.

(5) Leases to the State Forester in Wallowa Lake and Casey State Parks for the construction of State Forestry Wardens' residences: The Commission formally approved the leases as prepared, which were authorized by the Commission at its meeting on June 28 and 29, 1948.

(6) Renewal of agreement with Robert Fromm for grazing 100 sheep in Humbug Mountain State Park: The Parks Superintendent advised that it was to the advantage of the state to have the sheep graze in this park because it keeps down grass and brush, thereby removing a fire hazard. This same condition is also true, he stated, in Cape Sebastian State Park. The Commission approved the renewal of the agreement for one year at 50 cents per head.

(7) Renewal for one year of an agreement with Clyde B. Miller for grazing of sheep in Cape Sebastian State Park: Upon the recommendation of the Parks Superintendent, the Commission unanimously approved the extension of the agreement for one year at 50 cents per head.

(8) Boat concession contract to L. A. Smith at Sunset Bay State Park: The Chief Counsel advised that the State Land Board, on the basis of an opinion furnished by the Attorney General, is claiming control of this area so, under that ruling, the revenue received by the Highway Commission by reason of its contract with L. A. Smith would have to go to the State School Fund which is under the jurisdiction of the State Land Board. It was his opinion that a question of facts is involved--whether the area is tide land under the control of the State Land Board or part of the ocean, under the jurisdiction of the State Highway Commission.

He suggested an investigation to determine the facts and that the results thereof be presented to the Attorney General for a review of the case. The Commission approved the suggestion and referred the matter to the Engineer and Parks Superintendent to make such investigation and report.

(9) Status of historical building in Champoeg State Park: The State Parks Superintendent stated that plans for this structure are not complete but that he would report later on the subject.

The Chief Counsel brought up for discussion at this time the bid of Burkhard and Schortgen for construction of a building in Collier State Park, which was not read at the bid opening because the bidder had not satisfied the pre-qualification law. He advised that the Commission, if it so desired, could negotiate the contract. Mr. Alfred E. Collier, Klamath Falls, donor of the park, who was present, stated that if the Commission will accept the bid and agree to contribute toward the cost of construction the amount of the Engineer's estimate plus ten percent of such amount, he will personally contribute a sufficient sum to make up the difference between the state's contribution and the amount of the bid as submitted. The Commission instructed the Engineer, the Chief Counsel, and the Parks Superintendent to confer with Mr. Collier on this offer and report back to the Commission later in the day. (The Engineer reported later that it is their recommendation that Mr. Collier's offer be accepted. Mr. Collier was present and renewed the offer. The Commission unanimously approved the recommendation, whereupon Mr. Collier tendered his check in the amount of $1,804.85, representing his share of the expense.)

The Assistant Attorney, Mr. J. W. DeSouza, presented for the Commission's consideration a list of properties needed for highway improvements throughout the state, together with the option prices that have been agreed upon with the owners. Following careful consideration of each individual tract, the Commission approved the offers disclosed in the options and authorized acquisition of the several parcels on the basis thereof. The attached resolution relative thereto, marked Exhibit "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote.

The following notes refer to the right of way resolution attached hereto and marked Exhibit "A":

* Vista Avenue-Multnomah County Line Section, Sunset Highway Item No. 14026: The Chief Counsel reported that he had conferred with Multnomah County and Portland city officials regarding county- and city-owned property that is needed in the future development of this section, and that these officials signified a willingness to either execute deeds conveying the property to the state or to enter into a three-party agreement with the state, regarding the matter, whichever the Commission prefers. The Commission decided in favor of deeds of conveyance rather than the agreement, and instructed the Chief Counsel to prepare and submit deed forms to the city and county for acceptance and execution. The deeds are to cover sufficient land for right of way wide enough for an eventual six-lane highway and are to contain provision that the

property will be reconveyed to the city and the county if it is not used for state highway purposes. The Chief Counsel was further instructed to make no commitment whatsoever as to the construction of the proposed six-lane facility since that is a project for the distant future.

** Devils Lake Outlet Section, Oregon Coast Highway: The Engineer explained that in making the contemplated changes for the new bridge across "D" River, it would be necessary to relocate a water main owned by the Taft-Nelscott-Delake Water District. He estimated the cost involved at $3,500 and advised that it is the state's responsibility. He recommended approval of an agreement with the District covering the matter. The Commission approved the Engineer's recommendation. The agreement was signed by the Commission on the following day.

*** Tillamook-Pleasant Valley Section, Oregon Coast Highway: In connection with this matter the Assistant Counsel reported the estimated total cost of right of way and rights of access at $110,000. He further advised that there are several parcels that will have to be condemned. The Commission approved completion of the settlements for which options have been obtained and authorized condemnation of the remaining tracts.

+ Pacific Highway, City of Eugene, Cooperative Project: The Commission approved all of the options as recommended but instructed the Assistant Attorney to prepare for the record a report on the cost to move the houses so that such information will be available in determining the total cost of right of way settlements for this project.

In connection with the discussion of the real property matters listed in the attached Exhibit "A", consideration was also given by the Commission to the acquisition of right of way on the Sullivan's Gulch Section: The Assistant Attorney presented options already obtained but action thereon was deferred by the Commission until it is known definitely how much Federal money will be available for this area. Options are not to be presented until such information is obtained. The matter of increasing the right of way budget in the amount of $750,000 for right of way acquisition along this section was also deferred until that time. The Commission desired it clearly understood that expenditures for right of way in Sullivan's Gulch are to be made only from funds regularly allocated to that area.

The Assistant Attorney presented for the Commission's consideration the following offers for condemnation of several parcels of real property that are needed as right of way for several highway improvements and cannot be acquired by negotiation:

Tillamook Pleasant Valley Section of the Oregon Coast Highway

		Recommended offer
11830	Herman Jacobs	$10,000.00
11826	L. and B. Neilsen	7,500.00

Tillamook-Pleasant Valley Section (Cont.)		Recommended offer
11825	Victor Neilsen	$10,000.00
14160	Lena Lyster (Orval Kaiser, contract purchaser)	2,500.00
11801	Martha Fossbind	7,250.00
11800	Louis Flack, Jr.	2,000.00
11797	W. Riley Simmons	450.00
11803	Paulina Lamb, a widow, and Estate of deceased husband	9,500.00
11806	Raymond Eastwood	4,000.00
11798	Lyle Simmons	400.00

Delmar-China Camp Creek Section of the Oregon Coast Highway

14103	L. R Siglin (Paul Trolard, et ux., contract purchaser)	2,800.00

Baker-Miles Bridge Section of the Medical Springs Highway

13815	Matilda McEnroe	473.00

After careful consideration of each item, the Commission approved the offers and thereupon by unanimous vote adopted the attached resolutions, marked Exhibits "B-1", "B-2", and "B-3", authorizing condemnation of the properties, which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Assistant Attorney presented for the Commission's consideration the disposal of the David Eyre house situated on the block recently acquired for the proposed State Highway Office Building in Salem. He recommended sale of the house for not less than $2,500. The Chief Counsel concurred therein. Following a general discussion of the disposal of buildings on the entire area acquired, the Commission unanimously approved the recommendation with the understanding that such action is to apply to the Eyre house only until further instructed.

The matter of securing additional right of way for the Pacific Highway West through Camp Adair in Polk County was considered. The Assistant Attorney advised that this property has now been declared surplus by the U.S. Government and recommended that it be secured as the land is needed and the appraisal very reasonable. The Commission approved the recommendation.

The Commission also considered the acquisition of an additional 0.8 of an acre in Camp Adair to complete a quarry site previously acquired. The Assistant Attorney advised that the property would be valuable to the state and is reasonably appraised. He recommended that it be secured. The Commission approved the recommendation.

The Commission considered the sale to the U.S. War Department of a small tract of land adjacent to the Willamette Highway in Lane County, which property the Government needs as right of way for the new location of the Southern Pacific Railroad necessitated by construction of Meridian Dam. The Assistant Attorney advised that the appraised value of the land is $70 per acre, being approximately the same rate that the state paid. He recommended sale of the property at that rate. The Commission unanimously approved the recommendation and on the following day signed the "option to purchase".

The Assistant Attorney presented for the Commission's consideration the sale of a tract of land in Klamath County to the U.S. Reclamation Service for enlargement of the Lost River Diversion Channel. He explained that the agreement covering the matter previously had been approved by the Commission and it now comes up simply for confirmation. The Commission formally approved the sale and on the following day signed the "land purchase contract".

The Commission considered the claim of Richard L. Coburn and D. E. Farmer for additional compensation in the amount of $1,500 in connection with the acquisition of right of way across their property on the Pringle Corner-McMinnville Section of the Pacific Highway West, Yamhill County. The Assistant Counsel, Mr. Neuner, explained that in the original acquisition the owners were paid $326.70 for their property, based on plans which showed the center line of the reconstructed highway at approximately the same elevation as then existed. However, the super-elevation in the easterly traffic lane of the new highway caused a substantial raising of grade and placed a barbecue property owned by these people on the east side of the highway approximately two feet below the new grade line, and inasmuch as the original negotiations were based on there being no change of grade line, it was his feeling that the owners have just cause to complain. He recommended that the claim be allowed, upon securing of a release from all future claims. He also recommended that the property owners not be allowed a damage claim for the traffic separator at this location. The Engineer concurred in both recommendations. The Commission unanimously approved the recommendations.

An exchange of properties with Walter Freeman in the City of Nyssa on the Nyssa-Adrian Highway, in Malheur County, was considered by the Commission. The Chief Counsel explained that although the areas are not quite equal in size, the area to be secured by the state is, in his opinion, a more valuable property He recommended the exchange. The Engineer concurred. The Commission approved the recommendation unanimously. (The deed of conveyance was signed by the Commission on the following day.)

The Commission considered and approved a deed conveying unto the S. P. & S. Railroad Company a small tract of land adjacent to the Lower Columbia River Highway, heretofore authorized by the Commission on July 21, 1947. (The deed was signed on the following day.)

The Chief Counsel reported difficulties with respect to acquisition of right of way for the proposed improvements of US99 W in the vicinity of Newberg, Dundee, and Dayton Junction, in Yamhill County. He advised that it is impossibl

to secure options at a reasonable figure due to what appears to be an organized attempt to hold the property at $1,500 an acre, which, in his opinion, is an exorbitant figure. He was instructed to continue negotiations for the options and report back to the Commission the progress thereof. The Commission indicated that it would postpone the improvements if right of way cannot be obtained at reasonable cost.

The Chief Counsel presented and read aloud a proposed amendment to the resolution that was adopted by the Commission at its previous meeting in June, covering the subject of speed and distance to be maintained between trucks and busses operating on state highways. The Commission approved the original resolution and also by unanimous vote approved the amendment thereto by the adoption of the resolution which is attached hereto marked Exhibit "M", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The status of right of way acquisition in Gold Beach on the Oregon Coast Highway was considered by the Commission. The Chief Counsel advised that all of the necessary right of way north of Second Street to Sunset Inn had been secured with the exception of one parcel; also, that negotiations with Mr. Crook for right of way south of Second Street have not been successful. So far as right of way is concerned, he said, bids could be called in September for the section north of Second Street. He pointed out, however, that there are numerous buildings to be moved and that the property owners have not been advised to move them pending a definite date for the starting of construction of the highway. The Engineer advised that from the construction angle it would be better to start work in the spring and suggested that bids be secured now for moving the houses. He also suggested that the property owners be advised that there will be some inconvenience due to the moving of the buildings but their entrances will be rocked to enable them to get into their properties without difficulty. Following discussion the Commission authorized and instructed the Chief Counsel to secure bids for moving the houses and to obtain from the Engineer a statement as to what commitments could be made to the property owners. The Engineer was authorized to advertise the construction for bids to be received when the plans and specifications are prepared.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Matters pertaining to the proposed by-pass route for The Dalles-California Highway in Klamath Falls was considered by the Commission. The Engineer recalled that at the last Commission meeting authority had been granted to study this route to determine if the line tentatively selected could be revised to avoid passing through a large auto court which is now under construction near the Link River Bridge. A complete study of this matter, he stated, reveals that a satisfactory alignment can be obtained by moving the proposed center line slightly to the west and thus avoid the motor court property. He recommended approval of the general route, as revised, and that the city and the county be provided with a map of the property in the area and be requested to make no sale of their holdings until the necessary rights

of way for the highway improvement have been obtained. He also recommended that he be given authority to make a complete survey so right of way descriptions can be prepared and negotiations for acquisition of right of way started. Following discussion Commissioner Schaupp moved that the Engineer's recommendations be adopted. Commissioner Chandler seconded the motion which carried unanimously with the understanding that no commitments whatsoever shall be made with respect to construction.

The Engineer reported on the matter of the state assuming maintenance of all county roads on the Federal Aid Secondary Highway System, as previously instructed by the Commission. He advised that to take over the maintenance of the 1,364 miles of county roads on this System would cost the state, on the basis of 1948 costs, about $937,068 annually. He suggested that it would be unwise to assume this obligation in view of the large amounts that the state is now spending in the maintenance and reconstruction of highways on the present state system. The Commission approved the Engineer's recommendation unanimously upon motion of Commissioner Schaupp.

The Commission considered an offer of the American Legion in Coquille to donate land to eliminate a jog in the Oregon Coast Highway at its intersection with the Coos Bay-Roseburg Highway, in Coquille, if the state would move and remodel their building that is located on the property. The Engineer advised that investigation reveals that the moving and remodeling of the building would cost $7,400. He further stated that in all probability the highway is not permanently located at this point. In the discussion following it was pointed out that the existing route on which the building is situated probably will be in use for at least another five years, and that residents of the city believe that it will always be used as a connecting highway link. In view of this information, the Engineer was instructed to secure quotations for the remodeling of the building and to report his findings.

A request from the City of Clatskanie for footpath construction along the lower Columbia River Highway from the east city limits easterly to the S. P. & S. Depot was considered by the Commission. The Engineer advised that this is a renewal of a request made about a year ago, which the Commissio denied because of the expense involved, estimated at $4,000. Investigation now discloses, he said, that the city limits have been extended some 2,000 feet, leaving approximately 1,000 feet of highway between the city limits and the depot. He estimated the cost to construct a footpath along the section outside of the city at $1,000 and recommended approval of the project on the condition that the City of Clatskanie will construct a footpath within the city limits and will furnish right of way that may be required within the city. The Commission approved the recommendation unanimously.

The Engineer reported on several requests for improvement of a one and one-half mile section of the Oregon Coast Highway immediately north of the town of Nehalem. He advised that since first reporting on this matter, he has made further investigation, as instructed by the Commission, to determine the cost to eliminate several hazardous curves, and that such investigation reveals that to provide such an improvement would cost approximately $35,000. The

section on which improvement is requested, he stated, is not the permanent route of the Oregon Coast Highway but will be used as the highway route for probably ten years or more and, upon completion of the permanent highway, will be necessary in order to serve the City of Nehalem and to form a connecting link between the newly constructed highway and the old highway. He recommended the improvement as a worthy project and that it be given consideration as a betterment project in 1949. The Commission approved the Engineer's recommendation unanimously.

The Commission discussed a proposed improvement of the Santiam Highway through the City of Sweet Home. The Engineer reported that there has apparently been some misunderstanding in the City of Sweet Home as to what the Commission proposes to do in improving the highway through the city. He recalled that about a year ago the city signified its willingness to cooperate in securing right of way if the state would widen the pavement, and the city did acquire several parcels for this purpose in connection with which certain statements were made that the state would replace existing concrete sidewalks, construct curbs, and extend the oiled surface to the new curb lines. The agreement has been fulfilled partially, he said, but is not completed because the city has failed to acquire all of the right of way and it is not desirable to remove an existing walk if a hazard would be created by reason of jogs that would be left at points where the old sidewalk joins the new one. It was his thought that the improvement should wait until all of the right of way is acquired so the job can be done as a whole rather than piecemeal. As the result of discussion of this matter, the Commission ordered that the city be instructed to obtain the needed right of way, particularly between 10th Street and 18th Street, and then come in and discuss the matter again with the Commission.

The Engineer presented a tabulation of the high bids received in Salem on July 30, for the purchase of used equipment and scrap materials stored at the Highway Department Shops at Salem, Coquille, Klamath Falls, and La Grande. He recommended action by the Commission with respect thereto as follows:

*(1) Sale of used equipment, Salem (56 items)
Recommendation: Award all items to high bidders.

*(2) Sale of scrap materials, Salem (8 items)
Recommendation: Award all items to high bidders.

*(3) Sale of used equipment, Coquille (6 items)
Recommendation: Reject bid on item No. 1, award all other items to high bidders.

*(4) Sale of scrap materials, Coquille (3 items)
Recommendation: Award all items to high bidders.

*(5) Sale of used equipment, Klamath Falls (9 items)
Recommendation: Reject bid on item No. 7, award all other items to high bidders.

(Cont.)

*(6) Sale of scrap materials, Klamath Falls (5 items)
Recommendation: Award items No. 1, 2, 3, and 4 to high bidders. No bids received for item No. 5.

*(7) Sale of used equipment, La Grande (9 items)
Recommendation: Reject bid on item No. 6, award all other items to high bidders.

*(8) Sale of scrap materials, La Grande (7 items)
Recommendation: Award all items to high bidders.

*For details with respect to the offers submitted for the items advertised for sale at each of the above-mentioned points, see tabulations of bids on file in the office of the State Highway Commission Salem.

The Commission unanimously approved the Engineer's recommendations.

The Engineer also reported the results of taking of bids in Salem on August 2, 1948, for the sale of dry myrtlewood timber in Humbug Mountain State Park, Curry County, as follows:

Sale of Myrtlewood Timber
Humbug Mountain State Park, Curry County

Pacific Myrtlewood Products, Coos Bay * $ 260.00

* The above bid was postmarked July 26, 1948. By letter postmarked July 27, 1948, the bidder reduced the bid to $155 as they claimed that approximately half of the lumber had been removed since it had been inspected.

The State Parks Superintendent estimated the value of the timber at $300 and recommended that the revised bid of $155 be rejected. The Commission adopted the recommendation and instructed the Parks Superintendent to negotiate the sale privately. (An offer from Mr. T. W. Young, Portland, to pay $175 for the material was reported on the following day. The Commission accepted the offer upon being informed that the State Parks Superintendent had removed most of the good material from the supply originally advertised for sale and that the amount offered by Mr. Young is very close to the actual value of the material. See page 15141 for additional entry.)

Pursuant to the Commission's instructions, the Engineer and Chief Counsel reported on their conference with Mr. Alfred D. Collier, Klamath Falls, with respect to the construction of a caretaker's building in Collier State Park. They recommended acceptance of the offer made by Mr. Collier earlier in the session, to contribute towards the project an amount equal to the difference between the amount of the Engineer's estimate plus ten percent of such amount, and the amount of the bid submitted by Burkhard & Shortgen, or $1,804.85. The Commission approved the recommendation unanimously and so informed Mr. Collier, who was present. Mr. Collier thereupon presented his

personal check in the amount of $1,804.85 as a guarantee.

The Commission considered and ordered filed a report from the Engineer on weighmasters' operations during the month of May, 1948.

The Engineer also reported on the trip to midwestern states by Mr. H. W. Libby, Chief Locating Engineer, to interview applicants for engineering positions. He advised that Mr. Libby interviewed applicants in Billings, Montana; Denver, Colorado; Fort Worth, Texas; Indianapolis, Indiana; and Chicago, Illinois; however, the results obtained were somewhat of a disappointment because out of 100 inquiries received by the Civil Service Commission, only 14 applicants appeared for interview, and of these only three had agreed to accept work in Oregon. The Commission ordered the report filed.

The need for additional office space for State Highway Department employees in Salem was again considered by the Commission. The Chief Counsel advised that his right of way department is still overcrowded, notwithstanding their recent move to the fifth floor of the State Office Building. He suggested that the use of at least one of the buildings located on the block which has been purchased for the proposed State Highway Office Building, as a temporary expedient, would be helpful. The Engineer concurred. In the discussion that followed, the question was raised as to whether it would be worth while to move the departments for a year's occupancy when they would have to move again if construction were started on the proposed Highway Office Building. The Commission deferred action on this matter pending further consultation with the Board of Control to ascertain whether or not any space will become available for highway department use when the new office building is completed. The Engineer was instructed to secure an appointment with the Board of Control some time during the following week, if possible.

The Commission discussed with the Engineer the bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows, the action of the Commission with respect to each project being by unanimous vote:

"Construct 32' x 37' frame building for caretaker's cottage at Saddle Mountain State Park in Clatsop County. Burgess Construction Company, Astoria, submitted the only bid for this project at $13,284. The Commission has rejected this bid as being too high.

"Scappoose Section of the Columbia River Highway in Columbia County; 3.57 mile of grading and paving. Parker-Schram Company, Portland, submitted the low bid for this job at $69,540.50. Porter W. Yett, Portland, submitted the second low bid at $82,963. One higher bid was received. The Commission has awarded this contract to the low bidder, Parker-Schram Company.

"Manning Slough Bridge on the Oregon Coast Highway, in Coos County. Glenn Snook, Eugene, submitted the low bid for this job at $24,610. Tom Lillebo, Reedsport, submitted the second low bid at $28,340.

Del R. Beebe Construction Co., Eugene, submitted the only other bid at $34,270; however, he agrees to a lump sum reduction of $10,000 if also awarded the contracts for the Delmar-Coaledo and Coaledo-Chrome Plant projects for which bids were received at this letting. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied

"Delmar-Coaledo Section of the Oregon Coast Highway in Coos County; 2.89 miles of grading and paving. Del R. Beebe Construction Company, Eugene, submitted the low bid for this job at $572,688.50. They qualified their bid by stating that they would not accept the award of this contract unless also awarded the contract for the Coaledo-Chrome Plant project. Rogers Construction Company, Portland, submitted the second low bid at $624,303 with the same qualification. Three higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the low combination bidder for both projects when certain conditions have been satisfied.

"Coaledo-Chrome Plant Section of the Oregon Coast Highway in Coos County; 2.0 miles of grading and paving. McNutt Brothers, Eugene, submitted the low bid for this job at $399,027 but have qualified their bid by stating that they will accept the award of this contract only in combination with the Delmar-Coaledo Project. Rogers Construction Company, Portland, submitted the second low bid at $407,405 with the same qualification. Del R. Beebe Construction Co., Eugene, submitted the third low bid at $420,980 with an identical qualification. Three higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the low combination bidder for both projects when certain conditions have been satisfied.

"The low combination bid for the Delmar-Coaledo and the Coaledo-Chrome Plant Sections, both on the Oregon Coast Highway in Coos County, was submitted by Del R. Beebe Construction Company, Eugene, at $993,668.50 Rogers Construction Company, Portland, submitted the second low combination bid at $1,031,708. The Commission has referred all bids to the Engineer with authority to award to the low combination bidder when certain conditions have been satisfied.

"Addition to Office Building at Roseburg in Douglas County. Construc 24' x 60' extension on frame office building with basement and furnace. Todd Building Company, Roseburg, submitted the only bid received for this job, the basic bid being $21,800 and the basic bid less items (a) and (b) at $21,375. This bid has been rejected as too high.

"Central Point Bituminous Macadam Surfacing Project on Pine Street in the City of Central Point, Jackson County; 0.53 mile of Type B-3 wearing surface. D. F McKenzie, Salem, submitted the low bid at $13,930. Babler Brothers, Portland, submitted the only other bid at $18,730. The Commission has awarded this contract to the low bidder, D. F. McKenzie.

"Cleaning and painting the West Fork, Illinois River Bridge at Mile Point 9.64 and the East Fork, Illinois River Bridge at Mile Point 12.31 on the Redwood Highway; also, the Robertson Bridge over Rogue River at Mile Point 13.37 on the Rogue River Loop Secondary Highway, all in Josephine County. Antonsen Painting Company, Tacoma, Washington, submitted the low bid for this work at $7,500. J. S Morris Company, Berkeley, California, submitted the only other bid at $12,280. The Commission has awarded the contract to the low bidder, Antonsen Painting Company.

"Construct 32' x 37' frame dwelling for caretaker's cottage in Collier State Park. No satisfactory bids were received for this project.

"Front Avenue (Sheridan Street-Bancroft Street) Topsoiling and Seeding Project on the Pacific Highway West in Portland, Multnomah County. Coast Construction Company, Portland, submitted the low bid for this work at $15,668. Kuckenberg Construction Company, Portland, submitted the second low bid at $19,250. One higher bid was received. All bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Kent-Cow Canyon Junction Re-oiling Project on the Sherman Highway in Sherman and Wasco Counties; 23.66 miles of re-oiling. D. F. McKenzie, Salem, submitted the low bid for this work at $30,083. Harr and Horton, Portland, submitted the second low bid at $30,893.84. Three higher bids were received. The Commission has awarded this contract to D. F. McKenzie, the low bidder.

"Tillamook Grading and Paving Project on Tenth Street in the City of Tillamook, Tillamook County. Cressler Construction Company, Tillamook submitted the only bid for this work at $29,250. The Commission has referred the bid to the Engineer with authority to award the contract to this bidder when certain conditions have been satisfied."

The Commission considered a request from residents of the Fairplay School District in Benton County for extension of sidewalk construction along the Albany-Corvallis Highway to the south boundary of the school district. The Engineer advised that as a result of a previous request several months ago, the Commission authorized an expenditure of $9,000 to construct a footpath to serve this school, and that the present request is for a 3,500-foot extension of that walk which is estimated to cost an additional $2,100. A field investigation, he stated, indicates that an extension 1,000 feet long if fully justified and should have been included in the previous authorization. He recommended construction of the 1,000 feet of footpath, which he estimated would cost about $600, the expense to be charged against the unallocated 1948 minor betterment fund. The Commission unanimously approved the Engineer's recommendation.

A petition was presented from residents of Scio and vicinity requesting the oiling of the unoiled portion of the Albany-Lyons Secondary Highway between Lyons and the easterly edge of the town of Scio, Linn County. The

Engineer advised that the unoiled section is approximately 14 miles long; that the traffic volume is quite heavy and the desirability of completing the oiled surface is evident. He estimated the cost to surface and oil the 14-mile section at $350,000 and recommended that it be given consideration in the formulation of the next construction program since no funds are available to finance it now. He was instructed by the Commission to bring up the matter when the next program is prepared.

The Commission discussed a letter from the Parkrose Chamber of Commerce concerning their previous request for the widening of Sandy Boulevard from 99th Street to 126th Street, and for the widening of this boulevard from Fairview to the proposed terminus of the Columbia River Highway at Fairview Farms. The Engineer reported that he has reviewed the records to ascertain whether or not the former Highway Commission made any commitments with respect to the improvement of Sandy Boulevard that have not been fulfilled. He could find none except one involving a small expenditure for oiling the shoulders between 108th Avenue and 122nd Avenue, which was estimated to cost $3,500; moreover, there is no evidence whatsoever that the people of Parkrose were ever promised a full-width pavement as they allege. He read aloud his written report on the subject. (See copy of letter to the Commission dated August 6, 1948, in general files for details.) He estimated the cost to provide a full-width (60-foot) pavement between 108th Avenue and 122nd Avenue at $150,000.

Chairman Banfield expressed his feeling that if the present Highway Commission has not fulfilled the commitments of the former Highway Commission with respect to this matter, then that should be done. Commissioners Schaupp and Chandler concurred. The Engineer was authorized and instructed to proceed accordingly. The Secretary was instructed to inform the Parkrose Chamber of Commerce that a careful review of the records discloses no unfulfilled obligations of the former Highway Commission with respect to the improvement of Sandy Boulevard through the Parkrose District, except the oiling of shoulders between 108th Avenue and 122nd Avenue, and that the records do not disclose that the people of Parkrose were ever promised the full-width pavement that they are now requesting.

The Commission considered a request from the City of Milton for state aid in improving a portion of the old Oregon-Washington Highway route through the city by widening the present oiled surfacing from 43 to 70 feet. The Engineer pointed out that this street is partially occupied by the Walla Walla Valley Railroad tracks. He recommended that the state do not participate in the cost of the widening work because the new highway route will soon be open to traffic and then the old route will be of only local importance. The Commission unanimously approved the Engineer's recommendation.

The Engineer brought up for discussion the need to increase the vertical clearance under the Minam underpass on the Wallowa Lake Highway in Wallowa County, which the Commission inspected recently on its Eastern Oregon trip. He recalled that numerous requests have been received for this improvement which, he declared, is fully justified. He estimated the cost to increase the vertical clearance, which would be accomplished by lowering the grade line

under the bridge, and providing proper drainage facilities, at $4,000. He recommended approval of the work as a 1948 minor betterment project. The Commission unanimously approved the recommendation.

Consideration was given by the Commission to the expenditure of $97,400 for construction and improvement of equipment storage headquarters at nine locations as follows:

1.	Austin	Purchase log house for employee housing	$ 400
2.	Milwaukie	Remodel basement to provide additional office	500
3.	Bend	Add two rooms to present Division office	7,500
4.	Eddyville	Erect maintenance headquarters, 28' x 64'	11,000
5.	Chiloquin	Erect maintenance headquarters, 32' x 90'	17,000
6.	Lapine	Erect maintenance headquarters, 32' x 90'	17,000
7.	Jordan Valley	Erect maintenance headquarters, 32' x 76'	15,500
8.	Hereford	Erect maintenance headquarters, 32' x 76'	15,000
9.	Silver Lake	Erect maintenance headquarters, 32' x 64'	13,500
		Total	$97,400

The Engineer advised that all of these projects have been carefully studied and are urgently needed. He recommended that they be approved for contract construction, the funds to be provided from the Capital Outlay Expenditures section of the 1948 budget, subheaded "Construction and Improvements, Maintenance Stations". Following discussion the Commission approved the recommendation by unanimous vote. The Engineer was authorized to call for bids for construction of the buildings.

The Engineer requested authority to transfer $23,700 from the general bridge maintenance fund to the special bridge maintenance fund in order to finance the painting of five steel bridges in Division III by contract. He explained that the regular bridge crews have not been able to do this work because of extra bridge repair work necessitated by flood damage in Southern Oregon during the past winter. The Commission unanimously approved the transfer.

The Engineer requested approval of eight small minor betterment projects totaling an expenditure of $12,050 as follows, provision for which, he said, was made in the 1948 budget:

1. In Reedsport construct 300 lin. ft. of concrete curb island to control traffic as per design and recommendation of Traffic Engineer, at junction of Winchester Avenue and Oregon Coast Highway, estimated to cost $680. Original order was for $100 to install 40 sight posts. Additional authorization requested for permanent concrete curb installation. $ 580

2. Lancaster M.P. 106.71, Pacific Highway 1E. Place 375' x 16' concrete slope protection where yearly high waters wash out shoulders - 100 cubic yards at $20.00 per cubic yard. 2,000

3. Albany-Corvallis Highway 31, M.P. 8.92, 10.18 and 10.24 Place 193 cubic yards concrete shoulder and slope protection where yearly high waters wash out shoulders. 193 c.y. at $20.00 per c.y. $3,860

4. Clackamas Secondary Highway at intersection with Folsom Road. Remove cut bank to improve sight distance. 100 c.y. at $2.50. Above work requested in a petition presented by 23 signers. 250

5. The Dalles-California Highway at LaPine. Install 86' culvert pipe with catch basin to provide drainage at location concerning which numerous complaints have been received on account of standing and impounded water. 460

6. The Santiam Highway at east limits of Sweet Home - Install 416 lin. feet of culvert pipe and two catch basins to provide drainage for this area where water is impounded and no outlet previously provided. 1,250

7. Coast Highway at Station 1180 North of Taft. Install 800 lin. feet of culvert pipe, 3 catch basins and 1 man hole to correct drainage in conjunction with PRA project. (This is in addition to work authorized at Pacific Avenue in Taft toward which county cooperated to extent of $500.) 2,500

8. Coast Highway construct road approach embankment to replace plank approach immediately south and west of Kernville Drawbridge as per Right of Way agreement dated October, 1943. 1,150

Total $12,050

The Commission unanimously approved the expenditures as listed.

A petition was presented from residents of Baker County requesting improvement of the Sumpter Valley Secondary Highway, using abandoned railroad right of way. The Engineer reported that the petitioners want as good a road as the Baker-Unity Highway which was recently improved to facilitate the truck hauling of logs and lumber from the district south and west of Sumpter into Baker as a substitute for the railroad which formerly operated between Baker and Austin. He estimated the cost to improve to modern secondary highway standards a 6½-mile section of this road at about $300,000, and to improve the full length of the highway, 22.8 miles, at about $1,500,000. He pointed out that there are no funds available to finance either project now, however, suggested that it be considered in the formulation of the next construction program. The Commission unanimously approved the suggestion.

The Commission discussed a peition from residents of Lincoln County for further improvement of the Siletz Secondary Highway between Kernville and Siletz. The Engineer was instructed to submit a preliminary report on the subject.

A letter was presented from County Judge F. E. Gilkey, of Lincoln County, requesting designation of the Siletz-Logsdon County Road as a state secondary highway, or if such is not possible, that it be given first priority under the Federal Aid Secondary program. The Commission denied both requests because of lack of funds to finance the work, monies available being needed to improve the roads that are now on the state highway system.

The Engineer requested an additional authorization of approximately $735 to pay additional costs required by the reconstruction of the water pipe line of the People's Water & Gas Co., Coos Bay, incident to the improvement of the Oregon Coast Highway between Coos Bay and North Bend. He recalled that under an agreement with the Company dated December 27, 1945, the Commission agreed to cooperate with the company in the removal of the 14-inch wood pipe and the reinstallation of a 14-inch cast iron pipe between Stations 214+20 and 218+20, but it has now been determined that an additional 14-inch wood pipe between Stations 207+00 and 214+20 should be removed since it will be necessary to replace it within a few years, which then would cause considerable interruption to traffic and additional expense for cutting sidewalks. He recommended that the original agreement be amended to cover this replacement of pipe, which would be charged to the North Bend-Coos Bay contract. The Commission unanimously approved the recommendation.

A claim was presented from the Sherman County Court for reimbursement in the amount of $271.20 for expenditures made by the county to restore a section of county road between Wasco and Rufus which was used as a detour for Columbia River Highway traffic during the Columbia River flood in June of 1948. The Engineer advised that the claim has been investigated, and in his estimation, it should be paid, and he so recommended. The Commission unanimously approved the recommendation.

The Engineer reported that the following cities and towns had fulfilled the requirements with respect to the expenditure of 1946 State Tax Street Funds which they received in 1947 and that the plans of the projects proposed for such funds have been examined and found satisfactory:

Granite	Long Creek	Troutdale
Hammond	Scotts Mills	

He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution relative there to marked Exhibit "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have fulfilled the requirements with respect to the expenditure of 1947 State Tax Street Funds received by them in 1948:

Adams	Gearhart	Long Creek	St. Paul
Butte Falls	Gold Beach	Malin	Stanfield
Canyon City	Halfway	Manzanita	Turner
Carlton	Hammond	Phoenix	Yamhill
Coberg	Harrisburg	Rogue River	Yoncalla
Dundee	Joseph		

He advised that the plans for the projects which it is proposed to finance with these funds have been examined and found satisfactory and he recommended approval of the plans. The Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto marked Exhibit "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer presented for the Commission's consideration "options for cooperative construction projects" in the following cities and towns covering construction to be financed from the $250,000 Special State Tax Street Fund as previously authorized by the Commission:

Beaverton	Newport	Milton	Burns
Tillamook	Florence	Ontario	Garibaldi

The Commission unanimously approved the cooperative construction projects as submitted and also unanimously approved special agreement with the City of Burns relative to the project in that city.

The Commission unanimously confirmed the Engineer's award of the following contracts, bids for which were received by the Commission at its meeting on June 28 and 29, 1948, the Engineer having reported that the conditions of the awards have been satisfied:

Grading, surfacing and oiling the Agate Beach-Newport Section of the Oregon Coast Highway; contract awarded July 1 to J.N. & M.J. Conley, low bidders.

Grading and paving the Eugene Section of the Pacific Highway; contract awarded July 1 to Del R. Beebe Construction Company, low bidder.

Grading Troutdale Section of the Columbia River Highway; contract awarded July 9 to Vernie Jarl, low bidder.

Grading, surfacing, and oiling Lost Creek-Lowell Section of the Willamette Highway; contract awarded July 6 to Roy L. Houck, Jr., low bidder.

Grading and paving Middle Grove-Pudding River Section of the Salem-Silverton County Road; contract awarded July 7 to Warren Northwest, Inc., low bidder.

The Engineer reported that the relocation survey of The Dalles-California Highway between Crescent and Chemult in Klamath County has been completed. He asked the Commission to approve it as the permanent route of such highway section and to authorize acquisition of needed right of way, the project having previously been approved for construction as a major betterment project. After due consideration of the Engineer's report with respect to the survey under discussion, the Commission approved the survey and thereupon by unanimous vote adopted the resolution marked Exhibit "E" attached hereto and by this reference made a part hereof with like effect as though extended in full herein. The Commission also unanimously authorized the Chief Counsel to negotiate right of way options as may be required for this project.

In this connection, the Commission instructed the Engineer to submit a report showing the status of the projects, both completed and incomplete, that are included in the major betterment program for 1948 performance.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Kuckenberg Construction Company, Contract No. 2874 for construction of ramps at the west end of the Ross Island Bridge on the South Unit, Front Avenue Section of the Pacific Highway West in Multnomah County, requested an additional extension of time of 25 days from May 30 to June 24, 1948, within which to complete this job. They alleged that their failure to complete the project within the previously extended time limit was due to labor strikes which delayed delivery of certain electric light fixtures. The Engineer advised that the contract provided that the state should furnish cast iron bases for the lights, and it was anticipated that they could be obtained from Multnomah County; however, that proved impracticable and it was necessary to get them elsewhere, and, due to the strike conditions, delivery was delayed. He recommended that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission unanimously approved the recommendation.

Lindstrom Brothers, Contract No. 2911 for construction of the Fort Hill Bridge on the Salmon River Highway in Polk County, requested an additional extension of time of 20 days from June 30 to July 20, 1948, within which to complete the job. They stated that construction of the new bridge was completed on time and that the only work remaining was removal of the old structure, which was delayed because of unusually high water during the spring months. The Engineer advised that the contractor's statements are substantially correct. He recommended that the additional extension of time now requested be granted without penalty. The Commission unanimously approved the recommendation.

Lindstrom Brothers, Contract No. 2942 for construction of the Rock Creek Bridge on the Clackamas State Secondary Highway in Clackamas County, requested an additional extension of time of 30 days from June 30 to July 31, 1948, in which to complete this project. They alleged that construction of the new bridge was completed March 31, 1948, but it was impossible to remove the old structure because it had to be used by the public pending completion of approaches to the new one by another contractor. The Engineer advised that the contractor's statements are substantially true, that he was ordered not to remove the old bridge until the new approach fills were sufficiently stable to permit traffic to operate over them. He recommended that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission unanimously approved the recommendation.

Birkemeier and Saremal, Contract No. 2918 for construction of a bridge on the North Plains-Barnes Road Section of the Sunset Highway in Washington County, requested an additional extension of time of 19 days from June 1 to June 19, 1948, within which to complete this work. They alleged that the subgrade leading to the bridge was so wet that it was impossible to transport the necessary steel, timbers, etc., over it. The Engineer advised that the contractor's statements were substantially correct, that the new bridge was completed well within the previously extended time limit but the ground over which material was removed from a "shoofly" bridge, which was used during construction, was so soft that the contractor was permitted to defer removal of the old bridge until the ground dried out. He recommended that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendtion unanimously.

Denton Construction Company, Contract No. 2899 for regrading and oil mat surfacing on the Madras Section of The Dalles-California Highway in Jefferson County, requested an additional extension of time of 30 days from July 1 to August 1, 1948, within which to complete this work. The contractor alleged that his subcontractor on the paving work could not complete that part of the work because of delays on another state highway job. The Engineer advised that inability to secure steel had prevented completion of the bridge in time to complete the paving last fall and that the subcontractor on that work was held up on another state highway job this summer. He recommended that the additional extension of time now requested be granted without penalty. The Commission approved the recommendation.

Parker-Schram Company, Contract No. 2924, for pavement widening on the Parkrose Section of the Columbia River Highway in Multnomah County, requested an additional extension of time of 10 days from June 15 to June 25, 1948, within which to complete this job. They alleged that exceptionally rainy weather during the spring months prevented completion of the paving operation within the limits of the previously extended time. The Engineer advised that due to exceptionally rainy weather, and the fact that the contractor was called off this job to perform emergency work on Union and Denver Avenue fills during the Columbia River flood, he was unable to complete the contract within the specified time limit. He recommended that the extension of time now requested be granted without penalty. The Commission approved the recommendation unanimously.

Parker-Schram, Contract No. 3024 for surfacing and paving on the Union and Denver Avenue Sections of the Pacific Highway East and Pacific Highway West, Multnomah County, requested an extension of time of 30 days from July 30 to August 29, 1948, within which to complete the work. They alleged that all work originally contemplated under the contract was completed within the specified time limit and that the overrun of time was due to additional work on the Swift Boulevard Section which cannot be performed until some time during the early part of August because it is dependent upon completion of the hydraulic dredge fill that is now under way. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

L. R. Kauffman, Contract No. 2914 for rock production on the Alsea Section of the Alsea and Alsea-Deadwood Highways in Benton and Lincoln Counties, requested an additional extension of time of 54 days from April 10 to June 4, 1948, within which to complete this work. He gave no reason for overrunning the specified time limit. The Engineer advised that the contractor was hampered by breakdown of equipment and inability to make repairs, however, that did not cause delay to state repair crews or inconvenience to the public. He recommended that the additional extension of time now requested by granted without penalty. The Commission approved the recommendation.

Lindstrom Brothers, Contract No. 2931 for widening the Dairy Creek Bridge on the Hillsboro-Forest Grove Section of the Tualatin Valley Highway in Washington County, requested an additional extension of time of 31 days from July 31 to August 31, 1948, within which to complete the job. They alleged that the ground at the job site had not dried sufficiently since the high water to permit the operation of heavy equipment required to complete extra work that had been ordered by the Engineer. The

Engineer advised that the contractor's statements are substantially correct and accordingly recommended that the additional extension of time now requested be granted without penalty. The Commission approved the recommendation.

Rogers Construction Company, Contract No. 2816 for surfacing and oiling the Unity Junction-Ironside Section of the John Day Highway in Baker and Malheur Counties, requested an additional extension of time of 46 days from July 31, 1948, to September 15, 1948, within which to complete this job. They alleged that the lateness of the spring breakup and urgent commitments to the State Highway Commission for completion of the East Diamond Lake Junction-Lobert Section of The Dalles-California Highway and the Bonanza-Poe Valley-Malin Section of the Bonanza-Malin County Road prevented commencement of their operations and completion of the job within the limits of the previous time extension. The Engineer advised that statements as presented by the contractor are substantially correct; moreover, the contractor had been very cooperative in pressing other projects to completion. He recommended that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

K. F Jacobsen and Company, Inc., Contract No. 2891 for grading and bituminous macadam surfacing on the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road in Washington and Multnomah Counties, requested an additional extension of time of 31 days from August 15 to September 15, 1948, within which to complete this work. They alleged that due to the wet condition of the subgrade the engineer in charge requested postponement of the oiling work until the grade had dried. The Engineer advised that the contractor had been requested to defer the oiling until the first of August because of extremely wet subgrade conditions. He recommended, in view thereof, that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that contracts numbers 2814, 2820, 2874, 2898, 2903, 2907, 2911, 2913, 2918, 2934, 2941, 2942, 2943, 2952, 2957, 2958, 2967, 2979, 2993, 2998, and 3002, for state highway construction have been completed according to the requirements of the contracts or modifications thereof and that the jobs are now ready for acceptance by the Commission. After due consideration of the Engineer's report, with respect to the contracts under discussion, the Commission approved and accepted the contracts as reported and by unanimous vote adopted the attached resolution relative thereto marked Exhibit "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed and denied, as a matter of policy, a request from the Christian Church of Newberg for a permit authorizing the landing and taking off of aircraft on the beach one-half mile north of Neskowin, Tillamook County.

The Engineer reported that in connection with the relocation of the Willamette Highway and the Southern Pacific railroad tracks to permit construction of Meridian Dam by the U.S. Army Engineers, the old highway will be closed at its crossing with the relocated S.P. railroad and that the Army Engineers propose to construct a county road between the old and the new Willamette Highways a short distance east of this closure. At the point where the county road will connect with the new highway, he said, there is a restriction of access which was acquired when the highway right of way was purchased, so it will be necessary for the State Highway Commission to waive access for a county road at this point. He advised that the matter has been investigated and it has been determined that no resultant hazard will be created. He recommended approval of the waiver of access so as to permit the county road connection. The Assistant Counsel, Mr. Neuner, concurred therein. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution, marked Exhibit "G", relative thereto, which resolution by this reference is made a part hereof as though copied in full herein.

The Commission discussed the matter of abandoning a portion of the Illahee-Steiwer Hill Section of the Pacific Highway East (old route) where the permanent highway has been constructed on other alignment. The Engineer advised that portions of the section under discussion no longer are of value for state highway purposes and should be relinquished to Marion County for future maintenance; however, other portions should be retained by the state. He exhibited a map showing the portions referred to and recommended disposal of the section in conformity therewith. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked Exhibit "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Secretary presented for the Commission's consideration a resolution from the Klamath County Court requesting that the old route of US97 (The Dalles-California Highway) from its connection with the new route of this highway in the S.E. ¼ S.E. ¼ of Sec. 24, T. 29 S., R. 7 E., W. M., to its connection with the Crater Lake Highway at Fort Klamath Junction, in Sec. 23, T. 33 S., R. 7½ E., W.M., a distance of 26.98 miles, be designated as a state secondary highway, in view of the fact that US97 has been relocated and constructed on revised alignment. The Engineer recommended approval of this request. He also recommended that the old route of US97 (The Dalles-California Highway) from Fort Klamath Junction to its connection with the new route of the highway be redesignated as an extension of the Crater Lake Highway in order to meet the Federal requirements that primary highways shall connect physically. He exhibited a map showing both recommended designations.

Following considerable discussion the Commission approved both recommendations and thereupon by unanimous vote adopted the attached resolution relative thereto, marked Exhibit "I", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer brought up for discussion a recommendation from Col. O. E Walsh, U. S. Corps of Engineers, that the State Highway Department consider the possibility of sponsoring an Engineer Light Equipment Company as an affiliated reserve unit of the Army. He advised that this matter has been investigated for details, and it has been ascertained that the company would be made up of persons whose every day occupations will closely parallel the duties they would perform in wartime emergency, and that the company would operate, in times of emergency, equipment that is needed for hasty construction of air fields, roadways, etc. The personnel, he said, would be drawn entirely from volunteers from the highway organization and would be called into service only in the event of an emergency. He added that sponsoring the unit would involve no cost to the State Highway Department and there would be no training periods taken from work time which are not already permitted under leave-of-absence regulations. He recommended that the Commission approve the sponsoring of such an Engineer Light Equipment Company. This matter was discussed by the Commission at some length and as a result thereof the Commission unanimously approved the recommendation.

The Commission discussed and unanimously approved an agreement with Glen P. White, which is an arrangement for the elimination of a cattle pass located on the Wasco-Heppner Secondary Highway at Mile Post 1.9. It appears that the existing structure is in need of repairs that would be rather costly, and that Mr. White has offered to relinquish his rights if paid the sum of $50. The Engineer recommended acceptance of the offer and replacement of the cattle pass with a small drainage culvert. The Commission approved the recommendation and so ordered. (The agreement with Mr. White was signed by the Commission on the following day.)

The Commission considered and approved a lease agreement with Bryson L. Clutter covering operation of Mr. Clutter's house trailer during his employment with the State Highway Department, upon advice from the Assistant Counsel that neither the state nor the State Highway Commission will incur any liability thereby. (The agreement was signed by the Commission on the following day.)

The Commission unanimously confirmed the telephonic authority given the Engineer on July 13, 1948, for an additional expenditure of $4,360 to purchase needed office and engineering equipment.

A request was presented from the City of Coos Bay for the installation of traffic lights at the intersection of Broadway St. and Hall St. and at Broadway St. and Johnson St. in Coos Bay. The Engineer advised that Broadway St. is the route of the Oregon Coast Highway and that investigations made by the Traffic Engineer reveal no urgent need for the signals inasmuch as the traffic volume entering Broadway St. is far below the accepted minimum

of 175 vehicles per hour; moreover, the signals are not warranted by the accident record. He recommended that the request be denied. The Commission approved the recommendation.

A petition was presented from citizens of the West Slope District, Portland, requesting the installation of a traffic signal on the Tualatin Valley Highway at its intersection with Multnomah Club Road. Action on this matter was deferred by the Commission until a future time.

A request from the Southern Pacific Company for state cooperation in the installation of a railroad traffic signal at the crossing of the railroad with the Junction City-Eugene Secondary Highway in the City of Junction City had the attention of the Commission. The Engineer estimated the cost of a standard signal at this location at $3,646, of which amount, he said, the company is asking the state to pay 50 percent, or $1,823. He recommended approval of the request because the existing signal is of an obsolete type, the sight distance involved is poor, and because of additional potential hazards. The Commission approved the recommendation. (An agreement covering the matter was signed by the Commission on the following day.)

The Commission considered and denied a request from the City of Bay City for the installation of two traffic signals on the Oregon Coast Highway, one at its intersection with Tillamook Avenue and the other at its intersection with Main Street, in Bay City, upon advice from the Engineer that investigations reveal the signals are not warranted.

The Commission also discussed a request from Mr. Pat Lonergan, Portland, for a reduced speed zone on the Bertha-Hillsdale Highway in the vicinity of Glencullen. The Engineer advised that this matter has been investigated and, while the alignment of the highway is a series of rather flat curves and the traffic is able to maintain a fairly high rate of speed, the sight distance is at a minimum. Due to the fact that there are a number of business establishments and scattered residences throughout the section and that there is a considerable pedestrian movement both along and across the highway, it was his recommendation that a 40-miles-per-hour speed limit be established between Mile Post 2.00 and Mile Post 2.55, which is the section between S.W. 42nd Avenue and S.W. 50th Avenue. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked Exhibit "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A petition was presented from residents of Gates, Oregon, for the designation of a 25-miles-per-hour speed zone on the North Santiam Highway through the town of Gates. The Commission denied the request upon recommendation of the Engineer, who advised that the matter has been investigated and conditions do not reveal the necessity for establishing such speed zone. He recommended, in lieu thereof, that signs bearing the wording "Look Out for Pedestrians Ahead" be installed at appropriate locations along this section. The Commission unanimously approved the installation of such signs.

The Commission denied a petition from the Good Neighbors Club, Portland, for a safety crosswalk across McLaughlin Boulevard (Pacific Highway East) at its intersection with Ochoco Street, in Portland. In the discussion of this matter, Chairman Banfield recalled that the City of Portland some time ago asked the Commission to cooperate in the installation of a system of synchronized lights on McLaughlin Boulevard, but the Commission refused to agree to the elaborate plan the city presented and referred the matter to the Engineer to check with the city to ascertain what might be done in the way of a less elaborate plan. The Engineer advised that his report on the subject has not been prepared but that he would present it as soon as possible.

The Engineer brought up for discussion log-hauling violations committed by operators in the employ of Howard Williams, Portland, particularly covering the operation of two of the trucks Mr. Williams has under lease. It appears that drivers of these trucks refused to allow their equipment to be weighed when requested by the State Weighmaster, in violation of the Commission's rules and regulations. It also appears that when the matter was called to Mr. Williams' attention he declared that he did not want any trucks to be operating under his permit in contradiction of the prescribed rules and agreed to the cancellation of the permits of these operators if they will not comply with the regulations. The Engineer recommended, in view of the declaration of Mr. Williams, that the permits of the operators not be cancelled for the present offenses, but if they are repeated that they be cancelled. The Commission approved the recommendation and ordered that Mr. Williams be so informed.

The Engineer reported that the 50 percent reduced load limit which has been in effect on the East Diamond Lake and the Crater Lake North Secondary Highways since the 12th day of March, 1948, no longer is required because of improved conditions and that on July 15, 1948, he ordered the removal of the reduced load limit signs. He asked the Commission to confirm the action. The action of the Engineer in this matter was approved by the Commission by the adoption of the attached resolution marked Exhibit "K", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission had under discussion the designation of persons to represent the State Highway Department at the annual meeting of the American Association of State Highway Officials in Salt Lake City from September 19-24, 1948. The following persons were authorized by the Commission to attend this meeting at state expense:

T. H. Banfield	W. C. Williams	G. S. Paxson
A. W. Schaupp	W. W. Stiffler	F. B Crandall
Ben H. Chandler	J. M. Devers	Mark Astrup
R. H Baldock	G. W. Neuner	H. B. Glaisyer

The Commission discussed a date for its next regular meeting and as a result set Monday and Tuesday, September 13 and 14, 1948, as such meeting

date. The meeting is to be held in Portland, and the Secretary was instructed to make the usual arrangements for the use of the Green Room in the Imperial Hotel.

The Commission also discussed a date for its third inspection trip but deferred a decision in the matter until later.

The Engineer asked the Commission to confirm an additional authorization of $75,000 in connection with State Highway Contract No. 3006 for grading and surfacing the Rainier-Goble Section of the Lower Columbia River Highway, which work is under contract to Leonard & Slate, Oreg. Ltd. He explained that such amount is needed to finance raising the grade line on certain portions of this section in order to place it above the 1948 flood water elevation and to insure that the highway will be above the elevation of future floods. The Commission unanimously approved an extra amount of $75,000 for this purpose.

The Engineer brought up for discussion the matter of modernizing the Highway Department-State Police Department radio network, which matter was first discussed at the previous meeting. He estimated the cost involved at $215,000, including the replacement of present transmission sets, the purchase and installation of mobile units in certain highway cars, and the building of transmission towers. The State Police, he said, plan to spend an additional $50,000 on their mobile units. Of the total amount of $215,000 to be spent by the State Highway Department to accomplish the objective, he said, only about $20,000 will have to be spent this year, $45,000 next year, and the remaining $150,000 in the two ensuing years. In the event the State Highway Commission does not approve this expenditure, he added, it would result in two separate radio systems, one for the Department of State Police and the other for the State Highway Department. He recommended approval of the plan for the joint radio set up, which, he said, would save the State of Oregon considerable money over the installation of the two separate systems. As the result of discussion and very careful consideration of this matter, the Commission unanimously approved the expenditure of the $215,000 as recommended by the Engineer on motion of Commissioner Chandler, duly seconded by Commissioner Schaupp. The Engineer and the Chief Counsel were thereupon instructed to work up a contractual agreement with the State Police covering the transaction.

The Chief Counsel brought up for discussion the need to condemn property belonging to Jean Minnie Huntley and F. J. Huntley, her husband, which property is needed as right of way for the proposed improvement of the Oregon Coast Highway in the Town of Gold Beach. The Commission approved the condemnation of this property and thereupon by unanimous vote adopted a resolution with regard thereto, which resolution by order of the Commission has been inserted in the minutes of the meeting of the Highway Commission held on June 29, 1948, and is marked Exhibit "O" in such minutes.

The Commission discussed a petition signed by 28 residents of Pendleton concerning the two-way traffic route on Court Avenue and Dorion Avenue

(route of the Old Oregon Trail) in this city. The Engineer recalled that the contract, amounting to approximately $116,000, is now under way for the improvement of these two one-way streets, that the plans for the project and the route were approved by the Pendleton City Council by the passing of ordinances, and that the work is being done in accordance with the city's desire. The contract is not completed, but when it is completed, it will be difficult to return to a one-way street pattern and as a result a serious traffic hazard would be created in the west end of the town. He recommended that the petition be denied. The Commission approved the recommendation unanimously.

The Commission approved a bargain and sale deed conveying unto F. C. Marshall and wife 1.84 acres of land in Columbia County as consideration for a ten-acre tract of land the state acquired from the Marshalls. It was pointed out that the Commission authorized such exchange of properties at its meeting on June 28, 1948. (The deed was signed on the following day.)

The Commission discussed at considerable length reports from the Engineer and the Chief Counsel with respect to the proposed Dewey Avenue undercrossing on the Baker-Unity Highway in the City of Baker. In his report the Engineer described the plan originally proposed for this improvement, pointing out that such plan considered only the separation of the grades of the highway and the Union Pacific Company's tracks, the abandonment of a section of the Sumpter Valley Railroad where it crosses the highway, and the construction of a new connection between both railroads at a point about 900 feet south of the proposed Union Pacific R.R. underpass. Such plan, he said, required building the new railroad connection across the unused mill yard of the Stoddard Lumber Co. which, until recently, planned to abandon use of its mill entirely. It appears now, he said, that other plans have been made which will require the use of the mill yard, so right of way could be obtained only by condemnation at considerable expense.

The Engineer also mentioned an alternate line for the proposed connection of the Sumpter Valley Railroad with the Union Pacific Railroad at a point further removed from the underpass which would by-pass the Stoddard Lumber Co. property entirely but would cost about $27,000 more to construct than the original line. He exhibited a map showing both lines and gave figures as to the cost of each. He estimated the present day cost of the project, using the alternate railroad connecting line, at $525,000, of which amount, he said, $69,700 is the estimated cost of the Sumpter Valley Railroad track changes toward which the railroad company could be expected to contribute ten percent, or $6,970. The Union Pacific Co., he added, could be expected to contribute ten percent of the remaining expense, or $45,530. The Engineer recommended that the elimination of the grade crossing of the Sumpter Valley Railroad be continued in the plan for this improvement and that the Commission adopt the alternate line that entirely misses the property of the Stoddard Lumber Co.; further, that the Commission insist on a ten percent cash contribution by the Sumpter Valley Railroad Company for the readjustment of its facilities, and if the company will not pay such sum, that the matter be referred to the Public Utilities Commissioner for adjudication of costs.

The Chief Counsel reported on right of way features. He, too, recommended adoption of the alternate line mentioned by the Engineer.

As a result of the discussion, the Commission instructed the Chief Counsel to ascertain the attitude of the City of Baker and the attitude of both railroad companies with respect to the amounts that each will contribute toward the cost of this improvement if the Commission should order the work to proceed. The information is to be reported to the Commission which will then decide its future action with respect to placing the matter before the Public Utilities Commissioner.

(For further details see a copy of the Engineer's written report dated July 29, 1948, and a copy of the Chief Counsel's report dated July 29, 1948, in the general files.)

A letter was presented from Mr. Ed Ostendorf, Mayor of the City of Klamath Falls, in which the Highway Commission is requested to authorize certain repair work on the unpaved portion of Alameda Street, Klamath Falls, from a point in front of the city hospital at Pacific Terrace, to Hillside Avenue at the Main Street Bridge of Klamath Project Irrigation Canal. Mr. Ostendorf advises that because of the closing of Esplanade and Portland Streets by the new highway construction, Alameda Street is obliged to carry all of the traffic in the Hot Springs district. He also states that the city has graveled and oiled this section on two different occasions, but the improvement does not stand up under traffic because of subgrade conditions. He suggests that the state construct black top pavement at least two inches thick and 18 feet wide on the section, which he thought would suffice until the standard highway improvement is extended. The City of Klamath Falls, he said, would contribute a portion of the expense if the work is done immediately. The Engineer advised that the Highway Commission has not adopted a permanent location for the highway along this particular street; however, the state has certain obligations because construction of the underpass on Esplanade Street has forced people to travel over Alameda Street. It was his thought that the state should assist the city in maintaining this street. Commissioner Schaupp gave as his thought that all the city is asking for at this time is for state aid in keeping this street fit for travel. He also expressed the thought that the state has certain obligations in the matter. Following further discussion, the Commission voted unanimously to assist the city in maintaining the street during the progress of the highway improvement and to restore the street to its original condition when it no longer is needed as a highway detour. Such action was taken by the Commission upon motion of Commissioner Chandler, which was duly seconded by Commissioner Schaupp. The Engineer was instructed to proceed accordingly.

The Commission discussed a joint report from the Engineer and the Chief Counsel with respect to a request from the Crown Zellerbach Corporation for permission to fell snags and stumps on an approximate 70-acre tract of state-owned land in the vicinity of Jewell, Clatsop County, which was acquired by the State Highway Commission several years ago for rock quarry purposes. It appears from the report that this quarry was burned over several years

ago and in general the only timber consists of snags and stumps, although considerable merchantable material can be salvaged. The report also indicates that there are 215 M-FBM of timber on the tract, as cruised by the Corporation, which, at $10 per thousand, would realize only about $2,150 which, according to the Engineer, is barely enough to pay for surveying the property lines and checking the cruise of the timber. The Engineer suggested that the Commission accept the Crown Zellerbach Corporation's cruise and offer to sell the timber to the Corporation at $10 per thousand with the understanding that the Corporation will clear all of the timber, merchantable or otherwise, in order to eliminate the fire hazard. The Commission approved the recommendation unanimously on motion of Commissioner Schaupp, which was seconded by Commissioner Chandler, and instructed the Secretary to notify Mr. J. R. Frum, Assistant Vice President of the Corporation, of the action taken.

The meeting adjourned at 5:10 p.m. to reconvene at 9:00 a.m. on the following day in the same room.

Portland, Oregon
August 10, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J M. Devers, Chief Counsel
George W. Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for construction of state highway projects were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

PACIFIC HIGHWAY W. IN BENTON COUNTY

CORVALLIS (SOUTH ENTRANCE) SECTION

Lindstrom Bros., Portland	$152,850.50
Walder & Kenworthy and Tower Sales & Erecting Co., Portland*	186,390.50

*Bidder will accept only one project.

15130

OREGON COAST HIGHWAY IN COOS COUNTY

BEAVER CREEK BRIDGE

Tom Lilleho, Reedsport	$155,760.00
Walder & Kenworthy and Tower Sales & Erecting Co., Portland*	185,052 50
Birkemeier & Saremal, Portland	195,325.00
Del R. Beebe Construction Co., Eugene	199,775.00
Lockyear & White, Seattle, Wash.	206,480.00

*Bidder will accept only one project.

COOS RIVER SECONDARY HIGHWAY IN COOS COUNTY

PAINTING CATCHING SLOUGH BRIDGE

J. S. Morris Co., Berkeley, Calif.	$ 3,000.00
Rudolph Seda, Waldport	3,525.00
Antonsen Painting Co., Tacoma, Wash.	4,000.00

DOUGLAS COUNTY ROAD IN DOUGLAS COUNTY

REDECKING BROWN BRIDGE, DILLARD BRIDGE, OLALLA BRIDGE

Howard Halverson Co., Portland	$ 73,700.00
Harry I. Hamilton Co., Eugene	95,000.00
Birkemeier & Saremal, Portland	169,023.00

PACIFIC HIGHWAY IN DOUGLAS COUNTY

PAINTING WINSTON BRIDGE

Douglas Paint & Hardware Co., Roseburg	$ 3,370.00
Rudolph Seda, Waldport	6,590.00
J. S. Morris Co., Berkeley, Calif.	7,100.00
Antonsen Painting Co., Tacoma, Wash.	9,000.00

WILLAMETTE HIGHWAY IN KLAMATH AND LANE COUNTIES

SALT CREEK-ODELL BUTTE SECTION

	Using Asphalt	Using Tar
E. C. Hall Co., Portland	$541,600.00	--
Rogers Construction Co., Portland	553,500.00	--
J.N. & M.J. Conley, Portland	618,400.00	--
Edwin C. Gerber, Oregon City	638,550.00	--
Peter Kiewit Sons' Co., Longview, Wash.	656,656.00	--
Calkins & Swaggart, Oceanlake	663,450.00	--
A.H. Seaton & Sons and D.F. McKenzie, Corvallis	678,550.00	
McNutt Bros., Eugene	699,200.00	--

August 10, 1948

ARMITAGE STATE PARK IN LANE COUNTY

CARETAKER'S COTTAGE

Gale M. Roberts, Springfield	$ 10,595.46
Fry Schilling Co., Eugene	11,300.00

CITY OF FLORENCE, LANE COUNTY

FLORENCE BITUMINOUS MACADAM PROJECT

	Using Asphalt	Using Tar
Baker & Wilson Paving Contractors, Coos Bay	$ 3,935.20	--
Acme Construction Co., Eugene	4,405.00	--

CITY OF NEWPORT, LINCOLN COUNTY

NEWPORT BITUMINOUS MACADAM SURFACING PROJECT

	Using Asphalt	Using Tar
J.N. & M.J. Conley, Portland	$ 9,659.00	--

OREGON-WASHINGTON HIGHWAY IN UMATILLA COUNTY

MILTON-WASHINGTON STATE LINE SECTION

Morrison & Fisher, Walla Walla, Wash.	$ 10,000.00
George E. Corliss, Ontario	12,135.00

WARM SPRINGS HIGHWAY IN WASCO COUNTY

MILL CREEK BRIDGE

Don L. Cooney, Inc., Seattle, Wash.	$318,320.00
General Construction Co., Portland	327,960.00
Del R. Beebe Construction Co., Eugene	347,275.00
Birkemeier & Saremal, Portland	377,650.00

TUALATIN VALLEY HIGHWAY IN WASHINGTON COUNTY

WEST SLOPE-BEAVERTON SECTION

Warren Northwest, Inc., Portland	$262,362.00
K.F. Jacobsen Co., Portland	264,666.50

CITY OF BEAVERTON, WASHINGTON COUNTY

BEAVERTON OILING AND PAVING PROJECT

No bids received

August 10, 1948

The State Parks Superintendent, Mr. S. H. Boardman, reported a gift by Mr. C. Lee Wilson, Portland, of 2,000 camelia plants which he has placed in nursery beds at Cape Arago State Park, Coos County. The Commission accepted the gift by unanimous vote and instructed the Secretary to convey to Mr. Wilson the Commission's sincere appreciation of his generosity.

Mr. Russell Hubbard, Reedsport, appeared before the Commission concerning the permanent routing of the Oregon Coast Highway south of Reedsport. Mr. Hubbard gave as his understanding that Winchester Avenue, the present route of the highway, is now only 80 feet wide and that the Commission plans eventually to increase this to a 100-foot width. He suggested that it would be advisable to make a survey for the permanent location and acquire right of way now because others have tendered offers for the same property and he wants the state to have the first refusal. The Engineer advised that the improvement of this section is not in any approved construction program so it is not necessary to go to the expense of a location survey at this time; moreover, in his estimation, the crooked alignment which now obtains could be improved without an expensive change in the present alignment. The Commission denied the request.

Mr. Hubbard then inquired as to the possibility of the State Highway Department making a survey on the Schofield Road west of Elliot Forest Reserve. He exhibited a map showing the location of the road and pointed out that it leads to Silver Falls and Golden Falls State Park and perhaps some time will be designated by the Highway Commission as a state secondary highway. He was informed that the Commission does not have funds available to finance the improvement of additional roads and has adopted a policy against taking any more roads into the State Highway System. His request for the survey was denied.

Mr. Hubbard also brought up for discussion the matter of improving the Elkton-Sutherlin Secondary Highway. He suggested a route which he said would considerably shorten the distance between Elkton and Sutherlin and would provide a grade not exceeding five percent. The Commission thanked Mr. Hubbard for the information and advised him that if possible it would inspect the route on one of its trips this summer, and if the route looks feasible, then the Commission probably would authorize the Engineer to make a location survey.

The Commission approved and signed an agreement with the Southern Pacific Company covering slope encroachments on railroad right of way adjacent to the Delmar-Coaledo Section of the Oregon Coast Highway. The encroachments consist of five parcels in the vicinity of the railroad company's Overland Station on its Coos Bay Branch.

The Commission discussed a proposed agreement with the City of Portland providing for payment of the expense of paving, channelizing, and signalizing Columbia Street and Jefferson Street in connection with the one-way traffic routing system on the Sunset Highway. The estimated cost of this project is $80,000 and it is proposed that the state pay 50 percent of the

actual cost with a maximum expenditure of $40,000. The Commission unanimously approved a cooperative project on such basis and instructed the Engineer and the Chief Counsel to prepare an appropriate form of agreement with the city covering the matter.

The Commission discussed and approved a request from Mr. William A. Bowes, Portland City Commissioner, that the state pay the cost of resurfacing Broadway Street, Portland, outside of the streetcar area between Pine Street and Hoyt Street, Broadway being the route of US99W. The Engineer estimated the cost of the work at $5,000 and recommended approval of Commissioner Bowes' request. The Commission approved the recommendation unanimously on the condition that the state's expense shall not exceed $5,000.

The Engineer brought up for discussion a request from the Oregon Motor Transport Association that the North Santiam Highway between Salem and Niagara be redesignated a Group I Highway in order to facilitate the transportation of construction materials and supplies needed for highway and dam construction along this highway between Niagara and Detroit. The Engineer advised that the route mentioned consists of a section of the Silver Creek Falls Secondary Highway, a portion of the North Santiam Secondary Highway, and all of the Mehama-Mill City Secondary Highway, which are currently classified as Group II Highways where the length of hauling combinations is limited to 50 feet and the weight is limited to a maximum of 64,500 pounds. A test run of these highways, he said, conclusively proves that they will accommodate the weight and dimensions of loads specified for Group I Highways, and he accordingly recommended approval of the redesignation so as to permit the transportation of the longer and heavier loads. The Commission approved the recommendation unanimously with the understanding that the permits shall limit the speed of such combination of vehicles to 35 miles per hour on curves. The Chief Counsel was instructed to prepare an appropriate form of resolution covering the matter for adoption by the Commission at its next meeting.

In this connection the Commission ordered that hereafter all permits issued by the State Highway Department covering special movements of any kind whatsoever shall contain a clause limiting to 35 miles per hour the speed of the movements on curves.

The Commission had under discussion, for confirmation, the Forest Highway Program developed at a conference held on July 1, 1948, with representatives of the U.S. Forest Service and the Public Roads Administration. The Engineer recalled that two programs were developed at such meeting, one of which, amounting to $2,120,000, consisted of projects scheduled for contracting during the next 60 to 90 days, and the other, amounting to $4,455,000, a tentative program subject to reconsideration after more complete information and instructions have been received from Federal Officials in Washington, D.C. The first program, he said, will utilize about one-half of the funds remaining unobligated under the authorizations made in the Federal Aid Highway Act of 1944 and is a definitely agreed upon program, while the second program will utilize the remainder of the unobligated funds authorized under the 1944 Act and, in addition thereto, about 80% of the first-year allotment under the

Federal Aid Act of 1948. Contracting of work under the second program, he said, cannot begin until sometime after January 1, 1949.

The Engineer submitted a list of the projects contained in each of the programs, as follows, and asked the Commission to confirm them for the record:

FOREST HIGHWAY PROGRAMS

To Utilize Unobligated Balances of 1946-1948 Funds and Recently Allotted 1950 Funds

July 30, 1948

I. PROGRAM OF PROJECTS FOR IMMEDIATE CONTRACTING

This program was approved by the three agencies, i.e., Public Roads Administration, Forest Service and State Highway Commission for immediate action. Confirmation of this approval is contained in P.R.A. letter dated July 8, 1948.

County	Project No.	Section and Description	Estimated Cost
U. S. Route No. 28 (Ochoco):			
Crook	27 - A2, B2	Hamilton Creek-Summit, 8.86 miles Grading and Topping	$ 350,000
Wheeler	27 - B1	Summit-East Forest Boundary, 3.00 miles Grading and Topping	325,000
Warm Springs Highway (No Route No.):			
Wasco	42 - A	Wapinitia Junction-Forest Boundary, 7.01 miles Surfacing and Bit. Mac.	385,000
State Route No. 222 (N. Santiam):			
Marion	24 - B5	Breitenbush Bridge	145,000
U. S. Route No. 395 (John Day-Burns):			
Grant	35 - D3	Soda Mountain-Silvies, 5.0 miles Grad., Surf. and Oiling	250,000
Harney	35	Crow Flat-Poison Creek, 10.0 miles Grad., Surf. and Oiling	350,000
U. S. Route No. 30 (Columbia River):			
Multnomah	28 - D	Dodson Overcrossing $367,000 Excluding Amount Now Available 52,000	315,000
		Total	$2,120,000
		Available Funds	1,930,000
			$- 190,000

(Cont.)

II. TENTATIVE PROGRAM OF PROJECTS TO BE CONTRACTED DURING CALENDAR YEAR 1949

This program is tentative only and subject to agreement when full information is received from Washington, D.C., after which another meeting between the Public Roads Administration, Forest Service and State Highway Commission will be held.

County	Project No.	Section and Description	Estimated Cost
State Route No. 58 (Willamette):			
Lane	21 - E5, F5, G3, H4, I4, J5, K5, L2	Oakridge-Salt Creek Falls, 21 miles Surfacing and Bit. Macadam	$ 925,000
Timberline Highway (No Route No.):			
Clackamas	50	Mt. Hood Junction-Timberline Lodge, 6 miles Surfacing and Bit. Mac	235,000
State Route No. 227 (Tiller-Trail):			
Douglas	16 - A1, B1, D1, M	Tiller-Elk Creek, 8.5 miles Grad., Surfacing and Oiling (Total estimated cost $425,000 including $165,000 State Co-operation)	260,000
County Road (North Umpqua):			
Douglas	47 - A1, B1, D	Rock Creek-Susan Creek, 5.8 miles Grading, Surfacing and Oiling	700,000
Douglas	47 - C	Steamboat Bridge Section, Structure and Approaches	180,000
State Route No. 3 (Enterprise-Lewiston):			
Wallowa	38	Flora Junction-Forest Boundary, 3.0 ± miles Grad., Surf. and Oil.	150,000
State Route No. 34 (Alsea):			
Lincoln	6 - A2, B2, F2, E9	Alsea River-Smallwood Creek, 6 miles Grad., Surf., 10 miles Oiling	450,000
U. S. Route No. 101 (Oregon Coast):			
Curry	10 - D1, E	Port Orford-Rocky Point, 2.32 miles Grad., Surf. and Bit. Macadam	475,000

(Cont.)

County	Project No.	Section and Description	Estimated Cost
U. S. Route No. 28 (Ochoco):			
Crook	27 - A3, B3	Marks Creek-East Forest Boundary, 19 miles Surf. and Bit. Mac.	$ 525,000
Grant	36 - A2	Dads Creek-Dixie Summit, 5.2 miles Surfacing and Bit. Macadam	155,000
U. S. Route No. 395 (Pendleton-John Day):			
Grant	34 - B4, C	Beech Creek Section, 6 miles Grad., Surfacing and Oiling	225,000
State Route No. 66 (Klamath Falls-Lakeview):			
Lake	30 - A3, E1	Quartz Mountain-Smalley Ranch, 5.24 miles Grad., Surf. and Oiling	200,000
		Total	$4,480,000
		Balance To Be Programmed	1,120,000
		Total Available Funds	$5,600,000

Following discussion the Commission unanimously approved the first of the above programs and tentatively approved the second program.

The Commission discussed a request from the Grant County Court that the State Highway Department advance to the county the amount of its share of state highway revenues for the current year, which will permit the county to proceed with its county road program without going on a warrant basis. The Court agrees to assign to the State Highway Commission its share of highway revenues when they are due and payable on September 30, 1948. Action on this matter was deferred by the Commission for future consideration. The Chief Counsel was instructed to inform County Judge J. H. Allen of the action taken.

The Commission discussed a proposed agreement with a Mr. John Molthan, Ironside, Oregon, providing for the elimination of a cattle pass at Mile Post 233.02 on the John Day Highway near Ironside. The Engineer advised that the existing structure is in a delapidated condition, necessitating complete replacement which is estimated to cost about $2,000. Mr. Molthan, he said, is willing to release the state from its obligation to maintain the cattle pass if paid the sum of $180, which is the estimated cost of drilling a well to serve his purposes. He recommended approval of this settlement. The Commission approved the recommendation and thereupon signed the agreement.

The Engineer requested an additional budget authorization of $7,000 for replacement of worn-out office equipment and to equip additional personnel

in the Engineering and Accounting Departments. He advised that, if the authorization is approved, the fund will be transferred from the "Reserve for Additional Purchases of Equipment" (not on rental), which now has a balance of $37,450. The Commission approved the request unanimously.

The Commission approved and signed a quit claim deed conveying unto Alfred Jensen and Frances Jensen, husband and wife, and Caroline Jensen, a widow, certain real property on the Fisher Road-Oak Hill Section of the Richardson-Eugene Secondary Highway in Lane County. The Chief Counsel explained that this property was to have been given in exchange for property adjoining a quarry site owned by the Highway Department, but before the deal was consummated Mr. Jensen died and his son preferred not to carry out the plan, so it now is necessary to deed back to the Jensens the property they deeded to the state.

The Engineer requested authority to negotiate an agreement with contractor Porter W. Yett, Portland, for the Beaverton Oiling and Paving project on Lombard Avenue and East Street in the City of Beaverton. He recalled that this project was advertised for bids to be received at this meeting but none were submitted although subsequently Mr. Yett offered orally to do the work for the sum of $5,570, which is $500 less than the amount of the Engineer's estimate for the job. The Commission unanimously authorized the Engineer to negotiate a contract with Mr. Yett on such basis.

A delegation from Ashland, consisting of William M. Briggs, City Attorney; Thornton S. Wiley, Mayor, and Ralph Koozer, Manager, Bagley Canning Company, was present and asked the Commission for the following improvements:

1. Widening of the Pacific Highway through the City.
2. Designation and construction of a truck route.

Mr. Briggs headed the group. He urged the widening work for early construction, giving as his understanding, from information given him by the engineers, that it can be done at minimum expense. As the solution of their truck problem he suggested a route following the Southern Pacific Railroad in the northern part of the city. Such project, he said, is secondary in importance to the widening project, so they are not stressing it now but want the Commission to bear it in mind for future consideration. Mayor Wiley urged the widening project from the standpoint that it would help solve the truck problem even if the truck route is not provided. He offered city aid in obtaining needed right of way along North Main Street. He also advised that property owners probably will object to the entire elimination of the center park area along South Main Street but will not object to narrowing it somewhat. Mr. Koozer also spoke in favor of the project.

Chairman Banfield advised that this matter is entirely new to the Commission, which is not in position today to take any action regarding it or to indicate when action will be taken; however, the Commission will consider it in balancing its construction program and will look it over during its inspection trip through Southern Oregon later in the year.

Mr. Henry L. Byers, Medford, was present regarding his application, heretofore filed with the State Highway Engineer, for the right and privilege of ingressing to and egressing from the Pacific Highway to his property fronting thereon in the vicinity of Judkins Point, Eugene, on which property he proposes to operate a "drive-in" restaurant. He requested entrances 25 feet wide at two locations, one along the frontage of Lot 6, Block 35, Fairmount Addition, Amended, and the other along the frontage of Lot 20, Block 35, of said addition. In support of his request Mr. Byers recited the history of his purchase of this property, dating back to 1945, and particularly referred to the encouragement that had been given him by a highway department engineer and the Eugene City Council when it changed the zone of the area from residential to business so he could use it for the purpose intended. He declared that he has already spent $19,000 on the property, but its development is being held up because of the refusal of the State Highway Commission to allow him the two entrances that he needs. He offered to pay all costs involved in providing the two entrances and agreed not to request permission, either now or in the future, to cut the median strip along the center of the highway separating northbound and southbound traffic.

The Chief Counsel advised that considerable controversy has developed over the City Council's action changing the zone classification, and as a result thereof, interested citizens successfully circulated a petition which will place on the ballot at the next general election in November the question as to whether or not the property may be used for business purposes. He further advised that the Highway Commission previously discussed the matter and decided at that time not to take action on it until the results of the election are known. He pointed out that the Commission, under certain conditions, and if it so desires, has authority to deny the cutting of the curbs along the highway, which would be necessary in this instance to permit the entrances, regardless of the results of the balloting, and if the use of the openings jeopardizes the public and depreciates the capacity of the highway.

In the discussion that followed, Chairman Banfield expressed his feeling that Mr. Byers' problem is between him and the city. The State Highway Commission, he said, is entering into the matter only because it is trying to protect the traveling public on this major highway improvement, and the Commission is not going to let anything interfere with that purpose if it can be helped. He concluded the discussion by stating that the Commission has already taken action on the matter and is now awaiting the decision of the people of Eugene at the November election.

Mr. Jay F. Oldham, Eugene, heavy hauling contractor, was present regarding violation of a permit that was issued to him on June 14, 1948, authorizing transportation of a three-quarter yard link belt power shovel over the Corvallis-Newport Highway from Blodgett to Corvallis. It appears that the permit as prepared authorized a total gross weight of not to exceed 80,000 pounds, whereas, when his load was weighed by state weighmasters on the following day, the actual combined gross weight was found to be 94,700 pounds. The permit limited the movement to the Corvallis-Newport Highway

from Blodgett to Corvallis, but, according to the weighmaster's report, it actually started on the Eddyville-Blodget Highway, which at the time was posted for a maximum permissible weight of 50,000 pounds; furthermore, the load was one foot eight inches wider and two feet two inches higher than the dimensions specified in the permit. Mr. Oldham was requested to explain his disregard for the provisions of the permit.

Mr. Oldham advised that the weight violation was unintentional, that he previously ascertained from the factory that the shovel weighed 43,000 pounds, and he determined, from the weight of the equipment, that he needed a permit for an 80,000-pounds gross load. He further stated that it was carelessness on the part of his driver that the shovel was moved over the Eddyville-Blodgett Highway. He also said that he has been in the hauling business for 24 years and that he is very familiar with the Highway Commission's requirements and takes every precaution to do the right thing, but it is not possible for him to accompany every movement, so he must depend on his drivers to comply with the terms of the permits that are issued to him.

He was informed by Chairman Banfield that one of the conditions under which the Highway Commission grants permits is that the one to whom the permit is issued shall be responsible for strict compliance with the permit provisions; if those provisions are not respected, he said, future permits will be denied that operator. Chairman Banfield concluded the discussion by stating that the Commission would take his case under advisement and notify him later of the action taken.

Following Mr. Oldham's departure, discussion of this matter was resumed with the result that the Commission unanimously ordered that no further permits authorizing special movements should be issued to Mr. Oldham for a period of 30 days, starting immediately.

Mr. Ronald Lee Smith, log hauler, Siletz, Oregon, was present regarding violations committed by him in the truck hauling of logs over state highways in the vicinity of Siletz, such violations consisting of "laying out" to avoid weighing by state weighmasters, refusal to allow his loads to be weighed when requested, hauling overweight loads, and operating without a permit from the Public Utilities Commissioner. Mr. Smith was requested to explain why he committed these offenses and to give reasons why he should not be denied the privilege of continuing his operations over state highways.

With respect to a "laying out" violation committed on July 16, 1948, and subsequent refusal to allow his load to be weighed, Mr. Smith gave lateness of the hour and no weighmaster on duty as his reason for by-passing the scales. He admitted, however, that in this particular instance the weighmaster followed him to the dump where he could not turn his load around and go back to be weighed, so he unloaded it. Weighmaster Leo Weber, who was on duty at the time and was present at this meeting, refuted the statements of Mr. Smith in this regard and gave actual facts of the occurrence.

Concerning his operation without proper P.U.C. plates, Mr. Smith declared that he had applied for a P.U.C. permit and plates, but for some reason or other had not received them. The facts concerning this feature were explained by Chief Weighmaster Loren L. Spaulding, who was present. He stated that inquiry at the P.U.C. office failed to disclose any record that Mr. Smith had applied for a permit. He also said that Mr. Smith had been operating in this service without any permit since April, 1948.

Mr. W. W. Sitffler, Assistant State Highway Engineer, recited the record of Mr. Smith's violations, from which it appeared to the Commission that Mr. Smith is a consistent and deliberate violator of the requirements. Following further discussion, Mr. Smith was informed that the Commission would take his case under advisement and would let him know later of its decision.

Following his departure, discussion of the matter was resumed, and at that time the Commission decided unanimously not to allow Mr. Smith to truck haul logs over any state highway for a period of two weeks from this date, August 10, 1948, and not after that period of time unless he has met the legal requirements with respect to obtaining permits. Such information was conveyed to Mr. Smith, who re-appeared before the Commission later. He was also informed that he could resume his operations on probation on and after August 25, 1948, if he had then met the requirements, but he was warned that another violation of the rules on his part would result in the permanent cancellation of any log-hauling permit that may have been is issued to him. The Secretary was instructed to convey to the Public Utilities Commissioner a recommendation in conformity with this decision.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 1:30 p.m. with the same persons present and participating.

The Commission discussed briefly matters pertaining to the meeting of the Western Association of State Highway Officials which was held in Portland in July, and commended the group in charge of the meeting for its success. The Commission ordered preparation of appropriate letters to be sent to those participating in and carrying out the arrangements.

The Commission also discussed briefly two things of a distrubing nature that arose at this meeting, both of which concern the giving of information to the public. The Commission ordered that, hereafter, when discussing matters that have not been presented to the Commission or do not have the Commission's approval, the person giving the information shall make it clear to the other party that such information is not definite but first must have the Commission's approval.

Matters pertaining to the prequalification of bidders on highway construction were considered by the Commission. The Chief Counsel advised that under the prequalification law it is unlawful for any public officer or public body charged with the receiving of bids for public work to issue proposal forms for public improvements that are estimated to cost $10,000

or more to any prospective bidder who has not previously submitted to such officer or body a statement relating to financial ability, experience, and equipment, and has been adjudged qualified to perform the work which the improvement involves. Strict observance of the law, he said, would make it illegal for the Commission to accept a proposal for work that is estimated to cost less than $10,000 if the amount of the proposal is in excess of such amount, unless the bidder is prequalified; furthermore, it would be illegal for the Commission to accept the proposal of a prequalified bidder if the amount of his bid exceeds the amount for which he has been declared qualified. In view of this information the Commission ordered that all contractors be notified of the amount of their prequalification and cautioned to submit a new or supplemental prequalification statement if they expect to submit a bid totaling more than the amount for which they have been declared qualified; otherwise, the Commission may refuse to accept the bid. In the case of a project that is estimated to cost less than $10,000 the prospective bidder is to be informed that his proposal may not be accepted by the Commission if it is for $10,000 or more, unless he submits, prior to the opening of bids, a statement of his financial ability, experience, etc., to show that he is qualified to perform the work.

In this connection the Commission discussed the bids received at this letting for construction of a caretaker's cottage in Armitage State Park near Eugene, there being two submitted, one at $10,595.46 and the other at $11,300. The Engineer advised that the low bid is 15% above the Engineer's estimate for the job and that the bidder, Gale M. Roberts, is not a prequalified bidder, having been given a bidding proposal because the estimated cost of the job was less than $10,000. The question arose whether or not the Engineer had estimated the cost of the job at too low a figure; also, if there is justification for spending so much money for a cottage. As the result of discussion the Commission decided unanimously to reject the bids and it was so ordered. The Parks Superintendent was instructed to investigate the possibility of prefabricated houses and quonset huts that might serve the purpose and very likely can be purchased for less money. The Engineer was instructed to furnish Chairman Banfield a set of plans and specifications for the Armitage cottage.

Messrs. W. H. Lynch, Division Engineer; T. M. Davis, District Engineer; R. N Kellog, Senior Highway Engineer; and F. E. Andrews, Principal Highway Engineer, all representing the Public Roads Administration were present and discussed with the Commission proposed revisions in previously approved Forest Highway programs necessitated by increased construction costs and current construction requirements. The Commission deferred action on this matter pending study.

An offer from Mr. T. W. Young, Portland, to pay $175 for a small supply of myrtlewood timber stored at Humbug Mountain State Park had the attention of the Commission. In the discussion it was pointed out that the State Parks Superintendent had removed most of the good material from the supply which was originally advertised for sale and that the amount now offered by Mr. Young is very close to the actual value of the material as appraised by the State Parks Department and is $20 higher than the offer of Pacific Myrtlewood Products, previously reported at this meeting. In view of these findings the Commission unanimously accepted Mr. Young's offer.

The Chief Counsel brought up for discussion an inquiry from Mr. Thomas I. Chapman, Eugene, concerning a small tract of state-owned land on Broadway Street, Eugene, near its intersection with Alder Street, being property acquired from Dr. Milton M. Bull. He explained that Mr. Chapman owns property adjoining this tract and wants to purchase it to complete his holdings if the Commission intends to dispose of it after the highway improvement now underway is completed. He also wants to know whether or not the adjoining property owners will be given first chance to acquire it. The Chief Counsel said that the tract is excess property which the Commission undoubtedly will sell later on, and that Mr. Chapman has expressed a willingness to purchase it for the amount of the high bid that may be submitted if the Commission advertises it for sale.

The Commission instructed the Chief Counsel to inform Mr. Chapman that it is the policy of the Commission, when disposing of real property, to make it available to the persons who will be best served by it, and to refrain from knowingly conveying property to those who will misuse it or hinder someone else, and that that policy will be followed in this instance if the property is offered for sale.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and at 3:00 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the decision in each instance being by the unanimous vote of the Commission:

"Corvallis (South Entrance) Section of the Pacific Highway West, Benton County; grade and pave 0.15 mile highway roadbed and construct reinforced concrete viaduct. The low bid submitted for this work was that of Lindstrom Bros., Portland, at $152,850.50. Walder & Kenworthy and Tower Sales & Erecting Co., Portland, submitted the only other bid at $186,390.50. They qualified their bid by stating that they would accept only one project at this letting. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Construction of a bridge over Beaver Creek on the Oregon Coast Highway, Coos County. The low bid for this work was submitted by Tom Lillebo, Reedsport, at $155,760. The second low bid was that of Walder & Kenworthy and Tower Sales and Erecting Co., Portland, at $185,052.50. They stated that they would accept the award of only one contract at this letting. There were three higher bidders. The Commission has awarded the contract to the low bidder, Tom Lillebo, at his bid price.

"Cleaning and painting Catching Slough Bridge on the Coos River Secondary Highway, Coos County. J. S. Morris Co., Berkeley, California, submitted the low bid for this work at $3,000. Rudolph Seda, Waldport, was the next low bidder at $3,525. There was one higher bidder. The contract has been awarded to the low bidder, J. S Morris Co.

"Redeck three bridges on county roads, in Douglas County, particularly the Brown Bridge over the North Umpqua River on County Road No. 0-6, the Dillard Bridge over the Umpqua River on County Road No. 675, and the Olalla Bridge over Olalla Creek on County Road No. 734. Three bids were received by the Commission for this work, the low one being that of Howard Halverson Co., Portland, at $73,700. The second low bid was that of Harry I. Hamilton, Eugene, at $95,000. The third low bid was that submitted by Birkemeier & Saremal, Portland, at $169,023. This is a county project and the Commission has referred the bids to the Douglas County Court for further handling.

"Cleaning and painting the Winston Bridge over the Umpqua River on the Pacific Highway, in Douglas County. Douglas Paint and Hardware Company, Roseburg, submitted the low bid for this work at $3,370. The second low bid was submitted by Rudolph Seda, Waldport, at $6,590. There were two higher bidders. The Commission has awarded the contract to the low bidder, Douglas Paint and Hardware Company, at its bid price.

"Construction and bituminous macadam surfacing on the Salt Creek-Odell Butte Section of the Willamette Highway, in Klamath and Lane Counties. E. C. Hall Co., Portland, submitted the low bid for this work at $541,600, based on the use of asphalt. Rogers Construction Co., Portland, submitted the next low bid at $553,500, based on the use of asphalt. There were six higher bidders. None of the bidders submitted a bid based on the use of tar. The Commission has awarded the contract to the low bidder, E C. Hall Co., at its bid price.

"Construction of a caretaker's cottage in Armitage State Park near Eugene, Lane County. The Commission received two bids for this work, the low one being that of Gale M. Roberts, Springfield, at $10,595.46. The other was submitted by the Fry Schilling Co., Eugene, in the amount of $11,300. The Commission has rejected both bids as being too high.

"Florence Surfacing and Bituminous Macadam Project on Lincoln and Hamlin Streets in the City of Florence, Lane County. Baker & Wilson Paving Contractors, Coos Bay, submitted the low bid for this work in the amount of $3,935.20, based on the use of asphalt. They submitted no bid based on the use of tar. Acme Construction Co., Eugene, submitted the only other bid at $4,405, based on the use of asphalt. They also submitted no bid based on the use of tar. The Commission has accepted the offer of Baker & Wilson Paving Contractors and has awarded the contract to this company at its bid price.

"Newport Bituminous Macadam Surfacing Project on Canyon Road in the City of Newport, Lincoln County. J. N. and M. J. Conley, Portland, submitted the only bid for this work at $9,659, based on the use of asphalt. They submitted no bid based on the use of tar. The Commission has awarded the contract to this company at its bid price.

"Topsoiling and seeding on the Milton-Washington State Line Section of the Oregon-Washington Highway, Umatilla County. The low bid submitted for this work was that of Morrison & Fisher, Walla Walla, Washington, at $10,000. The only other bid was that submitted by George E. Carliss, Ontario, at $12,135. The Commission has rejected both bids as being too high.

"Construction of a steel bridge over Mill Creek on the Warm Springs Highway, in Wasco County. The low bidder for this work was Don L. Cooney, Inc., Seattle, Washington, at $318,320. General Construction Company, of Portland, submitted the next low bid at $327,960. There were two higher bidders. The Commission has awarded the contract to the low bidder, Don L. Cooney, Inc., at its bid price.

"Grading and paving the West Slope-Beaverton Section of the Tualatin Valley Highway, Washington County. Warren Northwest, Inc., Portland, submitted the low bid for this work at $262,362. The only other bid was that submitted by K F. Jacobsen Co., Portland, at $264,666.50. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Beaverton Oiling and Paving Project on Lombard Avenue and East Street in the City of Beaverton, Washington County. The Commission received no bids for this work."

The Commission considered, approved, and signed agreements, etc., as follows:

Agreement with Taft-Nelscott-DeLake Water District covering re-establishing the District's water mains along the Oregon Coast Highway at the bridge crossing "D" River south of Oceanlake, Lincoln County.

Agreement with the City of Burns, Harney County, covering improvement of streets in Burns to be financed with a portion of the Special $250,000 State Tax Street Fund.

Agreement with Glen P. White covering elimination of a cattle pass on the Heppner Primary Highway at Mile Post 1.9, in Gilliam County.

Agreement with the Southern Pacific Company covering installation of signals at the railroad crossing of the Junction City-Eugene Secondary Highway, in Junction City, Lane County.

Agreement with John Molthan covering elimination of a cattle pass at Mile Post 233.02 on the John Day Highway near Ironside, Malheur County.

Agreement with Coos County covering relocation of a portion of Coaledo-Chrome Plant Section of the Oregon Coast Highway, Coos County.

Lease agreement with State Forester covering lease of property in Wallowa Lake and Casey State Parks on which to construct State Forestry Wardens' residences.

Lease agreement with Bryson Clutter covering operation of his portable trailer house during his employment by the State Highway Department.

Permit agreement with Bonneville Power Administration covering power line crossings of the Salem-Dallas Highway and of the Monmouth-Independence Highway near Brunks Corner, Polk County.

Agreement with Southern Pacific Company covering conveyance to the Company of a tract of land on the Oregon City-New Era Section of the Pacific Highway East, Clackamas County.

"Option to Purchase" with U.S. War Department covering sale to the War Department of a tract of land adjacent to the Willamette Highway, Lane County.

"Land Purchase Contract" with U.S. Reclamation Service covering sale to Reclamation Service of tract of land in Klamath County for enlargement of Lost River diversion channel.

Release to U.S. Army Engineers of access restriction to Willamette Highway near Meridian Damsite, Lane County.

Bargain and sale deed conveying unto Eugene Fruit Growers Assoc. small parcel of land adjacent to Eugene-Goshen County Road, in Eugene, Lane County.

Bargain and sale deed conveying unto Rogue River Irrigation District 0.17 acre of land adjacent to Crater Lake Highway, Jackson County.

Bargain and sale deed conveying unto Walter Freeman property in the City of Nyssa, Malheur County.

Bargain and sale deed conveying to S.P. & S. R.R. Co. small tract of land adjacent to the Lower Columbia River Highway near Lintonn, Multnomah County.

Bargain and sale deed conveying unto F.C. Marshall, et ux., 1.84 acre of land in Columbia County as consideration for ten acres of land acquired from the Marshalls.

Quitclaim deed conveying unto Alfred Jensen, et al., tract of land adjacent to Richardson-Eugene Secondary Highway, near Eugene, Lane County.

Lease from Rose Phillips covering road building materials to be secured from parcel of land on Pringle Corner-McMinnville Section of the Salmon River Highway, in Yamhill County.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:15 p.m.

Chairman

EXHIBITS "A" THROUGH "M"

Minutes of August 9 and 10, 1948

EXHIBIT "A"

Minutes of August 9 and 10, 1948

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

EXHIBIT "B-1"

Minutes of August 9 and 10, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Oregon Coast Highway (State Highway No. 9) is a highway under the jurisdiction and control of the State, and said highway is, in additio to being a part of the state highway system, a part of the federal highway syste and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling publi the Highway Commission relocated the section of the Oregon Coast Highway extendi from Tillamook to Pleasant Valley, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O. C. L. A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

(Cont.)

AUG 9 1948

15161

EXHIBIT "B-1" (Cont.)

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Oregon Coast Highway, as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of the Oregon Coast Highway known and designated as the Tillamook-Pleasant Valley Section.

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, all of which are made part of this resolution.(*)

3. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

4. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described on the attached sheets required for right of way purposes, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the respective parcels of real property described on the attached sheets and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission.(*)

5. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of

(Cont.)

AUG 9 1948

EXHIBIT "B-1" (Cont.)

said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

6. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land required for right of way purposes all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access to the parcels of real property required for right of way purposes except at such points or places as may be designated by the State Highway Commission.

7. That in the trial or prosecution of any action or actions institut for the purpose of acquiring by condemnation or otherwise the said described real properties, or any of them, or any interest therein, the said J. M Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

8. The real properties sought to be acquired are described on the attached sheets, consisting of 7 pages, on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties, said parcels of real property being otherwise identified as Parcels Nos. 1 to 14, inclusive.(*)

9. This resolution shall be entered in full in the minutes and records of this Commission as of the ninth day of August, 1948.

FOOTNOTE:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 114, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, said Commission is likewise authorized to acquire, in additio to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Oregon Coast Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the property described on the attached sheet is needed and required for use in connection with the construction and maintenance of the section of the Oregon Coast Highway known and designated as the Delmar-China Camp Creek Section, said property being needed and required for right of way purposes and being owned by L. R. Siglin (Paul Trolard and Myrtle B. Trolard, contract purchasers). (*)

2. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

3. The Commission does hereby further find and declare that, in addition to the acquisition of the real property described on the attached sheet it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting property to the parcel of real property described on the attached sheet and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission. (*)

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the

(Cont.)

compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcel of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

6. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

7. This resolution shall be entered in full in the minutes and records of this Commission as of the ninth day of August, 1948.

FOOTNOTE:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 115, under the heading, "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

AUG 9 1948

15169

EXHIBIT "B-3"

Minutes of August 9 and 10, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the following described parcel of real property, which property is owned by Matilda McEnroe, is necessary and acquisition of the same by the State is required for right of way purposes in connection with the Baker-Miles Bridge Section of the Medical Springs Highway, which property is described as follows, to wit:

A parcel of land lying in the southwest quarter ($SW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) and Lot 2 ($NW\frac{1}{4}$ of the $NE\frac{1}{4}$) of Section 4, Township 9 South, Range 40 East, W. M., Baker County, Oregon, the said parcel being all that portion of the foregoing described property included in a strip of land of variable width lying on the easterly side of the center line of the Medical Springs Highway as said highway has been relocated over and across or adjacent to the said property; the

(Cont.)

AUG 9 1948

EXHIBIT "B-3" (Cont.)

the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 34+57.3 to Station 61+17, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 34+57.3, at which station said center line intersects the south line of the northeast quarter of Section 4; said point being 2641 feet north and 795 feet east of the south quarter corner of Section 4, Township 9 South, Range 40 East, W. M.; thence North 4° 15' East a distance of 2464.18 feet; thence on a spiral curve left (the long chord of which bears North 4° 05' 30" East 194.44 feet) a distance of 194.44 feet to station 61+17, opposite and 50 feet distant from which station the easterly line of said strip of land intersects the north line of said Section 4.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to	Station	Width on Easterly Side of Center Line
34+57.3	to	55+00	45 feet
55+00	to	61+17	50 feet

The parcel of land to which this description applies contains 2.82 acres, of which 1.60 acres lie within the existing right of way, title to which hereby is alleged to be in the public, and 1.22 acres lie outside of the existing right of way.

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner, and/or with the tenants or persons in possession, if there by any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby

EXHIBIT "B-3" (Cont.)

is requested and authorized to commence and prosecute to final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

5. That this resolution be entered in full in the minutes and records of this Commission as of the ninth day of August, 1948.

AUG 9 1948

15172

EXHIBIT "C"

Minutes of August 9 and 10, 1948

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Granite	$ 172.48
Hammond	846.37
Long Creek	477.34
Scotts Mills	455.27
Troutdale	423.18

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Granite - Main Street, Center Street
Hammond - Boone Avenue, Pacific Avenue, W. 1st Street, Harriette Street, Park Street, Ford Street, Augustus Street
Long Creek - 2nd Street
Scotts Mills - Grand View Avenue
Troutdale - Killin Street, Benton Street, Garfield Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 9th day of August, 1948.

AUG 9 1948

EXHIBIT "D"

Minutes of August 9 and 10, 1948

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums or amount set opposite the names of the respective cities or towns:

AUG 9 1948

15176

EXHIBIT "E"

Minutes of August 9 and 10, 1948

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

Crescent-Chemult Section of The Dalles-California Highway
in Klamath County.

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above-mentioned section of state highway, together with the map, which for identification purposes bears the map file No. 6B-28-11, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the ninth day of August, 1948.

AUG 9 1948

EXHIBIT "F"

Minutes of August 9 and 10, 1948

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2814, with Angelo A. Doveri, for the Chiloquin Overcrossing and Spring Creek Bridge on The Dalles-California Highway in Klamath County, completed December 20, 1947.

Contract No. 2874, with Kuckenberg Construction Co., for widening west end of Ross Island Bridge on Front Avenue in Portland, completed June 24, 1948.

Contract No. 2911, with Lindstrom Bros., covering the Fort Hill Bridge on the Salmon River Highway in Polk County, completed July 20, 1948.

Contract No. 2918, with Birkemeier & Saremal, for the Merle Grade Separation Superstructure on the Sunset Highway in Washington County, completed June 19, 1948.

Contract No. 2942, with Lindstrom Bros., covering the Rock Creek Bridge on Clackamas Secondary Highway in Clackamas County, completed July 9, 1948.

Contract No. 2820, with Parker-Schram, for grading on the Gardiner Ranch-Berger Ranch Section of the Sunset Highway in Washington County, completed September 25, 1947.

Contract No. 2898, with Babler Bros., for recoiling on the Millican-Brothers Section of the Central Oregon Highway in Deschutes County, completed June 26, 1948.

Contract No. 2903, with E. C. Hall Co., for grading and surfacing on the N. Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway in Harney County, completed July 6, 1948.

Contract No. 2907, with Pendleton Sand & Gravel Co., for recoiling on the Sandy-Wapinitia Junction-Clear Creek Section of the Mt. Hood and Wapinitia Highways in Clackamas and Wasco Counties, completed July 31, 1948.

Contract No. 2913, with Lloyd Calkins, for regrading and surfacing on the Miner Creek-Agate Beach Section of the Oregon Coast Highway in Lincoln County, completed June 28, 1948.

EXHIBIT "G"

Minutes of August 9 and 10, 1948

R E S O L U T I O N

WHEREAS, in connection with the relocation of the Pleasant Hill-Lost Creek Section of the Willamette Highway in Lane County, Oregon, the State of Oregon, by and through its State Highway Commission, received from E. P. Zoulek and Evelyn M. Zoulek, husband and wife, a certain warranty deed dated June 23, 1947, recorded August 1, 1947, in Book 352, Deed Records of Lane County, Oregon, at Page 651, reference to which is hereby made, and

WHEREAS, it is the plan and purpose of the United States of America to construct for the benefit of Lane County, a political subdivision of the State of Oregon, a county road upon a portion of the property, upon which said deed placed restrictions as to access to the relocated Willamette Highway, said county road to intersect with the relocated Willamette Highway at or near State Highway Engineer's Center Line Station 496+14.1, and

WHEREAS, the United States of America, acting by and through its War Department and the Corps of Engineers, has requested that the State of Oregon release said access restrictions in order to permit the establishment of said county road,

NOW, THEREFORE, the State of Oregon, by and through its State Highway Commission, for and in consideration of the benefits to be received by the State of Oregon, upon the construction of the county road, as above described, does hereby release and relinquish unto the United States of America for the use and benefit of Lane County, a political subdivision of the State of Oregon, those certain restrictions, burdens and covenants contained in that certain deed executed by E.P. Zoulek and Evelyn M. Zoulek, husband and wife, under date of June 23, 1947, recorded August 1, 1947, in Book 352, Deed Records of Lane County, Oregon, at Page 651, in so far as they apply to the following described property:

A parcel of land lying in Section 6, Township 19 South, Range 1 West of the Willamette Meridian in Lane County, Oregon, the said parcel of land being more particularly described as follows:

Beginning at a point on the west line of the property of E. P. Zoulek, said point being 70 feet northeasterly, when measured at right angles, from the center line of the survey for the relocation of the Willamette Highway at highway Engineer's center line station 496+14.1, said point also being 134.95 feet north and 751.50 feet east of the northwest corner of the H. C. Morgan Donation Land Claim No. 66 in Township 19 South, Range 2 West of the Willamette Meridian; thence north 0° 57' 45" west 499.80 feet on the west line of the E. P. Zoulek property to the northwest corner thereof; thence south 67° east on the northeasterly line of said property, a distance of 65.66 feet to a point that is 60 feet easterly, when measured at right angles, from the west line of the E. P. Zoulek property; thence

(Cont.)

south 0° 57' 45" east, parallel with and 60 feet easterly from the said west property line, a distance of 505.03 feet to a point that is 70 feet northeasterly, when measured at right angles, from the center line of the Willamette Highway relocation survey; thence north 62° 57' 45" west, parallel with and 70 feet northeasterly from the center line of the said survey, a distance of 67.96 feet to the point of beginning, containing 0.69 of an acre.

and not otherwise.

The within release and relinquishment shall be operative only so long as the United States of America or Lane County shall use the premises, as above discribed, for county road purposes.

IN WITNESS WHEREOF, the State of Oregon, by and through its State Highway Commission, has hereunto set its hand and affixed the seal of said Commission this the tenth day of August, 1948.

Minutes of August 9 and 10, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Pacific Highway known as the Illahee-Steiwer Hill Section in Marion County, the northerly terminus of which is at highway engineer's station 383+14 of the reconstructed line and the southerly terminus of which is at highway engineer's station 498+19.03 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes, but are needed and must be retained for public use; and

WHEREAS, Marion County and the State Highway Commission have entered into an agreement dated the 3rd day of February, 1948, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Pacific Highway has been completed and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between highway engineer's station 448+60 and highway engineer's station 497+20 of the reconstructed highway, and which area is identified and shown in red on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Marion County, and said road shall hereafter be maintained by the County as a county road as provided for in said State-County agreement.(*)

2. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new

(Cont.)

15182

EXHIBIT "H" (Cont.)

right of way, and which portion lies between highway engineer's station 393+50 and highway engineer's station 407+70 of the reconstructed highway, and which area is identified and shown colored in brown on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Marion County, or may be vacated by the County Court when no longer needed as a county road.(*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.(*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary is hereby directed to mail to the County Court of Marion County a duly certified copy thereof, and shall file with the Clerk of Marion County a like certified copy and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes, and by which the County shall accept the said abandoned section of the said old right of way shown colored in brown on said map, and shall assume jurisdiction thereover or vacate the same as the County Court may determine.(*)

Minutes of August 9 and 10, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of The Dalles-California Highway known as the Mazama Junction-Lobert Section in Klamath County, the northerly terminus of which is at Highway Engineer's Station 1223+00 of the reconstructed line and the southerl terminus of which is at Highway Engineer's Station 3280+65.5 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminate sections or areas are no longer needed for highway purposes, but are needed and must be retained for public use; and

WHEREAS, Klamath County and the State Highway Commission have entered into an agreement dated the 8th day of February, 1946, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of The Dalles-California Highway has been completed and highway traffic was routed over said section on August 1, 1948; and

WHEREAS, pursuant to the provisions of subsection 36 of Section 100-115, O. C. L. A., the Highway Commission and the County Court of Klamath County have entered into a mutual agreement providing for the selection, designation, and maintenance of the section of road or highway hereinafter defined and described and generally identified as Unit "A" as a secondary Highway; and

WHEREAS, it is recognized by the State and the County that the section of highway defined and identified herein as Unit "A" possesses the characteristics as to service and use which qualify said section of highway, within the meaning of said statute, for adoption and designation as a secondary state highway; and.

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section of the relocated and reconstructed highway between Highway Engineer's Station 1223+00 and Highway Engineer's Station

3280+65.5 and is shown colored in green on the accompanying map marked "Exhibit A", be and hereby is designated as a part or portion of The Dalles-California Highway, State Highway No. 4.(*)

2. That the following section of the old route of The Dalles-California Highway, otherwise designated as State Highway No. 4, to-wit:

Unit "A"

Beginning at Highway Engineer's Station 1380 of the new route of The Dalles-California Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 24, Township 29 South, Range 7 East, W. M., and running thence southerly and westerly along the old highway to the intersection of the old highway and the Crater Lake State Highway No. 22 at Fort Klamath Junction in Section 23, Township 33 South, Range $7\frac{1}{2}$ East, W. M.

be designated as and made a secondary state highway to be known as the Sun Mountain Secondary Highway No. 428 and shown colored in yellow on the accompanying map marked "Exhibit A", and shall be maintained as such by the State in the same manner that other secondary state highways are maintained.(*)

3. That the following section of the old route of The Dalles-California Highway, otherwise designated as State Highway No. 4, to-wit:

Unit "B"

Beginning at the intersection of the old highway and the Crater Lake State Highway No. 22 at Fort Klamath Junction in Section 23, Township 33 South, Range $7\frac{1}{2}$ East, W. M., and running thence southerly via the old route of The Dalles-California Highway to a junction with the new route at state highway engineer's station 3280+65.5 of the reconstructed highway in Section 21, Township 35 South, Range 7 East, W. M.

be and hereby is designated as a portion or part of the Crater Lake Highway, otherwise designated as State Highway No. 22, and is shown colored in purple on the accompanying map marked "Exhibit A", and shall be maintained as such by the State in the same manner that other primary state highways are maintained.(*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

AUG 10 1948

EXHIBIT "J"

Minutes of August 9 and 10, 1948

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: . . . . . Beaverton-Hillsdale Highway . . . . . .
Highway number: . . . . 40 . . . . . , Route number: . . . . ORE10 . . . .

Location of Termini	Established Speed
M. P. 2.00 (E. of S.W. 42 Ave.) to M.P. 2.55 (S.W. 50th Ave)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

AUG 10 1948

EXHIBIT "F"

Minutes of August 9 and 10, 1948

R E S O L U T I O N

WHEREAS, on the 12th day of March, 1948, at a meeting of the Oregon State Highway Commission, all members being present and participating, the said Commission passed and adopted a resolution reducing the maximum load limit on certain state highways, including the following highways, to wit:

EAST DIAMOND LAKE STATE SECONDARY HIGHWAY NO. 425 from Mile Post 0.0 (Junction with Crater Lake North Secondary Highway No. 232) to Mile Post 14.72 (Junction with The Dalles-California Highway, US97),

CRATER LAKE NORTH SECONDARY STATE HIGHWAY NO. 232 from Mile Post 3.81 (Junction with East Diamond Lake Secondary Highway No. 425) to Mile Post 0.0 at Diamond Lake,

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highways;

NOW THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following highways

EAST DIAMOND LAKE STATE SECONDARY HIGHWAY NO. 425 from Mile Post 0.0 (Junction with Crater Lake North Secondary Highway No. 232) to Mile Post 14.72 (Junction with The Dalles-California Highway, US97),

CRATER LAKE NORTH SECONDARY STATE HIGHWAY NO. 232 from Mile Post 3.81 (Junction with East Diamond Lake Secondary Highway No. 425) to Mile Post 0.0 at Diamond Lake,

be and the same hereby is rescinded and cancelled as of the 15th day of July, 1948, and the maximum load limit permissible on the said sections of said highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerks of Douglas and Klamath Counties, in which counties said sections of said highways are located, and the Superintendent of the Department of State Police for his information.

Dated this ninth day of August, 1948.

AUG 10 1948

15188

EXHIBIT "L"

Minutes of August 9 and 10, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for the appropriation, acquisition, or manufacture of roadbuilding materials for approach or hauling roads thereto, and for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code; and

WHEREAS, the State is now engaged, and has since on or about September 1, 1946, engaged in a reconstruction of that section of the Pacific Highway in Douglas County known as the Johns-Wolf Creek Section; and

WHEREAS, the Commission by resolution dated August 22, 1946, and found on pages 13220 to 13223 of the minutes of the meeting, found and declared the necessity of acquiring from J. B. Moore (right of way file 12207) real property described in said resolution as parcel No. 4 for the purpose of constructing thereover an approach and hauling road for the purpose of transporting road building materials from property described in said resolution as parcel No. 3 to the right of way for the relocated Pacific Highway; and

WHEREAS, thereafter a complaint in condemnation was filed in the Circuit Court of the State of Oregon for Douglas County for the acquisition of said parcel No. 4; and

WHEREAS, upon the State's agents' and contractors' entry upon said property, the owner, or purported owner thereof, J B. Moore, protested and then and there requested that the location of said hauling road be changed to a location easterly therefrom and upon the property hereinafter in this resolution described; and

WHEREAS, the cost of locating and using a hauling road upon the parcel of property hereinafter described was greater than the cost of locating and using a hauling road over the property described in the Commission's resolution of August 22, 1946, but that the Commission's Engineer recommended and now recommends that a change be made in said hauling road to accommodate the said J B. Moore and Susan M. Moore; and

WHEREAS, the property hereinafter described is and has been necessary for the specific and particular purpose of transporting roadbuilding materials from the parcel of property described as parcel No. 3 in the Commission's resolution of August 22, 1946;

EXHIBIT "L" (Cont.)

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary, and since the filing of a complaint in condemnation on October 31, 1946, in the case of State Highway Commission vs. Arthur J. Fawcett, et al., Clerk's No. 10390, in the Circuit Court of the State of Oregon for the County of Douglas, has been necessary for the purpose of reconstructing the Johns-Wolf Creek Section of the Pacific Highway, and that said property will be necessary for the future construction and maintenance of said highway; said real property is described as follows, to-wit:

A parcel of land lying in the Northeast quarter (NE¼) of the Northwest quarter (NW¼) of Section 30, Township 32 South, Range 5 West, W. M., Douglas County, Oregon, and being a portion of the following described property: That tract of land which was conveyed by that certain deed to Arthur J. Fawcett and Verle V. Fawcett, recorded in Book 108, Page 404 of Douglas County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land variable feet in width, variable feet on each side of the center line of the meander line as said line has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 0+00 to Station 12+08.8 which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 0+00 opposite and 10 feet distant from which point the easterly line of the said strip of land intersects the southerly line of said property; said point being 941.9 feet south and 4.6 feet west of the north quarter corner of Section 30, Township 32 South, Range 5 West, W M.; thence North 14° 04' 30" West a distance of 237.3 feet; thence North 37° 10' West a distance of 180.1 feet; thence North 67° 01' West a distance of 132.0 feet; thence North 70° 40' 30" West a distance of 206.3 feet; thence North 87° 53' 30" West a distance of 125.7 feet; thence North 80° 29' 30" West a distance of 95.0 feet; thence South 76° 13' 30" West a distance of 216.3 feet; thence North 46° 34' 30" West a distance of 16.2 feet to a point on the southerly boundary line of the gravel bar; said point being opposite and 150.0 feet distant from the gravel bar center line Station 10+48.5.

The widths (in feet) of the strip of land above referred to are as follows:

(Cont.)

EXHIBIT "L" (Cont.)

Station	to Station	Total Width	Width on Left Side of Center Line	Width on Right Side of Center Line
0+00	2+37.3	Variable	15 feet	10 feet taper to 15 feet
2+37.3	12+08.8	30 feet	15 feet	15 feet

The parcel of land to which this description applies contains 0.68 acres.

2. The resolution of this Commission dated August 22, 1946, found on page 13220, in so far as it applies to parcel No. 4 of the property belonging to J. B. Moore, et al, under file No. 12207, be and the same hereby is rescinded.

3. This resolution be entered in full in the minutes and records of this Commission as of the tenth day of August, 1948.

(Authority for entry of the above condemnation resolution in the August, 1948, minutes was granted by the State Highway Commission at its meeting on September 13, 1948. See Page 15198 of the September, 1948, minutes.)

EXHIBIT "M"

Minutes of August 9 and 10, 1948

RESOLUTION

WHEREAS, the Commission on the twenty-ninth day of June, 1948, adopted a resolution covering the operation of trucks and busses with respect to the distance that drivers of such vehicles must maintain between trucks, but made the provisions of said resolution apply particularly to Chapter 156, Oregon Laws, 1947; and

WHEREAS, the provisions of Section 115-332, O. C. L. A., as amended by Chapter 428, Oregon Laws 1941, include trucks and busses other than those specified in Chapter 156, Oregon Laws 1947; and

WHEREAS, it appears to the Commission that said resolution should be amended as follows: in line 2, paragraph 1 on page 2, following the figures "1947" add the following: "and permits issued by the Highway Commission under any other law of the State of Oregon covering the operations of trucks or busses on public highways";

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AS FOLLOWS:

1. That the above-mentioned resolution adopted by the Commission on the twenty-ninth day of June, 1948, be and the same hereby is amended as follows: in line 2 of paragraph 1 on page 2 following the figures "1947", add the following: "and permits issued by the Highway Commission under any other law of the State of Oregon covering the operations of trucks or busses on public highways".

2. That this resolution shall be entered in the minutes and records of the Commission as of the ninth day of August, 1948.

AUG 9 1948

Portland, Oregon
September 13, 1948

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst State Highway Engineer
G. W. Neuner, Assistant Counsel
M. H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 3:00 p.m. in the same room:

The State Parks Superintendent was present and reported on the following park matters:

1. The Parks Superintendent requested confirmation of authority granted him by telephone for the construction of three quonset huts costing about $,500 each, at Saddle Mountain, Short Sand Beach, and

Neptune State Parks. He explained that the huts will be used temporarily for residential purposes but later on, when a standard caretaker's cottage has been provided, will be used for garage or shop purposes. The Commission confirmed authority for the purchase of three huts to be erected either by state forces or by contract.

2. Proposed development of Harris Beach State Park in Curry County: The Parks Superintendent briefly outlined the development that is planned for this park including restoration of azalea growth and a picnic area with accommodations, at an estimated cost of $2,000. In the discussion of this matter, the Commission also discussed a request from the Brookings-Harbor Chamber of Commerce for establishment of a state park, consisting of 0.2 acre of land, fronting on the ocean at Brookings, which property is owned by Mr. Elmer Bankus, Brookings, who has offered to present it to the state as a gift. As a result of the discussion the Commission tentatively approved an amount of $2,000 in the 1949 park budget for developments in Harris Beach State Park, but deferred action on the acquisition of the park in Brookings pending the appearance of the delegation on the following day. (On the following day a delegation from Brookings appeared urging the adoption of a small tract in Brookings as a state park to afford easy access to the beach, which is not now possible in Harris Park.

Following departure of the group the Commission resumed discussion of the subject and decided not to acquire the proposed park at Brookings because of its proximity to Harris Beach State Park and Azalea State Park and because of the Commission's policy to develop existing state parks in preference to acquiring new areas. The Engineer and the Parks Superintendent were instructed to investigate the feasibility and cost to construct a roadway down to the beach in Harris Beach Park and to report their findings by October 1st.)

3. Preliminary report regarding the establishment of a botanical garden by the Garden Clubs of Oregon: The Parks Superintendent advised that he has been appointed a committee of one to recommend a site for this garden which is to contain 1,000 acres and be located on US 99 not over 25 miles from Portland; also, that he has investigated three sites: one just south of New Era, one at Wilsonville, and the third at Mile Post 40 on 99E. The Garden Clubs, he said, probably will ask the State Highway Department to participate in the costs involved. The Commission took no action on this matter.

4. Construction of a boat channel at Wallowa Lake: The Parks Superintendent requested and the Commission approved an additional $500 authorization to finance this channel as a park betterment project, making a total authorization of $5,000 for this purpose.

5. Purchase of equipment for parks: The Parks Superintendent requested approval of an expenditure of $4,316 for the purchase of

equipment to be used in state parks, such as lawn mowers, hedge shears, power plant for power saws, and Kardex files for keeping records. The Commission approved the request unanimously.

6. Building development in Collier State Park: The Parks Superintendent presented a map showing the proposed development in this park particularly the building project toward which Mr. Alfred D. Collier, Klamath Falls, is contributing funds. He stated that the plan has been approved by Mr. Collier, and he recommended approval by the Commission. The Commission approved the plans as recommended.

7. Museum in Champoeg Park: The Parks Superintendent reported that the architects are still working on plans for the building but that their first design was based on the use of concrete in the structure whereas they now are searching for a suitable quarry that the building may be made of rock. The report was approved. No other action was taken.

Mr. C. H. Armstrong, present City and County Relations Engineer, appeared before the Commission in connection with his possible appointment as Assistant State Parks Superintendent, as heretofore recommended by the Engineer and the State Parks Superintendent. The Commission discussed at some length with Mr. Armstrong his attitude with respect to the handling of park affairs but deferred action on the appointment until later in the session. (Discussion of this matter was resumed on the following day at which time the Commission unanimously approved the appointment of Mr. C. H. Armstrong as Assistant Parks Superintendent.

In connection with this matter the Commission also discussed and unanimously approved the transfer of the Landscaping Department from the parks division to the engineering division.)

The matter of availability of funds for right of way and construction in the Portland district, and particularly as this matter affected the acquisition of right of way for the Sullivan's Gulch project, was considered by the Commission. After the matter had been thoroughly discussed the Commission unanimously approved the purchase of right of way in Sullivan's Gulch up to a maximum expenditure of $1,000,000, pending the ascertainment of the actual funds available to the district which at this time are estimated to be considerably in excess of the $1,000,000. The decision carried unanimously upon motion of Commissioner Schaupp, and was duly seconded by Commissioner Chandler. It was clearly understood that the expenditures in Sullivan's Gulch are to be taken only from the regularly allocated funds to the Portland area and that funds allocated to other parts of the state will not be used for this purpose. (See starred Item #14670 on following page.)

Mr. J. W. DeSouza, Assistant Counsel, presented for the Commission's consideration a list of properties that are needed for various highway improvements throughout the state together with options which have been obtained. Following careful consideration of each item in the list and the amount of the individual options, the Commission approved the options and authorized

acquisition of each tract on such basis. The resolution attached hereto marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The following notes refer to items discussed in the presentation of the above-mentioned resolution marked EXHIBIT "A":

* Item No. 14670, Oscar A. Stephenson and Constance Stephenson: The Commission approved the purchase of this property, which includes a lot, house, and garage, at $10,600 as an emergency for reasons explained by the Chief Counsel, but limited additional purchases to vacant lots, it appearing that options secured for the purchase of dwellings were based on leasing the property to the owner for two years which might operate to the disadvantage of the state in that it might be difficult to get possession of the property when construction of the Sullivan's Gulch project is ready to proceed. The Commission ordered renegotiation with the owners, allowing a reasonable length of time for occupancy, not exceeding six months, and 30 days in which to vacate the premises after the six months' period has expired. The Engineer was instructed to report for the information of the Commission and future guidance of the right of way department in its negotiations, the 1-2-3 order in which it is planned to construct this project.

** Items Nos. 14638 to 14643-B, inclusive. Right of way for the Central Howell-Silverton Section of the Salem-Silverton Highway. The Commission approved all of the options listed but restated its policy hereafter not to purchase with state funds any more right of way for county roads.

*** Item No. 12626, Santa Cruz Portland Cement Company, Coos Bay: The Commission approved purchase of the above property which contains considerable land in excess of that actually needed for right of way purposes, at the amount of the option. In the discussion of the disposal of the excess property it was brought out that the City Council of Coos Bay had passed an ordinance and sent a letter to the right of way department stating a willingness to purchase at some future time, the excess property at the price the state paid for it, if the city can finance it. It was Chairman Banfield's opinion that the sale of the excess property to the city should be treated as an entirely separate agreement and that until the city has signed a formal agreement with the Commission, stating how much property it would buy, when the city would buy it, and how much the city would pay for it, that no commitments should be made as to the availability of the excess property for city purchase. The Commission approved the purchase of the property with the understanding that it is under no obligation to sell any part of it to the city.

In the discussion of right of way matters, the Commission also considered the purchase of property belonging to Mary H. Ross and Alma M.

Aglesheimer at Sylvan on the Canyon Road, Portland, which is needed to perfect a plan for a traffic interchange at this point. The Chief Counsel reported an option secured at $47,500. The Engineer explained details of the proposed plan and recommended purchase of the property at this time. It appears that purchase of the property will necessitate the purchase of additional expensive property in view of which the Commission deferred its decision pending more information which the Engineer was instructed to obtain by examination of the property during the noon recess. (The Engineer reported on his examination later in the day advising that the property is key property in the development of this section and again recommended acquisition of the property; however, the Commission again deferred action pending further study of the obligations that may be incurred by purchase of this particular tract. The Chief Counsel was instructed to ascertain from the owners of the property if they will allow more time for the taking up of the option and to report to the Commission later.)

The Commission also considered options for the purchase of property needed as right of way for a proposed revision of the Youngs Bay Bridge-Lewis and Clark River Section of the Oregon Coast Highway near Astoria, but decided not to acquire the right of way at this time.

The Assistant Counsel, Mr. DeSouza, brought up for discussion a right of way settlement with a Mr. Harold Briggs on the Oregon Coast Highway near Agate Beach in Lincoln County, with particular reference to a spring, the flow from which has decreased by reason of the construction of the highway. He advised that the original plan was to protect Mr. Briggs' spring by construction of a concrete box at an estimated cost of $1,000, but the highway excavation cut down the flow of water and it now looks like the flow will stop entirely. Mr. Briggs, he said, has agreed to release the state from all liability with regard to the spring if paid the sum of $500 as settlement in full therefor. He recommended acceptance of the offer. The Commission unanimously approved the recommendation.

The Assistant Counsel requested authority to condemn certain properties that are needed in connection with state highway improvements but concerning which he has been unable to secure satisfactory settlements by negotiation. He presented a list of such properties, together with the offer that he recommended be made for each parcel, as follows:

Baker-Miles Bridge Section of the Medical Springs Highway

		Recommended Offer
13831	Joseph A. Geddes	$ 300.00
13824	Lee Saveley	1,250.00

Hunter Creek Section of the Oregon Coast Highway	Recommended Offer
14990 J. T. Flynn	$1,500.00
Five Rivers-Rock Creek Section of the Alsea Highway	
14763 Oscar Knick	250.00

Following careful consideration of each item the Commission authorized condemnation of the several tracts at the recommended offers and thereupon by unanimous vote adopted the attached resolution marked EXHIBIT "B-2" with respect thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission approved for insertion in the minutes of August 9 and 10, 1948, a resolution authorizing condemnation of property for road building materials in connection with the Johns-Wolf Creek Section of the Pacific Highway in Douglas County.

An offer from Del R. Beebe Construction Company to pay $100 for an office building located on property acquired from the Eugene Excelsior Company in Eugene was considered by the Commission. The Assistant Counsel advised that the building is appraised at $75, and recommended acceptance of the offer. The Commission approved the recommendation unanimously.

The Commission considered the results of the taking of bids in Salem on August 30, 1948, for the sale of additional Excelsior Company buildings in Eugene and for the sale of a building on the Oregon Coast Highway south of Cannon Beach, as follows:

Sale of Excelsior Mill Building in Eugene

No bids received

Sale of Building South of Cannon Beach

Morris A. Work, Cannon Beach	$ 250.00

The Commission deferred until later in the session discussion of the disposal of the Excelsior Company building in Eugene.

The Engineer and Chief Counsel recommended acceptance of the offer of Mr. Work to pay $250 for the building at Cannon Beach. In the discussion following it was brought out that the improvement of the highway on which this building is located is not included in any construction program so there is no particular need to sell the property now. It was also disclosed that Mr. Work pays only $15 per month rent for this building. It was the Commission's

thought that it would be to the state's advantage to keep the building and rent it until it has to be moved, also, that the present rental is too low. The offer of sale was rejected by the Commission and the Assistant Counsel was instructed to raise the rent.

The matter of carrying fire insurance on buildings acquired in connection with right of way transactions was considered by the Commission. The Assistant Attorney advised that in the Sullivan's Gulch area alone there are a large number of buildings for which insurance should be provided as they are purchased.

The Engineer and Chief Counsel were instructed to render a report on this subject at the next meeting of the Commission, such report to be an overall picture of the matter, including type of insurance needed and the amounts thereof, etc. The Commission ordered in the meantime that the insurance now being carried by the owners of the buildings be extended to protect the state's interests.

The Commission recessed at 12:00 noon for lunch and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission confirmed telephonic authority previously granted by Chairman Banfield and Commissioner Chandler for the sale to Del R. Beebe Construction Company, for the sum of $2,500, of a number of buildings located on the right of way of the Delmar-Coaledo and Coaledo-Chrome Plant Sections of the Oregon Coast Highway in Coos County. (For details see a copy of the Asst. Counsel's letter dated August 23, 1948, to the Beebe Construction Company listing the properties to be sold and the conditions in connection therewith in the general files.)

The Commission considered a settlement with Mrs. Cora Haugh for right of way needed for the Judkins Point-Goshen Section of the Pacific Highway in Lane County, particularly settlement for a well located on the property. The Assistant Attorney advised that the original settlement provided for furnishing a new well, and that two wells had been drilled, without success, to replace the existing one which is located on the right of way. He further stated that the owners are willing to use the original well provided the state is willing and will install the necessary pipe from the well to the house which is estimated to cost $150. The present well, he said, does not interfere with the use of the highway and he accordingly recommended approval of this arrangement on a lease basis. He also requested an additional authorization of $500 to pay for drilling the second well. The Commission approved the recommendation and the request by unanimous vote.

Consideration was given by the Commission to a proposed agreement with the Golden Fir Lumber Company in Eugene for the lease of approximately five acres of state-owned property which was acquired by the Commission for future right of way and borrow purposes at the overpass north of Eugene. The Assistant Counsel, Mr. Neuner, advised that the company intends to store lumber on the property and that the proposed lease provides for an annual

payment of $300 for approximately five years for use of the property and the posting of a $100 cash bond to guarantee clean up of the premises when the company is through with them; also, that the agreement contains a 60-day cancellation clause and provision that no structures are to be built on the property. In the discussion following the Commission expressed the thought that the amount of rental and cash bond is not sufficient; also, that the term of the lease for five years is too long. The Engineer and Chief Counsel were instructed to contact the company concerning revision of the agreement on the basis of a two-year lease and an increased rental fee and the posting of a larger cash bond to guarantee satisfactory clean-up of the premises.

The Commission discussed a proposed agreement with the City of Gold Beach and John O. and Vida M. Melville concerning property that is being acquired from the Melvilles as right of way for the improvement of the Oregon Coast Highway in Gold Beach. The Chief Counsel advised that the Melvilles have been rather hard to deal with and the best settlement that can be reached is that which provides a cash payment of $1,500 for the land and an additional $1,500 in lieu of moving buildings, and that the City of Gold Beach has agreed to pay 50% of the total amount. He recommended approval of this settlement and payment to the Melvilles of $1,500 as provided by the agreement. The Commission approved the recommendation unanimously. (The Commission signed the agreement on the following day.)

The Commission approved deeding to the U. S. Reclamation Service, without cost, 0.58 acre of land adjacent to a state-owned borrow pit on the Warm Springs Highway in Jefferson County upon advice from the Engineer that the property is of no particular value for state highway purposes and that the appraised value of the property is only $9.86. (The deed was signed on the following day.)

The Chief Counsel brought to the Commission's attention a proposed agreement with the U.S. Navy for the use of Navy-owned property that is needed as right of way in connection with the construction of the Pleasant Valley Section of the Oregon Coast Highway in Tillamook County. He explained that the Navy is trying to get legislative authority to grant the State of Oregon a perpetual easement for use of the property and that the present agreement is simply to take care of the situation until that authority has been granted. He recommended that the agreement be accepted as presented. The Commission approved the recommendation. (The agreement was signed on the following day.)

The Commission discussed action to be taken against White Bros. Co. for failure to enter into a contract in 1946 for removal of slide material on the Columbia River Highway at Oneonta Gorge, in Multnomah County. The Commission affirmed its previous decision and instructed the Chief Counsel to institute the necessary legal proceedings to recover the amount of the bidders bond furnished by White Bros. in this instance.

The Commission considered a joint written report from the Engineer and the Chief Counsel, dated September 9, 1948, with respect to the claim and

rights of Mrs. John Raeish (Mrs. Shaw) in a relief map of the State of Oregon which Mr. Shaw, her former husband, constructed for the State Highway Department in 1939. The Chief Counsel advised that since making this report, in which he and the Engineer had recommended that Mrs. Raeish be paid the sum of $1,000, she has, in a letter written subsequent to that date, asked for the sum of $2,000 which is $500 more than the amount for which she previously agreed to settle. He recommended, in view thereof, that the claim be denied. The Engineer concurred therein. The Commission unanimously approved the recommendation and instructed the Chief Counsel to advise Mrs. Raeish of the action taken.

The Engineer presented a report of weighmasters' operations for the months of June and July, 1948. In explanation he stated that the monthly trend of overload violations varies somewhat but that the long term trend is approximately the same. The Commission approved the report, however, instructed the Engineer to submit a report each month on the more flagrant violators with his recommendation as to what action the Commission should take concerning them.

The Commission considered an agreement with the U. S. Army Engineers covering bank protection along the Santiam River above the new Pacific Highway bridge near Jefferson. The Engineer advised that the Santiam River during high water causes a great deal of erosion and might at some time endanger or seriously damage the new bridge. The Army Engineers, he stated, estimate the cost of corrective measures at $120,000, of which amount they are asking the state to pay $60,000. He recalled that this matter was considered by the Commission at its meeting in May, 1948, but action was then deferred until preparation of an agreement containing a provision that would relieve the state from liability in case property damage resulted by reason of the revetment. He recommended approval of the agreement. The Assistant Counsel, Mr. Neuner, advised that damage releases had been obtained from nearly all of the property owners concerned and that the proposed agreement covers the matter satisfactorily from the state's standpoint. The Commission approved the agreement as recommended and authorized an expenditure of $60,000 of state funds as provided therein. (The agreement was signed on the following day.)

The Engineer reported on the request of the City of Umatilla for state aid in construction of curbs and gutters along Sixth Street in Umatilla (route of US 730), from the Umatilla River Bridge to Switzler Avenue. He advised that the request has been investigated and that the work is estimated to cost about $18,000. He recommended approval of the work, at state expense, in 1949 because traffic is very heavy on this street due to construction of McNary Dam and it would be desirable to get the street outlined by curbs to avoid encroachments and to better control access to the highway. The Commission approved the Engineer's recommendation for the inclusion of this item as a betterment project in the 1949 budget. (A delegation from Umatilla appeared before the Commission on the following day regarding this matter. The Commission at that time instructed the Engineer and the Chief Counsel to

prepare a form of agreement with the City covering the matter and to include therein provision for parallel parking of cars.)

The matter of installing a system of synchronized traffic signals on 82nd Avenue, Portland, was considered by the Commission. The Engineer reported that many separate requests had been received for traffic signals on this street, but the traffic problem could not be benefited greatly unless the installation were made on a synchronized basis. A study of the situation in conjunction with the Portland City Traffic Engineer, he said, reveals a need for the signals, which he estimated would cost about $50,000. He recommended approval of signal installation at the following intersections on condition that the City of Portland will pay one-half of the expense involved:

Freemont	Burnside	Division	Foster
Halsey	Stark	Powell	Woodstock
Glisan	Yamhill	Raymond	Duke
			Flavel

Mr. F. T. Fowler, Traffic Engineer, City of Portland, who was present, quoted City Commissioner William A Bowes to the effect that if the state will approve the project, the city will cooperate in the expense involved on a fifty-fifty basis and will also maintain the signals and furnish the electric energy to operate them. After discussion Commissioner Schaupp moved approval of the Engineer's recommendation. Commissioner Chandler seconded the motion which carried unanimously. The Commission ordered the matter covered by appropriate agreement.

The Commission discussed with the Engineer the bids received at the morning session and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows, the action of the Commission with respect to each project being by unanimous vote:

"Construction of a 20' x 30' addition to the Division Office Building at Bend, Deschutes County. Archie R. Averill, Portland, submitted the only bid for this project at $8,268. The Commission has awarded this contract to Archie R. Averill at that price.

"John Day River-Squally Hook Section of the Columbia River Highway in Gilliam County; 3.78 miles of grading and bituminous macadam surfacing. Rogers Construction Company, Portland, submitted the low bid for this job at $227,409. The second low bid was submitted by McNutt Bros., Eugene, at $248,579. Nine higher bids were received. The Commission has referred all of the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Smallwood Creek-Benton County Line Section of the Alsea Highway in Lincoln County; 9.56 miles of surfacing and oiling. J. C. Compton Co., McMinnville, submitted the low bid for this job at $109,137, using asphalt.

The second low bid was submitted by Rogers Construction Company, Portland, at $110,250, also using asphalt. One higher bid was received. The Commission has awarded this contract to J. C. Compton Company, the low bidder, at its bid price.

"Cogswell Hill-Elk Creek Rock Production Project on the McKenzie Highway in Lane County. E. C. Swaggart, Eugene, submitted the low bid for this work at $33,750. The second low bid was submitted by A. H. Saxton and Sons, Corvallis, at $35,100. Three higher bids were received. This contract has been awarded to the low bidder, E. C. Swaggart.

"McKee Bridge over Pudding River on Marion County Road No. 543 near Woodburn. The Commission received six bids for this job, all of which have been referred to the Marion County Court since this job is a county project and was included in the advertisement only as a courtesy to the Marion County Court.

"Barnes Road-Multnomah County Line Section of the Sunset Highway in Washington County; 2.57 miles of roadside improvement. Coast Construction Company, Portland, submitted the low bid for this work at $16,873.60. The only other bid received was that of Stoen's Rock and Landscape Company, Seattle, at $22,126.14. The Commission has rejected both bids on this project as too high.

"Gales Creek Bridge on the Tualatin Valley Highway near Forest Grove in Washington County. Snook Bros., Corvallis, submitted the low bid for this bridge at $24,840. The second low bid was submitted by J. F. Johnston, Sherwood, at $25,289. Six higher bids were received. The Commission has awarded this contract to the low bidder, Snook Bros."

The Engineer presented a report on the necessity to order reduced load limits on certain highways during winter and spring months. A study of all highways which carry a considerable amount of logs, he said, reveals that three important highway sections were severely damaged by log and lumber hauling during the spring months of 1948 and that it cost the state approximately $180,000 to restore them to normal condition. He recommended, in order to prevent the recurrence of such damage and to avoid additional expense, that the Commission authorize him to post reduced load limits on state highways when in his estimation the surface conditions require such posting. The Engineer also asked the Commission to approve a form of letter which he suggested be sent to all mill owners and log haulers who might be affected by the reduced limits, advising them well in advance that it may become necessary to post the highways they are using for reduced loads so they can adjust their operations accordingly. The Commission approved the Engineer's recommendation for placing reduced load limits on sections of highways as recommended, with the understanding, however, that the members of the Commission shall be notified by telephone before signs are placed. The Commission also approved the Engineer's proposed letter to be sent to log and lumber haulers.

The Commission considered a maintenance agreement with the Public Roads Administration providing for state maintenance of a 15.467-mile Forest Highway section of the Santiam Highway in Linn County, from June 18, 1948, to June 17, 1949. The Engineer advised that the Public Roads Administration has accepted as complete Forest Highway projects 23-H3, 113, J2, K4 and L3 and now is asking the state to maintain the section for the Government for this one-year period as an economical proposition. The Public Roads Administration, he said, will reimburse the state for the actual cost of maintenance, excluding snow removal which is a state obligation, up to a maximum expenditure of $13,146.95, which is the estimated cost to perform the work. He recommended approval of the agreement. The Commission approved the recommendation unanimously. (The agreement was signed on the following day.)

The Commission considered a request from the Cascade Highway Association for designation and construction of a proposed state highway, referred to as the "Cascade Highway", between Oregon City and Eugene via Silverton and Lebanon. The Engineer recommended that the request be denied because it will cost about $6,000,000 to construct it to secondary highway standards and about $12,000,000 to build it as a standard primary highway, and there are no funds available to finance the work; moreover, there is no apparent need for the road and available monies for this district should be spent to further improve the Pacific Highway which it approximately parallels. The Commission approved the recommendation.

A request was presented from the City of Enterprise for the widening of certain streets along the route of the Wallowa Lake Highway in this town. The Engineer reported that a preliminary investigation reveals that the project has considerable merit and recommended that he be granted authority to make a survey to determine the cost of widening so as to permit an adequate two-way traffic flow without prohibition of parking. The Commission unanimously authorized the survey.

The Engineer brought up for discussion the proposed improvement of the Oswego Highway to provide a four-lane facility through the central business district of this town. The Engineer recalled that the three-year postwar program contains an allotment of $20,000 for such widening work but, due to the large increase in traffic, the work contemplated is not adequate, so an expenditure of about $53,000 is now required to provide a satisfactory improvement. Action on this matter was deferred by the Commission pending an investigation on the ground by Chairman Banfield and the Engineer.

The Commission considered a request from the Canyonville Chamber of Commerce for the further improvement of the Tiller-Trail Secondary Highway. The Engineer advised that a project between Milo and Tiller was completed in July, 1947, at a cost of $158,500, and that additional work is scheduled from Tiller southeasterly through the Umpqua National Forest, an allocation of forest road funds in the amount of $260,000 and state funds in the amount of $165,000 having been authorized for the purpose. This work, he stated, would probably be done in 1949. The Secretary was instructed to advise the Chamber of Commerce of the program contemplated for this highway.

17207

Requests from Natal Grange No. 302 and Yankton Grange No. 18, Columbia County, for further improvement of the Scappoose-Pittsburg County Road in Columbia County were considered by the Commission. The Engineer advised that this is a county road on the Federal Aid Secondary System and that a section approximately six miles long, between Scappoose and Spitzenberg, was surfaced and oiled as one of the projects in the Three-Year Postwar Program at a cost of $61,500. He estimated the cost to complete the remaining twenty miles to secondary highway standards at $600,000 and gave as his opinion that the road does not warrant a prior standing for serious consideration at this time. The Commission denied the request for immediate construction and instructed the Secretary to inform the Granges of the work that has been done, the lack of available funds to continue the improvement, and that additional improvements will be made when they can be accomplished in an orderly program of construction.

The Commission considered a letter from the Columbia County Court requesting improvement of the Vernonia Timber Road from Treharne Junction to the Wolf Creek Highway at Sunset Camp. The Engineer advised that this project is included in the Postwar Program, an allotment of $119,000 having been made to finance grading and oiling, but later it was found that two bridges had to be reconstructed and the Public Roads Administration would not approve the project until provision had been made for the bridge work. He pointed out that the road is a county road for which the county is responsible, but the county court has not agreed to take care of the bridge work. He estimated the total cost of the project, including bridges, at $180,000. The Commission decided, in view of scarcity of funds, not to approve the project for construction at this time, but to wait until the new construction program is arranged, at which time it will be given consideration if there appear to be sufficient funds to spare. The Commission ordered that the county court be so informed.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of the 1946 State Tax Street Funds which they received in 1947, and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory:

Hines Midland Shaniko

He recommended approval of the plans. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with respect thereto marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have satisfied the legal requirements with respect to expenditure of the 1947 State Tax Street Funds which they received in 1948, and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory:

Antelope	Eastside	Halsey	Port Orford
Columbia City	Empire	Hines	Sodaville
Dayville	Granite	Hubbard	Summerville
Dufur	Grass Valley	Oakridge	Wheeler

He recommended approval of the plans. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered and approved an "option for cooperative construction" project in the City of Lakeview which provides for the improvement of Charlton and Pine Streets in this city. The agreement provides that the work shall be performed by state forces as a "Special State Tax Street Fund" project; that the city shall provide necessary right of way and easements, and shall take care of all utilities poles, pipes, etc., and maintain the streets after the improvement is completed.

The matter of authorizing additional state funds to finance construction of the "D" River Bridge and approaches on the Oregon Coast Highway at Delake had the attention of the Commission. The Engineer advised that the original allocation of $50,000 for this job was based on construction of a large box culvert and did not provide for four traffic lanes but subsequent investigation reveals that a larger structure should be built in order to eliminate possible damage by heavy drift that occurs during storms at sea. To meet the situation, he said, the design of the structure has been changed to a concrete bridge with roadway width of 60 feet to handle four lanes of moving traffic and to conform with the width of the adjoining highway section. He estimated the cost of the project under the revised plan at $126,000 and recommended approval of the extra expenditure ($76,000) so as to expedite replacement of the existing structure which is imperative. The Commission approved the recommendation and authorized the advertising of the project for bids to be received on the revised plan as soon as plans and specifications can be prepared.

The Commission considered and approved an agreement with the Southern Pacific Company whereby the company grants to the state permission to construct, maintain, and use a highway over and across the company's tracks at Delmar, Coos County, by means of an overcrossing structure. (The agreement was signed on the following day.)

The Engineer reported that pursuant to authority previously given him by the Commission he has awarded contracts as follows, the conditions of the awards having been satisfied:

> West Slope-Beaverton Section, Tualatin Valley Highway, Washington County; contract awarded August 16 to Warren Northwest, Inc., low bidder.

Corvallis (South Entrance) Section of the Pacific Highway West, Benton County; contract awarded August 17 to Lindstrom Bros., low bidder.

Tillamook Grading and Paving Project on Tenth Street in the City of Tillamook, Tillamook County; contract awarded August 19 to Cressler Construction Company, low bidder.

Topsoiling and Seeding Project on the Pacific Highway West (Front Avenue, Sheridan Street-Bancroft Street), Portland, Multnomah County; contract awarded August 20 to Coast Construction Company, low bidder.

Manning Slough Bridge on the Oregon Coast Highway near Delmar, Coos County; contract awarded September 3 to Del R. Beebe Construction Co., low bidder.

Delmar-Coaledo Section of the Oregon Coast Highway, Coos County; contract awarded September 3 to Del R. Beebe Construction Co., low bidder.

Coaledo-Chrome Plant Section, Oregon Coast Highway, Coos County; contract awarded September 3 to Del R. Beebe Construction Co., low bidder.

The Commission by unanimous vote confirmed the awards as reported.

The Engineer reported that the relocation survey of the Upper and Lower Lookingglass Creek Bridge sections of the Coos Bay-Roseburg Highway has been completed, and he asked the Commission to approve this survey as the permanent route of such highway sections. After due consideration of the Engineer's report with respect to the survey under discussion the Commission approved and adopted the survey and thereupon by unanimous vote adopted the attached resolution marked EXHIBIT "E", with respect thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported, as previously instructed by the Commission, on the rough condition of the oiled macadam surfacing performed by Rogers Construction Company on the Bonanza-Poe Valley-Malin Section of the Bonanza-Malin County Road, in Klamath County. He advised that from a report received from the Division Engineer in charge of the work, the roughness developed after the contract had been completed and was caused by improper spreading of sanding materials that were applied by county forces to spots where "bleeding" occurred. As a corrective measure he recommended the planing of the road surface and requested authority to lease a planing machine from one of the contractors to do the work if personal inspection by himself or Assistant Engineer W. C. Williams reveals that should be done. The Commission authorized the Engineer to do what is necessary to place the road in satisfactory condition.

The Commission discussed the advisability of constructing another temporary building at the Salem Shops to relieve the congestion in the State Office Building. The Engineer advised that the temporary building erected last year at the Salem Shops for the accommodation of the Auditing Department has not solved the space problem in the office building, so it is going to be necessary to furnish additional space for the Legal and Right of Way Departments; moreover, the City and County Relations Engineer, the Traffic Engineer, and the State Police are urgently in need of more space. To provide for this needed space he suggested construction of an additional frame building, 40' x 86', at the shops location, which, he said, should provide sufficient space for the next two years and could be used later on for storage purposes. He estimated the cost of such a building at $36,000. The Commission deferred its decision in the matter pending additional information from the Engineer including a plan of the proposed building, a close estimate of the cost to construct it, definite information whether or not it can be used permanently, and how long it will serve the department adequately as temporary office space.

The Commission considered the following requests for extensions of time within which to complete highway contracts:

Perkins Bros., Contract No. 2961 for bridge construction on the Prineville Section of the Ochoco Highway in Crook County, requested an extension of time of 90 days from August 31, 1948, to November 30, 1948, within which to complete this job. They alleged that their delay was caused by high water which prevented completion of footing excavations until May, 1948. The Engineer advised that high water in the Crooked River took out the contractor's false work, necessitating replacement which materially delayed progress of the work. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

General Construction Company, Contract No. 2972 for the construction of ferry slips at Astoria and Megler, requested an additional extension of time of 20 days from May 6, 1948, to May 27, 1948, within which to complete this job. The company allegedthat the overrun of the time limit was caused entirely by extra work ordered by the Engineer. The Engineer advised that additional time was required by the contractor for the replacement of dolphins and piling which were damaged by the operation of the ferries subsequent to the award of the contract. He recommended that the additional extension of time now requested be granted without penalty. The Commission approved the recommendation unanimously.

Walder and Kenworthy, Contract No. 2974 for construction of the Troutdale Grade Separation and the Bristol Overpass on the Columbia River Highway in Multnomah County, requested an extension of time of 30 days from September 15, 1948, to October 15, 1948, within which to complete this job. They alleged that flood conditions and weakening of the Columbia River dike interfered with their operations and would not permit procedure of the work according to pre-arranged schedule. The Engineer

advised that the Army Engineers directed the contractor to cease pile driving operations during the period of high water in the Columbia River because of the possibilities that vibrations incident to such work might endanger the dikes adjacent to the structure. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

P. B. Doherty and Son, Contract No. 2882 for rock production on the Jordan Creek-Rock Creek Section of the I.O.N. Highway in Malheur County requested an extension of time of 324 days from July 31, 1947, to June 19, 1948, in which to complete this job. They alleged that a particularly difficult job they had near Brothers, Oregon, and inclement weather prevented completion of the job within the specified time limit. The Engineer advised that the contractor had been negligent in the prosecution of this contract and that he did not actually start work until April 5, 1948, and as a result the state was put to considerable expense because of lack of maintenance materials in this area. He recommended that the extension of time requested be granted but that the contractor be required to reimburse the state for the extra engineering costs incurred in connection with the job from July 31, 1947, to the date of completion. The Commission unanimously approved the recommendation, including penalty.

R. H. Jones, Contract No. 2906 for remodeling and widening the Reese Creek, Little Butte Creek, and Antelope Creek Bridges on the Crater Lake Highway in Jackson County, requested an additional extension of time of 17 days from June 30, 1948, to July 17, 1948, within which to complete this work. The contractor gave inability to obtain sufficient labor as the reason for noncompletion of the project within the previously extended time limit. The Engineer advised that all work, with the exception of the removal of the contractor's equipment and a small amount of surface finishing on the contract, was completed within the previously extended time (June 30) and that no inconvenience or extra expense has been caused the state. He recommended that the additional extension of time now requested be granted without penalty. A letter from the Public Roads Administration was submitted concurring therein. The Commission approved the recommendation unanimously.

McNutt Bros., Contract No. 2845 for grading the Glendale Junction-Wolf Creek Section of the Pacific Highway, in Douglas and Josephine Counties, requested an additional extension of 107 days from June 15, 1948, to September 30, 1948, within which to complete this job. They alleged that extra work ordered by the Engineer and inclement weather prevented completion of the job within the previously extended time limit. The Engineer advised that the work is completed except for some clearing up of logs and burning of debris, which work should not be performed during the fire season. He recommended that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Gerald Miller, Contract No. 2975 for grading the West Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway in Sherman County, requested an extension of time of 90 days from August 31, 1948, to November 30, 1948, within which to complete this work. He alleged that he was unable to complete the job within the specified time due to inability to secure sufficient help and to additional work ordered by the Engineer. The Engineer advised that the inaccessability of this project from nearby towns made it difficult to secure sufficient help to complete the job within the specified time, also that the contractor was requested to place additional topping not included in the original contract. The state, he said, has not been inconvenienced by the delay, and he recommended that the extension now requested be granted without penalty. The Commission approved the recommendation unanimously.

The State Highway Commission, in passing on contractor's requests for extensions of time within which to complete the contracts as listed above, considered but did not necessarily accept the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

The Engineer reported that Contracts Nos. 2882, 2897, 2904, 2906, 2923, 2924, 2940, 2972, 2983, 3019, 3022, 3024, and 3025 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under consideration the Commission approved and accepted the contracts as reported and by unanimous vote adopted the attached resolution marked EXHIBIT "F", with regard thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection the Commission also considered acceptance of Contract No. 2937 with Rogers Construction Company for grading and surfacing the Bonanza-Poe Valley-Malin Section of the Bonanza-Malin County Road (Federal Aid Secondary Highway) and ordered that final payment for this work be held up until it can be definitely ascertained if the contractor was at fault in connection with the rough condition of the road, as previously reported at this meeting.

The Commission considered an offer from Del R. Beebe to purchase the Excelsior Company buildings in Eugene for $800. The Chief Counsel advised that the property had been appraised at $800 and that it could be rented for $75 a month were the Commission so inclined. He further stated that Mr. Beebe wants the building for storage purposes; moreover, he wants to purchase some Highway Department surplus property nearby on which he plans to maintain a headquarters. After discussion the Commission decided to wreck the building and instructed the Chief Counsel to so inform Mr. Beebe.

The Chief Counsel also reported a proposition from Mr. Beebe concerning the removal of buildings from state highway right of way in Gold Beach. Bids for construction of the Gold Beach Section were to have been received by the Commission on the following day, and it appeared that Mr. Beebe had indicated that he would submit an attractive bid for this work if he were given the contract to move the buildings; otherwise, he will not submit a bid. The Commission decided unanimously not to consider Mr. Beebe's offer on such basis.

The Engineer reported the results of his further inspection during the luncheon period of the Ross-Aglesheimer property at Sylvan which is needed in connection with the proposed traffic interchange at that point. He exhibited a map showing the location of the property and the general plan for the proposed interchange, which, he said, is a culmination of all the plans studied and is the best one that can be arranged. He pointed out that the project contemplates widening on one side of the highway only, and in order to effect a proper improvement, certain key properties must be acquired, including the property under discussion. He also pointed out that the present highway facilities will not carry the increased volume of traffic much longer and recommended that the Commission acquire the key right of way at this time before developments occur and prices rise. Chairman Banfield pointed out that if the Commission authorizes the purchase of the Ross-Aglesheimer property, it will then be necessary also to acquire other key properties, which would require a large expenditure of highway funds. The Commission, he said, had in mind when this matter first came up for discussion the acquisition of only the city- and county-owned property along Canyon Road while it was available but did not have in mind the acquisition of land for an elaborate traffic interchange as is now proposed. He suggested that action on the present purchase be deferred until the Commission has had an opportunity to discuss the project further. Commissioners Schaupp and Chandler approved the suggestion, whereupon the Chief Counsel was instructed to ask the owner of the Ross-Aglesheimer property for additional time for the Commission to study the matter further and make its decision.

The Commission discussed a comprehensive report submitted by the Engineer on the subject of the retirement of Department employees affected during the calendar years 1948 and 1949 in four different classifications. The Engineer pointed out that there are 54 employees in this category, all of whom are physically fit to carry on their duties with the exception of those listed in Classification IV. He recommended that the Commission direct a request to the State Retirement Board for a one-year extension of time for each of the employees in Classification I, II, and III beyond his effective retirement date. As to the employees in Classification IV, the Engineer recommended that the services of each be dispensedwith when he reaches his effective retirement date in 1949. The Commission approved the recommendations unanimously. For further details with regard to this matter, see a copy of the Engineer's written report attached hereto and marked EXHIBIT "R".

The Chief Counsel reported that he has been unable to reach a satisfactory agreement with Mr. Hubert T. Shields and wife for right of way needed in connection with the improvement of the Oregon Coast Highway at Gold Beach in that Mr. Shields is demanding that the state assume the responsibility of removing his house from the premises, which is contrary to the established policy of the Commission. Arrangements with Mr. Shields in other respects, he said, are satisfactory, but it is going to be necessary to condemn the property in view of Mr. Shield's demand with respect to the house moving. He requested authority to institute condemnation proceedings. The Commission approved the request and thereupon by unanimous vote adopted

the attached resolution relative thereto marked EXHIBIT "B-1", which resolution by this reference is made a part hereof with like effect as if copied in full herein.

The Commission considered adoption of a policy with respect to the maintenance of awnings or marquees which extend over city streets that are state highways, and with respect to the maintenance of advertising or other display signs over and above such a city street, The Engineer stated that, in his estimation, awnings or marquees are not objectionable if constructed properly under authority of a permit from the city or town and recommended that all cities and towns be so informed. He also recommended against the granting of permits to maintain signs over and across city streets, because the Public Roads Administration is definitely opposed to such installations, and that the cities and towns be requested not to issue such permits for this reason and as a public safety measure. The Chief Counsel gave as his thought that some cooperative plan might be worked out with the cities in which the best interests of the state and the cities could be served. He was instructed by the Commission to prepare an appropriate resolution for consideration by the Commission at a later date.

The Engineer brought up for discussion a proposed agreement with the West Coast Telephone Company for re-establishing a section of its telephone line on the Elgin-Boswell Ranch Section of the Wallowa Lake Highway. He advised that this line was originally constructed on privately owned property and that it has been necessary to move it to accommodate this highway improvement. He estimated the cost involved at $2,200 and recommended approval of the work as a state obligation. The Commission approved the recommendation unanimously. (The agreement was signed on the following day.)

A request from the Southern Pacific Company for permission to construct a roadway across state-owned property near the railroad overcrossing north of Eugene, in order to provide access to the company's proposed "team track" at this location, was considered by the Commission. The Engineer advised that the area on which the company proposes to build its "team track" is the only available industrial property in Eugene and that it is not probable that the state will have need for its property for several years. He recommended that the company be granted permission to construct the access roadway on the condition that it will enter into an agreement with the Commission providing for relinquishment of the access road at any time that the property is needed for state highway purposes, or for any other reason that it is desirable to eliminate it, and stipulating that left-hand turns onto the highway will not be allowed. The Commission approved the Engineer's recommendation.

The Chief Counsel presented a request from Mr. C. J. Wojohn for the Commission's approval of the transfer to the Monarch Shingle Company of his rights to construct and operate a logging road across Short Sand Beach State Park. He advised that Mr. Wojohn had sold his interests to the Monarch Shingle Company and that it is the recommendation of the State Parks Superintendent, in which he concurs, that the transfer be allowed. The Commission approved the recommendation unanimously.

The Commission had under consideration the matter of approving the erection of four historical markers on state highway right of way as follows:

I.O.N. Highway near Owyhee River Crossing, Malheur County
Silver Creek Crossing of Central Oregon Highway 28 miles west of Burns
Battle Mountain marker to be erected in Battle Mountain State Park on the Pendleton-John Day Highway
Meek marker to be located on Sunset Highway north of Hillsboro

The Engineer advised that the inscriptions to be placed upon the markers all have been approved by the Oregon Historial Society pursuant to established policy. He recommended approval of the inscriptions and the erection of the markers at the places mentioned, at an estimated total cost of $800. The Commission approved the recommendation.

The Commission discussed and upon recommendation of the Engineer and Chief Counsel approved the claim of Mr. H. A. Bell, McMinnville, in the amount of $88.69, representing the cost of a tractor tire which recently was damaged when he drove his tractor over a survey stake placed in his field by state highway employees.

The Commission considered the disposition to be made of portions of old highway routes which no longer are of value for state highway purposes since the highways have been realigned, such portions being described as follows:

Portions of the Anderson Valley Section of the Diamond Valley Secondary Highway No. 441, Harney County

Portions of the Miner Creek-Agate Beach Section of the Oregon Coast Highway, Lincoln County

Portions of the Tutuilla Section of the Pendleton-John Day Highway, Umatilla County

Portions of the Madras-Crooked River Section of The Dalles-California Highway, Jefferson County

Portions of the Circle Bridge-Summit Section of the Oregon Coast Highway, Clatsop County

Portions of the Crabtree-Scio Section of the Albany-Lyons Secondary Highway, Linn County

Portions of the Crane-Princeton Section of the Diamond Valley Secondary Highway, Harney County

Portions of the Fort Hill Section of the Salmon River Highway, Polk County

Portions of the White School-Sherman County Line Section of Sherars Bridge Secondary Highway, Wasco County

Portions of the Lower Klamath Lake Secondary Highway at its junction with The Dalles-California Highway, Klamath County

After due consideration and upon recommendation of the Engineer the Commission by unanimous vote adopted the attached resolutions disposing of such areas, which resolutions are marked EXHIBITS "G", "H", "I", "J", "K", "L", "M", "N", "O", and "P", and by this reference are made a part hereof with like effect as though extended in full herein.

The Commission considered a request from Clifford H. Bown, Portland, for installation of a "stop" light at the intersection of 82nd Ave. and Duke Street, Portland. The Engineer advised that this intersection is one of those included in the plans for a synchronized system of signals on 82nd Ave. which the Commission approved at this meeting on the condition that the City of Portland would pay 50 percent of the cost involved. He recommended that action on the request be deferred pending execution of the agreement with the city. The Commission approved the recommendation.

The Commission confirmed its action taken on August 21, 1948, with respect to a cooperative agreement with the City of Medford providing for installation of traffic signals in that city at an estimated total cost of $12,000, the state's cooperative share to be 50 percent of the total but in no event to exceed the sum of $6,000. (The agreement was signed by the Commission on the following day.)

A petition was presented from residents of Athena requesting the installation of a "blinker" caution light at the intersection of Main and Third Streets in Athena, route of the Oregon-Washington Highway. The Engineer advised that investigation reveals that a flashing light is warranted because the highway makes a right-angle turn at this intersection, and there is considerable traffic congestion. He estimated the cost of such a signal at $300 and recommended the installation at state expense on the condition that the city will pass an ordinance establishing parallel parking in the vicinity of this intersection. The Commission approved the recommendation unanimously.

A petition was considered from the Morrow County Farm Bureau requesting a change in the existing stop signs at the intersection of ORE 207 and ORE 74, in Lexington, so as to require traffic entering the intersection from ORE 74 to stop rather than that from ORE 207. The Engineer advised that if the change is made, according to a traffic count, 396 vehicles on ORE 74 would be stopped to allow 225 vehicles to move freely on ORE 207. He recommended that the request be denied and the stop signs left as they now are. The Commission approved the recommendation.

A petition was presented from residents of the community of Bonneville for establishment of a reduced speed zone on the Upper Columbia River Highway through this district. The Engineer advised that the accident record through the years 1941 to 1948 is less than one accident per mile per year and of the accidents occurring only property damage was caused. He recommended that the request be denied and that in lieu thereof "Look Out for Pedestrians Ahead" signs be installed at appropriate locations. The Commission unanimously approved the recommendation.

The Commission considered adoption of a resolution embodying rules and regulations heretofore promulgated covering the operations of big trucks and busses over state highways under permit, being a substitute for a similar resolution adopted by the Commission on June 29, 1948, and amended on August 9, 1948. The Engineer explained that the resolution as presently prepared provides that vehicles moving under permit shall not exceed a speed of 35 miles per hour on curves, as ordered by the Commission. He recommended adoption of the resolution in its present form. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution marked EXHIBIT "Q", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A resolution was presented from Klamath Pomona Grange urging the Commission to take further measures to protect human life and property from logging trucks operating on highways, county roads, and city streets. The Engineer advised that the conditions to which the resolution refers are already prohibited by Oregon laws and by regulations of the Public Utilities Commissioner, and that everything that the grange is now requesting is now being done, other than possibly more strict enforcement, which is a police function. The Commission ordered that the grange be so informed.

The Commission considered and approved a request from Leonard William Brown and Leslie R. Hoxie of Ukiah, Oregon, that the time limit specified in the permit which the Commission granted them on September 30, 1946, authorizing construction and operation of a logging road across certain state park property in Umatilla County, be extended for one year, until August 1, 1949. The Engineer advised that the Parks Superintendent recommends approval of the request and that he concurs. The Commission approved the recommendation unanimously. (The agreement covering the matter was signed on the following day.)

The Commission approved a request from the Engineer that G.S. Paxson, Bridge Engineer, be permitted to attend, at state expense, committee meetings of the American Concrete Institute in St. Louis on October 30. He estimated that the cost to the state would not exceed $200.

The Commission discussed a date for its next regular meeting and decided to hold such meeting on Wednesday and Thursday, November 3 and 4, 1948, in Portland.

The Commission also decided to hold a special meeting at the town of Wolf Creek on the 1st day of October, following the dedication of the new highway at that place, for consideration of the 1949-50 budget and other matters.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning.

Portland, Oregon
September 14, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following persons present and participating:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
G. W. Neuner, Assistant Counsel
M. H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

MEDICAL SPRINGS SECONDARY HIGHWAY IN BAKER COUNTY

MILES BRIDGE-BAKER SECTION

D. F. McKenzie, Salem	$191,178.00
Roy Norquist, Sweet Home	192,303.16
Newport Construction Co., Portland	196,403.50
Babler Bros., Portland	197,178.50
E. C. Hall Co., Portland	203,583.00
Del R. Beebe Construction Co., Eugene	204,015.50
Erland & Blickle, Vancouver, Wash.	208,624.00

OREGON COAST HIGHWAY IN CURRY COUNTY

GOLD BEACH SECTION

Snook Bros., Corvallis	$ 83,056.00
Porter W. Yett, Portland	96,458.00

COOS BAY-ROSEBURG HIGHWAY IN COOS AND DOUGLAS COUNTIES

ENDICOTT CREEK-MYSTIC CREEK ROCK PRODUCTION PROJECT

Oscar E. Joelson, Eugene*	$ 53,105.00

*Bidder will accept only one project

17917

THREE HIGHWAYS IN KLAMATH COUNTY

KENO-MIDLAND ROCK PRODUCTION PROJECT

F. L. Somers, Klamath Falls	$ 43,400.00
Rogers Construction Co., Portland	45,500.00
Oscar E. Joelson, Eugene*	45,920.00
A. H. Saxton & Sons, Corvallis	48,300.00
N. A. Toole Construction Co., Ontario	49,840.00
M. C. Lininger & Sons, Medford	59,920.00

* Bidder will accept only one project

WARNER SECONDARY HIGHWAY IN LAKE COUNTY

FREMONT JUNCTION-DRAKE CREEK SECTION

D. F. McKenzie, Salem	$ 89,033.50
Babler Bros., Portland	89,326.00
R. O. Dail, Portland	98,876.75

SILVER LAKE MAINTENANCE BUILDING IN LAKE COUNTY

CONSTRUCT BUILDING

	Alternate "A" Frame Constr.	Alternate "B" Block Constr.
R. H. Jones, Hillsboro	$ 12,860.00	$ 14,675.00

HALSEY-SWEET HOME SECONDARY HIGHWAY IN LINN COUNTY

HALSEY-BROWNSVILLE SECTION

Warren Northwest, Inc., Portland	$ 35,800.00
Acme Construction Co., Eugene	37,400.00

PACIFIC HIGHWAY EAST IN LINN AND MARION COUNTIES

STEIWER HILL-ALBANY SECTION

Stoen's Rock & Landscape Co., Seattle, Wash.	$ 19,899.00

OREGON-WASHINGTON HIGHWAY IN UMATILLA COUNTY

MILTON-WASHINGTON STATE LINE SECTION

George E. Corliss, Ontario	$ 8,910.00

September 14, 1948

The Commission by unanimous vote approved the minutes of its meeting held on June 28 and 29, 1948.

The Commission discussed and by unanimous vote confirmed action taken by Chairman Banfield and Commissioner Chandler in Salem on August 17, 1948, approving the following letter regarding changes in previously approved Forest Highway Programs necessitated by increased construction costs and current construction requirements:

486 Oregon General August 10, 1948

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

Under previous programs for Forest Highways in the State of Oregon certain projects and amounts were designated and regularly approved as follows:

Project No., Route, Type of Work and Length	Date Approved	Type Funds	Present Program Amount
28-D, Columbia River Hwy., Grading, Bridge & Railroad Overpass, 3.46 miles	10-30-45	FH FY 1946	$1,000,000
47-C, North Umpqua Hwy., Bridge & Approach Grading, 0.42 mile	10-30-45	For.Serv.10%	20,000
	6-24-47	FH FY 1946	60,195.47
	"	FH FY 1943 & prior	9,804.53
16-A1,B1,D1,M, Tiller-Trail Hwy., Grading & Surfacing, 8.0 miles	11-5-46	FH FY 1947	185,000
		Ore.State Coop.	165,000
27-B3, Ochoco Hwy., Grading, 3.0 miles	11-5-46	FH FY 1947	280,000
35-D3,F2, John Day-Burns Hwy., Grading, Surf. & Bit. Surf., 12.2 miles	11-5-46	FH FY 1947	500,000

In accordance with regulations for administration of Forest Highways, the above projects have been reviewed by the interested agencies and it is herewith recommended that, due to increased construction costs and necessary changes in contemplated construction to accommodate current requirements, the programs be revised to provide additional funds and to effect certain modifications of project designations as follows:

(Cont.)

132119

Project No., Route, Type of Work and Length	Estimated Cost	Type Funds	Revised Program Amount
28-D,Un.1 & 2, Columbia River Hwy., Grading & Railroad Overpass, Unit 1 3.127 miles; Unit 2 0.36 mile	$1,340,000	FH Postwar Ore.State Coop.	$1,315,000 25,000
47-C, North Umpqua Hwy., Bridge & Approach Grading, 0.374 mile	180,000	For.Serv.10% FH Prewar FH Postwar	20,000 9,804.53 150,195.47
16-A1,B1,D1,M, Tiller-Trail Hwy., Grading & Surfacing, 8.0 miles	425,000	FH Postwar Ore.State Coop.	260,000 165,000
27-B3, Ochoco Hwy., Grading, 3.0 miles	325,000	FH Postwar	325,000
35-D3, John Day-Burns Hwy., Grading, Surf. & Bit. Surf., 5.0 miles	250,000	FH Postwar	250,000
35-B3,C2, John Day-Burns Hwy., Grading, Surf. & Bit. Surf., 10 miles	350,000	FH Postwar	350,000

In addition to the above revised projects it is recommended that the following project and amount be approved:

42-A1, Warm Springs Hwy., Surfacing & Bit. Surf., 7.01 miles	385,000	FH Postwar	385,000

Project 28-D, Unit 1 & unit 2, Columbia River Highway. The estimated cost of Unit 1, grading, now underway is $973,000 of which $25,000 is State participation. The estimated cost of 28-D, Unit 2, Dodson railroad overpass and approach grading is $367,000, making a total of $1,315,000 of Forest Highway funds required to complete both units.

Project 47-C, North Umpqua Highway. Increased construction costs and a more recent estimate of cost of the approach grading has indicated a total cost on this project of $180,000, toward which the Forest Service will participate in the amount of $20,000 of 10% funds. These funds finance the purchase of steel for the bridge, which is now on the ground, and the construction of the bridge and approach grading. It is important to complete the construction so as to replace the existing bridge which has been condemned, and to utilize the steel before rust sets in.

Project 16-A1,B1,D1,M, Tiller-Trail Highway and Project 27-B3, Ochoco Highway are unchanged as to designation and type of construction, but present funds are considered inadequate to complete the construction.

(Cont.)

Projects 35-D3 and 35-B3,C2, John Day-Burns Highway. Since the previous programming of Project 35-D3,F2 the State has improved a portion of that project and that portion of the route in Harney County between Crow Flat and Poison Creek on sections B and C now requires reconstruction to accommodate heavy logging traffic.

Project 42-A1, Warm Springs Highway. Under previous program approved December 3, 1947, there was cancelled $230,000 of Prewar funds allocated to Project 42-A1, Grading, 6.9 miles, which project the State has undertaken to complete pending availability of Forest Highway funds. It is now desired that the surfacing of the project be financed from Forest Highway funds.

Very truly yours,

/s/ W. H. Lynch

W. H. LYNCH
Division Engineer

Commissioner

By /s/ Ben R. Chandler
Commissioner

U. S. FOREST SERVICE

By /s/ James Frankland
Regional Forester

Commissioner Schaupp brought up for discussion the matter of maintaining the improved portion of Alameda Ave., Klamath Falls, during construction of the Esplanade Street Undercrossing. He recalled that the Commission at its last meeting agreed to assist the city in maintaining this street during the construction period and to restore it to its original condition when no longer required as a detour. The city, he said, would like to have the section paved, which work the City Engineer estimates will cost $1,200, and is asking the state to approve such a project and to pay 50 percent of the expense. He gave as his thought that the pavement construction would result in less expense to the state than maintaining a gravel surface through the winter season. After discussion the Commission instructed the Engineer to inspect the premises and determine the cost to maintain the present gravel surface. If the cost of such work compares favorably with the estimated cost to pave the section, then the Engineer is authorized to pay to the city the sum of $600 as the state's share on the condition that the city will relieve the state from further responsibility for maintaining the section

under discussion. The matter then is to be covered by appropriate agreement between the city and the state.

The Engineer reported alterations recommended by the U.S. Coast Guard for the ferry "M.R. Chessman", including the flattening and non-skidding of a stairway leading from the lower deck to the middle deck and the installation of another generator to insure sufficient energy to properly maneuver the vessel and keep the cabin and galley lighted during night operation. He also recommended purchase of a spare propellor for emergency use In this connection the Engineer reported an offer from Russel and Shaver Company to sell two 60KVA generators for $1,000 plus the exchange of the two 25KVA generators now installed, and an offer from the Albina Engine and Machine Works to install them for $5,000; however, he pointed out that it would cost about $1,850 to remove and overhaul the two 60KVA generators. The estimated total cost to make the changes and improvements, he said, is $11,500 although this might be reduced if the work were done in Astoria. He recommended approval of the project as outlined. The Commission approved the recommendation unanimously on the condition that additional quotations to do the work are first secured and that an attempt be made to have the generators installed in Astoria so as to avoid extra expense that would accrue if such work were done in Portland.

The Engineer requested authority for an expenditure of $2,910 to construct two small betterment jobs, one of which is estimated to cost $2,310 and consists of re-establishment of right of way fences along the Old Oregon Trail bordering the Oregon State Hospital at Pendleton, and the other, estimated to cost $600, consists of grading and surfacing to provide a car-parking area at the division headquarters in Roseburg. He advised that both projects should be done this year and recommended that they be approved, the funds to be taken from the unallocated reserve in the 1948 minor betterment budget. The Commission approved the recommendation unanimously.

The Secretary presented a letter from the Crown Zellerbach Corporation wherein the Corporation states its unwillingness to pay $10 per M-FBM for snags and down material on two small tracts of state highway property in Clatsop County which the Commission previously offered to sell at that rate, but offers to pay $3 per M-FBM for such material. The Engineer advised that it would be to the state's advantage to get rid of the material and recommended acceptance of the counter offer on the condition that the corporation will clean up the premises to the Commission's satisfaction. The Commission unanimously approved the recommendation.

A petition was presented from the Umatilla County Court requesting that the old route of the Oregon-Washington State Highway from Milton to the Washington state line be designated a state secondary highway. The Commission deferred action on the matter pending a report from the Engineer.

The Chief Counsel reported that, pursuant to instructions previously given him by the Commission, he communicated with the County Courts of the counties contiguous to the Pacific Ocean to ascertain what, if any, portions of the beach fronting on their respective counties should be set aside under

a recent statute as an area in which the operation of motor vehicles and aircraft should be prohibited, and to date has received only one reply. This reply, he said, is from County Judge Felsheim of Coos County who requests that the Bandon beach area be restricted so as to curtail the "hot rod" and motorcycle nuisances. The Commission approved Judge Felsheim's request unanimously and instructed the Chief Counsel to publicize the matter that the people of the other beach counties may be made aware of the county responsibilities and the Commission's action. The Chief Counsel was also instructed to prepare an appropriate resolution with respect to the action taken on Coos County's request. .

The matter of appointing an Assistant Parks Superintendent, first considered on the previous day, again had the attention of the Commission. As the result of discussion the Commission unanimously approved the appointment of Mr. C. H. Armstrong for this position.

In this connection the Engineer presented a recommendation from the State Parks Superintendent, Mr. S. H. Boardman, that the Landscaping Division, which now functions under his supervision, be transferred to the Engineering Department so as to function under the direction of the State Highway Engineer. The reason given by Mr. Boardman for recommending this change, he said, is that about 90 percent of the work of the Landscaping Division is of an engineering nature. He stated his concurrence in the recommendation. The Commission unanimously approved such transfer, effective immediately.

The Commission discussed the Engineer's recommendation for the reclassification of the North Santiam Secondary Highway between Salem and Niagara from a Group II to a Group I highway so as to permit loads of greater length and weight to be transported over it, particularly during construction of the Detroit Dam. The Commission approved the recommendation provided the resolution effecting the change contains a thirty-five mile per hour speed limit restriction for long vehicles on curves. The Chief Counsel was instructed to prepare a form of resolution in conformity therewith.

The Commission also ordered that the "thirty-five-miles-per-hour speed limit on curves" restriction be included in all future special permits issued by this department.

The Commission considered, and upon recommendation of the Chief Counsel, approved a request from the Bonneville Power Administration for permission to construct its power line facilities over and across the following state highways:

1. Pacific Highway at Mile Post 120.04 about one mile north of Eugene
2. Richardson-Eugene Secondary Highway at Mile Post 43.39 between Eugene and Veneta
3. Territorial Secondary Highway at Mile Post 21.32 between Veneta and Crow
4. Siuslaw Highway at Mile Post 14.23 at Mapleton

The Commission considered an authorization of $150,000 of state funds to match a like amount of Federal money appropriated by the Congress to finance improvements to Sprague River Road in Klamath Indian Reservation, in Klamath County. The Engineer recalled that under a previous fund-matching agreement with the U.S. Indian Service, the state appropriated $150,000 for the construction of three bridges now under way, and that the additional money now requested is to match a new Federal appropriation. The Commission deferred action on the matter until the special meeting scheduled to be held in Wolf Creek on October 1, 1948. The Engineer was instructed to report additional facts at that time. (A delegation representing the U.S. Indian Service discussed this matter with the Commission later in the session and was informed that consideration would be given to the project in formulating the next construction program, but the Commission is not prepared to take definite action now.)

Messrs. A. W. Easton and J. D Hanna, city councilmen, Umatilla, Oregon, appeared before the Commission and requested assistance from the state in construction of curbs and gutters along Sixth Street (Columbia River Highway) from the Umatilla River Bridge to Switzler Avenue in Umatilla. Mr. Easton, who acted as spokesman, stated that because of the large increase in population due to activities at McNary Dam, the city is unable to finance alone many public improvements that are urgently needed, such as water supply, sidewalks, curbs, and gutters, so is forced to come to the Highway Commission for help. He filed with the Commission a brief giving statistical information in support of their request. Chairman Banfield pointed out that it has been the policy of the Commission in the past to insist that the local people construct their own sidewalks when curbs are constructed by the state, and also to require the city to adopt an ordinance providing for parallel parking of vehicles. That policy, he said, will have to be adhered to in this instance if the Commission approves the project. The Commission is not in position to act on the matter today, he added, but will consider it for the 1949 construction program if the city meets the requirements. The Engineer and the Chief Counsel were thereupon instructed to contact the city officials and endeavor to work up an arrangement for possible construction of the work in 1949.

A delegation from Warrenton and Astoria, consisting of the following persons, was present regarding the rerouting of the Oregon Coast Highway between Astoria and Warrenton: Thomas T. Chave, City Attorney, Dr. Noel B. Rawls, City Commissioner, E. R. Baldwin, City Manager, and Frank Maize, member, Chamber of Commerce, all of Warrenton; Gordon Sloan and Fred Andrus, members of the Clatsop County Industrial League of Astoria. Mr. Baldwin headed the group. He asked the Commission to consider, in its deliberations concerning the selection of a permanent route for the highway south of Astoria, the adoption of a route adjacent to and paralleling the S.P. & S. Railroad across Youngs Bay. He advised that the railroad company plans to improve its facilities at this point and might be receptive to a cooperative arrangement for the construction of a joint fill across the bay. He declared that the proposed route will be much shorter than the present route through Miles Crossing and that the cost to construct it will compare favorably with the

cost to provide a permanent highway via Miles Crossing, as is contemplated by the Commission. Mr. Baldwin requested a rough survey to determine the cost of such highway section and to ascertain if it will not be a better route than the other. Mr. Sloan requested a public hearing on the subject before any change is made in the rerouting of the highway at this point. Chairman Banfield advised that this is an entirely new project to the Commission, which has given it no consideration whatsoever; however, the Commission will discuss it in its consideration of the overall highway situation in this district. He pointed out that the Commission, on recommendation of former Highway Commissioner M. R. Chessman, already has adopted a permanent route for the highway south of Astoria which follows somewhat the present route via Miles Crossing, and that negotiations for right of way along that route have been authorized, not, however, with the idea in mind of constructing the highway now, but only to make certain that the right of way will be available at some future time when the Commission is ready for construction to proceed, which may be in ten years or more. As to holding a hearing on the subject, Chairman Banfield advised that that could not be done without establishing an undesirable precedent which would require such a hearing in connection with all projects; whereas, it must base its actions on the engineering data furnished by the Engineer, and legal advice from its Chief Counsel. He concluded the discussion by stating that the Commission is committed to the route already adopted, so will not authorize a survey of the route suggested, but will obtain from the Engineer and the Chief Counsel an overall picture of the situation. The Engineer and the Chief Counsel were thereupon instructed to submit such a report.

Mr. John Fitzsimmons, President of the Bandon Chamber of Commerce, appeared before the Commission regarding the building of a bridge over the Coquille River at Bullards. He urged the construction of the bridge on the basis of the Commission's arrangement with Coos County Court that the county and state contribute funds toward the cost on a 50-50 basis, and he declared that the bridge is an immediate necessity. Chairman Banfield advised that the Commission's understanding with the county court was tentative and had to be discarded due to increased costs of construction on state highway projects in the vicinity of Coos Bay and lack of funds to finance the work and take care of its other obligations. He further stated that the Commission is making no promises for the future but will bear the project in mind.

A delegation from Brookings, Oregon, composed of Mrs. M. Byrne, Secretary, Brookings-Harbor Chamber of Commerce; P. J. Lesmeister, member of the Chamber of Commerce; G. G. Goetz, tourist cabin owner; Homer Haggerty, oil company representative; Mrs. Fred Moore, tourist business; and Dr. A. O. Schmitt, appeared before the Commission regarding the establishment of a state park on a small area of beach property owned by Mr. Elmer Bankus, Brookings, at a place known as "Miller's Beach", near Brookings.

Mrs. Byrne headed the group. She advised that Mr. Bankus has renewed his offer to donate the tract to the state for park purposes, and urged the Commission to reconsider its decision reached several months ago not to accept the property. She stressed the importance of the area to the

state as a tourist attraction, and she alleged that it is the only beach in Oregon south of Bandon that is accessible by auto and can be enjoyed by elderly people without walking a long distance over a steep trail to reach it as is the case at Harris Beach State Park nearby. Mrs. Bryne also advised that Mr. Bankus has "fixed up" the road leading to the area and has piped water to it; furthermore, he is willing to deed additional land up to one or one and one-half acres, as the Commission feels is necessary, for proper development of the area as a park. Mrs. Bryne also mentioned the popularity of the beach, stating that it is patronized by large numbers of people who like it because it can be reached by automobile, and advised that Mr. Bankus had found it necessary to close it to public use because he could not afford to take care of it properly. Mrs. Byrne discounted the development of Harris Beach State Park; however, later in the discussion, stated that if this park were made as easily accessible to the public as is the Miller Beach area, it would satisfy their purposes.

Mrs. Moore also spoke for this park. She declared that this beach is a popular one because people can drive to it, and all that is necessary in the way of development is construction of rest rooms. Mr. Haggerty spoke from the tourist standpoint, stating that large numbers of tourists from California stop at his establishment and inquire where the nearest beach is that can be reached by car, and he is forced to refer them to Bandon Beach, 100 miles farther north. If there were a roadway leading from the highway to Harris Beach Park, he said, that would satisfy their group.

Chairman Banfield pointed out that the tract under discussion is very small, containing only 0.2 acre, and that if the state took it over as a state park it would also have to assume the obligation to improve and maintain the roadway leading to it, which would be costly. He also pointed out that the state now owns Harris Beach State Park nearby, a large area where tourists can be better accommodated, and that the Commission already has tentatively approved a considerable expenditure for developments in this park during 1949. The Commission feels, he said, that much more good would be accomplished by spending for the further development of this park the money that would be required to establish and develop the small park that is proposed at Miller Beach, and the Commission is now considering doing that next year. Were the Commission to establish and develop a state park at Miller Beach, he said, it still would have the responsibility of developing and maintaining the existing park at Harris Beach, in which improvements would have to be deferred because of the limited amount of money that the Commission feels should be allocated for work of this nature.

The State Parks Superintendent explained briefly the plans for development of Harris Beach Park. Commissioner Schaupp expressed himself in favor of developing one or the other of the two places under discussion, although he indicated a preference for the development of the Harris Beach area.

The Commission took the entire matter under advisement. Following departure of the group the matter was discussed further but action was again

deferred pending additional information from the Engineer and the Parks Superintendent as to the feasibility and cost to construct a roadway leading from the highway to Harris Beach Park. The Engineer was instructed to investigate the matter and report his findings to the Commission at its special meeting in Wolf Creek on October 1, 1948.

A delegation composed of the following officials of the City of Redmond appeared before the Commission regarding the heretofore proposed one-way street plan for The Dalles-California Highway traffic through Redmond: R. E. Park, City Attorney; Kenneth Munkres, Chairman, Planning Commission; Jack Elliott, Mayor; Gayle Bartel, Member, Planning Commission; Jim Kasserman, Councilman; and John Berning, Street Commissioner. Mr. Park headed the group. He recalled that this plan was first suggested in 1945 and gave as his understanding that a survey of the situation was made in 1947 and a report of the findings submitted to the Commission. He urged the Commission to take early action to provide for such routing, using 6th Street (present route) for southbound traffic and 5th Street for northbound traffic, and to construct needed improvements so the plan can be put into operation in 1949 and the present congestion of traffic relieved. The Engineer recalled briefly the substance of his report on the subject, stating that at the time the report was submitted, necessary improvements were estimated to cost about $65,000. He was instructed by the Commission to bring the report up to date as to cost and feasibility for consideration by the Commission in making its 1949 budget. He was also instructed to contact the city officials to determine if the city will comply with the necessary conditions and regulations. The Commission made it clear that it is making no promise regarding construction but is going to give the matter careful consideration in formulating its 1949 program.

A delegation representing the U.S. Indian Service, consisting of E. Morgan Pryse, Regional Director; R. H. Bitney, Superintendent, Klamath Reservation; H. V. Thoreson, Road Engineer, Klamath Agency; J. G. Cable, Regional Road Engineer; and C. V. Sluyter, Assistant Regional Road Engineer, appeared before the Commission regarding the further improvement of the Sprague River Road in Klamath County. Mr. Cable acted as spokesman. He advised that the last Congress appropriated $150,000 for this road, contingent upon its being matched by an equal amount of state money and that it be spent by the Indian Service on a force account basis. The state match money, he said, may be spent by the state on any basis that the Highway Commission may determine desirable. He urged the Commission to approve an expenditure of $150,000 for this purpose, advising that unless the state money is made available they will have to close down certain work which they now have underway. Following discussion of details the group was informed that the Commission must have more time to study its finances before making its decision but will take definite action one way or the other as soon as possible. The Engineer was thereupon instructed to render a full detailed report on the subject for consideration at the special meeting which is scheduled to be held on October 1, 1948, in Wolf Creek.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

A delegation from Tillamook composed of John Aschim, Mgr., Tillamook Chamber of Commerce; W. Schulmerich, County Commissioner; Charles Ross, President, and Vern Tinerstet, Secretary, Oregon Coast Assoc.; Mel Baldwin, Tillamook Radio Broadcasting Co.; B. Francis, representing First National Bank, and Fred K. Sweet, Tillamook-Portland Auto Freight Co., was present and urged completion of the remaining link in the Wilson River Highway between Glenwood and North Plains. Mr. Aschim headed the group. He recited the history of this highway and urged construction of this section as being particularly necessary to Tillamook County's economic situation. He also said that he has searched the records and can find nothing therein that would indicate that any former Highway Commission ever promised that this section would be built, but, he said, the people of Tillamook County believe they have a legitimate request and want the Highway Commission to give every consideration to the project for construction in its new program. Mr. Aschim also mentioned that at a recent meeting with the Legislative Interim Committee on Highway Problems all of the Tillamook County organizations joined in asking that this Wilson River Highway project be given priority over others, and they were given to understand that that would be done. Chairman Banfield advised that the Commission is not unmindful of this project but the Commission's problem is one of finding funds to finance the work. He also said that the present Commission tries to complete the commitments made by former Commissions but is not able to do so in every instance and in this case a thorough search of the records fails to disclose that any commitment was made. The Wilson River Project, he said, is a desirable one if funds were available to finance it, and the Highway Commission might be in position to include it in the construction program if the three counties concerned were to join in requesting it as the No. 1 project for their shares of the highway revenues. This matter was discussed at further length and as a result the Commission instructed the Engineer to bring up to date his previous report on the subject and to ascertain from the three counties concerned whether or not they are willing to pool their shares of the highway funds to finance this job. Chairman Banfield concluded the discussion by stating that if the counties are willing to pool their highway funds, the Commission will be happy to analyze the project on that basis.

Mr. R. G. Griffis representing Pope and Talbot Co., Portland, was present and requested permission to operate logging trucks across the Willamette Highway, at grade, near Oakridge on Saturday afternoons. In the discussion following it was brought out that the operation of this crossing is a matter now before the Public Utilities Commissioner and concerning which the Commissioner has scheduled a hearing for October 1, 1948. In view of this information the Commission deferred action pending the outcome of the hearing.

The matter of allowing loggers to truck-haul logs over state highways on Saturday afternoons was considered by the Commission. It was the Commission's thought that, inasmuch as it has been decided to notify log haulers of the possibility that certain state highways would be subject to reduced load limits during the winter months, it would only be fair to allow them to haul on Saturday afternoons so long as the weather permits and no undue hazard is created, particularly so in view of the fact that the season of vacation travel

has past, so as to give them an opportunity to stockpile a supply of logs against the time when highways might be closed to hauling. Commissioner Chandler moved that all log haulers be permitted to truck-haul logs on Saturday afternoons beginning September 18, 1948, and continuing until conditions necessitate discontinuance of the practice. Commissioner Schaupp seconded the motion, which passed unanimously. The Secretary was instructed immediately to notify the State Police of the action taken and to recommend to the Public Utilities Commissioner the adoption of a ruling to that effect.

The Commission discussed with the Engineer bids received at the morning session and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows, the Commission's action with respect to each job being by unanimous vote:

"Miles Bridge-Baker Section of the Medical Springs Secondary Highway in Baker County; 6.85 miles of grading and surfacing and 13.7 miles of oiling D. F. McKenzie, Salem, submitted the low bid for this job at $191,178. The second low bid was submitted by Roy Norquist, Sweet Home, at $192,303.16. Five higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder when certain right of way matters have been disposed of.

"Gold Beach Section of the Oregon Coast Highway in Curry County; 0.37 mile of grading and paving. Snook Bros., Corvallis, submitted the low bid for this job at $83,056. The second low and only other bid was received from Porter W. Yett, Portland, at $96,458. The Commission has awarded this contract to the low bidder, Snook Bros.

"Endicott Creek-Mystic Creek Rock Production Project on the Coos Bay-Roseburg Highway in Coos and Douglas Counties. Furnish approximately 10,120 cubic yards of crushed rock in stockpiles. Oscar E. Joelson, Eugene, submitted the only bid for this work at $53,105. The Commission has awarded the contract to Mr. Joelson.

"Keno-Midland Rock Production on three state highways in Klamath County. Furnish approximately 14,000 cubic yards of crushed rock in stockpiles. F. L. Somers, Klamath Falls, submitted the low bid for this work at $43,400. The second low bid was submitted by Rogers Construction Company, Portland, at $45,500. Four higher bids were received. The Commission has awarded this contract to the low bidder, F. L. Somers.

"Fremont Junction-Drake Creek Section of the Warner Secondary Highway in Lake County; 21.19 miles of oiling and furnish approximately 6,350 cubic yards of crushed rock in stockpiles. D. F. McKenzie, Salem, submitted the low bid for this job at $89,033.50. The second low bid was submitted by Babler Bros., Portland, at $89,326. One higher bid was received. The Commission has awarded this contract to the low bidder, D. F. McKenzie.

"Silver Lake Maintenance Building in Lake County. Construct 32' x 64' maintenance building. R. H. Jones, Hillsboro, submitted the only bid received on this job at $12,860 for Alternate "A", frame construction, and $14,675 for Alternate "B", concrete block construction. The Commission has awarded this contract to R. H. Jones on the basis of his bid for Alternate "A".

"Halsey-Brownsville Section Resurfacing Project on the Halsey-Sweet Home Secondary Highway in Linn County; 4.00 miles of asphaltic concrete resurfacing. Warren Northwest, Inc., Portland, submitted the low bid for this job at $35,800. The only other bid received was that of Acme Construction Co., Eugene, at $37,400. The Commission has awarded this contract to the low bidder, Warren Northwest, Inc.

"Stoiver Hill-Albany Section of the Pacific Highway East in Linn and Marion Counties; 9.93 miles of roadside improvement. Stoen's Rock and Landscape Co., Seattle, submitted the only bid for this job at $19,899. The Commission has rejected this bid as being too high.

"Milton-Washington State Line Section of the Oregon-Washington Highway in Umatilla County; 3.36 miles of topsoiling and seeding. George E. Corliss, Ontario, submitted the only bid for this work at $8,910. The Commission has awarded the contract to Mr. Corliss."

The Commission considered and signed the following agreements:

Agreement with John O. and Vida M. Melville, covering property which the state is acquiring in Gold Beach in connection with the proposed improvement of the Oregon Coast Highway in Gold Beach.

Deed conveying unto U.S. Reclamation Service 0.58 acre of land in state-owned borrow pit adjacent to Warm Springs Highway, Jefferson County.

Agreement with Southern Pacific Company, covering construction of overcrossing over company's railroad tracks at Delmar, Coos County.

Agreement with West Coast Telephone Co. re re-establishing a section of its telephone line on the Elgin-Boswell Ranch Section of the Wallowa Lake Highway, Union County.

Agreement with City of Medford covering installation of traffic signals in the City of Medford.

Agreement with Leonard William Brown and Leslie R. Hoxie, extending period of previous agreement for construction and operation of a logging road across a state park.

Agreement with U.S. Army Engineers re bank protection of Santiam River near Jefferson.

Agreement with U.S. Navy re right of way needed for Tillamook-Pleasant Valley Section of the Oregon Coast Highway, Tillamook County.

Agreement with P.R.A. covering maintenance by the state of 15.467-mile section of Santiam Highway from June 18, 1948, to June 17, 1949.

Agreement with Robert Fromm covering grazing of sheep in Humbug Mountain State Park, Curry County, until June 14, 1949.

Agreement with Bonneville Power Administration relative to four crossings of state highways on the company's Eugene-Mapleton line in Lane County.

Agreement with City of Portland relative to the division of costs of the S.W. Jefferson and S.W. Columbia Street improvements between S.W Harbor Drive and S.W. Canyon Road.

Project Agreements covering the following:

Johns-Wolf Creek Section, Pacific Highway
Carlton-Chehalem County Road
Barbur Boulevard-Boones Ferry Road Section, W. Portland-Hubbard Highway
Elgin-Boswell Ranch Section, Wallowa Lake Highway
Middle Grove-Pudding River Section, Silverton Road
Hood River-Odell Creek Section, Odell Highway
Monument-Hamilton Section, Kimberley-Long Creek Highway
Halfway-Carson Section, Halfway-Cornucopia Highway
Sandy River Bridge, Columbia River Highway
Troutdale Overcrossing, Columbia River Highway

There being no further business to come before the Commission, the meeting adjourned at 3:15 p.m.

Chairman

State Highway Engineer

Commissioner

Commissioner

September 14, 1948

EXHIBITS "A" THROUGH "R"

Minutes of September 13 and 14, 1948

EXHIBIT "A"

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVANS GULCH SECTION, SULLIVANS GULCH HIGHWAY

14812- Adams, Wayne and Bertha Adams Right of Way Option expires January 28, 1949				
	1 lot (50x85 app) 4,150 sq.ft.	$ 800.00	$ 800.00	Berry

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the highway known and designated as the Oregon Coast Highway, otherwise identified as State Highway No. 9 and U. S. Route No. 101, is a state highway and therefore under the jurisdiction and control of the State Highway Commission; and

WHEREAS, said highway as now located passes through the town of Gold Beach and it is the purpose of the Highway Commission to widen and more permanently improve said section of said highway, for which purpose it is necessary that the real property described on the attached sheet be acquired;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property described on the attached sheet, which parcel is owned by Hubert T. Shields and Nell J. Shields, husband and wife, is necessary for the proper widening, reconstruction, and other improvement of said

(Cont.)

SEP 13 1948

EXHIBIT "B-1" (Cont.)

highway from Engineer's Station 3+40 on the north through Engineer's Station 0+00 to Engineer's Station 15+90 on the south. (*)

2. That the State Highway Engineer pursuant to instructions heretofore given by the Commission has made or caused to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer submitted to the Legal Department necessary and adequate description of said real property, which said description has been made available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminant domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners, and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel, and G. W. Neuner, as Assistant Counsel for the Oregon State Highway Commission, are and each of them is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in their joint or individual judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners

5. That this resolution be entered in full in the minutes and records of this Commission as of the thirteenth day of September, 1948.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the parcel of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 117, under the heading "Real Property Condemnation Resolutions" and said description by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to-wit:

Real property owned by Alma E. Geddes, Joseph A. Geddes and Margaret Katherine Geddes, which property is located in the South Half of Section 14, Township 8 South, Range 40 East, W. M., and in the West half of the West half of Section 24, Township 8 South, Range 40 East, W. M., Baker County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1

(Cont.)

SEP 13 1948

and 2, and is further identified in the records of the Highway Commission as file R 13831, and which property is being acquired for right of way purposes in connection with the revised location of the Medical Springs Highway. (*)

Real property owned by Martha H. Bond, which property is located in the East half of the Northwest quarter of Section 24, Township 8 South, Range 40 East, W. M., Baker County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 13834A, and which property is being acquired for right of way purposes in connection with the revised location of the Medical Springs Highway.(*)

Real property owned by Lee Savely, which property is located in the Southeast quarter of the Southeast quarter of Section 16, Township 8 South, Range 40 East, W. M., Baker County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 13824, and which property is being acquired for right of way purposes in connection with the revised location of the Medical Springs Highway.(*)

Real property owned by Lee Savely, which property is located in the South half of the Southeast quarter of Section 16, Township 8 South, Range 40 East, W M., Baker County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 13824, and which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the Medical Springs Highway.(*)

Real property owned by Oscar Knick and Frances Knick, husband and wife, which property is located in Government Lot 3 of Section 3, Township 14 South, Range 9 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 14763, and which property is being acquired for the purpose of a hauling road for the transporting of roadbuilding materials in connection with the Alsea Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

EXHIBIT "B-2" (Cont.)

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above-described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the state, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the thirteenth day of September, 1948.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 118, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

Minutes of September 13 and 14, 1948

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Hines	$1,357.80
Mitchell	439.23
Shaniko	110.31

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Hines - Conley Avenue W., Saginaw Avenue N., West Circle, Pettibone Ave., N Roanoke Ave., N. Quincy Ave., Hanley Blvd. E., Barnes Ave. S., Newport Ave. N., Bennett Ave. W.
Mitchell - Wilson Street, Hill Street, Folstom Alley, Rosenbaum Street, High Street
Shaniko - 5th Street, 6th Street, "D" Street, "E" Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above-named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the thirteenth day of September, 1948

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make complete and final surveys of the permanent location of the Upper and Lower Lookingglass Creek Bridges on the Coos Bay-Roseburg Highway, in Douglas County, and in connection therewith to prepare maps showing the location of said bridges and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the above-mentioned bridges, together with the maps, which for identification purposes bear the map file Nos. 6B-28-15 and 3B-12-8, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said bridges are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of thirteenth day of September, 1948.

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2882, with P. B. Doherty & Son, for furnishing crushed material in stockpiles on the Jordan Creek-Rock Creek Section of the I.O.N. Highway in Malheur County; completed June 19, 1948.

Contract No. 2897, with Warren Northwest, Inc., for re-grading and paving on the Milwaukie-Estacada Section of the Clackamas Secondary Highway in Clackamas County; completed June 10, 1948.

Contract No. 2904, with E. C. Hall Co., for grading, paving and bituminous macadam surfacing on the Milton-Washington State Line Section of the Oregon-Washington Highway in Umatilla County; completed August 30, 1948.

Contract No. 2906, with R. H. Jones, for construction of Reese Creek, Little Butte Creek, and Antelope Creek Bridges on the Crater Lake Highway, in Jackson County; completed July 17, 1948.

Contract No. 2923, with Rogers Construction Co., for re-grading and oil mat surfacing on the East Diamond Lake Junction-Lobert Section of The Dalles-California Highway, in Klamath County; completed July 31, 1948.

Contract No. 2924, with Parker-Schram Co., for pavement widening on the Parkrose (82nd Ave.-99th Ave.) Section of the Columbia River (Sandy Blvd.) Highway in Multnomah County; completed June 15, 1948.

Contract No. 2940, with M. L. & C. R. O'Neil, for grading and bituminous macadam surfacing on the Juniper Butte-Crooked River Section of The Dalles-California Highway in Jefferson County; completed July 24, 1948.

EXHIBIT "C"

Minutes of September 13 and 14, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Diamond Valley Highway No. 441 known as the Anderson Valley Section in Harney County, the northerly terminus of which is at Highway Engineer's Station 0+00 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 106+60 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Harney County and the Highway Commission have entered into an agreement under date of June 4, 1947, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Diamond Valley Highway was completed on July 15, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 4+00 and a point 30 feet West of the northeast corner of Section 3, Township 27 South, Range 33 East, W. M., and which area is identified and shown colored in red on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdicition thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Harney County, and said road shall thereafter be maintained by the County for public use. (*)

2. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new

(Cont.)

right of way, and which portion lies between a point 30 feet west of the northeast corner of Section 3, Township 27 South, Range 33 East, W. M., and Highway Engineer's Station 94+36 of the reconstructed highway, and which area is identified and shown colored in brown on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Harney County and may be vacated or kept by the County for such public use as the County Court of said County may determine. (*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Harney County a duly certified copy thereof, and shall file with the Clerk of Harney County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. (*)

EXHIBIT "I"

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Pendleton-John Day Highway known as the Tutuila Creek Section in Umatilla County, the northerly terminus of which is at Highway Engineer's Station 196+30.1 of the relocated line and the southerly terminus of which is at Highway Engineer's Station 140+32 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for highway or other public purposes; and

WHEREAS, Umatilla County and the Highway Commission have entered into an agreement under date of December 5, 1946, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Pendleton-John Day Highway was completed on July 2, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 168+10 and Highway Engineer's Station 182+50 of the reconstructed highway, and which area is identified and shown colored in red on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Umatilla County, and said road shall thereafter be maintained by the County for public use. (*)

2. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new

right of way, and which portion lies between Highway Engineer's Station 182+65 and Highway Engineer's Station 188+40 and between Highway Engineer's Station 192+80 and Highway Engineer's Station 195+50 of the reconstructed highway, and which areas are identified and shown colored in brown on map attached hereto and marked "Exhibit A", are hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Umatilla County and may be vacated or kept by the County for such public use as the County Court of said County may determine. (*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Umatilla County a duly certified copy thereof, and shall file with the Clerk of Umatilla County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. SEP 13 1948

EXHIBIT "J"

Minutes of September 13 and 14, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of The Dalles-California Highway known as the Madras-Crooked River Section in Jefferson County, the northerly terminus of which is at Highway Engineer's Station 16+38 of the relocated line and the southerly terminus of which is at Highway Engineer's Station 926+05.34 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for highway purposes; and

WHEREAS, Jefferson County and the Highway Commission have entered into an agreement under date of November 5, 1947, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of The Dalles-California Highway was completed on July 24, 1948, and highway traffic is now routed over said section; and

WHEREAS, that portion of the former route of The Dalles-California Highway which lies between Highway Engineer's Station 16+38 and Highway Engineer's Station 563+30 of the reconstructed line, and otherwise designated as Unit "A" in the aforesaid agreement, and shown colored in yellow on the accompanying map marked "Exhibit A", was designated and made the Culver Secondary State Highway No. 361 by resolution of this Commission on December 29, 1947; and (*)

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the remaining section or unit of the right of way of said highway which is affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 565+40 and Highway Engineer's Station 922+30 of the reconstructed highway, and which area is identified and shown colored in red, and otherwise designated as Unit "B", on map attached hereto and marked "Exhibit A" is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned

(Cont.)

EXHIBIT "J" (Cont.)

section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Jefferson County, and said road shall thereafter be maintained by the County for public use. (*)

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Jeferson County a duly certified copy thereof, and shall file with the Clerk of Jefferson County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. (*)

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Oregon Coast Highway known as the Circle Bridge-Summit Section in Clatsop County, the northerly terminus of which is at Highway Engineer's Station 97+47.15 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 165+00 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation; and

WHEREAS, the State Highway Commission and the County Court of Clatsop County entered into an agreement dated the 22nd day of July, 1946, in respect to the areas or sections of the right of way affected by the said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That based upon the report of the State Highway Engineer, which report is on file in the office of the Oregon State Highway Commission in Salem, Oregon, the Commission does hereby find and so declare that there are no persons living on and no community served by the sections or units of said highway, which sections and units are defined and described in paragraph 2 hereof.

2. That the sections or areas of the old right of way which lie between Highway Engineer's Station 100+60 and Highway Engineer's Station 110+00 and between Highway Engineer's Station 113+00 and Highway Engineer's Station 116+30 and between Highway Engineer's Station 120+30 and Highway Engineer's Station 130+60 and between Highway Engineer's Station 133+10 and Highway Engineer's Station 138+00 and between Highway Engineer's Station 140+30 and Highway Engineer's Station 153+00 of the reconstructed highway, and are otherwise shown and identified colored in brown on said "Exhibit A", are hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Clatsop County to be used for county purposes or vacated as the County Court of Clatsop County may determine. (*)

(Cont.)

SEP 13 1948

EXHIBIT "K" (Cont.)

3. That the area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. That the boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such monuments shall thereafter be maintained in place.

5. That this resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Judge of Clatsop County a duly certified copy thereof, and shall file with the Clerk of Clatsop County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 144, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

SEP 13 1948

EXHIBIT "L"

Minutes of September 13 and 14, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Crabtree-Lyons Highway known as the Crabtree-Scio Section in Linn County, the northerly terminus of which is at Highway Engineer's Station 505+00 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 326+30 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes, and other sections or units must be maintained for public highway purposes; and

WHEREAS Linn County and the State Highway Commission heretofore, to-wit: On the tenth day of November, 1947, entered into an agreement covering sections or units of said highway which are to be maintained by the County as county roads; and

WHEREAS, the contract for the construction of the relocated section of the Crabtree-Lyons Secondary Highway was completed on June 3, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission by this resolution to record the completion of said highway and call into operation the provisions of said County-State road agreement;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the sections or areas of the old right of way which lie between Highway Engineer's Station 350+50 and Highway Engineer's Station 358+30 and between Highway Engineer's Station 375+00 and Highway Engineer's Station 382+00 and between Highway Engineer's Station 472+00 and Highway Engineer's Station 480+15 of the reconstructed highway, and are otherwise shown and identified colored in brown on said "Exhibit A", are hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said sections may be assumed and exercised by the County Court of Linn County and, under the terms of said County-State agreement, may be vacated as the County may determine, except that the section between Highway Engineer's Station 350+50 and Highway Engineer's Station 358+30 may not be vacated until the County builds a new connection to the highway from the east end of the Hungry Hill Road. (*)

(Cont.)

SEP 13 1948

EXHIBIT "L" (Cont.)

2. That the area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Linn County a duly certified copy thereof, and shall file with the Clerk of Linn County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover, or permit them to revert to the owners of the abutting property, as the County Court may determine. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 166, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

SEP 13 1948

EXHIBIT "M"

Minutes of September 13 and 14, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Diamond Valley Highway known as the Crane-Princeton Section in Harney County, the northerly terminus of which is at Highway Engineer's Station 0+00 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 420+40 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Harney County and the State Highway Commission have entered into an agreement dated the 16th day of September, 1947, relating to the use and jurisdiction of the abandoned section; and

WHEREAS, the contract for the construction of this relocated section of the Diamond Valley Highway was completed on July 7, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, which portion lies between Highway Engineer's Station 139+00 and Highway Engineer's Station 219+54 of the reconstructed highway and between Highway Engineer's Station 219+60 and Highway Engineer's Station 346+00, and which areas are identified and shown colored in red on said map attached hereto, are hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a county road under the jurisdiction of the county court of Harney County pursuant to the provisions of said State-County agreement. (*)

2. The sections or areas of the old right of way which lie between Highway Engineer's Station 352+00 and Highway Engineer's Station 385+00 of the reconstructed highway, and are otherwise shown and identified colored in

(Cont.)

SEP 13 1948

brown on said "Exhibit A", are hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Harney County for county road purposes. (*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Judge of Harney County a duly certified copy thereof, and shall file with the Clerk of Harney County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red and brown on the map attached hereto and marked "Exhibit A". (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 161, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "N"

Minutes of September 13 and 14, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Salmon River Highway known as the Fort Hill Section in Polk County, the westerly terminus of which is at Highway Engineer's Station 31+73.02 of the relocated line and the easterly terminus of which is at Highway Engineer's Station 71+24 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for highway or other public purposes; and

WHEREAS, Polk County and the Commission have entered into an agreement under date of June 1, 1946, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Salmon River Highway has been completed and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 41+75 and Highway Engineer's Station 64+50 of the reconstructed highway, and which area is identified and shown colored in red on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Polk County, and said road shall thereafter be maintained by the County for public use. (*)

2. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the

(Cont.)

SEP 13 1948

new right of way, and which portion lies between Highway Engineer's Station 35+10 and Highway Engineer's Station 42+20 of the reconstructed highway, and which area is identified and shown colored in brown on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Polk County and may be vacated or kept by the County for such public use as the County Court of said County may determine. (*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Polk County a duly certified copy thereof, and shall file with the Clerk of Polk County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and thus make effective the said State-County agreement dated June 1, 1946. EXHIBIT "O"

Minutes of September 13 and 14, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Sherar's Bridge Highway known as the White School-Sherman County Line Section in Wasco County, the westerly terminus of which is at Highway Engineer's Station 246+67.7 of the reconstructed line and the easterly terminus of which is at Highway Engineer's Station 69+55 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes. and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation; and

WHEREAS, based on information and recommendations given in a report made by the Commission's Engineer, the Commission has found and does hereby declare that the sections or units of said old right of way described in paragraph 1 hereof are no longer needed for highway purposes for the reason that there are no persons living on said sections and no communities to be served thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the sections or areas of the old right of way which lie between Highway Engineer's Station 256+40, through equation 369+66.5 equals 0+05.5, and Highway Engineer's Station 69+55 of the reconstructed highway, and are otherwise shown and identified colored in brown on said "Exhibit A", are hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Wasco County to be used for county purposes or vacated as the County Court of Wasco County may determine. (*)

2. That the area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes,

(Cont.)

SEP 13 1948

therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Wasco County a duly certified copy thereof, and shall file with the Clerk of Wasco County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover, or permit them to revert to the owners of the abutting property, as the County Court may determine. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 192, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "P"

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Lower Klamath Secondary Highway No. 423, which begins at The Dalles-California Highway on the new route and ends on the Klamath Falls-Malin Highway; and

WHEREAS, by reason of the relocation of said section of said highway, a portion or unit of the right of way of the highway as formerly located has been eliminated from the boundaries of the new location, which eliminated section or area is no longer needed for highway or other public purposes; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the area and section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section or area of the old right of way which lies between Engineer's Station 0+70 and Engineer's Station 7+18 of the former location of the Lower Klamath Secondary Highway, and which lies outside of the areas of the right of way of the reconstructed line, and which area is otherwise shown and identified colored in brown on the map attached hereto, which map is marked "Exhibit A", and by this reference is made a part of this resolution, is hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Klamath County and may be retained by said county or vacated as the County Court of said county may determine. (*)

2. That the area shown colored in green on said "Exhibit A" includes right of way and other property acquired for the relocation and reconstruction of the said highway. In connection with all of the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for right of way and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such purposes and uses, therefore, the Commission does hereby declare and order that possession of and title to all the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

EXHIBIT "P" (Cont.)

3. That with respect to the sections or units of said right of way described in paragraph 1 above, the Commission has found and determined, based on the report of its Engineer, that there are no persons living on said abandoned section and no community now served by the highway construction thereon, and, therefore, none of said sections or units needs be maintained for public highway purposes.

4. That this resolution shall be entered in the minutes and records of the Commission as of the thirteenth day of September, 1948, and the Secretary hereby is instructed to mail a certified copy thereof to the following: The County Clerk of Klamath County, County Judge of Klamath County, and to W. H. Lynch, Division Engineer, Public Roads Administration.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 193, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "Q"

Minutes of September 13 and 14, 1948

RESOLUTION

WHEREAS, complaints have been and are being made to the Highway Commission charging drivers of busses and trucks using the public highways of the State with a violation of the law which requires that a driver of a motor truck or bus when traveling upon a highway outside of a business or residence district shall not follow another motor truck within three hundred feet unless when overtaking or passing such other motor vehicle; and

WHEREAS, it is the opinion of the Highway Commission, based on experience, that such violations cause inconvenience and subject other users of the highway to unnecessary traffic hazards; and

WHEREAS, the Commission's Counsel has advised that Section 115-332, O. C. L. A., is applicable to the drivers of motor trucks and motor busses, whether such drivers operate under permits issued by the Highway Commission, or under the authorization of the Secretary of State or the Public Utilities Commissioner; and

WHEREAS, the Commission's Counsel further advised that when permits are issued pursuant to the provisions of Chapter 156, Oregon Laws, 1947, or issued by the Commission under any other law of the State of Oregon for the movement of busses and/or trucks over the public highways of the State, the Commission may include, if in its judgment public policy will thereby be safeguarded in addition to other provisions and conditions surrounding and controlling such permit, a condition and requirement that a distance or clearance of five hundred feet be maintained between vehicles, except when overtaking or passing another vehicle; and

WHEREAS, the Commission on the 29th day of June, 1948, adopted and recorded in its minutes a resolution by which the Commission found, declared, and ordered that all permits issued pursuant to the provisions of Chapter 156, Oregon Laws, 1947, shall include in addition to other requirements and conditions a provision requiring the driver of such vehicles to maintain a clearance of five hundred feet between his vehicle and another truck or bus, and the Commission in said resolution imposed other conditions and requirements; and

WHEREAS, on the 9th day of August, 1948, the Commission, by resolutio duly adopted and recorded in its minutes, amended said original resolution by making the terms thereof applicable not only to permits issued under the provisions of Chapter 156, Oregon Laws, 1947, but applicable as well to permits issued by the Commission pursuant to any law of the State of Oregon; and

WHEREAS, it is now found to be in public interest to further amend said original resolution but it is deemed advisable by the Commission to

(Cont.)

SEP 13 1948

EXHIBIT "Q" (Cont.)

re-adopt said original resolution and incorporate therein all original provisions and all amendatory matter;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. That with respect to all permits hereafter issued pursuant to the provisions of Chapter 156, Oregon Laws, 1947, and permits issued by the Commission pursuant to any other law of the State of Oregon, there shall be included in and made a part of said permit, in addition to the conditions now set out therein, the following:

a. That the driver of the vehicle, in connection with which the permit is issued, shall at all times maintain a clearance of five hundred feet between his vehicle and another truck or bus, except when overtaking or passing such other truck or bus.

b. That the driver of such vehicle shall at all times keep on his side of the highway center line, except when passing another vehicle.

c. That the driver of said vehicle shall at all times operate his vehicle at a reasonable speed, giving due consideration to existing conditions, provided that at no time shall the driver of such vehicle operate the same on curves at a speed in excess of thirty-five miles per hour.

d. That a violation of any of the foregoing conditions shall operate to terminate the permit.

2. That the Secretary of the Commission be and he hereby is instructed to call to the attention of the Superintendent of State Police the fact that complaints are being made to the Commission, charging frequent violations of the provisions of Section 115-332, O. C. L. A.

3. That the Commission's Counsel be and hereby is instructed to communicate with the head office of the bus association or management, and with the head office of the truck association or management, and call to the attention of such officials the complaints which are being made to the Commission charging violations of the said three hundred-foot clearance requirement, and request of such officials appropriate action to the end that public welfare may be given due consideration.

4. That the resolution adopted June 29, 1948, and the amendment thereof adopted August 9, 1948, hereby are rescinded, but it hereby is ordered that all permits issued pursuant to said resolution or issued pursuant to said amendment hereby are ratified and affirmed and hereby are deemed issued pursuant to the provisions of and within the meaning of and purpose of this resolution.

5. That this resolution be entered in the minutes and records of the Commission as of the 13th day of September, 1948.

EXHIBIT "R"

Minutes of September 13 and 14, 1948

REPORT

September 13, 1948

Oregon State Highway Commission

Gentlemen:

I am submitting herewith a comprehensive report on the subject of the retirement of department employees affected during the calendar years 1948 and 1949, under four separate classifications.

All recommendations of the respective supervisors and my concurrence are based on the physical fitness and ability of each employee to perform all his duties.

Class I

The three employees comprising this group are a part of the list submitted to and acted upon by the Highway Commission at the April, 1948 meeting. The retention of these members was not recommended at that time. All three are physically fit; therefore, an extension of one year's time from their effective retirement date is recommended.

Action by the Commission at the September meeting will be required to retain these members.

Class II

One extension beyond the retirement date has been approved for all members of this list by the Highway Commission and the Retirement Board. However, in the case of three members, you will note that the effective dates of these extensions do not coincide.

I have the recommendation of each supervisor for the retention of all members of this group through 1949, and herewith recommend a second extension of time until January 1, 1950.

Class III

This list comprises all employees who will reach retirement age during the year 1949 for whom a one-year extension of time beyond their effective retirement date should be requested of the Retirement Board.

(Cont.)

SEP 13 1948

EXHIBIT "R" (Cont.)

However, I recommend that the Commission approve at this time the retention of these members through 1949 only, and that all extensions granted by the Retirement Board beyond January 1, 1950, be reviewed and referred to the Commission in December 1949.

Class IV

This group of employees will reach retirement age during 1949, at the effective dates shown. On the basis of physical fitness to perform their respective duties, their retention is not recommended.

Very truly yours,

R. H. Baldock
State Highway Engineer

Encl.

SEP 13 1948

Wolf Creek, Oregon
October 1, 1948

The State Highway Commission met in special session at 1:45 p.m. in Wolf Creek Tavern for disposal of several matters that were taken under advisement at its meeting on September 13 and 14. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

The Engineer reported the results of inquiries relative to the proposed exchange of generators and alterations to the stairways on the ferry, "M. R. Chessman". He stated that two Astoria concerns - Astoria Marine Construction Company and Pacific Machine and Blacksmith Company - were asked to submit bids, but neither evidenced much interest and refused to give a bonafide bid without detailed plans and specifications, although the Astoria Marine Construction Company did submit an estimate of cost, subject to revision, indicating that the generators could be changed for $4,950 and the stairways revised for $3,300. The Engineer pointed out that the Albina Engine and Machine Works, Inc., Portland, which built the ferry, previously offered to do the work for $5,000 and $2,000, respectively, but if they did it, the state would have to pay an additional $500 to transport the ferry to Portland and return it to Astoria. He recommended, in view of the fact that the Astoria concerns are not particularly interested in the job and that the estimate received from the Astoria Marine Construction Company is not definite, that the quotation of the Albina Engine and Machine Works, Inc., as reported at the September meeting of the Commission, be accepted and that the Chief Counsel be authorized to prepare an appropriate agreement with this company covering the matter. Following careful consideration and discussion the Commission approved the recommendation unanimously, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

The Engineer also reported on the matter of erecting a storage building at the shop headquarters in Salem for temporary use as an office to relieve the existing congestion in the State Office Building pending construction of the Highway Department's own building in the State Capitol Group. He presented a redesign of the structure, 40' x 120' in dimension, based on two specifications, one involving frame construction and the other, concrete blocks. He advised that he has obtained quotations from three building contractors in Salem to construct it, as follows:

	Frame Construction	Concrete block construction
Bidder No. 1	$33,600	$37,600
Bidder No. 2	29,208	29,188
Bidder No. 3	30,000	32,400

The Engineer recalled that his previous estimate to erect the building, reported at the September meeting, was $36,000, and he advised that the building as now designed will take care of requirements for about two years if the Commission will approve the finishing of some of the extra space that is not included in the present estimate.

It was the thought of the Commission that the building should be provided and that it would be less expensive to provide the extra space now, rather than later on. Following discussion, Commissioner Schaupp moved adoption of the design, including the finishing of the extra space, and that the Engineer be authorized to advertise for alternate bids for erection of the building, based on either frame or concrete block construction. The motion was seconded by Commissioner Chandler and carried unanimously.

The Commission discussed a suggestion from the Engineer with respect to the financing of certain projects contained in the first Three Year Post-war Federal Aid Program but which are not yet contracted. The Engineer advised that the original estimated total cost of all the projects in this program was $35,000,000, of which amount the state was obligated to pay $14,000,000 and the Federal Government, $21,000,000; however, it now appears that the total cost will be about $39,000,000, an overrun of $4,000,000 which the state will have to assume. To absorb this expense and to pay the regular obligations during the next two years, he said, will draw heavily on expected income and present surplus and will result in delaying for several months work contemplated in the 1950 program. The situation can be relieved, he said, by transferring a number of uncontracted projects from the 1946-48 Federal Aid Program to the 1950 Program, thus releasing a part of the $4,000,000 excess state funds now tied up in the 1946-48 program, and making them available to match Federal money in the new program. He recommended such transfer of the following projects to take up a portion ($3,053,000) of the overrun:

PROJECTS IN 1946-48 FEDERAL AID PROGRAM

PROPOSED FOR TRANSFER TO 1950-51 PROGRAM

Project	Total Cost	Federal Share	
		As Programmed	As Proposed
Primary Federal Aid Projects:			
Durkee Undercorssing	$ 105,000	$ 91,337	$ 95,000*
Sandy Creek Bridge (Coos Co.)	62,000	23,000	36,000
Bridges over N. Fork Coquille and Lookingglass Creek	268,000	60,000	155,000
Tillamook-Pleasant Valley	803,000	343,000	465,000
Newberg-McMinnville	495,000	286,000	290,000
	$1,733,000	$ 803,337	$1,041,000

(Cont.)

Project	Total Cost	Federal Share As Programmed	Federal Share As Proposed
Secondary Federal Aid Projects:			
Bridge at Myrtle Point	$ 240,000	$ 79,000	$ 142,000
Sheeley Bridge-Sunset Camp	180,000	83,000	106,000
	$ 420,000	$ 162,000	$ 248,000
Urban Federal Aid Projects:			
Portion of Tillamook St.-Steel Bridge Project	$ 900,000	$ 400,000	$ 530,000
Grand Totals	$3,053,000	$1,365,337	$1,819,000

* Federal Government cooperates on grade separation projects to a maximum 100%

September 29, 1948

In the discussion of this matter the Engineer explained that the transfer is a bookkeeping proposition only and is necessary to enable the Commission to fulfill its promises with respect to certain work contemplated in the first Three Year Postwar Program. He also said that the Federal monies released in the 1946-48 Program by this transfer will be taken up by modification of the project agreements of a sufficient number of projects remaining in that program.

The Commission by unanimous vote approved the transfer of projects as recommended by the Engineer and authorized him to do what is necessary to secure the consent of the Public Roads Administration thereto.

In this connection the Commission discussed briefly matters pertaining to its new construction program but deferred action thereon until its next regular meeting on November 3, 1948. The Engineer was instructed to prepare an outline of eligible projects for consideration of the Commission at that time. The Commission decided unanimously to make that a three-day meeting and to discuss the program on the third day, Friday, November 5, 1948.

The matter of authorizing an expenditure of $150,000 state highway funds in conjunction with an expenditure of a like amount of Federal Indian money for additional improvements on the Sprague River Road on Klamath Indian Reservation had the attention of the Commission.

The Engineer recalled that the Federal money was made available on condition that the state would match it with state money, and he pointed out

October 1, 1948

that the Federal money must be expended on a force account basis, but the state can spend its money either by force account or by contract. Inspection of work now being done by the Indian Service, he said, reveals that they are doing a fine job, and he recommended approval of an authorization of $150,000 to further the project. (For details supporting the Engineer's remarks, see copy of his letter to the Commission dated September 15, 1948, in general files.)

Commissioner Schaupp pointed out that the Sprague River project is not in any construction program and is not a priority project. He expressed dissatisfaction with spending $150,000 of state highway money on the road if it would handicap or take funds away from any other project in the Klamath Falls District; however, he signified his approval if any excess state funds are available to allot to the job.

Chairman Banfield gave as his thought that the Commission's primary concern is whether or not the road is of advantage to the traveling public and, if it is, then the state, in a spirit of cooperation, might be justified in contributing toward its improvement.

Commissioner Chandler suggested that it might be well to join with the Government in this undertaking if by so doing the state is not obligated for future expenditure on the road.

The Engineer suggested, if the Commission approves this project, that the matter be covered by appropriate agreement with the U.S. Indian Service, as was done in a previous instance, and that there be included in the agreement a clause whereby the Indians will not transport over the road logs or any other commodity in violation of the statutory requirements, as they are now doing on the Warm Springs Highway through Warm Springs Reservation.

Messrs. Raymond H. Bitney, Superintendent, Klamath Indian Reservation; Harlan V. Thoreson, Road Engineer; and John G. Cable, Regional Road Engineer, representing the U.S. Indian Service, were present and joined in the discussion. They expressed themselves heartily in favor of the clause mentioned by the State Highway Engineer and agreed to see what can be done to correct the situation as it exists on the Warm Springs Highway.

In further discussion that followed, Chairman Banfield declared that the Highway Commission does not look with favor on spending state funds for the improvement of this road unless it secures 100 percent cooperation from the Indian Service in the matter of hauling over it. He also said that he is not in favor of taking money away from any other job to finance the work. Commissioner Schaupp stated his approval of the allocation on such basis. He thereupon moved that the Commission authorize an expenditure of $150,000 for this purpose on the basis that the money will not be taken from any other job and that the agreement covering the matter shall contain a clause with respect to the regulation of traffic. The motion was seconded by Commissioner Chandler and carried unanimously. The Commission ordered a form of agreement prepared in conformity with the action taken.

The Engineer reported that the investigations to determine the feasibility and cost to construct a roadway from the Oregon Coast Highway to Harris Beach State Park near Brookings are not completed, so he is unable to report on the matter at this meeting as previously instructed by the Commission. He assured the Commission that this report will be submitted at the meeting scheduled for November 3, 1948.

The Commission discussed, approved, and signed a budget covering the activities of the State Highway Department for the two-year period ending June 30, 1951, as prepared by the Engineer and the Chief Accountant. This budget is required by law to be submitted to the State Budget Director for use in preparing the general budget comprising all state activities for presentation to the legislature and is not to be confused with the State Highway Commission's own calendar year budget which the Commission plans to discuss at its meeting on November 3, 1948.

The Commission also discussed, approved, and signed the following papers:

Agreement with the City of Bend and Deschutes County covering relocation of Powell Butte Secondary Highway around Bend Municipal Airport.

Quit claim deed conveying unto Wilson Title and Abstract Co. a portion of Dahlia Street in Eldorado Heights Addition to Klamath Falls.

Project agreements with the Public Roads Administration covering the following projects:

Crooked River Section, Ochoco Highway
LostCreek-Lowell Section, Willamette Highway
Three Rivers Bridge Section, Oregon Coast Highway
Fir Grove Section, Independence-Albany County Road
Salmon River Bridge Section, Oregon Coast Highway

The meeting adjourned at 3:00 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

October 1, 1948

Portland, Oregon
November 3, 1948

The State Highway Commission convened in regular session at 9:00 a.m. in Room 715 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
G. W. Neuner, Assistant Counsel
M. H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

The minutes of the Commission meetings held on August 9 and 10, September 13 and 14, and October 1, 1948, were approved unanimously.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

1. Offer of Mrs. M. J. E. Wolsiffer to deed to the state as a state park, nine acres of land on the Alsea Highway at the east limits of Waldport: The Parks Superintendent advised that the proposed gift is located on a steep hillside, that it would be hard to develop, and that the state already has a park nearby. He recommended that the offer be declined. The Commission approved the recommendation.

2. Offer of a Mr. Goodin, Cannon Beach, Oregon, to give to the state an old historic cannon from the ship, "Snark", which is located on his property at Cannon Beach. The Parks Superintendent advised that Mr. Goodin wants the cannon re-established near its present location, about 5 miles south of Cannon Beach, and on the state highway right of way. He estimated the cost to prepare such site and to place the cannon thereon at $5,000 and gave as his thought that an expenditure of such amount is not justified. He recommended acceptance of the offer only on the condition that Mr. Goodin will permit it to be placed either in Short Sand Beach State Park or Ecola State Park. The Commission approved the recommendation.

3. Roadway into Harris Beach State Park: The Parks Superintendent advised that the Engineer has made a reconnaissance survey of three possible routes for such roadway and has prepared an estimate of cost to build each as follows: Route 1, length, 2100 feet, estimated cost $12,160; Route 2, length, 1140 feet, estimated cost, $9,210; Route 3, length, 3000 feet, estimated cost $20,400. He referred to the Engineer's written report to the Commission on the subject, wherein the Engineer recommends adoption of Route 2, costing $9,210, which includes provision for parking 120 cars (see copy of Engineer's report in general files for details) and advised that he concurs in the recommendation with the understanding that the road will be so constructed that cars cannot be driven down to the beach. Following considerable discussion, motion was made

by Commissioner Chandler that the recommendation be approved and the Engineer be authorized to proceed with construction of the roadway. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

4. Renewal of lease to Henry Zorn for use of 70 acres in Champoeg State Park: The Parks Superintendent recommended a one-year extension of the present lease at the old rate of $5 per acre. In support thereof, he advised that it is to the state's advantage to permit the use of the property for farm purposes in order to keep down obnoxious growth of weeds and brush. The Commission approved the recommendation unanimously.

5. Letter from the Federation of Western Outdoor Clubs commending the Highway Commission on preservation of wayside strips and parks: The Commission noted the letter and ordered it filed.

6. Procedure and action to be taken against persons who deposit debris on the beach: The State Parks Superintendent advised that this matter arises from complaints received from people of Cannon Beach who state that quantities of debris are being shoved on the beach area by someone operating a bull-dozer on adjacent land. The Chief Counsel advised that the law, as enacted by the 1947 Legislature, makes it a criminal offense for anyone to dump garbage on the beach, and provides a penalty therefor, and it is a matter for the Commission to decide whether or not to follow out the statute by causing arrests, or follow some program of publicity. The Commission has the authority to swear out a complaint in cases of dumping debris on the beach, if it wants to, he said, and those cases will be prosecuted. In the duscussion following, it was brought out that the Commission has been delegated responsibility for the beaches but does not have police power to control them fully, in view of which it might be appropriate to ask the legislature either to remove the beaches from the Highway Commission's jurisdiction or to give it the necessary police power. As a result of the discussion, Commissioner Schaupp moved that the Counsel be authorized to prosecute, if necessary, anyone who deposits debris upon the beaches. Commissioner Chandler seconded the motion which carried unanimously.

7. 1948 Acquisition Budget Project: The Parks Superintendent recommended, because of difficulties, that no further efforts be made to secure juniper waysides along state highways in Central Oregon; also, that the area adjacent to Cove State Park which he had been unable to purchase be acquired on a lease basis at $10 annually. The Commission took no action on these recommendations.

The Parks Superintendent also brought up for discussion the acquisition of a park area along the coast in Curry County. He advised that his 1949 budget contains an item of $50,000 for this purpose but that is not sufficient to acquire the area desired so will have to be augmented by additional funds. He suggested that he be allowed to carry over into 1949 the unused portion of his 1948 budget allowance for park purchase, amounting to $80,000, which would give him a total of $130,000 to apply on the acquisition of this area. In the discussion the Chief Counsel advised that owners

of property concerned do not want to sell unless they are given definite assurance that the highway will be rerouted along the coast line; moreover, indications are that a considerable portion of the property will have to be condemned. He pointed out that if right of way along the new route is purchased now it will tie the hands of future highway commissions, for which reason he suggested, if the Commission is inclined to acquire the property that that needed for park use be purchased separately from the right of way and that no options be closed until all condemnation suits are settled. He estimated the cost to acquire this property at approximately $150,000 and questioned the advisability of the expenditure at this time. He also questioned the legality of the expenditure if the area is not now reached by a highway or is not in a location where a highway will be built at some future time. Commissioner Schaupp gave as his thought that the Commission should not obligate future highway commissions to build a highway in any certain location, but if the options can be obtained without incurring such an obligation, then he favored an attempt to secure them. Commissioner Chandler expressed himself similarily.

After further discussion the Commission unanimously authorized the Chief Counsel and the Parks Superintendent to investigate the matter further and to secure such options as they can on a park basis only without any commitments as to construction or location of a new highway. The Commission indicated a favorable attitude with respect to acquiring the area if it can be purchased at reasonable cost.

8. Status of proposed Champoeg Museum Building: The Parks Superintendent advised that he has heard nothing from the architects who are designing this structure and he is fearful that the plans are being unnecessarily delayed. The Commission instructed the Engineer and the Parks Superintendent to ask the architects for a report on the progress they are making on the plans for this building and how soon they expect to finish them.

9. Purchase of Park Equipment: The Commission approved a request from the Parks Superintendent to purchase two power chain saws, estimated to cost $500 each, for use in connection with removal of dead timber in state parks.

10. Disposition of residence building in Shore Acres State Park: The Parks Superintendent advised that this building is in bad state of repair and that it would cost approximately $30,000 to make it serviceable. He questioned the justification for such expenditure because, in his estimation, the building adds nothing to the park. He also stated that the Commission assumed no obligation to maintain the building when it accepted the park property. After discussion, the Commission unanimously authorized the Parks Superintendent to raze the building.

The Commission had under discussion matters pertaining to the acquisition of right of way for the proposed state highway in Sullivan's Gulch, Portland. The attached resolution with regard thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp and duly seconded by Commissioner Chandler.

Mr. J. W. DeSouza, Assistant Attorney, presented a list of properties that are needed for various highway improvements throughout the state together with options which have been obtained. Following careful consideration of each item in the list and the amount of the individual options, the Commission approved the options and authorized acquisition of each tract on the basis thereof. The attached resolution relating thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

(*) In connection with the options for the Sullivans Gulch Section, the Commission instructed the Assistant Attorney not to press the purchase of properties other than those portions needed in the contemplated stage construction program and that the purchase of property should be confined as much as possible to Unit Two which the Engineer advised will be the first unit to be constructed.

(**) In connection with the options on the Vista Avenue-Multnomah County line Section of the Sunset Highway, the Assistant Attorney advised that the total estimated cost of property to be purchased is $215,000. The Engineer advised that in his opinion, it would be necessary to construct this highway to a six lane facility within possibly five years, and he recommended, in view thereof, acquisition of needed right of way now. The Commission approved the recommendation unanimously.

In connection with its consideration of real property matters, the Commission also discussed the following:

1. Acquisition of right of way for the proposed improvement of the Northeast Union Avenue-Portland Section of the Pacific Highway East. Action on this matter was deferred pending a more complete presentation of the project. The Commission instructed the Assistant Attorney to bring the matter to the attention of the Commission at the next meeting if all of the options have been obtained by that time.

2. Acquisition of right of way for the proposed improvement of the St. Joe-Lafayette Section, the Newberg-Dundee Section, and the Newberg-Dayton Junction Section of the Pacific Highway West. The Engineer advised that the P.R.A. requirements are that right of way must be acquired sufficient for a four-lane highway. It was his thought, in view thereof and because of the high cost of securing extra right of way along the present route of this highway, that it would be a better plan to consider the building of an entirely new highway that would by-pass both Newberg and McMinnville, and to maintain the present highway for local traffic only. He exhibited a map showing the route of such new highway which he said would be needed within ten years and construction of which should be started within the next five years. He recommended that approval of the options now before the Commission for the above sections be deferred until a good reconnaissance survey has been made of

the proposed new route and his report on the subject submitted to the Commission. The Commission approved the recommendation and authorized the Engineer to conduct such reconnaissance survey, a report on which is to be presented to the Commission at its next meeting if possible.

3. Acquisition of right of way for the proposed realignment of the Youngs Bay Bridge-Lewis and Clark River Section of the Oregon Coast Highway. The Engineer advised that some study has been made of the alternate route suggested by the delegation from Warrenton at the previous meeting, which reveals that such route has a good possibility of saving considerable money. In view thereof, he suggested that action on the options now before the Commission for right of way along the original route be deferred until he has assembled full information, which he estimated would take about two weeks' time. The Commission approved the suggestion and so ordered.

Mr. J. W. DeSouza, Assistant Attorney, reported that, as instructed at a previous Commission meeting, he has investigated plans for fire insurance coverage on buildings acquired by the Commission in connection with right of way transactions. He outlined briefly a plan offered by Mr. Wadsworth of the Oregon Association of Insurance Agents, which provides that as a house or other insurable property is purchased by the state the insurance automatically goes into effect, and is automatically cancelled when the property is disposed of. The premium, he said, is to be paid for a full three year period upon the first amount of insurance that is put in force and is then adjusted every sixty days on an inventory basis, so the state pays only for service rendered. He pointed out that under this plan the property does not have to be occupied in order to be insurable. The Chief Counsel advised that the state would be fully protected under this plan, and he recommended that it be approved. The Commission approved the recommendation unanimously.

The Assistant Attorney requested authority to institute condemnation proceedings to acquire right of way for the Tillamook-Donaldson Creek Section of the Wilson River Highway across property owned by a Mr. O. W. Kinneman and recommended an offer of $1,000 in connection therewith. Following careful consideration the Commission authorized condemnation of the tract at the recommended offer and thereupon by unanimous vote adopted the attached resolution, marked EXHIBIT "B", with respect thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission confirmed authority previously requested by the Chief Counsel to insert in the minutes of the meeting held on September 13, 1948, a resolution authorizing condemnation of Hubert T. Shields' property in Gold Beach.

The Commission, upon the recommendation of the Chief Counsel, approved an agreement with G. G. Kerns and wife covering the lease of a stockpile site on the Green Springs Highway near Klamath Falls. (The agreement

was signed on the following day.)

A request from Joseph F. Fracasso to maintain a building encroachment on Barbur Boulevard in the City of Portland was considered by the Commission. The Assistant Engineer advised that, through a mistake in reestablishing the building, it now encroaches about nine feet upon the dedicated street. The City of Portland, he stated, is willing to give Mr. Fracasso a revocable permit to maintain the building in such location until such time as the property is needed for highway purposes, but does not want to grant the permit until the matter had been approved by the Highway Commission. The Engineer advised that the property will not be needed for highway purposes for a long time and, in his estimation, the granting of a revocable permit would not be objectionable. The Commission approved the granting of such a permit by the city on the condition that the interests of the state are fully protected. The matter was referred to the Chief Counsel to handle.

The Assistant Attorney, Mr. DeSouza, recalled that the Commission, at its previous meeting, rejected an offer from Mr. M. A. Work to purchase a frame dwelling house formerly owned by C. C. Smith on the Oregon Coast Highway south of Cannon Beach, it being the thought of the Commission at that time that it would be to the State's advantage to rent the property. He advised that the house is now vacant and in his estimation would be difficult to rent; further that Mr. Work has submitted another offer of $250.00 for the house and has agreed to move it off the state's property at his own expense. He recommended acceptance of this offer. The Commission approved the recommendation unanimously.

The Assistant Attorney advised that under the terms of an old settlement with a Mr. O. J. Perry, for right of way needed for the Siletz Bay-Newport Section of the Oregon Coast Highway, the state agreed to remodel Mr. Perry's building which was estimated to cost about $2,000. Recently, he said, Mr. Perry has decided to go into a different type of business and in view thereof has stated a willingness to perform the remodeling work at his own expense if the state will pave a strip in front of his place at an estimated cost of $200. He gave as his thought that this is a good proposition and recommended approval of the arrangement on the condition that Mr. Perry waives all claims against the state. The Commission approved the recommendation unanimously.

The Commission discussed and approved the granting of permits for use of excess state property during the calendar year 1949.

The Assistant Attorney presented a request from the County Court of Jackson County that the Commission deed to the county for stock pile purposes 4.55 acres of land situate adjacent to the Tolo Access Road. He advised that the land is not needed for state highway purposes and that Jackson County in the past has been very cooperative. He recommended that the property be deeded to the county without charge. The Commission approved the recommendation unanimously. (The deed was signed on the following day.)

The matter of deeding a parcel of land to the City of Pendleton which

is needed by the city in connection with its proposed sewage disposal plant was considered by the Commission. The Chief Counsel advised that it would be proper for the Commission to deed the property to the city, but he has not been able to reach an agreement with the city as to the form of deed of conveyance. He recommended that action on the matter be deferred until both parties are agreed as to that feature. The Commission approved the recommendation.

The Commission considered and approved deeding to Edward Sullivan 49.85 acres of land situate on the Baker-Unity Highway near Hereford, Baker County, for the sum of $74.78, upon recommendations of the Engineer and the Chief Counsel who advised that the property was purchased from Mr. Sullivan in 1946 as a gravel source, but did not prove satisfactory for such use so is of no value to the state.

The matter of deeding Block 69, Lancaster Addition, in the City of Condon, to the Condon Rod and Gun Club was considered by the Commission. The Assistant Attorney advised that the property is not needed for highway purposes; moreover, the state's title to the property is not secure. In addition, taxes and interest in the amounts of $142.15 and $131.77, respectively, have accrued against the property. He recommended that the property be deeded to the Rod and Gun Club by quitclaim deed for the consideration of $25. In the discussion that followed the point was brought out that it would perhaps be better to deed the property back to the city or the county, whichever conveyed it to the state, for transfer to the Gun Club. The Commission instructed the Chief Counsel to investigate this angle and report later.

The sale to the Medford Corporation of 0.16 acre of land situate at the junction of the Pacific Highway and the Crater Lake Highway in Medford was considered by the Commission. The Assistant Attorney advised that this property is part of a tract that was originally purchased from the corporation in 1943, at the rate of $1,250 per acre, to accommodate a change in an irrigation ditch. He further advised that this small parcel is not needed for such purpose and recommended that it be sold back to the corporation for $200, which is at the same rate the state paid for it, with restricted access to the highway. The Engineer concurred in this recommendation. The Commission unanimously approved the recommendation.

The Commission considered the sale of a 160-square-foot area of land in Sheridan to Mr. H. W. Burchell for the sum of $35. The Assistant Attorney advised that the land is not needed for highway purposes and that Mr. Burchell has built an outside stairway on adjoining property which overhangs the state's property. He recommended acceptance of Mr. Burchell's offer. The Engineer and Chief Counsel concurred. The Commission approved the recommendation uanenimously.

The Commission considered the sale of 4.22 acres of land formerly used as a gravel pit at the intersection of Highway 207 and Highway 30, the Boardman-Stanfield cutoff, in Umatilla County. The Assistant Attorney advised that the gravel supply on this property has been exhausted and that it has

no further value to the state for highway purposes. He recommended that it be advertised for sale with complete access restriction to the Boardman-Stanfield Highway, leaving access only on a side road. The Engineer and the Chief Counsel concurred. The Commission approved the recommendation unanimously.

The Commission considered transferring to Umatilla County 0.74 acre of state land situate on the old route of the Old Oregon Trail between Umatilla and Hermiston, being approximately 1.25 mile south of the town of Umatilla and formerly used as a stockpile site. In the discussion it was pointed out that the old road is now being maintained as a county road, so this stockpile site probably should be returned to the county subject to the condition that the state can remove the materials stock piled thereon. The Engineer recommended that this be done. The Commission approved the recommendation subject to the condition mentioned by the Engineer.

The advisibility of selling state-owned property in Lots 7 and 8 of Block 7, Foster's Addition to Sheridan, was considered by the Commission. The Engineer advised that future construction plans provide for carrying traffic through Sheridan by means of two one way streets, on one of which the property in question fronts. It was his thought that the sale of the property should be deferred until the improvement of this street is effected in order to get the maximum value out of the lots, and he so recommended. The Commission approved the recommendation.

An exchange of properties with J. F. Modlin adjoining the Salmon River Highway in Lincoln County was considered by the Commission. The Assistant Attorney advised that this property was originally purchased as a gravel pit but is no longer of value as such because the gravel supply is exhausted; also, that Mr. Modlin who owns the surrounding property, wants to acquire this area so he can fence it in with his other property. In exchange for this property, he said, Mr. Modlin has offered to deed to the state a strip of land lying south of the river, adjacent to the highway, about 675 feet long and varying in width from 15 to 80 feet. He recommended acceptance of the offer. The Commission approved the recommendation.

The Assistant Counsel, Mr. Neuner, brought up for discussion a request from the Consolidated Timber Company for a second extension of time, until April 15, 1949, to allow for removal of timber from land deeded to the state by the company along the Wilson River Highway in 1940. The Assistant Counsel advised that due to the war, strikes, and other circumstances beyond the company's control, the company had been unable to complete removal within the specified time, hence its request for additional time. He stated that the company has been very reasonable and equitable in its dealings with the Commission and recommended, in view thereof, approval of the company's request. The Commission approved the recommendation unanimously. (An amended agreement covering the matter was signed on the following day.)

The Assistant Counsel also brought up for discussion settlement with J. B. Moore for a gravel pit and hauling road used in connection with the construction of the Johns Ranch-Glendale Section of the Pacific Highway, in

Douglas County. He advised that he has had some rather extended negotiations with Mr. Moore concerning this matter and that the property has been under condemnation for some time, but the property owner has now agreed to accept $624.50 for the use of the pit and haul road during the construction period and to give the state a release for any damage caused by use of the haul road and gravel pit, if the state would forego its condemnation of the pit and haul road. Acceptance of this settlement, he said, will dispose of the controversy concerning the gravel pit and hauling road, but there still remains to be concluded the settlement for right of way which is now under condemnation. He recommended approval of the settlement for this gravel pit and hauling road. The Engineer and the Chief Counsel concurred. The Commission approved the recommendation unanimously. (An agreement covering the matter was signed on the following day.)

The Engineer reported that for some time past he has been unable to hire a section foreman for the Shaniko Section due to the absence of housing facilities in Shaniko. He suggested that it would be advisable for the state to purchase a building of its own that could be rented to the foreman, and advised that a suitable one containing five rooms and bath is available for not to exceed $3,000, including 2.62 acres of land conveniently located for a future equipment storage shed. This building is 25 years old, he said, and will need repairs, which are estimated to cost about $500, making a total outlay of about $3,500. He recommended approval of the purchase of both building and site and expenditure of $500 for repairs, the authorization to be taken from the unallocated balance of the 1948 Budget for the "Construction of Maintenance Stations". The Commission approved the recommendation by unanimous vote.

The Commission discussed a letter from Ethel M. Walker, Newport, Oregon, suggesting that it would be advisable for the state to purchase now, the right of way that will be needed for the permanent location of the Corvallis-Newport Highway between Toledo and Newport, due to the fact that this district is rapidly being built up with homes and will not be available later. The Commission decided unanimously not to authorize the purchase of right of way at this time because of lack of funds to finance it and because there are so many other projects throughout the state with much higher priority status.

The Commission accepted an offer from the Morrison-Knudsen Company, highway contractors, to deed to the state a one-acre addition to the state's rock quarry at mile post 2.86 on the Pendleton-John Day Highway, as consideration for the privilege of taking rock from a state-owned quarry located at mile post 18.45 on the old highway between Stanfield and Pendleton, for a period of ten years. Such action was taken upon recommendation of the Engineer, who advised that there is very little contemplated use for this quarry and that the exchange is to the advantage of the state. (The lease was signed on the following day.)

The Engineer requested authority for the Legal Department to negotiate options for right of way that will be needed for certain projects

that are to be considered by the Commission in its 1949-1950 construction program. He advised that right of way descriptions have been prepared and right of way agents are now available to assign to the work. He recommended approval of the request in order to expedite the acquisition of right of way and to avoid delays that might result in contracting the projects if the Commission approves them. He particularly requested authority to negotiate options on the following projects:

Dodson-Bonneville Section of the Columbia River Highway in Multnomah County.

Squally Hook-Quinton Section, Columbia River Highway in Gilliam County.

North Unit, Enterprise-Forest Boundary Section, Enterprise-Lewiston Highway in Wallowa County.

Sherars Grade-Buckley Section, Sherars Bridge Secondary Highway in Sherman County.

Three Mile Lane Secondary Highway in Yamhill County.

The Commission approved the request unanimously.

The Commission considered a request from the U. S. Coast Guard to lease three small parcels of land on the Upper Columbia River Highway on which to maintain navigation aids. The Engineer advised that the lease had been requested from the present date to June 30, 1949, with the provision that it may be renewed yearly but not longer than the year 1955. The maintenance of these navigation aids, he states, would in no way interfere with the state's use of the property and he recommended that the leases be granted as requested without cost. The Commission approved the recommendation. (The leases were signed on the following day.)

The Engineer presented for the Commission's consideration the suggestion that authority be granted to secure options for right of way for an extension of the Klamath Falls-Malin Highway from Station 144 near the Esplanade undercrossing to the intersection of South Sixth Street, in Klamath Falls. He advised that the right of way is estimated to cost $100,000, based on a right of way width of 220 feet, and advised further that construction of the project is not included in any approved program but it seems desirable that the right of way be acquired now before it is encumbered by building construction. He recommended that the Legal Department be granted authority to negotiate right of way options now. The Commission approved the recommendation on the condition that no commitments whatsoever shall be made as to construction of the highway.

The Commission considered an offer from the State Land Board to lease to the Commission for quarry purposes 47.27 acres on the Central Oregon Highway near Millican, in Deschutes County. The Chief Counsel advised that the

Land Board does not want to sell the property but will lease it on a royalty basis of five cents per cubic yard for material taken therefrom. The Engineer stated that the property is valueless except for quarry purposes and, in his estimation, the payment of royalty as proposed is an excessive charge. He pointed out that another site is available at a greater distance from the highway but it will cost the state more for hauling from that source than from the Land Board's property. The Commission deferred its decision until later.

The Chief Counsel brought up for discussion a request from Mr. Harvey Wells, Portland, for permission to maintain an advertising sign on the Columbia River Highway at the entrance to Jantzen Beach Park. The Engineer advised that what Mr. Wells really wants is for the state to deed back to him a small portion of the land that he previously deeded to the state as right of way so he can put up his sign on private property; moreover, Mr. Wells considers that his proposed sign is not an advertising sign but is purely for directional purposes, and if that is the case, it might be possible to work up some sort of an agreement with Mr. Wells. The Commission instructed the Engineer to discuss the matter further with Mr. Wells and ascertain the facts and report back to the Commission.

The Commission considered and approved an agreement with the City of Gold Beach providing for the acquisition of right of way and for the moving and reestablishment of buildings and structures in connection with reconstruction of the Oregon Coast Highway through the city of Gold Beach. (The agreement was signed on the following day.)

A proposed exchange of properties with Pope and Talbot, Inc., near Oakridge was considered by the Commission. The Assistant Counsel advised that the company seeks to exchange 13.6 acres that it owns for 2.21 acres of state-owned land in Oakridge that was acquired for use as a plant site in connection with a nearby gravel pit operation. Subsequent to the purchase by the state of the 2.21 acres, he said, the surrounding area was developed into a residentail district, and the company now offers, if the state will deed this area to the company and relinquish its rights to a hauling road, to convey to the state the 13.6 acre tract which is entirely away from any development. He recommended approval of the exchange. The Engineer advised that the state will receive full value in the exchange and he concurred in the recommendation. The Commission approved the recommendation unanimously. (A deed conveying the 2.21 acres to the company was signed on the following day.)

A request was presented from David Chase, Medford, for permission to maintain a radio repeater station on highway property acquired from the State Land Board for quarry purposes on Little Butte Creek Secondary Highway in Jackson County. The Chief Counsel questioned the advisibility of granting Mr. Chase this privilege because of the possibility that the state could not escape liability if the radio station were damaged by blasting or other operations in the quarry. The Engineer recommended against granting the request because very likely it would eventually prevent the use of the property for the purpose for which it was acquired. The Commission decided unanimously not

to grant Mr. Chase the privilege requested and so ordered.

The Commission considered the adoption of a system of "throughways" pursuant to authority granted by the 1947 Legislature. The Engineer presented a list of highways, with maps, that he suggested be included in such system, and advised that each highway mentioned therein has been carefully investigated as to compliance with the Oregon Law. He recommended the adoption of a resolution establishing such system of "throughways". The Chief Counsel concurred therein. After due consideration the Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported on the cost to construct the uncompleted section of the Wilson River Highway between North Plains and Glenwood as instructed by the Commission at the previous meeting. He advised that, from information assembled from a reconnaisance survey of the section, it probably will cost about $1,350,000 for construction and an additional expenditure of $150,000 for right of way. This section, he stated, is 12.78 miles in length and will provide a saving of 2.73 miles over the route now used. The Commission, in discussing this matter, expressed the thought that whereas the route eventually will be constructed, no time can be set now for performance of the work. The Engineer was granted authority to make a location survey of the proposed route, and the Chief Counsel was authorized to negotiate options for the right of way.

The Commission considered a request from V. M. McCormack, contractor, Pendleton, for permission to construct a retaining wall on state highway right of way in front of a motor court he is building for Mr. C. M. Dove, in Pendleton. The Engineer advised that Mr. McCormack had already started construction of the wall, but the work was stopped pending a decision by the Commission whether or not he would be allowed to use the right of way for this purpose. He recommended against granting this privilege. The Commission deferred action on the matter pending Mr. McCormack's personal appearance before the Commission on the following day. (See additional minute entry ahead for Commission's refusal to permit this encroachment.)

The meeting recessed at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

The Engineer presented a report on the cost to construct curbs and to widen the pavement along the Columbia River Highway in the town of Umatilla, as instructed at the previous meeting. He estimated the cost to construct concrete curbs at $18,000 and the cost to widen the existing pavement to the full width between the curbs at $37,000 -- a total of $55,000. He recalled that the city council previously stated its willingness to construct sidewalks at city expense if the state would build the curbs, and advised that the project is a desirable one because the city is growing rapidly as the result of activities incident to construction of McNary Dam. The

Engineer pointed out that this project is not included in the suggested program for 1949 and 1950, and if approval is given, it will be necessary to finance it with a part of the 1949 betterment funds alloted to Division V. In the discussion of this matter the Engineer also recalled the previous request of the Umatilla County Court for the improvement of the Holdman-Helix County Road as a substitute for improvement of the Adams-Thorn Hollow County Road in the Federal Aid Secondary Highway Program, at an estimated cost of $170,000. He also mentioned the proposed improvement of the Weston-Elgin Secondary Highway for which an amount of $230,000 has been budgeted. He suggested that the latter-mentioned improvement might be postponed and the amount set up therefor transferred to finance the Holdman-Helix road improvement and the curb and widening work in the town of Umatilla, which total $225,000. In the ensuing discussion the Commission expressed a favorable attitude toward the Engineer's suggestion and accordingly instructed him to contact the Umatilla County Judge and ascertain if such proposed transfer of funds meets with the approval of the County Court, and to report back to the Commission for a decision.

The Commission considered a written report by the Engineer on the necessity to install a traffic signal at the crossing of the Southern Pacific Company tracks and the Silver Falls Loop Highway near the Salem Equipment Shops. It appears, according to the report that this crossing has been the scene of several accidents, one of which was fatal, and that the Southern Pacific Company wants the crossing protected by a signal installation, the cost, estimated at $4,000, to be assumed equally by the company and the state, except that the railroad company will pay all maintenance expense. It also appears that this installation is high on the priority list of crossings to be signalized. The Engineer recommended approval of the installation on the basis of the company's offer to pay fifty percent of the cost of installation and all of the maintenance expense. The Commission approved the recommendation unanimously. (An agreement covering the matter was signed on the following day.)

The Commission considered the Engineer's written report on consistent and flagrant violators of the truck-hauling regulations, particularyly the following:

1. Lawrence Produce Company, 635 Southeast 17th Avenue, Portland, fruit and produce hauler.

2. T. C. Lawrence, 620 Southeast Union Avenue, Portland, fruit and produce hauler.

3. Garfield W. Priebs, Box 417, Merlin, Oregon, log hauler.

4. Archie Kerber, Langlois, Oregon, log hauler.

5. William F. Kenwisher, Box 112, Sutherlin, Oregon, log hauler.

6. John Henry Gentry, Box 1018, Toledo, Oregon, log hauler.

He presented the record of each violator (see report dated October 28, 1948, in general files for details) and recommended that the permit of each of them be suspended for 30 days. A review of the record indicated to the Commission that fines assessed by the justice courts apparently have no deterring effect and that the violations were deliberate and were committed with the full knowledge of the operator. It was also brought out that in some instances, particularly log haulers, their hauling operations might cease within a few days and that taking up the plates for a 30-day period would not mean much. As a result of discussion the Commission ordered the outright cancellation of the P.U.C. permit of Garfield W. Priebs, log hauler, and a 30-day suspension of the permits of the remaining operators. The Secretary was instructed to recommend such action to the Public Utilities Commissioner insofar as it pertains to the log haulers, and to see that the Group I transportation permits of Lawrence Produce Co., and of T. C. Lawrence are suspended for 30 days' time in conformity with the Commission's action.

In the discussion of this matter the Engineer reported receipt of several communications from the logging industry suggesting that District Maintenance Superintendents be authorized by the Commission to impose reduced load limits on state highways when necessary in order to preserve road surfaces, and to restore legal-weight loads at the proper time, without first consulting the State Highway Engineer in Salem. It was contended that such procedure will shorten the period during which legal-weight loads cannot be hauled and will not result in damage to the highway because the Superintendent is in a position to keep in close touch with the situation and will know just when to post the restriction and when to lift it. The Chief Counsel advised that the Commission cannot legally pass on to another party discretionary authority, but it can adopt rules of procedure and can authorize the Engineer to take action in conformity therewith under certain conditions. The Engineer suggested adoption of a resolution appropriately stipulating the conditions under which immediate action could be taken to impose reduced load limits, and authorizing the imposition of such reduced load limit when the conditions prevail that warrant such action; and further specifying those the Commission wishes to act for it in such cases. Following discussion the Commission approved the Engineer's suggestion and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as if copied in full herein.

The Commission discussed a report from the Engineer on the matter of constructing a by-pass under the overflow bridge on the Pacific Highway East at the point where Talbot Road crosses, at Mile Point 65.97. The Engineer advised that highway traffic passes this place at high speed, causing considerable hazard to school buses which normally enter the highway at grade, and that complaints have been filed by the school board and the State Police. Investigations reveal, he said, that the problem can be solved by constructing a by-pass route beneath the bridge, which is estimated to cost $500. He recommended approval of the improvement as a 1948 minor betterment project. The Commission approved the recommendation unanimously.

The Commission approved and signed the following letter directed to the Chief, Forest Service, and Commissioner of Public Roads, Washington D. C., recommending certain revisions in the heretofore approved Forest Highway Program with respect to improvements on the John Day and John Day-Burns Highways:

486 Oregon General October 25, 1948

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

Under Oregon Forest Highway program letter for the fiscal years 1942 and 1943, recommended November 14, 1944 and approved by the Commissioner on March 28, 1945, there was approved for construction the following project:

No.	Project	Est. Cost	Federal Funds
36-A2	John Day Highway Surf. & Bit. Surf. Length 5.2 miles	$125,000.00	$125,000.00

In order to have available material for future maintenance on this project and the forest highway route, the State of Oregon has requested that approximately 4800 cubic yards of crushed rock maintenance material be produced and stockpiled under Project 36-A2 and have agreed to cooperate to the extent of financing this operation, estimated to cost $18,000.00. Inclusion of this work with the surfacing and bituminous surfacing of Project 36-A2 will effect an overall economy for both the Government and State.

Since the original programming of this project construction costs have increased to such an extent that additional forest highway funds in the amount of $35,000.00, over and above those provided in the original program, will now be required.

It is therefore recommended that the program be revised as follows:

No.	Project	Estimated Cost	Type of Funds	Revised Program Amount
36-A2	John Day Highway Surf. & Bit. Surf. Length 5.2 miles	$178,000	FH Prevar FH Postwar Ore. State Coop.	$126,000 34,000 18,000

November 3, 1948

15303

Sufficient funds are available in the State Contingent to finance the increased forest highway costs.

On September 16, 1948 and September 20, 1948, respectively, the Commissioner and Chief, Forest Service approved the following forest highway project:

No.	Project	Estimated Cost	Type of Funds	Programmed Amount
35-D3	John Day-Burns Hwy. Grad., Surf. & Bit. Surf., 5 miles	$250,000	FH Postwar	$250,000

Since the above program it has been found necessary, in order to effect the most desirable and economical improvement, to extend the project into Section F which will include the construction of two bridges.

It is therefore recommended that the project designation and description be revised to read as follows:

No.	Project	Estimated Cost	Type of Funds	Programmed Amount
35-D3, F2	John Day-Burns Hwy. Gr, Surf., Bit. Surf. & Bridges, length 4.13 miles (including bridges 0.029 miles)	$250,000	FH Postwar	$250,000

Very truly yours,

R. H. Baldock /s/

W. H. LYNCH /s/
Division Engineer.

OREGON STATE HIGHWAY COMMISSION

Act. Regional Forester

November 3, 1948

A petition was presented from citizens of Estacada and vicinity requesting elimination of a sharp, blind curve on the Woodburn-Estacada Secondary Highway which school buses cannot negotiate without encroaching on the opposing traffic lane. The Engineer advised that the condition complained of is an 80° or 90° curve at Mile Post 32.78 where the highway is on a six percent grade and where the roadbed is only 21 feet wide. He estimated the cost of widening the section to provide safe sight distance at $4,000 and recommended approval of the project and that it be financed with funds from the unallocated portion of the 1948 minor betterment budget. The Commission approved the recommendation unanimously.

The Commission considered a request from the Superintendent of Coquille Public Schools for improvement of the Oregon Coast Highway near the north city limits of Coquille, in order to secure more sight distance at a dangerous railroad crossing, and for the elimination of a bad curve at that point. The Engineer estimated the cost of the project at $19,000, which amount includes $7,000 for construction of a footpath. He pointed out that realignment of this highway is being considered in the program for the years 1949 and 1950 and, if such project is approved and constructed, the conditions now complained of will be greatly relieved. The Commission deferred action on the matter pending approval of the 1949-50 construction program.

A request for the installation of a "caution" light at the intersection of the Oregon Coast Highway and Roads End Road, near Oceanlake, was considered by the Commission. The Engineer reported that the matter had been investigated and it had been determined that during the past two and one-half years there had been no reported accidents at this intersection; moreover, the location of the proposed installation is within the limits of a recently designated 35 mile-per-hour speed zone. Under normal circumstances, he said, there should be no hazard at the intersection, and he accordingly recommended that the request be denied. The Commission approved the recommendation.

A request was also presented for the installation of a traffic signal at the intersection of Madison Street with the Pacific Highway East, in Albany. The Engineer advised that a thorough investigation of this matter reveals that the traffic volume at this intersection is large and a dangerous condition exists for a large number of school children who have to cross the highway at this point. He recommended the installation of a standard "stop and go" signal, which he estimated would cost about $4,000, on the condition that the city of Albany will pay one-half the cost. The Commission approved the recommendation unanimously.

The Commission discussed requests from the West Portland Community Club and the West Portland Parent Teachers Association for the installation of traffic signals at the intersection of S. W. Capital Highway with the Pacific Highway West, in Portland, and at the intersection of Capital Hill Road with the Pacific Highway West. The Engineer advised that an investigation reveals that traffic signals at both intersections are needed because of the large volume of pedestrian traffic at each point. The Capital Hill Road installation, he said, is number one on the state-wide priority list for rural

intersections, and the other is number eight on such list. He recommended approval of both installations, which he estimated will cost about $8,000, all of which will have to be paid by the state as the intersections are outside the corporate limits of Portland. The Commission approved the recommendation unanimously.

A request from Southern Pacific Company for the joint installation of a railroad crossing signal at a point where the Albany-Lyons State Secondary Highway crosses the S.P. Co. railroad tracks at Crabtree, in Linn County, was discussed. The Engineer advised that an investigation of this crossing disclosed an average vehicular traffic of 1,338 vehicle and four train movements daily, and the records reveal five accidents, including two fatalities, from 1941 to date. He recommended approval of the installation, which he estimated will cost $4,150, on the condition that the railraod company will pay 50 percent of the costs involved and will maintain the signals after installation. The Commission approved the recommendation unanimously.

A request was presented from the City of Drain for the installation of traffic signals at the intersection of Front and "B" Streets in Drain, where the highway makes a right-angle turn. The Engineer advised that investigation reveals that 6,053 vehicles enter this intersection during each 24-hour period and that the hazards are emphasized by reason of traffic cutting over the center line when negotiating the right-angle turn at too great a speed. It was his thought that the installation is fully justified and accordingly recommended the installation of a flashing beacon of the type that will stop all traffic entering from non-highway streets, and will flash amber to caution left-turning traffic but will permit right turn movements on the highway route at all times by means of a green arrow. He estimated the cost of such installation at $250 which, he said, will have to be borne entirely by the state in conformity with established policy, but the city will be required to furnish electrical energy necessary for operation. The Commission approved the recommendation.

The Commission considered a letter from C. C. Colvin, Klamath Falls, calling attention to the need for improvements to the Klamath Lake Secondary Highway. The Engineer advised that a considerable portion of this highway is unimproved and that reconstruction of part of it is being considered in the proposed construction program for 1949 and 1950. The Commission deferred action on the matter pending adoption of the next construction program and ordered that Mr. Colvin be informed accordingly.

The Commission also discussed a letter from the Chrystal Distributing and Cold Storage Company, Medford, urging construction of a new road through Lake Creek in Jackson County to Lake of the Woods and Klamath Falls. The Engineer advised that construction of this road would cost several million dollars and that funds are not available to finance it. He recommended that the request be denied. The Commission approved the recommendation.

A request from the City of North Bend for assistance in constructing sidewalks in North Bend had the attention of the Commission. The Engineer advised that the request had been investigated and that the sidewalks requested are all within the city limits. He recommended that the request be denied in conformance with established policy. The Commission approved the recommendation.

The Engineer reported on a request from residents of Newport for state cooperation in improving Jefferson Street in front of the Highway Department maintenance building, in Newport. The Engineer advised that a small group in Newport has organized an improvement district for the purpose of sharing the expense of improvements to streets that serve as access to their properties, one of which is Jefferson street. The improvement of this street, he said, will benefit the state's property, and he recommended approval of the payment of the state's pro rata share of the expense, which amounts to $75. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of the state contributing funds toward the cost of raising the grade of a 1000-foot section of the Klamath Lake Secondary Highway No. 421 east of Wocus Bridge, which was originally constructed as a dike for the protection of properties lying in the Wocus Marsh-Caledonia Marsh areas which it divides. The Engineer advised that during the past 25 years the dike has subsided, and the owners now wish to raise it approximately three feet in order to prevent the flooding of their properties in case of failure of their main dike. In the event of failure of the dike, he said, the highway, as well as the adjacent properties, would be flooded. He estimated the cost to raise the dike three feet at $_,700, and he recommended, in view of the benefits that would accrue to the highway facilities, that the state participate by paying one-third of this expense, or $900, the balance to be paid by the property owners concerned. The Commission approved the recommendation and instructed the Engineer and Counsel to negotiate an agreement with the property owners on such basis.

A letter was presented from the City of Klamath Falls urging early construction of the proposed US97 by-pass route through Klamath Falls. The Engineer recalled that authority had been previously granted for purchase of right of way on this route but that no obligations had been made regarding construction. The Commission ordered that the city be informed that the reason for acquiring the right of way now is only to protect the route for future construction when funds are available to finance the work and that it cannot at this time make any commitment as to when construction of the project actually will take place.

The Commission considered a request from Klamath County Court that state highway forces conduct snow removal operations, at county expense, during the winter season on the Crescent Lake County Road between its junction with the Willamette Highway and the town of Crescent. The Engineer advised that state forces have performed this service in the past and recommended approval of the request. The Commission approved the recommendation unanimously.

Inquiry was made concerning the present condition of the Bonanza-Poe Valley-Malin County Road, in Klamath County, which had previously been reported in a rough condition. The Engineer advised that with the advent of cool weather the bumps on the surface of the road had worked loose and that it was now in fair shape. Commissioner Schaupp confirmed the report. The Commission accepted the report and authorized release of final payment to the contractor, Rogers Construction Co., Contract No. 2937.

In this connection Commissioner Schaupp reported that the recently improved section on the Lower Klamath Secondary Highway, between Mack's store and Midland, is in very bad condition. The Engineer was instructed to investigate this condition and submit a report. The Commission ordered final payment in connection with this contract held up pending action on the report.

The Engineer reported receipt of a communication from the City of Klamath Falls refusing the Commission's offer to contribute the sum of $600 toward the cost of paving a short section of Alameda Street in lieu of the state maintaining Alameda Street as a detour during highway construction at that point. In view of this information, the Commission instructed the Engineer to maintain the street as originally intended.

A request from the Seaside Chamber of Commerce for full width paving between curbs along the Oregon Coast Highway from "A" to "K" Streets, in Seaside, was presented to the Commission. The Engineer advised that the ultimate route of the highway through Seaside probably will be along Roosevelt Avenue, which route provides better alignment and is the route previously requested by the city. He suggested that if funds were available they be spent on Roosevelt Avenue and accordingly recommended that the request for improvement on the present route be denied. The recommendation was approved by the Commission.

The Commission discussed a letter from Mr. James Reid, Director of Highways, State of Idaho, concerning the replacement of the Snake River bridges which connect the highway systems of Idaho and Oregon at Weiser and Payette. Mr. Reid states the intention of his department to program Federal Aid Secondary Highway Funds to pay one-half the cost of these structures and expresses a hope that the Oregon State Highway Commission will provide a like amount for this purpose. The Engineer advised that both bridges are in bad condition and should be replaced. He recommended approval of both structures on the basis of the offer of Mr. Reid. The Chief Counsel advised that the State of Oregon has certain responsibilities with respect to these structures and could not escape liability should an accident occur. As a result of discussion, the Engineer and the Chief Counsel were authorized and instructed to negotiate an agreement with the Highway Department of the State of Idaho for the Commission's later consideration.

The Engineer requested authority to construct a storage rack at the Salem Shops for storing barrelled traffic line lacquer, at an estimated cost of $4,500, and to construct a parking area east of the Laboratory Building at the Salem Shops for private car parking, at an estimated cost of $2,500. He explained that the lacquer previously has been stored in a covered shed that was constructed for use as a parking place for the cars of

Highway Department employees but is now needed for storage of state-owned equipment. The Commission unanimously approved construction of both barrel rack and parking shed at an estimated total cost of $7,000.

The Engineer requested confirmation of authority previously given him to advertise for bids the following rock production projects:

Juntura-Hope Project, Central Oregon Highway, Malheur County - - - - - - - - - - - - - -	$43,000
Burns Project, Central Oregon Highway, Harney County - - - - - - - - - - - - - - -	34,000
Arlington Project, John Day and Columbia River Highways, Gilliam County - - - - - -	34,000

The Commission confirmed such authority by unanimous vote.

The Commission discussed a letter from Elmer Borgerson, Vernonia, who suggests a plan for rerouting and reconstructing a portion of the Federal Aid Secondary Highway between Vernonia and Sunset Camp. The Engineer advised that the road referred to is a county road, not a state highway, and that the changes and rerouting as indicated are not warranted by existing traffic. He recommended that the request be denied. The Commission approved the recommendation.

The Commission considered a letter from Mr. Elmo N. Stevenson, President of Southern Oregon College of Education, concerning a truck by-pass route in Ashland, heretofore proposed by a delegation from that city. Mr. Stevenson urges that very careful consideration be given to the noise feature, the physical-mental perils and the personal hazards in selecting a route for truck traffic through their city, all of which are present and objectionable under present conditions but would be emphasized were the route now proposed to be selected. The Engineer pointed out that the designation of state highway truck routes is contrary to the Commission's established policy; also, that were the Commission to approve the one in Ashland, its improvement would have to be paid for with state funds because the Public Roads Adminstration will not approve the expenditure of Federal money for the benefit of one class of traffic. He was instructed by the Commission to write Mr. Stevenson and explain to him the facts in detail.

The Commission considered the recommendation of the Engineer that an expenditure of $20,000 be made for widening narrow and hazardous sections on the Coos River Secondary Highway between Enegren Ferry and Allegany, a distance of eight miles. The Engineer reported that a careful investigation had been made of the entire section which disclosed that at certain points the road width varies from 15 to 16 feet, that the surface treatment consists of untreated macadam, and that the traffic volume on the road, which is now about 400 vehicles daily will be increased considerably in the near future by reason of the expansion of the Weyerhaeuser Corporation's logging activities. He recommended the widening of three reverse curves to a 2. foot width; the widening of a one-half mile section at the Mahaffee place, the scene of a

recent fatality; the surfacing of these sections; and the construction of eight turnouts, all of which he estimated would cost about $20,000, such work to be done during 1949 as a major betterment project. The Commission approved the recommendation unanimously.

The Commission considered a report from the Engineer on the request of the City of Heppner and the Heppner Chamber of Commerce for widening Willow Creek Bridge on the Heppner Highway, in Heppner. According to the report this bridge is 19 feet 8 inches wide, carries 1,800 vehicles daily, and to widen it as requested would cost approximately $30,000. The report also reveals that the records fail to show any accidents on the bridge during the last two and one-half years. The Engineer recommended that the request be denied because there are so many other projects throughout the state of similar nature which have a higher priority status, both as to volume of traffic and accident records. The Commission approved the recommendation.

The Commission discussed requests from the City of Eugene and the Lane County Court that the state proceed with construction of the Ferry Street Bridge over the Willamette River on the Coberg County Road, and the railroad overcrossing in Eugene, in accordance with an agreement executed in 1946. The Engineer advised that plans are ready for the Ferry Street Bridge, which is Lane County's portion of the project, and that the project could be advertised for bids on short notice; but the plans for the railroad overcrossing and the street interchanges, which are the city's portion of the project, will not be completed for several months. He recommended that bids be called for the Ferry Street Bridge in the near future and that the projects within the City of Eugene be advertised for bids when the plans are ready. The Commission approved the recommendation unanimously.

The Engineer reported that the following cities and towns have fulfilled the requirements with respect to the expenditure of the 1947 State Tax Street Funds which they received in 1948, and that the plans of the projects proposed for construction with such funds have been examined and found satisfactory:

Banks	Gaston	Helix	Sherwood
Cornelius	Glendale	Juntura	Troutdale
Creswell	Haines	Merrill	Waldport
Dayton			

He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered and upon recommendation of the Engineer, approved an "option for cooperative construction project" with the City of Freewater which provides for the financing of certain city street improvements with Special State Tax Street Funds .

The Engineer presented for the Commission's consideration three additional projects to be financed with 1948 Special State Tax Street Funds, being projects located in Waldport, Scappoose, and Willamina, and estimated to cost $4,500, $8,500, and $4,800, respectively. He advised that it now appears that there will be an underrun of about $5,000 to $8,000 on the work as planned, which means that there could be a deficiency in the required $250,000 expenditure. He recommended approval of these three additional projects with the understanding that 1948 funds will be applied only as are necessary to take up the full amount of $250,000 available, and that any overrun will be chargeable to the 1949 Special State Tax Street Fund program. The Commission approved the recommendation unanimously.

The Commission by unanimous vote confirmed the Engineer's award of the following contracts, bids for which were received at the Commission meeting September 13 and 14:

Construction of the John Day River-Squally Hook Section of the Columbia River Highway, Gilliam County; bids received September 13; contract awarded on October 11 to Rogers Construction Company, low bidder.

Construction of the Miles Bridge-Baker Section of the Medical Springs Highway, Baker County; bids received September 14; contract awarded October 4 to D. F. McKenzie, low bidder.

The Engineer reported that a location survey of the Umpqua Highway between Reedsport and Scottsburg had been completed. He exhibited a map showing the proposed alignment and recommended adoption of the survey as the permanent route of this highway. After due consideration of the Engineer's report the Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

No. 1 -- Birkemeier and Saremal, Contract No. 2969 for construction of the Troutdale Overcrossing on the Columbia River Highway in Multnomah County, requested an extension of time of 30 days from September 15 to October 15, 1948, within which to complete this job. They attributed their failure to complete the work within the specified time limit to the Columbia River flood which prevented the Union Pacific Co. from moving its tracks to permit erection of false work for the bridge structure. The Engineer advised that the Union Pacific Company was unable to perform its work due to the June flood in the Columbia River which required all of its personnel for emergency repairs. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the extension of time as recommended.

No. 2 -- J. R. Taggart and Company, Inc., Contract No. 2925 for regrading and oil mat surfacing on the Butte Creek-Kinzua Section of the Kinzua County Road in Wheeler County requested an extension of time of ten days from August 31 to September 10, 1948, in which to complete the work. They alleged that unusually heavy rains during the spring and early summer delayed placing of the base rock and oil mat wearing surface. The Engineer advised that the project was completed on September 4, 1948, and that the reason given by the contractor for overrunning the specified time limit is substantially correct. He recommended that an extension of time to September 4, 1948, be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

No. 3 -- F. L. Somers, Contract No. 2917 for regrading and oil mat surfacing on the Lower Klamath Lake Section of the Lower Klamath Secondary Highway in Klamath County requested an additional extension of time of ten days from June 30 to July 10, 1948, within which to complete the work. He alleged that the job was complete, except for placing sight posts, within the previously extended time limit, and that the material for such work has been ordered but not delivered. The Engineer advised that the contractor's statements are correct; that the materials were received and the job completed on July 6. He recommended that the additional extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission granted the extension of time as recommended.

No. 4 -- Jack Robinson, Contract No. 2928 for grading and bituminous macadam surfacing on the Reedsport Junction Section of the Oregon Coast Highway in Douglas County requested an extension of time of 61 days from July 31 to September 30, 1948, within which to complete this job. He alleged that bad weather and failure of the oiling crew to report for duty as arranged prevented completion of the job within the specified time. The Engineer advised that the contract was completed on September 20, so an extension of time to September 30 is not necessary. Extremely wet weather and the failure of the oiling subcontractor to appear as scheduled, he said, accounted for the overrun of time limit. He further advised that no inconvenience was caused by the delay and that it is his recommendation that an extension of time to September 20 be granted without penalty. The Commission approved the recommendation unanimously.

No. 5 -- Albert W. Denton, dba Denton Construction Company, Contract No. 2899 for regrading and oil mat surfacing on the Madras Section of The Dalles-California Highway in Jefferson County, requested an additional extension of time of five days from August 1 to August 5, 1948, within which to complete this contract. He alleged that failure of his subcontractor to report on time, poor work by the subcontractor necessitating the relaying of some pavement, and the breakdown of a roller prevented completion of the job within the previously extended time limit. The Engineer advised that the additional extension of time was required because of inability of the contractor to properly organize his forces to

to perform the work. He added, however, that the delay was small and that it caused no inconvenience to the traveling public. He recommended that the additional extension of time now requested be granted without penalty. The Commission approved the recommendation.

No. 6 -- Vernie Jarl, Contract No. 2919 for grading and oil mat surfacing on the Hay Creek-Condon Section of the Wasco-Heppner Highway in Gilliam County, requested an additional extension of time of two days from August 31 to September 3, 1948, within which to complete this job. He declared that extra patching on the road prevented completion of the project within the previously extended time limit. The Engineer recommended that the extension of time requested be granted without penalty. The Commission approved the time extension as recommended.

No. 7 -- W. R. Grasle Company, Contract No. 2945 for installation of a traffic signal system on the Columbia River Highway at Parkrose, in Multnomah County, requested an extension of time of 60 days from August 31 to October 30, 1948, within which to complete the work. They alleged that their failure to complete the job on time was due to the inability of the Union Metal Manufacturing Company to deliver the required steel poles until August 30, 1948. The Engineer advised that the reason given by the contractor for overrunning the specified time is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the extension of time as recommended.

No. 8 -- W. R. Grasle Company, Contract No. 3001 for installation of a traffic signal system on the Old Oregon Trail in Pendleton, requested an extension of time of 30 days from August 15, to September 15, 1948, within which to complete the job. They alleged that the overrun of time limit was caused by the Union Metal Manufacturing Company, which was unable to deliver the required steel poles until August 30, 1948. The Engineer advised that the contractor's statement is correct. He recommended, in view thereof, that the extension of time as requested be granted without penalty. The Commission approved the extension of time as recommended.

No. 9 -- Struss and McCoy, Contract No. 2859 for rock production on the John Day Section of the John Day Highway in Grant County, requested an additional extension of time of 60 days from September 30 to November 30, 1948, within which to complete the work. They gave no particular reason for failure to complete the project within the previously extended time limit. The Engineer advised that a previous extension of time had been granted with the proviso that all engineering costs after December 31, 1947, be assessed as a penalty for not completing the job on time. He recommended that the additional extension of time now requested be granted subject to the same stipulation. The Commission approved the extension of time with penalty, as recommended.

No. 10 -- J. N. and M. J. Conley, Contract No. 3048 for bituminous macadam surfacing on Canyon Road, a Newport city street, in Lincoln County, requested an extension of time of two days from September 30 to October 2, 1948, within which to complete this job. They alleged that rainy weather toward the latter end of the job delayed completion of the oiling work within the specified time limit. The Engineer advised that this job would have been completed within the specified time limit had the work not been delayed by excessive rain at the last moment. He recommended in view thereof that the extension of time as requested be granted without penalty. The Commission approved the extension of time as requested.

No. 11 -- F. L. Somers, Contract No. 2963 for production of crushed gravel on the Silver Lake-Harvey Creek Section of the Fremont Highway in Lake County, requested an extension of time of 30 days from September 30 to October 30, 1948, within which to complete this job. He attributed his failure to complete the job within the specified time to an unusually wet spring which prevented securing of material at the pit. The Engineer advised that extremely wet weather during the latter part of September and the hospitalization of the contractor's foreman prevented completion of the work within the time specified. The state, he advised, has suffered no inconvenience from the delay. He recommended that the extension of time requested be granted without penalty. The Commission approved the extension of time as recommended.

No. 12 -- John A. Logan, Contract No. 2856 for grading, surfacing and oiling on the Tutuilla Section of the Pendleton-John Day Highway in Umatilla County, requested an additional extension of time of three days from July 1 to July 3, 1948, within which to complete this job. He alleged that adverse weather conditions which interfered with the operations of his oiling subcontractor were responsible for overrunning the time limit specified. The Engineer advised that all work on the project with the exception of a small amount of oiling on the bridge approaches, was completed some time ago. No inconvenience has been caused the state, he stated, and the state has incurred no extra expense for engineering supervision. In view thereof, he recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation.

No. 13 -- Jed Wilson, Contract No. 2980 for rock production on the Klaskanine Summit-Jewell Section of the Nehalem Secondary Highway, in Clatsop County, requested an extension of time of 100 days from June 30 to October 8, 1948, within which to complete this work. He stated that pursuant to arrangements made with the Division Engineer, he completed the Elsie Rock Production Project, also a state contract, before starting on the Klaskanine Summit-Jewell job so as to avoid a spring mud condition on the latter project, which accounted for the overrun of the time limit. The Engineer advised that in order to expedite state patching schedules the contractor was requested to complete the Elsie Rock Production Project ahead of the other which change was to the

state's benefit. He recommended that in view thereof the extension of time as requested be granted without penalty. The Commission approved the extension of time as recommended.

No. 14 -- J. C Papin, Contract No. 3017 for grading, surfacing and oiling on the North Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Secondary Highway in Wallowa County, requested an extension of time of 240 days from September 30, 1948, to June 1, 1949, within which to complete this work. He gave the following reasons for overrunning the specified time limit: heavy traffic to Wallowa Lake during July and August, which retarded operations, and the material encountered was very difficult to handle, being mostly very large boulders with very little fine material for finishing. The Engineer advised that heavy traffic to Wallowa Lake did retard the contractor's grading operations during the summer months, but such work and the surfacing were completed within the time limit, however, because of the lateness of the season oiling could not be permitted until next spring. He recommended that the extension of time as requested be granted without penalty. A letter from the Public Roads Administration was presented concurring therein. The Commission approved the extension of time as recommended.

No. 15 -- Gerald Miller, Contract No. 2948 for grading and topping on the East Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, in Gilliam County, requested an additional extension of time of 31 days from August 15 to September 16, 1948, within which to complete this work. He gave no reason for failure to complete the job within the previously extended time. The Engineer advised that extremely high water in the John Day River in the spring and early summer prevented the contractor from using his topping pit to advantage and that he also was handicapped because of inability to keep men on this isolated project. He recommended that the extension of time requested be granted witnout penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the extension of time as recommended.

No. 16 -- C. M. Corkum Company, Contract No. 3015 for construction of the Hooker Street Pedestrian Overcrossing over Front Avenue at the Failing School on the Pacific Highway West in Portland, Multnomah County, requested an extension of time of 30 days from October 31 to November 30, 1948, within which to complete this job. They alleged that delay in shipment of required structural steel prevented completion of the job within the contract time limit. The Engineer advised that the contractor's statement is substantially true. He recommended that the extension of time requested be granted without penalty. The Commission approved the extension of time as recommended.

No. 17-- Rogers Construction Company, Contract No. 2954 for rock production on the Weston Mountain-Elgin Section of the Weston-Elgin Secondary Highway in Umatilla and Union Counties, requested an extension of time of 30 days, from September 30 to October 30, 1948, within which to complete the job. They alleged that an unusually late spring and

several feet of snow on their quarry site prevented the start of operations until after the 4th of July, and for this reason they were unable to complete the job within the contract time limit. The Engineer advised that due to deep snow the contractor was unable to set up his plant as soon as anticipated. The state, he said, has been caused no inconvenience and has incurred no extra expense for engineering. He recommended that the extension of time requested be granted without penalty. The Commission approved the extension of time as recommended.

No. 18 -- Porter W. Yett, Contract No. 3055 for oiling and paving on Lombard Avenue and East Street in the City of Beaverton, Washington County, requested an extension of time of 20 days from September 30 to October 20, 1948, within which to complete this work. He alleged that September rains prevented the start of oiling operations and that the City of Beaverton did not have the grade ready for paving operations when needed, which accounted for his failure to complete the job within the contract time limit. The Engineer advised that the contractor's statements are substantially true. He recommended that the extension of time requested be granted witnout penalty. The Commission approved the extension as recommended.

No. 19 -- Holmes Brothers, Contract No. 2966 for production of sanding materials on the Meacham Section of the Old Oregon Trail in Umatilla and Union Counties, requested an extension of time of 30 days from October 30 to November 30, 1948, within which to complete this work. They alleged that shortage of help and equipment trouble prevented completion of the job within the contract time limit. The Engineer advised that the contractor's delay was caused by difficulties in securing labor and equipment parts. The state has not been inconvenienced by the delay, he said, and in view thereof he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The State Highway Commission, in passing on contractor's requests for extensions of time within which to complete the contracts as listed above, considered but did not necessarily accept the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

The Engineer reported that Contracts Nos. 2815, 2816, 2845, 2894, 2899, 2919, 2925, 2928, 2939, 2948, 2962, 2963, 2964, 2965, 2971, 2991, 2992, 3029, 3038, 3042, 3047, 3048, 3055, 2856, 2937, 2980, 3040, 2976, 2961, 2974, 2996, 2945, 2985, 3044, 2905, 2931, 3001, 2908, 3021, and 2999 for state highway construction have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under consideration, the Commission approved and accepted the contracts as reported and by unanimous vote adopted the attached resolution, marked EXHIBIT "H", with regard thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection the Commission confirmed the action taken previously at this meeting with respect to acceptance and release of the final payment to F. L. Somers for work performed under State Highway Contract No. 2917 for regrading and surfacing the Lower Klamath Lake Section of the Lower Klamath Secondary Highway, whereby the Commission ordered that final payment in connection with this job be withheld pending investigation by the Engineer whether or not the contractor is responsible for the faulty condition of the roadway surface.

The Commission had under consideration the disposition to be made of portions of the old right of way of the following highways, being along sections where the highways have been rebuilt on permanent alignment:

(1) Salmon River Highway and Pacific Highway West between Pringle-Corner and McMinnville, in Yamhill County

(2) Oregon Coast Highway between North Bend and Hauser, Coos County

(3) Tampico-Lewisville Secondary Highway between Camp Adair and the Polk-Benton County Line, in Benton County.

Following discussion, the Commission by unanimous vote adopted the attached resolutions relative thereto, which resolutions are marked EXHIBITS "I", "J", and "K", and by this reference are made a part hereof with like effect as though copied in full herein.

The Commission also had under discussion a proposed agreement with Crook County concerning the disposal of the old right of way of the Prineville-Marks Creek Section of the Ochoco Highway which will be of no value for state highway purposes when the highway has been reconstructed on revised alignment. The Engineer exhibited a map showing the section to be eliminated from the State Highway System, portions of which are to be taken over by the county for county road purposes and portions allowed to revert to abutting property owners. He recommended disposition of the properties as indicated on the map and advised that the matter is fully covered by the agreement. The recommendation was approved by the Commission unanimously. (The agreement was signed on the following day.)

The Commission by unanimous vote authorized the purchase of the following equipment:

Welding outfit (for use in connection with the Astoria-Megler Ferry)	$ 200.00
Electric band saw (for the Sign Shop)	375.00
Drafting tables and chairs (for the Engineering Division)	500.00
Multilith machine (for the Secretary's office)	1,865.00
	$ 2,940.00

The Engineer presented a request from the County Court of Yamhill County that the state join with the county in paying the cost of repairing damage to a county road caused by a state highway contractor when hauling materials from a quarry to his job. He advised that the project referred to is the improvement between McMinnville and Pringle Corner and that in connection therewith the contractor did do considerable hauling over the county road, damaging it to the extent that the county court threatened to stop all hauling over it. The county court, he said, was persuaded not to take such action and was assured that its claim for repairs would be given every consideration. He further advised that the county actually spent $4,839.53 for repairs and is now asking the state to reimburse the county for one-half this expense, or $2,419.76. He recommended that the claim be allowed. The Commission approved the recommendation.

The Commission considered the matter of designating a speed limit of 45 miles per hour on the Pacific Highway East for a short distance north of the City of Albany. In the discussion it was brought out that this matter was before the Commission several months ago, but action at that time was deferred pending the decision of the State Speed Control Board with respect to designation of a like reduced speed limit on this highway within the Albany city limits. The Engineer advised that at a meeting on August 6, 1948, the State Speed Control Board approved a speed zone of 45 miles per hour within the city, and, in view thereof, he recommended adoption of such speed limit for the section north of the city limits, particularly between Mile Post 74.16 (north city limits) and Mile Post 73.94. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with respect thereto, marked EXHIBIT "L", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission approved action taken by the Chief Counsel, by letter to T. E. Bruck dated October 11, 1948, notifying him that the Highway Commission is exercising its option to extend for a period of three months, its contractural agreement with him for furnishing ferry service across the Willamette River at Wilsonville.

The Commission by unanimous vote approved a three-year renewal of the forgery bond heretofore furnished by the American Bonding Company of Baltimore. The period to be covered by such renewal extends from November 2, 1948, to November 2, 1951, the premium being $374.70.

The Commission also unanimously approved renewal of the schedule bond heretofore furnished by the Ohio Casualty Company covering all State Highway Department employees, such renewal being for the calendar year 1949.

The Engineer brought up for discussion and recommended approval of the form of agreement between the Highway Commission and the Oregon-Washington Railroad and Navigation Company and the Union Pacific Company whereby the railroad company grants to the state authority to construct, maintain, and operate an electric power transmission line in conduit across right of way

beneath the roadbed and tracks of the company in connection with the lighting of Tooth Rock Tunnel on the Upper Columbia River Highway. The Engineer advised that the power line is needed to carry electric energy from Bonneville to the tunnel and that the facilities are being placed under ground at the request of the Bonneville Power Administration, from whom electricity is being acquired. The Commission unanimously approved the agreement. (The agreement was signed on the following day.)

The Commission discussed and, on recommendation of the Engineer, approved the granting of an easement to the U.S. Forest Service to construct and maintain a forest service development road across state-owned property adjacent to the Pendleton-John Day Highway, in Umatilla County, particularly across land situate in the S½ SE¼ Section 35, Township 6 South, Range 31 East, W.M. (An "easement deed -individual" covering the matter was signed by the Commission on the following day.)

The Commission discussed the matter of continuing during 1949 agreements with the National Hospital Association and the Oregon Physicians Service for furnishing hospital protection to employees of the State Highway Department. It was explained to the Commission that the present rate is $3 per month for each employee furnished this service, but due to increased costs, both the National Hospital Association and the Oregon Physicians Service have found it necessary to increase the rate to $3.50 a month, although the latter company has submitted an alternate suggestion which would leave the monthly rate at $3 but would cut the hospital benefits to 80 percent of the present allowances. It was the attitude of the Commission that whether or not the service is rendered is a matter entirely up to the employees themselves, and if the employees want the service, the Commission will not object to making the necessary deductions from monthly payrolls, as in the past. The Engineer was instructed to circularize the employees, ascertain their wishes, and to act accordingly.

The Commission had under discussion a proposed agreement with the O.W.R. & N. Co. and the Union Pacific Company covering an easement for the Sun Dial Road grade separation project on the Upper Columbia River Highway near Troutdale. In this connection the Engineer advised receipt of a letter from the Port of Portland stating that the Troutdale Municipal Airport must be lengthened to the west in order to provide adequate landing facilities for overseas and domestic aircraft of the larger types, which will necessitate the vacation of a portion of Sun Dial Road. The Port of Portland, he said, has agreed to provide a suitable substitute road connection with the new state highway to take the place of the Sun Dial Road and, until such connection has been provided, will permit traffic to use the vacated portion of the Sun Dial Road. The Engineer pointed out that the railroad company has already executed the agreement providing for the Sun Dial Undercrossing improvement and that the agreement is now ready and will be presented to the Commission at this meeting to complete; he suggested, however, in view of the plans of the Port of Portland, that it might be advisable to defer the signing of this agreement because of the possibility that it will have to be modified in some respects. Following discussion, the Commission authorized and

instructed the Engineer and the Chief Counsel to consult with the Port of Portland and the Board of County Commissioners of Multnomah County with respect to vacating a portion of the Sun Dial Secondary Highway. The Commission decided to execute the agreement with the railroad company, notwithstanding the possibility that it will have to be modified later. (The agreement was signed on the following day.)

The Engineer brought up for discussion the problem of employing additional engineers for Highway Department work. The situation, he said, is becoming more and more critical; in fact, college records indicate that there is an alarming decrease in the number of students who are interested in professional highway engineering. In order to induce more students entering college to study highway engineering, he suggested the inauguration of a plan such as is in effect in the State of Kentucky, where the state offers scholarships yearly to engineering students at the University, each scholarship being valued at $500. It was his thought that a similar procedure in the State of Oregon would be very beneficial, and he suggested approval of the plan in principle and that the Chief Counsel and he be authorized to work out details, including a legislative bill if necessary, form of proposed contract, etc., for approval by the Commission later. The Chief Counsel advised that he has given the matter some thought and, in his estimation, it has considerable merit. Following discussion, the Commission approved the Engineer's suggestion and referred the matter back to him and the Chief Counsel to explore further and report their findings.

A petition was presented from owners of real property in and near the town of Manhattan, Tillamook County, protesting any action by the Board of County Commissioners of Tillamook County, or by the State Highway Commission, in the matter of extending a street known as "Ocean Boulevard" in Manhattan, Oregon, from its present terminus to the ocean beach, as is proposed by certain interests who have petitioned the County Court for such an extension. The Chief Counsel advised that he has already informed the petitioners that the Highway Commission is without power to act in the premises until it has received the recommendation or the approval of the County Court, as provided by the law enacted by the 1947 Legislature. He further advised that, pursuant to instructions previously given him by the Commission, he has communicated with the county courts of the counties contiguous to the ocean and requested statements as to their attitude with respect to the use of ocean beaches, but to date has received replies only from the County Courts of Coos and Tillamook Counties. The Tillamook County Court's reply, he said, does not cover the present situation, but he expects to follow through and secure something definite to report to the Commission. In view of this information, the Commission considered that it is not in any position to take action on the petition until it has a definite recommendation from the County Court of Tillamook County. Action was thereupon deferred until the county court acts on the matter.

The matter of reclassifying the state highway which extends from Salem to Niagara, commonly known as the "North Santiam Highway", from a Group II Highway, which limits the overall length of vehicle combinations passing

thereover to 50 feet, to a Group I Highway, which authorizes vehicle combinations 60 feet overall in length, had the attention of the Commission. The Engineer advised that the section of highway under discussion is composed of portions of three secondary highways -- Silver Creek Falls Secondary Highway from Salem to the North Santiam Highway junction, North Santiam Highway from the Silver Creek Falls Highway junction to Mehama, and also from Mill City to Niagara, and the Mehama-Mill City Secondary Highway throughout its entire length between these two points -- further, that a test run of a combination of vehicles measuring 60 feet overall in length has been observed over the entire route, and it has been determined that a combination of such length can negotiate the curves without encroaching upon the opposing lane of traffic; moreover, the condition of the highway is such that loads of a weight permitted under the Group I Highway loading can be transported over the highway without damaging it. He recommended that this section of highway be reclassified so as to permit the extra length and extra weight allowed by Group I Highway Transportation Permits.

In the discussion of this matter it was pointed out that the Commission had this matter under consideration at the previous meeting and at that time tentatively approved a resolution relative thereto on the condition that there be included in that resolution a paragraph limiting the speed of trucks to 35 miles per hour on curves. The Chief Counsel gave as his opinion that such condition is not necessary in this particular resolution because the Commission's earlier resolution of a more general nature includes provision that all permits issued by the State Highway Department shall include the 35-miles-per hour restriction. In view of this information, the Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution with respect thereto marked EXHIBIT "M", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission also discussed a recommendation from the Engineer that the Oregon Coast Highway between Pistol River and the California state line be reclassified as a Group I Highway so as to permit lumber operators to haul lumber between these points on truck and trailer combinations with an overall length of 60 feet. The Engineer advised that a test run over this section of highway has been observed by Mr. R. B. Sipprell, Director of Permits, which proves that vehicle combinations of such length can negotiate the entire distance without encroaching on the opposing traffic lane, and Mr. Sipprell recommends such reclassification of this section of highway. He advised that he concurs in the recommendation. The Commission approved the recommendation as a trial proposition and by unanimous vote adopted the attached resolution marked EXHIBIT "N", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered a request from Riggle and Clark, sawmill operators, Cascade Locks, for permission to truck haul short-length logs over the Columbia River Highway from Dodson to Cascade Locks. It appears that the logs will not exceed 18 feet in length but are more than 40 inches in

diameter so cannot be handled in the company's mill but can be used by the Cascade Locks Lumber Company. It also appears that the operators have approximately 200,000 board feet of logs ready to move, if the Commission will grant them permission to do so, and that it will take from 12 to 15 days' time to transport them on the basis of five trips per day on solo truck operations. The Engineer recommended approval of the request. The Commission unanimously approved the granting of such a permit for 15 days. Whether or not it will be renewed after that time will depend on the extent of the company's operations. The Secretary was instructed to secure such information from Riggle and Clark.

The Engineer asked the Commission to confirm his action of October 15, 1948, prohibiting the truck hauling of logs over the new section of the Sunset Highway between Davies Overcrossing and Portland. He advised that this section of highway is new and the subgrade has not become sufficiently stablized to hold up under the tremendous pounding of log truck operations, and, in his estimation, such class of hauling should not be permitted for a year or so. He said that at his request the Secretary recommended to the Public Utilities Commissioner, by telephone on October 15, 1948, and by confirming letter on October 19, 1948, that no log hauling permits be issued for this section of highway. The Commission unanimously approved the closing of this road to log hauling traffic as recommended.

The Engineer also asked the Commission to confirm oral authority given him on October 7, 1948, to place a 50 percent reduced load limit on the Alsea Highway between the end of the pavement, at Mile Post 7.49, and Hatchery Creek, Mile Post 12.22, effective on October 11, 1948. He said that pursuant to such authority the road was posted, but conditions improved and the reduced load limit was lifted on Wednesday, October 27. The Commission unanimously approved the action taken by the Engineer in this matter.

The Commission authorized, subject to the approval of Governor Hall, the Chief Counsel, Mr. J. M. Devers, and the State Highway Engineer, Mr. R. H. Baldock to attend, at state expense, a meeting of the Highway Research Board in Washington, D. C., December 6 - 10, 1948. The Commission also authorized the State Highway Engineer to attend a meeting of the Board of Directors of the American Association of State Highway Officials, in Washington, D. C., immediately following the meeting of the Highway Research Board.

The Commission had under discussion a date for its next regular meeting and decided to hold such meeting in Portland on Monday and Tuesday, December 20 and 21, 1948. The Secretary was instructed to make the usual arrangements for a meeting place in the Imperial Hotel.

The Commission also discussed briefly the date for its third inspection trip of state highways covering the Southern Oregon district but deferred a decision until later.

The Engineer reported a communication from the Superintendent of the Department of State Police in which the Highway Commission is requested to construct a district police office headquarters building on state highway property at Newport. The Superintendent has in mind, he said, a sheet metal structural frame building about 30 feet by 36 feet in dimension which is estimated to cost not more than $10,000, and the reason given for the need for this building is to improve radio reception, which is their essential mode of communication and which cannot be relied upon in their present location. The Engineer also advised that the State Police Superintendent indicates that a very substantial sum of unexpended money authorized by the 1947 Legislature for police purposes will be turned back to the State Highway Fund at the end of the biennium, on June 30, 1949, which money will be available to finance the building. He recommended approval of the request, funds for construction to be taken from the unexpended portion of the 1948 Budget for "Construction of Maintenance Headquarters". Following discussion, the Commission approved the recommendation unanimously subject to the Chief Counsel's opinion that the expenditure is legal and is not a diversion of highway funds from uses for which they were intended.

The Commission had under consideration a proposed agreement with the U.S. Army Engineers covering restoration of the Vancouver Avenue Bridge over Columbia Slough, Portland, which was severely damaged by emergency activities of the U.S. War Department during the Columbia River flood in June 1948. The Engineer advised that the Federal authorities assume full responsibility for the damage and wish to reimburse the state for the cost of repairs, and that the agreement provides for such reimbursement up to a maximum of $25,000. It was his thought that this is a very fair settlement because the amount that the Government is willing to pay is considerably more than the estimated cost of the work. He recommended approval of the agreement. The Commission approved the recommendation and authorized the Engineer to advertise the project for bids. (The agreement was signed on the following day.)

The Commission discussed a letter from the Brooks Showcase and Fixture Company, designers and manufacturers, Portland, to Mr. Tom Young, Portland, concerning the myrtlewood burls and lumber which Mr. Young recently purchased from the State Highway Department. According to this letter, the "material is not usable for the manufacture of furniture due to the fact that both the lumber and the burls are so badly checked and worm eaten that they would grade as culls". It also appears that the company consulted with another buyer of myrtlewood burls, who also gave as his opinion that it would be impossible to use the material for furniture. It was the feeling of the Commission, in view of the circumstances, that it would be unfair to charge Mr. Young for the material, particularly since Mr. Young paid an extra amount of $137.91 freight charges to transport it from Humbug Mountain State Park, in Curry County, to Portland, and accordingly it was ordered that Mr. Young be refunded the $175 he paid the state for it.

The Commission discussed briefly a written report from the Engineer dated November 1, 1948, on the need and cost to improve the Alsea-Deadwood

Secondary Highway No. 201, in Lane County, which report was requested by the Commission at its June 1948 meeting (see report in general files for details). The Commission deferred action on the matter pending discussion of the 1949 major betterment program.

The Commission discussed and unanimously approved an "option for cooperative construction project" in the City of Oakridge, Lane County, which provides for the expenditure of $15,000 of Special State Tax Street Funds to finance the improvement of Commercial Street between Beech Street and Maple Street by grading, surfacing, and oiling.

The Commission discussed briefly matters pertaining to the 1949 budget but due to the lateness of the hour deferred action until later in the session.

The meeting adjourned at 5:15 p.m. to reconvene the following morning in the Green Room of the Imperial Hotel.

Portland, Oregon
November 4, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following persons present and participating:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Malcolm H. Hawke, Chief Accountant
George W. Neuner, Assistant Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway projects and ferry service were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 3:00 p.m. in the same room:

HEREFORD MAINTENANCE BUILDING, BAKER COUNTY

	Alternate "A" (Frame Constr.)	Alternate "B" (Block Constr.)
Gilbert Roberts, Hood River	$11,741.00	--
R. H. Jones, Hillsboro	15,465.00	--
Howard Halverson Co., Portland	17,100.00	$16,500.00

ALSEA HIGHWAY IN BENTON COUNTY

FLYNN BRIDGE OVER MARYS RIVER

J. F. Johnston, Sherwood	$47,555.00
VaDare Construction Co., Portland *	52,430.00

SUNSET HIGHWAY IN WASHINGTON COUNTY

BARNES ROAD-MULTNOMAH COUNTY LINE SECTION

Coast Constr. Co., Portland $18,993.70

FERRY SERVICE AT WILSONVILLE, CLACKAMAS COUNTY

J. F. La Rouche, Portland	$2,399.00 per month
Theo. E. Bruck, Wilsonville	3,890.00 per month

Mr. P. W. Mahoney, Chairman of the Road Committee of the Heppner Chamber of Commerce, headed a delegation representing the Chamber of Commerce and Morrow County which requested the following improvements: (1) Hard surfacing of the Hardman-Chapin Creek Section of the Heppner-Spray Secondary Highway; (2) Designation and improvement as a state secondary highway of a county road which extends southerly from a point on the Heppner-Spray Secondary Highway, near Chapin Creek, to Monument; (3) Widening of Willow Creek Bridge on North Main Street (Heppner Highway), in Heppner. The delegation also included J. G. Barratt, County Judge-elect of Morrow County; Ralph I. Thompson, County Commissioner; Chet Brown, Mayor of Monument; Glenn Parsons, U.S. Forest Service; Orville Smith, Dr. L. D. Tibbles, and A. L. Case, members of the Heppner Chamber of Commerce. Mr. Mahoney stated that the paving of the Hardman-Chapin Creek Section is their No. 1 project, but the other two are also of extreme importance to people of their district. The Hardman-Chapin Creek project, he said, was first requested by the Morrow County Court in 1943, at which time the Highway Commission advised that it would be given consideration in its postwar planning, and a section about nine miles long was hard surfaced and paved in 1947, but since then nothing further has been done. He urged the second of the above-mentioned projects, consisting of improvement of 26 miles of road, for the benefit of people of the Monument district. The construction of this road, he said, will shorten the distance from Monument to Heppner by 52 miles. Mayor Brown of Monument also spoke in behalf of this im-

provement from the standpoint of shortening the distance to secure medical aid and hospital facilities and to provide a highway over which to transport their stock and other produce to market. Concerning the widening of the Willow Creek Bridge in Heppner, Mr. Mahoney advised that it is very narrow and that accidents frequently occur on it, that it carries considerable pedestrian traffic as well as vehicular traffic and should be widened as a safety measure.

In the discussion that followed, the delegation was informed that the Commission has under advisement projects for its next construction program and is considering, among others, improvement of the Hardman-Chapin Creek Section of the Heppner-Spray Highway, but it is not in position to add more county roads to the state highway system. The Commission denied the requests for improvement of the Chapin Creek-Monument County Road and for widening the Willow Creek Bridge.

A delegation from Central Oregon, headed by Mr. William Stiewer, Fossil, and including the following persons, appeared before the Commission in the interests of the Fossil-Shaniko Secondary State Highway No. 291: S. J. Howard, Wheeler County Judge, Fossil; Ward R. Webber, County Judge of Wasco County, The Dalles; E. A. Maurer, stockman, and Frank Dillard, stockman and civil engineer; and Art McGreer, stockman, all of Clarno. They presented a petition signed by 207 farmers, livestock producers, and business people of Wheeler, Sherman, and Wasco Counties urging the improvement of a five-mile section of this highway westerly from Clarno to a place known as "Timber Culture Ranch". They urged immediate construction of a standard-width highway grade with gravel roadbed. Speaking in behalf of this improvement were Messrs. Stiewer, Webber, McGreer, and Maurer. Mr. Stiewer stated that this five-mile section of road is in very bad condition and is their most important project. Mr. Webber appealed for the improvement from the standpoint of the people of Wasco County. Mr. McGreer spoke in behalf of the stockmen who use the road. Mr. Maurer also spoke in behalf of the stockmen and urged the placing of a "few loads of gravel" on the road to facilitate travel during the coming winter season, it being his contention that the road will be impassable unless this is done and that they will be unable to truck haul their stock to market. In the following discussion it was pointed out by the Commission that it is now considering projects for its second postwar construction program and, among others, will discuss the improvement of an eight-mile section of this highway from the John Day River west, although no definite decision has been reached with respect to this or any other improvement. It was also pointed out that no gravel whatsoever has ever been placed on the section under discussion and a few loads of gravel, as suggested by Mr. Maurer, would do no good and would be a waste of time and effort to improve a condition that cannot be remedied short of a major operation.

Mr. Stiewer also brought up for discussion maintenance of the Kinzua County Road which was recently improved as a Federal Aid Secondary Highway between the John Day Highway junction and Kinzua. He advised that Wheeler County is not equipped to properly maintain this section of road and would appreciate it if the Highway Commission would assume this responsibility.

Judge Howard verified the statement. He was informed by the Commission that the State Highway Department will maintain the road for the county if possible to spare men and equipment to do the work, but only on the condition that the county will pay all costs incident thereto with county funds. The Engineer was instructed to discuss the matter with the Wheeler County Court and endeavor to reach an agreement on such basis.

The following people representing Elmira Grange No. 523, Lane County, appeared before the Commission in the interests of the Richardson-Eugene Secondary Highway No. 220 (Route F): G. E. Blanchard; Ralph Johnson, member, Elmira High School Board; W. T. Moss, all of Veneta; and F. W. Deedon and M. Sailor, both of Noti. Mr. Blanchard headed the group. They urged oiling this highway between its junction with the Territorial Highway, at Elmira, and the foot of Badger Mountain, a distance of about nine miles. Speaking in behalf of the improvement were Messrs. Blanchard, Sailor, and Johnson. They declared that this section of highway is in a deplorable condition and is almost impassable during the winter season because of heavy log-hauling traffic, and they urged its improvement in the Commission's next construction program. The Commission advised that the project will be considered in the formulation of the next program, but no commitment can be made at this time. The Engineer was instructed to investigate existing conditions and to report his findings.

Mr. Johnson also inquired concerning the proposed improvement of this highway between Veneta and Eugene, particularly the section which involves the separation of the highway and the Southern Pacific Company railroad tracks at Oakhill, which section is now being used as a detour pending construction of the highway on permanent alignment. The Engineer advised that this improvement is being held up for the decision of the Public Utilities Commissioner as to the adjudication of costs between the railroad company and the state, and that construction will go forward as soon as an order covering the matter has been received from the Public Utilities Commissioner.

Mr. J. L. McCulloch, mayor of the City of Burns and Chairman of the Road Committee of the Harney County Chamber of Commerce, appeared before the Commission in the interests of the Rome-Princeton Secondary Highway No. 442. He urged construction of the uncompleted portion of this highway at the earliest possible time, stressing the importance of the project from the tourist standpoint. He was informed by the Commission that this project will be considered along with others in the formulation of the next construction program, but the Commission is not in position to make any definite statement with respect thereto at the present time. It was pointed out that funds available to the Commission are limited, that this money must be spent for highway improvements which the Commission feels will benefit the state as a whole rather than any particular community, and that the Commission is just as eager to complete the roads in the Harney County district as it is to finish them in any other part of the state. It was also pointed out that there are two uncompleted sections, one 14 miles in length and the other about eight miles in length, a total of about 22 miles, and that even if the Commission should find it possible to allocate some money to this highway, it can make no promise that

the entire section will be improved in the next program or even in the near future.

Mr. McCulloch also inquired concerning the status of additional proposed improvements on the John Day-Burns Highway. He was informed that the remaining work is scheduled for construction in the approved Forest Highway Program and that the work would be done under the supervision of the Public Roads Administration. The Secretary was instructed to send Mr. McCulloch a copy of the Engineer's report to the Commission outlining the proposed improvements.

A delegation representing the Southeast Tillamook Coast Road Committee appeared before the Commission regarding their previous request for the rerouting of the Oregon Coast Highway from Tillamook to Sand Lake, Oregon, via the Sand Creek-Bewley Creek Cut-off. In the group were Roy Dunn, Chairman, Sand Lake; A. H. Lindberg, Terra Del Mar; Robert Atkinson, Cloverdale, and Floyd Duncan, Cloverdale. Mr. Dunn headed the group. He presented petitions signed by numerous residents and/or users of this highway, urging that immediate consideration be given to relocating this highway from Pacific City to Tillamook via Woods, Terra Del Mar, and Sand Lake, thence via the Sand Creek-Bewley Creek survey into Tillamook, as an alternate location for US101. He also presented a brief supporting the petitions signed by the Pacific City-Woods Area Chamber of Commerce, Oregon Coast Association, North Tillamook Chamber of Commerce, Big Nestucca Improvement District, Sand Lake Grange, Tillamook Chamber of Commerce, Tillamook County Court, South Tillamook Coast Road Committee, and the Terra Del Mar Improvement Club in which "1. It is recommended that the State Highway Commission take over the present county road at the intersection of Brooten Road and Highway 101, on the north shore of Nestucca Bay, proceeding west and north through Pacific City, Woods, Terra Del Mar, Sand Lake, and then by new construction via the Sand Creek and Bewley Creek survey, again connecting with US101 near the southwest corner of Section 8, Township 2 South, Range 9 West, Willamette Meridian. This road would be made a primary highway and designated as a 101 alternate". A map was also presented showing the location of the proposed route. The matter was discussed at considerable length and as a result thereof the Commission instructed the Engineer to make further investigations of the proposed route and report his findings to the Commission.

A delegation representing the Cascade Highway Association, which is composed of memberships of civic organizations such as chambers of commerce, Lions clubs, granges, farmers unions, and others, including individual memberships, along the proposed route of the Cascade Highway between Oregon City and Springfield, was present and presented arguments on behalf of their project. This delegation was composed of the following: Ben Fisher, director, Brownsville; Joe M. Crahane, director, Brownsville; L. E. Spraker, Secretary, Stayton; Claude Smith, Linn County Commissioner; E. G. Arnold, Linn County Judge; Wayne Downing, Linn County Commissioner; Walter Larsen, Linn County Engineer; Cortis Stringer, director, Lebanon; Harvey Davis, County Road Supervisor, Sweet Home; Mr. Schaffer, president, Scio; H. S. Burge, director, Springfield; S. W. Alexander, Springfield; William Marshall, Springfield;

and Lev Garbutt, manager, Springfield Chamber of Commerce, Springfield. Mr. Fisher headed the group. He read aloud and presented to the Commission a brief setting forth arguments why the proposed road should be placed on the state highway system and why plans should be made for its construction in the near future (see copy of brief in general files for details). In the discussion of this matter it was brought out by the Engineer that the route is about 100 miles in length and to construct it to modern two-lane primary highway standards would cost probably between $10,000,000 and $12,000,000 and that the cost to construct it to modern secondary highway standards is estimated at $6,000,000. He further stated that, although an exact routing has never been determined for such highway, from information available it would appear that it would save from eight to ten miles in distance over the existing route of US99E from Oregon City to Eugene. The matter was discussed at considerable length, but the Commission could not see its way clear to approve the project or to make a survey because it is an entirely new project and there are no funds available to finance it.

The Commission recessed at twelve o'clock noon and reconvened at 1:30 p.m. with the same persons present and participating.

Mr. V. W. McCormack, contractor and City Councilman, Pendleton, and Mr. Oren King, City Manager, Pendleton, came before the Commission on behalf of Mr. C. M. Dove of their city regarding the use of a six-foot strip of highway right of way along the front of Mr. Dove's motor court on which to construct a retaining wall in connection with a parking area for automobiles. Mr. King explained details. In the discussion of this matter the Engineer and the Chief Counsel both recommended against granting this privilege because it would deviate from the Commission's established policy with respect to encroachments. The Commission unanimously approved the recommendation.

The following members of the Advisory Committee of the Travel and Information Department were present and presented to the Commission a recommendation with respect to the budgeting of funds to carry on the activities of the Travel Department during the calendar year 1949: John A. Laing, Chairman, Portland; Dr. E. B. McDaniel, member, Portland; W. D. B. Dodson, member Portland; Arden X. Pangborn, member, Portland; Charles Reynolds, member, La Grande; Donald Sterling, member, Portland; and Manley F. Robison, Director of the Travel Department, Salem. Mr. Laing recited briefly the accomplishments of the Travel and Information Department during 1948, particularly referring to the report heretofore filed with the Commission which contains information concerning tourist travel development during the current season and reasons why there was some dropping off this year in the volume of out-of-state travel. He pointed out that competition for visitors to the State of Oregon is becoming more active and intense each year, and he gave as the opinion of the members of the Advisory Committee that it is more important than ever that the publicity program be carried on effectively and diligently to attract people to this state. He recommended, in behalf of the committee, the adoption of a budget of $250,000 for travel and information purposes during 1949 covering the following major items:

General

Printing (booklets and maps)	$ 28,100.00
Photographic Department	9,444.00
Misc., Auxiliary promotion	7,750.00
General Office	6,208.00
Salaries	23,796.00

Space advertising

Magazine	13[illegible],412.40
Newspaper	24,000.00
Production	14,000.00
Contingency	4,289.60
Total	$ 50,000.00

(For a breakdown of each of the above items, see Travel and Information Department Budget for 1949 in "Highway Department Budgets", File No. 3-a.)

Following discussion, motion was made by Commissioner Schaupp that the Commission approve the budget of $250,000, as recommended by the Committee, and that the Committee be sincerely thanked for the fine service it has rendered the state. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

A delegation representing the US99 Association was present and urged additional improvements to the Pacific Highway. This group was headed by Hon. Frank Van Dyke, Ashland, and included County Judge D. N. Busenbark, Douglas County; L. V. Beckley, Douglas County Commissioner; Senator Thomas Parkinson, Roseburg; Carl Hogg, President, Salem; Clay Cochran, Manager, Salem Chamber of Commerce; Don Lane, Secretary, Medford Chamber of Commerce; Paul B. Rynning, Secretary, US99 Association and Jackson County Engineer; Chester Hubbard, Medford Chamber of Commerce; Webb Thornberry, Manager, Grants Pass Chamber of Commerce; and H. Proebstel, Grants Pass. Mr. Van Dyke urged continuation of the improvement of the Pacific Highway northerly from the end of the recently completed improvement, at a place known as Johns, to Canyonville. He declared this to be the worst bottleneck on the Pacific Highway between Portland and the California state line. He also urged, as a separate project, improvement of the section between Central Point and Ashland and advised that if the Commission cannot see its way clear to approve both projects, then they prefer that the Johns-Canyonville project be given preference. He presented a letter from the Jackson County Court and the Jackson County Chamber of Commerce in support of his oral request for improvement of the Central Point-Ashland Section. Others speaking in behalf of these improvements were Mr. Parkinson, who presented a letter from the Roseburg Chamber of Commerce which urges that rebuilding of the highway from Azalea north to Canyonville as the next major improvement on this highway; Mr. Proebstel; Mr. Thornberry, who presented a

letter from the Grants Pass Chamber of Commerce requesting that consideration be given by the Commission to immediate improvement of the Pacific Highway at two points within the city limits of Grants Pass -- widening that portion of the highway from East "A" Street to the north city limits, and improvements to the Rogue River Bridge to increase its capacity; Mr. Hogg; and Judge Busenbark.

The delegation was informed that the Johns-Canyonville Section is a Forest Highway section and when it is improved the work will be done under the jurisdiction of the Public Roads Administration. It was also disclosed that the work is estimated to cost more than a million dollars and that no provision has been made, up to the present time, to finance it. Mr. Van Dyke suggested, if Forest Highway money is not available, that other money be used for the purpose because of the importance of the project to the economy of the state. He urged progress to the end that the improvement be made available to the public at the earliest possible time. In concluding the discussion, Chairman Banfield pointed out the necessity for the Highway Commission to work in harmony with the Public Roads Administration and the U. S. Forest Service in the distribution of Forest Highway funds and that if additional Forest Highway monies become available, then careful consideration will be given to improvement of the Johns-Canyonville Section, but there are no funds in sight at the present time.

Mr. R. Bruce Grieve, Prospect, Oregon, appeared before the Commission in behalf of the Upper Rogue Valley Chamber of Commerce and urged the Commission to authorize more extensive operations to keep the Crater Lake Highway and the East and West Diamond Lake Secondary Highways open to travel during the winter months. In this connection the Secretary presented a letter from the California-Oregon Power Company urging snow removal operations to keep these highways open for travel during the winter season to facilitate delivery of materials needed in connection with construction of a new powerhouse which the company is building at a place known as Yamsay. The Engineer advised that to keep these highways open as requested would cost $20,000 more than has previously been expended for such purpose. He pointed out that the roads are of light construction and are not strong enough to stand up under traffic early in the spring when the frost is leaving the ground. To provide satisfactory facilities, he said, would cost approximately $80,000. Mr. Grieve suggested, if the Commission cannot see its way clear to keep these highways open throughout the entire winter season, that it would be helpful if closure of the highways in the fall were delayed somewhat from the present time of closing and if they were opened earlier in the spring. As the result of the discussion, the Commission referred the matter back to the Engineer with instructions to keep these routes open this winter as long as is practical to do so by means of push plows, and to open them as early as practicable in the spring, in order to shorten the time of the closed period.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and operation of ferry service at Wilsonville and by unanimous vote approved the following action thereon as publicly announced by Chairman Banfield at 3:00 p.m.

"Hereford Maintenance Building in Baker County. Gilbert Roberts, Hood River, was the low bidder for this work, based on Alternate "A", at $11,741. R. H. Jones, Hillsboro, submitted the next low bid, also based on Alternate "A:, at $15,465. Neither submitted a bid based on Alternate "B". One higher bid was received. The Commission has awarded the contract to the low bidder, Gilbert Roberts, using Alternate "A", frame construction.

"Flynn Bridge over Marys River on the Alsea Highway near Philomath, in Benton County. J. F. Johnston, Sherwood, submitted the low bid for this work at $47,555. The second low bid was submitted by VaDare Construction Company, Portland, at $52,430. Four higher bids were received. The Commission has awarded the contract to the low bidder, J. F. Johnston.

"Delmar Overcrossing of the Southern Pacific Company railroad tracks near Coquille on the Oregon Coast Highway in Coos County. Tom Lillebo, Reedsport, submitted the low bid for this job at $18[illegible],480. One additional bid was received, being that of Carl M. Halvorson, Portland, at $185,852. The bids have been referred to the Engineer with authority to award the contract to the low bidder when approval has been obtained from the Public Roads Administration.

"Enegren Ferry Section of the Coos River Secondary Highway in Coos County. Groesbeck & Hickson, Eugene, submitted the low bid for this job at $32,568.50. The second low bid was submitted by Coos Bay Dredging Company, Coos Bay, at $37,972.50. Two higher bids were received. The Commission has awarded the contract to the low bidder, Groesbeck and Hickson.

"North Bend-Coos Bay Roadside Improvement Project on the Oregon Coast Highway in Coos County. Knight Pearcy, Salem, submitted the only bid for this project at $17,140.45. The Commission has awarded the contract to Mr. Pearcy.

"Bridge over Smith River on a county road near Reedsport in Douglas County. Tom Lillebo, Reedsport, submitted the low bid for this work at $178,470. Guy F. Atkinson Company, Portland, submitted the next low and only other bid at $[illegible]65,550. This project was advertised in behalf of the Douglas County Court to whom the bids are being referred for disposition.

"Arlington Rock Production Project on the Columbia River and John Day Highways in Gilliam and Morrow Counties. Rogers Construction Company, Portland, submitted the low bid for this work at $30,55[illegible]. P. B. Doherty and Son, Portland, submitted the second low bid at $31,200. Three higher bids were received. The Commission has awarded the contract to the low bidder, Rogers Construction Company.

"Burns Rock Production Project on three highways in Harney County. A. H. Saxton and Sons, Corvallis, submitted the only bid for this job at $36,850. The Commission has rejected this bid as being too high.

"Construction of two bridges over Long Tom River on the Siuslaw Highway in Lane County. Erick Enquist, Troutdale, submitted the low bid for this work at $49,135. The second low bid was submitted by VaDare Construction Company, Portland, at $51,585. Six higher bids were received. The Commission has awarded the contract to the low bidder, Erick Enquist.

"Oakridge Grading and Oil Mat Surfacing Project on Commercial Street in the City of Oakridge, in Lane County. E. C. Hall Company, Portland, submitted the low bid for this project, using asphalt, at $10,461. The second low bid was submitted by Acme Construction Company, Eugene, at $12,122, using asphalt. Two higher bids were received. The Commission has awarded the contract to the low bidder, E. C. Hall Company.

"'D' River Bridge Section of the Oregon Coast Highway at Ocean Lake in Lincoln County. Harry I. Hamilton Company, Eugene, submitted the low bid for this job at $128,555.50, using asphalt. Valley Construction Company, Portland, submitted the second low bid at $130,890.50, using asphalt. Six higher bids were received. The Commission has rejected all bids as being too high.

"Jordan Valley Maintenance Building in Malheur County. Gilbert Roberts, Hood River, submitted the low bid for this building at $11,741, based on Alternate "A", frame construction. The second low bid was submitted by Howard Halvorson Company, Portland, at $16,600, based on Alternate "B", block construction. One higher bid was received. The Commission has awarded the contract to the low bidder on his bid for Alternate "A", frame construction.

"Juntura-Hope Rock Production Project on the Central Oregon Highway in Malheur County. N. A. Toole Construction Company, Ontario, submitted the low bid for this work at $40,500. The second low bid was submitted by Vernie Jarl, Gresham, at $43,230. One higher bid was received. The Commission has awarded the contract to the low bidder, N. A. Toole Construction Company.

"Storage building at Salem in Marion County. Wayne Barham, Salem, submitted the low bid for this work, based on Alternate "B", frame construction, at $26,745. Erwin Batterman, Salem, submitted the next low bid, based on Alternate "A", at $27,575. Two higher bids were received. The Commission considers block construction the better type and accordingly has awarded the contract to Erwin Batterman, the low bidder for that type of building.

"Troutdale-Dodson Section of the Columbia River Highway in Multnomah County, grading and bituminous macadam construction. Rogers Construction Company, Portland, submitted the low bid at $462,697, using tar. The second low bid was submitted by the Newport Construction Company and Kern & Kibbe, Portland, at $465,089, using tar. Eight higher bids were received. The Commission has awarded the contract to the low bidder, Rogers Construction Company, on the basis of using tar.

"Roadside improvement on the Barnes Road-Multnomah County Line Section of the Sunset Highway in Washington County. Coast Construction Company, Portland, submitted the only bid received for this project at $18,993.70. The Commission has awarded the contract to the Coast Construction Company.

"Furnishing ferry service across the Willamette River at Wilsonville in Clackamas County. J. F. LaRouche, Portland, submitted the low bid for this service at $2,399 per month. Theodore E. Bruck, Wilsonville, submitted the only other bid at $3,890 per month. The Commission has awarded the contract to the low bidder, J. F LaRouche."

The following persons representing the Oregon Trail Association were present and presented a suggested program for additional improvements to this highway: Charles Reynolds, President, La Grande; Frank L. Calise, Secretary, Vale Chamber of Commerce; John L. Caldwell, Jr., Malheur County Commissioner; Harold F. Logue, Secretary, Ontario Chamber of Commerce; Phil Fortnier, President, Baker Chamber of Commerce; Waldo Arnes, Hood River County Commissioner and Chairman of the Mid-Columbia Chamber of Commerce Highway Committee; Ed Steele, Secretary, Hood River Chamber of Commerce; Judge W. R. Webber, Wasco County; and Mr. Amoth, Cascade Locks Chamber of Commerce. Mr. Reynolds headed the group. He presented a blue printed list of projects on the Old Oregon Trail, as follows, for consideration by the Commission in forming its next construction program:

(1) Reconstruct on new alignment between Ontario and Baker County line,
(2) Widen Durkee Undercrossing and flatten approaching curves thereto,
(3) Reconstruct Oxman (formerly Unity) Overcrossing to widen it and eliminate sharp approach curves,
(4) Improve highway between North Powder and Union, either by reconstructing the present route or rerouting it through Ladd Canyon,
(5) Revise the section between La Grande and Pendleton to eliminate hazards,
(6) Widen and straighten the section between Boardman and Arlington,
(7) Reconstruct the section between Quinnton and the John Day River,
(8) Reconstruct the Columbia Gorge Section between The Dalles and Dodson.

Mr. Reynolds advised that these projects are the recommendation of the Oregon Trail Association, which urges the Commission to give them every consideration in the formulation of its program. Others speaking in behalf of these improvements were Mr. Caldwell, who advised that the Malheur County Court is in accord with the Association's plans; Mr. Fortnier, who referred to the recommendations made to the Highway Legislative Interim Committee; Mr. Arnes, who presented for the Commission's consideration a memorandum submitted by the Mid-Columbia Chamber of Commerce and the County Courts of the Counties of Gilliam, Hood River, Sherman, Wasco and Wheeler to the Legislative Interim Committee at its meeting in The Dalles on March 2[illegible], 1948; Mr. Steele,

15307

who advised that the U. S. Army Engineers have funds on hand and will start work on improvement of the Port of Hood River as soon as the Hood River Port Commission can satisfy their demands, which involve the location and construction of the Columbia River Highway on new alignment through Hood River, and who urged the Commission to formally adopt the proposed highway location through this town. In concluding the presentation, Mr. Reynolds urged a faster program of construction of the new Columbia Gorge Highway between Portland and The Dalles to the end that work can be completed within five years. He advised that the Oregon Trail Association has gone on record in favor of an increase in gas tax and motor vehicle license fees in order to provide additional funds to finance the work. Speaking in behalf of the Highway Commission, Chairman Banfield advised that the Commission has not yet adopted a program of construction for the next two years but is now working on it and will give serious consideration to the projects mentioned at this meeting, although it did not appear at all possible that the Commission can include all of them.

A delegation from Malheur County composed of John L. Caldwell, Jr., County Commissioner; Frank L. Calise, City Recorder, Vale; and Harold F. Logue, Secretary, Ontario Chamber of Commerce, appeared before the Commission as representatives of the Malheur County Highway and Industrial Development Association and urged improvements to the following state highway sections: Adrian-Nyssa Section of State Secondary Highway No. 450; Nyssa-Ontario and Ontario-Payette Junction Sections of the Old Oregon Trail; and Cairo-Vale Section of the Central Oregon Highway. Mr. Caldwell headed the group. He presented a brief in support of their oral requests and urged the improvements in the Commission's next construction program. Chairman Banfield pointed out that the State Highway Commission has only a limited amount of funds at its disposal and that it is necessary to distribute these funds in an equitable manner throughout the state so that each district gets a fair share. He also pointed out that two bridges across the Snake River, at Weiser and at Payette, are in very bad condition and in need of replacement which, if done, will take a large part of the money that is allocated to this district; moreover, the Commission has in mind additional improvements to the Old Oregon Trail. The Commission, he said, does not have the money to finance all of this work and the new work that is now being requested. This concluded the conference.

Kenneth Munkres, Chairman of the City Planning Commission, Redmond; Gayle Bartell and John Berning, members of the Planning Commission, appeared before the Commission regarding the status of the proposed one-way street plan for The Dalles-California Highway in Redmond. Mr. Munkres, who acted as spokesman, stated that they wanted to know what has transpired since their last appearance before the Commission and what they can expect in the future, so they can plan accordingly. They were informed that the Engineer has submitted a report on the subject, but the Commission has not had time to discuss it so is not in position to make a statement at this time although it hopes to be able to do so within the next two or three months.

Messrs. Warren Roeder and B. D. Bolt, President and Secretary, respectively, of the Little Walla Walla River Irrigation Union, Freewater, Ore., were present and requested assistance in their efforts to stop the flooding of

their properties and highways in the vicinity of Milton-Freewater by waste waters from the Peacock Milling Company operations at Milton. Mr. Roeder presented a petition signed by 116 residents of this area protesting the action of the Peacock Milling Company in permitting water used for milling purposes to flood the area north of its mill, particularly when the temperature is low. He gave as their feeling that the Highway Commission is concerned because of the condition created on the highway, and inquired if the Highway Department could take action to remedy this situation. The Commission referred the matter to the Engineer and Counsel for investigation and report from the engineering and legal standpoints.

Mr. Fred A. Kruse, Coos County Commissioner, and Mr. Floyd A. Robb, Coos County Engineer, appeared before the Commission regarding the following highway projects:

(1) Repair section of the old highway between Coos Bay and Coquille that has been damaged by the contractor's operations while constructing the new section. Mr. Kruse stated that when the county court executed an agreement with the Commission with respect to the abandonment of the old road it did so with the understanding that the old road would be turned back to the county in a condition as good as it was before the contractor damaged it. The Engineer was instructed to make necessary repairs.

(2) Proposed road on the north bank of the Coos River between Enegren Ferry and Graveyard Point. Mr. Kruse stated that the land owners who donated the right of way for this road have demanded that the improvement start within a reasonable time; otherwise, they will cancel their right of way offer. In absence of an answer in the near future, he stated, the county court will be obliged to release the land owners. The matter was referred to the Engineer and Chief Council to investigate.

(3) Construction of a bridge over Coquille River at Bullards. In this connection Mr. Kruse presented a letter in which the Commission's Secretary was quoted to the effect that the Commission had tentatively approved construction of the bridge on a cooperative basis with the county. The letter was read aloud by the Secretary. Chairman Banfield advised that since that letter was written the Commission has found it necessary to withdraw its offer to the county and that the reasons therefor were explained fully to County Judge L. D. Felsheim at the previous meeting of the Highway Commission. It is the feeling of the Commission, he said, that were funds available they should be spent to build a bridge to replace Enegren Ferry which is on a state highway, rather than to construct one on the county road at Bullards. There followed a general discussion, but the Commission made no change in its previous decision.

The Engineer reported that the City of Portland would like to continue indefinitely the arrangement for use of the area between Harbor Drive and Front Avenue for car-parking purposes, it being the opinion of the members of the City Council that its use for such purpose is much more valuable than were the property landscaped. He pointed out that the agreement with the Public Roads Administration with respect to construction of the Harbor Drive improvement, provides for landscaping the area and according to Mr. T. M. Davis, District Engineer, the attitude of the Public Roads Administration has not changed with respect thereto, although he is willing to recommend that the temporary arrangement for the parking area be extended for one year. The Engineer also pointed out that the area north of the Burnside Street Bridge will be needed by the state's contractor during construction of the highway facilities at the west end of the Steel Bridge, but the area south of the Burnside Bridge will not be needed for such purpose. He suggested that it might be satisfactory to allow parking on the area north of the Burnside Bridge until the contract for the Steel Bridge approaches has been awarded and to allow such use of the area between Burnside Bridge and Morrison Bridge for one year This matter was discussed briefly by the Commission, but no action was taken thereon.

The Commission discussed the appointment of someone to fill the vacancy created by the resignation, because of illness, of Mr. Robert Ruhl from the Advisory Committee of the Travel and Information Department. In the discussion of this matter the Commission recalled that the Advisory Committee in its annual report to the Commission recommends the appointment of Mr. Herb Grey, of Medford, who is a business associate of Mr. Ruhl. The Commission unanimously approved such appointment and instructed the Secretary to convey the information to Mr. Grey and secure his reaction thereto.

The Commission had under discussion matters pertaining to construction of a State Highway Department Office Building in Salem, particularly the selection of architects to design the structure. The applications of a number of qualified architects were presented for the Commission's consideration. It was the considered opinion of the members of the Commission that all of the architects who have sought this appointment are competent and are qualified to perform the service required, but it might be to the state's advantage to select the firm of Whitehouse, Church, Newberry and Rohr, because of their past experience in the design and supervision of buildings heretofore constructed in the State Capitol Group, and their knowledge of the detail requirements to provide a building that will harmonize with the other buildings in that group. Accordingly, the Engineer and the Chief Counsel were authorized to consult with this firm of architects and report back to the Commission information which will serve as a basis for a written agreement covering their appointment.

The Chief Counsel brought up for discussion the bid received by the Commission on July 30, 1948, in Salem, from the American Hardware and Supply Company, Portland, for the purchase of some used steel and other scrap metals which the Commission offered for sale at that time. He advised that the Commission accepted the bid of this company, which was required by the terms and conditions of the specifications, to remove all of the materials made available to it; however, it appears that the company removed only the best

of the material and now refuses to take the balance. He requested instructions and suggested that the Commission might declare the company in default and the balance of its bid deposit forfeited.

The Chief Counsel also advised that bids were also received at the same time for the purchase of some worn-out equipment and that Mr. A. L. Fletcher, Eugene, was the high bidder for a 1935 Ford Sedan at $250. Mr. Fletcher, he said, was notified that his offer had been accepted, but for some reason he has not taken possession of the car and has neglected to respond to numerous inquiries concerning it. He suggested that the Commission might, in this case, also declare Mr. Fletcher in default and his $25 bid deposit forfeited. Following discussion the Commission unanimously approved and adopted the suggestions of the Chief Counsel with respect to both instances.

The Commission discussed a resolution from the County Court of Crook County, requesting that a 9.55-mile section of the Paulina Secondary State Highway No. 380, beginning at its junction with Crooked River Highway No. 14 and extending northeasterly to the junction of the Combs Flat County Road, be eliminated from the State Highway System, and that the Combs Flat County Road between Prineville and its junction with the Paulina Secondary State Highway be substituted therefor. It appeared to the Commission that the County Court, by adoption of this resolution, has fulfilled the state's requirements with respect to such substitution of highways, so it would be proper for the Commission to approve the change, which is in conformity with previous understanding with the county. Accordingly, the attached resolution with regard thereto, marked EXHIBIT "O", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was adopted by the Commission by unanimous vote.

In this connection the Commission discussed a written agreement with the Crook County Court covering improvement of the Combs Flat County Road as a newly designated state secondary highway, pursuant to oral understanding previously had with the County Court. This agreement provides, among other things, for reconditioning and reconstruction of the road to put it in condition to carry the traffic that will move over it and for an expenditure of $70,000 for this purpose, of which amount Crook County shall contribute $35,000 and the state the balance. The Commission unanimously approved and signed the agreement.

The Commission discussed a report from Whitfield, Stratford & Company, Certified Public Accountants, Portland, Oregon, relative to the pro-forma statements to be incorporated in the financial report which is submitted monthly to the Commission by the Chief Accountant. As the result of discussion the Commission unanimously approved the report subject to certain minor changes suggested by Commissioner Chandler and the Chief Accountant, and authorized and instructed the Chief Accountant to submit future financial reports in conformity therewith, subject to such minor changes. The Chief Accountant was also instructed to obtain from the Public Roads Administration, information to enable him to include in his monthly financial reports pro-forma statements concerning Forest Highway Projects which tie in with the overall highway pro-

gram. Chairman Banfield pointed out that the Commission is approving the report of Whitfield, Strafford & Company only insofar as it pertains to the forms of financial statements, and that the subject is not to be confused with the recommendation submitted by the accountants concerning the segregation of engineering functions from the accounting functions, which feature will be the subject of discussion and decision by the Commission at a later date.

The Commission discussed matters pertaining to its budget for the calendar year 1949. The Engineer presented a proposed budget covering expenditures for capital outlays, maintenance, operation, service and clearing accounts, debt service, and reserves, based on a net amount of $41,358,240 from all sources becoming available after deducting contributions to the State Police Department, to the cities and to the counties pursuant to the legal requirements. The Commission unanimously approved the budget in principle but deferred until later definite action on all items except those covering administration expense, general maintenance of primary and secondary highways, and continuing minor betterment projects. The Commission authorized expenditures for these three items as become necessary, but ordered that no other expense be incurred without the Commission's specific approval.

The Commission considered and signed the following agreements, etc.:

Bargain and sale deed conveying unto Jackson County 4.55 acres of land along the Tolo Access Road.

Agreement with Consolidated Timber Company granting a second extension of time to allow removal of timber from land deeded to the state by the company in Tillamook County.

Agreement with Morrison-Knudsen Company covering an exchange of properties in Umatilla County.

Leases with the U.S. Coast Guard covering lease of three parcels of state land on the Upper Columbia River Highway for use as navigation aid sites.

Agreement with Depoe Bay Lighting District covering installation of a highway lighting project on state property along the Oregon Coast Highway, in Depoe Bay, Lincoln County.

Agreement with the City of Gold Beach covering certain street improvements in Gold Beach, Curry County.

Deed conveying unto Pope & Talbot, Inc., state property near Oakridge, in Lane County.

Agreement with Southern Pacific Company covering traffic signal installation on the Silver Creek Falls Secondary Highway at the east city limits of Salem, Marion County.

Joint letter with the Public Roads Administration and the Forest Service covering surfacing and bituminous construction on the John Day and John Day-Burns Forest Highway Projects.

Agreement with Crook County covering disposal of old right of way on the Prineville-Marks Creek Section of the Ochoco Highway.

Easement granting U.S. Forest Service right to develop Forest Service road across state property adjacent to the Pendleton-John Day Highway, in Umatilla County.

Agreement with the O.W. R. & N. Co. and Union Pacific Co. covering use of an electric power transmission line by the state across railroad property on the Columbia River Highway for lighting Tooth Rock Tunnel.

Agreement with Southern Pacific Company granting permission to the state to construct and maintain a public highway across three parcels of the company's right of way in the vicinity of Chrome, Coos County.

Agreement with O. W. R. & N. Co. and Union Pacific Co. covering easement for the Sun Dial Road grade separation project, Multnomah County.

Bargain and sale deed conveying unto Francis Greenhoot and Bessie M. Greenhoot certain property adjacent to the West Portland-Hubbard Highway, in Washington County.

Agreement with Crook County covering designation of the Combs Flat County Road as a state secondary highway and elimination of a section of the Paulina State Secondary Highway No. 380 from the Secondary Highway System.

Agreement with Wade F. Palmer, dba Golden Fir Lumber Co., covering lease of certain state properties in Government Lot 2, Section 26, T. 17 S., R. 4 W., W.M., Eugene, Lane County, to be used for lumber stockpile site.

Agreement with L. A. Smith providing for exclusive right of rent and furnish for hire pleasure boats within the limits of Sunset Bay State Park, Coos County.

Agreement with J. B. Moore and Susan M. Moore whereby the state foregoes condemnation of a gravel pit and haul road on Mr. Moore's property, on the Johns Ranch-Glendale Junction Section of the Pacific Highway, in Josephine County, and agrees to pay him $624.50, and whereby Mr. Moore releases the state from further liability in connection with the use of the pit and hauling road.

Agreement with G. G. Kerns, et ux. covering lease of a stockpile site on the Green Springs Highway near Klamath Falls, Klamath County.

Agreement with U. S. Army Engineers covering restoration of the Vancouver Avenue Bridge over the Columbia Slough, Portland, which was damaged during the Columbia River flood in June 1948.

Quitclaim deed conveying unto Philip Adams 40 square feet of the original Oregon Coast Highway right of way at Gold Beach, Curry County.

Project agreement with the P.R.A. covering the Adrian-Homedale Section of the Nyssa-Adrian Highway, Malheur County.

Project agreement with the P.R.A. covering the Eugene (High Street Walnut Street) Section of the Pacific Highway, Lane County.

The meeting adjourned at 5:00 p.m. to reconvene on the following day at 1:30 p.m. for discussion of matters pertaining to the highway construction program and the 1949 budget.

T H Banfield
Chairman

R H Baldock
State Highway Engineer

A W Schaupp
Commissioner

H B Glaisyer
Secretary

Ben R Chandler
Commissioner

Portland, Oregon
November 5, 1948

The meeting of the State Highway Commission reconvened at 1:30 p.m. in Room 715 (Imperial Room) of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
S. H. Boardman, State Park Superintendent
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp was excused from attending this session.

The Commission discussed a written report from the Engineer dated October 25, 1948, suggesting a program of projects for utilization of funds

available to the Commission for construction purposes during 1949 and 1950, totaling $23,500,000 and including $1,094,000 of state funds for major betterment projects and $19,656,000 of state and Federal funds for Federal Aid improvements. (See copy of Engineer's report in general files for details).

Among the projects discussed for the major betterment program were the following:

Portland Section of the Pacific Highway East, surfacing along streetcar tracks;
Nehalem-West Section of the Oregon Coast Highway, straightening and widening;
Sweet Home Section of the Santiam Highway, widening;
Deadwood Secondary Highway in Lane County, widening and surfacing;
Coos River Secondary Highway, widening;
Redmond Section of The Dalles-California Highway, one-way street plan;
Prineville-Southeast Section of the Paulina Secondary Highway, surfacing across Combs Flat;
Sprague River Road, surfacing and oiling the section to be graded by the Indian Service;
Joseph Section and Enterprise Section of the Wallowa Lake Highway, widening.

The Commission decided definitely not to approve the Deadwood Secondary Highway project in Lane County, estimated to cost $90,000, but deferred a decision with respect to the remaining projects, which are estimated to cost a total of $523,000, until Commissioner Schaupp is present.

Projects suggested by the Engineer for approval in the Primary, Secondary, and Urban Federal Aid Programs were next discussed by the Commission, in the order mentioned, but a decision with respect to them was deferred to allow Commissioner Schaupp an opportunity to express himself with respect to them, except that the Engineer was authorized to make location surveys as may be necessary in connection with each project, it being understood that the Commission is making no commitment whatsoever as to construction and that the projects contained in the First Postwar Construction Program are to be given preference over new projects. It was also understood that the authority to make surveys is to apply to all projects in the construction program, including the major betterment projects. The Engineer was instructed to furnish each member of the Commission a map showing the location of each major betterment project and a letter explaining the necessity for the suggested expenditure. He was also instructed to revise the list of projects contained in his suggested program by adding thereto a column giving the length of each project in miles.

Special consideration was given by the Commission to the allocation of primary Federal Aid Funds for the proposed revision of the Old Oregon Trail through Ladd Canyon, in Union County, the grading, surfacing,

and oiling of which is estimated to cost a total of $1,525,000. The Engineer suggested an expenditure of $950,000 of such amount during the first year's construction for grading and surfacing between North Powder and Ladd Canyon and an expenditure of $575,000 in the second year's program for grading and surfacing the Ladd Canyon Section. The Commission considered it advisable to confine the first year's work to grading only over the entire section, thus leaving the surfacing and oiling work for the second year's program. Accordingly, the Engineer was instructed to tentatively set up $950,000 for such grading work and to provide a substitute project for the $575,000 item thus eliminated.

In the discussion of the Federal Aid Secondary Highway Program, the Commission confirmed its former policy to require counties to acquire all right of way that is needed in connection with county road improvements. The Engineer was instructed to convey such information to all of the county courts and to defer making any survey for a county road improvement until assured by the county court that it will furnish right of way as may be required. It was understood that the Commission will not approve a county road improvement unless the county court will furnish the right of way.

The matter of allocating secondary and urban Federal Aid funds totaling $2,500,000 to finance a bridge across the Willamette River at Salem was given special attention by the Commission. The Commission decided to hold such funds in reserve until the Engineer's report on the subject has been submitted and members of the Commission have had an opportunity to study it. A question arose as to the availability of Federal funds for this work. The Engineer was instructed to secure from the Public Roads Administration information as to the class of Federal funds that may be applied to finance this structure.

The Commission instructed the Engineer to furnish each Commissioner a map showing in one color projects that were approved in the First Postwar Construction Program and in another color the projects discussed at this meeting for the Second Postwar Construction Program.

The Commission discussed briefly with the State Parks Superintendent matters pertaining to state parks, particularly the development of them. In this discussion it was brought out that the State Highway Department is being criticized and that there is a feeling among the general public that not a great deal is being accomplished with respect to developments in state parks, such as providing benches, tables, latrines, etc., that people mostly are interested in and demand. The Parks Superintendent was instructed hereafter to give such features more attention than has been given them in the past.

The State Parks Superintendent reported a request from the Fish and Wild Life Service of the Department of the Interior for permission to trap predatory animals in Silver Creek Falls State Park as is now being done in adjoining areas. It appears that the Fish and Wild Life Service considers it necessary to extend its operations to the state park in order to obtain its objectives. The Commission offered no objection to granting this privilege.

The Chief Counsel reported that the Shoreline Construction Company, contractors for the Hood River Junction-Odell Creek Section of the Odell Secondary Highway, in Hood River County, State Highway Contract No. 3018, has requested that it be declared in default in connection with this job, due to disagreement among themselves, and that their bondsman be requested to take over and complete the work. It appears that the surety will not assume such responsibility unless specifically notified to do so by the State Highway Commission. The Chief Counsel recommended that such action be taken. The Commission approved the recommendation and so ordered.

The meeting adjourned at 4:30 p.m.

EXHIBITS "A" THROUGH "O"

Minutes of November 3, 4, and 5, 1948

EXHIBIT "A"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of November 3, 4, and 5, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Wilson River Highway (State Highway No. 37) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of the Wilson River Highway extending from Tillamook to Donaldson Creek, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for right of way and other purposes; and

WHEREAS, pursuant to the provisions of Section 100-115, O. C. L. A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

(Cont.)

NOV 3 1948

15376

EXHIBIT "B" (Cont.)

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Wilson River Highway, as one of the major highways of the State, carries a large volume of traffic, and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the property described in this resolution is needed and required for use in connection with the construction and maintenance of the section of the Wilson River Highway known and designated as the Tillamook-Donaldson Creek Section.

2. That the following described property is necessary for right of way purposes in connection with said highway, and it is reputedly owned by O. W. Kinnaman and Elsie Kinnaman, husband and wife:

A parcel of land lying in Lot 7 of Section 30, Township 1 South, Range 9 West, W. M., Tillamook County, Oregon, and being a portion of the following described property: That tract of land which was conveyed by that certain deed to O. W. Kinnaman, recorded in Book 76, Page 389 of Tillamook County Record of Deeds; the said parcel being described as follows:

Beginning on the east line of said property at a point on the 1948 relocated center line of the Wilson River Highway, which point is Engneer's Station 40+12.57; said point also being 1379.8 feet south and 9.2 feet west of the northwest corner of the Charles H. Haynes Donation Land Claim; thence South 0° 56' West along the east line of said property a distance of 70.24 feet to a line which is 70 feet southerly from the said highway center line; thence parallel to said center line on a 5799.58 foot radius curve right (the long chord of which curve bears South 86° 05' West) a distance of 183.60 feet and along the arc of a spiral curve right (the long chord of which bears South 87° 08' West) a distance of 26.96 feet to the west line of said property; thence North 0° 24' West along said west line a distance of 158.66 feet to an iron pipe at the northwest corner; thence South 89° 51' East along the north line of said property a distance of 213.47 feet to an iron pipe at the northeast corner; thence South 0° 56' West along the east line a distance of 73.84 feet to the point of beginning.

The parcel of land to which this description applies contains 0.74 acre.

(Cont.)

NOV 3 1948

EXHIBIT "B" (Cont.)

3. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

4. The Commission does hereby further find and declare that, in addition to the acquisition of the real property described in this resolution, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the parcel of real property described in this resolution and the highway which is to be constructed thereover.

5. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

6. That J. M Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcel of land, all rights of access thereto, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcel of real property and all rights of access thereto.

7. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

8. This resolution shall be entered in full in the minutes and records of this Commission as of the third day of November, 1948.

NOV 3 1948

15979

EXHIBIT "C"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, the Commission heretofore adopted as a route along which to construct an access controlled highway the route or location commonly and generally known as the Sullivan Gulch route; and

WHEREAS, said route has been definitely surveyed by the Engineer and descriptions of all necessary rights of way prepared and delivered to Chief Counsel for the purpose of procuring options covering real properties needed in connection with the construction of said proposed highway; and

WHEREAS, throughout the consideration of the said proposed route, the acquisition of right of way therefor, and the construction of a highway thereover, the Chairman of the Commission has insisted that only Highway funds allocated to Highway District No. 1 be used for the acquisition of necessary real properties; and

WHEREAS, information presented to the Commission discloses and establishes as a fact that Highway funds allocated to District No. 1 available for expenditure in said District during the years 1948-49-50 amount to a total of $5,628,250; and

WHEREAS, other information made available to the Highway Commission discloses that the estimated cost of real properties necessary for rights of way for said project amount to a sum of $3,000,000; and

WHEREAS, it is the opinion and judgement of the Commission that of the funds allocated to Highway District No. 1 the sum of $1,000,000 should be set aside at this time and made available at once for the purchase of real properties which may be acquired with the approval of the Commission during the year 1948 and the year 1949.

NOW THEREFORE, be it and it hereby is resolved by the Commission, all members being present and voting affirmatively as follows:

1. That there shall be and hereby is set aside and allocated at this time for the purchase of real properties needed in connection with the construction of the so-called Sullivan Gulch Highway, the sum of $1,000,000, which said sum of $1,000,000 shall be charged against Highway funds or revenues allocated to and available for highway purposes in Highway District No. 1.

2. That Chief Counsel, as head of the Right of Way Department, is hereby authorized to procure options on properties needed for use in connection with the construction of said highway and bring said options to the Commission for approval.

(Cont.)

NOV 3 1948

EXHIBIT "C" (Cont.)

3. That the properties first purchased shall be real properties on which there are no improvements, but Counsel is authorized to take options on other properties and bring the same before the Commission for special consideration.

4. That the Commission's Chief Auditor hereby is instructed to keep an up-to-date, accurate account of all monies expended for rights of way in connection with the said proposed Sullivan Gulch Highway and each month advise the Commission of the total expenditures to the end that the Commission may at all times be advised with respect to the unexpended part of said $1,000,000 appropriation.

5. That the Commission's Chief Counsel, as head of the Right of Way Department, is authorized, when acquisitions of properties are accomplished on which properties there are residence or other buildings which the owner desires to rent or for which there are tenant applicants, to arrange for leases covering said properties, which leases shall not extend beyond six months, but in which leases there may be a provision for renewal, but any renewal period shall be subject to cancellation at the option of the Highway Commission or at the option of the lessee upon thirty days' written notice.

6. That this resolution be entered in the minutes and records of the Commission as of the third day of November, 1948.

15390

EXHIBIT "D"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, the Highway Commission, in accordance with the provisions of Chapter 4, Oregon Laws 1947, is authorized and empowered "to lay out, locate, relocate, adopt, establish, construct, designate, maintain and supervise the use and operation of new highways which shall be known as throughways", as that term is defined in this act, and

WHEREAS, a throughway, the location, construction and maintenance of which, is authorized by said law, is defined therein as follows:

> "For the purposes of this act a throughway is defined as a highway or street especially designed for through traffic, and over, from or to which owners or occupants of abutting land or other persons have no easement of access or only a limited easement of access, light, air or view by reason of the fact that their property abuts upon such throughway or for any other reason.",

and

WHEREAS, said law with respect to powers vested in the Highway Commission, declares that:

> "Any relocated section of an existing highway and such portions of existing highways which at the time the same are designated as throughways have less than ten commercial businesses abutting thereon catering to the motoring public in any one mile of such existing highway may be designated and constructed as or converted into a throughway by the highway commission.",

and

WHEREAS, the Commission has caused to be prepared and filed in the office of the Highway Commission at Salem, Oregon, a complete analysis and disclosure of all sections of the highways hereinafter named and defined, which highways or sections of highways on the date of this resolution, to-wit: on the 3rd day of November, 1948, have less than ten commercial businesses abutting thereon in any one mile, catering to the motoring public, and the portions and sections of said highways which have abutting thereon ten or more commercial businesses per mile catering to the motoring public, and

WHEREAS, the Highway Engineer has caused such study and examination to be made, and has filed in the office of the Highway Commission at Salem, Oregon, his written report of such studies, examination and disclosure, and has likewise caused to be prepared and filed in said office a complete set

(Cont.)

N 3 1948

EXHIBIT "D" (Cont.)

of maps on which are shown the highways hereinafter named and the sections of said highways on which there are, on the date of the adoption of this resolution, ten or more commercial businesses abutting thereon catering to the motoring public in any one mile of such existing highway or sections thereof, and

WHEREAS, the Commission does hereby, after due consideration, find and declare that for the purpose of preserving human lives and minimizing property damage, the safe and convenient transporation of persons and property by motor vehicle, and the safety and welfare of the public generally, the highways or sections of highways hereinafter designated and defined, should be selected, adopted, classified, constructed, maintained and operated as throughways, as said term is defined in said law.

NOW, THEREFORE, Be it and it hereby is resolved, declared and ordered by this Commission, as follows:

1. That the following named and designated existing highways and/or sections thereof, and any relocated part or section of any one of said highways shall be, and the same hereby are selected, designated and established as throughways, and from and after the date of this resolution said highways and all parts thereof shall, when located, reconstructed or otherwise permanently improved be relocated, constructed and reconstructed as throughways, as said term is defined in said law.

2. The highways, sections and units thereof which hereby are selected, designated and adopted as throughways within the meaning and purpose of said act, are these:

Pacific Highway East, 1E, concerning and with respect to which 9 maps have been prepared and filed, which maps are herein identified as Group 1.

Pacific Highway West, 1W, concerning and with respect to which 7 maps have been prepared and filed, which maps are herein identified as Group 2.

Dallas-Coast Highway, #192, concerning and with respect to which 2 maps have been prepared and filed, which maps are herein identified as Group 25.

3. When any one of said above named highways, or any section or unit of the same, is relocated, reconstructed or otherwise permanently improved, the Engineer hereby is instructed and directed to accomplish said work so that when said highway, or any section thereof, is completed, it shall conform to and in all respects satisfy the specifications and requirements of a throughway as said term is defined in this act.

4. When any of said highways, or sections thereof, are located, relocated or constructed as a throughway, all right of access from lands abutting thereon to said highway, or from said highway to said abutting lands, shall be acquired by the State. If access to any of said highways or from any of said highways to lands abutting thereon is provided and allowed, such access shall be only at such points and in such manner and for such purpose as the Highway Commission may direct, all of which shall be disclosed and specified in the deed or other instrument of conveyance of title to the State.

(Cont.)

NOV 3 1948

EXHIBIT "D" (Cont.)

5. The Right of Way Department, when acquiring title to lands upon which said highways, or sections thereof, are to be constructed, reconstructed or relocated, shall acquire from the abutting owner all right of access to said highway or from said highway to said abutting lands, except as otherwise ordered by the Commission duly entered in its minutes and incorporated in the instrument of conveyance.

6. Whenever any section or unit of any of said existing highways is, subsequent to the adoption of this resolution, permanently improved, and said section or unit has or had at the date of the adoption of this resolution and order on any one mile of any section thereof, ten or more commercial businesses catering to the motoring public, then with respect to said units or sections, the Right of Way Department is hereby directed to procure and acquire all right of access from said abutting lands to said highway and from said highway to said abutting lands, which acquisition shall be made pursuant to the authority vested in the Commission under the provisions of Subsection 4 of Section 100-115, O C.L.A. or amendments or supplements thereof.

7. Other and additional highways or sections of highways may be selected, designated and adopted as throughways when, in the judgment and opinion, such action is in public interest.

8. The Engineer is hereby instructed to erect or cause to be erected and thereafter maintained at suitable and appropriate sites along said highways appropriate signs advising the public that the highway upon which said sign is placed has been designated and made a throughway and is subject to access and other controls vested in the State Highway Commission by law. Said signs shall be of such design and size, and shall be placed at sites which will give to the general public the notice intended.

9. The maps herein referred to as Group 1 to Group 25, inclusive, which maps are certified as bearing date November 3, 1948, and the signature of W. C. Williams, First Assistant State Highway Engineer, hereby are by this reference adopted and approved for the purpose for which they were prepared and hereby by this reference made a part of this resolution. (*)

This resolution shall be entered in the minutes and records of the Commission as of the third day of November, 1948.

FOOTNOTE: (*)

The maps referred to in the above resolution are of such bulk that it has been necessary to file them separately from the office copy of the resolution. They may be referred to as occasion arises in the file described on the face of the office copy of the resolution. (Throughways and Rights of Access File No. 4)

NOV 3 1948

EXHIBIT "E"

Minutes of November 3, 4, and 5, 1948

R E S O L U T I O N

WHEREAS, acting under the provisions of Section 115-394 O.C.L.A. the Commission has found and now finds:

(1) that many highways and sections thereof have been and are damaged due to the movement of motor vehicles having combined weights in excess of 36,000 pounds or single axle weights in excess of 8,000 pounds during periods of flood, excessive rainfall or periods of freezing and thawing; and

(2) that such climatic conditions vary with the seasons and also the locale; and

(3) that the movement of vehicles having weights in excess of those herein stated after the inception of such conditions causes substantial damage to highway roadbeds; and

(4) that many sections of highways subjected to such conditions can only be preserved and protected by the immediate closure thereof to motor vehicles having weights in excess of those herein stated:

NOW THEREFORE, all members of the Commission being present and voting affirmatively, the Commission does hereby order:

1. That upon the occurrence of a flood, excessive rainfall, freezing or thawing in any locality of this state affecting the stability of any section or sections of highways, the State Highway Engineer, either Assistant Engineer, or any Division Engineer with the approval of the State Highway Engineer, hereby are directed to post any such section or sections of highway .

2. Immediately upon the posting of any such section, the same shall be closed to the movement of all motor vehicles other than those having gross weights of 36,000 or less and single axle weights of 8,000 pounds or less.

3. Such posting shall continue so long as such conditions are found to exist by the State Highway Engineer.

4. Nothing herein shall be deemed to modify any action or actions of the Commission based upon peculiar facts or circumstances applying to any section of highway.

NOV 3 1948

EXHIBIT "F"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Banks	$ 1,056.19
Cornelius	3,339.62
Creswell	2,659.73
Dayton	2,715.31
Gaston	1,423.94
Glendale	2,381.78
Haines	1,612.08
Helix	782.52
Juntura	714.11
Merrill	2,770.90
Sherwood	2,407.44
Troutdale	902.25
Waldport	2,693.93

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Banks Wilkes Avenue
Cornelius - "Q" Street, 4th Street
Creswell - "D" Street, "C" Street, 5th Street, 3rd Street, 2nd Street, 1st Street, Front Street, "A" Street
Dayton - 8th Street, 7th Street, 6th Street, 5th Street, 4th Street, 3rd Street, 2nd Street, 1st Street, Lafayette Street, Oak Street, Church Street, Main Street, Alder Street, Mill Street
Gaston - Main Street, 2nd Street, Church Street, Park Street, also all city streets which require patching
Glendale - Willis Avenue, Second Street, Third Street, Fourth Street, Fifth Street, Sixth Street, Molly Street, James Avenue, Montgomery Avenue, First Street

(Cont.)

NOV 3 1948

EXHIBIT "F" (Cont.)

Haines - 3rd Street, Ruby Street, alley between 3rd and 2nd
Helix - Solar Street
Juntura - Hildah Street, First Street
Merrill - Clay Street, Third Street
Sherwood - Adair Hill (Wilsonville Road), Willamette Street, Railroad Street, Second Street, also work on outgoing streets
Troutdale - Garfield, Killin; also the following intersections: Killin and Willamette, Killin and Dora, Killin and Harlow, Benton and Dora, Benton and Harlow, Benton and Kibling, Lincoln and Dora, Everett and Dora, Garfield and Dora, Lincoln and Harlow
Waldport - Broadway

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the third day of November, 1948.

EXHIBIT "G"

Minutes of November 3, 4, and 5, 1948

R E S O L U T I O N

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

Charlotte Creek-Murphy's Camp Section of the Umpqua Highway
in Douglas County

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above-mentioned section of state highway, together with the map, which for identification purposes bears the map file Nos. 4B-21-23 and 4B-21-24, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the third day of November, 1948.

NOV 3 1948

EXHIBIT "H"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2815, with Rogers Construction Co., for grade widening and oil mat surfacing on the Unity Junction-Mill Gulch Section of the Baker-Unity Highway in Baker County; completed July 31, 1948.

Contract No. 2816, with Rogers Construction Co., for surfacing and oiling on the Unity Junction-Ironside Section of the John Day Highway in Baker and Malheur Counties; completed September 7, 1948.

Contract No. 2845, with McNutt Bros., for grading on the Glendale Junction-Wolf Creek Section of the Pacific Highway in Douglas and Josephine Counties; completed September 28, 1948.

Contract No. 2894, with the Hydraulic Dredging Co., Limited, for hydraulic embankment on the Troutdale-Wahkeena Creek Section of the Columbia River Highway in Multnomah County; completed September 27, 1948.

Contract No. 2899, with Albert W. Denton, for regrading and oil mat surfacing on the Madras Section of The Dalles-California Highway in Jefferson County; completed August 5, 1948.

Contract No. 2919, with Vernie Jarl, for grading and oil mat surfacing on the Hay Creek-Condon Section of the Wasco-Heppner Highway in Gilliam County; completed September 2, 1948.

Contract No. 2925, with J. R. Taggart Co., Inc., for regrading and oil mat surfacing on the Butte Creek-Kinzua Section of the Kinzua County Road in Wheeler County; completed September 4, 1948.

Contract No. 2928, with Jack Robinson, for grading and bituminous surfacing on the Reedsport Junction Section of the Oregon Coast Highway in Douglas County; completed September 20, 1948.

(Cont.)

EXHIBIT "H" (Cont.)

Contract No. 2939, with Leonard & Slate Ore. Limited, J. C. Compton and O. C. Yocom Co., for grading and paving on the Pringle Corner-McMinnville Section of the Salmon River and Pacific West H ghways in Yamhill County; completed September 29, 1948.

Contract No. 2948, with Gerald Miller, for grading and topping on the East Cottonwood Canyon Section of the Waso-Heppner Highway in Gilliam County; completed September 16, 1948.

Contract No. 2962, with Vernie Jarl, for grading and oil mat surfacing on the Crooked River Section of the Ochoco Highway in Crook County; completed September 17, 1948.

Contract No. 2963, with F. L. Somers, for furnishing crushed gravel in stockpiles on the Silver Lake-Harvey Creek Section of the Fremont Highway in Lake County; completed October 12, 1948.

Contract No. 2964, with F. L. Somers, for furnishing crushed gravel in stockpiles on the Harvey Creek-Chewaucan River Section of the Fremont Highway in Lake County; completed July 26, 1948.

Contract No. 2965, with J. A. Terteling & Sons, Inc., for grading, surfacing, oiling and structure on the Adrian-Homedale Section of the Nyssa-Adrian Highway in Malheur County; completed October 8, 1948.

Contract No. 2971, with Lofts & Son, for furnishing crushed rock in stockpiles on the Kent-Cow Canyon Junction Section of the Sherman Highway in Sherman and Wasco Counties; completed September 3, 1948.

Contract No. 2991, with A. H. Saxton & Sons, for furnishing crushed rock in stockpiles on the Hebo Section of the Oregon Coast and Three Rivers Highways in Tillamook County; completed May 26, 1948.

Contract No. 2992, with C. H. Grimstadt and F. Vanderveldt, for grading and paving on the Pendleton (18th St.-1st St.) Section of the Old Oregon Trail in Umatilla County; completed October 1, 1948.

Contract No. 3029, with Roseburg Paving Co., for paving on the Riddle (Main & 4th St.) Section in Douglas County; completed September 28, 1948.

Contract No. 3038, with General Construction Co., for hydraulic embankment on the Swift Secondary Highway in Multnomah County; completed July 30, 1948.

(Cont.)

NOV 3 1948

EXHIBIT "H" (Cont.)

Contract No. 3042, with D. F. McKenzie, for re-oiling on the Kent-Cow Canyon Junction Section of the Sherman Highway in Sherman and Wasco Counties; completed September 15, 1948.

Contract No. 3047, with Baker & Wilson, for rock surfacing and bituminous macadam surfacing on the Florence (Lincoln & Hamlin Sts.) Section in Lane County; completed September 30, 1948.

Contract No. 3048, with J. N. & M. J. Conley, for bituminous macadam surfacing on the Newport (Canyon Road) Section in Lincoln County; completed October 2, 1948.

Contract No. 3055, with Porter W. Yett, for oiling and paving on the Beaverton (Lombard Ave. & East St.) Section in Washington County; completed October 18, 1948.

Contract No. 2856, with John A. Logan, for grading, bituminous macadam and bridge on the Tutuilla Creek Section of the Pendleton-John Day Highway in Umatilla County; completed July 2, 1948.

Contract No. 2937, with Rogers Construction Co., for grading and oil mat surfacing on the Bonanza-Poe Valley-Malin Section of the Bonanza-Malin County Road; completed July 13, 1948. KLAMATH Co.

Contract No. 2980, with Jed Wilson, for furnishing crushed rock in stockpiles on the Klaskanine Summit-Jewell Section of the Nehalem Secondary Highway in Clatsop County; completed September 24, 1948.

Contract No. 3040, with D. F. McKenzie, for bituminous macadam surfacing on the Central Point (Pine St.) Section in Jackson County; completed September 18, 1948.

Contract No. 2976, with Babler Bros., for bituminous macadam surfacing on the Johns-Mackin Gulch Section of the Pacific Highway in Douglas and Josephine Counties; completed October 8, 1948.

Contract No. 2961, with Perkins Bros., for construction of the Crooked River Bridge on the Ochoco Highway in Crook County; completed October 26, 1948.

Contract No. 2974, with Walder and Kenworthy, for construction of the Troutdale Grade Separation and Bristol Overpass on the Columbia River Highway in Multnomah County; completed October 30, 1948.

(Cont.)

NOV 3 1948

EXHIBIT "H" (Cont.)

Contract No. 2996, with Snook Brothers, for construction of the North Powder River Bridge Section of the North Powder River Road in Baker and Union Counties; completed September 22, 1948.

Contract No. 2945, with W. R. Grasle Company, for installation of the Parkrose Traffic Signal System on the Parkrose Section of the Columbia River Highway in Multnomah County; completed October 20, 1948.

Contract No. 2985, with J. S. Morris Company, for painting the Coos Bay Bridge on the Oregon Coast Highway in Coos County; completed October 21, 1948.

Contract No. 3044, with J. S. Morris Company, for painting the Catching Slough Bridge on the Coos River Highway in Coos County; completed October 21, 1948.

Contract No. 2905, with E. C. Hall Company, for construction of four bridges on the Milton-Washington State Line Section of the Oregon-Washington Highway, in Umatilla County; completed September 4, 1948.

Contract No. 2931, with Lindstrom Bros., for widening of the Dairy Creek Bridge on the Tualatin Highway in Washington County; completed August 31, 1948.

Contract No. 3001, with W. R. Grasle Company, for installation of the Pendleton Traffic Signal System, City of Pendleton, in Umatilla County; completed on September 10, 1948.

Contract No. 2908, with VaDare Construction Co., for construction of the Stillwell Bridge over Trask River on the Tillamook-Netarts Highway in Tillamook County; completed June 29, 1948.

Contract No. 3021, with Joseph Holt, for straightening up the steel truss of the South Dillard Bridge on the Pacific Highway in Douglas County; completed September 14, 1948.

Contract No. 2999 with H. P. Fisher & Sons for painting the Yaquina Bay Bridge on the Oregon Coast Highway in Lincoln County; completed September 20, 1948.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

NOV 3 1948

EXHIBIT "I"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Salmon River and Pacific West highways known as the Pringle Corner-McMinnville Section in Yamhill County, the northerly terminus of which is at Highway Engineer's Station 649+50 of the relocated line and the southerly terminus of which is at Highway Engineer's Station 383+22 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highways a portion or unit of the right of way of the highways as formerly located has been eliminated from the boundaries of the new location, which eliminated section or unit will no longer be needed for highway purposes; and

WHEREAS, Yamhill County and the Highway Commission have entered into an agreement under date of December 27, 1946, relating to the use and jurisdiction of the abandoned section; and

WHEREAS, the contract for the construction of this relocated section of the Salmon River and Pacific West highways completed on September 29, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the remaining section or unit of the right of way of said highways which is affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way which by reason of the relocation of the said highways is no longer within the boundaries of the new right of way and which portion lies between Highway Engineer's Station 477+00 and Highway Engineer's Station 598+00 of the reconstructed highways, and which area is identified and shown colored in red, and otherwise designated as Unit "A" on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highways but all of said abandoned section of the right of way of said highways is to remain and be maintained as a public highway. The Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Yamhill County, and said road shall thereafter be maintained by the County for public use. (*)

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highways and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with

(Cont.)

NOV 3 1948

EXHIBIT "I" (Cont.)

all the said area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Yamhill County a duly certified copy thereof, and shall file with the Clerk of Yamhill County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 152, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

NOV 3 1948

EXHIBIT "J"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocated a section of the Oregon Coast Highway No. 9 in Coos County; and

WHEREAS, by reason of the relocation of said section of said highway, a portion or unit of the right of way of the highway as originally located is eliminated and will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the unit or section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION as follows:

1. That the section of the Oregon Coast Highway No. 9 known as the Glasgow-Hauser Section, which begins at the north end of the Coos Bay Bridge on the new route and ends at Hauser on the new route, has been completed and made available for travel, and that the section of the old route herein defined and described as Unit "A" shall no longer be part of the route of the Oregon Coast Highway, but shall be eliminated therefrom.

2. The section of the old route of said highway which is identified as Unit "A" and more particularly described as follows:

Unit "A"

All that part of the former route of the Oregon Coast Highway lying west of a line 50 feet westerly from, measured at right angles to the center line of the relocated Oregon Coast Highway beginning at Highway Engineers's Station 317+70 of the relocated Oregon Coast Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 14, Township 24 South, Range 13 West, W. M.; thence northerly via the former route of the Oregon Coast Highway to State Highway Engineer's Station 320+50 of the relocated Oregon Coast Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 14, Township 24 South, Range 13 West, W. M.

(Cont.)

NOV 3 1948

EXHIBIT "J" (Cont.)

shall be and hereby is abandoned as a part of said highway, and hereafter all right, title and interest which the State has in said right of way shall be permitted to revert to the owners of the abutting land.

3. There is attached hereto and made a part hereof a print or sketch map on which is shown colored in brown the section of the old route of said highway designated as Unit "A" and there is likewise shown on said print colored in green the route of the highway adjacent to said Unit "A" as relocated. (*)

4. That this resolution be entered in the minutes and records of the Highway Commission and a certified copy thereof delivered to the County Court of Coos County.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original reso lution on file in the office of the State Highway Commission, Salem, being Resolution No. 194, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

NOV 3 1948

EXHIBIT "K"

Minutes of November 3, 4, and 5, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the Tampico-Lewisville Secondary Highway in Benton County, the northerly terminus of which is at Highway Engineer's Station 288+05.0 of the relocated line and the southerly terminus of which is at Highway Engineer's Station 11+82.0 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway, as formerly located, has been eliminated from the boundaries of the new location, and which eliminated section or area is no longer needed for highway purposes; and

WHEREAS, the real property, title to which has been vested in the State of Oregon, by and through its State Highway Commission, by a deed executed by the United States of America by the Farm Federal Mortgage Corporation, which deed is recorded in Book 119, Page 830, Deed Records of Benton County, Oregon, under date of October 25, 1947, is hereby accepted for and on behalf of the State of Oregon; and

WHERRAS, it is the purpose of the Highway Commission to dedicate the real property described in said deed to highway purposes, and in particular for right of way uses in connection with the relocation of the said secondary highway; and

WHEREAS, it is likewise the purpose of the Highway Commission to take official action in regard to the relocation of said highway and the acceptance and dedication of said right of way.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the right of way as deeded to the State of Oregon by the aforesaid deed is hereby established as the official route of the Tampico-Lewisville Secondary Highway and which right of way is shown colored in green on the map attached hereto and marked "Exhibit A". In connection with all the area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

(Cont.)

NOV 3 1948

5348

EXHIBIT "K" (Cont.)

2. That the portion of the old right of way which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 32+20 and Highway Engineer's Station 1+10 of the former highway, and which area is identified and shown colored in brown on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Benton County, or may be vacated as the County Court may determine. (*)

3. The Commission does hereby find and declare that there are no persons living on the said abandoned portion of the right of way of said highway identified as colored in brown on said "Exhibit A", and that there is no community which requires service over said road. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Benton County a duly certified copy thereof, and shall file with the Clerk of Benton County a like certified copy and said County Court is hereby respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover or vacate the same as the County Court may determine. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 195, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

NOV 3 1948

EXHIBIT "L"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said nvestigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: . . . . . Pacific Highway East . . . . . .
Highway number: . . . . . 1E . . . . . Route number . . . . US99E . . .

Location of Termini	Established Speed
M.P. 73.94 (E. of Cox Creek) to M.P. 74.16 (Albany city limits)	45 miles per hr.

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "M"

Minutes of November 3, 4, and 5, 1948

RESOLUTION

WHEREAS, the Commission on July 21, 1947, upon the recommendation of its State Highway Engineer and after careful study and consideration, adopted a resolution under the authority and within the meaning of Chapter 156, Oregon Laws 1947; and

WHEREAS, His Excellency, Earl Snell, on August 4, 1947, approved said resolution under the authority and within the meaning of Chapter 156, Oregon Laws 1947; and

WHEREAS, by the terms of said resolution, the Commission adopted and approved Exhibit "A" and Exhibit "B", by which action on the part of the Commission certain highways and certain sections of highways are designated and classified as Group I Highways, and other highways and sections of highways are designated and classified as Group II Highways; and

WHEREAS, among the highways and sections of highways designated and classified in said resolution as Group II Highways, are the following highways and sections of highways:

That section of Secondary State Highway No. 163, otherwise known as Silver Creek Falls Highway, which said section begins at Salem and ends at the junction with Secondary State Highway No. 162, otherwise known as North Santiam Highway; and

That section of Secondary State Highway No. 162, otherwise known as North Santiam Highway, which said section begins at the junction of said highway with the Silver Creek Falls Highway and ends at Niagara, exluding, however, for classification purposes the relocated section of said highway which lies between Mehama and Mill City, which relocated section has not yet been constructed; and

Secondary State Highway No. 213, otherwise known as the Mehama-Mill City Secondary Highway, which said highway begins at Mehama and ends at Mill City, over which said highway there is now being routed and will continue to be routed until the section of Secondary State Highway No. 162, which section begins at Mehama and ends at Mill City, has been constructed, traffic moving over Secondary State Highway No. 162; and

WHEREAS, the State Highway Engineer, having made due and proper investigation and inspection of said highways, and sections of highways, and based upon such study and inspection, has made and filed with the Commission his written report and recommendation, which said report by this reference is made a part hereof; and

WHEREAS, said Engineer has in and by said written report found and recommended that said highways, and sections of highways, are of such structure, character, design and condition of repair as to permit the movement thereover of vehicles, or combinations of vehicles having a length and combined and gross weight equal to the lengths and combined and gross weights authorized, by said resolution, to be moved, upon

(Cont.)

NOV 3 1948

EXHIBIT "M" (Cont.)

issuance of permit, over Group I Highways, and that said highways and sections of highways be reclassified and be designated and classified as Group I Highways; and

WHEREAS, the following described section of highway is not classified and designated by said resolution as either a Group I or Group II Highway:

That section of Secondary State Highway No. 162, otherwise known as North Santiam Highway, which said section begins at Mill City and ends at Niagara; and

WHEREAS, said Engineer, having made due and proper investigation and inspection of said section of North Santiam Highway, and based upon such study and inspection, has made and filed with the Commission his written report and recommendation, which said report by this reference is made a part hereof; and

WHEREAS, said Engineer has in and by said written report found and recommended that said section of North Santiam Highway is of such structure, character, design and condition of repair as to permit the movement thereover of vehicles, or combinations of vehicles having a length and combined and gross weight equal to the lengths and combined and gross weights authorized, by said resolution, to be moved, upon issuance of permit, over Group I Highways, and that said section of highway be classified and designated as a Group I Highway; and

WHEREAS, based upon the advice and recommendation of said Engineer, it is the judgment and opinion of the Commission, that the public interest will be advanced by the classification or reclassification and designation of all aforesaid highways and sections of highways as Group I Highways;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERDD by this Commission, all members being present and voting affirmatively:

1. That the classifications heretofore made of the above-described highways and sections of highways hereby are changed and said highways and sections of highways shall hereafter be enumerated and included within the group of highways or sections of highways designated and defined as Class I Highways for the purpose of issuance of permits authorized by the resolution adopted by the Commission July 21, 1947. The classification and designation of said highways and sections of highways by which said highways and sections of highways were placed in Group II hereby is rescinded and declared of no effect.

2. That before any permit or permits are issued pursuant to this resolution, the resolution shall be submitted to His Excellency, John Hall, for his approval.

3. That this resolution be entered in the minutes and records of the Commission as of the 3rd day of November, 1948, and the Secretary is hereby authorized and directed to deliver to the Superintendent of State Police a full, complete, and correct copy thereof, and to the Public Utilities Commissioner a like copy.

EXHIBIT "B"

Minutes of November 3, 4 and 5, 1948

RESOLUTION

WHEREAS, the Commission on July 21, 1947, on recommendation of its State Highway Engineer and after careful study and consideration, adopted a resolution under the authority and within the meaning of Chapter 156, Oregon Laws, 1947, which said resolution was approved by His Excellency Earl Snell on August 4, 1947; and

WHEREAS, by said resolution the Commission classified certain highways and sections of highways as Group I and Group II highways, which said classifications are evidenced in two exhibits, marked Exhibit "A" and Exhibit "B" and made a part of said resolution; and

WHEREAS, by said resolution a section of the Oregon Coast Highway; namely, the section beginning at mile post 364.33, which beginning point is otherwise designated as Pistol River, and extending thence south to the Oregon-California State Line, was classified in Group II; and

WHEREAS, the State Highway Engineer has made due and proper investigation and inspection of said section of said highway and has made and filed in the Commission's records at Salem, Oregon, his report and recommendation, to which report and recommendation the Commission has given due consideration; and

WHEREAS, said Engineer has in and by said written report found and recommended that the said section of the Oregon Coast Highway is now of such structure, character, design and condition as to permit the movement thereover of vehicles or combinations of vehicles having a length and combined and gross weight equal to the lengths and combined and gross weights authorized by said original resolution to be moved under the authority of permits issued by the Commission for the movement of vehicles over Group I highways, and said Engineer has further recommended that said section of the Oregon Coast Highway be reclassified and transferred from Group II to Group I.; and

WHEREAS, based upon the advice and recommendation of said Engineer and upon the Commission's independent study and consideration of facts submitted in said report, it is the judgment and opinion of the Commission that public interest will be advanced by the reclassification of said section of the Oregon Coast Highway and the transfer of said section from Group II to Group I highways;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED and ordered by this Commission, all members being present and voting affirmatively, as follows:

(Cont.)

NOV 3 1948

EXHIBIT "N" (Cont.)

1. That the above specified and described section of the Oregon Coast Highway be and said section hereby is designated and classified as one of the Group I highways so as to qualify said highway for the issuance of permits authorized by said resolution adopted July 21, 1947, and the former classification of said section of highway as Group II is hereby rescinded.

2. That hereafter when the Engineer upon careful and proper investigation as required by said law finds with respect to any of the highways or sections of said highways remaining in Group II under the provisions of said resolution adopted July 21, 1947, that they are of such structure, character, design and condition of repair as to permit the movement thereover of vehicles or combinations of vehicles having a length and combined gross weight equal to the lengths and combined and gross weights authorized by said original resolution to be moved under permits issued by the Commission for movement over Group I highways, then said Engineer is hereby authorized and directed to reclassify said highway or section of highway and transform the same to Group I highways and report such action to the Commission for appropriate record in the Commission's minutes.

3. That this resolution be entered in the minutes and records of the Commission as of the 3rd day of November, 1948, and the Secretary is hereby authorized and directed to deliver to the Superintendent of State Police a full, complete and correct copy thereof and to the Public Utilities Commissioner a like copy.

EXHIBIT "O"

Minutes of November 3, 4 and 5, 1948

RESOLUTION

WHEREAS, under the provisions of Title 100 O.C.L.A., and in particular Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the County Court of Crook County and the State Highway Commission heretofore, by mutual agreement, selected the county road known as County Market Road No. 6 and made the same a secondary state highway, to be known as the Paulina Secondary State Highway No. 380 in Crook County; and

WHEREAS, within the meaning, purpose, and authority of said law the Highway Commission and the County Court of said County have found and declared that the best interests of the general public, and of Crook County in particular, will be served by the elimination from said secondary state highway of the section or unit described as follows:

A Section of the Paulina Secondary State Highway No. 380:

Beginning at a junction of the Crooked River Highway No. 14 with the Paulina Secondary Highway No. 380 in Section 13, T. 17 S., R. 16 E., W.M.; thence in a northeasterly direction to the junction of the Combs Flat County Road with the Paulina Secondary Highway No. 380, in Section 13, T. 16 S., R. 17 E., W.M., a distance of approximately 9.55 miles.

WHEREAS, these parties have also found and declared that it will be in the interest of the general public to select and designate the county road of Crook County, defined and described as follows:

An Extension of the Paulina State Secondary Highway No. 380:

Beginning at the junction of the Combs Flat County Road with the Ochoco State Highway No. 41 east of the city limits of Prineville; thence southeasterly to a junction of the Combs Flat Road with the presently designated Paulina Secondary State Highway No. 380, in Section 13, T. 16 S., R. 17 E., W.M., a distance of approximately 16.6 miles,

and make the same a part of said Secondary Highway No. 380.

EXHIBIT "O" (Cont.)

NOW THEREFORE, be it and it hereby is resolved by the Highway Commission as follows:

1. That the first above-described highway or section of highway be and the same hereby is eliminated and removed from said Paulina State Secondary Highway No. 380, and shall thenceforth revert to Crook County and thereafter be maintained as a county road.

2. That the second above-described county road be and the same hereby is selected, designated, and adopted as a secondary state highway, and shall become a part of said Paulina Secondary State Highway No. 380.

3. That this resolution is recognized as a companion resolution to the one adopted by the County Court of Crook County by which County resolution the State is requested to eliminate from said secondary state highway the first section of highway above described, and adopt as a secondary state highway the second above-described highway, which is recognized as a county road in its original status.

4. The map attached hereto is by this reference made a part hereof, on which map there is shown colored in red the section of said secondary state highway which by this resolution and by the companion agreement is eliminated from said secondary highway and there is shown colored in green the county road which by these proceedings has been selected, designated, and made a part of said Secondary State Highway No. 380. (*)

5. That this resolution be entered in the minutes and records of the Commission as of the 4th day of November, 1948.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 196, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein. A copy of this resolution, with map attached, is also filed as "Secondary Highway Designation" file No. 13. The original copy of the agreement covering this matter is filed with "Abandonment and Retention Resolution" No. 196, and a duplicate of the agreement is filed under "Miscellaneous C. and A." file No. 1110.

		Weed control. Request for employment of agronomist denied.
15551		Engineer to report attitude of counties toward cost of weed control.
		Klamath Falls. Main Street and Esplanade Street. Part designated as connecting hwy. between The Dalles-California Hwy. and Klamath Falls-Malin Hwy. See EXHIBIT "G".
		Signs. Scappoose. Erection of textboard commemorating Thomas McKay approved.
15552		Load Limits. Fifty percent reduced load limit posted on certain hwys. See EXHIBIT "D".
		Log Hauling. Sunset Hwy. Davies Overcrossing-Sylvan Section.
15553		Designation as Group I Hwy. deferred.
		Clackamas County. Eagle Creek-Sandy Secdy. Hwy. Eagle Creek-Sandy Section. Abandonment approved. See EXHIBIT "H".

Page	Date 1949	Subject
15553	Jan.24	Crook County. Ochoco Hwy. Prineville-Marks Creek Section. Abandonment approved. See EXHIBIT "I".
		Agreements discussed and approved.
		Equipment. Expenditure of $5,480 for Traffic and Parks
15554		Dept. equipment approved.
		E.A. Collier and E.F. Halik authorized to inspect snow plow operations at Snoqualmie Pass.
		R.H. Baldock authorized to attend Northwest Conference of Road Building.
		Harry Esch authorized to attend Traffic School, Berkeley.
		Mark Astrup authorized to attend Eighth Annual Conference on Roadside Improvement.
		Curry County. Agreement with Chetco Timber Company re logging road across state park property approved.
		Meeting date. February 28 and March 1, 1949, set for next regular meeting.
		Wages and salaries. Civil Service wage schedule discussed.
15555		Engineer to report. (See page 15563)
		Wages and salaries. $20-per-month cost of living increase approved to July 1, 1949, if bill passes Legislature.
		Meeting adjourned at 4:45 p.m. to reconvene following day.
15556	Jan.25	Bids received on following projects:
		Middle Fork Coquille River Bridge
		Pine Creek-Beech Creek Rock Production
		Grants Pass Traffic Signals
15557		Sun Dial Section
		Sauvies Island Bridge
		Biggs-Wasco Section
		Washington County. Sunset Hwy. Cornelius Pass County Road
15559		interchange. Engineer to investigate and report.
		Wasco County. Columbia River Hwy. Celilo Indian Village.
15560		Construction of underpass. Engineer to report.
		Permits. Issuance of special movement permits in Southern Oregon. Request for officer in Medford to issue permits denied. Engineer to report.
		Harney County. Rome-Princeton Secdy. Hwy. and John Day-Burns Hwy. Delegation appeared re status of improvements.
15561		No action.
		Lincoln County. Corvallis-Newport Hwy. Toledo-Newport.
15562		Elimination of curves requested. Engineer to report.
		Eugene. Pacific Hwy.-Alder Street intersection. Request of F.I. Chapman to purchase tract of land denied.
		Salem. Willamette River Bridge and improvement of the Pacific
15563		Hwy. East. Action deferred.
		Meeting recessed at noon to reconvene at 2:00 p.m.
		Salem. Highway situation discussed. Statement re improvements authorized for release.
		Wages and Salaries. Salary schedule for certain classes
15564		approved. Schedule to be presented to Civil Service Board.
		Bids received at morning session discussed.

Page	Date 1949	Subject
15564	Jan.25	Awards. Chairman Banfield announces awards of contracts.
15565		Columbia County. Columbia River Hwy. St. Helens. Settlement with Erickson for R/W. Engineer to report.
		Klamath County. Sprague River Road. Agreement with U.S. Indian Service re improvement approved.
		Salem. State Hwy. Dept. Office Bldg. Architects' plans discussed.
15566		Klamath Falls. South Sixth Street. Counsel authorized to secure options for R/W across lumber mill property.
		Agreements, etc. approved and signed.
15567		Meeting adjourned at 3:00 p.m.
15568	Jan.24 & 25	EXHIBIT "A". Real property options
15579		EXHIBIT "B". State Tax Street Funds, 1947
15580		EXHIBIT "C". State Tax Street Funds. 1948
15582		EXHIBIT "D". Load limits reduced
15587		EXHIBIT "E". State Tax Street Funds, 1949 allocation
15594		EXHIBIT "F". Contracts completed and accepted
15596		EXHIBIT "G". Connecting street designation. Klamath Falls
15598		EXHIBIT "H". Abandonment
15601		EXHIBIT "I". Abandonment
15607		EXHIBIT "J-1" Condemnation resolution
15609		EXHIBIT "J-2" Condemnation resolution
15611		EXHIBIT "J-3" Condemnation resolution
15613	Feb.28	Bids received on the following projects:
		Sheeley Bridge-Sunset Camp Section
		Shields Creek and Lookingglass Creek Bridge Section
		Rainrock-Alderwood Park Rock Production
15614		Ranger Station-Toll Creek Rock Production
		Steiwer Hill-Albany Roadside Improvement
		Troutdale Section
		Parks. Parks Superintendent reports on following:
		Curry County Ocean Waysides. Mack's Arch-Whale Cove.
15615		Options approved. Negotiations to continue.
		Jackson County. Camp White Reserve. Recreational filing on lands adjacent to Rogue River to be retained.
15616		Cove State Park. Proposed dam in Deschutes River. No action.
		Champoeg State Park. Proposed memorial bldg. Status report approved.
		Vista House. Crown Point. Proposed improvements discussed. Engineer to submit detailed report.
		Smelt run. Multnomah County. Sandy River. No concession privileges to be granted during smelt season.
		Smelt run. Multnomah County. Sandy River Bridge. Game
15617		Commission to use parking area for sale of licenses.
		Painted Hills State Park. Construction of roadway authorized.
		Real Property. Acquisition authorized. See EXHIBIT "A".
		Multnomah County. Sunset Hwy. Vista Avenue-Multnomah County Line. R/W to be acquired at actual cost.

Page	Date 1949	Subject
15617	Feb.28	Condemnation. Offers approved. See EXHIBITS "B-1" and "B-2".
15618		Claims. A.C. Baumback. House moving at Lebanon. Reimbursement in amount of $775 approved.
		Lane County. Siuslaw Hwy. North Fork, Siuslaw River. Right of way to be secured.
15619		Lane County. Goldson. Purchase of house and garage from Al.R. Dade approved.
		Clackamas County. Pacific Hwy. East. Oregon City-New Era Section. Easement agreement with Southern Pacific Company approved.
		Klamath Falls. Klamath Falls-Malin Hwy. First Avenue-Esplanade Street. Area to be deeded to city for park.
		Douglas County. Pacific Hwy. Johns Ranch-Glendale Section.
15620		R/W settlement with McCollum approved.
		R/W settlement with W.O. Condray approved.
		Claims. M.J. and J.A. Greenberg. Settlement for damage to store bldg. approved.
		Chief Counsel authorized to appear before Supreme Court as "friend of court" at request of City of Portland.
		Bid bonds. Five percent of the bid to be required in bid
15621		bonds.
		Multnomah County. Marine Drive. Request for designation and improvement as state secondary highway denied.
		Jackson County. Green Springs Hwy. No additional guard fence to be constructed.
15622		Columbia County. Columbia River Hwy. St. Helens. Erickson to be allowed 60 days to remove a wall and one year to cut back a bldg. encroaching on hwy. R/W.
		Signs. Roadside picnic areas. Signs designating areas and
15623		requesting public cooperation in proper use approved.
		Meeting recessed at noon to reconvene at 2:00 p.m.
		Blue Star Drive. Pacific Hwy. from Washington State Line to California State Line. Erection of three markers and development of picnic area at Junction City approved.
		Lane County. Oregon Coast Hwy. Florence. Overnight parking prohibited between First and Second Streets.
15624		Sale of timber. Alsea. Offer of Steeprow and Callahan accepted.
		Washington County. Sunset Hwy. Cornelius Pass County Road connection. Engineer to investigate and report.
		~~Washington~~ Wasco County. Columbia River Hwy. Celilo. Construction of pedestrian underpass and railroad grade crossing.
15625		Engineer and Counsel to investigate further and report.
		Clatsop County. Fishhawk Falls Secdy. Hwy. Request for construction between Elsie and Jewell denied.
		Marion County. Hillsboro-Silverton Secdy. Hwy. Mt. Angel. Regrading and surfacing in city. Action deferred.
		Bids received at morning session discussed.
		Awards. Chairman Banfield announces awards of contracts.

Portland, Oregon
December 20, 1948

The State Highway Commission convened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids for highway construction were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

THREE HIGHWAYS IN BAKER COUNTY

BAKER ROCK PRODUCTION PROJECT

Vernie Jarl, Gresham	$ 37,440.00

NEHALEM SECONDARY HIGHWAY IN COLUMBIA COUNTY

BIRKENFELD-WASHINGTON COUNTY LINE ROCK PRODUCTION PROJECT

A. H. Saxton & Sons, Corvallis	$ 31,980.00
Jed Wilson, Seaside	35,820.00

NEWPORT OFFICE BUILDING, LINCOLN COUNTY

Fred Meikes, Newport	$ 5,200.00
Archie R. Averill, Portland	5,760.00
Morgan General Constr. Co., Philomath	5,896.00
C. A. Moffitt, Waldport	6,994.10

VANCOUVER AVENUE BRIDGE IN MULTNOMAH COUNTY

E. C. Hall Co., Portland	$ 11,505.00
Birkemeier & Saremal, Portland	13,895.00
Va Dare Constr. Co., Portland	16,100.00
Valley Constr. Co., Portland	16,605.00
Erick Enquist, Troutdale	17,990.00
Alan Yonker, Portland	32,830.50

December 20, 1948

The State Parks Superintendent was present and reported on the following state park matters:

(1) Sale of down timber in Ecola Park which was felled by the Army in constructing a roadway to a radar installation on Tillamook Head: The Parks Superintendent advised that he has received two offers for this timber, one at 50 cents per thousand board feet and the other at $4 per thousand board feet; however, the timber cannot be trucked out until spring because of the condition of the roadway leading to the area. He was instructed by the Commission to secure additional quotations for the purchase of this timber and to report the results thereof. The timber will be sold to the high bidder therefor if his price is reasonable.

(2) Renewal of the lease for the concession at Vista House, Crown Point: The Parks Superintendent reported a request from Mr. Jack Flaucher, present concessionaire, for a three-year renewal of his lease which terminates in March 1950. The Commission considered that the present lease has too long a time to run to think about renewing it and accordingly denied the request. The Parks Superintendent was instructed to resubmit the matter to the Commission in July 1949 at which time the Commission will decide whether or not to advertise the concession for bids.

(3) Request for permission to construct a Boy Scout cabin in Cape Arago State Park: The Parks Superintendent advised that Mr. William W. McInturff, of the City of Coos Bay, who is interested in the Boy Scout movement, has requested such privilege. He recommended that it be denied as a matter of policy and in order to avoid the establishment of an undesirable precedent. The Commission approved the recommendation.

(4) Proposed acquisition of property bordering the Deschutes River and the Warm Springs Highway near Warm Springs Agency: The Parks Superintendent advised that, pursuant to authority previously given him by the Commission, he contacted Mr. Homer Paxton, Madras, who owns the property at this location and from whom the Commission wants to acquire 1.2 acres as a wayside picnic area, but Mr. Paxton, who at first appeared favorably inclined, has now changed his attitude and refuses to sell the property, so it appears necessary to condemn it. He stated that the property is highly desirable from the state's standpoint and recommended condemnation, if necessary, to obtain it. As the result of discussion the Commission referred the matter to the Right of Way Department to appraise the property to determine its value and report at the next meeting of the Commission.

(5) Operation of Silver Falls Recreational Area during 1949: The Parks Superintendent requested instructions whether or not to continue arrangements had with the Salem Y.M.C.A. in 1948 for handling this area. He advised that during 1948 the Y.M.C.A. charged the various organizations who used the area the rate established by the Highway Commission, took full charge of the camp, including the dining room and other facilities, and turned over to the state at the end of the season the sum of $576, which was not enough to reimburse the state for expenses incurred for a caretaker, etc. In the discussion

of this matter the Commission expressed the attitude that it preferred that this recreational operation be self-supporting and that the charges made for use of the area should be raised sufficiently to pay the state's expense for a caretaker and upkeep; moreover, the handling of details with the various agencies for use of the area should be under the direct control and supervision of the State Parks Superintendent rather than the Y.M.C.A. The Parks Superintendent gave as his thought that were the state to charge $10 per cord for wood used by recreationists sufficient revenues would be derived to pay expenses without the necessity of raising the rates. The Commission referred the matter back to the Parks Superintendent to handle in conformity with its ideas on the subject.

(6) Status of plans for the historical memorial building in Champoeg State Park: The State Parks Superintendent and the State Highway Engineer both advised that they had received no definite information from Mr. Frank Roehr, representing the American Institute of Architects, as to when the design for this structure will be completed. Chairman Banfield advised that he had talked with Mr. Roehr concerning the matter and suggested to him that he submit a report to the Commission on the subject because the Commission is anxious to get this building construction under way. Mr. Roehr, he said, promised to have the plans in the hands of the Commission within the next few days. He stated his thought that if the architects cannot furnish the design within a reasonable length of time then the Commission should proceed on the basis of its own design. Commissioners Schaupp and Chandler concurred.

(7) Approval of the park betterment budget for 1949: The Parks Superintendent submitted for the Commission's consideration a list of projects proposed for betterment in state parks during the calender year 1949, totaling $255,000. Following careful consideration and discussion the Commission unanimously approved the budget as submitted, subject to deletion therefrom of the following items:

Caretaker's house, etc. at Armitage State Park, Lane County	$ 10,000.00
Caretaker's house in state park located on Deschutes River 3 miles north of Bend	10,000.00
Historical museum building in Champoeg State Park	125,000.00
Silver Creek Falls State Park, cots and mattresses	468.75
Miscellaneous improvements in Sunset Bay State Park	2,580.00

(The improvements in Sunset Bay State Park were deleted from the proposed budget pending an opinion from the Attorney General as to whether or not the State Highway Commission has jurisdiction over the beach at this location or whether the State Land Board has such jurisdiction. The Chief Counsel was instructed to obtain such opinion from the Attorney General.)

(For details with respect to the budget, see copy of the budget on file in the Commission's records and files, being Highway Department Budget File No. 3-b.)

The Assistant Counsel, Mr. J. W. DeSouza, presented for the Commission's consideration a list of real properties that are needed for various highway improvements throughout the state, and the offer that he recommended in connection with each parcel. Following careful consideration of each item the Commission approved the offers as recommended and authorized acquisition of the properties on the basis thereof. The attached resolution with respect thereto marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though copied in full herein, was thereupon adopted by the Commission by unanimous vote.

The following notes pertain to the above-mentioned resolution marked EXHIBIT "A":

(*) Right of way for Sullivan Gulch Section, Sullivan Gulch Highway, Portland: The Commission unanimously approved the purchase of all the properties listed in the resolution, however, instructed the Right of Way Department not to stress negotiations for right of way for this project since construction will not take place for probably three years; also, not to bring to the Commission for consideration any settlements that are not equitable, and not to take the initiative in the negotiations. The dealings with respect to this project are to be in conformity with the resolution heretofore adopted by the Commission with respect to the Sullivan Gulch Highway. The Chief Counsel was instructed to submit a written report, giving a thorough analysis of this project.

In this connection the Assistant Counsel requested instructions with respect to insurance coverage for the buildings acquired in connection with these and other right of way settlements. Action on the matter was deferred pending a recommendation from the Chief Counsel.

(**) Troutdale Section, Columbia River Highway: The Commission approved both settlements as listed.

In this connection the Engineer reported the results of negotiations with the Port of Portland and Multnomah County with respect to re-alignment of the Sun Dial Secondary Highway to accommodate a proposed enlargement of the Troutdale Municipal Airport. He advised that a written agreement is now being prepared covering arrangements effected among those concerned whereby a substitute road is being furnished by the Port of Portland at no expense to the state, and the state's obligation will not be increased over that provided in the original plan for the highway improvement at this location; as a matter of fact, the state will realize a saving of approximately $40,000 by not being required to construct a traffic interchange which was required under the original set up. The Commission approved the report.

(***) Dodson-Bonneville Section, Columbia River Highway, Item No. 13606: The Commission approved acquisition of the property from Jacob and Kathrin Aschenbrenner and Antone A. Poquette and Emily A. Poquette for right of way at a cost of $42,000 as detailed in the resolution. The Chief Counsel was instructed to submit a complete written report on this subject.

(****) Purchase of right of way for the proposed improvement of the Newberg-Dundee Section, Newberg-Dayton Junction Section, and the St. Joe-Lafayette Section of the Pacific Highway West, in Yamhill County: The Commission approved all of the settlements as listed following careful consideration of a report from the Engineer on the cost to construct a proposed substitute highway between Newberg and McMinnville which would by-pass the towns of Dundee and Lafayette and avoid acquisition of expensive right of way on the present route of the highway which is required to provide a four-lane facility. According to the Engineer's report, it will cost approximately $3,000,000 to provide a new four-lane highway facility on the proposed by-pass route between Rex Hill and McMinnville, which amount includes purchase of right of way estimated at about $300,000; also, the cost to provide a modern two-lane highway facility along the present route is estimated at $600,000, of which $495,000 represents the cost of construction and the balance, extra land needed to provide a right of way 120 feet wide.. It also appears that such two-lane facility will be satisfactory for about ten years, at which time two additional traffic lanes will have to be provided. Chairman Banfield expressed himself in favor of modernizing the present route at the estimated cost of $600,000 rather than spending $500,000 now on the proposed route and assuming an obligation to spend $3,000,000 later on. Commissioners Schaupp and Chandler expressed themselves similarly and it was so ordered.

(+) Settlements with Pearl Morris Hall, Item No. 11992, $1,250, and Oscar and Ethel Whithoft, Item No. 15153, $1,500: The Chief Counsel explained that these are out-of-court settlements of condemnation cases which previously were approved by the Commission over the telephone. The Commission confirmed these settlements unanimously.

In this connection the Commission also discussed the following:

(1) Acquisition of right of way for the Youngs Bay Bridge-Lewis and Clark River Section of the Oregon Coast Highway, in Clatsop County: The Assistant Counsel presented options secured for 11 parcels of land along the previously approved and adopted location. Action on these settlements was deferred by the Commission pending final decision with respect to rerouting this highway on a more direct line between Astoria and Warrenton, as heretofore recommended by a delegation from this district. The Commission's action was taken as the result of discussion of the Engineer's written report on the proposed highway routing based on a reconnaissance survey of the location. According to the report, the alternate route between Astoria and Warrenton is 2.184 miles shorter than the adopted route, and the cost to construct this

route is approximately $600,000 cheaper than the adopted route if a low bridge is used and $300,000 cheaper if a high bridge is constructed. The report also reveals that the cost of right of way on the present adopted route is estimated at $40,000 and that on the alternate route is $37,750. The Engineer suggested, in view of the findings, that it would be advisable to discontinue right of way negotiations along the presently adopted route and to defer closing any options heretofore taken until such time as the Commission decides definitely which way to route this highway. As the result of this discussion the Commission ordered right of way negotiations discontinued on the present adopted route and instructed the Chief Counsel to appraise the properties needed as right of way on the proposed alternate route and report the results thereof.

(2) Redmond Section of The Dalles-California Highway, Item No. 15146, acquisition of 0.42 acre of land from M. A. Lynch and Eva B. Lynch needed for storage purposes: The Commission deferred action on this matter pending an additional report from the Engineer as to whether or not 0.42 acre of land will provide a sufficient area for the purpose intended and whether or not any other suitable sites are available. The Engineer was instructed to provide such information and to have available when the matter comes up for discussion a map showing the location of the property.

The Assistant Counsel also requested authority to institute condemnation proceedings to acquire certain parcels of real property which cannot be secured by negotiation. He submitted a list of such properties, together with the offer that he recommended with respect to each parcel, as follows:

		Recommended Offer
N. E. Union Ave. Section of the Pacific Highway East		
15202	Columbia Ways Corporation and George Gray	$ 4,200.00
15149	Northwest Properties, c/o Mr. Ivan Phipps	4,750.00
14773	Tom E. and Herbert C. Boden	150.00
St. Joe-Lafayette Section of the Pacific Highway West		
4419	Herschel and Geraldine Bell	3,300.00
Newberg-Dayton Junction Section of the Pacific Highway West		
14450	C. D. Norris	5,750.00
14458	W. Winegar	105.00

(Cont.)

Recommended Offer

Dundee-Dayton Junction Section of the Pacific Highway West

14453 R. R. Dodge $ 3,000.00

Rainier-Goble Section of the Lower Columbia River Highway

14986 Sylvia C. Archibald 2,050.00

As the result of careful consideration of each item, the Commission approved the request and the recommended offers. The attached resolutions with respect thereto marked EXHIBITS B-1, B-2, and B-3, which resolutions by this reference are made a part hereof with like effect as though copied in full herein, were thereupon adopted by the Commission by unanimous vote.

The Assistant Counsel, Mr. DeSouza, reported on the status of the budget for right of way purchases during 1948. The overall picture of this budget, he said, reveals that expenditures will overrun the amount set up by about $182,000, due principally to purchases in excess of those originally anticipated and the rise in cost of real property. The Commission approved the report and ordered that the accounting records be adjusted accordingly.

The Assistant Counsel also brought up for discussion an inquiry from the Portland Chamber of Commerce relative to information that has been divulged concerning the Sullivan Gulch project. The Commission authorized the release of any information concerning specific properties that it has passed on but left it with Chairman Banfield to instruct the Chief Counsel later on as to what additional information may be divulged.

The Commission discussed the matter of allowing Mr. T. M. Gilchrist, Albany, continued used of some state-owned property in that town which he is now occupying under provisions of right of way settlement. The Chief Counsel advised that when the right of way was purchased Mr. Gilchrist was given permission to use part of the property for parking privately owned automobiles until the property is needed by the state; however, it now appears that he is abusing the privilege and is using the area commercially by maintaining on it a large advertising sign and by using it as a storage place for second-hand cars that are being offered for sale. It was his thought that such use of the property is a violation of the privilege granted Mr. Gilchrist and that it should be stopped. The Commission referred the matter back to the Chief Counsel with authority to do what is necessary to stop such unauthorized use of the property.

The Assistant Counsel, Mr. DeSouza, reported on the status of certain state-owned property in the City of Condon which is now being used by the Condon Rod and Gun Club and which the Club desires to acquire outright. He advised that, pursuant to instructions from the Commission at the previous meeting, he has investigated title to the property and finds that it was acquired by quit-claim deed from John Madden and the Arlington Lumber Company in 1944, rather

than from either the City of Condon or Wheeler County, as was first thought, so neither the city nor the county would have any interest in the reconveyance of the property. He suggested, in view thereof, that the Commission might feel inclined to deed the property direct to the Rod and Gun Club. The Commission indicated a reluctance to dispose of the property and accordingly instructed the Assistant Counsel to ascertain the attitude of the Gun Club with respect to leasing the property on an agreed rental basis.

The meeting recessed at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission discussed and approved the sale to the City of Pendleton of a portion of a gravel pit adjacent to the Pendleton-Reith Section of the Stanfield-Pendleton Secondary Highway in the Northwest quarter of the Northeast quarter of Section 8, Township 2 North, Range 32 East, W. M., Umatilla County, which property the city needs in connection with a proposed sewage disposal plant. The Commission's approval was based on a statement by the Chief Counsel that the deed of conveyance, as prepared, contains provisions that fully protect the state's interest, particularly with reference to salvaging road-building materials that will be excavated therefrom in connection with construction of a new channel for the Umatilla River. (The deed was signed on the following day.)

The Chief Counsel brought up for discussion the condemnation case of the State Highway Commission vs. McEnroe. He advised that the Commission previously authorized condemnationof this property and an offer of $473 in connection therewith, but the case has not been tried and the owner is now willing to settle out of court for the sum of $623. He recommended settlement on such basis. The Commission approved the recommendation.

Consideration was given by the Commission to the application of T. I. Chapman, Eugene, to purchase certain excess state-owned real property adjacent to the Pacific Highway in Eugene. In the discussion of this matter the Engineer pointed out that the property is located adjacent to Alder Street and is on the route of the new highway improvement now being constructed; further, that the property is near this vital intersection and, in his opinion, should not be disposed of until the highway improvement has been completed and in operation for some time. He advised that he could not state at this time whether or not this property, or any part of it, would be needed for highway purposes later on. The Chief Counsel advised that the property lies between the highway and adjacent property owned by Mr. Chapman, who only wants to control the area so that it will not get into the hands of other private individuals that might be objectionable to his interests. In view of this information, the Commission decided not to sell the property to Mr. Chapman, or to anyone else, for the time being. In the event it is determined later on that the property is not needed for highway purposes, then Mr. Chapman is to be so informed and given an opportunity to discuss the purchase of it with the Highway Commission.

The Commission discussed and approved a form of agreement with the Southern Pacific Company which provides for an easement to construct and main-

tain a highway and a drainage ditch on railroad property in Klamath County. (The agreement was signed by the Commission on the following day.)

The Commission also discussed and, upon recommendation of the Chief Counsel, approved the renewal of a maintenance site lease agreement with Mr. Carl M. Stevens, et al. covering property located near Newberg, in Yamhill County, Right of Way File No. 9936. (The agreement was signed on the following day.)

The Chief Counsel reported an inquiry from Mr. James Convill , City Manager, Astoria, concerning the cutting of sidewalks and installation of light wells on state highway right of way in the City of Astoria. It appears that a certain merchant is desirous of installing a light well along the full frontage of his building and wishes to maintain a pipe railing around the opening to keep people from falling into it, which type of construction is contrary to the city ordinance covering such matters; however, according to Mr. Convill, the City Council will not object to such type of construction, regardless of the ordinance, if the State Highway Commission wishes to authorize the installation. It was the feeling of the Commission that the city ordinance should be strictly adhered to and it was so ordered. The Commission offered no objections to the installation of the light wells in the sidewalks if they are arranged, with gratings or other materials, so that people can walk over them.

A request was presented from Foster and Kleiser Company for permission to cut and remove vegetation growing along the Oregon Coast Highway a short distance south of Otis Junction, so as to open to view a large billboard which is being maintained by the company on nearby property. The Engineer advised that the vegetation is not objectionable from the highway standpoint; in fact, it acts as a sort of screen to hide the advertising sign which does not enhance the aesthetic features of the highway but, on the other hand, has and adverse effect on highway traffic and might be the means of causing accidents. He recommended that the request be denied. The Commission approved the recommendation.

The Commission also considered a request from the Public Roads Administration for permission to temporarily occupy a state-owned building located on property recently acquired by the Commission from Mr. G. P. Hunter, near Tidewater, on the Alsea Highway. The Chief Counsel explained that the Public Roads Administration has some construction work under way at this point and would like to use the building for equipment storage purposes. The Commission approved the request unanimously.

The Chief Counsel brought up for discussion the matter of a proposed amendment to the law which now places some responsibility on the Highway Commission relative to the prohibition or regulation of the driving of automobiles on the shore of the ocean. He pointed out that the difficulty seems to be that the present law divides authority between the Highway Commission and counties or municipalities contiguous to the beach. He suggested and recommended that Section 4 of Chapter 493, Oregon Laws 1947 be amended by deleting the language which makes action of the Commission dependent upon a recommendation

from the counties or the cities. If so amended, he said, the entire matter will be left to the judgment and discretion of the Highway Commission. Following discussion of the matter the Commission instructed the Chief Counsel to prepare a bill in conformity with his recommendation for presentation to the next legislature, amending the previous law.

The Chief Counsel brought up for discussion a request from residents of the town of Gates that the Highway Commission approve the vacation of a city street which parallels the North Santiam Highway through their town. He pointed out that the highway right of way at this point is not owned by the state but is under lease from the railroad company and, should the street referred to be vacated, the railroad company would come into possession of half of it and the property owners the balance, which would place the Highway Commission in a position of not being able to control access to the highway. On the other hand, if only one-half of the street were vacated, then the Highway Commission would retain control of access as in the past. He recommended that the matter be handled in the latter mentioned manner if the Commission feels inclined to join in the vacation proceedings. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

The Chief Counsel requested authority to send three of his right of way men to California, at state expense, to study the right of way organization of the Department of Highways of that state. He said that California has a very fine right of way organization and, in his estimation, the Oregon set up could be improved by adoption of some of the California practices. It was his thought that such investigation could be made in about six days' time. The Commission approved the request unanimously.

The Engineer reported that, pursuant to instructions from the Commission at the previous meeting, he has contacted the County Court of Umatilla County with respect to the transfer of funds to permit construction of the Helix-Holdman County Road and that the County Court is in full accord with the plan of deleting from the first Three Year Postwar Program improvement of the Pioneer Spur-McDougal Camp Section of the Weston-Elgin Secondary Highway, to which an amount of $230,000 was tentatively allocated, and re-allocating such funds for construction of the Helix-Holdman Road, which is estimated to cost $170,000, and widening and constructing curbs along the Columbia River Highway in the town of Umatilla, estimated to cost $55,000. He recommended, in view of the attitude of the County Court, that the Commission approve such transfer of funds. The Commission approved the recommendation unanimously and so ordered.

The Engineer brought up for discussion an application that has been filed with the Public Utilities Commissioner by the Gardiner Lumber Company for authority to construct its logging railroad, at grade, across the Oregon Coast Highway approximately one mile south of Gardiner, the exact location being immediately north of Smith River Bridge. The Long Bell Lumber Company, he said, has recently purchased the interests of the Gardiner Lumber Company and plans to conduct its operations on a perpetual sustained yield basis, and the spur track which it intends to install across the highway is of a

permanent character. He gave as his thought, in view of the importance of the Oregon Coast Highway which was recently designated by the Commission as a "throughway", that the railroad should be required to provide for separation of highway and railroad grades. He estimated the additional cost to the company to provide such a grade separation at $175,000. The Commission concurred in the viewpoint of the Engineer in this matter and instructed him to enter a protest with the Public Utilities Commissioner against granting the application for a grade crossing.

The Commission discussed briefly a report from the Engineer on a questionnaire which was recently circulated by the Newberg Chamber of Commerce to determine local sentiment with regard to the rerouting of US99W through the town of Newberg. The Secretary was instructed to inform the Newberg Chamber of Commerce of the action previously taken by the Commission at this meeting with respect to improvement of this highway between Newberg and McMinnville, which action, incidentally, did not cover the routing of the highway within the city limits.

The Commission discussed with the Engineer the bids received at the morning session, and a 3:00 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the Commission's action being by unanimous vote:

"Baker Rock Production Project on three state highways, in Baker County. Vernie Jarl, Gresham, submitted the only bid for this project at $37,440. The Commission has awarded the contract to Mr. Jarl at his bid price.

"Birkenfeld-Washington County Line Rock Production Project on the Nehalem Secondary Highway, in Columbia County. Four bids were submitted for this project, the low one being that of A. H. Sexton & Sons, Corvallis, at $31,980. The second low bid was that submitted by Jed Wilson, Seaside, at $35,820. The Commission has awarded the contract to the low bidder, A. H. Sexton & Sons.

"Widening and surfacing on the Prineville-Eagle Rock Creek Section of the Paulina Secondary Highway, in Crook County. T. W. Thomas, Portland, submitted the low bid for this work at $54,012. Roy Norquist, Sweet Home, submitted the second low bid in the amount of $56,015. There were sixteen higher bids. This is a cooperative project with Crook County, and the Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, T. W. Thomas, when approval has been secured from the Crook County Court.

"Construction of the Lapine Maintenance Building, in Deschutes County. Archie R. Averill, Portland, submitted the low bid for this work in the amount of $13,627, using block construction. He also submitted the low bid, at $14,454, using frame construction. Gilbert Roberts, Hood River, submitted the second low bid, in the amount of $15,691, using frame construction. He submitted no bid using block construction. Two

higher bids were received. The Commission has awarded the contract to Archie R. Averill, the low bidder, on the basis of using block construction.

"Construction of the Roseburg Division Office Building extension, in Douglas County. The Commission received only one bid for this project, being that of Todd Building Company, Roseburg, in the amount of $21,400, basic bid, with a reduction of $500 if the alternate bid is used. The Commission has rejected this bid as being too high.

"Devils Lake Outlet Section of the Oregon Coast Highway, in Lincoln County. The Commission received three bids for this project, the low one being that of Lindstrom Bros., Portland, at $124,711, using asphalt. Harry I. Hamilton Co., Eugene, submitted the second low bid in the amount of $129,265.50, using asphalt. The third bid was that of VaDare Construction Company, Portland, at $131,145.50, using asphalt. None submitted bids based on the use of tar. The Commission has awarded the contract to the low bidder, Lindstrom Bros.

"Construction of a building at Newport in Lincoln County. Fred Neikes, Newport, submitted the low bid for this job at $5,200. Archie R. Averill, Portland, submitted the second low bid at $5,760. There were two higher bids. The Commission has awarded this contract to the low bidder, Fred Neikes.

"Repairs to the Hancouver Avenue Bridge, in Multnomah County. E. C. Hall Co., Portland, submitted the low bid for this project at $11,505. Birkemeier & Saremal, Portland, submitted the second low bid at $13,895. There were four higher bids. The Commission has awarded this contract to E. C Hall Co., the low bidder."

The Engineer reported on a number of requests received from residents of Lane County for the further improvement of the Territorial Secondary Highway between Monroe, in Benton County, and Anlauf, in Douglas County. He advised that to complete this highway involves construction of three sections, 9 miles, 7.7 miles, and 8.7 miles in length, respectively, for a total estimated cost of $1,560,500. He pointed out that, according to the present tentative set up, Lane County's share of funds available in 1949 and 1950 totals $1,613,000, so if the Commission were to approve the Territorial Highway project, it would take practically all of Lane County's share of the funds. The Commission could not see its way clear to finance the project at the present time.

The Commission discussed briefly a letter from the Baker County Chamber of Commerce and a resolution from a number of citizens of La Grande concerning improvement of the Old Oregon Trail between North Powder and La Grande. The Baker County Chamber of Commerce urges modernization of the present route of this highway through the town of Union, rather than con-

struction of the proposed new route through Ladd Canyon, and the people of La Grande protest the re-routing of the highway along what is known as "Ladd Canyon Foothill Road" to a connection with the present highway at Lone Tree and recommend approval and adoption of a route following the present highway southeasterly from La Grande to the intersection of Ladd Canyon Market Road, thence southerly along this market road to an intersection with the present Ladd Canyon Foothill Road. The Commission deferred action on these communications pending a conference with members of a delegation which is scheduled to appear on the following day. (This matter was discussed further with the delegation, but the Commission again deferred action pending a full report from the Engineer on the subject and a careful study of it by members of the Commission. See additional minute entry ahead).

The Commission discussed a written report from the Engineer dated December 16, 1948, on the subject of general highway maintenance costs for the year 1948. In his report the Engineer points out that expenditures for 1948 will exceed the budget estimate by approximately $500,000, due largely to the following: Damages by logging trucks, $200,000; increase in section crew costs resulting from flood damage, $191,000; increase in price of asphalt, $18,000; increases in freight rates on asphalt, $33,000; increases in price of gasoline, $47,000; and cost of work performed for the Public Roads Administration, $11,000. He also pointed out that there are uncommitted funds in reserve for contingencies in the 1948 budget amounting to more than the excess in maintenance costs. He recommended that such funds be transferred to general maintenance to take care of the deficit. The Commission approved the recommendation unanimously.

The Engineer reported the results of receiving bids in Salem on December 13, 1948, for the sale of used equipment and scrap materials. He presented a tabulation of the high bid received for each item, together with the estimated value of each article offered for sale, as follows, and recommended acceptance of these offers:

SALE OF USED EQUIPMENT STORED AT SALEM, ASTORIA AND LA GRANDE

Item No.	Item	High Bidder	High Bid	Engr's. Est.
		LOCATED AT SALEM, OREGON		
1.	Bay City shovel, Dept. No. 40-731	Vernie Jarl, Gresham Feenaughty Mach. Co., Portland	$ 12,100.00	$ 9400.00

3.	Zidell Machinery & Supply Co., Portland	127.50

Engineer's Estimate $ 950.00

SALE OF SCRAP TIRES STORED AT SALEM

No Bids Received

The Engineer pointed out that identical bids were received from Feenaughty Machinery Company, Portland, and Vernie Jarl, contractor, Gresham, for the purchase of the 1 ½ yard Bay City Shovel stored at Salem. Both of these bidders were contacted with respect to the sale, he said, and a letter has been received that they have decided between themselves that the Feenaughty Machinery Company should secure this particular piece of equipment. Following discussion, the Commission unanimously approved the sale of the

material to the high bidder in each instance as recommended by the Engineer.

The Engineer presented for the Commission's consideration a letter from Mr. W. H. Lynch, Division Engineer, Public Roads Administration, explaining the necessity to increase the allotment of Forest Highway Funds on the Summit-East Section of the Ochoco Forest Highway project, No. 27-B3, from $325,000 to $498,000, which amount is composed of the contractor's low bid to do the work plus an amount for engineering and contingencies. It was brought out in the discussion that the original allotment for this project was $280,000 and that it was increased to $325,000 under a program letter dated August 10, 1948, but due to circumstances, it is again necessary to increase it; also, that because the present increase is more than 25 percent of the original allotment, a new program letter directed to the officials in Washington, D. C., recommending the increase is required. It was explained that there are sufficient funds available in the Forest Highway contingency fund to finance the increased costs. The Engineer recommended approval of the increase and execution of the revised program letter. The Commission approved the recommendation unanimously. The following letter with regard thereto was signed by the Commission on the next day:

486 Oregon General

December 17, 1948

Chief, Forest Service
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

Under Oregon Forest Highway program letter for the fiscal year 1947, recommended September 26, 1946 and approved by the Commissioner November 5, 1946 - further ammended and recommended August 10, 1948 and approved by the Commissioner on September 5, 1948, there was approved for construction the following project:

No.	Project	Type of Funds	Present Program Amount
27-B3	Ochoco Highway Grading Length 3.000 miles	F.H. Postwar	$ 325,000.00

Since the previous programming of this project, construction costs have increased to such an extent that additional Forest Highway funds in the amount of $173,000.00 over and above those provided in the latter of the above cited program, will be required.

It is therefore recommended that the program be revised as follows:

(Cont.)

December 20, 1948

No.	Project	Type of Funds	Revised Program Amount
27-B3	Ochoco Highway Grading Length 2.964 miles	F. H. Postwar	$ 498,000.00

Sufficient funds are available in the state contingent to finance the increased Forest Highway costs.

Very truly yours,

/s/ W. H. Lynch
W. H. LYNCH
Division Engineer

U. S. FOREST SERVICE

O.K.
R. H. Baldock /s/

/s/ James Frankland
act. Regional Forester

Attest

/s/ H. B. Glaisyer
Secretary
OREGON STATE HIGHWAY COMMISSION

(SEAL)

/s/ T. H. Banfield
Commissioner

/s/ A. W. Schaupp
Commissioner

/s/ Ben R. Chandler
Commissioner

The Commission unanimously confirmed authority previously given the Engineer, as requested in his letter of November 19, 1948, to spend $4,700 of state funds in cooperation with the Southern Pacific Company for construction of an extension to a dike in the Santiam River above the bridge on the old Pacific Highway route at Jefferson, it being apparent that the dike is required to

protect the highway as well as the railroad at this point during flood periods.

The Engineer reported on requests from the International Woodworkers of America and from Hon. Earl Hill, State Senator, Cushman, for construction of guard fence along the Siuslaw Highway between Cushman and Mapleton, a distance of about 11.5 miles. He stated that this matter has been investigated by the Maintenance Engineer, Mr. E. A. Collier, who advises that there are eight places between Cushman and Mapleton, totaling about three miles, where the river or water filled borrow pits are immediately adjacent to the highway. He also stated that, according to a report from the Traffic Engineer, five accidents with ten fatalities have occurred on this section during the past eight years, two of which,resulting in five fatalities, occurred in 1948. Both of the 1948 fatal accidents, he said, occurred on sections reported on by Mr. Collier, and these might have been prevented if about 1,000 feet of guard fence had been provided at each location. He recommended approval of guard fence construction along these two sections, more particularly described as being between Mile Posts 5.7 and 5.9 and between Mile Posts 8.10 and 8.30, which he estimated would cost about $5,000. The Commission approved the recommendation unanimously and authorized the work as a minor betterment project in 1949.

The Commission approved an expenditure of $12,200 from reserves for "Capital Outlay Expenditures" in the 1949 budget to finance alterations and improvements to the ferry boat "M. R. Chessman". The Engineer explained that this is not an additional authorization but is only to take care of work heretofore authorized by the Commission in 1948 but not completed in time to enter in the 1948 account, so it will have to be paid with funds budgeted for 1949 expenditure.

The Engineer requested the Commission's approval of an expenditure of $45,400 out of the 1949 budget for "Capital Outlays" to finance the following projects:

PROPOSED CAPITAL OUTLAY MISCELLANEOUS PROPERTIES - 1949

1. Quarries and Gravel Pits

Central Oregon Hwy., M.P. 16.2, Fence gravel pit to keep stock from falling in using barbed wire fence, 85 rods @ $3.00	$ 255	
Pacific Hwy. East, M.P. 90.6, Fence quarry site where precipitous slopes are a serious hazard	740	
Sub-total		$ 995

2. Stockpile Sites

Upper Columbia River Hwy., M.P. 62.3, Build new entrance to eliminate traffic hazard and make stockpile material more accessible. Drill, shoot and excavate 100 cubic yards rock at $2.00	$200

(Cont.)

PROPOSED CAPITAL OUTLAY MISCELLANEOUS PROPERTIES - 1949 (Cont.)

2.	**Stockpile Sites (Cont.)**		
	Upper Columbia River Hwy., M.P. 87.7, Grade stockpile site adjacent to state quarry	$ 300	
	Fremont Hwy., M.P. 12.06, Clear and grub, grade and surface new stockpile site recently acquired by special use permit from Forest Service	300	
	Sub-total		$ 800
3.	**Shop Buildings**		
	Construct shed for equipment storage at Salem Shops - open front, no windows, gravel floor 336'x48' for storage of equipment now setting out in weather, will screen unsightly backyard from residential district		$ 32,000
4.	**Truck Scales**		
	Reinstall 30-Ton Standard Platform Truck Scale near Brownsville. Transferred from previous proposed location on Pacific Highway West.		$ 5,000
5.	**Maintenance Station Betterment**		
	Sandy, Install air compressor unit	$ 275	
	Milwaukie, Place ceiling in car storage building and convert one bay to repair shop and build concrete slab at gas pump	1,200	
	Salem, Purchase and install air greasing equipment	300	
	Dexter, Build gas pump island and canopy	350	
	Rufus, Build outside toilet and place concrete foundation under building	1,075	
	Moro, Enlarge door to permit Oshkosh trk. to enter bldg.	500	
	Post, Drill 6" well and install hand pump	330	
	Odell Lake, Clear and level grounds for trailer parking	350	
	Austin, Build shower in employee cabin	200	
	Athena, Relocate gas pumps	500	
	Elgin, Build gas pump island and canopy	200	
	Pilot Rock, Build flue and extend loading platform	400	
	Hermiston, Oil yard and build gas pump island and canopy	675	
	Arlington, Build gas pump island & canopy & toilet room	250	
	Sub-total		$ 6,605
	TOTAL		$45,400

December 20, 1948

The Engineer advised that the 1949 budget contains an item of $75,000 for miscellaneous building improvements and miscellaneous properties other than maintenance stations, and with the approval of the amount now requested there will remain an uncommitted balance of $29,600. The Commission unanimously approved the projects as recommended.

The Commission also approved an expenditure of $6,230 to finance the following minor parks and park road betterment projects during 1949:

PROPOSED MINOR PARKS AND PARK ROADS BETTERMENT 1949 PROGRAM

Sunset Springs (Sunset Hwy. Forest Wayside) Construct fountain and parking area	$ 190
Cascadia Park - New road and parking area	800
Boiler Bay Park - Enlarge parking area	300
Ecola Park - Build parking area	2,000
Wilson River Wayside - Build memorial, picnic tables and improve fountain	480
Devils Elbow Park - Grade and rock parking area	200
Armitage Park - Widen and surface entrance road	900
Barnum Wayside - Install chlorinator and oil parking area	800
Hood River-Mosier Wayside - Build parking area and guard rail	460
Johnson Wayside (Wallowa Lake Hwy.) - Level picnic area	100
TOTAL	$ 6,230

The Engineer explained that the 1949 budget contains an item of $20,000 for "Capital Outlay Expenditures" on "Minor Parks and Parks Roadway Betterments" and the performance of the above-mentioned projects will be financed from such funds.

The Engineer requested approval of the following projects to be financed with 1949 minor betterment funds:

1. Drainage

   53 projects located generally throughout the State on 40 highways..... $65,720

2. Repairs to Shoulders

   Widen, raise to proper grade and surface Nine projects located on seven highways..... 21,650

3. Roadway Betterment and Surface Stabilization

   Nine projects located on eight highways..... 24,495

(Cont.)

4. **Widening of Roadbed and Line Revision**

13 projects on 13 highways.....	$ 68,900

5. **Roadside Improvement or Betterment**

2 projects.....	1,500

6. **Road Approaches or Access Roads**

This work cannot be itemized as it covers State Highway cooperation with the property owner in the construction and improvement of road approaches (based on a policy adopted by the Commission December 19, 1938). This authorization is the same as approved one year ago, and it appears necessary on the basis of expenditures for 1948.....	60,000

7. **Bridge Minor Betterment**

This item is subdivided in ten different types or classes of improvements located in general throughout the State Highway System. Details are attached herewith.....	119,035
Total Authorization Requested.....	$361,300

In the discussion of this matter the Engineer advised that the 1949 budget contains an item of $850,000 for projects in this classification and that with approval of the projects now requested, which total $361,300, there will remain an uncommitted balance of $488,700. The Commission unanimously approved the projects as listed above.

The Secretary presented two resolutions from the City of Salem in one of which the Highway Commission is requested to make an early decision with respect to the adoption of a permanent route for US99E through Salem and in the other the city requests the widening of North Capitol Street between Court Street and Union Street. In the discussion of this matter the Commission had the benefit of the Engineer's written report on the subject dated December 16, 1948, in which he advises that his report dealing with the possible relocation of US99E through Salem is not yet ready to submit to the Commission; also, in which he advises that to widen Capitol Street as requested will cost about $96,000. The Engineer advised that investigations indicate that such widening will not solve the existing traffic congestion problem on Capitol Street because it would merely provide for widening four blocks and would leave unsolved the congestion problem existing on the additional one-mile section of

this street extending northerly from Union Street to the north city limits of Salem. The Commission deferred action on this matter pending receipt and study of the Engineer's full report on the subject, which the Engineer anticipated would be ready within the next two or three weeks. (A delegation from Salem appeared before the Commission on the following day regarding these two matters and also requested an early decision with respect to construction of a new bridge over the Willamette River in Salem. See minute entry ahead.)

The Commission discussed a letter from Robert W. Sawyer, Bend, requesting that a location survey for a proposed re-alignment of the McKenzie-Bend Highway be authorized. The Commission took no action on this matter.

Mr. Charles R. Stark, Secretary-Manager of the Klamath County Chamber of Commerce, Klamath Falls, appeared before the Commission at this time and urged the maintenance of special signs at entrances of state highways to cities and towns, calling attention to the Oregon law which gives pedestrians the right of way over vehicles at street crossings. It was Mr. Stark's thought that motorists, particularly tourists, would be thankful for such information and that the signs would be helpful in eliminating accidents involving pedestrians. He was informed by the Commission that the matter would be discussed with the Engineer and the Chief Counsel and given careful consideration.

A letter was presented from the Coquille Chamber of Commerce pointing out the urgency and necessity of action by the State Highway Commission to improve the Oregon Coast Highway at the northern limits of Coquille in order to eliminate a hazardous condition which they state exists at such point, and also requesting the construction of a pedestrian walk between the present high school and Rice Service Station for the benefit of school children. The Engineer advised that this is a follow-up letter of a previous request which was acted on by the Commission at its November meeting. The Commission at that time, he said, postponed action on the proposed improvement until it made up its 1949 construction program because of the possibility of rerouting the highway to enter Coquille at another point, which rerouting would relieve to a considerable extent the hazards on the present route. The Commission decided to make no change whatsoever in its previous decision.

The Commission had under discussion the approval of a proposed agreement with Washington County covering improvement of the intersection of the Tualatin Valley Highway with Walker County Road between Portland and Beaverton. The Engineer advised that the proposed reconstruction of the Tualatin Valley Highway at this point will interfere with the present Walker Road connection and that the Washington County Court has agreed to cooperate in reconstruction of this connection by providing right of way, which is estimated to cost $500, and by doing certain surfacing and paving work, which is estimated to cost about $2,200. The estimated total cost to provide a proper connection, he said, is $5,300, and on that basis the state's share would amount to $2,600. He recommended approval of the agreement. The Commission approved the recommendation unanimously. (The agreement was signed on the following day.)

A letter was presented from the County Court of Lane County in which the Commission is requested to authorize state highway snow crews to conduct

snow removal operations on two county roads in the Upper McKenzie River District during the coming winter, at county expense, these being isolated sections and difficult for county crews to care for. The Commission unanimously approved this request on the condition that snow removal equipment and a crew are available without handicapping state highway work.

The Commission discussed and approved a request from the City of Roseburg for the installation of traffic signals at the intersections of Lane and Washington Streets with the Pacific Highway, in Roseburg, at an estimated total cost of $8,600, on the condition that the City of Roseburg will contribute 50 percent of the cost of the installations, will maintain the signals after they are installed, and will furnish electric energy to operate them. The state's expense is to be charged to the 1949 minor betterment fund.

The Engineer reported on a petition from citizens and property owners in the Highland and West Highland Districts, Portland, for the installation of a traffic signal at the intersection of the Sunset Highway (Canyon Road) and S. W. Highland Road, West Portland, to safeguard traffic which enters the highway at this point. He advised that, whereas S. W. Highland Road does not carry very much traffic, the Sunset Highway carries a large volume of traffic, which makes it very difficult for traffic from the side street to enter with safety. He recommended the installation of a traffic-accuated signal at this point. Commissioner Schaupp gave as his thought that the installation is a necessity. Chairman Banfield declared it essential. The Commission approved the installation by unanimous vote.

A letter was presented from Jess M. Parker, City Manager of the City of Sweet Home, requesting the installation of a stop and go light at the intersection of 18th Avenue and the South Santiam Highway, in the City of Sweet Home. The Engineer advised that, in order to warrant a signal installation on nationally accepted standards, the hourly traffic volume must average 750 and pedestrian traffic on city streets must average 250 per hour. An investigation of this intersection, he said, reveals that the pedestrian traffic average is only 28 persons per hour and the hourly volume of vehicular traffic is only 461. He recommended, in view thereof, that the request be denied. The Commission approved the recommendation unanimously.

The Commission discussed the Engineer's written report on a request from Mr. H. M. Clark, President, Holman Transfer Company, Portland, for the installation of a traffic signal at the intersection of Palatine Hill County Road with the Oswego Highway, which intersection is at a point along the steep bluffs between Ross Island Bridge, Portland, and Oswego. The Engineer advised that the matter has been investigated by the Traffic Engineer, who recommends against the installation of signal lights because the intersection is far down on the priority list of intersections needing signalization and because there have been no reported accidents at the intersection during the period January 1, 1946, through June 1948. He pointed out that the sight distance at this location is restricted to about 200 feet and advised that a potential hazard does exist; however, he could not recommend the installation because of the low accident record and the possibility that rear-end collisions would occur were highway traffic required to stop at this point where

the sight distance is so short. The question arose whether or not the situation would be relieved if the highway were reconstructed at this point to provide greater sight distance, and if so, what it would cost to provide such an improvement. The matter was referred to the Engineer to ascertain such information and report later.

The Commission discussed a letter from the City of Gearhart requesting permission to install, at city expense, a traffic signal at the intersection of the Oregon Coast Highway with 6th Street in their city. The Engineer advised that the city some time ago asked the Commission to install a signal at this point, but the request was denied because it could not be justified, so the city now wants the privilege of installing its own signal. He recommended approval of the request on the condition that the signal is installed in conformity with Highway Department standards and under its supervision. The Commission approved the recommendation unanimously.

The Engineer reported that the following cities and towns have met the legal requirements with respect to expenditure of 1947 State Tax Street Funds received by them in 1948 and that the plans for improvements contemplated with such funds have been examined and found satisfactory:

Drain	Riddle
Huntington	Sumpter
Mitchell	Talent
Monument	Turner
Myrtle Creek	Wallowa

He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto marked EXHIBIT "C" which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer also reported that the City of Myrtle Creek has met the requirements with respect to the expenditure of 1946 State Tax Street Funds which the city received in 1947 and that the plans for the improvements contemplated with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission unanimously confirmed the Engineer's award, on November 16, 1948, of the contract for construction of the Delmar Overcrossing of the Southern Pacific Company's railroad tracks on the Oregon Coast Highway near Coquille to Tom Lillebo, Reedsport, who submitted the low bid therefor on November 4, 1948.

The Engineer brought to the attention of the Commission the necessity to adopt a permanent route for the Wilson River Highway easterly from the City

of Tillamook a distance of about 4½ miles. He explained that in connection with construction of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway it is planned to secure borrow materials from the proposed site of the Wilson River Highway undercrossing of the Southern Pacific Company's railroad tracks, which necessitates acquisition of right of way on the ultimate route of the highway at this point. He exhibited a map showing the proposed permanent highway location and recommended adoption of it by the Commission at this time so that the property may be acquired and the construction materials obtained for the Tillamook-Pleasant Valley job, which is to be contracted in the near future. The Commission discussed this matter at some length and as a result thereof approved the location survey as recommended by the Engineer. The Chief Counsel was authorized to negotiate options for the right of way. The attached resolution relative to the survey, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as if copied in full herein, was thereupon adopted by the Commission by unanimous vote. The Commission made it clear that the adoption of the survey is not intended to commit in any way, by implication or otherwise, state highway funds for construction of the Wilson River Highway project in the near future.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

No. 1 -- Walder and Kenworthy, Contract No. 2974 for construction of a grade separation structure and an overpass on the Troutdale and Bristol Sections of the Columbia River Highway, in Multnomah County, requested an additional extension of time of 30 days, from October 15 to November 15, within which to complete this project. They alleged that their failure to complete the work within the previously extended time limit was due to orders from the engineer in charge to change the color of the paint used on this structure; also, that they were delayed because of high water conditions. The Engineer advised that the high water of June 1948 shut down this job for a considerable period of time and, while the site itself was not actually flooded, the contractor ceased work at the order of the Army Engineers because of the possibility of damage to an adjacent dike. He recommended that the additional extension of time be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 2 -- R. H. Jones, Contract No. 2986 for construction of a maintenance building on state-owned property at Hood River, Hood River County, requested an extension of time of 30 days, from October 31 to December 4, 1948, within which to complete this job. Mr. Jones alleged that the overrun of time limit was due to his inability to obtain delivery of lumber and difficulties in securing sufficient labor. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct and that the delay was not primarily his fault. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

No. 3 -- Geo. E. Berry, Contract No. 3008 for construction of a bridge over Little Pudding River on the Salem-Silverton County Road, in Marion County, requested an extension of time of 15 days, from November 30 to December 15, 1948, within which to complete this job. Mr. Berry alleged that his failure to complete the project within the specified time limit was due to high water in the Columbia River which held up for three weeks delivery of piling required for the work. The Engineer advised that this contract was completed, with the exception of cleaning up the debris at the site and removal of equipment, before the contract completion date expired. He further stated that Mr. Berry's allegation that there were three weeks' delay in delivery of piling because of flood conditions is correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 4 -- Tom Lillebo, Contract No. 3007 for construction of a bridge over Salmon River on the Oregon Coast Highway, in Lincoln County, requested an extension of time of 90 days, from March 31, 1949, to June 30, 1949, within which to complete this job. He based his request on delays incident to delivery of steel required for the work. In his request Mr. Lillebo drew attention to the condition in the contract with respect to the steel item, which was to be delivered to the job by January 1949, but to date has not been received although he placed the order for it on the day the Highway Commission awarded the contract to him. The Engineer advised that the contract provides for completion of the project on or before March 31, 1949, and that the contractor ordered the steel immediately after the contract was awarded to him. The fabricators now advise, he said, that the steel has not been shipped from the East and that they will require at least 60 days to fabricate it after it arrives. Mr. Lillebo, he said, has made every effort to complete the work on time, and it is through no fault of his that the job will not be done within the specified time limit. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 5 -- R. & M. Construction Company, Contract No. 2995 for construction of an overcrossing on the Pleasant Hill Section of the Willamette Highway, in Lane County, requested an extension of time of 135 days, from October 31, 1948, to June 30, 1949, within which to complete this job. They gave the following reasons for requiring extra time within which to complete the job: (1) That the cut for the overpass was not completed until August 15, 1948 (2) Due to conditions of the slopes the state engineers redesigned the footings and columns (3) The contractor working on the roadbed did not place gravel at either end of the bridge structure, thus rendering it most difficult to deliver material to the site of the bridge. The Engineer advised that the Commission's agreement with the Federal Government provides that this project shall be completed prior to May 31, 1949, and when the contract

was awarded the Federal Government anticipated completion of the railroad cut underneath the structure by May 31, 1948; however, unexpected water conditions were encountered and the excavation was not completed until August 15, 1948, occasioning a delay of 107 days in the contractor's operations. This delay, he said, was not due to any fault of the contractor, in view of which he recommended that the extension of time requested be granted without penalty up to and including May 31, 1949, but not up to June 30, 1949, as the contractor requests. The Commission approved the recommendation unanimously.

No. 6 -- C. M. Corkum Company, Contract No. 3015 for construction of a pedestrian overcrossing at the Hooker Street intersection of Front Avenue, Portland (Failing School Crossing), Multnomah County, requested an additional extension of time of 183 days, from November 30, 1948, to June 1, 1949, within which to complete this job. The contractor advised that the work is complete except for the painting, which could not be done because of continuous rain and dampness, so it is necessary to defer such work until next spring when weather conditions are favorable. The Engineer advised that the structure was completed within the time allowed except for the final coat of paint on the steel girders, as mentioned by the contractor. He further stated that he asked the contractor to delay the painting work until next spring because a good job could not be secured during the period of inclement weather. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The State Highway Commission, in passing on contractor's requests for extensions of time within which to complete the contracts as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the time limits specified.

In the discussion of contractors' requests for extensions of time it was brought out that some of the contractors allege that the provision in the state specifications calling for alloy steel is the reason they cannot complete their projects within the specified time limits, such material being difficult to obtain and being more costly than the other type. The Engineer was instructed by the Commission to investigate the allegations and submit a report on the availability of such type of steel and its cost and the desirability of specifying it in highway contracts.

Pursuant to instructions from the Commission at the previous meeting, the Engineer reported on his inspection of the work done by F. L. Somers on the Midland-Macks' Store Section of the Lower Klamath Secondary Highway, in Klamath County, State Highway Contract No. 2917, to determine whether or not the work is satisfactory. He advised that the project was inspected by the Assistant State Highway Engineer, Mr. W. C. Williams, on November 16, who gives as his opinion that the job has been satisfactorily completed by the contractor, that the roadbed is stable and compares favorably with the average project consisting of light oil surface. Commissioner Schaupp advised that

there have been numerous complaints filed against the work and he is inclined to believe that the criticism is more on the type of improvement than the finished product, the specifications calling for a light type construction which he did not believe will stand up under the traffic which uses the road. He further stated his willingness to accept the contract, notwithstanding the local objections, but suggested that the Engineer in the future give further study and consideration to a higher type of oil surfacing for improvements in this category. Following further discussion, during which the Engineer explained the reasons for specifying a certain type of oil surface in different localities, the Commission voted unanimously to accept the contract under discussion and to release to Mr. Somers final payment for the work. The Engineer was instructed to bear in mind the suggestion made by Commissioner Schaupp in preparing his specifications for future projects of this type inasmuch as they prove that the lighter type of improvement is false economy.

The Engineer reported that contracts Nos. 2917, 2954, 2973, 2977, 2988, 2989, 3028, 3030, 3035, 3069, 2969, 2986, 3008, 3041, and 3043 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported and by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer requested authority for an expenditure of $389,975 for the purchase of cars, trucks, road maintenance equipment, and other miscellaneous equipment, which for the most part, he said, is needed by March 1, 1949. He also requested authority for an expenditure of $23,465 for office equipment, engineering equipment, etc. not on a rental basis. He further requested authorization of an expenditure of $20,794 of 1949 funds for the purchase of office furniture and equipment, radio equipment, repair shop equipment, and testing laboratory equipment, orders for which were placed in 1948 but on which no deliveries have been made or will be made soon enough to pay the invoices as 1948 bills. (For details with respect to each of the three above-mentioned items, see letter dated December 15, 1948, directed to the Oregon State Highway Commission and signed by W. C. Williams, Acting State Highway Engineer, in general files.) The Commission by unanimous vote approved all three requests.

The Commission discussed and approved a proposed agreement with the Northern Pacific Railway Company covering installation of two highway drainage culverts under the company's railroad tracks at Myrick on the Athena-Holdman Highway, in Umatilla County. (The agreement was signed on the following day.)

The Commission also discussed and approved a form of agreement with MacWilkins, Cole and Weber, advertising consultants, covering services to be rendered by them during the calendar year 1949 to the Travel and Information Department. (The agreement was signed on the following day.)

The Engineer brought up for discussion and for the Commission's approval a tabulation listing the employees of the State Highway Department who will be eligible for step increases in salary under the Civil Service Rules and Regulations on January 1, 1949. He pointed out that there are 422 employees who will be eligible for the increase but not all of them will receive it because it will be granted only to those employees whose merit ratings warrant the increase. He submitted a list of the employees and recommended automatic step increases, starting January 1, 1949, to those who merit it, which, he said, is in conformity with the Commission's established policy with regard to such matters. The Commission approved the recommendation unanimously and so ordered. (See copy of letter dated December 9, 1948, directed to the Oregon State Highway Commission and signed by W. C. Williams, Acting State Highway Engineer, in general files for full details.)

The Commission unanimously confirmed oral authority previously given for out-of-state travel at state expense as follows:

(1) Making joint inspection at Bremerton, Washington, of electronics equipment damaged in an accident at Astoria Ferry Terminal:

W. W. Stiffler	$20.00
G. W. Neuner	18.00
Floyd Simon	18.00
C. B. Stanley	18.00

(2) For returning to Fort Lewis, Washington, a Bailey bridge borrowed from U. S. Army:

Henry T. Tidwell, truck driver	$39.00
Edwin Hill, truck driver	39.00
Arthur Curry, truck driver	19.50
Ralph Anderson, truck driver	19.50

(3) Attendance of C. H. Armstrong, Assistant Parks Superintendent, at meeting of National Conference of State Parks in Miami, Florida; $335.03.

A letter was presented from Hon. Ralph T. Moore, Chairman of the Legislative Interim Committee for the Study of Highway, Road and Street Needs, Revenue and Taxation, requesting that Mr. O. R. Eckersley, Executive Secretary of the Committee, be carried on the State Highway Department payroll for the first four months of 1949 so the Committee can have his services available in making up its reports to the legislature and concluding its activities. The Engineer advised that Mr. Eckersley's present salary is $450 a month, which means that the expense would total $1,800. He pointed out that the Committee has spent only about $75,000 of the amount of $100,000 set up by the Highway Commission to help finance its work, so the additional $1,800 will come well within this budget. He recommended approval of Mr. Moore's request. The

Commission approved the recommendation unanimously.

The Secretary reported on the operations of Riggle and Clark, logging operators, Cascade Locks, pursuant to instructions from the Commission at the previous meeting. He recalled that the Commission authorized granting a 15-day permit to these operators to truck haul logs over the Columbia River Highway from Dodson to Cascade Locks as a temporary expedient but deferred a decision whether or not to grant a permit of longer duration pending information as to the extent of the company's operations. A letter has been received from the company, he said, to the effect that it has discontinued its operations for the winter season and will not have any logs to truck until next spring and then only a few. In view of this information, the Commission decided to postpone action until the company is ready to resume its hauling operations.

The Engineer brought up for discussion the matter of furnishing plans and specifications for bridge projects, free of cost, to suppliers of steel. He recalled that the Commission some time ago ordered a charge of $2 made for each set of plans and specifications furnished to contractors and others but suggested that this order be modified to allow furnishing of plans and specifications to suppliers of steel for bridge projects without cost, inasmuch as they are not particularly interested in selling steel to the state but need the information to quote to contractors. The Commission approved the suggestion and it was so ordered.

The Commission discussed, and upon recommendation of the Engineer and the Chief Counsel, unanimously adopted the attached resolutions marked EXHIBITS "G", "H", "I", "J", "K", and "L", which resolutions by this reference are made a part hereof with like effect as though copied in full herein, abandoning the following highway sections where alignment has been revised and the highway reconstructed on the revised alignment:

(1) North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, in Harney County

(2) Prineville Section of the Ochoco Highway, in Crook County

(3) Kimberly-Monument and Monument Bridge Sections of the Kimberly-Long Creek Secondary Highway, in Grant County

(4) Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, in Gilliam County

(5) Johns-Wolf Creek Section of the Pacific Highway, in Josephine County

(6) Adrian-Homedale Section of the Nyssa-Adrian Secondary Highway, in Malheur County

The Commission also discussed and, upon recommendation of the Engineer, approved the following changes in the Milton-Washington State Line Section of the Oregon-Washington Highway: (1) Rerouting and designating as a part of the Oregon-Washington Highway the newly constructed highway along Parallel Street and its extension to the Washington State line; (2) Designating as a state secondary highway the old route of the Oregon-Washington Highway from Milton to the Washington state line. The attached resolution marked EXHIBIT "M" with reference thereto, which resolution by this reference is made a part hereof with like effect as though copied in full herein, was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chandler.

The Commission also discussed and unanimously approved designation of the Crater Lake Highway from Crater Lake National Park boundary to a junction with The Dalles-California Highway and the designation of the Sun Mountain Secondary Highway throughout its entire length as additions to the Federal Aid Secondary Highway System. The attached resolution with reference thereto, marked EXHIBIT "N", which resolution by this reference is made a part hereof with like effect as though copied in full herein, was thereupon adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chandler.

A resolution was presented from the 20th General Conference of the Pacific Northwest Trade Association commending the Oregon State Highway Commission for the cooperation extended other agencies in advertising in a national medium for the promotion of tourist travel to the Pacific Northwest. The Commission expressed appreciation for this token and ordered the resolution filed in the records.

The Commission noted and ordered filed a resolution from the County Court of Clackamas County whereby the State of Oregon is released from any and all responsibility pertaining to Clackamas County Market Road No. 23 and County Road No. 945 (South End Road) which was used as a detour during reconstruction of the Pacific Highway East between Oregon City and New Era.

A letter was presented from Larry Roth, President, Timber Carnival Association, Albany, Oregon, requesting permission for the Albany Junior Chamber of Commerce and the City of Albany to use Waverly Lake and Waverly State Park in connection with its annual timber carnival scheduled for July 2, 3, and 4, 1949. The Engineer advised that the carnival association complied in all respects with the requirements and conditions covering use of the property during its 1948 celebration and that all phases of traffic and parking were well handled; moreover, the premises have been cleaned up satisfactorily. He recommended, in view thereof, that the Association's request be granted subject to the same conditions and requirements as applied during the 1948 carnival. Following discussion, the Commission approved the recommendation unanimously.

The Commission unanimously approved payment of membership dues for the year 1949 in the American Association of State Highway Officials amounting to $450 and membership dues for the year 1949 in the Western Association of State Highway Officials amounting to $50.

The Commission had under discussion a date for its next regular meeting and unanimously selected Monday and Tuesday, January 24 and 25, 1949, as the date for such meeting. The Secretary was instructed to make the usual arrangements to hold this meeting in the Imperial Hotel, Portland.

The Chief Accountant, Mr. Malcolm Hawke, brought up for discussion the microfilming of State Highway Department records so that the originals may be destroyed and filing space be made available for new records. He gave as his understanding that the law requires that records be kept for at least ten years, but after that time they may be destroyed. The Highway Department's records, he said, are complete back to the year 1917, which requires a tremendous amount of space to file them. He suggested the microfilming of the records back to the 1936-37 biennium. He estimated the cost to do the initial work at $8,500 and subsequent work at $500 annually. The Commission deferred action on the matter pending a report from the Chief Counsel as to what can be done legally along that line.

The Commission had under discussion the appointment of an architect, or architects, to design the proposed State Highway Department Office Building, in Salem. The Chief Counsel presented a form of agreement with Whitehouse, Church, Newberry and Roehr, architects, in conformity with instructions given by the Commission at the previous meeting. He read aloud excerpts from the agreement, and he and the Engineer explained details. The matter was discussed at some length but a decision with respect thereto was deferred until the following day; however, the Commission definitely expressed favor for a five-story structure that would harmonize with other buildings in the State Capitol Group. (The matter was discussed further on the following day, at which time the Commission approved the form of agreement as prepared and unanimously selected Whitehouse, Church, Newberry and Roehr as architects for this structure. The Commission also ordered that a five-story structure be designed.)

The Chief Counsel reported that he is frequently requested by members of the legislature and others to prepare bills for presentation to the legislature, not all of which cover Highway Department matters. He requested instructions whether or not to continue this practice, in view of the fact that the legislature meets in January 1949. He said that he did not particularly object to preparing the bills and could refuse to do so; however, he would be obligated to prepare them if presented through the Attorney General. He was authorized by the Commission to prepare bills as requested if there is an obligation attached thereto, but with the understanding that they are to be absolutely foreign and connected in no way whatsoever, either implied or direct, with the State Highway Department.

Chairman Banfield brought up for discussion the Commission's controversy with White Bros. Co., contractors, who refused to construct the Oneonta Borrow Pit Section of the Columbia River Highway, in Multnomah County, after having been awarded the contract on May 16, 1946, as the result of competitive bidding. He inquired as to the status of the Commission's claim against the bond, which previously was declared in default. The Chief Counsel advised

that he had been unable to reach a settlement with either White Bros. Co. or the Maryland Casualty Company, surety on the proposal bond furnished by them in connection with this job, and that he now is preparing a court complaint. In the discussion of this matter Chairman Banfield suggested that it might be advisable hereafter to refuse to accept bonds written by the Maryland Casualty Company until this case has been satisfactorily disposed of. Commissioners Schaupp and Chandler both expressed their concurrence in this suggestion and it was so ordered. The Chief Counsel was instructed to notify the Maryland Casualty Company accordingly.

The Engineer brought up for discussion the matter of abandoning certain portions of the old route of the Columbia River Highway in the vicinity of the Tongue Point Naval Base, Clatsop County. He advised that during the war years the section of the highway was relocated with Federal Access Funds to eliminate interference with activities of the naval base. These eliminated sections, he said, were of no further use for state highway purposes but had to be maintained for convenience of people residing thereon and for access to and from the Tongue Point Naval Base, which is still in operation. The Navy, he said, has now stated a willingness to take over jurisdiction and maintenance of these abandoned sections so long as the Navy has use for the old road, so, in his estimation, it is now proper for the Commission to take formal action abandoning them as any part of the highway right of way. He exhibited a map showing the sections referred to and recommended favorable consideration by the Highway Commission. Following discussion the Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto marked EXHIBIT "O", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer also brought up for discussion the matter of acquiring the area between the right of way of the Oregon Coast Highway and the high water mark in Siletz Bay south of Schooner Creek, Lincoln County. He suggested that this property should be acquired in order to keep it clear of buildings and to preserve the scenic view. He recommended that the Right of Way Department be authorized to conduct negotiations for options for it before it is built up. The Commission approved the recommendation unanimously and so ordered.

The Assistant Counsel, Mr. DeSouza, reported on the plan of insurance coverage on buildings acquired in Sullivan's Gulch, Portland. The matter was discussed briefly and the Chief Counsel was authorized to purchase the coverage in conformity with the provisions of the plan adopted at the previous meeting.

A letter was presented from Chester M. Bates, representing the Bates Lumber Company, North Plains, Oregon, requesting permission to truck-haul logs over the six-mile section of the newly constructed Sunset Highway between North Plains and Banks. The Engineer recommended that the request be denied because the roadway is not fully stabilized to withstand such manner of traffic. The Commission approved the recommendation.

The meeting adjourned at 4:45 p.m. to reconvene on the following morning in the same room.

15141

Portland, Oregon
December 21, 1948

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following present and participating:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

THREE HIGHWAYS IN HARNEY COUNTY

BURNS ROCK PRODUCTION PROJECT

Vernie Jarl, Gresham	$ 34,100.00
C. E. Loseberg, Nyssa	34,580.00

THE DALLES-CALIFORNIA HIGHWAY IN KLAMATH COUNTY

ROSEDALE SECTION

Babler Bros., Portland	$ 54,287.00
Stevenson Constr. Co., Salem	54,301.00
T. W. Thomas, Portland	55,346.00
E. C. Hall Co., Portland	55,991.00

Snook Bros., Corvallis	119,755.00

TWO STATE HIGHWAYS IN WALLOWA COUNTY

MINAM-WALLOWA LAKE ROCK PRODUCTION PROJECT

Vernie Jarl, Gresham	$ 41,570.00

The County Court of Umatilla County, represented by County Judge Jame H. Sturgis and Commissioner William Meiners, was present in the interests of th Holdman-Helix County Road. Judge Sturgis advised that they are appearing before the Commission to personally confirm the action of the County Court, as disclosed in their letter of November 23, 1948, directed to the Oregon State Highway Commission, attention Mr. R. H. Baldock, in which the Court states that it is heartily in favor of deleting the McDougal Camp-Pioneer Spur reconstruction project on the Weston-Elgin Secondary Highway from the current construction program and substituting therefor the improvement of the Holdman-Helix Road and the widening and construction of curbs along the Columbia River Highway in the City of Umatilla. The County Court, he said, favors such substitution of projects; moreover, the county will contribute $12,000 toward the cost of the Holdman-Helix project, will furnish right of way, and will construct right of way fences as may be needed when the road is built. He added that the County

Court would prefer that the City of Umatilla project be constructed in advance of the Holdman-Helix work. In view of the information given by Judge Sturgis, the Commission unanimously approved substitution of the projects and authorized the Engineer to proceed with construction in the usual manner and to expedite the work as much as possible, bearing in mind Judge Sturgis' request that the work in the City of Umatilla be given preference over the other.

Mr. Archie W. Easton, City Councilman, and Gene R. Williams, representing the City of Umatilla, came before the Commission with regard to widening and construction of curbs along the Columbia River Highway in the City of Umatilla. Chairman Banfield advised that the Commission had just concluded an arrangement with Umatilla County providing for improvement of a county road between Holdman and Helix by deferring another project in the current construction program and that by making such substitution of projects, the Commission has sufficient funds remaining from the original allocation to finance the widening and curb construction through the City of Umatilla so that work will go forward as rapidly as possible; moreover, the Engineer has been instructed to advance the project as much as he can. Mr. Easton thanked the Commission for its decision and advised that the Commission can expect 100 percent cooperation from the new city council.

Messrs. B. D. Shippe and R. C. King, both of Beaver, and Mr. George Zimmerman, Yamhill, constituted a delegation representing the Big Nestucca Highway Improvement District which appeared before the Commission regarding the construction of a new highway from a junction with the Oregon Coast Highway at Beaver, in Tillamook County, to a junction with the Tualatin Valley Highway at Yamhill, in Yamhill County. Mr. King headed the group. He advised that their district was formed many years ago under the old highway improvement district law, which since has been rescinded, and that under authority of that law a survey was made for a road between these points, but the road was never constructed, except for a short section at each end. They now need construction of the remaining link, about seven miles in length, which will provide a through roadway for travel and will effect a great saving in mileage to the Willamette Valley over the present route through Hebo and Grande Ronde. He further advised that they are not asking the State Highway Commission to finance construction of this road but their hope is only to secure engineering advice, particularly insofar as it concerns construction of five bridges on the seven-mile section remaining to be completed. The district, he said, will construct the road later on with the aid of the counties concerned. In the discussion of this matter the question arose whether or not the Highway Commission has authority to perform such service for an organization of this kind. The Chief Counsel advised that the law does not permit an expenditure of state highway funds in behalf of a highway improvement district, but inasmuch as the county is concerned, the Commission does have the authority to grant such a request if presented by the county court, and the engineering services then could be furnished without charge. The Engineer advised that the survey referred to by Mr. King was made in 1925 and that he is not familiar with it. He suggested, if the Commission approves, that a regular reconnaissance survey be made when weather conditions are favorable. The Commission unanimously approved such survey on the condition that the request for it comes from the county court, and that the

State Highway Department assumes no reponsibility whatsoever, either for constructing the road or for maintaining it after it is built.

Mr. C. M. Starnes, Grants Pass, came before the Commission regarding use of state-owned property at the junction of the Pacific Highway and the Redwood Highway just south of the Rogue River Bridge at Grants Pass. It appears that Mr. Starnes and his partner, Mr. Suder, started construction of a store building on their property but were stopped by State Highway Department employees when it was found that the building encroached on highway right of way. It also appears that they were using some of the state's property for parking purposes. It was brought out that the property in the first instance was acquired by the state to preserve the sight distance at this location for safety reasons and for landscaping purposes and that the Highway Department is now making plans for a landscaping project. Mr. Starnes advised that the encroachment is absolutely unintentional, that they had their property surveyed by a local surveyor before they started construction of their building, but later, when the survey was checked by an engineer of the Highway Department, the encroachment showed up. The Engineer exhibited a map showing the property in question and the encroachment, together with the area proposed for landscaping. He suggested that the Commission might deed to Mr. Starnes the area upon which his building encroaches if Mr. Starnes will deed to the state an area of comparable value in order to square up the state's property line. Mr. Starnes stated that he is not taking an arbitrary stand in the matter and is perfectly willing to work out anything that is equitable for all concerned, but they would like to be able to have a roadway around their building when the landscaping is done for the accommodation of customers who would park their automobiles back of their business establishment, which roadway would not interfere in any way with the highway, and that they would also like to have ingress and egress privileges. This matter was discussed at some length and as a result thereof the Commission referred it back to the Engineer and the Chief Counsel to discuss further with Mr. Starnes in an effort to arrive at a mutual agreement.

The Commission resumed discussion of the selection of a firm of architects to design the proposed State Highway Department Office Building, which discussion was begun on the previous day, and as a result thereof unanimously approved the appointment of Whitehouse, Church, Newberry and Roehr in this capacity, on the basis of the written agreement considered earlier in the session. The agreement with Whitehouse, Church, Newberry and Roehr was thereupon signed by the Commission.

In this connection the Commission unanimously confirmed its previous decision to have the design of the building prepared as a five-story sturcture and authorized the Engineer to convey such information to the architects.

A delegation from Hood River, representing the Hood River Port Commission and the Chamber of Commerce, was present regarding the adoption of a permanent location for the proposed revision of the Columbia River Highway through the City of Hood River and particularly insofar as the proposed alignment crosses property belonging to the Port of Hood River. This delegation

was headed by Mr. R. E. Steele, Secretary of the Chamber of Commerce, and included Ross Callie; Luke Nichols; J. H. Travis, Secretary; and L. C. Sherwood, of the Port Commission; and Carl Reese, City Engineer. Mr. Travis was principle spokesman for the group. He advised that the Port Commission is very desirous that the Commission definitely locate the route of the Columbia River Highway through their city because the Port has a working arrangement with the U.S. Army Engineers for a $150,000 development project at the mouth of Hood River which includes construction of a jetty and a ship basin 10 feet deep, 400 feet wide, and 1,200 feet long. This work, he said, will involve considerable dredging and it is planned to place the dredged material on acreage owned by the Port Commission nearby in order to build up that area for industrial use later on, so it is very essential that the highway location be decided as soon as possible. The State Highway Engineer exhibited a map showing the proposed highway location and explained details. He advised that a location survey has not been made and recommended that the Commission authorize such survey now and the securing of options for right of way so it can be tied up before buildings are constructed on it.

In the discussion that followed Mr. Travis mentioned that the Port has future plans for construction of a spur railroad track leading from the main line railroad to their industrial area; however, he said this will not cross the proposed highway location or interfere with it in any way, if the Commission adopts the line as presently proposed. Mr. Reese pointed out that the city has acquired from the Federal Government property which it plans to use as a sewage disposal site, and they plan to spend about $140,000 for sewage development in the western part of the city. This development, he said, will be affected by the highway location, but it can be worked out satisfactorily if it is known definitely where the highway is to be located. He also mentioned a city auto park in the western part of Hood River, the development of which is being postponed pending adoption of the highway location. As the result of discussion the Commission unanimously authorized the Engineer to make a survey for the definite location of the highway along the route shown on the map and to include a reconnaisance survey of the entire section between Hood River and Mosier. He was instructed to bear in mind the proposed spur railroad track and other things mentioned by the delegation in connection therewith. The Chief Counsel was authorized to negotiate options for the right of way as soon as the survey is completed and descriptions prepared by the Engineer.

Mr. Tom H. West, member of the Board of County Commissioners of Multnomah County, was present and discussed with the Commission matters pertaining to the operation of the upper deck of the Steel Bridge across the Willamette River, Portland, during the time that highway construction contemplated under the contract awarded on the previous day is in progress. He advised that the bridge structure is owned by the Southern Pacific Company and the Union Pacific Railroad Company and that the county has an agreement with the companies for use of the upper deck by the general public, which agreement expires in January 1949 and is up for renewal. He gave as his understanding that it is the plan of the Highway Commission to redeck the structure, which would take about two months' time, during which time

the bridge will be closed. The Board of County Commissioners, he said, would like to know, in writing, before entering into a new agreement with the railroad companies, whether or not the state will pay the rental charge for use of the structure during the time it is closed. The Engineer advised that the upper deck of this structure needs redecking and that it is his intention to ask the Commission for authority to do the work; however, it is not likely that the work will have to be done until 1950. He suggested that during the time the bridge is closed to general public use the state pay the rental charge and when it is reopened to public use that Multnomah County resume payment of this charge until such time as the entire highway improvement is complete, when the state will assume full jurisdiction in conformity with previous written agreement between the county, the state, and the railroad companies. Mr. West stated that Multnomah County will renew the agreement with the railroad companies and pay all rental charges until the bridge is taken over by the state, pursuant to the agreement mentioned by the Engineer, except the rental charges for the period when the bridge is closed by the state for redecking purposes. The Commission unanimously accepted this offer and authorized and instructed the Chief Counsel to notify the Board of County Commissioners of Multnomah County, in writing, of the action taken.

Pursuant to instructions previously received, the Engineer submitted for the Commission's consideration a list of Federal Aid projects contemplated for construction in the Second Postwar Construction Program for which surveys are required, as follows, and explained that no surveys had been made of some of these projects, that surveys are now under way in connection with others, and that for some, surveys were completed a number of years ago but these will need additional data to bring them up to date:

SURVEY AUTHORITY REQUESTED

PART I - PRIMARY FEDERAL AID PROJECTS

COUNTY	Highway, Section and Description
Division No. 1:	
Hood River	Columbia River, Cascade Locks-East Grading, Surfacing and Oiling
Hood River	Columbia River, Warren Cr.-Viento, Grading and 2-lane Surfacing
Division No. 3:	
Lane	Willamette, Coast Fork Bridge
Lane	Siuslaw, Greenleaf Creek Bridge
Division No. 4:	
Hood River	Columbia River, Viento-Mitchell Point, Grad. and 2-lane Surf.

(Cont.)

SURVEY AUTHORITY REQUESTED (Cont.)

PART III - URBAN FEDERAL AID PROJECTS

Division No. 1:	
Multnomah	Pacific East, South Unit, Columbia Slough to Denver Jct., Service Roads and Interchanges
Division No. 3	
Coos	Oregon Coast, Coos Bay, Grading

The Engineer requested authority to conduct surveys of all of these projects, insofar as is necessary, in order to avoid delays when the Commission is ready to authorize the projects for bids. After careful consideration the Commission by unanimous vote authorized the Engineer to proceed with the making of the surveys for such projects as requested.

The meeting recessed for luncheon at 11:45 a.m. and reconvened at 2:00 p.m. with the same persons present and participating.

A delegation representing the Salem Chamber of Commerce and the Salem City Council was present in the interests of the following projects:

(1) Construction of a new bridge across the Willamette River to relieve traffic congestion between Salem and West Salem

(2) Designation of a permanent route for US99E through Salem

(3) Widening of North Capitol Street to relieve traffic congestion

The delegation was headed by Mr. Clay Cochran, Manager of the Salem Chamber of Commerce, and included the following:

Charles A. Sprague, ex-Governor, representing the Salem Chamber of Commerce and the Salem Planning Commission, Salem
Albert Gille, representing Mayor Robert L. Elfstrom, Salem
G. F. "Ted" Chambers, Director, Board of Directors, Salem Chamber of Commerce and Chairman, Highway Committee, Salem
Roy Harland, President, Chamber of Commerce, Salem
C. A. McClure, Engineer, Chamber of Commerce Planning Commission, Salem
Dan Fry, City Councilman, Salem
Carroll Meeks, Willamette Valley Bank, representing Hollywood District, Salem
Elmer Amundson, representing Keizer District, Salem
Clayton W. Jones, representing South Salem
Harold Davis, City Engineer, Salem
James D. Olson, Capitol Journal, Salem
Ben Maxwell, Salem
R. L. Forster, West Salem
Paul Wallace, Salem
Earl C. Burk, West Salem
Walter Musgrave, Mayor, West Salem, President, Greater Willamette Bridge Association
Hollis Smith, Mayor, Dallas
R. L. Himes, Polk County Engineer, Dallas

Mr. Sprague was principle spokesman. He urged adoption of a Division Street location for the new Willamette River Bridge, the eastern approach to be constructed to allow traffic on Water, Front, and Commercial Streets to pass under it and to meet the present street grade on Liberty Street, the westerly end to skirt the foothills in West Salem, passing over what is known as Wallace Road, and joining the present highway west of the Southern Pacific Company railroad tracks near the western limits of West Salem. He presented numerous arguments in support of such location and routing and filed with the Commission exhibits and a brief in support thereof. Mr. Sprague advised that the delegation has no recommendation to offer concerning the rerouting of US99E, but he emphasized the need for expediting a plan and getting it under way because developments in Salem are being held up awaiting the Commission's decision. In this connection he urged the Commission also to decide definitely a route of entrance for the Silver Creek Falls Secondary Highway (ORE22?) into Salem, such information being urgently needed by the city in developing its street improvement plan.

Chairman Banfield advised that the Commission is not in position at the present time to make any definite statements or commitments with respect to the highway situation in Salem and cannot do so until it has made its concluding inspection trip of highways throughout the state, which must be done to enable the Commission to provide a well balanced program of highway improvements; however, the Commission anticipates doing something in Salem. He also

said that the Commission wishes to study the Engineer's report on the Salem highway situation before arriving at any decision. As to the future location of US99E through the Salem district, Chairman Banfield pointed out that it would be inadvisable to adopt a location much in advance of construction because a knowledge of the Commission's plan would act adversely to the state's best interests because it would immediately cause right of way costs to rise.

Mr. Gille mentioned two resolutions adopted by the Salem Chamber of Commerce, in one of which the Commission is urged to widen North Capitol Street from Court Street to Union Street and in the other the Commission is asked to designate a permanent route for US99E through Salem. He urged early commitments from the Commission on both requests so as to permit the Long Range Planning Commission to develop a system of arterial streets through the city, and particularly early action on the widening of North Capitol Street.

Mr. Fry also spoke in behalf of both of the City Council's projects. He suggested adoption of a program that can be carried through within the next four or five years, leaving the balance of the overall development for future undertaking. Chairman Banfield concluded the discussion by again stating that the Commission is not in position today to give the delegation any satisfaction because it wishes to study the Engineer's report on the subject before making any statements.

A delegation from Union County, consisting of the following persons, appeared before the Commission with respect to the proposed plan to reroute the Old Oregon Trail through Ladd Canyon, between Lone Pine and North Powder: Lewis Terrell, Union; Glen Sands, Cove; L. H. Bramwell, Union; G. I. Hess, Union; and Lew Wallace, Portland. Mr. Hess headed the group. They urged modernization of the present route via the town of Union rather than construction of a new highway through Ladd Canyon. They declared that the present route is the better of the two because the summit on that route is 400 feet lower than the summit on the Ladd Canyon route and snow conditions would be much less severe. They presented a statement showing that on December 15, 1948, the snow at Ladd Canyon summit was three feet deep, whereas it was only three inches deep at the summit on the present route at that time. They also alleged that fog conditions on the Ladd Canyon route are extremely bad and that it would require a much steeper grade to reach the summit because of the shorter length of the approach thereto. It was their contention that the present highway could be modernized for not more than one-third of the cost to construct a new highway through Ladd Canyon and pointed out that were the new highway to be constructed the state would then have two highways to maintain. They also urged the modernization of the present route through the town of Union to preserve investments built up along that route, which, in their estimation, should be given very serious consideration. Speaking in behalf of the project were Messrs. Terrell, Sands, Bramwell, and Hess. In the discussion that followed the Engineer advised that the Ladd Canyon route would provide a highway 5½ miles shorter than the existing route between the two points; also, that it would cost less money to build the highway through Ladd Canyon than to modernize the present route. The Engineer further stated that the difference in elevation between the summit on the present route and

that on the Ladd Canyon route is only 270 feet, rather than 400 feet, and that a highway with maximum grade of six percent could easily be constructed to Ladd Canyon summit.

Chairman Banfield advised that, according to the Engineer's report on this subject, construction of the highway through Ladd Canyon can be accomplished for about $175,000 less cost than to modernize the present route through Union, and in addition thereto, the Ladd Canyon route would be about 5½ miles shorter than the other. The Highway Commission, he said, has a responsibility to the general public and the Commission does not feel that the public should be penalized by being required to go the extra 5½ miles. The Commission has not as yet taken any definite action on the matter, he said, but will analyze the Engineer's report on the basis of past policy and will then make a decision.

The Commission discussed with the Engineer the bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the Commission's action being by unanimous vote:

"Burns Rock Production Project on three state highways, in Harney County. The Commission received two bids for this project, the low one being that of Vernie Jarl, Gresham, in the amount of $34,100. The other bid was submitted by C. E. Leseberg, Nyssa, at $34,580. The Commission has awarded the contract to the low bidder, Vernie Jarl.

"Grading and surfacing on the Rosedale Section of The Dalles-California Highway, in Klamath County. Babler Bros., Portland, submitted the low bid for this job at $54,287. Stevenson Construction Co., Salem, submitted the second low bid at $54,301. There were 15 higher bids. The Commission has awarded this contract to the low bidder, Babler Bros., at their bid price.

"Ramp approaches and roadway grading and paving at the west end of the Steel Bridge, in Portland, Multnomah County. The Commission received eight bids for this project, the low one being that of Kuckenberg Construction Company at $1,301,080.50, using treated piles, and $1,277,597.30, using composite piles. L. H. Hoffman, Portland, submitted the next low bid in the amount of $1,379,339.09, using treated piles, and $1,357,783.04, using composite piles. The Commission has awarded the contract to the low bidder, Kuckenberg Construction Company, on the basis of using composite piles.

"Trask River Bridge on the Oregon Coast Highway, in Tillamook County. The low bid for this work was submitted by Lindstrom Bros., Inc., Portland, at $102,325. The second low bid was submitted by Archie R. Averill, Portland, at $105,617. Four higher bids were received. The Commission has awarded the contract to Lindstrom Bros., Inc., the low bidder.

"Minam-Wallowa Lake Rock Production Project on two state highways, in Wallowa County. Vernie Jarl, Gresham, submitted the only bid for this project at $41,570. The Commission has awarded the contract to Mr. Jarl at his bid price."

A delegation from Malheur County, consisting of Dyer Bennett, Louie Schaffer, and Earl Bopp, all of Ontario; and A. P. Goodell, Nyssa, representing the Malheur County Highway and Industrial Development Association, appeared before the Commission. Mr. Bennett headed the group. This delegation asked verification of reports they have received as to action taken by the Highway Commission at the previous meeting, when they were represented by another delegation, concerning highway improvements in Malheur County, which reports are to the effect that the Commission did not plan to construct any highway improvement in this County other than the rebuilding of two bridges across the Snake River. Mr. Bennett said that the people of Malheur County are primarily interested in the improvement of primary highways in their district. Chairman Banfield advised that the former delegation was given no definite information but was informed that the Commission has a tentative setup for replacement of two bridges and for additional improvements on the Old Oregon Trail but could not at that time, nor can it now, state definitely just what will be accomplished. Mr. Bennett inquired whether or not the Commission has an agreement with the State of Idaho with respect to the Snake River Bridges and was informed that there is such an agreement between the two states, that for a number of years it was covered by a letter understanding which since has been reduced to a formal agreement. It was also pointed out that the State of Oregon has a responsibility with respect to the bridges which it cannot overlook. This was verified by the Commission's Chief Counsel who stated that, notwithstanding the agreement between the two states, if the State of Idaho did not cooperate in providing suitable bridge facilities it would be up to the State of Oregon to provide such facilities or close the structures entirely to public use. Mr. Bennett reiterated that they are primarily interested in improvement of highways in the Ontario district, and he urged the Commission to consider this in formulating its next construction program. Mr. Goodell mentioned that the Ontario-Nyssa and Nyssa-Adrian sections, where several fatal accidents have occurred, are most in need of improvement. The Commission agreed to consider the projects requested. This concluded the conference.

The Commission considered and signed the following agreements, etc:

Agreement with the Southern Pacific Company covering easement to construct and maintain a highway and drainage ditch on railroad property in Klamath County.

Agreement with Northern Pacific Railway Company covering installation of two drainage culverts under the company's tracks at Myrick on the Athen-Holdman Highway, Umatilla County.

Agreement with MacWilkins, Cole and Weber covering their services as advertising consultants for the year 1949.

Agreement with Washington County Court covering improvement of intersection of the Tualatin Valley Highway and Walker County Road between Portland and Beaverton.

Agreement with Whitehouse, Church, Newberry & Roehr re designing of the proposed State Highway Department Office Building, in Salem.

Revised agreement with O. W. R. & N. Co. and Union Pacific Railroad Company covering easement for Sun Dial Road grade separation near Troutdale, Multnomah County.

Maintenance site lease with Carl M. Stevens covering lease of a portion of his property near Newberg, Yamhill County.

Ground lease covering acquisition of stockpile site from Myrtle Biswell on Minam-Wallowa Lake Section of the Wallowa Lake Highway.

Project agreement with P.R.A. covering West Slope-Beaverton Section of the Tualatin Valley Highway, in Washington County.

Program letter with P.R. A. covering increase of funds on Ochoco Forest Highway Project 27-B3, Summit-East Section.

Bargain and sale deed conveying unto Edward D. and Myrtle Sullivan three parcels of land on the Unity Dam-Mill Gulch Section of the Baker-Unity Highway, in Baker County.

Bargain and sale deed conveying unto Harvey D. Crook and Wilda R. Crook, property in Curry County in exchange for land he is deeding to state.

Deed conveying unto the City of Pendleton portion of a state-owned gravel pit in Umatilla County needed by the city in connection with its sewage disposal plant.

The meeting adjourned at 3:20 p.m.

EXHIBIT "A"

Minutes of December 20 and 21, 1948

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and /or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stock pile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the following described parcel of real property, which property is owned by Columbia Way Corporation and George Gray, is necessary and acquisition of the same by the State is required for right of way purposes in connection with the N. E. Union Avenue Section of the Pacific Highway East, which property is described as follows, to-wit:

A parcel of land in Multnomah County, State of Oregon, described as:

Beginning at the intersection of the east line of N. E. Union Avenue with the north line of N. E. Gertz Road (County Road No. 1093) as they are now laid out and established; running thence North 22° 07'

(Cont.)

DEC 20 1948

EXHIBIT "B-1" (Cont.)

West along the east line of N. E. Union Avenue 150 feet; thence North 67° 53' East 50 feet; thence South 22° 07' East 65 feet; thence North 67° 53' East 50 feet; thence South 22° 07' East 65 feet; thence North 67° 53' East 40 feet; thence South 22° 07' East 91 feet more or less to the northerly line of N. E. Gertz Road; thence westerly along northerly line of said Gertz Road to the place of beginning located in the Joseph R. Switzler D. L. C. in Township 1 North, Range 1 East, W. M.

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners, and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosectuion of any action instituted for the purpose of acquiring by condemnation or otherwise the said above-described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twentieth day of December, 1948.

DEC 20 1948

Minutes of December 20, 21, 1948

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stock pile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway East (State Highway No. 1E) and the Pacific Highway West (State Highway No. 1W) are highways under the jurisdiction and control of the State, and said highways are, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of the Pacific Highway East, extending on and along N. E. Union Avenue between the city limits of the City of Portland and the intersection with Pacific Highway West near the Interstate Bridge, and likewise the Highway Commission relocated the sections of the Pacific Highway West between McMinnville and Lafayette, and between the Dayton Junction and Newberg, and for the purpose of constructing a highway over said relocated lines it is necessary that real properties be acquired for right of way and other purposes; and

WHEREAS, pursuant to the provisions of Section 100-115, O. C. L. A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor; and

(Cont.)

DEC 20 1948

15186

EXHIBIT "B-2" (Cont.)

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all rights of access from abutting property to the highway; and

WHEREAS, the Pacific Highway East and the Pacific Highway West as major highways of the State carry large volumes of traffic, and it therefore is the judgment and opinion of the Commission that access to and from said highways should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to-wit:

Real property owned by Ivan F. Phipps and Dorothy S. Phipps, husband and wife, which property is located in the Northwest quarter ($NW\frac{1}{4}$) of Section 3, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 15149, which property is being acquired for right of way purposes in connection with the Pacific Highway East; (*)

Real property owned by Herbert C. Boden, et al., which property is located in Lot 6, North Union Acres, Section 10, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 14773, which property is being acquired for right of way purposes in connection with the Pacific Highway East; (*)

Real property owned by Herschel Bell and Geraldine Bell, which property is located in the Miles Cary D. L. C. #44, also in Section 11, Township 4 South, Range 4 West, W. M., Yamhill County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 4419, which property is being acquired for right of way purposes in connection with the Pacific Highway West; (*)

Real property owned by Luella N. Lord and C. B. Norris, which property is located in Government Lot 8 and in the Southwest quarter ($SW\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 35, Township 3 South, Range 3 West,

(Cont.)

EXHIBIT "B-2" (Cont.)

W. M., Yamhill County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 14450, which property is being acquired for right of way purposes in connection with the Pacific Highway West; (*)

Real property owned by Robert R. Winegar and Amanda Winegar, husband and wife, and George W. Winegar, which property is located in the Edward Geary D. L. C. No. 62, Township 4 South, Range 3 West, W. M., Yamhill County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 14458, which property is being acquired for right of way purposes in connection with the Pacific Highway West; (*)

Real property owned by R. R. Dodge and S. May Dodge, husband and wife, which property is located in the Flores Fullquarts D. L. C. No. 71, Township 3 South, Range 3 West, W. M., Yamhill County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 14453, which property is being acquired for right of way purposes in connection with the Pacific Highway West. (*)

2. That said sections of said highways have been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury or damage.

3. The Commission does hereby further find and declare that, in addition to the acquisition of the real property described in this resolution, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the parcels of real property described in this resolution and the highways which are to be constructed thereover, except at the points and subject to conditions stated as to each parcel.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

(Cont.)

EXHIBIT "B-2" (Cont.)

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto.

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

7. This resolution shall be entered in full in the minutes and records of this Commission as of the twentieth day of December, 1948.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 121, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

DEC 20 1948

EXHIBIT "B-3"

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stock pile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the following described parcel of real property, which property is owned by Sylvia C. Archibald, is necessary and acquisition of the same by the State is required for right of way purposes and also as a source of road-building materials in connection with the Rainier-Goble Section of the Columbia River Highway, which property is described as follows:

A parcel of land lying in the North half ($N\frac{1}{2}$) of Section 13, Township 6 North, Range 2 West, W. M., Columbia County, Oregon, described as being all that part of the north ten chains of said Section 13 lying easterly of that parcel of land deeded to David B. Cantwell by deed recorded in Book 89 at Page 213 of Columbia County Deed Records. Excepting therefrom the townsite of Reuben; the railroad right of way;

(Cont.)

DEC 20 1948

the right of way of the Columbia River Highway also excepting that parcel of land conveyed by Lige Smith and Ethel L. Smith, husband and wife, to John A. Moosbrugger by deed recorded in Book 72 at Page 207 of Columbia County Deed Records, also excepting a parcel of land described as beginning at the intersection of the South line of the above-described land and the easterly line of the Columbia River Highway; running thence northerly along the easterly line of said highway to the north line of Jaquish County Road; thence east parallel with the south line of said above-described land to the Columbia River; thence southerly along the bank of the said river to a point due east of the place of beginning; thence west to the place of beginning.

Also Lots 1 to 8, inclusive, of Block 3, Lots 1, 4, 7, and 8 of Block 6, Lots 1 to 8 inclusive of Blocks 7 and 8; Lots 5, 6, 7, and 8, Block 9, Lots 5, 6, 7, and 8 of Block 10, being all in the townsite of Reuben according to the recorded plat thereof as recorded in Book M, page 144 of Columbia County Deed Records. Being a part of the North half ($N\frac{1}{2}$) of Section 13, Township 6 North, Range 2 West, W. M.

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or other instrument necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner, and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above-described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twentieth day of December, 1948.

EXHIBIT "C"

Minutes of December 20, 21, 1948

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Drain	$ 4,216.22
Huntington	4,058.01
Mitchell	936.46
Monument	504.58
Myrtle Creek	3,053.13
Riddle	2,659.73
Sumpter	1,795.96
Talent	1,629.19
Turner	2,368.95
Wallowa	3,583.36

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Drain - Applegate Street, Front Street, "B" Street
Huntington - Third Street West, Second Street West, First Street West, Lincoln Street, First Street East, Second Street East, Third Street East, Fifth Street East, Adams Street, Jefferson Street, Madison Street, Monroe Street, Fulton Street
Mitchell - Nelson Street
Monument - North Street, 3rd Street, 2nd Street, Old Kimberly - Long Creek Highway
Myrtle Creek - Orchard Street, Spruce Street, Laurel Street, Pine Street, Oak Street, Waite Street, Broadway Street, Johnson Street, 3rd Street, 4th Street, 1st Street, Division Street
Riddle - Front Avenue, "E" Street, 3rd Street, 4th Street, Millie Street
Sumpter - Mill Street, High Street, Cracker Street, Granite Street, Auburn Street, Austin Street, North Street

(Cont.)

DEC 20 1948

EXHIBIT "C" (Cont.)

Talent - Gibson Street, "I" Street, Wagner Avenue, Old Location Pacific Highway
Turner - 2nd Street, "C" Street, 5th Street, Engineering for drainage and street projects
Wallowa - Second Street, Third Street, Holme Street, Storie Street, Alder Street, Lockwood Street, Fourth Street, and alley between Alder and Storie

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3, adopted by the City of Turner in July of 1948 and approved by the Highway Commission on August 9, 1948, and Resolution Form 3, adopted by the City of Talent on April 14, 1948 and approved by the State Highway Commission on May 24, 1948, shall be cancelled, in accordance with the requests of the Cities of Turner and Talent on file in the records of the State Highway Department; and Resolution Form 3 adopted by the City of Turner on October 11, 1948 and Resolution Forms 1 and 2 adopted by the City of Talent on November 3, 1948 be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission on the 20th day of December, 1948.

EXHIBIT "E"

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

Tillamook-Donaldson Creek Section of the Wilson River Highway in Tillamook County

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above-mentioned section of state highway, together with the map, which for identification purposes bears the map file No. 6B-28-13, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the 20th day of December, 1948.

EXHIBIT "F"

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2917, with F. L. Somers, for regrading and oil mat surfacing on the Lower Klamath Lake Section of the Lower Klamath Secondary Highway in Klamath County; completed July 6, 1948.

Contract No. 2954, with Rogers Construction Company, for furnishing crushed material in stockpiles on the Weston Mountain-Elgin Section of the Weston-Elgin Secondary Highway in Umatilla and Union Counties; completed October 23, 1948.

Contract No. 2973, with Warren Northwest Inc., for grading and paving on the Lebanon Section of the Santiam Highway in Linn County; completed October 30, 1948.

Contract No. 2988, with N.A. Toole Construction Co. for furnishing crushed material in stockpiles on the McCredie Springs-Little Deschutes River Section of the Willamette Highway in Klamath and Lane Counties; completed October 31, 1948.

Contract No. 2989, with Inter City Sand and Gravel Company, for regrading and surfacing on the Fremont Junction-Mud Creek Section of the Warner Secondary Highway in Lake County; completed November 22, 1948.

Contract No. 3028, with Stevenson Construction Company, for grading and oil mat surfacing on the Fir Grove Section of the Independence-Albany County Road in Benton County; completed October 16, 1948.

Contract No. 3030, with Warren Northwest Inc., for paving on the Brownsville and Sweet Home City streets in Linn County; completed August 10, 1948.

Contract No. 3035, with Warren Northwest Inc., for grading and paving on the Middle Grove-Pudding River Section of the Silverton County Road in Marion County; completed November 29, 1948.

Contract No. 2977 with Parker-Schram Co. for partial grading and paving on the Barbur Blvd.-Boones Ferry Road Section of the West Portland-Hubbard Highway in Multnomah, Washington and Clackamas Counties; completed October 29, 1948.

(Cont.)

EXHIBIT "F" (Cont.)

Contract No. 3069, with George E. Corliss, for for topsoiling and seeding on the Milton-Washington State Line Section of the Oregon-Washington Highway in Umatilla County; completed November 9, 1948.

Contract No. 2969, with Birkemeier and Saremal, for construction of the Troutdale Overcrossing on the Columbia River Highway in Multnomah County; completed October 6, 1948.

Contract No. 2986, with R. H. Jones, for construction of a Maintenance Building at Hood River on the Columbia River Highway in Hood River County; completed November 26, 1948.

Contract No. 3008, with George E. Berry, for the construction of Little Pudding River Bridge over Little Pudding River on Salem-Silverton Highway in Marion County; completed December 3, 1948.

Contract No. 3041, with Antonsen Painting Co., for painting bridges on Redwood and Rogue River Loop Highways in Josephine County; completed November 5, 1948.

Contract No. 3045, with Douglas Paint and Hardware Co., for painting Winston Bridge on the Pacific Highway in Douglas County; completed on October 30, 1948.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

EXHIBIT "G"

Minutes of December 20, 21, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the John Day-Burns Highway known as the North Unit, Grant County Line-Crow Flat Section in Harney County, the northerly terminus of which is at Highway Engineer's Station 1543+94.1 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 1208+50 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, the contract for the construction of this relocated section of the John Day-Burns Highway was completed on July 6th, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That, in view of the fact that the section of the John Day-Burns Highway, State Highway No. 48, which begins at State Highway Engineer's Station 1543+94.1 on the new route and ends at State Highway Engineer's Station 1208+50 of the new route is now completed, the sections of the old route herein defined and described as Units "A" and "B" shall no longer be parts of the route of the John Day-Burns Highway, State Highway No. 48, but said sections shall be eliminated as parts of the highway right of way of said highway.

2. That the following sections of the John Day-Burns Highway, State Highway No. 48, as said highway is now located, to wit:

Unit "A"

Beginning opposite Engineer's Station 1297+50 of the relocated highway, which is in the Northwest quarter of the Southwest quarter of Section 30, Township 19 South, Range 32 East, W. M.; thence northerly to Engineer's Station 1304+10 of the relocated John Day-Burns Highway in the Southwest quarter of the Northwest quarter of Section 30, Township 19 South, Range 32 East, W.M.

(Cont.)

DEC 20 1948

EXHIBIT "G" (Cont.)

Unit "B"

Beginning opposite State Highway Engineer's Station 1315+45 of the relocated John Day-Burns Highway in the Northwest quarter of the Northwest quarter of Section 30, Township 19 South, Range 32 East, W.M.; thence northerly via the former route of the John Day-Burns Highway to State Highway Engineer's Station 1329+00 of the relocated John Day-Burns Highway on the line between Section 24 and Section 25, Township 19 South, Range 32 East, W.M.

which areas are identified and shown colored in brown on map attached hereto and marked "Exhibit A", and by this reference made a part hereof are hereby abandoned as parts of the right of way of the said state highway. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over and control of said right of way may be assumed and exercised by the County Court of Harney County, and may be vacated or kept by the County for such public use as the County Court of said County may determined. (*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Clerk of Harney County a duly certified copy thereof, and the County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover, or permit them to revert to the owners of the abutting property, as the County Court may determine. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 198, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "H"

Minutes of December 20, 21, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Ochoco Highway known as the Prineville Section in Crook County, the westerly terminus of which is at Highway Engineer's Station 733+23 of the relocated line and the easterly terminus of which is at Highway Engineer's Station 800+22.8 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, which eliminated sections or units will no longer be needed for State highway purposes; and

WHEREAS, Crook County, the City of Prineville and the Highway Commission have entered into an agreement under date of December 20th, 1947, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of said relocated section of the Ochoco Highway was completed on October 22nd, 1948, and highway traffic is now routed thereover; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the abandoned sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way and which portion lies between Highway Engineer's Station 759+30 of the reconstructed highway and the west city limits of the City of Prineville, which area is identified and shown colored in red, and otherwise designated as "Unit A" on map attached hereto and marked "Exhibit A", is hereby abandoned as a part of the right of way of the said state highway, but the abandoned section of the right of way of said highway from the east bank of Crooked River to the City Limits of Prineville shall remain and be maintained as a public highway. The Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction of said section of said highway shall be assumed and exercised by the County Court of Crook County, and said road shall be maintained by the County for public use within the meaning and purpose of said agreement dated December 20, 1947. (*)

(Cont.)

EXHIBIT "E" (Cont.)

2. That the portion of the old right of way, which, by reason of the relocation of the said highway, is no longer within the boundaries of the new right of way, and which portion lies between the west City Limits of Prineville and the west line of "A" or Main Street in Prineville, and which area is identified and shown colored in blue, and otherwise designated as "Unit B" on map attached hereto and marked "Exhibit A", is hereby abandoned as a part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway shall remain and be maintained as a public highway or city street. The Commission hereby surrenders all jurisdiction over said section, and hereby consents that jurisdiction over said thoroughfare shall be assumed and exercised by the City Council of the City of Prineville, within the meaning and purpose of said agreement dated December 20, 1947. (*)

3. That the section of the old highway between the south line of 2nd Street in Prineville and the south line of 3rd Street in Prineville and is shown colored in yellow on the accompanying map marked "Exhibit A", be and hereby is designated as a part or portion of the Crooked River Highway, State Highway No. 14. (*)

4. The area shown colored in green and yellow on said "Exhibit A" includes right of way acquired for the location and construction of the said highways and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said area colored in green and yellow it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green and yellow on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

5. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Crook County a duly certified copy thereof, and shall file with the Clerk of Crook County a like certified copy, and shall file a like certified copy with the City Recorder of Prineville and the City Council of Prineville, and said County Court and City Council hereby are respectfully requested to take appropriate official action, by resolution or otherwise, by which the County and City shall accept the said abandoned sections of the said old right of way shown colored in red and blue on the map attached hereto and marked

"Exhibit A", and shall assume jurisdiction thereover as a county road and city street and shall maintain the same for public purposes.

FOOTNOTE: (*)

The maps mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 178, under the heading "Abandonment and Retention Resolutions" and said maps by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "I"

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Kimberly-Long Creek Highway No. 402 known as the Kimberly-Monument and Monument Bridge sections in Grant County, the westerly terminus of which is at highway engineer's station 25+63.2 of the John Day Highway and the easterly terminus of which is at highway engineer's station 92+00 of the reconstructed line in Section 12, Township 9 South, Range 27 East, W.M.; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes, while other units must be retained for public use; and

WHEREAS, Grant County and the Highway Commission have heretofore entered into an agreement under date of October 29th, 1946, relating to the use, control and jurisdiction of the abandoned sections of said highway right of way; and

WHEREAS, the contract for the construction of said relocated section of the Kimberly-Long Creek Highway was completed on October 25, 1948, and highway traffic is now routed over said new location; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway resulting from and affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between highway engineer's station 480+00 and highway engineer's station 513+60 and between highway engineer's station 703+50 and highway engineer's station 53+50 of the Monument Bridge Section, and which area is identified and shown colored in red on map filed in the office of the State Highway Commission and marked "Exhibit A" and by this reference made a part of this resolution, is hereby abandoned as any part of the right of way of said highway, but all of said abandoned section of the right of way of said highway shall remain and shall continue to be maintained as a public highway under the jurisdiction and control of the County Court. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction and control over said road may and shall be assumed

(Cont.)

DEC 20 1948

EXHIBIT "I" (Cont.)

and exercised by the County Court of Grant County, and said road shall thereafter be maintained by the County as a county road for public travel. (*)

2. That the portions of the old right of way, which by reason of the relocation of the said highway are no longer within the boundaries of the new right of way, and which portions lie between the following stations:

Between	Station	34+10	and	Station	50+40
"	"	50+90	"	"	54+80
"	"	63+50	"	"	79+50
"	"	88+50	"	"	123+50
"	"	130+50	"	"	143+80
"	"	158+50	"	"	165+00
"	"	178+00	"	"	185+00
"	"	188+00	"	"	202+00
"	"	204+40	"	"	245+40
"	"	268+00	"	"	284+00
"	"	294+00	"	"	329+00
"	"	350+00	"	"	401+70
"	"	415+20	"	"	478+70
"	"	521+90	"	"	539+10

"	"	680+40	"	"	693+00
"	"	737+80	"	"	66+40

and which areas are identified and shown colored in brown on said map above referred to marked "Exhibit A", are abandoned as any part of the right of way of the said state highway. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction and control over said road may be assumed and exercised by the County Court of Grant County and may be vacated as a public highway or kept by the County for such other public use as the County Court of said county may find to be in the interest of the general public. (*)

3. The area shown colored in green on said "Exhibit A" includes new right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and/or for highway construction, improvement, maintenance or other public purposes and uses. For such public uses and purposes, or other public purposes, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

(Cont.)

EXHIBIT "J"

Minutes of December 20, 21, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and in the interest of the general public to relocate the section of the Wasco-Heppner Highway No. 300 known as the Hay Creek-Condon Section in Gilliam County, the westerly terminus of which is at Highway Engineer's Station 2072+45 of the reconstructed line and the easterly terminus of which is at the intersection of Main and Walnut Streets in the City of Condon; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as originally located have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Gilliam County and the City of Condon have entered into an agreement with the Highway Commission under date of July 7, 1947, relating to and providing for the use, jurisdiction, and maintenance of the abandoned sections; and

WHEREAS, the contract for the construction of the relocated section of the Wasco-Heppner Highway was completed on September 2, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between the Northwest corner of Section 8, Township 4 South, Range 21 East, W.M., and the Northwest corner of Section 10, Township 4 South, Range 21 East, W. M., and which area is identified and shown

(Cont.)

EXHIBIT "J" (Cont.)

colored in red on map attached hereto and marked "Exhibit A" and by this reference is made a part of this resolution, is hereby abandoned as any part of the right of way of the said state highway. All of said abandoned section of the right of way of said highway shall be retained as a public highway under the jurisdiction of the County Court of Gilliam County. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Gilliam County, and said road shall thereafter be maintained by the County for public use. (*)

2. That the portion of the old right of way which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between the Northwest corner of Section 10, Township 4 South, Range 21 East, W.M., and the one-fourth section corner between Sections 3 and 10, Township 4 South, Range 21 East, W.M., and which area is identified and shown colored in yellow on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Gilliam County and the City of Condon, pursuant to such manner, arrangement, or contract obligations as the City and County may agree upon. (*)

3. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between the one-fourth section corner between Sections 3 and 10, Township 4 South, Range 21 East, W.M., being also the north end of Main Street in the City of Condon, and the intersection of Main and Walnut Streets in the City of Condon, and which area is identified and shown colored in blue, and otherwise designated as Unit "E", on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the City of Condon, and said road shall thereafter be maintained by the City for public use. (*)

4. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 2100+00 and Highway Engineer's Station 2102+00 of the reconstructed highway and between Highway Engineer's Station 2108+00 of the reconstructed highway

(Cont.)

EXHIBIT "J" (Cont.)

and the southeast corner of Section 6, Township 4 South, Range 21 East, W.M., and which area is identified and shown colored in brown on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Gilliam County and may be vacated or kept by the County for such public use as the County Court of said County may determine. (*)

5. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

6. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

7. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Gilliam County and to the City Council of Condon a duly certified copy thereof, and shall file with the Clerk of Gilliam County and the City Recorder of Condon a like certified copy, and said County Court and City Council hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County and City shall accept the said abandoned sections of the said old right of way shown colored in red, yellow and blue

EXHIBIT "K"

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and in the public interest to relocate the section of the Pacific Highway known as the Johns-Wolf Creek Section in Josephine County, and

WHEREAS, by reason of the relocation of said section of highway, portions of the right of way of the highway as originally located have been eliminated and are, therefore, not within the boundaries of the new location, and

WHEREAS, it is the purpose of the Commission to take official action upon the disposition of the areas and sections of the right of way of said highway as affected by said relocation; and

WHEREAS, Josephine County and the Commission have entered into an agreement under date of April 23, 1946, relating to the use, jurisdiction, and maintenance of said abandoned sections; and

WHEREAS, the contract for the construction of the relocated section of the Pacific Highway was completed on October 8, 1948, and highway traffic is now routed over such new section;

NOW, THEREFORE, be it and it hereby is resolved by this Commission as follows:

1. That the portions of the old right of way which by reason of the relocation of the said highway are no longer within the boundaries of the new right of way, and which portions lie between Highway Engineer's Station 687+32.2 and Highway Engineer's Station 697+00 of the reconstructed highway and between Highway Engineer's Station 697+40 and Highway Engineer's Station 208+50 of the reconstructed highway, and which areas are identified and shown in red on map attached hereto and marked "Exhibit A", which map by this reference is made part of this resolution, are hereby abandoned as part of the right of way of said state highway, but all of said abandoned sections of the right of way of said highway shall remain and be maintained as a public highway by the County. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said sections of highway may be assumed and exercised by the County Court of Josephine County, and shall thereafter be maintained by the County for public use. (*)

2. That the portions of the old right of way which by reason of the relocation of the said highway are no longer within the boundaries of the new right of way, and which portions lie between Highway Engineer's Station 598+30 and Highway Engineer's Station 606+50 of the reconstructed highway and between Highway Engineer's Station 644+50 and Highway Engineer's Station

(Cont.)

EXHIBIT "E" (Cont.)

656+20 of the reconstructed highway, and which areas are identified and shown colored in brown on said "Exhibti A", are hereby abandoned as any part of the right of way of the said state highway. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said section of said highway may be assumed and exercised by the County Court of Josephine County, or may be vacated as the County Court may determine to be in the interest of the general public. (*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A: shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary is hereby directed to mail to the County Court of Josephine County a duly certified copy thereof, and shall file with the Clerk of Josephine County a like certified copy and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes, and by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on said map, and shall assume jurisdiction thereover or vacate the same as the County Court may determine. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 136, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "L"

Minutes of December 20, 21, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and in the interest of the general public to relocate the section of the Nyssa-Adrian Secondary Highway No. 450 known as the Adrian-Homedale Section in Malheur County, the northerly terminus of which is at Highway Engineer's Station 14+57.86 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 551+91.14 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway, as originally located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Malheur County and the Highway Commission have entered into an agreement under date of February 5, 1947, relating to and providing for the use, jurisdiction, and maintenance of the abandoned sections; and

WHEREAS, the contract for the construction of the relocated section of the Nyssa-Adrian Secondary Highway No. 450 was completed on October 8, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 438+90 and Highway Engineer's Station 474+20, and which area is identified as Unit "F" and shown colored in red on map filed in the office of the State Highway Commission and marked "Exhibit A" and by this reference made a part of this resolution, is hereby abandoned as any part of the right of way of the said state highway. All of said abandoned section of the right of way of said highway shall be retained as a public highway under the jurisdiction of the County Court of Malheur County. The Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Malheur County, and said road shall thereafter be maintained by the County for public use. (*)

(Cont.)

EXHIBIT "L" (Cont.)

2. Those parts of the sections of the old route of the Nyssa-Adrian Secondary Highway which are outside the established right of way of the relocated highway, which sections for the purpose of this resolution are identified as Units "A", "B", "C", "D", and "E", and are more particularly described as follows:

Unit "A"

Beginning at State Highway Engineer's Station 26+70 of the relocated Nyssa-Adrian Highway in the Northwest quarter ($NW\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 23, Township 21 South, Range 46 East, W.M.; thence southerly via the former route of the Nyssa-Adrian Highway to State Highway Engineer's Station 32+80 in the Northwest quarter ($NW\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 23, Township 21 South, Range 46 East, W.M.

Unit "B"

Beginning at State Highway Engineer's Station 125+00 of the relocated Nyssa-Adrian Secondary Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 27, Township 21 South, Range 46 East, W.M.; thence southerly via the former route of the Nyssa-Adrian Highway to State Highway Engineer's Station 134+35 of the relocated Nyssa-Adrian Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 27, Township 21 South, Range 46 East, W.M.

Unit "C"

Beginning at State Highway Engineer's Station 135+80 of the relocated Nyssa-Adrian Secondary Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 27, Township 21 South, Range 46 East, W.M.; thence southerly along the former route of the Nyssa-Adrian Highway to State Highway Engineer's Station 150+20 of the relocated Nyssa-Adrian Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 34, Township 21 South, Range 46 East, W.M.

Unit "D"

Beginning at State Highway Engineer's Station 319+75 of the relocated Nyssa-Adrian Highway in the Northwest quarter ($NW\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 14, Township 22 South, Range 46 East, W.M.; thence southeasterly along the former route of the Nyssa-Adrian Highway to State Highway Engineer's Station 362+00 of the relocated Nyssa-Adrian Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 14, Township 22 South, Range 46 East, W.M.

Unit "E"

Beginning at State Highway Engineer's Station 427+50 of the relocated Nyssa-Adrian Secondary Highway in the Southeast quarter ($SE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 23, Township 22 South, Range 46 East, W.M.; thence southerly along the former route of the Nyssa-Adrian Highway to State Highway Engineer's Station 431+00 of the relocated Nyssa-Adrian Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 26, Township 22 South, Range 46 East, W.M.

otherwise identified and shown colored in brown on map on file in the office of the State Highway Commission and marked "Exhibit A", are hereby abandoned as any part of the right of way of the said state highway, and the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said sections may be assumed and exercised by the County Court of Malheur County, and may be vacated or kept by the County for such public use as the County Court of said County may determine. (*)

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Malheur County a duly certified copy thereof, and shall file with the Clerk of Malheur County a like certified copy, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map referred to above and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes.

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and in the public interest to relocate the section of the Oregon-Washington Highway known as the Milton-Washington State Line Section in Umatilla County, the southerly terminus of which is at Highway Engineer's Station 64+84.37 of the reconstructed line and the northerly terminus of which is at Highway Engineer's Station 316+13.6 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as originally located has been eliminated and are, therefore, not within the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes, but are needed and must be retained for public use; and

WHEREAS, Umatilla County and the State Highway Commission have entered into an agreement dated the 4th day of February, 1946, File No. 132, relating to the use, jurisdiction, and maintenance of the said abandoned sections; and

WHEREAS, the contract for the construction of the relocated section of the Oregon-Washington Highway has been completed and highway traffic was routed over said section on August 30, 1948; and

WHEREAS, by subsection 36 of Section 100-115, O. C. L. A., the Highway Commission is authorized, pursuant to mutual agreement with the County, to select, designate, and thereafter maintain as a secondary state highway the section of road or highway hereinafter defined and described and generally identified as Unit "A"; and

WHEREAS, it is recognized by the State and the County that the section of highway defined and identified herein as Unit "A" possesses the characteristics as to service and use which qualify said section of highway, within the meaning of said statute, for adoption and designation as a secondary state highway; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section of the relocated and reconstructed highway between Highway Engineer's Station 64+84.37 and Highway Engineer's Station

(Cont.)

EXHIBIT "M" (Cont.)

316+13.6, and is shown colored in green on map attached hereto and marked "Exhibit A", which map by this reference is made part of this resolution, be and hereby is designated as a part or portion of the Oregon-Washington Highway, State Highway No. 8. (*)

2. That the following section of the old route of the Oregon-Washington Highway, otherwise designated as State Highway No. 8, to-wit:

Unit "A"

Beginning at the intersection of the old route of the Oregon-Washington State Highway No. 8 with the relocated Oregon-Washington Highway at the intersection of Main and Parallel Streets in the City of Milton, Umatilla County, Oregon; thence northerly via the old route of the Oregon-Washington Highway to the intersection of said old highway with the line between the States of Oregon and Washington in Section 14, Township 6 North, Range 35 East, W. M.

be designated as and made a secondary highway to be known as the Freewater Secondary Highway No. 339 and shown colored in yellow on the map attached hereto and marked "Exhibit A", and shall be maintained as such by the State in the same manner that other secondary state highways are maintained. (*)

3. The areas shown colored in green and yellow on said "Exhibit A" include right of way acquired for the location and construction of the said highway and include also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said areas colored in green and yellow, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green and yellow on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real prc. srties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

Minutes of December 20, 21, 1948

RESOLUTION

WHEREAS, the Highway Commission found it necessary and advisable to relocate the section of the Dalles-California Highway, Federal Aid Route 4, in Klamath County beginning at a point near Mazama Junction and terminating at a point near Lobert; and

WHEREAS, by reason of the relocation of said section of the Dalles-California Highway, Federal Aid Route 4, the Highway Commission on December 26, 1945 requested revision of the description of Federal Aid Route 4 to eliminate Fort Klamath Junction as an intermediate control point and the elimination of Federal Aid Route 13 (Crater Lake to Fort Klamath Junction); and

WHEREAS, the Public Roads Administration approved this request for revision of Federal Aid Route 4 and elimination of Federal Aid Route 13 on January 30, 1946, with the understanding that the abandoned portion of Federal Aid Route 4 and Old Federal Aid Route 13 would be recommended for inclusion in the Federal Aid Secondary Highway System at a later date; and

WHEREAS, the Highway Commission on August 9, 1948 adopted a resolution designating a portion of the Mazama Junction-Lobert Section of the old route of the The Dalles-California Highway as the Sun Mountain State Secondary Highway No. 428, and another portion as a part of the Crater Lake State Primary Highway No. 22;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, all members being present and affirmatively voting as follows:

1. That the portion of the old route of the The Dalles-California Highway now designated as the Sun Mountain State Secondary Highway No. 428, generally described as follows, to wit:

From a junction with FA. Route 4 in Sec. 24, T. 29S., R. 7E., W.M. southwesterly to a junction with FAS Highway 269 in Sec. 23, T. 33S., R. 7½E., W.M., the total length of which is 26.98 miles,

be and hereby is designated as Federal Aid Secondary Highway No. 539, and is shown colored in red on the accompanying map marked Exhibit "A".

2. That that portion of the Crater Lake State Primary Highway No. 22 generally described as follows, to wit:

From the south boundary of Crater National Park in Sec. 25, T. 32S., R. 6E., W.M., southeasterly to a junction with F. A. Route 4 in Sec. 21, T. 35S., R. 7E., W.M., the total length of which is 20.20 miles,

(Cont.)

DEC 20 1948

EXHIBIT "N" (Cont.)

be and hereby is designated as an addition to the existing Federal Aid Secondary Highway No. 269 and is shown colored in yellow on the accompanying map marked Exhibit "A".

3. That a copy of this resolution be presented to the Public Roads Administration, and that said Administration be requested to approve said routes or roads as Federal Aid Secondary Highways.

4. That this resolution be entered in the minutes and records of the Commission as of the 20th day of December, 1948.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 2, under the heading "Federal Aid Secondary Highway Designation" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "O"

Minutes of December 20, 21, 1948

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and in the interest of the general public to relocate the section of the Columbia River Highway known as the Tongue Point Section in Clatsop County, the westerly terminus of which is at Highway Engineer's Station 6+92.75 of the reconstructed line, and the easterly terminus of which is at Highway Engineer's Station 59+98.85 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as originally located have been eliminated from the boundaries and limits of the new location, some of which eliminated sections or areas are no longer needed for state highway purposes but are needed by the United States Government and for the service of persons living thereon; and

WHEREAS, all that part of the former route of the Columbia River Highway lying north of the north line of Birch Street in the City of Astoria in Clatsop County was condemned and appropriated by the United States of America by decree of the District Court of the United States of America by decree of the District Court of the United States, which decree is dated December 21, 1942; and

WHEREAS, the contract for the construction of the said relocated section of the Columbia River Highway has been completed and traffic is now routed thereover; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. That the portion of the old right of way of said highway, which by reason of the said relocation is no longer within the boundaries of the new right of way but is within the corporate limits of the City of Astoria, and lies between Highway Engineer's Station 466+00 and Highway Engineer's Station 464+39.7 of the original highway, which area is otherwise identified and shown colored in blue on the map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of said state highway. All of said abandoned section of said right of way shall be maintained as a public street or public highway. The Commission hereby surrenders all jurisdiction over said abandoned section, and hereby consents that jurisdiction thereover may be assumed, vested in and exercised by the United States Navy so long as the

(Cont.)

DEC 20 1948

EXHIBIT "O" (Cont.)

Navy shall maintain the road portions for the service and convenience of the people living thereon or the property adjoining thereto. (*)

2. The portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 422+22.8 of the original highway location and Highway Engineer's Station 47+25 of the reconstructed highway, and which area is identified and shown colored in red on the map attached hereto marked "Exhibit A", is, so long as the Navy shall maintain the road for the service and convenience of the people living thereon or the property adjoining thereto, abandoned as any part of the right of way of said state highway. The Commission hereby surrenders all jurisdiction over said abandoned section and hereby consents that jurisdiction may be assumed and exercised by the United States Government through its Navy Department, so long as the Navy shall maintain the road portions for the service and convenience of the people living thereon or the property adjoining thereto. (*)

3. The portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, and which portion lies between Highway Engineer's Station 50+20 and Highway Engineer's Station 57+50 of the reconstructed highway, and which area is further identified and shown colored in brown on the map attached and marked "Exhibit A", is abandoned as any part of the right of way of said highway, and all jurisdiction thereover, and all interest which the State now has in said area is hereby surrendered to the County Court of Clatsop County, and the Highway Commission hereby consents that said area may be used by the County for such purpose as in the judgment of the County Court will best serve the general public. (*)

4. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper, some of which are parts of streets vacated by the City of Astoria and includes also that portion of Cedar Street between 53rd Street and 59th Street. In connection with all of the said area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for right of way and likewise for highway construction, improvement, maintenance, and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and possession held by the State, and that no part of said area shall revert to or become the property of abutting owners. (*)

5. The boundaries of all real properties acquired for rights of way and the boundaries of all real properties, title to which is to be retained by the State as herein declared shall be appropriately and properly

(Cont.)

DEC 20 1948

EXHIBIT "O" (Cont.)

marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes and records of the Commission, and the Secretary is hereby directed to mail to the County Clerk of Clatsop County a duly certified copy thereof, and shall mail to the City Council of the City of Astoria a like certified copy; said Secretary is instructed to mail to the United States Government through the Tongue Point Naval Base a like certified copy.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 199, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Portland, Oregon
January 24, 1949

The State Highway Commission convened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. E. Neuner, Assistant Counsel
Malcolm M. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids for highway construction, as follows, were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

The Commission by unanimous vote approved the minutes of meetings held on November 3, 4, and 5, and December 20 and 21, 1948.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

(1) Proposed purchase of timbered waysides along Sunset Highway between Sunset Camp and Buxton: The Parks Superintendent recommended acquisition of a wayside strip about 350 feet wide, measured from the highway centerline, on each side of the highway for a distance of about seven miles, from Highway Engineer's Station 1530+00, at Sunset Camp, to Highway Engineer's Station 1905+00, near Buxton. He advised that this is cut-over land on which no developments have been made to date, and that it would be desirable to acquire it in order to control access and to keep off undesirable advertising signs. He estimated the cost at approximately $50 per acre, and he advised that there are about 400 acres involved. The Commission authorized negotiations and securing of opitions for the property.

(2) Question of turning over to the State Game Commission recreational filing rights to land along the Rogue River, Jackson County, in Camp White Reserve: The Parks Superintendent advised that subsequent to a filing made by the State Highway Commission, the State Game Commission made a similar filing with the War Assets Administration embracing the property which the Highway Commission wanted, but such filing was later modified to eliminate the land covered by the Highway Commission's filing. Now the War Assets Administration has raised the point that all of the property should be included under one filing by the State Game Commission, inasmuch as both Commissions have the same purpose in mind. If the State Highway Commission completes its filing, he said, it will have to pay a consideration of $5,500, but it appears that the State Game Commission can acquire the entire area without charge. He asserted his desire to retain and complete this filing if possible. As a result of considerable discussion, the Commission voted unanimously to complete its filing on the property in question, unless it can be shown that the general public will be best served and that it would be to the public's advantage to release the property in favor of the Oregon State Game Commission.

(3) Administration of Silver Falls Recreational Area, Marion County: The Parks Superintendent advised that, pursuant to instructions from the Commission at the previous meeting, he has arranged a schedule of fees for use of the Silver Falls Recreational Area, whereby the revenues received will offset the cost of operating the area. He submitted the schedule, as follows, and requested instructions:

Estimated revenue from Silver Falls Recreational Area at 1949 rates (includes CCC Camp area)

1 Seasonal Permit for use of Silver Creek Camp, 96 campers at $7.00 per season	$ 672.00	
1 Intermediate Permit for use of Smith Creek Camp, 48 campers at $1.00 per week for 7 weeks	336.00	
Income from Short Term Permits, based on 1948 usage - $1,120 plus $3 per group for 40 groups-$120	1,240.00	
	2,248.00	
65 Cords of wood at $12.00	780.00	
Total estimated revenue		$ 3,028.00

Cost of operation

2 Months salary of Custodian Shaw at $252	$ 504.00	
9 Months salary of Assistant Schmitt at $225	2,025.00	
9 Months rental on truck at $51	459.00	
Miscellaneous expenses	40.00	
Total estimated cost of operation		$ 3,028.00

It appeared to the Commission that the schedule as presented is satisfactory, and will make this area self-supporting, whereupon the Commission approved it by unanimous vote.

(4) Proposed purchase of wayside property along the Warm Springs Highway, near Deschutes River Crossing: Assistant Counsel, Mr. J. W. DeSouza, reported on this matter on behalf of the State Parks Superintendent. He advised that three parcels of land are involved, on one of which a valuation of $100 per acre has been set, a valuation of $150 per acre on the second parcel and $250 per acre on the third parcel. The owner of one of the tracts, he said, refuses to sell on the basis of such low valuation, alleging that he has previously refused an offer of $6000 for his land. He suggested further negotiations before making a decision as to the purchase of these properties. The State Parks Superintendent suggested that the negotiations be limited to acquisition of the middle of the three tracts, which contains about two acres of land and is owned by the Parton Estate, Madras, Oregon. The Commission approved the suggestion and so ordered.

(5) Status report on design of proposed Museum or Memorial Building at Champoeg State Park: The State Highway Engineer reported on this subject. He advised that he has received tentative plans from the Portland Chapter of the American Institute of Architects for this building and that they now are being checked by the Department's architectural designer. He suggested, in view of delays which have already occurred and in order to avoid further delays, that the Highway Department prepare its own detail design of the structure after mutual agreement has been reached with the group representing the American Institute of Architects with respect to the general design, so that construction of the building may be expedited. The Commission approved the suggestion unanimously.

(6) Report on negotiations for proposed park in Curry County: The Commission's Chief Counsel, Mr. J. M. Devers, reported on this subject. He advised that options have been secured from a number of property owners, that he anticipates no difficulty in acquiring some of the land which is owned by the Federal Government, but there are five or six individuals who are unwilling to sell their properties and it probably will be necessary to acquire these properties by condemnation. The average cost per acre for the property on which options have been secured, he said, is $67. He estimated the overall cost of the entire purchase at approximately $110,000. The Parks Superintendent advised that there are about 1,100 acres of land included in the proposed park area, all of which is very scenic, and that there is nothing in the U. S. that can equal it from that standpoint. He described the location as being about 15 miles north of the town of Brookings, and extending from a place known as Mack's Arch, southerly to a place known as Wales Cove. The Commission indicated a favorable attitude toward the purchase of the entire area and accordingly, instructed the Chief Counsel to continue negotiations for the purchase of same, and to present to the Commission at its next meeting, the options that he is able to secure from the respective owners.

The Assistant Counsel, Mr. J. W. DeSouza, presented for the Commission's consideration a list of properties that are needed as right of way and for other purposes in connection with State Highway improvements throughout the state, together with offers that he recommended in connection with each tract. After careful consideration the Commission authorized the purchase of all the parcels listed, at the amount of the recommended offers. The attached resolution with respect thereto marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though copied in full herein, was thereupon adopted by the Commission by unanimous vote.

The Assistant Counsel reported that he has been unable to reach satisfactory settlements with owners of additional properties that are needed for right of way and for other purposes, and that it is going to be necessary to acquire these parcels by condemnation. He presented a list of such properties together with the offer he recommended with respect to each parcel, as follows:

		Recommended Offer
Vista Avenue-Multnomah County Line Section of the Sunset Highway		
14195	Henry Angeregg and Henry Naegeli	$ 1,000.00
Sauvies Island Bridge Section of Gillihan Road 1159		
15158	Peter Roth, Minnie Roth, Ralph A. Roth and Helen J. Roth	$ 2,250.00
Ochoco Highway-Deschutes County Line Section of the Powell Butte Secondary Highway		
15228	Mrs. Neva McCaffery, a widow	$ 800.00

After careful consideration, the Commission authorized condemnation of the several tracts at the amounts recommended by the Counsel. The attached resolutions with respect thereto marked EXHIBITS "J-1", "J-2", and "J-3", which resolutions by this reference are made a part hereof with like effect as though copied in full herein, were thereupon adopted by the Commission by unanimous vote.

The Commission had under discussion the matter of completing the improvement of the Oregon Coast Highway through the City of Coos Bay. The Engineer recommended that this project be included in the Commission's next construction program so as to expedite completion of the work, which is badly needed to eliminate the traffic bottleneck condition existing. He particularly recommended that the Commission grant authority to the Chief Counsel to negotiate options for all of the right of way as may be needed and pointed out that the Commission previously authorized purchase of a portion of the right of way across unimproved properties. The Commission considered

it advisable to acquire the remaining properties, and accordingly, by unanimous vote authorized the Chief Counsel to proceed with the securing of options for the same.

The Commission discussed a proposed agreement with the City of Portland and Isaac Hasson, et ux. concerning property on S. W. Front Street, Portland, particularly described as Lot 2, Block 132, Carruthers Addition to Portland, which property is needed in connection with the highway improvement at this location. The Assistant Counsel advised that the settlement with the Hassons was effected by the City of Portland for the sum of $600, which included an amount of $300 damages for changing the grade of the street in front of the Hasson's property. The City of Portland, he said, will pay 60 percent of the cost in conformity with a previous understanding with the Commission, which leaves the State's share at $240. The Commission approved the settlement unanimously on such basis.

The Assistant Counsel presented the claim of Jalmar Mattson and wife, Astoria, arising out of a settlement for right of way along the Youngs Bay Bridge-Lewis and Clark River Section of the Oregon Coast Highway, in Clatsop County. It appears that pursuant to authority previously granted by the Commission, a right of way option was secured from the Mattsons as well as from others, for right of way needed for this proposed improvement, and that the Mattsons were given to understand that the option would be closed by the Commission in a short time; also, that in view of this information, the Mattsons purchased other property on which to re-establish themselves. Subsequently the Highway Commission ordered that all options for right of way on this section be allowed to lapse because of a possibility of rerouting the highway on another location. The Mattsons now allege that they are not financially able to handle both properties, and are asking the State to pay them for the property covered by the option. The Commission deferred decision in the matter pending a thorough investigation to ascertain whether or not the state is obligated to complete the transaction with the Mattsons. The Chief Counsel was instructed to make such investigation and report his findings at the next meeting of the Commission.

The Engineer reported receipt of offers to purchase the standing timber on a state-owned 30-acre quarry site situtate in Section 18, Township 14 South, Range 7 West, W. M., in Benton County, near the town of Alsea. He advised that the timber has been cruised and appraised by H. S. Rogers, State Forester, who estimates that there are 90,000 board feet on the tract, and who recommends a minimum sale price of $3 per M-FBM. One of the offers received for this timber, he said, was $5 per M-FBM. He recommended sale of the timber as a result of competitive bidding therefor. The Commission unanimously authorized advertising the timber for sale.

The Assistant Counsel, Mr. G. W. Neuner, brought up for discussion a proposed settlement of the condemnation case of the State Highway Commission vs. Oldenburg, concerning acquisition of property needed for a gravel pit and haul road to be used in construction of the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County. He advised that an agreement has been reached to settle this case for $5,700, which includes the amount of $1,000

for a release of Mr. Oldenburg's claim for damages for the taking of gravel from Cow Creek, which is on his property. The Commission unanimously approved the settlement.

The Commission discussed and approved an agreement with the Pendleton Lumber Company covering construction and operation of a roadway across state park property in Blue Mountain Timber Reserve, near Meacham, in Umatilla County. (The agreement was signed on the following day.)

The Commission also discussed and approved an agreement with A. C. Baumback, house mover, Sandy, Oregon, covering the re-establishment of certain buildings in the town of Gold Beach, necessitated by the improvement of the Oregon Coast Highway in this town. In the discussion of this matter, the Assistant Counsel, Mr. Neuner, explained that the agreement has been prepared in conformity with the obligation assumed by the Commission under the terms of a stipulation in the case of the State Highway Commission vs. Huntly, Knorr and others, and that the compensation to be paid Mr. Baumback for his services amounts to $8,680. (The agreement was signed by the Commission on the following day.)

The Commission considered a request from the City of Pendleton to purchase 7.2 acres of "excess" land which the Highway Commission acquired in connection with the purchase of right of way for the construction of an access road to the Pendleton Airbase Cantonment Area during World War II. The Engineer explained that the state acquired 103.8 acres of land adjacent to the Airbase road in connection with the right of way settlement, of which approximately 90 acres are outside the normal right of way width, and that a portion of such property was leased to the U. S. Government during the war; further, that the Government constructed several buildings on the property, which the City of Pendleton is now arranging to obtain as war surplus, and it also wants to acquire the land upon which the buildings are situated. He exhibited a map showing the location of the property and roadway which extends to it from the access road. He recommended sale of the property to the City of Pendleton at a price to be established by the Right of Way Department. The Chief Counsel concurred in the recommendation. In the discussion of this matter, the question arose as to the value of the entire property owned by the state, and as to the maintenance of the roadway leading from the access road to the premises. The Commission deferred a decision with respect to the sale of property until the entire area has been appraised and a valuation set upon it. The Chief Counsel was directed to make such appraisal and report it at the next meeting. As to the maintenance of the roadway, the Commission definitely decided that it would not assume such obligation, and if it decided to sell the property to the city, it would be on the condition that the city maintain the roadway at its own cost and expense.

The Assistant Counsel, Mr. DeSouza, presented for the Commission's consideration a proposed agreement with Commonwealth, Inc., Portland, covering the sale of buildings situate on right of way to be acquired for the Sullivans Gulch Highway, in Portland. As a result of discussion, the Commission unanimously approved the arrangement as set forth in the agreement. (The agreement was signed by the Commission on the following day.)

The Commission discussed briefly, and ordered filed, a written report from the Chief Counsel on the status of the claim of the U. S. Navy for damage that occurred to a truck load of its electronic equipment during the process of loading same on the ferry "M. R. Chessman", at Astoria, on June 16, 1948. It appears from the report that the total amount of the claim is well within the limits of the insurance coverage written by the Glens Falls Indemnity Company, that the Company has undertaken to dispose of the claim and is now continuing a check of the equipment in cooperation with representatives of the Navy Department. (For further details see copy of Chief Counsel's report dated December 28, 1948, in general files.)

The Commission also discussed a written report from the Chief Counsel as to the Commission's authority to destroy certain obsolete records of the Highway Department, pursuant to procedure outlined in the statutes. The Chief Counsel pointed out that there are two laws on this subject, viz: Chapter 372, Oregon Laws, 1947, and that which the legislature enacted in 1939, known as the Highway Code. He recommended, if the Highway Commission is inclined to approve the destruction of the old records, that it follow the procedure outlined in the 1947 Act, since it will have the approval of the Board of Control with respect to any papers or records which may be destroyed. The Commission decided unanimously not to destroy any of its records.

The Chief Counsel brought up for discussion matters pertaining to the case of the State Highway Commission vs. Erickson (Jewel Ice Cream Company, St. Helens, Oregon) being a condemnation action to acquire right of way needed for the improvement of the Columbia River Highway, in front of the Erickson property at St. Helens. He advised that the condemnation proceedings are terminated unless the Ericksons decide to take an appeal to the Supreme Court, and that the jury's verdict is in the amount of $26,000 whereas the defendant's testimony ranged from approximately $60,000 to $80,000. He recommended acceptance of the verdict and payment of the $26,000 set by the jury; also, that the Commission authorize payment of $865.30, attorney's fees, and an additional amount of $825, as reimbursement to the Ericksons for their expenses in connection with the case. The Chief Counsel also recommended that the Ericksons be given 60 days time within which to remove a certain concrete wall located on the premises, and six months time within which to cut back a building which encroaches about nine feet upon the highway right of way. The Commission unanimously approved the payment of $26,000, as fixed by the jury, and also approved payment of the attorney's fees, and the extra expense of the Ericksons, as recommended. The Commission also approved giving the Ericksons 60 days time to remove the wall, and six months time to cut back the building. The Chief Counsel was instructed to convey such information to the Ericksons. (The Chief Counsel reported on the following day that he had discussed this matter further with the Ericksons, who stated that they are willing to abide by the court's decision if given three years time within which to cut back their building, and that they will not require the State to pay the $26,000 until that work is completed; also, that the Ericksons will remove the concrete wall within 60 days, as previously ordered by the Commission.) The Commission deferred a decision pending recommendation of the Engineer, who was instructed to inspect the premises to

ascertain whether or not it would act adversly to the State's best interest to approve such an arrangement.

The Engineer reported the necessity to increase the 1949 Budget to pay additional expense incurred by the Highway Legislative Interim Committee. He recalled that previously the Commission had made available for this purpose an amount of $100,000, however, it now appears that there will be an overrun of approximately $6500, due mainly to the printing bill. He estimated expenditures in 1949 at $23,556.71, compared with a $10,000 setup in the budget for such purpose, and suggested, because of uncertainties, that the Budget for 1949 be increased by the amount of $15,000, to cover the estimated expense and additional expense that might arise. The Commission approved the recommendation.

The Engineer reported the results of the taking of bids in Salem on January 17, 1949, for the purchase of a tract of land adjacent to the Boardman-Stanfield Highway, where it intersects the Hermiston Secondary Highway, about five miles south of Hermiston in Umatilla County, as follows:

1.	R. C. Peters, Boardman	$ 500.00
2.	Mrs. Herman H. Plass, Hermiston	225.00
3.	Wm. B. Buck, Hermiston	210.00
4.	O. L. Carpenter, Umatilla	110.00

The Engineer advised that the value of the property as appraised by the Right of Way Department, is $400. He recommended acceptance of the high bid of $500, submitted by Mr. Peters. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Engineer presented for the Commission's approval, six minor betterment projects, as follows, which, he said, are emergency projects for which no provision has been made in the 1949 Budget as tentatively approved by the Commission.

EMERGENCY ROADWAY MINOR BETTERMENT
1949

Item No. 1 -	Oswego Hwy., Daylight cut for sight distance at Palatine Hill Road junction.	$ 250
Item No. 2 -	Cape Blanco Secondary Highway, Place perforated drain tile in cutoff trench above highway to stabilize sliding roadbed at M.P. 3.47, 80' of roadbed lost Dec. 10-11, 1948	1,300
Item No. 3 -	Pacific West Hwy., M.P. 59.48, Install pipe across highway to return drainage to natural waterway. Requested by adjacent farmers who claim damage, also installation will relieve overloaded side ditches. (Cont'd)	275

Item No. 4 - Klamath Falls-Lakeview Hwy., M.P. 43.5, Construct 250 lin. ft. of guard fence at hazardous location adjacent to Sprague River. Bly Grange requested installation account of hazard to school bus. Guard fence at M.P. 33 was authorized as a result of a previous request by same Grange. $1,000

Item No. 5 - Pacific West Hwy., M.P. 88.58, So. of Corvallis, Install culvert across highway and dig drain ditch along County Road to Kiger Island to provide outlet for trapped drainage - newly developed residential district is damaged by backed up water. County Court has granted permission to place ditch on County Road Right of Way. 5,000

Item No. 6 - Salem-Dallas Hwy. at junction of Salem-Dayton, To widen pavement and round intersection to permit a right turn at all times for traffic out-bound from Salem via Hwy. #221. 2,000

Not in the Budget - To Be Covered by Reserve Funds $ 9,825

The Engineer recommended approval of the projects. The Commission unanimously approved the recommendation.

The Engineer reported the need to replace a 48 inch corrugated, galvanized iron culvert pipe at M.P. 41.97, on the Sunset Highway, about one mile east of Sunset Tunnel. He advised the existing pipe, which was installed by the P. W. A. in 1939, is partially collapsed, and that there is insufficient area remaining at the point of collapse to insert a smaller pipe which would have sufficient area to carry the drainage. In order to repair this culvert, he said, it will be necessary to drive a tunnel through a 50 foot fill for a distance of 310 feet, and to excavate an open-cut ditch about 100 feet long at each end. He estimated the cost of the work at $15,500 and recommended approval of the project as an emergency proposition, the work to be done by contract. The Commission approved the recommendation unanimously.

The Chief Counsel brought up for discussion the matter of providing some means to safeguard the public, particularly children, from injury where houses are removed from the highway right of way in Sulivans Gulch, Portland. He stated that after the houses are removed deep excavations remain, and he is fearful that someone will fall into them, and if that happens the State would be held liable. He suggested construction of fences around each of these places. The Commission concurred in the viewpoint of the Chief Counsel, but was of the opinion that suitable protection could be provided by sloping the banks, which could be done at considerable less expense than construction of fences. The Engineer was authorized and instructed to cut back the banks with a bulldozer

when advised by the Chief Counsel that buildings have been removed and openings exist.

The meeting adjourned for luncheon at 11:45 a.m. and reconvened at 2:00 p.m. in the same room with same persons present and participating.

Mr. C. M. Souther, attorney for the Maryland Casualty Company, surety on the bond furnished by White Brothers, contractors, in connection with their bid submitted on May 16, 1946 for the Oneonta borrow pit excavating and shaping project on the Columbia River Highway, in Multnomah County, appeared before the Commission regarding this bond, which the Commission previously declared forfeited when White Brothers refused to undertake the work, the contract having been awarded to White Brothers. The Chief Counsel recited the history of this case, particularly pointing out that the surety to date has not seen fit to pay the amount of the bond, and that the Commission at the previous meeting ordered that the company be informed that its bonds will not be honored by the Commission until this case has been settled to the Commission's entire satisfaction. Mr. Souther advised that Maryland Casualty Company is desirous of doing the right thing, but is of the feeling that the Commission's decision not to accept any more of the bonds written by the Maryland Casualty Company, is rather "harsh". He suggested that the Commission bring suit against White Brothers for the amount of the bond. The Chief Counsel advised that he could not recommend to the Commission that it sue White Brothers, but he would recommend to the Commission that it give to the surety its record of the case and authorize testimony in court as to what actually did take place between the Highway Department engineers and White Brothers. The situation could exist, he said, where a bidder can have good grounds for refusing to go on with the work, and if that were true, and the State Highway Department were at fault, we would not stand on any legal technicality. However, in this particular instance the evidence reveals no defense whatsoever in the White's favor, so he could not advise the Commission to go to the trouble and expense of suing White Brothers. This matter was discussed at considerable length, and as a result, thereof, the Commission stated its willingness to bring suit against White Brothers if Maryland Casualty Company will indemnify the State and will pay the full amount of the bond, plus the costs involved in the suit, if the State cannot recover from White Brothers. Mr. Souther requested additional time to take up the matter with the home office of the Maryland Casualty Company. The Commission granted the request on the condition that he file his answer with the Commission within 10 days, or at the most, two weeks.

The Engineer brought up for discussion the proposed landscaping project along Harbor Drive, Portland, and in connection, therewith, a suggestion from the Visitor's Service of the Portland Chamber of Commerce, that a rose garden be included in the plans for this project. He recalled that the landscaping work was included in the first postwar program, an allocation of $125,000 having been made for landscaping the entire section between the Steel Bridge and Bancroft Street, but he pointed out that the estimated cost of such work today, due to rise in prices, is $188,000. Under projects already contracted, he said, a total of $28,500 has been obligated, leaving unobligated of the original set-up an amount of $96,500. He questioned the desirability of landscaping at the present time the northerly end of the project, between the Steel

Bridge and Alder Street, because of construction under way at that point, but gave as his opinion that landscaping work south of Alder Street, which is now estimated to cost about $86,500 should be done now. He estimated the cost of the proposed rose garden at $3500, making the total estimated cost $92,000, if the Commission sees fit to approve the rose garden project. As a result of considerable discussion, the Commission decided unanimously not to approve the construction of the rose garden, however, authorized the Engineer to proceed with the landscaping work between Alder Street and Bancroft Street, in conformity with the original plan, and to advertise this project for bids as as soon as detailed plans and specifications can be prepared.

The Engineer reported the need to construct a maintenance station at Dallas, (estimated cost, $15,000), and a maintenance station and two cottages at Swiss Home, (estimated cost $25,000). He advised that at Dallas the Highway Department is now renting a storage shed from Polk County, but notice has beenserved by the county that it needs the property and the buildings for county operations, and due to the fact that no other quarters are available for rental it is necessary for the State to construct its own building. Concerning the maintenance shed and cottages at Swiss Home, the Engineer advised he is unable to keep a full section crew at this place, due to the housing conditions, and that during part of 1948 the crew consisted of only one man. He gave as his feeling that if two cabins or cottages are provided along with the maintenance building, he would be able to amintain a full crew at this point. He also advised that the building in which the Highway Department equipment is presently stored, is a small corrugated, iron shed, entirely inadequate for the purpose intended. He requested authority to contract construction of the buildings at both places, the expense to be charged to "Capital Outlays", under the heading, "Construction of Buildings and Improvements at Maintenance Stations". The Commission approved the request unanimously.

The Commission discussed a landscaping project on the Oregon Coast Highway, in front of the Ragan Hotel, Florence. The Engineer recalled that the Commission inspected this place on the occassion of its inspection trip over the Oregon Coast Highway some months ago and at that time ordered a report. He exhibited a sketch prepared by the Landscape Engineer showing plans for an improvement, and estimated the cost of the improvement at about $750. He recommended the approval of the expenditure. The Commission approved the recommendation unanimously.

Commissioner Chandler reported receipt of complaints that an unsatisfactory condition exists at the north end of the Siuslaw River Bridge, at Florence by reason of trucks being parked on the highway right of way at this point. He suggested investigation of the matter and the erecting of appropriate "No Parking" signs if considered necessary to alleviate the condition. The Engineer was instructed to make such investigation.

The Engineer reported a request from the State Police Department for additional office space at Albany, Klamath Falls and Eugene to accommodate its increased personnel at these places. He advised that a thorough investigation reveals a need for additional office space not only for State Police officers but also for Highway Department personnel at each of these locations. He recommended construction of an addition to the equipment storage headquarters at

Albany, estimated tc cost $5,500, which, he said, would satisfy the requirements for 11 police officers and a highway department construction engineer. He estimated the cost to refinish two equipment storage sheds at Klamath Falls to provide sufficient space for police and highway department personnel, at $4,800. The situation at Eugene, he said, is somewhat different. At present the state police officers are occupying space in the Lane County Court House, but have been ordered by the county court to vacate early in the spring of 1949. Due to the fact there are no buildings available for renovation to accomodate the State Police at Highway Department headquarters in Eugene, the only solution for the problem is to construct an office building, which is estimated to cost $35,500. The total estimated cost of the three projects, he said, is $45,800, of which the State Police Department has agreed to pay the sum of $28,050, being the full amount of the cost of providing accommodations at Albany and at Klamath Falls, and 50 percent of the expense at Eugene. He recommended approval of all three projects. The Commission approved the recommendation unanimously.

The Engineer requested authority for an expenditure of $1,400 to replace 36 untreated fir piling, including hardware and cable, at the Enegren ferry slips; also, for an expenditure of about $7,300, for repairs to pier protection, at Isthmus Slough Bridge, including 104 untreated fir piling, with hardware and cable, making a total expenditure, with 15 percent added for contingencies and engineering, of $10,000. He advised that when the 1949 Budget was prepared it was assumed that this work could be deferred for a year or so; however, the first high waters of this season did considerable damage, making the repairs a requirement in the near future. The Commission authorized both improvements by unanimous vote.

The Commission discussed an agreement with the Public Roads Administration for the furnishing of $18,000 worth of crushed rock in stockpiles for use by the State in maintenance operations along Dad's Creek-Dixie Summit Section, of the John Day Highway, in Grant County. The Engineer explained that the Public Roads Administration has awarded a contract for the construction of this section of highway, and has included, therein, provision for furnishing crushed rock for the State but cannot furnish the rock until the agreement has been approved and signed by the Commission. The Commission approved the agreement unanimously. (The agreement was signed on the following day).

The Engineer reported that pursuant to instructions from the Commission, he has directed letters to the county courts of all the counties wherein consideration is being given by the Commission to the expenditure of Federal Aid Secondary Highway Funds on county roads, to determine if these counties will funish rights of way for the proposed improvements. Replies, he said, had been received from all the counties which indicate that the following will acquire right of way at county expense: Douglas County, Jackson County, Lincoln County, Marion County, and Wasco County. The reply received from Columbia County Court, he said, was qualified to some extent, so it will be necessary to discuss the matter with the court before its approval can be accepted; also, the County Courts of Lake, Sherman, Umatilla, and Yamhill Counites, have requested certain changes in the proposed project allotments to those counties,

which require further investigation and study. The Commission approved the report.

In this connection the Engineer requested authority to perform survey work on two county road projects that are bing considered for the Federal Aid Secondary Highway Program, as follows:

Lincoln County	Siletz-Logsdon Section	FAS No. 150
Wasco County	Tygh Valley-Wamic Section	FAS No. 311

The Commission by unanimous vote authorized the Engineer to conduct the surveys as requested, it being strictly understood, however, that it is making no commitment whatsoever as to construction, and that the counties are to obtain the necessary rights of way.

The Engineer reported that the following cities and towns have met the legal requirements for expenditure of the 1947 State Tax Street Funds which they received in 1948, and that the plans for the improvements to be financed with such funds have been examined and found satisfactory:

Cave Junction	Florence	Lexington
Clatskanie	Jefferson	Nehalem

The Engineer recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with regard thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer also reported that the City of Lexington has fulfilled the legal requirements with repect to the expenditure of 1946 State Tax Street Funds, which it received in 1947, and that the plans of the projects proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with regard thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission by unanimous vote confirmed its approval, given on December 27, 1948, three Special State Tax Street Fund projects in Waldport, Scappoose and Willamina, which are estimated to cost $4,500, $8,500, and $4,800, respectively. By this action the Commission approved the "option for cooperative construction project" for each of these cities in the amounts stated, as previously executed by the governing officers of those cities, and which were received too late to be presented to the Commission at its meeting on November 3 and 4, 1948.

The Commission had under discussion the distribution to the cities and towns of the State, ten percent of the State Highway revenues for 1948, which amount to $2,528,090.12, after deducting the sum of $250,000, which by

law is required to be spent by the State Highway Commission. The Engineer presented a list of the cities and towns that participate in such distribution of funds, showing the amount of each city's share. He advised that the amounts have been carefully checked and are correct. He recommended approval of the several allocations. The Commission approved the recommendation, and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked "EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer presented for the Commission's consideration a list of city street projects, as follows, to take up a portion of the $250,000 Special State Tax Street Fund of the year 1949.

DIVISION I

City	County	Population	Estimated Cost State	Estimated Cost City	Estimated Cost Total	Length in Miles
Gresham	Multnomah	2,724	$ 4,500	$ -----	$ 4,500	0.31
		Description: ROBERTS AVENUE from N.E. 2nd Street to N.E. 10th Drive. Place 2" asphaltic concrete on present surface.				
Hillsboro	Washington	3,747	$ 5,200	$ 10,300	$ 15,500	0.32
		Description: NORTH TENTH AVENUE from East Main Street to easterly city limits. State to place 2" of asphaltic concrete on existing 20' width of paved street. City to pay State for the placing of 4" thickness of asphaltic concrete on widened section. City to place curbs and drainage and base rock on widened section prior to State work.				

DIVISION II

City	County	Population	Estimated Cost State	Estimated Cost City	Estimated Cost Total	Length in Miles
Dallas	Polk	3,579	$ 15,000	$ --	$ 15,000	0.25
		Description: ELLENDALE AVENUE from Levins Street to Salem-Dallas Highway. Place plant patching. LEVENS STREET from Elendale Avenue southerly, place base rock, drainage and asphaltic concrete pavement. (Cont'd)

City	County	Population	Estimated Cost State	City	Total	Length in Miles
North Powder	Union	374	$ 6,600	$ --	$ 6,600	0.3

Description: "E" STREET from 2nd Street to 5th Street. Rebase weak section, place leveling course and oil mat wearing surface.

He estimated the total cost of the projects at $185,400, however, recalled that the Commission previously obligated an amount of $6,850 of the 1949 funds for expenditure in connection with the 1948 funds, so that the total now recommended, including that previously approved, is $192,250, which leaves an unallocated balance of $57,750 in the 1949 fund for programming later. As a result of careful consideration of the projects submitted for the funds under discussion, the Commission approved them by unanimous vote and authorized the Engineer to proceed with the securing of necessary agreements with the individual cities concerned.

The Commission discussed with the Engineer the bids received at the morning session for various State Highway construction projects, and at 3:00 p.m. Chairman Banfield publicly announced the results thereof, as follows, the action of the Commission being by unanimous vote:

"Crescent Diamond Lake Junction Rock Production Project on The Dalles-California and Willamette Highways, in Klamath County. The low bid for this work was submitted by F. L. Somers, Klamath Falls, at $47,600. The next low bid was that of F. H. McEwen, Eugene, at $48,580. There were two higher bids. The Commission has awarded the contract to the low bidder, F. L. Somers, at his bid price.

"Tillamook-Pleasant Valley Section of the Oregon Coast Highway, in Tillamook County. 5.74 miles of grading and paving and construction of four concrete bridges, and seven concrete box culverts. The low bid submitted for this work was that of Edwin C. Gerber, Oregon City, at $792,215.00, based on the use of asphalt. He submitted no bid based on the use of tar. The second low bid was that of Warren Northwest, Inc., Portland, at $809,609.00 based on the use of asphalt. They also submitted no bid based on the use of tar. There were six higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, E. C. Gerber, at his bid price, when certain conditions have been satisfied.

"Cow Canyon Section of the Dalles-California Highway, in Wasco County. 0.61 miles of grading, surfacing and oiling. The Commission received 28 bids for this work, the low one being that of Vernie Jarl, Gresham, at

$72,683. The next low bid was that of T. W. Thomas, Portland, at $76,076. The Commission has awarded this contract to the low bidder, Vernie Jarl, at his bid price.

The Commission discussed a letter from the City of Prineville requesting a traffic check at the intersection of 3rd and Main Streets, in Prineville, to determine upon some method of handling traffic at that intersection. The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that the volume of traffic that enters this intersection fully justifies a traffic signal, the count showing a volume of 9,503 vehicles during a 16 hour period, and an average of 350 pedestrians during an eight hour period. The Traffic Engineer, he said, recommends the installation of a stop and go signal, at an estimated cost of $2,500. He advised that he concurs in the recommendation on the condition that the City of Prineville will pay 50 percent of the installation cost, will maintain the signal after its installation, and will furnish electrical energy to operate it after it has been installed. The Commission approved the recommendation by unanimous vote.

The Commission also discussed requests for construction of a cloverleaf traffic interchange to provide a connection between the Cornelius Pass County Road (Federal Aid Secondary Highway), and the Sunset Highway, at the Merle Overcrossing, in Washington County. The Engineer advised that in constructing the Sunset Highway, the Cornelius Pass Road was carried over the highway by means of a structure, and no provision was made for a direct connection between these two roads because there are lateral county roads within reasonable distance that afford satisfactory connections. He said that the petitions were not received early enough to permit the proper study of the situation, and suggested in view thereof, that the Commission defer its deicision until he has had an opportunity to conduct an origin and destination survey, and to estimate the cost of constructing a suitable connection, if it is warranted. The Commission approved the suggestion and thereupon authorized the Engineer to make such investigation and survey. (A delegation appeared before the Commission on the following day concerning this matter. See ahead for additional minute entry).

The Commission discussed a request from citizens of Corvallis for construction of a footpath for the benefit and protection of school children, along US 99W (Pacific Highway West), for a distance of 1.10 miles north of the city limits of Corvallis, and for the construction of a similar footpath along a 1.61 mile section of US 20 (Corvallis-Newport Highway), westerly from the city limits of Corvallis. The Engineer advised that this matter has been investigated by the Traffic Engineer who recommends approval of the sidewalk construction on US 99W. at an estimated cost of $4,740, but that the request for the footpath on US 20 be denied. He concurred in the recommendation. The Commission unanimously approved construction of the footpath on US99W, but denied the request for the other.

The Secretary presented a letter from Mr. George W. Neilson, District Attorney, Jackson County, transmitting a report from the Grand Jury of the Circuit Court of this county, which contains recommendation that the State Highway

Commission continue improvements of the Green Springs Highway, by eliminating the many dangerous curves and by installing guard fence so as to remove, so far as is possible, hazardous conditions of this road. The Commission referred the matter to the Engineer for investigation and report.

There was brought to the Commission's attention a letter from Mr. Harvey Willis, Cannon Beach, urging construction of the unimproved section of the Oregon Coast Highway between Cannon Beach and Cannon Beach Junction, particularly the section from the Summit to Cannon Beach. The Commission ordered that Mr. Willis be informed that the Commission has not as yet arranged its new construction program but is working diligently to that end, and that the Commission has this project in mind along with others and will give it due consideration for the monies available.

The Engineer reported that on January 6, 1949, he awarded to T. W. Thomas, low bidder, the contract for construction of the Prineville-Eagle Rock Creek Section of the Paulina Secondary Highway, in Crook County, bids for which were received by the Commission on December 20, 1948, the condition of the award having been satisfied. The Commission confirmed the award of this contract unanimously.

The Commission discussed a written report from the Engineer, dated January 18, 1949, on the matter of cooperating with the Oregon Trunk Railroad Company in the replacement of a timber railroad trestle at the point where the Sherars Bridge Secondary Highway passes under the railroad tracks about 7.3 miles east of the Dalles-California Highway, in Wasco County. The Engineer advised that the Railroad Company proposes to replace this trestle, and were it not for the highway, such replacement would probably consist of a culvert and embankment. However, because of the highway it is necessary for the Company to continue the bridge at this point, which is estimated to cost in excess of $100,000. He estimated the cost to reconstruct that part of the existing trestle which extends over the highway, at approximately $25,091.07, 10% of which would be paid by the railroad company. It now appears that the Railroad Company proposes that the State cooperate with the Company in the reconstruction of the entire bridge, including provision for adequate horizontal and vertical clearance, to the extent of contributing the amount it would have cost the State to rebuild that part of the trestle which extends over the highway; the Engineer stated that the conditions presently obtaining at this place, with limited horizontal clearance, is dangerous to traffic, and he recommended acceptance of the Railroad Company's proposal. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion the following requests for extensions of time within which to complete highway contract work:

No. 1-- Warren Northwest, Inc., Contract No. 3068 for asphaltic concrete resurfacing on the Halsey-Brownsville Section of the Halsey-Sweet Home Secondary Highway, in Linn County, requested an extension of time of seven days, from October 15 to October 22, 1948, within which to complete this job. They attributed their failure to complete the project

within the specified time limit to adverse weather conditions which prevented starting the work as soon as was anticipated. The Engineer advised that this contract was awarded on a very short time-limit basis and that adverse weather conditions at the time of the award delayed the starting of construction. However, when good weather set in the contractor immediately moved in and did an excellent job in a very short time. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

No. 2— A. E. Saxton & Sons, Contract No. 2994 for grading and oil mat surfacing on the Monument-Hamilton Section of the Kimberly-Long Creek Secondary Highway, in Grant County, requested an extension of time of 15 days, from October 15 to October 30, 1948, within which to complete this job. They alleged that adverse weather conditions and delays experienced in receiving guard rail materials were responsibile for their failure to complete the project within the specified time. The Engineer advised that the contractor experienced considerable difficulty because of water spouts through the summer season, and that delays in delivery of guard fence materials also retarded completion of the work. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 3— Warren Northwest, Inc., Contract No. 3031 for city street paving work at Dallas, Independence and West Salem, requested extension of time of 47 days, from October 15 to December 1, 1948, within which to complete this job. They attributed their failure to complete the project within the specified time limit to bad weather conditions. The Engineer advised that the contractors completed the work in Dallas and Independence well within the specified time limit, however, due to bad weather, was delayed in completing the work in West Salem. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

No. 4— Warren Northwest, Inc., Contract No. 3010 for grading, paving, and construction of structures on the Oregon City-New Era Section of the Pacific Highway East, in Clackamas County, requested an extension of time of 90 days, from November 30, 1948 to March 1, 1949, within which to complete this job. They alleged that they were unable to complete the project within the specified time limit because of delays in the award of the contract to them, and because of wet weather conditions that handicapped the work. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct. He pointed out that all grading and paving work on the Section has been completed, and that the work remaining to be done consists of finishing the Parrot Creek Bridge and a small amount of paving at the approach thereto. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

No. 5— Antonsen Painting Company, Contract No. 2981 for painting bridges Nos. 901, 911, 1029, and 1143 on the Oregon Coast Highway, in

Curry County, requested an extension of time of 21 days, from October 31 to November 21, 1948, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions, alleging that during the number of days it was impossible to work exceeds the number of days additional time required to complete the job. The Engineer advised that the contractor made every effort to complete the work on time but could not do so for reasons stated. He recommended, in view of circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

No. 6— Archie R. Averill, Contract No. 3027 for construction of a maintenance building at Maupin, requested extension of time of 30 days, from December 31, 1948 to January 31, 1949, within which to complete this job. He attributed his failure to complete the project within the specified time limit to non-delivery of necessary plumbing fixtures. The Engineer advised that all of the work, with the exception of the plumbing work, was completed by the contractor within the specified time limit. Moreover, the State took possession of the building on December 31, and the maintenance crew is now occupying it. He recommended approval of the contractor's request for this 30 day time extension. The Commission approved the recommendation unanimously.

No. 7— Inter City Sand and Gravel Co., Inc., Contract No. 2990 for grading and surfacing the Mud Creek-Drakes Creek Section of the Warner Secondary Highway, in Lake County, requested an extension of time of 180 days, from November 30, 1948 to May 29, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that because of extremely adverse weather in the early spring, the contractor was unable to commence operations even though he had his equipment on the job and was ready to proceed, for which reason they were not able to complete the work before bad weather set in. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 8— F. J. Dussault and Frank A. Smith, Contract No. 2953 for rock production on the Pilot Rock-Ukiah Section of the Pendleton-John Day Highway, in Umatilla County, requested an extension of time of 46 days, from November 30, 1948 to January 15, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the reason given by the contractors for failure to complete the project on time is correct, and that they were unavoidably delayed for reasons stated. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

No. 9— T. W. Thomas, Contract No. 2955 for grading the Clear Creek-Forest Boundary Section of the Warm Springs Highway, in Wasco County, re-

quested extension of time of 212 days, from November 30, 1948 to June 30, 1949, within which to complete this job. He alleged that adverse weather conditions during the spring and fall months permitted an unusually short working season and that it was impossible to carry on the work as contemplated. The Engineer advised that the contractor was greatly handicapped by a very short working season and extremely bad soil conditions, that he put forth considerable effort and worked in extremely bad weather in an endeavor to complete the contract before the winter season set in, but was unable to do so. He recommended, in view of these circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 10— Struss and Mc Coy, Contract No. 2859 for production of rock on the John Day Rock Production Project on the John Day Highway, in Grant County, requested an additional extension of time of 182 days, from November 30, 1948 to June 1, 1949, within which to complete this job. They gave stormy and freezing weather as the reason for failure to complete the project within the previously extended time limit. The Engineer advised that this contract was awarded on November 26, 1946, with specified date of completion as July 31, 1947; also, that the work was not finished by that time and the Commission extended the time limit to November 30, 1948. Mr. Struss started the work, he said, on May 2, 1947, and there is still considerable work to be done. He pointed out that the previous extension of time was granted this contractor, subject to assessment of the engineering costs incurred by the State after December 31, 1947, and he recommended that the extension of time now requested be granted subject to a continuation of this penalty. The Commission approved the recommendation unanimously.

No. 11-- Warren Northwest, Inc., Contract No. 2738 for grading and paving the South Unit of the Steiwer Hill-Albany Section of the Pacific Highway East, in Linn County, requested an additional extension of time of 80 days, from May 31 to August 19, 1948, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to secure dry lumber for guard rail. The Engineer advised that all work on this project, with exception of the guard rail construction, was completed and the highway open to traffic on October 1, 1947, and that the guard rail construction was delayed because the contractor was unable to secure dry lumber which would meet the specifications. The delay, he said, has not inconvenienced the travelling public, and he recommended that the additional extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein.

No. 12-- Rogers Construction Company, Contract No. 2936 for regrading and oil mat surfacing on the Forest Boundary-Agency Section of the Warm Springs Highway, in Jefferson and Wasco Counties, requested an extension of time of 319 days, from November 15, 1948 to September

30, 1949, within which to complete this job. They said that they were unable to complete the project during the 1948 working season because of difficulties in operating their gravel pits. The Engineer advised that the contractor experienced considerable difficulty in the grading of materials that were used in the topping on this job, and for that reason was unable to complete the oiling required before the fall rains set in. The travelling public, he said, has not been inconvenienced by the delay since the surfacing and oiling on the government project immediately to the north, will not be completed until late in 1949. He recommended that the extension of time be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

No. 13-- Frank M. Parsons, Contract No. 2960 for grading and oil mat surfacing on the Carlton-Chehalem Creek Section of the Carlton-Chehalem Creek County Road, in Yamhill County, requested an extension of time of 273 days, from October 31, 1948 to July 31, 1949, within which to complete this job. He gave adverse weather conditions as the reason for failing to complete the project within the specified time limit. The Engineer advised that the contractor had ample time to complete this job within the specified time limit had he supplied sufficient equipment for the work. He recommended, in view thereof, that the extension of time requested be granted, but that Mr. Parsons be required to reimburse the State for engineering expenses incurred on this job from November 1, 1948, up to the actual completion date of the project. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 14-- J. N. & M. J. Conley. Contract No. 2895 for rock toe, slope protection, and topping construction on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County, requested an extension of time of 90 days, from December 31, 1948 to March 31, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays of another contractor in constructing a hydraulic fill which would not allow them to proceed with their work on schedule. The Engineer advised that the completion of this project was predicated on the completion of the hydraulic embankment, the contract for which was awarded to another contractor who was unable to complete his section because of the 1948 Flood. He recommended, in view of these circumstances, that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 15-- Leonard & Slate Oregon, Ltd., Contract No. 2947 for grading and paving the Roseburg-Dixonville Section of the North Umpqua County Road, in Douglas County, requested an extension of time of 196

days, from December 31, 1948 to July 15, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inclement weather during the spring months of 1948, which prevented completion of the grading and topping operations in time to do the paving work before inclement weather prevented in the fall. The Engineer advised that the contractor was unable to operate his equipment until late in the working season because of an extremely wet spring and unfavorable soil conditions, so it was necessary to defer the surfacing and paving work until next spring. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 16-- Kuckenberg Construction Company, Contract No. 2873 for grading and paving, and construction of structures on the Front Avenue Section of the Pacific Highway West, in Portland, Multnomah County, requested an extension of time of 180 days, from September 30, 1948 to May 30, 1949, within which to complete this project. They attributed their failure to complete the project within the specified time limit to inclement weather and additional work ordered by the Engineer. The Engineer advised that unusually wet weather in the Fall of 1947 and in the early Spring of 1948, materially delayed the contractor on certain portions of his work, moreover, the Columbia River Flood in June 1948 completely shut off his supply of concrete aggregate for approximately a month. The only work remaining to be done, he said, is some sloping and lanscaping work, which will necessitate about two weeks dry weather. He recommended that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

No. 17-- Coast Construction Company, Contract No. 3084 for topsoiling and seeding on the Front Avenue Section of the Pacific Highway West, in Multnomah County, requested an extension of time of 127 days, from October 15 1948 to May 31, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and delays of the main contractor, who failed to make the area available for planting on schedule. The Engineer advised that the completion of this contract was predicated on the prime contractor on the Front Avenue project completing his section by October 1. However, he failed to do so, and for that reason the Coast Construction Company was unable to proceed with the landscaping work. He recommended, in view of the circumstances, the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

No. 18— Snook Brothers, Contract No. 3062 for construction of a bridge over Gales Creek on the Tualatin Valley Highway, in Washington County, requested an extension of time of 45 days, from April 30, 1949 to June 15, 1949, within which to complete this job. They stated that work was held up by failure of the Forest Products Company to deliver piling to the job. The Engineer advised that this structure requires a number of creosote-treated timber piling which are under order with the Forest Products Treating Company--that the piling were cut, but due to the condition of the road the supplier of piling was not allowed to haul them to the treating plant. In view thereof, he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

No. 19— Harry I. Hamilton Company, Contract No. 3020 for replacement of the center bridge pier on the South Dillard Bridge over the Umpqua River on the Pacific Highway, in Douglas County, requested an extension of time of 40 days, from August 22 to October 1, 1948, within which to complete this job. They gave no reason for failure to complete the project within any specified time limit, however, they pointed out that it was a cost-plus contract, and the amount of work to be done and the method of doing it were dependent upon instructions from the Engineer. The Engineer advised that the contractors statement is correct, that the overrun in time is not due to any act of omission by the contractor. He recommended, in view thereof, that the extension of time now requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

No. 20— General Construction Company, Contract No. 2959 for construction of the Sandy River Bridge on the Columbia River Highway, in Multnomah County, requested an extension of time of 151 days, from December 31, 1948 to June 1, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unfavorable weather conditions experienced during the working season, flash floods in the Sandy River which damaged and delayed their work, and delays in deliveries of steel. The Engineer advised that work on this project was held up for several months during the exceptional flood of June 1948, and that the construction of the main span was delayed due to the inability of the fabricating company to obtain and deliver steel. He recommended, in view of the circumstances, that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that contracts, numbers 2738, 2933, 2978, 2994, 3026, 3068, 3076, 3067, 2981, 3023, 3013, 2914, for State Highway construction work have been completed according to the requirements of the contracts or modifications

thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported and by unanimous vote adopted the attached resolution relative thereot marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission discussed briefly the fire which recently destroyed a building at Fort Klamath, which was being used as a storage place for State Highway equipment. The Engineer advised that the fire occurrred at night time, and no one knows what caused it; that the building was entirely destroyed, and along with it the equipment owned by the State Highway Department. The Commission approved the report, however, ordered that hereafter reports of this nature be rendered to the Commission for its information immediately after the loss occurs.

A letter was presented from the Oregon Coast Association thanking the Commission for accomplishments on US Highway 101 during 1948, and recommending the following: (1) That angle parking be permitted on US101 in cities where the highway has been widened sufficiently to make such manner of parking practical. (2) That the State Highway Commission scrutinize the promiscuous sale of fire works along the state highway right of way. The Engineer recommended that angle parking be not allowed on this highway because it would necessitate purchase of additional highway width at points where property is most expensive. He suggested that it is a matter for the towns themselves to provide extra room for parking of vehicles, if that is required. Concerning the sale of fire works along state highway rights of way, the Engineer questioned the authority of the Commission to control this feature, unless the sales are being made within the right of way limits. As a result of the discussion the Commission voted unanimously not to permit angle parking on the highway as requested. As to the sale of fire works along the highway, the Commission ordered that the Association be informed that the Commission's long established policy will not permit the sale of any commodity upon highway rights of way and the Commission is of the belief that their problem is probably one of law enforcement by police officers.

There was brought to the Commission's attention letters from the Jackson County Chamber of Commerce and the Lake County Stock Growers Association, suggesting that the State Highway Commission employ an agronomist to advise with respect to the elimination of noxious weeds from state highway rights of way. There was also presented a resolution from the Klamath County Chamber of Commerce recommending that the State Highway Commission pay its proportionate share of the cost of weed control along state highways, such sum to be expended through existing weed control departments of the various counties. The Engineer advised that the State Highway Department now has in its employ a Landscape Engineer, who, while not a trained agronomist, has a fine working knowledge of the factors involved, and who is in a position to secure expert advice if needed, from private, state and federal agronomists, in working out the most effective measures for the control of noxious weed infestations. He recommended against the employment of a specialist for this purpose. As to the Klamath County

Chamber of Commerce suggestion, the Engineer pointed out that for a number of years the Commission has cooperated with weed control districts in the control of noxious weeds and has also been cooperative in controlling such infestations where private adjoining property owners conduct similar operations on their own property. In the discussion of the matter, the Commission appeared favorably inclined to extend the work that it has been doing in the past, provided the counties are willing to pay a portion of the expense. The Engineer was instructed to ascertain from the counties how much they are willing to contribute toward the cause. As to the employment of an agronomist, the Commission decided, in view of the explanation given by the Engineer, that it is unnecessary to employ a man at this time and so ordered.

The Commission had under discussion the designation of certain streets in Klamath Falls, as a connecting highway route between the newly constructed Klamath Falls-Malin Highway, and The Dalles-California Highway, in Klamath Falls, particularly Main Street from its intersection with Ninth Street northeasterly to its intersection with Esplanade Street, thence Esplanade Street from the Main Street intersection to a junction with the Klamath Falls-Malin Highway. The Commission approved such designation and by unanimous vote adopted the attached resolution marked EXHIBIT "G" relative thereto, which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission discussed a request from Warren Grange, Warren, Oregon, that a textboard be erected on State Highway property at Scappoose, commemorating Thomas McKay, the stepson of Dr. John McLaughlin and a famous member of the Northwest and Hudson Bay Companies. The Engineer advised that the Memorials Committee of the Oregon Historical Society recommends approval of such a textboard, and has prepared an inscription for the same, as follows:

THOMAS McKAY

"One of the Oregon Country's most picturesque fur-traders, Thomas McKay, is buried near Scappoose. He was a daring leader, famous story-teller and could drive a nail with a rifle ball. A Canadian, he arrived with the Astorians as a teen-age boy; served with the North West Company, became a partner with the Hudson's Bay Company; settled in the Tualatin Valley. Dr. John McLoughlin was his stepfather. He ranged widely, founded Fort Boise, guided gold-seekers to California. He died here in the winter of 1849-1850."

The Engineer estimated the cost of such a textboard at $250, and recommended that he be given authority to install it. The Commission approved the recommendation.

January 24, 1949

The Engineer reported that pursuant to the authority granted him by the Commission at its meeting on November 3, 1948, he has posted portions of each of the following State highways for a 50 percent reduced load limit in order to preserve the road surfaces during the prevailing bad weather conditions:

Halsey-Sweet Home Secondary Highway No. 212
Kings Valley Secondary Highway No. 191
Monmouth Secondary Highway No. 194
Eddyville-Blodgett Secondary Highway N. 180
Alsea Highway No. 27
McKenzie Highway No. 15
Alsea-Deadwood Secondary Highway No. 201
Territorial Secondary Highway No. 200
Richardson-Eugene Secondary Highway No. 220
Albany-Lyons Secondary Highway No. 211
Mehama-Mill City Secondary Highway No. 213
North Santiam Secondary Highway No. 162
Little Nestucca Secondary Highway No. 130
Salem-Dayton Secondary Highway No. 150
McKenzie Highway No. 15
Dallas-Coast Secondary Highway No. 192
Springfield-Creswell Secondary Highway No. 222
Bellevue-Hopewell Secondary Highway No. 153
Nehalem Secondary Highway No. 102
Yamhill-Newberg Secondary Highway No. 151
Farmington Secondary Highway No. 142
Scholls Secondary Highway No. 143
Wilson River Highway No. 37
Cascade Secondary Highway No. 160
Eagle Creek-Sandy Secondary Highway No. 172
Woodburn-Estacada Secondary Highway No. 161

The Engineer asked the Commission to confirm the postings. The Commission approved the request and by unanimous vote adopted the attached resolution with regard therto marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer also brought up for discussion the matter of designating the Davies Overcrossing-Sylvan Section of the Sunset Highway, as a Group I Highway, so as to permit vehicles having an overall length of 60 feet, and an overall height of 12 feet 6 inches, to operate thereover, with a combined gross weight of about 72000 pounds. He advised that up to the present time, log hauling has not been permitted over this section of highway, and neither has it been used generally by commercial vehicles in hauling heavy loads, although some of the larger trucks have been observed using it without authority, and some arrests have been made. He pointed out that separate statutes govern the per-

missable weights, the log hauling trucks being allowed 38,000 pounds on a tand em-axle trailer, whereas, the Group I Highway permits limit axle weights to 32,000 lbs. He recommended, because the axle weight is the controlling factor, that this section of highway be designated as a Group I Highway but that log trucks with the heavier axle loads be prohibited from operating over it. In the discussion of this matter it was recalled that the Commission previously refused to permit the truck-hauling of logs over this new road because of its unstable condition. In view thereof, the Commission decided to postpone until next spring, a decision with respect to the new classification.

The Commission had under discussion the disposition of portions of old highway routes, as follows: (1) Portions of the old route of the Eagle Creek-Sandy Secondary Highway, in Clackamas County. (2) Portions of the old route of the Prineville-Marks Creek Section of the Ochoco Highway, in Crook County. The Engineer advised that both of these highway sections have been reconstructed on permanent alignment, and that portions of the old route are no longer of value for State Highway purposes. He exhibited maps showing the portions referred to and recommended appropriate action by the Commission disposing of them. Following discussion, the Commission approved the recommendation and by uananimous vote adopted the attached resolutions with regard thereto, marked EXHIBIT "H", and EXHIBIT "I", which resolutions by this reference are made a part hereof with like effect as though copied in full herein.

The Commission discussed and approved agreements, as follows:

(1) Agreement with Coos County with respect to the disposition of the old route of the Coos Bay-Roseburg Highway near Sandy Creek, when the proposed reconstruction of this section has been completed.

(2) Agreement with Multnomah County and the Port of Portland with respect to the vacation of a portion of the Sun Dial Secondary Highway.

(3) Agreement with Multnomah County providing for county maintenance of Sauvies Island Bridge, after it has been constructed by the State.

(4) Agreement with S. P. & S. Railway Company whereby the Company grants to the State an easement to construct Sauvies Island Bridge over railway company property.

(5) Agreement with the California-Oregon Power Company providing for the reestablishment of the company's pole line north of Klamath Falls to accommodate a highway improvement at this place.

(6) Agreement with the City of Tillamook providing for a one way street plan for Oregon Coast Highway traffic through this city.

(7) Agreement with the City of Tillamook and Tillamook County relative to the disposition of portions of the old route of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway when the highway has been reconstructed on permanent alignment. (All of the above mentioned agreements were executed by the Commission on the following day.)

The Commission authorized an expenditure of $5,480 for the purchase of equipment as follows, for the Traffic Department and the Parks Department:

Office Equipment:

Travel Department------Filing Cabinet, and table $ 180.00

Parks Department-------	Desks, filing cabinets, and calculator	2,000.00
	Total office equipment	$2,180.00
Photographic Department Equipment----------	Photographic drier, and dazor lamp	300.00
Parks Department Equipment----------	Three tractors, one mower, and one chain saw with extra chains	3,000.00
	Total amount of request	$5,480.00

The Commission confirmed approval heretofore given orally, authorizing Mr. E. A. Collier, Maintenance Engineer, and Mr. E. F. Halik, Master Mechanic, to inspect at state expense snow plow operations in the State of Washington at Snoqualmie Pass, and to inspect a used Snogo mounted on an Oshkosh truck, which is offered for sale in Seattle. The total expense involved would be $36. The Commission also approved the following out-of-state travel at state expense:

(1) R. H. Baldock, State Highway Engineer, to attend Northwest Conference of Road Building in Seattle on February 7, 8, and 9, 1949; estimated cost $50.

(2) Harry Esch, Assistant Traffic Engineer, to attend a Traffic School in Berkely, California, during the week February 7 to 11, 1949; estimated cost $140.

(3) Mark Astrup, Landscape Engineer, to attend the Eighth Annual Conference on Roadside Improvement at the State University of Ohio on March 23 to 26, 1949; estimated cost $250.

The Commission discussed and approved an agreement with the Chetco Timber Company, covering the construction and operation of a logging road across state park property, in Curry County. (The agreement was signed on the following day.)

The Commission discussed a date for its next regular meeting, and decided to hold such meeting in Portland on Monday, February 28, and Tuesday, March 1, 1949. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

The Engineer brought up for discussion a request from Highway Department employees that the Commission give consideration to the adoption of a wage scale that compares favorably with the wages paid by private industry, by the Federal Government, and by neighboring states, for similar work. He stated that the present wage scale is entirely too low to attract new engineering

employees, and even to retain the services of engineers who have been with the State Highway Department for many years, some of whom have already received attractive offers of more remunerative employment elsewhere. The Engineer advised that this fact has been considered by the Civil Service Commission, which has recommended higher pay for these employees, but not enough higher to satisfy the condition, so unless a higher wage scale is approved, highway construction in this state is going to suffer.

The Engineer also called attention to the fact that the $20-per-month cost of living adjustment terminated on December 31, 1948, so all employees are now back to the pay schedule in effect on March 1, 1947. There is now before the Legislature, he said, a bill to extend the adjustment period six months, and he requested authority from the Commission to continue the $20-per-month cost of living pay if the bill receives legislative approval. The Commission approved the request unanimously.

The discussion of the increased pay schedule was resumed, during which the Commission expressed the feeling that the present level of Highway Department remuneration is not high enough, and that the matter should be brought to the attention of the Civil Service Commission and the State Budget Director who established it, and these officials should be requested to approve the schedule of salaries adequate to retain the present Highway Department personnel and to attract additional needed personnel, particularly in the engineering classifications.

The question arose as to the authority of the Civil Service Board to set the compensation which should be paid to various individuals. The Chief Counsel advised that the Civil Service Board has wide statutory authority, but in his estimation the responsibility of the Highway Commission is much greater than the orders and rules of the Civil Service Board; he also pointed out that the law tells the Highway Commission to hire the men that it wants and to pay them the salaries that it considers right. If the Civil Service Commission will not recognize and respect the wage scale recommended by the Commission, he said, then the Commission can proceed on its own account and as its judgment dictates.

It was the feeling of the Commission that the Civil Service Commission's wage schedule for certain Highway Department employees is fair, but that for the technically trained men it is wholly inadequate, and if it is not adjusted properly the whole highway program will be affected; also, that if a satisfactory adjustment can not be arranged with the Civil Service Board, it may be necessary to secure legislative action to realize the desired end. The Engineer was instructed to prepare and present to the Commission later in the session, a schedule of wages and salaries that he considers will satisfy the existing requirements. (The Engineer reported such schedule on the following day. The Commission approved it and instructed the Engineer and Chief Counsel to present it to the Civil Service Commission with the recommendation of the Highway Commission that it be adopted. See ahead for additional minute entry.)

The meeting adjourned at 4:45 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
January 25, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following present and participating:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. H. Devers, Chief Counsel
G. W. Heuner, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 2:30 p.m. in the same room:

COOS BAY-ROSEBURG HIGHWAY IN DOUGLAS COUNTY

MIDDLE FORK COQUILLE RIVER BRIDGE

VaDare Construction Co., Portland	$ 36,680.00
Smook Bros., Corvallis	36,923.50
Archie R. Averill, Portland	37.560.00
Rogers Construction Co., Portland	40,990.00
Hamilton & Thoms, Eugene	41,850.00
Tom Lillebo, Reedsport	45.330.00

PENDLETON-JOHN DAY HIGHWAY IN GRANT COUNTY

PINE CREEK-BEECH CREEK ROCK PRODUCTION PROJECT

P. B. Doherty & Son, Portland	31,200.00
Walter Berndt Construction Co., Vancouver, Wn.	32 760.00
C. E. Leseburg, Nyssa	35,800.00

CITY OF GRANTS PASS IN JOSEPHINE COUNTY

GRANTS PASS TRAFFIC SIGNALS

Hollywood Electric Co., Grants Pass	16,699.80
Mill Electric Co., Salem	19,968.00
W. R. Grasle Co., Salem	19,988.00
Trowbridge & Flynn Electric Co., Medford	21,350.00
Tennison Electric, Grants Pass	21,600.00

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY

SUN DIAL SECTION

	Using Asphalt	Using Tar
Carl M. Halvorson, Portland	$ 526,131.50	—
C. J. Montag & Son, Portland	527,585.30	—
Lee Hoffman, Portland	532,006.50	—
Valley Constr. Co. & Tower Sales & Erecting Co., Portland	537,453.50	—
Birkemeier & Saremal, Portland	543,436.30	—
Parker Schram Co., Portland	550,695.50	—
J. G. Watts Constr. Co., Seattle, Wn.	558,995.40	—
E. C. Hall Co., Portland	566,636.00	—
Leonard & Slate, Oreg. Ltd., Portland	595,445.50	—
Guy F. Atkinson Co., Portland	605,800.00	—

WILLAMETTE SLOUGH ON GILLIHAN ROAD IN MULTNOMAH COUNTY

SAUVIES ISLAND BRIDGE

The Gilpin Construction Co., Portland	$ 809,440.50
C. J. Montag & Son, Portland	913,000.00
Guy F. Atkinson Co., Portland	984,630.00
Morrison Knudsen Co., Seattle, Wn.	1,024,553.00

SHERMAN HIGHWAY IN SHERMAN COUNTY

BIGGS-WASCO SECTION

Leonard & Slate, Oreg. Ltd., Portland	50,415.00
Snook Bros., Corvallis	53,723.00
Carl M. Halvorson, Portland	57,812.00
Inter City Sand & Gravel Co., Eugene	57,878.50
Miller & Strong, Eugene	59,005.00
Loyd Calkins, Ocean Lake	59,690.00
Rogers Construction Co., Portland	61,981.00
Walter Berndt Construction Co., Vancouver, Wn.	67,920.00
Lindstrom Bros., Portland	72,174.00
Clifton & Applegate, Spokane, Wn.	73,834.00

A Delegation from Washington County, consisting of the following, was present and urged the Commission to construct a cloverleaf structure at the Merle Undercrossing on the Sunset Highway, so as to give traffic from the Cornelius Pass County Road direct access to the highway, which is not now possible:

January 25, 1949

Carl Berger, West Union Community Club, Hillsboro
H. R. Johnson, Washington County Commissioner, Hillsboro
Harold Wynne, Chamber of Commerce, Hillsboro
Jim Lewis, Washington County Commissioner, Hillsboro
Mr. Laskey, Orenco Community Club, Orenco
Ray Vanderzanden, Sunset Chamber of Commerce, Banks
Ben Zurcher, Sunset Chamber of Commerce, Hillsboro
Wm. Rufener, Sunset Chamber of Commerce, Banks
Paul Boechli, Parent Teachers Association, Portland
Harold E. Sherwood, Sunset Chamber of Commerce, Banks
Ernest Berger, Interested Farmer, Hillsboro
Alvin J. Hergert, Sunset Chamber of Commerce. Hillsboro
Pete Tunker, West Union Womens Club, Hillsboro
Caroline Babcock, West Union Womens Club, Hillsboro
John Babcock, West Union Community Club, Hillsboro

Mr. Carl Berger headed the group. He alleged that when the State acquired the right of way along this section of the Sunset Highway, people were given to understand that a cloverleaf structure would be built to permit traffic from Cornelius Pass County Road direct access to the highway, and that the State also would provide secondary roads to connect with this cloverleaf structure. However, that has not been done, and they feel they have been unfairly treated. He urged the Commission to authorize the building of such cloverleaf structure, and advised that they will not be satisfied until they obtain direct access to the highway at this point, which in their estimation is the most important road connection in this district. Others speaking in behalf of the project were: Messrs. Laskey, Boechli, Vanderzanden, and Wynne.

Mr. Laskey stated that he represents the people of the Orenco community, who are not particularly concerned about a cloverleaf structure, but they are very much concerned about having access to the Sunset Highway from Cornelius Pass Road. He gave as their feeling that there is plenty of room for access at this point, and that it is the logical place for such a connection.

Mr. Boechli stated that he represents the people of the Sky Line District, north of Sunset Highway. He declared that the Cornelius Pass Road acts as a funnel for Traffic out-bound to the Sunset Highway-that it carries a heavy volume of traffic, and because of the lack of access to the Sunset Highway at the present time, this traffic must detour a considerable distance either to the west or to the east to gain such access. He urged construction of the Cloverleaf connection.

Mr. Vanderzanden said he represents the Sunset Chamber of Commerce, which is vitally interested in securing access to the Sunset Highway from the Cornelius Pass Road, and who heartily endorses the recommendation of the people in the immediate area that the Highway Commission make such access available.

Mr. Wynne stated that he represents the Hillsboro Chamber of Commerce, which endorses the project because the interests of the people who are directly concerned are the interests of the Chamber of Commerce. He urged favorable consideration by the Commission from that standpoint.

Chairman Banfield advised that in designing the Sunset Highway no provision was made for direct access from the Cornelius Pass Road, although property was purchased for access at other points so that it would be available to the Commission when needed. He pointed out that connecting roads are available to take care of traffic in a manner equally as good as before the highway was constructed; also, that the Highway Commission in constructing major highways and throughways cannot provide connections at all of the cross-roads, because if it did, it would not realize or accomplish the objectives of the throughway. In concluding the discussion, he advised that the Commission has instructed its engineers to make further investigations with respect to the need and cost to provide a physical connection between the Cornelius Pass Road and Sunset Highway at this point. This investigation, he said, does not mean that the Highway Commission is definitely going to construct the structure, but is simply to obtain information with which the Commission can decide the question.

A Delegation representing the US Indian Service, appeared before the Commission regarding the reestablishment of the Indian Village on the Upper Columbia River, at Celilo, and the development of the area. Making up the delegation were: Clyde W. Flinn, representing the Regional Land Office; John Cable, Road Engineer; Charles Popkins, Regional Construction Engineer; George P. LaVada, Assistant Regional Director; Edward G. Swindle, Regional Counsel, all of Portland, and Raymond Bittney, Superintendent Klamath Indian Reserve, Klamath Falls.

Mr. Popkins was the principal spokesman for the group. He exhibited a sketch of their proposed plan and explained details which include razing of the unsightly buildings on the north side of the highway and reestablishment of the village on the south side of the highway; the construction of an underpass under the highway and the railroad for pedestrians and vehicles leading from the new village to the fishing site on the Columbia River, and provision for two approaches leading from the highway to the underpass. Mr. Popkins advised that they have a federal appropriation of $125,000 to finance improvement of the area and they are now asking the State Highway Commission to take some action towards giving the Indians a safe crossing under the highway when the village has been reestablished. He said what they really want is an underpass suitable for both pedestrian and vehicular traffic, but if that is impossible, they would be satisfied with an underpass for pedestrians only. He also mentioned that if the underpass project is approved, one of the first things they would do is construct a suitable sewer system, and in that connection they would want to place their sewer line through this underpass. Mr. Popkins also mentioned that the Indians have been approached about deeding a strip of land along the north side of the present highway as right of way for a four-lane highway improvement, and while they are loath to part with it will do so if necessary in order to get the highway improvement, if the Commission will help them out with the underpass.

In the discussion of this matter, Chairman Banfield advised that the Highway Commission is in no position at the present time to consider the construction of an underpass that would take care of both vehicles and pedestrians

because it is too costly and the Commission does not have the money available. He pointed out that the project is new to the Highway Commission and that before the Commission can make a definite statement concerning it, it must have the project analyzed by the engineers. When the engineer's report of the subject has been rendered, he said, the Commission will give it very careful study and use it as a basis for determining whether or not a working arrangement between the Indian Service and the State can be worked out, but until that time the Commission is not in a position to give an answer. The Engineer was thereupon instructed to analyze the matter and render a report to the Commission at its next meeting.

Mr. Harry B. Duncan, Medford, came before the Commission regarding the issuance of permits authorizing special movements over state highways. He advised that he represents Johnson Trucking Lines, Medford, The Southern Oregon Truckers League, and other operators in the Medford District. He was accompanied by Mr. Donald C. Miles, Portland, representing Mitchell Brothers Hauling Company.

Mr. Duncan declared that under present working arrangements they have experienced considerable delays in receiving permits from the State Highway Department authorizing special movements, which is very inconvenient, particularly when the movements are of an emergency nature. He suggested that the permits could be expedited if the Commission would maintain someone in the City of Medford to issue the permits, and that if the Commission could not see its way clear to do that then it might inaugurate a code system, such as is used in the State of California, so that permits could be issued from the Salem Office by telegram, or the Commission might authorize the issuance of blanket permits. He pointed out that the nearest point to Medford where permits can be obtained is Grants Pass, and alleged that it takes about half a day to get a permit from that office. Such procedure, he said, requires telegraphic approval from the Salem Office, which is prohibitive in cost. He suggested that the State Police Department could be informed of the code system and could allow the movement to proceed, thus avoiding delays in receiving the standard permit by mail.

This matter was discussed at considerable length. The Commission refused Mr. Duncan's request for the designation of someone in Medford to issue permits, and also refused his request for a blanket permit; however, informed Mr. Duncan that the matter would be given careful study to see what can be done to expedite the permits. The matter was thereupon referred to the Engineer and Chief Counsel for study and report.

Mr. Nelson B. Higgs, County Judge of Harney County; Mr. J. L. McCulloch, former Mayor of the City of Burns, and Mr. A. A. Bardwell of Burns, composed a delegation which appeared before the Commission in the interests of State Highway improvements in Harney County. Judge Higgs inquired as to the plans of the Commission for the completion of the Rome-Princeton Secondary Highway. He was informed that the Commission has this project in mind and intends to give it consideration when the new program is formulated, which probably will be in two or three months, after the Commission has made its final inspection trip of State highways. Judge Higgs also asked about the plans for a John Day-Burns Highway

(US395). He was informed that the work remaining to be done is Forest Highway work, under the supervision of Public Roads Administration, and that bids had been received for construction of one section known as Soda Mountain Section, but the section along Poison Creek has not as yet been advertised. This concluded the discussion.

A Delegation representing the US Highway 20 Association came before the Commission regarding improvements to the Corvallis-Newport Highway, particularly improvement of the section between Toledo and Newport. Mr. Kurt Kiesow, President of the Association, headed the group that included the following:

D. B. Amber, Lincoln County Engineer, Waldport
James Howes, Secretary-Treasurer, U.S. Highway 20 Association, Newport
Robert Maclean, Lincoln County Commissioner
E. K. Willer, owner, Willer's Motor Hotel & Apts., Newport
Thos. S. Stansbie, owner, Lincoln Hotel, Toledo
B. F. Updike, Highway 20 Association, Toledo
M. G. Hammerness, Mayor, Toledo
H. W. Curry, grocery store owner, Newport
John A. Crosby, Secretary-Manager, Lebanon Chamber of Commerce, Lebanon
H. W. Carter, Secretary
Ed Hay, Lincoln County Commissioner, Newport
Russell L. Gardner, State Senator, Newport
W. H. Osburn, Lincoln County, Toledo

Mr. Kiesow spoke at length on behalf of the project and gave a number of reasons why they believe that the improvement of this road should be placed high on the list of the Commission's priority projects. He exhibited a map of the Newport Section and pointed out the numerous curves on this eight mile stretch of road. He suggested if the Commission cannot see its way clear to build the highway on permanent alignment, that it authorize improvement of the present road by flattening some of the sharper curves and widening the roadway, and in this connection mentioned one point just west of Toledo where, by construction of a cut-off, the highway could be shortened about one-half mile.

Mr. Howes endorsed the remarks of Mr. Kiesow and advised he had just received a telephone message from the Albany Chamber of Commerce stating that this Chamber heartily endorses the improvement of the Toledo-Newport Section.

Mr. Kiesow presented a written brief in support of their oral request. He also presented a letter from County Judge F. P. Gilkey, Lincoln County, urging the improvement, which letter was read aloud by the Secretary. Chairman Banfield advised that the Commission realizes the condition of this highway and would like to do what they request, but it does not seem possible because there are so many places throughout the state where similar conditions exist, and there are not sufficient funds available to finance them. Unless additional funds are provided, he said, many desirable improvements will have to be postponed. He further stated that the Commission is not in a position to finance a major improvement of this highway but will have the Engineer investigate conditions to see what can be done with the present road to eliminate some of the worst curvature.

The Engineer was thereupon instructed to make such investigation and report his findings to the Commission.

Mr. T. I. Chapman, Eugene, was present, regarding the purchase of a small triangular tract of state-owned land abutting on the Pacific Highway at its intersection with Alder Street, in Eugene. He was accompanied by his partner, Mr. R. L. Kruse, also of Eugene. Mr. Chapman advised that the property he wishes to acquire lies between the highway and other property that he now owns, and that he is very desirous of obtaining title to it in connection with his business activities, but was informed that the Commission cannot consider sale of the property until the highway improvement that is under way at this point is completed. He gave as his thought that the highway improvement is far enough advanced so that the Commission can make its decision now, and urged that that be done. He presented letters from Deane Seeger, City Manager, and W. C. Clubb, City Engineer of the City of Eugene, both letters being directed to him, in which he is advised that the property that he desires is of no value whatsoever to the city, and that the city would offer no objection whatsoever if the Highway Commission saw fit to dispose of it. Mr. Chapman offered, if the Commission sees fit to deed the property to him now, to reconvey it to the state later or if it developes that the state needs it. The Engineer advised that the highway improvement is still under way, and that he will not be in a position to make a recommendation to the Commission until it is completed and the traffic pattern at this intersection has been established, but he would advise the Commission just as soon as he had something definite to report, which probably would be some time during the late spring or early summer when the contractor has finished his work. The Commission decided not to sell the property to Mr. Chapman at this time, however, assured him the property would not be sold to anyone else, and that he would be given preferential rights over other persons if it decides to sell it later on.

The Engineer brought up for discussion his written report, dated Jan. 10, 1949, on the highway situation in the City of Salem, containing his recommendations with respect thereto. (Copy of this report had previously been placed in the hands of the Highway Commission.) He read aloud portions of his report which is in four parts and covers the following subjects:

(1) The relocation of US99E, the Pacific Highway, into and through the city

(2) The location of a bridge spanning the Willamette River between Salem and West Salem on the route of ORE22 and ORE221

(3) The location of ORE222, the North Santiam Highway, entering Salem from the east,

(4) The adoption of a grid system of one-way streets in Salem's central business district to enable traffic to flow smoothly and in maximum volume to and from the main highway arterials

---

The Commission discussed this matter briefly but deferred its decision until latter in the session. (For details of the Engineer's report see copy of the report in general files.)

The meeting recessed for luncheon at 12:00 o'clock noon, and reconvened at 2:00 p.m. with the same persons present and participating.

The Commission resumed discussion of the Engineer's written report on the Salem Highway situation, and as a result of this discussion, authorized release of the following statement expressing its attitude with respect to the Engineer's findings and recommendations as contained therein:

"The State Highway Commission has studied and considered the 'Analysis of Changes and Modifications in the Present Location of the State Highways into and through the City of Salem' as submitted by the State Highway Engineer. It is the opinion of the Commission that the recommendation of the Engineer is a feasible and practical solution of the highway needs of both the primary highway and city street users in the Salem Area".

Pursuant to instructions received from the Commission on the previous day, the Engineer presented for the Commission's consideration a Salary Schedule for State Highway Department employees in certain classifications, as follows; (The report was actually presented to the Commission during the morning session, but the Commission decided not to take action on it until after the luncheon period):

CLASSIFICATION	NO. EMPLOYEES	PRESENT SALARIES	CIVIL SERVICE RECOMMENDATION	ENGINEER'S RECOMMENDATION
Engr. Aide I	213	200 - 245	200 - 245	200 - 245
Engr. Aide II	104	230 - 290	230 - 290	240 - 300
Civil Engr. I	141	270 - 340	270 - 340	280 - 360
Civil Engr. II	116	320 - 400	320 - 400	340 - 420
Civil Engr. III	15	360 - 440	370 - 450	400 - 480
Civil Engr. IV	15	360 - 440	420 - 520	450 - 550
Civil Engr. V	10	400 - 490	480 - 580	500 - 600
Civil Engr. VI	5	450 - 550	550 - 650	600 - 700
Civil Engr. VII	2	520 - 620	600 - 700	700 - 800
Radio Engr.	1	300 - 370	320 - 400	340 - 420
Mechanical Engr.	1	320 - 400	370 - 450	400 - 480
Accounting Clerks	6	200 - 245	210 - 255	240 - 300
Accountant I	3	230 - 290	240 - 300	260 - 320
Accountant II	5	270 - 340	280 - 350	300 - 370
Acct. Exec. I	1	320 - 400	330 - 410	350 - 450
Acct. Exec. III	1	420 - 520	440 - 540	500 - 600
Real Estate Supervisor	1	340 - 420	350 - 430	450 - 550
RoW Agent I	3	320 - 400	270 - 340	280 - 360
RoW Agent II	10	320 - 400	320 - 400	340 - 420
RoW Agent III	4	None	None	400 - 480
Travel Information Director	1	380 - 470	400 - 500	450 - 550
1st Asst. Attorney General	1	520	Not Classified	600 - 700
2nd Asst. Attorney General	1	370	Not Classified	450 - 550

The Engineer explained that this Schedule is based on salaries now being paid by the Public Roads Administration and the U. S. Reclamation Service, that it is a little under the salary schedule obtaining in the State of California, but is about equal to, or slightly higher than that being used in the State of Washington. He gave as his opinion that it will satisfy the present requirements, and recommended approval of the same.

The matter was discussed at considerable length, and as a result thereof, the Commission approved the schedule by unanimous vote on assurance that the rates are sufficient to bring desired results. The Engineer and the Chief Counsel were instructed to present the Schedule to the Civil Service Board as soon as possible, and to inform the Board that it is the Highway Commission's opinion that the salaries indicated therein must be paid if the Highway Department organization is to be kept intact and the highway program is to go forward as planned.

The Commission discussed with the Engineer the bids received at the morning session, for highway construction, and at 2:30 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the Commission's action being by unanimous vote:

"Construction of a bridge over the Middle Fork of the Coquille River on the Coos Bay-Roseburg Highway, in Douglas County. VaDare Construction Company, Portland, submitted the low bid for this work at $36,680. The next low bid was submitted by Snook Brothers, Corvallis, at $36,923.50. There were four higher bids received. The Commission has awarded the contract to the low bidder, VaDare Construction Company at its bid price.

"Pine Creek-Beech Creek Rock Production Project on the Pendleton-John Day Highway, in Grant County. Three bids were received for this work, the low one being that of P. B. Doherty & Son, Portland, at $31,200. The second low bid was submitted by Walter Berndt Construction Company, Vancouver, Washington, at $32,760. The Commission has awarded this contract to the low bidder, P. B. Doherty & Son at its bid price.

"Installation of Traffic Signals in the City of Grants Pass, in Josephine County. Hollywood Electric Company, Grants Pass, submitted the low bid for this work at $16,699.80. The second low bid was submitted by Mill Electric Company, Salem, at $19,968. There were three higher bids. The contract has been awarded to the low bidder, Hollywood Electric Company, at its bid price.

"Grading, paving, and construction of a concrete structure on the Sun Dial Section of the Columbia River Highway, in Multnomah County. Carl M. Halvorson, Portland, submitted the low bid for this work, based on the use of asphalt, at $526.131.50. He submitted no bid based on the use of tar. The second low bid was submitted by C. J. Montag & Son, Portland, at $527,585, based on the use of asphalt. They also submitted no bid based on the use of tar. There were eight higher bids. The Commission has referred the bids to the Engineer with the authority to award the contract to the low bidder, Carl M. Halvorson, when certain conditions have been satisfied

"Construction of a bridge (Sauvies Island Bridge) over Willamette Slough on Gillihan County Road, in Multnomah County. The Gilpin Construction Company, Portland, submitted the low bid for this work at $809,440.50. The second low bid was submitted by C. J. Montag & Son, Portland, at $913,000. There were two higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, The Gilpin Construction Company, when certain conditions have been satisfied.

"0.50 mile of grading, surfacing and oiling, and construction of a concrete bridge on the Biggs-Wasco Section of the Sherman Highway, in Sherman County. Leonard & Slate, Oregon Ltd., Portland, submitted the low bid for this work at $50,415. Snook Brothers, Corvallis, were the next low bidders at $53,723. There were eight higher bidders. The Commission has awarded the contract to the low bidder, Leonard & Slate, Oregon Ltd., at their bid price."

The Chief Counsel reported thatpursuant to instructions from the Commission on the previous day, he has conveyed to Erickson Brothers, St. Helens, the Commission's decision with respect to the settlement of right of way that the Commission recently condemned, and Erickson Brothers advised that they are willing to accept the $26,000 award as set by the jury in the case, on the condition that they are given three years time in which to cut-back their building so that it will not encroach upon the highway. If the Commission is willing to grant them that concession, he said, Erickson Bros. will not demand payment of the $26,000 until the work has been done. As to the rock wall, he said that the Ericksons will remove it within the 60 day time limit heretofore set by the Commission. The Commission deferred a decision in the matter pending additional investigation and report from the Engineer as to what is fair to the state and all concerned.

The Chief Counsel presented for the Commission's consideration, proposed agreement with the U. S. Indian Service, covering additional construction on the Sprague River Road, Klamath County. He called attention to the fact that the agreement has been approved and signed by the proper officials of the Indian Service. Following careful analysis of the provisions of the agreement, the Commission approved it subject to one change in the wording to make it definitely clear that the Commission is authorizing an expenditure of $150,000 in cooperation with a like expenditure of federal funds, to finance certain improvements now but is not obligating either the present Commission or any future State Highway Commission, or the State of Oregon, with respect to any additional expenditure for construction of this road. (The Chief Counsel made the change as requested and the Commission thereupon signed the agreement.)

The Commission discussed matters pertaining to the proposed State Highway Office Building, in Salem, and in connection therewith studied the plans and cost estimates submitted by the architects, Whitehouse, Church, Newberry, and Roehr, who have been retained to design the structure. The discussion principally concerned space for immediate use and future expansion. As a result of the discussion the Engineer was instructed to have the architects revise the plans to provide for space that is actually needed at this time, and a reasonable amount

of additional space for future expansion of activities. The plans are to be resubmitted to the Commission when the changes have been made.

The Engineer requested authority for the Right of Way Department to negotiate right of way for a proposed revision of the state highway along South Sixth Street, in Klamath Falls, particularly at a point where this Street crosses over the railroad yards of the Southern Pacific Company, and where a lumber mill is being razed. He explained that the proposed future improvement of this highway will require additional right of way, and in his estimation it would be advisable to obtain the right of way now across the mill company's property, while it is available and before it gets into other hands. The Commission unanimously approved the securing of options for the property.

The Commission discussed, approved and signed the following agreements, etcetera:

Agreement with City of Portland and Isaac Hasson, et ux, disposing of a grade change damage case affecting property on Front Street, Portland.

Agreement with Pendleton Lumber Company for construction and operation of a roadway across state park property in Blue Mountain Timber Reserve, near Meacham, in Umatilla County.

Cooperative agreement with Public Roads Administration covering production of crushed rock in stockpiles on the John Day Forest Highway project, in Grant County.

Agreement with Coos County covering disposition of a section of the Coos Bay-Roseburg Highway (old route) near Sandy Creek.

Agreement with Multnomah County and the Port of Portland with respect to vacation of a portion of Sun Dial Secondary Highway.

Agreement with Multnomah County providing for county maintenance of Sauvies Island Bridge after it is constructed by the State.

Agreement with the S. P. & S. Railway Company whereby the Company grants an easement to the State to construct Sauvies Island Bridge over railway company property, in Multnomah County.

Agreement with the California-Oregon Power Company providing for re-establishment of the company's pole line along The Dalles-California Highway north of Klamath Falls.

Agreement with the City of Tillamook and Tillamook County covering disposition of certain portions of the Tillamook-Pleasant Valley Section (old route) of the Oregon Coast Highway when the new highway has been constructed.

Agreement with the City of Tillamook providing for a one-way street plan for US101 traffic in Tillamook.

Agreement with Commonwealth, Inc. covering disposal of buildings in Sullivans Gulch, Portland.

Agreement with A. C. Baumback covering moving of buildings in Gold Beach.

Agreement with City of Medford covering installation and maintenance of traffic signals in Medford.

Agreement with Chetco Lumber Company covering construction and operation of a logging road across State Park property in Curry County.

Bargain and Sale Deed conveying to Medford Corp. property in the Northwest quarter (NW $\frac{1}{4}$) of the Northeast quarter (NE $\frac{1}{4}$) of Section 24, T 37 South, Range 2 W, W.M., Jackson County.

Agreement with Weyerhaeuser Timber Company extending term of lease covering stockpile site on the Greens Springs Hwy., in Jackson County...

Agreement with Klamath Indian Agency concerning the further improvement of the Sprague River Road, in Klamath County.

There being no further business to come before the Commission at this time the meeting adjourned at 3:00 p.m.

EXHIBIT "A"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That the Resolution Forms 1 and 2, adopted by the City of Nehalem in April of 1948 and approved by the Highway Commission on May 24, 1948, shall be cancelled in accordance with the request of the City of Nehalem on file in the records of the State Highway Department; and Resolution Forms 1, 2 and 3, adopted by the City of Nehalem on December 7, 1948, be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission on the 24th day of January, 1949.

EXHIBIT "D"

Minutes of January 24 and 25, 1949

ORDER REDUCING MAXIMUM LOAD LIMITS

ON CERTAIN STATE HIGHWAYS

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

Halsey-Sweet Home Secondary Highway No. 212
Kings Valley Secondary Highway No. 191
Monmouth Secondary Highway No. 194
Eddyville-Blodgett Secondary Highway No. 180
Alsea Highway No. 27
McKenzie Highway No. 15
Alsea-Deadwood Secondary Highway No. 201
Territorial Secondary Highway No. 200
Richardson-Eugene Secondary Highway No. 220
Albany-Lyons Secondary Highway No. 211
Mehama-Mill City Secondary Highway No. 213
North Santiam Secondary Highway No. 162
Little Nestucca Secondary Highway No. 130
Salem-Dayton Secondary Highway No. 150
McKenzie Highway No. 15
Dallas-Coast Secondary Highway No. 192
Springfield-Creswell Secondary Highway No. 222
Bellevue-Hopewell Secondary Highway No. 153
Nehalem Secondary Highway No. 102
Yamhill-Newberg Secondary Highway No. 151
Farmington Secondary Highway No. 142
Scholls Secondary Highway No. 143
Wilson River Highway No. 37
Cascade Secondary Highway No. 160
Eagle Creek-Sandy Secondary Highway No. 172
Woodburn-Estacada Secondary Highway No. 161

AND WHEREAS, the above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways during the present period of freezing and thawing, and in order to protect said highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced during such period;

(Cont.)

JAN 21 1949

EXHIBIT "D" (Cont.)

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon said roads during said period shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said roads were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways that the maximum total weight of load and vehicle which shall be permitted upon said roads during the said period commencing on the dates hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to-wit:

Halsey-Sweet Home Secondary Highway No. 212, from Halsey to Sweet Home, in Lane County; effective date - December 31, 1948

Kings Valley Secondary Highway No. 191, from Dallas to junction with Corvallis-Newport Highway at Wren, in Polk and Benton Counties; effective date - December 31, 1948

Monmouth Secondary Highway No. 194, from junction with Kings Valley Secondary Highway to Monmouth, in Polk County; effective date - December 31, 1948

Eddyville-Blodgett Secondary Highway No. 180, from Nashville to Blodgett, in Benton and Lincoln Counties; effective date - December 31, 1948

Alsea Highway No. 27, from Hatchery Creek (M.P. 12.0) to junction with Corvallis-Newport Highway at Philomath, in Benton and Lincoln Counties; effective date - December 31, 1948

McKenzie Highway No. 15, from Nimrod (M.P. 33.5) to Belknap Junction (M.P. 55.0), in Lane County; effective date - December 31, 1948

(Cont.)

EXHIBIT "D" (Cont.)

Alsea-Deadwood Secondary Highway No. 201, from Cougar Creek (M.P. 10.5) to junction with Siuslaw Highway, in Lane County; effective date - January 1, 1949

Territorial Secondary Highway No. 200, from Crow (M.P. 24.34) to Lane-Douglas County Line (M.P. 42.50), in Lane County; effective date - January 5, 1949

Richardson-Eugene Secondary Highway No. 220, from Richardson (M.P. 11.94) to Elmira (M.P. 36.57), in Lane County; effective date - January 5, 1949

Albany-Lyons Secondary Highway No. 211, from Scio to Lyons, in Linn County; effective date - January 10, 1949

Mehama-Mill City Secondary Highway No. 213, from Mehama to Mill City, in Linn County; effective date - January 10, 1949

North Santiam Secondary Highway No. 162, from Mill City to Gates, in Marion County; effective date - January 10, 1949

Little Nestucca Secondary Highway No. 130, from junction with Oregon Coast Highway to a point 3.8 miles easterly thereof, in Tillamook County; effective date - January 12, 1949

Salem-Dayton Secondary Highway No. 150, from Dayton (M.P. 0.0) to junction with Glen Creek Road near north city limits of West Salem (M.P. 19.67), in Yamhill and Polk Counties; effective date - January 17, 1949

McKenzie Highway No. 15, from Cogswell Hill (M.P. 9.0) to Nimrod Junction (M.P. 33.5), in Lane County; effective date - January 17, 1949

Dallas-Coast Secondary Highway No. 192, from junction with county road one-quarter mile east of Salmon River Highway Junction (M.P. 0.22) to junction with Salem-Dallas Secondary Highway (M.P. 14.83), in Polk County; effective date - January 17, 1949

(Cont.)

JAN 24 1949

EXHIBIT "D" (Cont.)

Springfield-Creswell Secondary Highway No. 222 from junction with McKenzie Highway (M.P. 0.0) to junction with Willamette Highway (M.P. 8.30), in Lane County; effective date - January 19, 1949

Bellevue-Hopewell Secondary Highway No. 153, from junction with Salmon River Highway (M.P. 0.0) to junction with Salem-Dayton Secondary Highway (M.P. 14.95), in Yamhill County; effective date - January 19, 1949

Nehalem Secondary Highway No. 102, from M.P. 15.24 to junction with Sunset Highway (M.P. 75.91), in Clatsop, Columbia, and Washington Counties; effective date - January 27, 1949

Yamhill-Newberg Secondary Highway No. 151, from Yamhill to Newberg, in Yamhill County; effective date - January 27, 1949

Farmington Secondary Highway No. 142, entire length, in Washington County; effective date - January 27, 1949

Scholls Secondary Highway No. 143, entire length, in Washington County; effective date - January 27, 1949

Wilson River Highway No. 37, from Baum Grove (M.P. 41.5) to Forest Grove (M.P. 51.18), in Washington County; effective date - January 27, 1949

Cascade Secondary Highway No. 160, from south city limits of Oregon City (M.P. 17.19) to Silverton (M.P. 44.0), in Clackamas and Marion Counties; effective date - January 27, 1949

Eagle Creek-Sandy Secondary Highway No. 172, entire length, in Clackamas County; effective date - January 27, 1949

Woodburn-Estacada Secondary Highway No. 161, from Molalla (M.P. 14.30) to Estacada (M.P. 34.19), in Clackamas County; effective date - January 27, 1949

shall be as follows: The maximum combined weight bearing on the surface of the highway at contact with the tread on all of the wheels of a vehicle or combination of vehicles shall not exceed thirty-six thousand (36,000) pounds; and, the maximum combined weight bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed eight thousand (8,000) pounds.

EXHIBIT "E"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, by the enactment of Chapter 425, Oregon Laws 1947, the Legislature in section 2 of said act provided as follows:

"Section 2. Beginning with the year 1947 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 10 per cent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O.C.L.A.; section 15, chapter 413, Oregon Laws 1945; section 115-528, O.C.L.A., in the event it becomes law; section 29 of house bill No. 175 of the forty-fourth legislative assembly, and from fines and penalties collected for violations of the motor vehicle and transportation laws. Such appropriation shall be distributed among the several cities as provided in this act; but in no event shall payment under this act be made to cities for any year unless more than $11,000,000 is credited to such fund, and allocations hereunder shall be made to cities only from any excess over $11,000,000 credited to such fund in any year.";

AND, WHEREAS, the legislature by section 3 of the said act provided as follows:

"Section 3. Such appropriation shall be allocated to the cities as follows: The sum of $250,000 shall be withdrawn from such appropriation and set up in a separate account to be administered by the state highway commission. Such account shall be spent each year by such commission upon streets not a part of the state highway system within cities which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. Such commission shall determine the distribution of such expenditures after considering applications made to it therefor from the cities. The balance remaining in such appropriation after the withdrawal of said $250,000 shall be distributed to all of the cities. Each city shall receive such share of the balance as its population bears to the total population of the cities.";

AND WHEREAS, the moneys which have been credited to the state highway fund by the State Treasurer covering the period of January first to December thirty-first, inclusive, of the year 1948, which funds have accrued from sources designated in said legislative act, amount to $27,780,901.17 and are derived from funds accruing from the following sources:

(Cont.)

JAN 24 1949

EXHIBIT "E" (Cont.)

Section 115-135, O. C. L. A. (motor vehicle license fees)	$ 2,871,162.66
Section 15, Chapter 413, Oregon Laws 1945 (gasoline tax)	20,184,096.96
Section 115-528, O. C. L. A., and Section 29 Chapter 467, Oregon Laws 1947 (motor carrier fees)	4,472,067.28
From fines and penalties collected for violations of the motor vehicle and transportation laws	253,574.27
	$27,780,901.17

AND, WHEREAS, the ten per cent of the $27,780,901.17, which is available for appropriation to the cities and towns amounts to $2,778,090.12; and

WHEREAS, after withdrawing the sum of $250,000 as provided in said act, which sum is to be administered by the State Highway Commission within the meaning of Section 3 of said Chapter 425, Oregon Laws 1947, there remains a balance of $2,528,090.12, which balance is, in response to the command of said statute, to be distributed among the cities of the State; each city being entitled to receive such share of said balance as its population bears to the total population of the cities; and

WHEREAS, by applying the factors of allocation or distribution provided for in said Chapter 425, Oregon Laws 1947, the State Highway Commission has determined upon an apportionment of said funds among the several cities and towns of the State as shown in the tabulation given below:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the funds made available for distribution among the cities of the State pursuant to said law should be and are allocated and apportioned to the cities named below in the amounts set opposite the names of the respective cities:

2. That a certified copy of this resolution be delivered to the Secretary of State for his use and guidance in the administration of said law with respect to the distribution of said funds.

3. That this resolution be entered in the minutes and records of the Commission as of January 24, 1949.

EXHIBIT "F"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2738, with Warren Northwest, Inc., for grading and paving on the South Unit, Steiwer Hill-Albany Section of the Pacific Highway, in Linn County; completed August 19, 1948.

Contract No. 2933, with McNutt Bros., for surfacing and rock production on the Globe-Elmira Section of the Richardson-Eugene Secondary Highway, in Lane County; completed July 9, 1948.

Contract No. 2978, with E. C. Hall Co., for grading and oil mat surfacing on the Elgin-Boswell Ranch Section of the Wallowa Lake Highway, in Union County; completed October 5, 1948.

Contract No. 2994, with A. H. Sarton & Sons, for grading and oil mat surfacing on the Monument-Hamilton Section of the Kimberly-Long Creek Highway, in Grant County; completed October 25, 1948.

Contract No. 3026, with Baker & Wilson, for oiling on the Powers (Poplar St. & Fourth Ave.) Section, City Streets; completed September 9, 1948.

Contract No. 3068, with Warren Northwest, Inc., for asphaltic concrete resurfacing on the Halsey-Sweet Home Section of the Halsey-Sweet Home Highway, in Linn County; completed October 22, 1948.

Contract No. 3076, with Rogers Construction Co., for furnishing crushed rock in stockpiles on the Arlington Section of the Columbia River and John Day Highways, in Gilliam and Morrow Counties; completed January 6, 1949.

Contract No. 3067, with R. H. Jones, for construction of a maintenance building at Silver Lake, in Lake County; completed January 12, 1949.

(Cont.)

EXHIBIT "F" (Cont.)

Contract No. 2981, with Antonsen Painting Company, for painting bridges over Floras Creek, Sixes River, Chetco River, and Winchuck River on the Oregon Coast Highway, in Curry County; completed November 20, 1948.

Contract No. 3023, with General Construction Company, for construction of a trestle on Union and Denver Avenues, in Portland, Multnomah County; completed October 20, 1948.

Contract No. 3013, with Snook Brothers, for widening the Tolo Overcrossing on the Pacific Highway, in Jackson County; completed December 17, 1948.

Contract No. 2914, with L. R. Kauffman, for furnishing crushed rock in stockpiles on the Alsea Section of the Alsea and Alsea-Deadwood Highways, in Benton and Lincoln Counties; completed June 3, 1948.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

EXHIBIT "G"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, the highway known and designated as The Dalles-California Highway is a state highway and as such is under the control and jurisdiction of the State Highway Commission, a portion or section of which said highway is located within the City of Klamath Falls; and

WHEREAS, the highway known and designated as the Klamath Falls-Malin Highway is a state highway and as such is under the jurisdiction of the State Highway Commission, a portion of which is within the corporate limits of the City of Klamath Falls; and

WHEREAS, said highways are connected by city streets, known and designated as portions of Main Street and Esplanade Street, which streets are under the jurisdiction and control of the municipal authorities of said city; and

WHEREAS, in the opinion of the Commission, the capacity of said two highways will be materially increased and the convenience of traffic having occasion to use said highways will be enhanced, and the safety of the public promoted, if said streets are selected by the Highway Commission and designated as connecting links between said two highways, thereby making possible the interchange of traffic between said two highway arteries; and

WHEREAS, it is the opinion of the Commission that a portion of Main Street and a portion of Esplanade Street in the City of Klamath Falls should be selected by the Commission as the streets or sections thereof over which to route traffic having need to pass from one of said highways to the other; and

WHEREAS, under the authority of Section 100-122, O. C. L. A., the Commission is authorized and directed whenever the route of any state highway passes through the corporate limits of any incorporated city or town to select and designate the street or streets of such city over which it shall be routed, and the Commission is further authorized by said law to erect and maintain suitable road signs on and along said street at such places and of such material and design as the Commission may select;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, all members being present and voting affirmatively as follows:

1. That Main Street in the City of Klamath Falls, from 9th Street northeasterly to the intersection of Esplanade Street at a point where Main Street turns due east, and Esplanade Street, from its junction with Main Street northeasterly to its intersection with the Klamath Falls-Malin Highway, are hereby selected and designated by the Highway Commission as streets or

(Cont.)

JAN 24 1949

15597

EXHIBIT "G" (Cont.)

sections thereof over which state highway traffic having occasion to pass from The Dalles-California Highway to the Klamath Falls-Malin Highway, or vice versa, shall be routed.

2. That the Commission does hereby order and direct the Engineer to prepare the necessary plans for the improvement of said streets or sections thereof so as to put the same in proper condition to carry the highway traffic which will be imposed thereon by reason of the selection and designation of said streets or sections thereof as connecting links between said two highways.

3. That said streets or sections thereof shall be and remain connecting links between said two highways and shall be kept open and available for state highway traffic until the Commission within the meaning and authority of Section 100-122, O.C.L.A., may elect to alter or change such highway routing, which change may be made as provided in said law whenever, in the opinion of the Commission, the interests of the public may be better served.

4. That so long as said streets or sections thereof continue under the order of this resolution to be streets or sections over which to route state highway traffic, the maintenance of said streets or sections thereof for said traffic shall be an obligation of the State of Oregon, and such maintenance shall be carried on in the same manner that other streets are maintained by the Highway Commission.

5. That the State Highway Engineer hereby is directed to erect and thereafter maintain on and along said streets road signs suitable and adequate to provide for the motoring public reasonable information and directions.

6. That the Secretary hereby is directed to deliver to William H. Lynch, Division Engineer for the Public Roads Administration, and to the Mayor of the City of Klamath Falls, certified copies of this resolution.

7. That this resolution shall be entered in the minutes and records of the Commission as of the 24th day of January, 1949, and shall remain in full force and effect until altered by order of the Commission.

JAN 24 1949

15598

EXHIBIT "H"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Eagle Creek-Sandy Secondary Highway No. 172 known as the Eagle Creek-Sandy Section in Clackamas County, being formerly a part or section of the Woodburn-Sandy Secondary Highway No. 161, the northerly terminus of which is at highway engineer's station 3+65.2 of the reconstructed line and the southerly terminus of which is at highway engineer's station 253+10 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Clackamas County and the Highway Commission have entered into an agreement under date of November 26th, 1946, relating to and providing for the use, maintenance and jurisdiction over the abandoned sections; and

WHEREAS, the contract for the construction of said relocated section of the Eagle Creek-Sandy Secondary Highway No. 172 was completed on Decmeber 8th, 1948, and highway traffic is now routedover said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way, which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "A", "C" and "E" and are shown colored in red on map attached hereto and marked "Exhibit A", and are more particularly described as follows: (*)

Unit "A"

Beginning at State Highway Engineer's Station 4+50 of the relocated Eagle Creek-Sandy Secondary Highway in the Northwest quarter of the Southeast quarter of Section 13, Township 2 South, Range 4 East, W.M.; thence Southwesterly via the former route of the Eagle Creek Sandy Secondary Highway to State Highway Engineer's Station 40+00 of the relocated Eagle Creek-Sandy Secondary Highway in the

(Cont.)

JAN 24 1949

EXHIBIT "E" (Cont.)

Northeast quarter of the Northwest quarter of Section 24, Township 2 South, Range 4 East, W.M.

Unit "C"

Beginning at State Highway Engineer's Station 196+50 of the relocated Eagle Creek-Sandy Secondary Highway in the Southwest quarter of the Southeast quarter of Section 21, Township 2 South, Range 4 East, W. M.; thence Westerly and Southerly via the former route of the Eagle Creek-Sandy Secondary Highway to State Highway Engineer's Station 207+00 of the relocated Eagle Creek-Sandy Secondary Highway in the Northeast quarter of the Northwest quarter of Section 28, Township 2 South, Range 4 East, W.M.

Unit "E"

Beginning at State Highway Engineer's Station 234+50 of the relocated Eagle Creek-Sandy Secondary Highway in the Northwest quarter of the Southwest quarter of Section 28, Township 2 South, Range 4 East, W.M.; thence Southerly and Westerly via the former route of the Eagle Creek-Sandy Secondary Highway to State Highway Engineer's Station 252+78.2 of the relocated Eagle Creek-Sandy Secondary Highway in the Southeast quarter of the Southeast quarter of Section 29, Township 2 South, Range 4 East, W.M.

shall hereafter pursuant to said State-County agreement be maintained by the County as a county road or as county roads for the benefit and service of persons living thereon and communities served thereby. The Commission hereby surrenders all jurisdiction over said sections, and hereby consents that jurisdiction over said roads may be assumed and exercised by the County Court of Clackamas County, and said roads shall thereafter be maintained by the County for public use.

2. The sections of the old route of the Eagle Creek-Sandy Secondary Highway which, for the purpose of this agreement, are identified as Units "B" and "D", shown colored in brown on map attached hereto and marked "Exhibit A" and are more particularly described as follows: (*)

Unit "B"

Beginning at State Highway Engineer's Station 131+00 of the relocated Eagle Creek-Sandy Secondary Highway in the Northeast quarter of the Southeast quarter of Section 22, Township 2 South, Range 4 East, W.M.; thence Southwesterly via the former route of the Eagle Creek-Sandy Secondary Highway to State Highway Engineer's Station 136+40 of the relocated Eagle Creek-Sandy Secondary Highway in the Southwest quarter of the Southeast quarter of Section 22, Township 2 South, Range 4 East, W.M.

(Cont.)

R

EXHIBIT "H" (Cont.)

Unit "D"

Beginning at State Highway Engineer's Station 209+20 of the relocated Eagle Creek-Sandy Secondary Highway in the Northeast quarter of the Northwest quarter of Section 28, Township 2 South, Range 4 East, W.M.; thence Southwesterly via the former route of the Eagle Creek-Sandy Secondary Highway to State Highway Engineer's Station 232+30 of the relocated Eagle Creek-Sandy Secondary Highway in the Southwest quarter of the Northwest quarter of Section 28, Township 2 South, Range 4 East, W.M.

shall be abandoned as parts of said highway, and hereafter shall be under the jurisdiction and control of the County and may be vacated or kept by the County for such public use as the County may determine.

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby delcare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Clackamas County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections or the said old right of way shown colored in red and brown on the map attached hereto and marked "Exhibit A". (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 150, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

15601

EXHIBIT "I"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Ochoco Highway No. 41 known as the Prineville-Marks Creek Section in Crook County, the westerly terminus of which is at Highway Engineer's Station 0+19 of the reconstructed line and the easterly terminus of which is at Highway Engineer's Station 580+00 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Crook County and the Highway Commission have entered into an agreement under date of November 4, 1948, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way, which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "I", "N" and "O" and are shown colored in red on map attached hereto and marked "Exhibit A," and are more particularly described as follows: (*)

Unit "I"

Beginning at State Highway Engineer's Station 216+30 of the relocated Ochoco Highway in the Southwest quarter (SW¼) of the Northeast quarter (NE¼) of Section 34, Township 14 South, Range 17 East, W.M.; thence easterly via the former route of the Ochoco Highway to State Highway Engineer's Station 254+30 of the relocated Ochoco Highway in the Northeast quarter (NE¼) of the Northwest quarter (NW¼) of Section 35, Township 14 South, Range 17 East, W. M.

(Cont.)

JAN 24 1949

EXHIBIT "I" (Cont.)

Unit "N"

Beginning 742.9 feet east of the west line of the Northeast quarter (NE¼) of Section 1, Township 15 South, Range 17 East, W. M., in the Northwest quarter (NW¼) of the Northeast quarter (NE¼) of Section 1, Township 15 South, Range 17 East, W. M.; thence easterly via the former route of the Ochoco Highway to a point opposite State Highway Engineer's Station 455+60 of the relocated Ochoco Highway in the Southwest quarter (SW¼) of the Southwest quarter (SW¼) of Section 29, Township 14 South, Range 18 East, W. M.

Unit "O"

Beginning opposite State Highway Engineer's Station 461+00 of the relocated Ochoco Highway in the Southeast quarter (SE¼) of the Southwest quarter (SW¼) of Section 29, Township 14 South, Range 18 East, W. M.; thence easterly via the former route of the Ochoco Highway to State Highway Engineer's Station 571+00 of the relocated Ochoco Highway in the Northeast quarter (NE¼) of the Southeast quarter (SE¼) of Section 21, Township 14 South, Range 18 East, W. M.

shall hereafter, pursuant to said State-County agreement, be maintained by the County as county roads for the benefit and service of persons living thereon and communities served thereby and for stock driveways. The Commission hereby surrenders all jurisdiction over said road, and hereby consents that such jurisdiction may be assumed and exercised by the County Court of Crook County, and said roads shall thereafter be maintained by the County for public use.

2. The sections of the old route of the Ochoco Highway which, for the purpose of this agreement, are identified as Units "A," "B," "C," "D," "E," "F," "G," "H," "J," "K," "L," and "M," shown colored in brown on map attached hereto and marked "Exhibit A" and are more particularly described as follows: (*)

Unit "A"

Beginning at State Highway Engineer's Station 255+80 of the relocated Ochoco Highway in the Southeast quarter (SE¼) of the Southeast quarter (SE¼) of Section 36, Township 14 South, Range 16 East, W. M.; thence easterly via the former route of the Ochoco Highway to the west line of a 30-foot roadway in the Southeast quarter (SE¼) of the Southeast quarter (SE¼) of Section 36, Township 14 South, Range 16 East, W. M.

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 197, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

15607

EXHIBIT "J-1"

Minutes of January 24 and 25, 1949

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Code and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Sunset Highway is a highway under the jurisdiction and control of the State and is, in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing highways with better alignments and which will more adequately serve the traveling public, the Highway Commission relocated the section of the said highway as hereinafter set forth, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take all rights of access from property abutting a highway; and

WHEREAS, Sunset Highway is a major highway of the State, and as such carries large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the property described on the attached sheet is needed and required for use in connection with the construction and maintenance of the section of highway set forth on said sheet; that the specific use for which each particular parcel of real property is needed and required is as expressly stated thereon; that the name of the record owner, or reputed owner thereof, is likewise set forth, together with the Commission's record file number of each parcel. (*)

2. That the highway facility for which each of said parcels of property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to the acquisition of the respective parcels, it is necessary that there be acquired all rights of access from abutting properties

(Cont.)

JAN 24 1949

EXHIBIT "J-1" (Cont.)

to the highways to be constructed in part upon the parcel described upon the attached sheet, except such access reservations as are noted as to each parcel. In this connection, a private access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet; said access to be for ordinary travel only, and shall not be used in connection with any commercial institution or activity which in any manner caters to, invites, solicits from, or is dependent upon the users of said highway. A farm crossing is defined as a right to establish, maintain, and use a crossing of the highway for farm purposes only having a width of not to exceed twenty-five feet; provided, however, that upon the alienation of either of the portions of the property severed by the highway, such right of crossing shall cease. A commercial access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet, said access to be for all lawful purposes. (*)

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcel of land as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said parcel.

5. That upon the trial of any suit or action instituted to acquire either of said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That the real property sought to be acquired is described on the attached sheet, consisting of one page, on which sheet is set forth the right of way file number assigned by the Commission, the respective record or reputed owners, the section of highway for which the property is necessary, and the use and purpose for which the property is sought, together with such access reservations as apply to the particular property. (*)

7. That this resolution be entered in full in the minutes and records of the Commission as of the 24th day of January, 1949.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 124, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

JAN 24 1949

EXHIBIT "J-2"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Code and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Gillihan Road No. 1159 is a county road which has been designated and classified as a federal aid secondary highway, and as such is qualified for improvement with state, federal, and county funds; and

WHEREAS, for the purpose of providing highways with better alignments and which will more adequately serve the traveling public, the Highway Commission, in cooperation with Multnomah County and the United States, relocated the section of the said highway as hereinafter set forth, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the property described on the attached sheet is needed and required for use in connection with the construction and maintenance of the section of county road and federal aid secondary highway set forth on said sheet; that the specific use for which each particular parcel of real property is needed and required is as expressly state thereon; that the name of the record owner, or reputed owner thereof, is likewise set forth, together with the Commission's record file number of each parcel. (*)

2. That the highway facility for which each of said parcels of property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcel of land as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said parcel.

JAN 24 1949

EXHIBIT "J-2" (Cont.)

4. That upon the trial of any suit or action instituted to acquire either of said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That the real property sought to be acquired is described on the attached sheet, consisting of one page, on which sheet is set forth the right of way file number assigned by the Commission, the respective record or reputed owners, the section of highway for which the property is necessary, and the use and purpose for which the property is sought. (*)

6. That this resolution be entered in full in the minutes and records of the Commission as of the 24th day of January, 1949.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 125, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "J-3"

Minutes of January 24 and 25, 1949

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Code and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Powell Butte Secondary highway is a highway under the jurisdiction and control of the State.

WHEREAS, for the purpose of providing highways with better alignments and which will more adequately serve the traveling public, the Highway Commission relocated the section of the said highway as hereinafter set forth, and for such purpose and in connection therewith the real property hereinafter described is necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the property described on the attached sheet is needed and required for use in connection with the construction and maintenance of the section of highway set forth on said sheet; that the specific use for which each particular parcel of real property is needed and required is as expressly stated thereon; that the name of the record owners, or reputed owners thereof, is likewise set forth, together with the Commission's record file number of each parcel. (*)

2. That the highway facility for which each of said parcels of property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcel of land as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said parcel.

4. That upon the trial of any suit or action instituted to acquire either of said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That the real property sought to be acquired is described on the attached sheet, consisting of one page, on which sheet is set forth the right of way file number assigned by the Commission, the respective record or reputed owners, the section of highway for which the property is necessary, and the use and purpose for which the property is sought. (*)

6. That this resolution be entered in full in the minutes and records of the Commission as of the 24th day of January, 1949.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 124, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

JAN 24 1949

15813

Portland, Oregon
February 28, 1949

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st. Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room:

UPPER NEHALEM COUNTY ROAD IN COLUMBIA AND WASHINGTON COUNTIES

SHEELEY BRIDGE-SUNSET CAMP SECTION

	Using Asphalt	Using Tar
Homer G. Johnson, Portland	$ 138,888.50	$ -----
Grimstad & Vanderveldt, Astoria	139,444.25	139,424.85
E. C. Hall Co., Portland	151,810.00	152,142.00
A. H. Saxton & Sons, Corvallis	159,816.25	-----
J. N. & M. J. Conley, Portland	162,381.50	-----

THREE BRIDGES IN DOUGLAS COUNTY

SHIELDS CREEK AND LOOKINGGLASS CREEK BRIDGE SECTION

	Using Asphalt	Using Tar
Lindstrom Bros. Inc., Portland	180,022.00	-----

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY

TROUTDALE SECTION

	Using Asphalt	Using Tar
C. T. Malcom & Co., Portland	$ 134,280.90	$ ------
Parker Schram Co., Portland	142,000.00	141,940.00
J. N. & M. J. Conley, Portland	154,752.00	------

The State Parks Superintendant, Mr. S. H. Boardman, was present and reported on the following State Park matters:

(1) Acquisition of Curry County Ocean Waysides between Mack's Arch and Whale Cove: The Commission's Chief Counsel, J. M. Devers, reported on this matter in behalf of the Park Superintendant. He advised that pursuant to previous instructions from the Commission, negotiations had been carried on with the owners of considerable of the property in the area, and in some cases options secured, but in others it appeared necessary to acquire the property by condemnation. He presented for the Commission's consideration a list of the options so far obtained, as follows, and pointed out that the average price for land only is $70 per acre, and $87 per acre for land and the improvements standing thereon, such as houses, etc.:

Owner & File Number	Acres	Price Per Ac.	Amount (for Land)	Amount for land, house and other improvements.	
D. O. Scott #14751	$ 25.00	$ 100.00	$ 2500.00	$ 12,500.00	(Inc. house at 10,000.)
Geneva Nicholas #14753	148.22	100.00	14822.00	14,822.00	
U. S. Government #14755	113.19	5.00	566.00	566.00	
B. A. Martin #14757	95.51	100.00	9551.00	9,551.00	
Baumgartner #14759	80.00	50.00	4000.00	4,000.00	
Waterfield #14761	23.10	50.00	1155.00	1,155.00	
	$485.02		$32,594.00 (Av. $70 per Ac.)	$42,594.00	(Av. $87 per Ac.)

The Chief Counsel gave as his opinion that the amounts disclosed by the options, are reasonable and he recommended acquisition of the areas represented by the options on the basis of such amounts. As a result of discussion, the Commission unanimously approved the recommendation and authorized the Chief Counsel to proceed with the closing of the options. The Chief Counsel was also instructed to continue the negotiations for additional options and to condemn the property of those owners with whom he is unable to reach satisfactory settlements.

(2) The matter of transferring to the State Game Commission the rights acquired by the State Highway Commission under a recreational filing on Federal Lands situate along Rogue River within the boundaries of Camp White, Jackson County: The Park Superintendant presented a letter from C. A. Lockwood, State Game Supervisor, in which Mr. Lockwood states, if the State Highway Commission will transfer its rights to the State Game Commission, the Game Commission in turn will permit public use of the property at all times during Recreational and Angling seasons, but is not in position to construct and maintain picnic and other recreational facilities for the public, although it will permit such facilities to be provided by the State Highway Commission, if the proper Federal Authorities approve. The Park Superintendant stated that he prefers not to give up the Park. The Commission voted unanimously to retain its rights in the property, and instructed the Park Superintendant to complete the recreational filing in the name of the State Highway Commission.

(3) Proposed Dam in Deschutes River, near the Cove State Park, Jefferson County: The Park Superintendant exhibited a map showing the location of the proposed dam, and back water level, and pointed out its relationship to the Cove State Park, which will be partially inundated by the back water. The Commission took no action on the matter.

(4) Status report on plans for Museum in Champoeg State Park: The Engineer reported on this matter, advising that plans for the structure had been submitted by the Portland Chapter of the National Architects Association, and that these have been turned over to the Highway Department's architect to check and to make certain changes which he considers proper. The plans will then be referred to the Oregon Historical Society, and if the changes are approved the project will be ready to advertise for bids. He said he expects to make a final report to the Commission at its next meeting, so the Commission can then authorize taking bids for construction, if it so desires. The Commission approved the report and the proposed procedure as outlined.

(5) Proposed improvements to Vista House, Crown Point: The Engineer also reported on this subject. He advised that a thorough inspection has been made of this building from the standpoint of stopping the leaks in the dome, and it appears that the only solution for the problem is to cover the dome with copper sheeting. He estimated the cost of the repairs, including some other work that is required to put the building in first-class condition, at about $5000. He advised that during the last two years, the State Highway Department has received $14,200.00 revenue from the party that operates the concession in this place, and suggested, in view thereof, that the Commission is justified in going to the expense of the repairs. Chairman Banfield expressed a desire to personally inspect the building before passing on the matter, in view of which the Commission deferred its decision. The Engineer was instructed to render a detailed written report on existing conditions and what will be necessary to put the building in first-class shape.

(6) Question of granting concession privileges at the East end of the Sandy River Bridge during the progress of the smelt run in the Sandy River: The Park Superintendent reported receipt of an application from a Mr. A. S. Rice, Portland, for permission to maintain a stand on State Highway property at this location, for the rental of nets and sale of fish during the smelt run period. In the discussion of the matter, it was recalled that a year ago when the Commission considered a similar request, its decision was to the effect that in the future no permits or concession privileges would be granted to anyone. The Commission decided unanimously to adhere to that decision, and accordingly denied the request of Mr. Rice.

(7) Question of permitting the State Game Commission to use the parking area at the East end of Sandy River Bridge in connection with sale of fishing licenses during the smelt run in the Sandy River: The Commission considered it proper to grant the Game Commission this privilege because it is another State Agency, and because, in its opinion

the State's best interest would be served thereby, on the condition, however, that the trailer is so located that no hazard will be created, and highway traffic will not be interferred with.

(8) Request for authority to construct a roadway into Painted Hills State Park, Wheeler County: The Engineer reported on this matter in behalf of the Park Superintendent. He advised that when the Highway Commission acquired this park from the former owners, one of the conditions of the transaction was that the State Highway Department would develop the area. This transaction, he said, was consummated in June, 1947, and it was anticipated that development work would be accomplished during 1948, and a certain sum of money was budgeted for a roadway, however the road was not built. He estimated the cost to construct the roadway now, including a bridge over Bridge Creek, at $12,000, and recommended approval of the expenditure which he said would be charged to the park fund. The Commission approved the recommendation and ordered that the work be done by contract.

The Assistant Counsel, Mr. J. W. DeSouza, presented for the Commission's consideration a list of options that have been secured to purchase properties that are needed in connection with State Highway improvements throughout the state. After careful consideration of each item in the list, the Commission authorized the closing of the options at the prices mentioned therein. The attached resolution in regard thereto, marked "Exhibit A", which resolution by this reference is made a part hereof, with like effect as though copied in full herein, was thereupon adopted by the Commission by unanimous vote. (*)

*In discussing the acquisition of the right of way for the Vista Avenue-Multnomah County line Section of the Sunset Highway (Items No. 14999 and No. 15200) in the above referred to and attached resolution marked "Exhibit A", the Commission also considered the acquisition of right of way from the City of Portland and from Multnomah County. The Chief Counsel was instructed to negotiate with the City and County officials with respect to the acquisition of such properties on the basis that the State will pay for the properties the actual amounts that the City and County spent for them.

The Assistant Counsel also presented for the Commission's consideration, a list of properties, as follows, concerning which he has been unable to reach agreements with the owners, and which will have to be acquired by condemnation, together with the offer that he recommended in condemnation for each tract:

Bridge-Remote Section of the Coos Bay-Roseburg Highway:

15142	L. R. Houghtaling, et al.	$ 2,000.00

Camas Valley Section of Coos Bay-Roseburg Highway:

14973	Ada Nichols Estate	1,250.00

Ramsey Canyon-Crater Lake Section of Sams Valley Secondary Highway:

15260 Walter H. Leverette	$ 5,000.00
15261 Samuel C. Collins Estate	400.00

Cottage Grove Section of Pacific Highway:

5680 Palmer and Floy I. Johnson	600.00
5680A Arthur W. Mooney and wife	500.00

Scott Creek Section of Alsea Highway:

15285 Vern Goodman	2,500.00

After careful consideration, the Commission authorized condemnation of each tract at the amounts of the recommended offers. The attached resolutions with regard thereto, marked Exhibits "B-1" and "B-2", which resolutions by this reference are made a part hereof with like effect as though copied in full herein, were thereupon adopted by the Commission by unanimous vote.

The Assistant Counsel brought up for discussion the matter of allowing Mr. A. C. Baumback, a house moving contractor, extra payment for the moving of houses for the State at Lebanon. It appears that Mr. Baumback was engaged to move certain buildings in Lebanon, but before the work was completed, he was ordered to go to Pendleton and re-establish the Union Oil Company substation in connection with highway improvement at that place, such work being considered more important than the work that he was engaged upon at Lebanon. As a result of this order, Mr. Baumback was unable to complete the moving operations in Lebanon before bad weather set in, and was put to considerable extra expense, for which he is now requesting reimbursement in the amount of $775. The Assistant Counsel recommended payment of such sum, because the extra expense was caused through no fault of Mr. Baumback. The Chief Counsel concurred. The Commission approved the recommendation unanimously.

The Engineer reported the necessity to acquire a short section of right of way for a proposed revision of the Siuslaw Highway, where it crosses the North Fork of the Siuslaw River in Lane County. He advised that the plans for the highway improvement include construction of a new bridge across this river, and that the bridge will have to be built within the next few years, because the existing one is an old county structure, unsuitable for a highway of this class. He further stated that there has been brought to his attention a plan to construct some buildings on the property, so in his estimation the right of way should be acquired now when it can be purchased at minimum expense. He recommended, in view of the circumstances, that the Right of Way Department be authorized to negotiate acquisition of the right of way, which he estimated would cost about $500. The Commission approved the recommendation and so ordered.

The Engineer also brought up for discussion the matter of purchasing a small house and garage belonging to Mr. Al R. Dade, Section Foreman at Goldson,

who is retiring from State service on July 1, 1949, because of the age requirement. He advised that the house is located on State property and that Mr. Dade has stated a willingness to sell it to the State for the sum of $1000. An inspection of the building, he said, reveals that it is well worth the price that Mr. Dade is asking for it, and he recommended purchase of the building at the price fixed by Mr. Dade, because it can be used to good advantage in connection with maintenance operations. The Commission approved the the recommendation unanimously.

The Commission discussed a proposed agreement with the Southern Pacific Company, being an easement agreement for slopes on two parcels of the Company's property along the Pacific Highway East, between Oregon City and New Era. The Engineer advised that these easements are required in connection with the improvement of the highway between these points, and that the Railroad Company has agreed to grant the easements without charge, moreover, the State was given permission to proceed with the construction of the slopes before consummation of the final agreement. He recommended approval of the agreement as prepared. The Commission approved the recommendation. (The agreement was signed by the Commission on the following day.)

The Commission discussed the matter of deeding to the City of Klamath Falls, a portion of the excess right of way that was acquired in connection with the construction of the First Avenue-Esplanade Street Section of the Klamath Falls-Malin Highway, in Klamath Falls. The Engineer recalled that pursuant to previous agreement and understanding with the City of Klamath Falls and Klamath County, the State acquired more land than was actually needed for right of way purposes, the idea being that the excess property would be used for roadside and park development at some future time, and for reinstatement and reconstruction of park and recreational areas heretofore constructed and maintained by the City, but which would be impaired and disturbed by the Highway improvement. The City of Klamath Falls now desires to develop some of this property as a park, all the work to be performed by the City, except the construction of one tennis court, which the State must replace, by reason of the fact that one of the City's tennis courts was destroyed by the highway improvement. He exhibited a map showing the excess area between Manzanita Street and Painter Street, and a proposed plan for its development for recreational purposes. He recommended that the City be allowed to develop the area on the condition that such development shall be entirely the obligation of the City, and he suggested that the area be deeded to the City so as to relieve the State from any responsibility in connection with it, the deed to contain provision that there shall be no access whatsoever from the park to the highway, and that a substantial fence be constructed along the dividing line between the park and the highway right of way. This matter was discussed at some length, and as a result thereof, the Commission indicated that it would deed the property to the City, if the City will accept it, subject to the conditions outlined by the Engineer.

The Chief Counsel presented a proposed settlement of the case of the State Highway Commission vs. McCollum, covering property acquired as right of way for the Johns Ranch-Glendale Section of the Pacific Highway, Douglas County. He recommended settlement by stipulation by payment of $4,015 cash, granting of a farm crossing, and reservation of access to Stumbo County Road, such cash

settlement being the amount of an appraisal, plus $250 attorney's fees. He advised that since the highway was constructed, certain damage has accrued to the property by reason of flooding, and the highway fill acting as a dike, and in his estimation, taking all factors into consideration, the proposed settlement is reasonable. The Commission approved the settlement by a unanimous vote.

The Chief Counsel also recommended settlement by stipulation of the case of the State Highway Commission vs. W. O. Condray by payment to Mr. Condray of the sum of $3,326. He advised that this settlement involves the acquisition of 20.83 acres of land needed in connection with the Johns Ranch-Glendale Section of the Pacific Highway, and that the amount of the settlement is the approximate average of four separate appraisals of the property. In addition to the cash payment, he said, there would be reserved to Mr. Condray two farm crossings, but all other accesses to the highway will be denied. He recommended approval of this settlement. The Commission approved the recommendation unanimously.

The Chief Counsel brought up for discussion a proposed settlement of the controversy between the Commission and M. J. and J. A. Greenberg, Astoria, involving a store building in Astoria, which was damaged by reason of the filling in of an adjoining lot, and the erection of a service station thereon. He advised that the building was damaged by reason of the highway construction, and from the bids that have been received, repairs are estimated to cost in excess of $7,000. The Greenbergs, he said, have agreed to settle with the State for the sum of $5500, and, if paid such sum, will give the State a release from all damages which have occurred, or which may hereafter occur to their property. It was his thought that this is a very fair settlement of the controversy and recommended approval of the same. The Engineer concurred. The Commission approved the settlement by unanimous vote.

The Chief Counsel presented a request from the City Attorney of the City of Portland that the State Highway Commission, as a court favor, permit its legal staff to appear before the Supreme Court in connection with the City's action against a contractor who has refused to accept a contract awarded by the City. It appears that the proposal submitted by the successful bidder for the city work was $240,000 under the next low bid, and for that reason he has refused to accept the award of the contract, alleging that he made an honest mistake. Further, that the matter was taken to court and was decided against the city, which is now appealing the case to the Supreme Court, and because of the Highway Commission's interest in such matters the city is asking the State to participate in the case as a "friend of the court." The Commission decided unanimously to participate in the case and so instructed the Chief Counsel.

The matter of permitting bonding companies to limit to a specified sum rather than five percent of the bid, their obligation on bidders' bonds furnished in connection with State Highway work, was considered by the Commission. The Chief Counsel advised that several requests for permission to show maximum liability in dollars in connection with such bid bonds have been received, but he could not recommend approval of such procedure as being in

the State's best interest. He gave as his thought that the Commission should continue to require a bid bond in an amount equal to five percent of the aggregate amount of the bid. The Commission concurred in the view point of the Chief Counsel and ordered continuance of past practice.

A letter was presented from Mr. L. M. Lepper, Director, East Side Commercial Club, Portland, requesting that Marine Drive which extends along the Columbia River Dike in Northeast Portland, be designated a State Secondary Highway from Union Avenue eastward to a connection with the new Columbia River water grade highway. Mr. Lepper alleges that such a highway would prove a great convenience to the traveling public as a bypass route around city congested district, and would provide a beautiful scenic drive from Troutdale into Portland. The Engineer advised that Marine Drive presently extends from a connection with the Pacific Highway East, near the Union-Denver Avenue Junction, eastward to a point near Blue Lake, a distance of about twelve miles, but from that point to a connection with the new Columbia River Highway near Sandy River would require entirely new construction for about three and one-half miles, which is estimated to cost about $525,000. He recommended that the request be denied because the route would serve very little through traffic, and would be used principally by people residing along the route and as a scenic drive. He particularly pointed out that the road is constructed on a dike, and were it to be designated a State highway the maintenance of the dike would be a responsibility of the State. The Commission decided unanimously not to place this road on the State highway system.

The Engineer reported on the recommendation of the Jackson County Grand Jury that the Highway Department construct additional guard fences and widen certain points on the Green Springs Highway where hazards exist. He advised that investigation discloses about seven miles of five percent grade on side hill cut, and that to afford complete protection would require seven miles of guard fence, which is estimated to cost about $15,000 per mile, or a total of $105,000. He further stated that an examination of the accident record for the Green Springs Highway reveals a total of 91 accidents on the 28 mile section in Jackson County during the past three years, 61 of which involved two or more vehicles; 18 were described as non-collision, and the remaining 12 involved a single vehicle in collision with a fixed object. Of the total accidents, he said, six are described as fatal, and all of them occurred on a fifteen mile section of highway, although no two occurred in the same mile. He further stated that he is unable to determine that a definite hazard exists at any particular point along the 28 mile section in Jackson County, in view of which he recommended that no additional guard fence be constructed at this time. In view of this report, the Commission decided that it is unnecessary to construct additional protective features on this highway at the present time, however, instructed the Engineer to watch the conditions closely and report to the Commission if and when he considers that the additional facilities are required. The attached resolution with respect thereto, marked Exhibit "C", which resolution by this reference is made a part hereof with like effect as though copied in full herein, was thereupon adopted by the Commission by unanimous vote. The Secretary was

instructed to send a copy of this resolution to the District Attorney of Jackson County.

The Commission discussed reports from the Engineer and the Chief Counsel on investigations made subsequent to the last meeting, of the Erickson Building in St. Helens, which encroaches upon extra right of way that is needed for the lower Columbia River Highway at this point. It was recalled that settlement could not be reached with the Ericksons for this right of way, and as the result of condemnation action, the court awarded the Ericksons $26,000 for their property, following which the Ericksons agreed to accept the verdict on the condition that they be allowed sixty days within which to cut back a certain wall on the property, and three years time within which to clear the right of way of the building encroachment. Moreover, they stated their willingness for the State to defer payment of the $26,000 until the right of way had been entirely cleared. The Engineer advised that the new building line, as originally proposed by the Ericksons, is only 21 feet from the center line of the highway, and the intervening space does not afford sufficient room for a pedestrian walk that is needed to serve the school located south of the Erickson property; moreover, the Erickson building seriously handicaps proper access to and vision of a garage and service station immediately south of the Erickson property which the owner voluntarily moved back several years ago to accomodate the highway improvement. He recommended that the Ericksons be given no longer than 90 days within which to remove the wall and not longer than six months to cut back the building, over and beyond the time stipulated in the court action. It was the Commission's decision, as a result of discussion, that the Ericksons should be allowed the length of time established by the court for the removal of the wall, and one year's time within which to cut back their building. The Commission also ordered that a sufficient amount of the $26,000 due the Ericksons be withheld as a guarantee for the clearing of the premises within the stipulated time.

The Engineer brought up for discussion the matter of marking picnic areas which have been constructed along State Highway rights of way throughout the State, particularly fourteen such areas that have been developed since 1947. He gave as his thought that appropriate signs should be placed along the highway approaching these areas, as an aid to tourists who are looking for such places, and that appropriate notices should be erected throughout the areas as a guide to their proper usage. He submitted for the Commission's consideration a design for signs to be erected along the highway, bearing the wording, "Oregon State Highway Department, Roadside Picnic Area", and recommended adoption of the same. He also recommended adoption of wording, as follows, for notices to be posted throughout each area, requesting public cooperation in the proper use of the same:

ROADSIDE USERS

You are cordially invited to use the picknicking facilities provided here for your convenience and enjoyment. It is our desire to maintain them in a manner which will increase your pleasure in driving Oregon's highway.

Won't you assist us by observing the following simple rules?

(Cont.)

Drive and park only on graveled surfaces

Build fires only where and if fireplaces are provided

Never pick, cut or mutilate in any manner, any flower, tree, or other natural or constructed feature

Always deposit garbage and waste in the receptacles provided--be considerate of others

Enjoy our State. Help us keep it green--and clean--for all to enjoy.

OREGON STATE HIGHWAY COMMISSION

Salem

The Commission approved both recommendations by unanimous vote, and authorized the erection of the signs in conformity therewith.

The Commission discussed a written report from the Engineer, dated February 17, 1949, on the selection of sites for "Blue Star Memorial Highway" markers, and the design of the marker to be erected at each of the locations. The Engineer recalled that the Commission by adoption of its resolution on May 25, 1948, designated the Pacific Highway, the Pacific Highway East and the Pacific Highway West, from the Washington State Line to the California State Line as "Blue Star Drive", and ordered suitable markers erected. A study, he said, indicates that three sites probably should be established for the markers, one near the north end of the State, one near the southern end of the State, and one approximately at the junction of the Pacific Highway East and the Pacific Highway West. He recommended as the site of one of the markers an old gravel pit about five miles south of Junction City, which he said, is an excellent one and can be developed as a picnic area at a cost of about $2,000. He also recommended a design for the marker identical with a Blue Star Memorial Sign that has been erected by the Texas State Highway Department. The Commission approved both recommendations unanimously, and authorized development of the Junction City area in 1949 as a Minor Betterment project.

The Engineer reported results of an investigation of reports to the effect that trucks park on the Oregon Coast Highway just North of the Siuslaw River Bridge in Florence, to the detriment of highway traffic. He advised that the investigation reveals that trucks are parked overnight on the highway at this point--that they are entirely without illumination, and that they do cause a definite hazard to highway traffic. He recommended adoption by the Commission of an order prohibiting the overnight parking of vehicles on the westerly side of the highway between the south line of Second Street and the south line of First Street, a distance of about 450 feet. The Commission approved

the recommendation on the condition that the City of Florence will adopt an appropriate ordinance to like effect, the location being within the city limits of Florence, and under the city's jurisdiction. The Engineer was instructed to take up the matter with the city officials.

The Engineer reported the results of taking bids in Salem on February 21, 1949, for the purchase of timber on a state owned quarry site near the town of Alsea, in Benton County. He advised that only one bid was received, being that of Steeprow and Callahan, Alsea, who offered to pay the sum of $720 for this timber, which is at the rate of $8 per M.F.B.M. He recalled that the State Forester previously appraised the timber at $3 per M.F.B.M., and that an offer had previously been received at the rate of $5 per M.F.B.M. He recommended in view of the fact that the bid of Steeprow and Callahan is considerably in excess of either of the estimates, that it be accepted and that the timber be sold to them at the bid price. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Commission discussed a written report from the Engineer, dated February 24, 1949, on the request of a delegation from Washington County, which appeared before the Commission at the previous meeting, for a cloverleaf connection between Cornelius Pass County Road and the Sunset Highway at the site of the Merle Undercrossing structure, in Washington County. According to this report, the cost to construct such a traffic interchange is estimated at $25,000; also, there appears to be little justification for the interchange from the traffic standpoint. The Commission deferred a decision in the matter and instructed the Engineer to make further investigation, in view of the importance of this county road and the fact that it serves a rapidly developing district.

Pursuant to instructions from the Commission at a previous meeting, the Engineer reported on the cost and need of an underpass under U. S. Highway No. 30 (Columbia River Highway) at the site of the Celilo Indian Village east of the Dalles, the request for such underpass having been presented to the Commission at the previous meeting by officilas of the U. S. Indian Service. The Engineer estimated the cost of a vehicular underpass at $200,000 and the cost to construct a concrete underpass for pedestrians, eight feet wide and seven feet high, at $25,000 of which amount $17,500 represents the cost to build the portion under the highway and $7500 the cost to build the portion under the O. W. R. & N. Railroad. He questioned the necessity for a vehicular underpass because of the few vehicles that would move from the new site of the Indian Village on the south side of the highway to the fishing grounds on the north side. However, he said there would be a large number of pedestrians that would have to cross the highway, many of whom would be children who would have to be protected at the highway and at the railroad. He suggested that the state could cooperate on this project to the extent of constructing the pedestrian underpass under the highway, leaving to either the railroad company or the Indian Service the responsibility to construct the underpass under the railroad. Investigation also shows, he said, that a grade crossing of the rail-

road tracks for vehicles entering the Indian Village will have to be provided. He gave as his opinion that such crossing should be protected by automatic signals at the expense of either the railroad company or the Indian Service. As a result of discussion, the Commission indicated its approval of the Engineer's recommendation and instructed him and the Chief Counsel to discuss the matter further with the Indian Service officials in confirmity therewith, and to report their findings.

A letter was presented from the Astoria Chamber of Commerce urging the Highway Commission to immediately construct the Fish Hawk Falls Secondary Highway which extends from the Sunset Highway near Elsie to a connection with the Nehalem Secondary Highway at Fish Hawk Falls near the town of Jewel, Clatsop County. In its letter the Chamber alleges that the Highway Commission promised the people of Astoria before the War that this road would be constructed after hostilities ceased. The Engineer advised that the records had been thoroughly checked by the Secretary, who has been unable to find any promise or committment whatsoever with respect to construction of this road. He further stated that from information gathered from the survey of the road in 1941, the cost to construct the highway at present day prices is estimated at $675,000. The condition of the existing road between Elsie and Jewel, which is now being maintained by the State, he said, compares very favorably with the Nehalem Secondary Highway between Jewel and Astoria, so in his estimation, there would be no object in building the Fish Hawk Falls Road unless the improvement were continued into Astoria, a distance of about 23 miles. He pointed out that the construction of the Fish Hawk Falls Secondary Highway would only shorten the distance from Portland to Astoria over the present route 3.73 miles. The Commission decided unanimously not to construct this road at the present time, and instructed the Secretary to so inform the Chamber of Commerce.

A letter was presented from the City of Mt. Angel, requesting improvement of the Hillsboro-Silverton Secondary Highway within the Mt. Angel city limits, particularly by regrading and construction of standard pavement full width of the street between curbs. The Engineer estimated the cost of the work involved at $30,000, and recommended approval of the same as a meritorious project if funds can be arranged to finance it. He pointed out that the Commission considered a previous request for the same improvement in 1946, but because of lack of funds, did not approve it, although the Commission indicated at that time that it would consider the project in a future program. He also pointed out that the project is not included in the present tentative program because of the reserve fund that has been set up pending a decision with respect to the construction of a new bridge over the Willamette River between Salem and West Salem. The Commission deferred a decision in this matter pending final selection of projects for its second post-war program.

The Commission discussed with the Engineer the bids received at the morning session, and at 3 p.m. Chairman Banfield publicly announced the results thereof, as follows, the action of the Commission being by unanimous vote:

"Grading, surfacing, and oiling the Sheeley Bridge-Sunset Camp Section of the Upper Nehalem County Road, in Columbia and Washington Counties. Homer G. Johnson, Portland, submitted the low bid for this work at $138,888.50. He did not submit a bid based on the use of tar. The next low bid was submitted by Grimstad & Vanderveldt, Astoria, at $139,444.25 based on the use of asphalt, and $139,424.85 based on the use of tar. There were three

higher bids. The Commission has awarded the contract to the low bidder, Homer G. Johnson, at his bid price.

"Construct three reinforced concrete bridges, and 0.80 mile of highway roadbed on the Coos Bay-Roseburg Highway, in Douglas County. The low bid for this work was submitted by Lindstrom Bros., Inc., Portland, at $180,022. based on the use of asphalt. They submitted no bid based on the use of tar. The next low bid was submitted by Valley Construction Co, Portland, at $205,066. based on the use of asphalt. They also submitted no bid based on the use of tar. There was one higher bid. The Commission has awarded this contract to the low bidder, Lindstrom Bros., Inc., at their bid price.

"Rainrock-Alderwood Park Rock Production Project on the Siuslaw and Alsea-Deadwood Highways, in Lane County. The Commission received two bids for this work, being those of F. H. McEwen, Eugene, at $145,000. and McNutt Bros., Eugene, at $166,900. The Commission has rejected both bids.

"Ranger Station-Toll Creek Rock Production Project on the Santiam Highway, in Linn County. The low bid submitted for this work was that of A. H. Saxton & Sons, Corvallis, at $42,380. F. H. McEwen, Eugene, submitted the next low and only other bid, at $55,275. The Commission has awarded the contract to A. H. Saxton & Sons, the low bidder, at their bid price.

"Steiwer Hill-Albany Roadside Improvement Project on the Pacific Highway East, in Linn and Marion Counties. Spada Bros., Portland, submitted the low bid for this work at $13,670.87. The next low bid was submitted by Stevenson Construction Co., Salem, at $15,224.80. There were seven higher bids. The Commission has awarded the contract to the low bidder, Spada Bros., at their bid price.

"Paving and minor grading work on the Troutdale Section of the Columbia River Highway, in Multnomah County. The low bid for this work was submitted by C. T. Malcom & Co., Portland, at $134,280.90 based on the use of tar. The second low bid was submitted by Parker Schram Co., Portland, at $142,000 based on the use of asphalt; and $141,940. based on the use of tar. There was one higher bid. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, C. T. Malcom & Co., when certain conditions have been satisfied."

The Commission discussed requests, as follows, for traffic signal installations:

(1) Request from the City of Klamath Falls for installation of "Stop and Go" lights at the intersection of Alameda and Esplanade Streets in Klamath Falls, on the route of the new First Avenue-Esplanade Street Section of the Klamath Falls-Malin Highway: The Engineer advised that this intersection will be hazardous unless protected by a flashing beacon, and he recommended the installation of a signal that would permit

a right turn at all times on the main highway for south bound traffic, a yellow caution indicator for north bound traffic on the main highway, and a stop indicator on the other street intersections. He estimated the cost of the installation at $281, and suggested that this expense be assumed entirely by the State, pursuant to past practice, on the condition that the city will maintain the signal and pay for all electrical energy consumed in operating it. The Commission approved the recommendation unanimously.

(2) Request of the City of Klamath Falls for a traffic signal installation at the intersection of Esplanade and Main Streets, in Klamath Falls, route of Highway U. S. 97: The Engineer advised that an investigation by the Traffic Engineer reveals that the volume of pedestrian traffic now is somewhat below the volume warranting signals, however it is anticipated that it will increase from forty to fifty percent when the new highway route by the Esplanade Undercrossing is opened to traffic. He estimated the cost of an appropriate signal at this point at $4,000, and recommended the installation at this time on the condition that the City of Klamath Falls will pay fifty percent of the expense involved, will maintain the signal after it is installed, and will furnish electrical energy to operate it. The Commission approved the recommendation unanimously.

(3) Petitions from residents of Riverwood Park, Astoria, for installation of caution lights and a cross-walk on the Oregon Coast Highway at Riverwood Park, a short distance south of Astoria, for the benefit and safety of children: The Engineer advised that this crossing is at the location of a housing project, with a grocery store and a tavern on the opposite side of the highway; further, that many children cross the highway to go to the grocery store and others cross it to board their school bus. He gave as his opinion that a considerable hazard does exist for children crossing this busy thoroughfare, and for this reason he recommended installation of a cross-walk and an overhead illuminated cross-walk sign at an estimated cost of $400. The Commission approved the recommendation.

(4) Request of Harry C. May, North Bend, for a change in the existing signal on the Cape Arago Highway at the intersection of Virginia and Broadway Streets, in North Bend, so as to provide for the stopping of traffic on non-highway streets and the cautioning of traffic on Cape Arago Secondary Highway: The Engineer advised that the existing signal requires traffic from all four directions to stop before entering the intersection, and that the Traffic Engineer who has investigated, recommends that highway traffic be allowed to proceed without stopping, under control of a yellow caution light, because seventy five percent of the traffic that enters this intersection is highway traffic. He stated that he concurs in the recommendation. In the discussion of this matter the Commission expressed the opinion that if the signal is changed, it should be replaced with a "stop and go" signal, and in that case the city should be required to pay fifty percent of the installation cost and should also maintain the signal and furnish electrical energy to operate it. The Engineer was instruc-

ted to contact the City Council relative thereto, and to proceed with the installation if the city is willing to cooperate on such a basis.

(5) Report of the Engineer on the need to install traffic signals at the intersection of Washington and Sherman Streets in North Bend when the new highway project at this place is completed and opened to traffic: The Engineer advised that the original plans for construction of the North Bend-Coos Bay Section contemplated installation of traffic signals at this intersection, but the item was not included as a part of the contract because it was considered advisable to defer the installation until the roadway was opened to the public and traffic movements studied. It is now apparent, he said, that the signal installation should be made, and accordingly, he recommended signals of the semi-actuated type, which he estimated would cost about $5,300. He requested approval of the expenditure. In the discussion of this matter it was brought out that the original agreement with the city provided for the installation of signals at this point entirely at State expense, notwithstanding which, the Commission expressed the feeling that the city should be required to contribute half of the cost of the installation, should maintain the signal and furnish electrical energy to operate it, which is in conformity with established policy, and it was so ordered. The Engineer was instructed to convey the action to the City Council and ascertain whether or not the city would be willing to cooperate on such basis.

The Commission ordered that, hereafter, when agreements are prepared with municipalities covering matters of this kind, provision be included therein, limiting the State's participation in the expense to one-half of the costs involved, and requiring the cities to maintain the signals and to furnish electrical energy to operate them.

(6) Proposal of the Southern Pacific Company for installation of a railroad crossing signal at the grade crossing of the Pacific Highway and the Southern Pacific tracks at Wilbur, Douglas County: The Engineer advised that the crossing referred to is of a main line railroad with a heavily traveled highway, and where a number of accidents have occurred by reason of motorists driving their cars into the side of trains. He stated that the installation of flashing lights would provide a warning to motorists, which they do not have under existing conditions. He also said that the Southern Pacific Company has offered to pay fifty percent of the cost of the installation, which is estimated at $3,500; moreover, the railroad company will maintain the signals and will furnish the electrical energy to operate them. He recommended approval of the installation on such basis. The Commission approved the recommendation unanimously.

(7) Petitions from residents of Oak Grove and Concord Districts along the Pacific Highway East between Oregon City and Portland, requesting installation of traffic control signals at the intersection of this highway with Concord Road for the benefit of pedestrians, particularly children, who are obliged to cross the highway at this point: The

Engineer advised that this matter has been investigated by the traffic Engineer, who reports that it is hazardous for traffic to either enter or cross the highway at this point; moreover, the investigation reveals further that there are two other intersections which are equally, or more hazardous than Concord Road, being those at Courtney Road and Oak Avenue. This section of the Pacific Highway, he said, carries an average of 11,000 vehicles daily at high speed, and the records show that during the year 1947, 15 accidents occurred at Courtney Road, 11 at Oak Avenue, and seven at Concord Road. He recommended immediate installation of semi-actuated signals at the three intersections under discussion, at an estimated cost of $12,000. The Commission approved the recommendation unanimously.

(8) Petitions from patrons of Union High School, District 3, and Grade School, District 10-J, Langlois, Curry County, requesting construction of two school cross-walks on U. S. Highway 101, one at the Grade School and one at the High School, with proper cross-walk signs, and construction of gravel trails on both sides of the highway from the Grade School to the trading center and Post Office at Langlois: The Engineer advised that this matter had been investigated by the Traffic Engineer and also by the Maintenance Engineer, both of whom report that there is justification for the improvements. It appears that there is considerable amount of pedestrian traffic between these two points, where the pavement is only 18 feet to 19 feet wide, and the shoulders range in width from two to five feet. It also appears that a number of accidents have occurred on this section, one of which involved a boy who was struck while riding a bicycle on the highway. The Engineer recommended the widening of the shoulders of the highway between the points referred to, the cutting back of a bank just north of the Grade School entrance so as to provide better sight distance, and the installation of a large, illuminated overhead cross-walk sign over a painted cross-walk on the highway, all of which work he estimated would cost about $1240. The Commission approved the recommendation and authorized the Engineer to proceed with the work.

In the discussion of the foregoin matters, Commissioner Schaupp brought up the question of permitting right turns after stopping, at all points where "stop and go" signals had been installed. The matter was referred to the Engineer for study and recommendation.

The advisibility of prohibiting the parking of vehicles near intersections on narrow streets, so as to permit left and right hand turns with safety in separate lanes, was introduced in the discussion by Commissioner Chandler. It was the thought of the Commission that such cases, for the most part, would occur within the boundaries of incorporated cities and towns, and would come under the jurisdiction of city officials, so it would be a matter for the city to provide the solution, and that the Commission's authority would be limited simply to making suggestions. The Commission took no particular action on the matter.

The Engineer reported that recent storms had caused considerable damage to both the North and South pier protection dolphins at the Coos Bay Bridge, requiring the replacement of two five-pile dolphins in the main pier protection at the south side of the main channel, and the replacement of seven five-pile dophins at the North pier protection. He requested authority to make the repairs, which he estimated would cost $4,500, the work to be done under contract. The Commission approved his request unanimously.

The following persons, representing the U. S. Public Roads Administration and the U. S. Forest Service, conferred with the Commission relative to the programming of available Forest Highway Funds, totaling $2,304,000: W. H. Lynch, Division Engineer; T. M. Davis, District Engineer; Frank E. Andrews, Principal Assistant Engineer, and R. N. Kellogg, Senior Highway Engineer; all representing the Public Roads Administration; and H. J. Andrews, Regional Forester, and James Frankland, Regional Engineer, representing the U. S. Forest Service. After careful consideration of projects eligible for the funds available, the following projects were tentatively selected for the program:

FOREST HIGHWAY PROGRAM

Tentative selection of projects for allocation of 1950 fiscal year apportionment.

County and Highway	Forest Project No.	Section and Description	Estimated Cost
CLACKAMAS COUNTY			
Timberline	50-A3,B2	Mt. Hood Jct.-Timberline, S-O	$ 295,000
CURRY COUNTY			
Oregon Coast	10-D2,E1	Port Orford-Rocky Point, G-S-O	475,000
DESCHUTES COUNTY			
Cascade Lakes	46-C2,D1	Devils Lake Section, G.	75,000
LINCOLN COUNTY			
Alsea	6-B3	Scott Creek Bridge	50,000
MARION COUNTY			
North Santiam	24-A5,B7,C5	Niagara-Detroit, Surf.	250,000
WALLOWA COUNTY			
Enterprise-Lewiston	38-A2,B2	Flora Jct.-South, G-S-O	150,000
		Surveys	50,000
		Maintenance	75,000
			$1,420,000
Balance to be allocated later			884,000
		TOTAL	$2,304,000

February 28, 1949

A question arose in respect to allocation of the $884,000 balance. Opinions expressed appeared to favor continuation of construction of the Pacific Highway south of Canyonville, in Douglas County, provided arrangements can be made for additional funds that are required to finance the work. Definite approval of the program was deferred until the next meeting of the Commission.

A letter was presented from Robert G. Thompson, Mayor of the City of Klamath Falls, requesting the raising of manholes on North 9th Street, (route of U. S. 97) at its intersection with Lincoln Street and Grant Street, so as to bring them to a level with the pavement at those points; additional maintenance work on Alameda Street, which has been used as a detour for highway traffic during construction of the First Avenue-Esplanade Street project; and requesting removal of snow from the center of Main Street and South 6th Street, State Highway routes, in addition to providing passageways on the sides of those streets. Mayor Thompson also asks that the city be reimbursed in the amount of $375, which the city has expended for removing snow from the center of these streets, it being his thought that it is the State's responsibility to take care of such features.

The Engineer advised that he has already issued instructions for raising of the manholes and for additional maintenance work on Alameda Street. Concerning the snow removal operations, he advised that the work done by highway forces in Klamath Falls is in conformance with long established policy and practice. The Highway Department, he said, provides passageways for vehicles on snow covered streets that are designated state highway routes, by plowing the snow to the center of the streets, but in no instance has the state gone so far as to remove the snow from the center of the streets. The same procedure has been followed in Klamath Falls, he said, as is followed in other cities and towns throughout the state, in view of which he recommended that the city's request for reimbursement in the amount of $375 be denied. The Commission approved the recommendation unanimously.

The Engineer reported that adverse weather conditions during the past couple of months have caused considerable damage to highways throughout the state, necessitating repairs, in some instances rather costly. He requested authority to prepare plans for repairing the damage. The Commission approved the request, however, instructed the Engineer to render at the next meeting of the Commission, a full report covering the entire situation.

The Commission had under consideration the approval of plans of the Cities of Philomath and Powers for the expenditure of 1948 State Tax Street Funds, which they received in 1949. The Engineer advised that the plans have been reviewed and are satisfactory; also that both cities have fulfilled the legal requirements with respect to the funds in question. He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the attached resolution with respect thereto, marked Exhibit "D-1", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission also considered, and upon recommendation of the Engineer, approved, the plans of the following cities and towns for the expenditure of 1947 State Tax Street Funds, which they received in 1948:

Boardman	Mosier	Scotts Mills
Fossil	Richland	Umatilla
Jordan Valley	Sandy	Wasco

The attached resolution with respect thereto, marked Exhibit "D-2", which resolution by this reference is made a part hereof with like effect as though copied in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer reported that the City of Jordan Valley has met the legal requirements with respect to the expenditure of 1946 State Tax Street Funds, which the city received in 1947, and that the plans of the proposed project to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto, marked Exhibit "D-3", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission discussed a request from Martin Peterson, Florence, Oregon, for an extension of his previous agreement with the Commission, authorizing him to remove reject road building materials from Cape Creek Quarry, located near the Oregon Coast Highway in Lane County. The Engineer advised that the original agreement with Mr. Peterson, dated October 15, 1945, was extended on February 26, 1948, for a period of one year, or until March 1, 1949, and Mr. Peterson now wants it extended another year and offers to pay three cents per cubic yard for materials taken; moreover, he has advanced the sum of $100. He recommended that the agreement be extended for one year, or until March 1, 1950. The Commission approved the recommendation. (The extension agreement was signed by the Commission the following day.)

A request was presented from the County Court of Clatsop County, that the old steel bridge, formerly used at the Necanicum River crossing of the Oregon Coast Highway, which bridge is now stored in the highway maintenance yard at Seaside, be given to the county for its use on the county road system. The Engineer advised that the bridge was originally built and paid for by Clatsop County, and was taken over by the State when the state highway system was adopted; also, that it has a roadway width of only 16 feet, and is not suitable for any place on the state highway system. He recommended that it be given to Clatsop County without cost. The Commission approved the recommendation unanimously.

The Commission discussed a letter from Mr. James Mount, Chairman of the Activities Committee of the Visitor's Service of the Portland Chamber of Commerce, inquiring whether or not the Highway Commission has any objection to setting aside for planting and maintaining by local groups, a portion of the area immediately south of the Chamber of Commerce building on Harbor Drive, which is to be landscaped under State Highway contract. As a result of discussion, the Secretary was instructed to inform Mr. Mount that the Commission

has no objection to the planting of a rose garden on a portion of this property, after the landscape work which is to be done by the state is completed, and the area turned over to the City of Portland for future maintenance.

The Commission discussed and unanimously approved an arrangement recommended by the Engineer for the disposal of the claim of Warren-Northwest, Inc., state highway contractors, for extra compensation arising out of their contract No. 2738 for construction of the South Unit of the Steiwer Hill-Albany Section of the Pacific Highway East, in Linn County. (The agreement was signed by the Commission on the following day. See executed original in Commission files for details.)

The Engineer brought up for discussion the matter of extending the restricted parking zone on U. S. 99, north of Eugene. He recalled that the Commission some time ago authorized the posting of a short section in the vicinity of the Auction Market for "No Parking on Highway Shoulders". This posting, he said, has benefited considerably, but recent observations indicate that the restrictions should be extended to cover the entire distance northerly from the Southern Pacific Railroad overcrossing, past the Valley Auction Market, where the roadsides are completely built up with grocery stores, service stations and auto courts, and where there is a great deal of open access shoulder parking. He recommended that parking on highway shoulders be prohibited from Elmira Road crossing on the south (M.P. 120.98, Engineer's Station 616+80) northerly about one mile to M.P. 120.04, Engineer's Station 568+22, which includes the section previously zoned. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked Exhibit "E", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer reported an offer from the Rush Company, producers of commercial rock, Baker, Oregon, to sell to the state for the sum of $1,000, 2,000 cubic yards of ½"-0" screen reject materials, and 678.02 cubic yards of ¼"-0" crushed rock now stored on the company's property. He advised that the materials had been inspected and sampled and that they meet the state specifications for the use intended. He further stated that while the materials are located on the company's property, the company will give the state an easement for a period of five years to enter upon the property for removal of the materials as they are needed. He recommended acceptance of the offer. The Commission approved the recommendation unanimously, and ordered that the transaction be covered by appropriate bill of sale and easement.

The Commission discussed and approved agreements with County Courts of Washington County and Columbia County, providing for county maintenance of the Sheeley Bridge-Sunset Camp Section of the Upper Nehalem County Road, after this section has been improved by the state as a Federal Aid Secondary Highway project, bids for which were received by the Commission earlier in this session. (Both agreements were signed by the Commission the following day.)

The Engineer reported the results of his study of the suggestion made by Mr. Harry B. Duncan, Attorney for the Johnson Trucking Lines, Medford, for expediting permits authorizing special movements over state highways. He re-

called that Mr. Duncan objected to the use of telegraphic permits because of their cost, and that he suggested use of a simple code system to indicate the requirements and limitations. The Oregon State Police, he said, object to the use of the code system, and so far as telegraphic permits are concerned, only three such permits have been directed to Mr. Duncan, at a total cost of less than $9.00, including 25 percent Federal Tax. It was his thought that the procedure now being followed is fair and reasonable, and suggested no change at the present time, particularly in view of the fact that Mr. Duncan and the Johnson Truck Lines have apparently solved their own problem by securing all of their permits from the highway office in Grants Pass, the records disclosing that they have obtained eight permits from that office within the last forty days. He recommended that the matter be considered closed. The Commission approved the recommendation.

The Commission discussed matters pertaining to the proposed new State Highway Department Office Building at Salem, particularly the Engineer's written report dated February 24, 1949, in which he comments on the floor plans of the architects' scheme VI. In his report the Engineer points out that the usable net area as provided by this scheme is 101,140 square feet, of which 72,075 square feet are needed immediately, the remaining space being available for rental and for future needs. He recommends approval of the scheme, and that he be authorized to instruct the architects to proceed with a design for a five story building in conformity therewith. The Commission approved the recommendation unanimously, however, instructed the Engineer to make his recommendation in writing.

The Engineer also requested instructions regarding the ventilating and cooling system for the building. It appears from information gathered by the architects, that a system to provide heat and mechanical ventilation, without sensible cooling, would cost about $90,000, and with sensible cooling, $102,000; whereas a system to provide heat only, with natural ventilation through windows, would cost $59,000. In other words, to provide a complete ventilating and cooling system in the building will cost about $43,000 more than to provide for heat only, with ventilation taken care of through windows. He was instructed by the Commission to arrange for the taking of alternate bids covering this feature.

The Engineer brought up for discussion the Chief Accountant's financial report, dated December 31, 1948, particularly with reference to the status of overruns and underruns in connection with contract work completed during the calendar year 1948. He pointed out that a total of 129 projects were completed during 1948, that some of the jobs were included in the post-war construction program, and some, consisting mainly of rock production projects, Special State Tax Street Funds projects and special maintenance projects, were not included in that program. He also pointed out that the total project authorization for the 129 jobs was $11,017,718.11, whereas the cost of the completed projects was $10,710,247, resulting in an underrun of $307,471.11 for all the jobs, although a number of the individual jobs did overrun the project authorization. He explained in considerable detail the reasons why the overruns occurred. This matter was discussed at considerable length and as a result thereof the Commission unanimously approved an additional authorization to cover the excess costs of the individual projects over and above the amount that was originally allocated to each. (For details, see Engineer's report to the Oregon State Highway Commission, dated February 25, 1949, in general files.)

February 28, 1949

The Engineer presented for the Commission's consideration a "Special State Tax Street Fund" project in the City of Gold Beach, involving the surfacing of five city blocks. He advised that the streets concerned are subject to considerable truck traffic, and qualify for improvement with Special State Tax Street Funds, of which $57,000 remains available for projects in the 1949 set-up. He estimated the cost of the project at $25,750, of which amount, he said, the property owners will contribute $8,250, and the City of Gold Beach will contribute $4,500, leaving a balance of $13,000 to be contributed by the state from the State Tax Street Fund account. He recommended approval of the project. The Commission approved the recommendation unanimously.

The Engineer requested authority to proceed with construction of six small minor betterment projects to be financed with 1949 funds as follows:

(1) Construct 200 lineal feet of eight inch storm sewer and one catch basin on the Oregon Coast Highway at Taft, Lincoln County $ 350.00

(2) Provision for drainage on the Salmon River Highway in the town of Willamina 300.00

(3) Construct 300 feet of standard guard fence at M.P. 85.5 on the Nehalem Secondary Highway north of Dairy Creek, Washington County 600.00

(4) Install 70 feet of 18 inch culvert pipe to take care of surface drainage from a cattle pass at M.P. 2.4 on the Weston-Elgin Secondary Highway, Umatilla County 500.00

(5) Raise elevation of wing walls and head walls on a double 10'x4' culvert at M.P. 20.67 on the Nyssa-Adrian Secondary Highway, Malheur County, to prevent erosion of roadbed 400.00

(6) Raise elevation of dike at M.P. 41.4, Klamath Lake Secondary Highway, Klamath County, where the highway is on a dike between Wocus Marsh and Caledonia Marsh. This is a cooperative project to be financed by local people who will contribute $500 cash and furnish 3,850 cu. yds. of cinders free of charge. The state's share of the cost is estimated at $2,200, of which $900 was authorized by the Commission on October 15, 1948. Authorization now requested - 1,300.00

Total authorization requested - six projects $3,450.00

The Commission by unanimous vote approved all six projects as recommended.

The Engineer reported that in conformity with authority previously given him by the Commission, he has awarded contracts as follows, the conditions of the awards having been satisfied:

(1) Construction of Sauvies Island Bridge over the Willamette Slough, near Portland, in Multnomah County. Bids received January 25, 1949. Contract awarded February 16, 1949, to the Gilpin Construction Company, Portland; low bidder

(2) Grading and paving, and construction of bridges on the Tillamook-Pleasant Valley Section of the Oregon Coast Highway, in Tillamook County. Bids received January 24, 1949. Contract awarded January 28, 1949, to Edwin C. Gerber Oregon City; low bidder.

The Commission by unanimous vote confirmed the awards as reported.

The Commission had under discussion the following requests for extension of time within which to complete highway contracts:

No. 1— Shoreline Construction Company, Contract No. 3018 for grading, surfacing and oiling the Hood River Junction-Odell Section of the Odell Secondary Highway in Hood River County, requested an extension of 288 days, from October 15, 1948 to July 30, 1949, within which to complete this job. They attributed failure to complete the work within the contract time limit to inclement weather, inability to secure crushing equipment and failure of steel companies to make prompt delivery of pipe and reinforcing steel. The Engineer advised that subsequent to the award of the contract, it was found necessary to install two concrete stock passes, and that this work and early fall rains prevented completion of the rock and oil mat surfacing. He recommended that the extension of time requested be granted without penalty. A letter from the Public Roads Administration concurring therein was presented. The Commission approved the extension of time as recommended.

No. 2— Lofts and Son, Contract No. 2970 for rock production on the Wasco-Grass Valley Section of the Sherman Highway, in Sherman County, requested an extension of time of 151 days from October 31, 1948 to March 31, 1949, within which to complete this job. They attributed their failure to complete the work within the specified time limit to an increase in quantities of rock to be furnished under another contract, (Contract No. 2971), and to early rains and freezing weather during the fall and winter. The Engineer advised that the contractor was required to furnish increased quantities of rock in connection with Contract No. 2971, for emergency oiling work, which delayed completion of the work under Contract No. 2970, and that they were also delayed by early rains and abnormal cold and snow. He recommended, in view thereof, that the extension of time be granted as requested, without penalty. The Commission approved the extension of time as recommended.

No. 3— Gladney and Adams, Contract No. 2863 for furnishing crushed rock in stock piles for four state highways near Klamath Falls, in Klamath

County, requested an additional extension of time of 397 days, from November 30, 1947 to December 31, 1948, within which to complete this job. They alleged that functional difficulties in plant production prevented completion of the job within the previously extended time limit. The Engineer advised that the Commission previously extended the time for completion of this job to November 30, 1947, with the stipulation that engineering costs be assessed after October 30, 1947. The contractor, he stated, has been extremely dilatory in the completion of this project, and he recommended accordingly, that the additional time now requested be granted, subject to the assessment of engineering costs that have accrued to the State from October 30, 1947 to December 31, 1948, on which latter date the job was completed. The Commission approved the extension of time as recommended.

No. 4— J. C. Papin, Contract No. 2949 for grading and oil mat surfacing on the West Unit-Sheep Creek Hill Section of the Little Sheep Creek Secondary Highway, in Wallowa County, requested an extension of time of 28 days, from September 30 to October 28, 1948, within which to complete this job. He alleged that break-down of an oil retort and adverse weather delayed oiling operations and prevented completion of the work within the specified time limit. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended, in view thereof, that the extension of time be granted as requested, without penalty. A letter from the Public Roads Administration concurring therein was presented. The Commission approved the extension of time as recommended.

No. 5— C. J. Eldon, Contract No. 2788 for construction of Coffey Creek Bridge on the Tiller Trail Highway, in Douglas County, requested an additional extension of time of 55 days, from September 30, 1947 to November 24, 1947, within which to complete this job. He alleged that he failed to complete the project within the previously extended time limit because of engineering mistakes. The Engineer advised that the Commission previously granted Mr. Eldon two time extensions on this job, the first one being from October 31, 1946 to July 31, 1947, without penalty. The second, which expired on September 30, 1947, was granted subject to the condition that Mr. Eldon would be charged with the extra engineering expense which the state incurred after July 31, 1947. He recommended approval of the request, subject to the same penalty heretofore imposed. The Commission approved the recommendation unanimously.

No. 6— Vernie Jarl, Contract No. 3037 for grading, topsoil and seeding on the Troutdale Section of the Columbia River Highway, in Multnomah County, requested an extension of time of 60 days, from February 28, 1949 to April 28, 1949, within which to complete this job. He attributed his failure to complete the work within the specified time limit to the frozen condition of the ground, which made top soiling impossible, and high water which washed-out at three different times a bridge used by him in connection with the work. The Engineer advised that the reasons given by the contractor are substantially true, and he accordingly recommended that the extension of time be granted as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the extension of time requested, as recommended.

In considering requests for extensions of time, the question arose whether or not contractors are making an honest effort to complete their projects within the specified time limit. The Engineer was instructed to canvas the situation and render to the Commission a report on his findings, with particular reference to contractors' progress and efforts to complete their work on the Warm Springs and Columbia River Highways.

The Engineer reported that contracts numbered 2896, 3000, 3014, 3027, 2863 and 3036, for State Highway construction have been completed according to the requirements of the contracts and modifications thereof, and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported, and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2896 with Guy F. Atkinson Company for construction of the Bridal Veil overcrossing on the Columbia River Highway, in Multnomah County; completed July 23, 1948.

Contract No. 3000 with Tom Lillebo for construction of the Three Rivers Bridge on the Oregon Coast Highway, in Tillamook County; completed December 16, 1948.

Contract No. 3014 with Archie R. Averill for construction of a bridge over Mill Creek on the Silver Falls Secondary Highway, in Marion County; completed January 14, 1949.

Contract No. 3027 with Archie R. Averill for constructing a maintenance building at Maupin, in Wasco County; completed January 6, 1949.

Contract No. 2863 with Gladney and Adams for furnishing crushed rock in stock piles for the Klamath Falls Section on four state highways in Klamath County; completed December 31, 1948.

Contract No. 3036 with O. C. Yocom Company for grading and surfacing the Amity-Dayton Secondary Highway, in Yamhill County; completed September 10, 1948.

NOW THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer brought up for discussion the matter of constructing a maintenance headquarters building at Fort Klamath, to replace the rented quarters which was recently destroyed by fire. He advised that it is impossible to secure another building at this place, and recommended that the Right of Way Department be authorized to secure options for a suitable site, with the thought in mind that the Commission would construct its own building thereon, later. He estimated the cost of the site at not more than $1,000, and the cost of a suitable building between $8,000 and $9,000. The Commission authorized the Chief Counsel to negotiate for the site.

The Commission discussed and upon recommendation of the Engineer and the Chief Counsel, approved the application of the Bonneville Power Administration for permission to construct its power transmission pole line over and across the right of way of the Albany-Lyons Secondary Highway near Thomas Creek, in Linn County. (Permit was signed by the Commission on the following day.)

The Engineer reported that the contract for the construction of the West Unit of the Sheep Creek Hill Section of the Little Sheep Creek Secondary Highway, No. 350, in Wallowa County, has been completed, thereby rendering valueless for highway purposes portions of the old road. He recommended that certain portions of the old right of way be turned over to the County Court of Wallowa County for maintenance as county roads, to serve people residing thereon, and that other portions be turned over to the county for vacation or to be kept by the county for public use as the county may determine. He exhibited a map showing the portions referred to. Following discussion, the Commission approved the recommendation and by unanimous vote adopted the attached resolution with regard thereto, marked Exhibit "F-1", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer also reported that the contract for the reconstruction of the Elgin-Boswell Ranch Section of the Wallowa Lake Highway, in Wallowa County, has been completed and that certain portions of the old right of way of this highway no longer have value for state highway purposes. He recommended that certain portions be turned over to the county to maintain as county roads for the benefit and service of people residing thereon, and that other portions be abandoned in favor of the county for such purposes as the county court may determine. He exhibited a map showing the portions referred to. After due consideration the Commission approved the Engineer's recommendation, and by unanimous vote adopted the attached resolution with regard thereto, marked Exhibit "F-2", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission had under discussion an agreement with Jackson County Court with respect to the abandonment of portions of the old route of the Sams Valley Secondary Highway, No. 271, when reconstruction of this highway on permanent alignment is completed. The Engineer advised that the proposed agreement covers the section between Sams Valley Post Office and Crater Lake Highway Junction. He exhibited a map showing portions of the old route that are to be transferred to the county for future maintenance as county roads, and a portion which is to be allowed to revert to the abutting property owners, pursuant to

the provisions of the agreement which the county court already has signed. He recommended approval of the agreement as prepared. The Commission by unanimous vote approved the recommendation. (The agreement was signed by the Commission on the following day.)

The Commission confirmed the action taken by the Engineer in reinstating the log hauling permit of John H. Gentry, which was cancelled November 19, 1948. on a 30-day basis, for overloading. The Engineer advised that Mr. Gentry has furnished an affidavit to the effect that since the permit was cancelled he has not hauled any logs over state highways in the State of Oregon; moreover, he also has promised hereafter, to comply strictly with the rules and regulations governing his operations. He stated that he restored Mr. Gentry's permit on February 4, 1949, on the strength of this affidavit and promise.

The Engineer reported that because of severe adverse weather conditions it has been necessary for him to post additional sections of state highways for reduced load limits in order to preserve the wearing surface and to minimize damage. He presented a list of the highways so posted, and asked the Commission to confirm his action for the record. The Commission approved such postings and by unanimous vote adopted the attached resolution in regard thereto, marked Exhibit "G", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer reported that an investigation of the Alsea Highway on Wednesday, February 23rd, reveals that a portion of the section of this highway heretofore posted for a 50 percent reduced load limit, has become sufficiently stabilized to permit legal weight loads, such portion extending from the summit of the Coast Range, M. P. 49.42, to a junction with the Corvallis-Newport Highway at M.P. 59.1, near Philomath. He recommended, in view thereof, the lifting of the reduced load limit from this particular section. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked Exhibit "H", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission by unanimous vote approved the Engineer's action taken on February 1, 1949, placing a 50 percent reduced load limit on the Tyee County Road Junction-Sutherlin Section of the Elkton-Sutherlin Secondary Highway, and the subsequent lifting of the restriction on February 21, 1949.

The Commission discussed and ordered filed a resolution from the Washington County Farmers' Union, in which this organization goes on record as opposed to " * * * any increase in auto licenses or any increase in gasoline taxes at this time", and also opposes "further construction of new throughways" * * * "until more favorable times prevail".

The Commission also discussed briefly and ordered filed a letter from Mr. Elbert Bauer, President, Portland Chamber of Commerce, complimenting the Commission for its action authorizing negotiations to acquire land for a state park along the Oregon Coast in Curry County.

The Commission confirmed oral authority previously given, authorizing Mr. Manley Robison, Director of the Travel Department, to attend at state expense, a meeting of the Pacific Northwest Travel Association in Butte, Montana, on February 11, 1949.

The Engineer requested authority to attend at state expense a meeting of the Directors of the American Association of State Highway Officials in Washington D. C., for discussion of congressional legislation concerning Federal Aid authorizations. He advised that a definite time has not as yet been set for this meeting, but he anticipates that it will be called about March 15. The Commission approved the request unanimously.

The Engineer requested authority to place orders for road-maintenance equipment, as follows:

Rental equipment for highway maintenance	$441,600.00
Shop equipment and small tools for all district shops	28,350.00

He advised that provision for all of this equipment is included in the overall equipment budget for 1949. The Commission approved the request unanimously. (For an itemized list of equipment to be purchased, see copy of Engineer's letter directed to the Oregon State Highway Commission, dated February 24, 1949, in general files.)

The Commission discussed a date for its next regular meeting, and decided to hold such meeting in Portland on Monday and Tuesday, April 11 and 12, 1949. The Secretary was instructed to make the usual arrangements for the use of the Green Room in the Imperial Hotel.

The meeting adjourned at 5:00 p.m. to reconvene the following morning in the same room.

Portland, Oregon
March 1, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud by the Secretary, purusant to previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 2:30 p.m. the same day:

KINGS VALLEY HIGHWAY

MARYS RIVER BRIDGE SECTION IN BENTON COUNTY

	Using Asphalt	Using Tar
Lindstrom Bros., Inc., Portland	$ 74,967.00	---
Archie R. Averill, Portland	76,055.50	---

McNutt Bros., Eugene	313,423.25
Leonard & Slate Ore. Ltd., Portland	339,184.00
E. L. Gates & Co., Roseburg	380,022.60

The Commission discussed matters pertaining to its second post-war construction program, and in this connection the Engineer presented a list of projects that are eligible for the funds available. As the result of careful consideration, the Commission unanimously approved the following projects as a partial program for the funds under discussion, and authorized the Engineer to present them to the Public Roads Administration for its approval. He was also authorized to advertise the projects for bids when such approval has been obtained and necessary rights of way acquired. The Chief Counsel was authorized to proceed with the securing of options for rights of way as may be needed in connection with each project.

SECOND POSTWAR PROGRAM 1950-51

PART I - PRIMARY FEDERAL AID PROJECTS

County	Highway, Section and Description	Construction	R. of W.	Total	Year
Division No. 1:					
Multnomah	Columbia River, Dodson-Bonneville, Grading and Bridges	$ 800,000	235,000	1,035,000	1

A delegation from Roseburg, consisting of Al G. Flegel, Mayor, and Mr. Percy Croft, Councilman, appeared before the Commission and urged the improvement of the Pacific Highway at the north city limits of Roseburg. Mr. Croft was the principal spokesman. He said that the highway passes through a heavily congested district just north of their city limits, and that the highway improvement is badly needed in order to eleviate traffic hazards, and to safeguard pedestrians among whom are included numerous school children. He advised that just recently two very bad accidents occurred, resulting in the death of one person, and he predicted that accidents will be more frequent unless something is done to improve the conditions. He urged modernization of the highway for a distance of about four miles, two of which he said are within the limits of the badly congested area. Mr. Croft gave as his understanding that the Commission expects to make an inspection trip through Southern Oregon some time this Spring, and he urged the Commission to take special cognizance of the condition at this particular point on such trip.

Chairman Banfield expressed the feeling of the Commission by stating that the Commission is not unmindful of the conditions at this place, and will give it consideration in forming its next construction program, however, there are otherplaces throughout the state where similar conditions exist, and the Commission does not have funds available to finance all of them. He also stated that the Commission would view the premises on its trip into the Roseburg District, and would ask the Engineer to submit a report on the situation. The Engineer was thereupon instructed to render such report. This concluded the conference.

The County Court of Lane County, represented by County Commissioner W. J. Holland, and County Engineer P. M. Morse, was present. They asked the Commission to give consideration to the designation as a State Secondary Highway of the county road which extends along the north side of the Middle Fork of

the Willamette River from a place known as Jasper, to Lowell. Mr. Morse explained details of their request. He urged such designation as an extension of the Springfield-Creswell Secondary Highway, No. 222, which passes through the town of Jasper. He also mentioned that if necessary, Lane County would consider the assumption of the state's obligation to maintain one of the roads now on the State Secondary Highway System, in Lane County, if the Commission will put the Jasper-Lowell Road on the State Highway System. He also said that the reason the county wants relief from maintaining the road is because it carries so much heavy traffic, and it is beyond the limits of the county to keep the road in proper condition. In the discussion that followed, the suggestion was offered that Lane County might be willing to assume the state's obligation on the Alsea-Deadwood Secondary Highway (Lane County portion) if the state assumed future obligation with respect to the Jasper-Lowell Road. The Commission referred the matter to the Engineer for investigation and report.

Mr. Morse also inquired as to the status of the proposed improvement of the Route "F" Highway at the Oak Hill Crossing of the Southern Pacific Railroad and was informed that this improvement is being held up pending an order from the Public Utilities Commissioner with respect to allocation of costs among the state, county and railroad company.

The Engineer brought up for discussion a request from the City of Albany for state assistance in the improvement of several city streets in close proximity to the State Highway Department Maintenance Headquarters in this city. He exhibited a map showing the streets that are included in the proposed improvement, as follows: Burkhart Street from the south line of the Pacific Highway East to the north line of the Santiam Highway, a distance of one block; that part of the Santiam Highway which extends from the west property line of Geary Street to the north line of the Pacific Highway East; and Geary Street from the south line of the Santiam Highway to the north line of the Pacific Highway East. The Engineer advised that the Burkhart Street improvement extends along the east side of the state highway maintenance property, and that the other two sections will provide a paved roadway around the triangular shaped area at the intersection of the two highways. Because the request reached him only this morning, he said he is not in a position to state how much improvements would cost, nevertheless, he recommended that the Commission join with the city in the work. The Chief Counsel concurred in the recommendation. The Commission deferred a decision in the matter pending investigation and report by the Engineer as to how much the improvement is to cost and to what extent the city will contribute toward the expense. The matter was thereupon referred back to the Engineer and Chief Counsel to discuss with the city officials and report their findings.

The Chief Counsel reported receipt of a letter from the Chairman of the House Roads and Highways Committee in the Legislature, requesting that the members of the State Highway Commission appear before this Committee on Wednesday of this week, March 2nd, for discussion of certain highway legislation. It was agreed that Chairman Banfield and Commissioner Chandler would meet with the Committee at the appointed time.

The meeting recessed for luncheon at 11:30 a.m. and reconvened at 2:00 p.m. Commissioner Schaupp was excused from attending the afternoon session.

The following persons from Reedsport, representing the Lower Umpqua Chamber of Commerce, appeared before the Commission, regarding the improvement of the Umpqua Highway (Highway No. 38); Tom Lillebo, Mayor; W. A. Burdick; Jack Diehl, and Russell Hubbard. Mr. Burdick was principal spokesman for the group. He gave as his understanding that the Highway Commission about two years ago allocated funds for the improvement of this highway between Scottsburg and Reedsport, and he inquired whether or not the Commission intends to do the work this year. He was informed by the Engineer that the Commission authorized an expenditure of $150,000 to improve the worst places, but the sum was not sufficient to finance improvement of the entire sixteen mile section, so it was necessary to limit the work to a section about five miles long which it is planned to advertise for bids in April or May of this year. Mr. Burdick urged the Commission to provide also a definite program for the improvement of the remaining mileage. Chairman Banfield pointed out that moneys available to the Commission must be allocated to the various districts of the state on an equitable basis, and due to the fact that the funds are limited, the Commission can not approve all of the projects that are requested. Moreover, the Commission does not make an advance committment for any project. In providing $150,000 for the Scottsburg- Reedsport section, he said, the Commission was, and still is of the opinion that that is the maximum amount that it can allocate until more funds are provided, and in the event the Legislature makes such additional moneys available, the Commission will be glad to consider an additional allocation for this road on the same basis as it allocates funds to other districts, but no definite committment can be made at this time.

Mr. Burdick then brought into the discussion the matter of revising the Mill Creek Bridge Section of this highway. He urged the straightening of the highway at this point, alleging that it would be possible to span Mill Creek with a much shorter bridge than now exists. The Commission referred the matter to the Engineer for investigation. Others speaking in behalf of the Umpqua Highway improvement were Mr. Tom Lillebo, who urged the adoption of a definite program for the improvement, and Mr. Hubbard, who suggested that the Commission might improve a two-mile section each year until it is completed. Mr. Burdick presented a resolution from the Chamber of Commerce, in which the Chamber goes on record as being in favor of raising the license fees on automobiles from $5 to $10 annually, and the imposition of an additional 1¢ per gallon tax on gasoline sales, without any refunds, and the proceeds to be earmarked and held for expenditure by the State Highway Commission for new construction.

Mr. Diehl brought up for discussion the matter of providing parking areas along the lower Umpqua River for the benefit of fishermen. He advised that due to the narrowness of the highway shoulders, people now are obliged to park their cars partly on the roadway, which creates a dangerous condition, which in his estimation, should be corrected. The Commission referred the matter to the Engineer for investigation and report.

Messrs. E. C. Sammons, President, and Fred G. Johnson, Vice President of the U. S. National Bank of Portland, were present, regarding quick financing of repairs to county roads and city streets which were damaged by reason of the recent adverse weather conditions. It appears that the bank has received inquiries whether or not it would be possible to advance these municipalities sufficient funds to pay the cost of the improvements which are an immediate necessity, with the view in mind that reimbursement would be made to the bank with funds which these municipalities receive from the State later on as their share of the State Highway revenues, but the banks are unable to loan money on such basis. They were informed that the matter of financing emergency repairs to county roads is now before the Legislature, and were referred to Mr. F. L. Phipps, Executive Secretary of the County Judges and Commissions Association, which is sponsoring the legislation.

The Commission discussed with the Engineer the bids received at the morning session, and at 2:30 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the Commission's action being by unanimous vote:

"Marys River Bridge Section on the Kings Valley Secondary Highway near Wrens Station, Benton County; 0.37 mile of highway, and roadbed construction. The low bid for this project was submitted by Lindstrom Brothers, Inc., Portland, at $74,967.00 based on the use of asphalt. They did not submit a bid based on the use of tar. Archie R. Averill, Portland, submitted the next lowest bid, at $76,055.50. He also submitted no bid based on the use of tar. There were six higher bids. The Commission has awarded the contract to Lindstrom Brothers, Inc., the low bidder.

"Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways, in Clackamas, Hood River and Wasco Counties. The Commission received only one bid for this work, being that of Colonial Construction Company, Spokane, Washington, at $48,802.00. The contract has been awarded to the Colonial Construction Company at its bid price.

"Sandy Creek and Rock Creek Bridge Sections on the Coos Bay-Roseburg Highway, in Douglas County. Construction of two reinforced concrete bridges, and 0.57 mile highway roadbed. The Commission received only one bid for this project, being that of Hamilton and Thoms, Eugene, at $119,100.50, based on the use of asphalt. They submitted no bid based on the use of tar. The Commission rejected the bid.

"Ashland-State Line Rock Production Project on the Pacific Highway, in Jackson County. M. C. Lininger & Sons, Medford, submitted the low bid for this work at $29,040.00. Barney B. Helser, Portland, submitted the next low, and only other bid for this work, at $31,120.00. The contract has been awarded to the low bidder, M. C. Lininger & Sons at their bid price.

"Snider Creek-Crater Lake Junction Section of the Sams Valley Secondary Highway, in Jackson County, consisting of 6.25 miles of grading, surfacing, and oiling, and furnishing crushed gravel in stockpiles. The low bid for this work was submitted by Walter Berndt Const. Co., Vancouver, Washington, at $211,458. Inter-City Sand & Gravel Co., Eugene, submitted the next low

bid at $224,598.00. There were eleven higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Walter Berndt Construction Co., when certain conditions have been satisfied.

The Commission considered, approved and signed Agreements, etc., as follows:

Agreement with Southern Pacific Company covering acquisition of slope easements along the Pacific Highway East, between Oregon City and New Era, in Clackamas County.

Agreement with Martin Peterson, Florence, Oregon, re taking of excess or reject materials from the Cape Creek, state-owned quarry, in Lane County.

Agreement with Warren Northwest, Inc., disposing of its claim for extra compensation arising out of its contract for the construction of the South Unit, Steiwer Hill-Albany Section of the Pacific Highway East, Linn County.

Agreement with Washington County providing for county maintenance of the Washington County portion of "Upper Nehalem County Road", after improvement of the same by the state as a federal aid secondary highway project.

Agreement with Columbia County providing for county maintenance of the Columbia County portion of "Upper Nehalem County Road", after improvement of the same by the state as a federal aid secondary highway project.

Permit authorizing Bonneville Power Administration to construct a power transmission pole line over and across the Albany-Lyons Secondary Highway near Thomas Creek, in Linn County.

Bargain and Sale Deed, conveying unto Phillip Tillman and Robert P. Booth a small parcel of land in Eugene; consideration, $10.00.

Project Agreements as follows:

Crane-Princeton Section of the Diamond Valley Highway, Malheur County.

Nyssa (7th St.-1st St.) Section of the Old Oregon Trail, Malheur County.

Cove-Union Section of the Cove Secondary Highway, Union County.

Buell and Salt Creek-Dolph Corners Section of the Dallas-Coast Secondary Highway, in Polk County.

North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, in Harney County.

Gates-Niagara Section of the North Santiam Secondary Highway, in Marion County.

Union Avenue & Denver Avenue Sections of the Pacific Highway, in Portland; Multnomah County.

Smithfield-Elmira Section of the Territorial Secondary Highway, in Lane County.

There being no further business to come before the Commission at this time, the meeting adjourned at 2:45 p.m.

EXHIBIT "A"

Minutes of February 28 and March 1, 1949

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FOOTNOTE (*)

In discussing the acquisition of the right of way for the Vista Avenue-Multnomah County line Section of the Sunset Highway (Items No. 14999 and No. 15200) in the above resolution, the Commission also considered the acquisition of right of way from the City of Portland and from Multnomah County. The Chief Counsel was instructed to negotiate with the City and County officials with respect to the acquisition of such properties on the basis that the State will pay for the properties the actual amounts that the City and County spent for them.

15870

EXHIBIT "B-1"

Minutes of February 28 and March 1, 1949

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Code and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Coos Bay-Roseburg, Pacific, and Alsea Highways are highways under the jurisdiction and control of the State and are, in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing highways with better alignments and which will more adequately serve the traveling public, the Highway Commission relocated the sections of the said highways as hereinafter set forth, and for such purpose and in connection therewith the real properties hereinafter described are necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take all rights of access from property abutting a highway; and

WHEREAS, Coos Bay-Roseburg, Pacific, and Alsea Highways are major highways of the State, and as such carry large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highways should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of highway set forth on said sheets; that the specific use for which each particular parcel of real property is needed and required is as expressly stated thereon; that the name of the record owner, or reputed owner thereof, is likewise set forth, together with the Commission's record file number of each parcel.

2. That the highway facility for which each of said parcels of property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to the acquisition of the respective parcels, it is necessary that there be acquired all rights of access from abutting

EXHIBIT "B-1" (Cont.)

properties to the highways to be constructed in part upon the parcels described upon the attached sheets, except such access reservations as are noted as to each parcel. In this connection, a private access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet; said access to be for ordinary travel only, and shall not be used in connection with any commercial institution or activity which in any manner caters to, invites, solicits from, or is dependent upon the users of said highway. A farm crossing is defined as a right to establish, maintain, and use a crossing of the highway for farm purposes only having a width of not to exceed twenty-five feet; provided, however, that upon the alienation of either of the portions of the property severed by the highway, such right of crossing shall cease. A commercial access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet, said access to be for all lawful purposes.

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of land as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said parcels.

5. That upon the trial of any suit or action instituted to acquire either of said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That the real properties sought to be acquired are described on the attached sheets, consisting of 2 pages, on which sheets are set forth the right of way file number assigned by the Commission, the respective record or reputed owners, the section of highway for which the property is necessary, and the use and purpose for which the property is sought, together with such access reservations as apply to the particular property. (*)

7. That this resolution be entered in full in the minutes and records of the Commission as of the 28th day of February, 1949.

FOOTNOTE (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 127 , under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "B-2"

Minutes of February 28 and March 1, 1949

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Code and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Sams Valley Secondary Highway is a highway under the jurisdiction and control of the State.

WHEREAS, for the purpose of providing highways with better alignments and which will more adequately serve the traveling public, the Highway Commission relocated the section of the said highway as hereinafter set forth, and for such purpose and in connection therewith the real properties hereinafter described are necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheet are needed and required for use in connection with the construction and maintenance of the section of highway set forth on said sheet; that the specific use for which each particular parcel of real property is needed and required is as expressly stated thereon; that the name of the record owners, or reputed owners thereof, is likewise set forth, together with the Commission's record file number of each parcel.

2. That the highway facility for which each of said parcels of property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of land as to the compensation to be paid for the taking, including the damages if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said parcels.

4. That upon the trial of any suit or action instituted to acquire either of said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

15674

EXHIBIT "C"

Minutes of February 28 and March 1, 1949

RESOLUTION

WHEREAS, the Jackson County Grand Jury has called the Highway Commission's attention to the alleged danger on the Jackson County portion of the Green Springs Highway between Ashland and Klamath Falls, due to the lack of guard fence, and

WHEREAS, the Commission has requested its Engineer to make an engineering and traffic study and to examine the past accident record of this section of highway, and

WHEREAS, the Engineer reports in a letter dated February 18, addressed to the Oregon State Highway Commission, that there has been a total of 91 accidents on the 28 miles of this highway in Jackson County during the past three years, and

WHEREAS, the Engineer states that careful examination of the accident record discloses no definite hazard at any one point due to the lack of guard fence, although there is a potential hazard at many places on this road, particularly the hill on the Ashland end, but the Engineer recommends that no guard fence be placed at the present time,

NOW, THEREFORE, BE IT RESOLVED, that the Commission orders the report filed and instructs the Engineer to keep careful watch on this road and to report at any time when the facts indicate that it is necessary to install a guard fence at any particular location on the said highway.

FEB 28 1949

EXHIBIT "E"

Minutes of February 28 and March 1, 1949

R E S O L U T I O N

WHEREAS, the Pacific Highway is one of the major state highways and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that a short distance outside the corporate limits of the City of Eugene there are maintained two public auction marts and a number of service stations, auto courts and other commercial establishments on real property abutting on said highway, and that said auction marts in particular on certain days of the week are patronized by large numbers of people, many of whom park their cars within the right of way limits of said highway and leave said cars so parked for extended perios of time; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Commission a hazard not only to through traffic but to the owners and occupants of the parked cars is created; and

WHEREAS, in the opinion of the Commission public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations by members of its staff, that the parking of motor vehicles along the Pacific Highway between mile post 120.04 (Engineer's Station 568+22) and mile post 120.98 (Engineer's Station 616+80) in Lane County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked cars.

2. That in the opinion of the Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of cars and at the same time provide the degree of safety and convenience which in the opinion of the Commission should be provided the motoring public.

3. That the Commission does further find and declare that the parking of cars for long periods of time on the right of way of said highway within said termini should be prohibited.

4. That the Engineer be and he hereby is instructed to erect at the said termini, and at such points between said termini as in the judgment of the Engineer are necessary to accomplish the purpose of this resolution and

(Cont.)

the action of the Commission as here declared, "no parking on highway shoulders" signs.

5. That a certified copy of this resolution be sent to the owners and operators of said public auction marts, and that a like copy be mailed to the Superintendent of State Police.

6. That the resolution of the Commission adopted February 25, 1946, and providing for a limited parking on the Pacific Highway between Engineer's Station 600+23.3 and Engineer's Station 606+83.3 be and the same hereby is rescinded.

7. That this resolution be entered in the minutes and records of the Commission as of the 28th day of February, 1949.

FEB 28 1949

EXHIBIT "F-1"

Minutes of February 28 and March 1, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Little Sheep Creek Secondary Highway No. 350 known as the West Unit, Sheep Creek Hill Section in Wallowa County, the westerly terminus of which is at Highway Engineer's Station 266+38 of the reconstructed line and the easterly terminus of which is at Highway Engineer's Station 433+50 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Wallowa County and the Highway Commission have entered into an agreement under date of November 7, 1947, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Little Sheep Creek Secondary Highway No. 350 was completed on October 28, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way, which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "A", "G", "J", and "K" and are shown colored in red on map attached hereto and marked "EXHIBIT A", and are more particularly described as follows: (*)

Unit "A"

Beginning opposite State Highway Engineer's Station 282+60 of the relocated Little Sheep Creek Secondary Highway No. 350 in Lot 1, Section 1, Township 3 South, Range 45 East, W. M.; thence easterly via the former route of the Little Sheep Creek Secondary Highway No. 350 to a point opposite State Highway Engineer's Station 288+58 of the relocated Little Sheep Creek Secondary Highway No. 350 at a point 30 feet east of the west line of Lot 4, Section 6, Township 3 South, Range 46 East, W. M.

Unit "G"

Beginning opposite State Highway Engineer's Station 337+50 of the relocated Little Sheep Creek Secondary Highway No. 350 in Lot 1, Section 6, Township 3 South, Range 46 East, W. M.; thence easterly via the former route of the Little Sheep Creek Secondary Highway No. 350 to a point opposite State Highway Engineer's Station 341+90 of the relocated Little Sheep Creek Secondary Highway No. 350 at a point 30 feet east of the west line of Lot 4, Section 5, Township 3 South, Range 46 East, W. M.

Unit "J"

Beginning opposite State Highway Engineer's Station 367+30 of the relocated Little Sheep Creek Secondary Highway No. 350 in Lot 3 of Section 5, Township 3 South, Range 46 East, W. M.; thence northeasterly via the former route of the Little Sheep Creek Secondary Highway No. 350 to a point opposite State Highway Engineer's Station 403+00 of the relocated Little Sheep Creek Secondary Highway No. 350 in Lot, Section 4, Township 3 South, Range 46 East, W. M.

Unit "K"

Beginning opposite State Highway Engineer's Station 403+00 of the relocated Little Sheep Creek Secondary Highway No. 350 in Lot 4, Section 4, Township 3 South, Range 46 East, W. M.; thence northeasterly via the former route of the Little Sheep Creek Secondary Highway No. 350 to a point opposite State Highway Engineer's Station 424+00 of the relocated Little Sheep Creek Secondary Highway No. 350 in the Southeast quarter ($SE\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 33, Township 2 South, Range 46 East, W. M.

shall hereafter be maintained by the County as county roads for the benefit and service of persons living thereon and communities served thereby, but the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said roads may be assumed and exercised by the County Court of Wallowa County, and said roads shall thereafter be maintained by the County for public use.

2. A portion of Unit "J" encroaches on the established right of way of the Little Sheep Creek Secondary Highway No. 350 but the Commission hereby consents that the County Court of Wallowa County may use such part of the established right of way as is necessary for the maintenance of said Unit "J" as a county road and which is not needed for the maintenance or construction of said highway.

3. The sections of the old route of the Little Sheep Creek Secondary Highway No. 350 which, for the purpose of this resolution, are identified as Units "B", "C", "D", "E", "F", "H", and "I" and shown colored in brown on map attached hereto and marked "Exhibit A", and are more particularly described as follows: (*)

shall be abandoned as parts of said highway, and hereafter shall be under the jurisdiction and control of the County and may be vacated or kept by the County for such public use as the County may determine.

4. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

5. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Wallowa County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red and brown on the map attached hereto and marked "Exhibit A"

FOOTNOTE (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 2 under the heading Abandonment and Retention, and said map by this reference is made a part of this minutes entry to the same extent as if copied in full herein.

FEB 28 1949

EXHIBIT "F-2"

Minutes of February 28 and March 1, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Wallowa Lake Highway known as the Elgin-Boswell Ranch Section in Union County, the southerly terminus of which is at Highway Engineer's Station 1302+59.4 of the relocated line and the northerly terminus of which is at Highway Engineer's Station 1635+00 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for state highway purposes; and

WHEREAS, Union County and the Highway Commission have entered into an agreement under date of February 11, 1948, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Wallowa Lake Highway was completed on October 5, 1948, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way, which by reason of the relocation of said highway are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "D" and "F" and are shown colored in red on map attached hereto and marked "Exhibit A", and are more particulary described as follows: (*)

Unit "D"

Beginning at State Highway Engineer's Station 1345+00 of the relocated Wallowa Lake Highway in the Southwest quarter ($SW\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 11, Township 1 North, Range 39 East, W. M.; thence easterly via the former route of the Wallowa Lake Highway to a point opposite State Highway Engineer's Station 1371+70 of the relocated Wallowa Lake Highway in the Northwest quarter ($NW\frac{1}{4}$) of the Southwest quarter ($SW\frac{1}{4}$) of Section 12, Township 1 North, Range 39 East, W. M.

Unit "F"

Beginning at State Highway Engineer's Station 1380+50 of the relocated Wallowa Lake Highway in the Southwest quarter (SW¼) of the Northwest quarter (NW¼) of Section 12, Township 1 North, Range 39 East, W. M.; thence northeasterly via the former route of the Wallowa Lake Highway to a point opposite Highway Engineer's Station 1386+00 of the relocated line of said highway in the Southwest quarter (SW¼) of the Northwest quarter (NW¼) of Section 12, Township 1 North, Range 39 East, W.M.

shall hereafter, pursuant to the provisions of said State-County agreement, be maintained by the County as county roads for the benefit and service of persons living thereon and communities served thereby, but the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said roads may be assumed and exercised by the County Court of Union County, and said roads shall thereafter be maintained by the County as county roads for public travel.

2. The sections of the old route of the Wallowa Lake Highway which, for the purpose of this resolution, are identified as Units "A", "B", "E", "G", "H", "I", "J", "K", "L", "M", and "N", shown colored in brown on map attached hereto and marked "Exhibit A" and are more particularly described as follows: (*)

Unit "A"

Beginning at State Highway Engineer's Station 1302+59.4 of the relocated Wallowa Lake Highway in the Southwest quarter (SW¼) of the Northwest quarter (NW¼) of Section 14, Township 1 North, Range 39 East, W. M.; thence northerly via the former route of the Wallowa Lake Highway to State Highway Engineer's Station 1312+00 of the relocated Wallowa Lake Highway in the Northwest quarter (NW¼) of the Northwest quarter (NW¼) of Section 14, Township 1 North, Range 39 East, W. M.

Unit "B"

Beginning at State Highway Engineer's Station 1327+00 of the relocated Wallowa Lake Highway in the Northeast quarter (NE¼) of the Northwest quarter (NW¼) of Section 14, Township 1 North, Range 39 East, W. M.; thence northeasterly via the former route of the Wallowa Lake Highway to State Highway Engineer's Station 1337+60 of the relocated Wallowa Lake Highway in the Southwest quarter (SW¼) of the Southeast quarter (SE¼) of Section 11, Township 1 North, Range 39 East, W. M.

Unit "E"

Beginning at a point opposite State Highway Engineer's Station 1371+70 of the relocated Wallowa Lake Highway in the Northwest quarter (NW¼) of the Southwest quarter (SW¼) of Section 12, Township 1 North, Range 39 East, W. M.; thence northerly via the former route of the Wallowa

ORDER REDUCING MAXIMUM LOAD LIMITS

ON CERTAIN STATE HIGHWAYS

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

Rogue River Loop Secondary Highway, No. 260
Tiller Trail Secondary Highway, No. 230
Williams Secondary Highway, No. 261
Medford-Provolt Secondary Highway, No. 272
Little Butte Secondary Highway, No. 270
Sams Valley Secondary Highway, No. 271
Coos River Secondary Highway, No. 241
Siletz Secondary Highway, No. 181
Corvallis-Newport Highway, No.33
Corvallis-East Side Secondary Highway, No. 210
Beaverton-Aurora Secondary Highway, No. 141
Hillsboro-Silverton Secondary Highway, No. 140
Woodburn-Estacada Secondary Highway, No. 161
Heppner Highway, No. 52
Mist-Clatskanie Secondary Highway, No. 110
Madras-Prineville Secondary Highway, No. 360
Oregon Caves Highway, No. 38
Redwood Highway, No. 25
Dairy-Bonanza Highway, No. 23
Sherman Highway, No. 42
Pendleton-John Day Highway, No. 28
Beech Creek Secondary Highway, No. 401
Pendleton-Cold Springs Highway, No. 36
Heppner-Spray Secondary Highway, No. 321
The Dalles-California Highway, No. 4
Silver Creek Falls Secondary Highway, No. 163
Weston-Elgin Secondary Highway, No. 330
Mt. Hood Highway, No. 26
North Santiam Secondary Highway, No. 162
Santiam Highway, No. 16
McKenzie-Bend Highway, No. 17
McKenzie Highway, No. 15
Oregon-Washington Highway, No. 8
Sunnyside-Umapine Secondary Highway, No. 332
Athena-Holdman Secondary Highway, No. 334
Havana-Helix Secondary Highway, No. 335

(Cont.)

FEB 28 1949

AND WHEREAS, the above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways during the present period of freezing and thawing, and in order to protect said highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced during such period;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon said roads during said period shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said roads were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways that the maximum total weight of load and vehicle which shall be permitted upon said roads during the said period, commencing on the dates hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to-wit:

Rogue River Loop Secondary Highway, No. 260, entire length, in Josephine County; effective date - January 31, 1949

Tiller Trail Secondary Highway, No. 230, from Josephine County line to Trail, in Jackson County; effective date- January 31, 1949

Williams Secondary Highway, No. 261, entire length, in Josephine County; effective date- January 31, 1949

Medford-Provolt Secondary Highway, No. 272, entire length, in Jackson and Josephine Counties; effective date- January 31, 1949

Little Butte Secondary Highway, No. 270, from M.P. 1.0 to M.P. 14.0, in Jackson County; effective date- January 31, 1949

Sams Valley Secondary Highway, No. 271, in Jackson County, entire length; effective date- January 31, 1949

Coos River Secondary Highway, No. 241, from Empgren Ferry crossing to a point five miles North of Allegany, in Coos County; effective date- February 3, 1949

(Cont.)

FEB 28 1949

Siletz Secondary Highway, No. 181, in Lincoln County, entire length; effective date- February 4, 1949

Corvallis-Newport Highway, No. 33, from Toledo city limits to Philomath, in Lincoln and Benton Counties; effective date- February 4, 1949

Corvallis-East Side Secondary Highway No. 210, from Peoria County Road junction to Albany city limits, in Linn County; effective date- February 4, 1949

Beaverton-Aurora Secondary Highway, No. 141, from Beaverton city limits to Wilsonville, in Washington and Clackamas Counties; effective date- February 10, 1949

shall be as follows: The maximum combined weight bearing on the surface of the highway at contact with the tread on all of the wheels of a vehicle or combination of vehicles shall not exceed thirty-six thousand (36,000) pounds; and, the maximum combined weight bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed eight thousand (8000) pounds.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O.C.L.A., shall be in full force and effect from the effective date hereinabove specified, until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of each of the above-described highway sections and at important crossroads on said highways, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each County affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 28th day of February, 1949

Minutes of February 26 and March 1, 1949

OREGON STATE HIGHWAY COMMISSION

RESOLUTION LIFTING REDUCED LOAD LIMIT ON THE

ALSEA HIGHWAY

WHEREAS, on the 24th day of January, 1949, at a meeting of the Oregon State Highway Commission, all members being present and participating. the Commission passed and adopted a resolution reducing the maximum load limit on the

> ALSEA HIGHWAY NO. 27, from Hatchery Creek, (M.P. 12.0) to a junction with the Corvallis-Newport Highway at Philomath, (M.P. 59.1) in Benton and Lincoln Counties; effective December 31, 1948; and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on that portion of said section of the said above-named highway from the summit of the Coast Range (M.P. 49.42) to the said junction point at Philomath (M.P. 59.1);

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the portion of the said

> ALSEA HIGHWAY NO. 27, which extends from M.P. 49.42 at the summit of the Coast Range to M.P. 59.1 at Philomath, in Benton County,

be, and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on such section of said highway hereafter shall be the maximum load limit provided by law, provided however, that the said load restriction shall remain effective on the section of said highway between Hatchery Creek, (M.P. 12.0) and the summit of the Coast Range (M.P. 49.42).

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished the county clerk of Benton County, in which County said section of said highway is located, and the Superintendent of the Department of State Police for his information.

Dated this 28th day of February, 1949.
